WARNING

Every effort has been made to ensure that the information contained in this *Guide* is correct. However, it will be clearly understood that this publication is intended as a guide only, that the information cannot be *Guaranteed* correct and that the final responsibility must (as always) rest with the Shipmaster.

At certain ports, items of navigational routeings and aids have been included as a means of general guidance only. Shipmasters should have in mind that full and due reference MUST ALWAYS be made to corrected charts of the area, to the appropriate Notices to Mariners, and all or any other navigational notices, warnings or amendments issued by proper Authoriies and/or navigational aid services.

The sketch maps are for general assistance and must not be used for navigational purposes. In particular, the shapes of buoys should be disregarded since these are indicated by varying symbols which may be consequent upon local usage and without resemblance to internationally applied symbols.

PLANS

All plans, unless otherwise stated, are reproduced by kind permission of the Port Authority.

IMPORTANT NOTICE

Users of previous editions of the guide are advised that some older Shipmaster's Reports and navigational information mentioned in other publications and pilots have been withdrawn from this edition of the guide. They may therefore wish to retain copies of previous editions for future reference.

All rights reserved. No part of this publication may be reproduced, stored in aretrieval system or transmitted in any form or by any means, electronic, mechanical, photo-copying, recording or otherwise without the prior permission of the publishers.

Shipmasters, Shipowners or Managers, Port Authorities, Administrators and Agents, are earnestly requested to assist our work in up-dating the Guide *by providing written comment, information, amendments or corrections and additional details of any ports or terminals, to the following address:*

SHIPPING GUIDES LIMITED,
SHIPPING GUIDES HOUSE,
75 BELL STREET,
REIGATE,
SURREY,
RH2 7AN,
ENGLAND

All communications will be acknowledged and will be most useful, since it is only by this means that the *Guide* will remain of great value to the user and will be up to date and thoroughly professional in content.

For assistance and guidance in the submission of information, a reprint of the items presently covered by the *Guide* is placed hereunder. Additional items will also be most welcome.

N.B. PLANS, DIAGRAMS, DRAWINGS AND SKETCHES: As you will note, this 1995/96 edition of "Guide to Port Entry" contains over three thousand three hundred plans and mooring diagrams that have been reproduced from plans and drawings very kindly sent to us by numerous Port Authorities, Agents and shipboard personnel. We hope that the special plan section will prove interesting and useful.

Presently however, the special plan section is to an extent incomplete, since there are many ports and mooring facilities for which we have not yet received the necessary plans for reproduction purposes. We are anxious to secure plans, diagrams, drawings or sketches of ports and facilities not presently shown in our special plan section, and therefore request that Port Authorities and/or Agents at the places concerned be kind enough to pass us this data together with the necessary permission for reproduction. We would also be very grateful if ship's officers calling at ports not already covered in our special plan section, could find it possible to provide us with diagrams or sketches of the facilities which would be suitable for reproduction in our later editions and/or which might be re-drawn as required by our own art department prior to reproduction.

Latvia

RIGA: 56.58 N. 24.06 E. (See Plan)

LOCATION: The Port of Riga is situated on the banks of the Daugava River falling into the Gulf of Riga 12 miles upstream from the mouth to the bridge at the banks of Milgravis Channel and Sarkandaugava Creek.

GENERAL: The Port is open for navigation all year round, but ice-breaker assistance is required for about 4 months in the year.

Ice-breaker "Varma" 17,000 h.p. (call sign "YLKV") is available to assist.

In severe Winters, there are ice conditions in the Gulf of Riga and Irbes Strait from January to April, and drift ice may form in navigable waters. Considerable changes of water level may be caused by strong winds and variation in atmospheric pressure.

No tides. Maximum rise of water level may reach 2.0 m. and maximum fall 1.0 m. from zero water level/mean water level observed over a period of many years. Usually the fluctuation of water level is between +0.60 m. to −0.60 m. During ice conditions, it usually remains at −0.30 m.

DOCUMENTS:

1 copy Master's Declaration.
4 copies General Declaration.
2 copies Cargo Declaration.
Bills of Lading
Manifests.
2 copies Stores List.
2 copies Crew Effects Declaration.
4 copies Crew List.
4 copies Passenger List.
1 copy Maritime Declaration of Health.
2 copies Veterinary and Phyto-Sanitary Declaration.

PILOTAGE: Compulsory, and operates around the clock. Government Pilots are provided. Agent will arrange Pilot on receipt of ETA at Buoy "B" (Pilot Buoy), which is to be given 96 hours, 48 hours, 24 hours and 4 hours prior to arrival.

The following information is to be forwarded together with the ETA:

(a) Name and type of vessel.
(b) Nationality and Owner.
(c) ETA.
(d) LOA, breadth, moulded depth, height of deck cargo.
(e) Actual draft and draft in fresh water.
(f) Type and quantity of cargo.
(g) Last port of call and passengers (if any).

Pilot meets vessel at Buoy "B" (Lat. 57° 06′ N., Long. 23° 57′ E.).

In case of bad weather and Pilot cannot embark/disembark vessel at Buoy "B", ships have to wait outside, at the quay or take Pilot to next safe port of call.

With permission of Traffic Monitoring Service ships with length not exceeding 100 m. with draft less than 6.00 m., Pilots can embark/disembark at Rinuzi Leading Line.

DEEP SEA PILOTAGE: See "Baltic Deep Sea Pilotage".

Vessels bound to/from Riga, with deep draft and not familiar with ice conditions, are advised to have Pilot onboard from/to Ventspils Roads.

The order for Pilot from Ventspils to Riga must be given 48 hours prior to arrival at Ventspils Roads and 24 hours prior to departure from Riga.

ENTRANCE CHANNEL:

Ship Channel	*Breadth* (m.)	*Max. Draft*[1] (m.)	*Airdraft* (m.)	*Remarks*
From Buoy B up to North Rinuzi Mooring Buoys (North Rinuzi Roads)	100.0	12.5[2]		
From North Rinuzi Mooring Buoys up to South Rinuzi Mooring Buoys (South Rinuzi Roads)	100.0	12.5[2]		
From South Rinuzi Mooring Buoys up to the entrance into Export Harbour	100.0	10.06	52.0[3]	
From Export Harbour Entrance up to Passenger Terminal		8.0		
Milgravis Canal up to Riga Shiprepair Yard's Docks		9.05		
Sarkandaugava Channel up to Berth JM-16 (Tanker Berth)		7.45		
Sarkandaugava Channel between Berth JM-16 and Berth SD-5 (Man-Tess Tanker Berth)		7.45	32[3]	Vessels of greater airdraft may be piloted in/out, subject to a special permission from the Harbour Master.
Mangalsalas Basin Approaching Channel	60.0	6.0		

Note:

[1] With zero mean water level.

[2] For inbound vessels only; going out from North or South Rinuzi Mooring Buoys for outer roads, the maximum draft is restricted to 10.06 m.

[3] Under air temperature up to +35°C.

ANCHORAGES: The best Outer Roads Anchorage is 1 mile West of Buoy "B" and is advised by Traffic Monitoring Service on VHF Channel 9.

Depths at the anchorage are from 32 m. – 35 m., bottom is mud and sand.

Roads are open to winds from S.W. to N.E. directions and unsafe for anchoraging in Autumn when these winds prevail.

With heavy waves in Outer Roads, ships are advised to leave anchorage for shelter in port or proceed to the open part of Gulf of Riga.

For Inner Roads Anchorage, Inner Roads and Turning Basin information, see Table below.

Inner Roads, Turning Basins and Anchorage:

Name	*Length* (m.)	*Breadth* (m.)	*Max. Draft* (m.)	*Remarks*
Passenger Terminal Roads (Downstream from Berth No. JPS-1 50 m. up to N. Andrejostas Lightbeacon).	600	250	8.0	Anchorage allowed (muddy clay, sand).
Andrejsala Roads (Downstream from N. Andrejostas Lightbeacon).	600	300	8.0	Anchorage allowed (muddy clay, sand).
Export Harbour (Eksportosta) Roads (From the beginning of Berth No. EO-9 to the end of Berth No. EO-15).	1,000	240	10.06	Anchorage allowed (muddy clay, sand).
Kundzinsala Roads (Opposite to Container Terminal from Berth No. KS-32 to Berth No. KS-34, both lengths inclusive).	450	400	10.06	Anchorage allowed (muddy clay, sand).
South Rinuzi Roads or South Rinuzi Mooring Buoys.	290		12.5	
North Rinuzi Roads or North Rinuzi Mooring Buoys.	300		12.8	
Milgravis – Sarkandaugava Turning Basin.	220	220	6.5	
Sarkandaugava Turning Basin (Opposite to Berth No. SD-5).	220	220	7.45	

MAX. SIZE: Max. LOA 225 m. Also see Table below.

Vessels with draft exceeding 10.06 m. are loaded/unloaded at Rinuzi Mooring Buoys 3 miles upstream breakwaters.

Permissible Size of Vessels:

Area of the Port	*Max. Length*[1] (m.)	*Max. Beam* (m.)	*Airdraft*[4] (m.)
North Rinuzi Roads or North Rinuzi Mooring Buoys	225.0 (256)[1]	35.0	
South Rinuzi Roads or South Rinuzi Mooring Buoys	225.0	35.0	
Mangalsalas Harbour	105.0[2] (131)[1]	18.0	
Kundzinsala (Container Terminal)	225.0	35.0	52.0
Berths No. PM-16/17 and PM-19 of Pilmuiza Harbour[3]	170.0	30.0	52.0
Berth No. PM-21 of Pilmuiza Harbour[5]	200.0	35.0	52.0
Export Harbour (Eksportosta)	225.0 (256)[1]	35.0	52.0
Berths of Andrew Island (Andrejsala)	200.0	30.0	52.0
Passenger Terminal	200.0 (210)[1]	30.0	52.0
South Harbour of Fishery Port	175.0	25.0	
Riga Shiprepair Yard	200.0 (242)[1]	35.0	
Daugavgriva Harbour (Berths from DA-1 to DA-6 or Karaosta)	120.0 (155)[1]	20.0	

Note:

[1] Figures in brackets show LOA of the biggest vessels which have been berthed under favourable weather conditions with special permission of the Harbour Master.

[2] For sea-going vessels only, while sea-river type vessels are not restricted in their LOA.

[3] Vessels of maximum size are allowed to be berthed, subject to Berths PM-16 and PM-20 being free from other vessels.

[4] Under air temperature +35°C.

[5] Vessels of maximum size over 9 m. in draft may be moored/unmoored if current in Daugava River is under 1 knot.

HEALTH: Pratique obtainable after vessel moors when Health Officials visit vessel with Immigration and Customs Officers.

Health Inspector to be informed of any medical assistance required.

RESTRICTIONS: Vessels must have 0.45 m. under-keel clearance at the quay.

Vessels are to proceed along the Daugava River at a speed adopted to the conditions and the type of vessel, causing no backwash along the river banks and not exceeding 8 knots.

Traffic is suspended when winds exceed 14 m./sec. or visibility is less than 4 cables.

Passage of the Daugava River is prohibited for ships having anchors under water.

The velocity of the Daugava River water stream rises sharply during discharge of water through the overflow weir of Riga Hydroelectric Power Station and can reach 2 – 3 knots.

With currents exceeding 2 knots, movements in several basins are difficult and sometimes prohibited by Harbour Master.

Due to sandy bottom and to avoid damage to the underwater parts of a berth, vessel must not exceed "dead slow ahead/astern" revolutions on her main engine until the stern of the ship is at least 15 m. from the quay.

RADIO: Vessels can establish ship-shore radio contact via Riga Radio Station, operating 24 hours a day.

All vessels navigating or laying at anchor in Port of Riga waters are to be contactable on VHF Channel 9, and if possible, Channel 16.

VHF:

Call Sign	*Channel*	*Notes*
Riga Radio – 1	16, 27	Telephone connections
Riga Radio – 67	16, 21	Telephone connections
Traffic Control	16, 09	Traffic Monitoring Service
Port Control	09	Port Control
Riga Radio – 31	14	Commercial Port Dispatcher
Riga Radio – 35	35	Fishery Port Dispatcher
Riga Radio – 13	30	Riga Shipyards Dispatcher

All Masters of inbound vessels, 10 nautical miles off Buoy "B", are obliged to advise Traffic Monitoring Service via Channel 9.

Any movement of vessels in port waters is prohibited without permission of Traffic Monitoring Service.

Traffic Monitoring Service provides navigational, hydrographic, hydrometeorological and other information to Masters.

At 0815 hrs. and 1700 hrs. local time, Port Control broadcasts weather reports on Channel 9.

RADAR/VTS: Waterborne traffic within port limits and within 10 nautical miles of Buoy "B" is regulated by Traffic Monitoring Service on VHF Channel 9.

Subject to a special payment, Traffic Monitoring Service controls the position of vessels by radar.

TUGS: The number of tugs necessary for vessel is determined by Master on Pilot's advice. Harbour Master has determined compulsory use and minimal quantity of tugs to be used in several cases.

Notes:

[1] In case Clause 29.5 is violated, the depth shown herein becomes information only. Masters should note, that water level within limits of the Port of Riga under ice conditions is −0.3 m.

[2] This is the maximum draft to moor a vessel alongside M/V "Apse" which has LOA 145 m.

[3] Only vessels under 70 m. in length and equipped with side thrusters are allowed alongside the berth.

[4] Vessels to be moored alongside the barges, making total 26 m. breadth.

[5] Off end of the berth/jetty.

[6] Inner end of the berth/jetty.

[7] Maximum draft along the berth closer to Southern Gate is 6.5 m., while closer to Northern Gate is 5.5 m.

[8] Maximum allowable LOA for vessels to moor is 100 m.

[9] Only vessels under 56 m. in length and equipped with side thrusters may be brought alongside.

[10] The maximum draft is shown for a vessel moored at distances respectively 6.0 m. and 12.5 m. from the quay.

[11] Permissible for vessels to be moored alongside a barge and the quay.

[12] Any vessel to be moored with her port side alongside and may not exceed draft 5.3 m. forward and 6.0 m. aft.

* Under construction.

** Current caused restrictions.

† In project.

†† It is forbidden to drop anchors.

‡ Tidal restrictions. Towage compulsory.

CRANES: Cranes of up to 40 tons capacity are operated on the quays and by warehouses. There are also floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intra-port transport.

SPECIALISED CARGO HANDLING FACILITIES: Berths PM 16-19 are suitable for handling of ships type Ro-12, Ro-30 and Ro-60.

BRIDGES: None. Airdraft on Daugava Fairway is 52 m. and on approaches to Sarkandaugava Berths SD-4, SD-5, the airdraft is 32 m. The Harbour Master may permit passage of ships with greater airdraft to Sarkandaugava Quays.

MEDICAL: All medical assistance available.

STEVEDORES: Master's and/or Shipowner's information of cargo details, stowage, etc., is required in advance. Information should be addressed to Agent in Riga.

DENSITY: 1002 (approx.).

FRESH WATER: Available. Delivered from shore or by barge to Inner Roads.

FUEL: Bunkers are supplied by barges during loading or discharging of non-inflammable cargoes.
CONSULS: Canada, Denmark, Finland, France, Germany, Italy, Netherlands, Norway, Poland, Russia, Sweden and U.S.A.
REPAIRS: All kinds of repairs for hull, machinery, radio and navigational equipment to vessels with deadweight up to 30,000 tons.
GANGWAY/DECK WATCHMEN: Recommended. These duties normally performed by crew.
OPENING/CLOSING HATCHES: Opening and closing of hatches is usually done in accordance with conditions of Charter Party.
CUSTOMS ALLOWANCES: Usual restrictions on quantities.
REPATRIATION: Crew changes and repatriation possible.
AIRPORT: International airport available. Internal flights between Riga and most cities possible.
TIME: GMT plus 3 hours in Summer, and GMT plus 2 hours in Winter.
HOLIDAYS: January 1st; Good Friday; Easter Sunday; May 1st; First Sunday in May; June 23rd and 24th; November 18th; December 25th, 26th and 31st.
TELEPHONES: Installation and use charged according to existing tariffs.
SHORE LEAVE: Crew allowed ashore.
IDENTIFICATION CARDS: Seaman's Book required.
AUTHORITY: The Port of Riga Authority, 6 Eksporta Street, LV-1227 Riga, Latvia. *Tel:* 371-2-329224, 371-2-329235. *FAX:* 371-8830215, 371-9-348967.

AGENT: Riga Shipping Agency Ltd., 13 Mazapils Street, LV-1050 Riga, Latvia. Tel: (371-8) 820250, (371-2) 210796. Telex: 161318 Risag Su, 161366 Rigag Su. Fax: (371-2) 830304.

VENTSPILS: 57.24 N. 21.33 E. (See Plan)

GENERAL: A Baltic Sea port, Ventspils is situated at the mouth of the Venta River. Ventspils is ice free throughout the year.

There are periodical alterations in the water level of the Venta River, chiefly due to the effects of the wind. The rise of the water level is usually due to moderate Westerly winds, and the fall is caused by Easterly winds.

The maximum rise of the water level is observed in the Venta River at the time of Spring floods and during Winter time.

The port of Ventspils aquatorium includes the Avant-port, the Fishery Harbour and the Commercial port. A fairway, direction 323.6° – 143.6°, 130 m. wide leads to the port from seaward of Reception Buoy "Venspils-B".

The West fairway direction 289.9° – 109.9°, 130 m. wide from the "Ventspils-A" Buoy. Both fairways are suitable for all vessels. The draft of vessels passing through the fairway should not exceed 12.50 m. (FW).

Vessels can enter the port by this fairway only after having obtained the Harbour Master's permission, as after continuous Westerly winds the fairways have soundings of 11.0 m. or less.

DOCUMENTS: *Clearance at Latvian Ports:*

1. All vessels arriving from foreign ports or foreign waters, or sailing to foreign ports or waters, shall be cleared by state authorities at the ports of Riga, Ventspils, Liepaja, Pavilosta and Salacgriva, in accordance with the regulations of clearance by state authorities at Latvian ports.

   All persons without Seaman's Registration Books on board the above mentioned vessels shall have passports with the visas of the corresponding countries.
2. After having been cleared at one Latvian port, the vessel has the right to enter another Latvian port without clearance, only notifying the respective Harbour Master.

Clearance of Vessels Arriving at Latvian Ports from Foreign Ports or Foreign Waters:

1 copy Master's Declaration.
4 copies General Declaration.
2 copies Cargo Declaration.
Bills of Lading – To be shown.
2 copies Ship's Stores Declaration.
2 copies Crew's Effects Declaration.
5 copies Crew List.
5 copies Passengers' List.
1 copy Maritime Declaration of Health.
2 copies Veterinary and Phyto-Sanitary Declaration.

The Order for Drawing-up and Submitting the Documents:

1. Prior to vessel's arrival at a Latvian port, the Master is obliged to fill in and sign "Maritime Declaration of Health" and "Veterinary and Phyto-Sanitary Declaration", which are delivered on board by the Pilot.
2. After drawing up above mentioned declarations, Pilot notifies the VTS about their contents on VHF. The VTS forwards this information to the vessel's Agent.
3. The vessel's Agent notifies the Sanitary-Quarantine, Veterinary Control and Phyto-Sanitary Authorities about the contents of the Master's Declarations.
4. The Sanitary-Quarantine, Veterinary Control and Phyto-Sanitary Authorities, according to the contents of the Maritime Declaration of Health and Veterinary and Phyto-Sanitary Declaration, decide if it is necessary to come on board the vessel, having arrived at the port and inform the vessel's Agent of their decision.
5. If the authorities decide that their presence on board of the vessel for her clearance is necessary, they come on board together with the vessel's Agent and make her clearance.
6. Immigration and Customs Authorities are notified by the vessel's Agent 2 hours prior to her mooring. Immigration and Customs Authorities arrive on board after vessel's mooring and make her clearance.

Clearance of Vessels Sailing to Foreign Ports and Foreign Waters: Documents to be submitted:

2 copies Master's Declaration.
3 copies General Declaration.
2 copies Cargo Declaration.
Bills of Lading – To be shown.
5 copies Crew List.
5 copies Passenger List.
2 copies Sailing Permit (one copy to be submitted to the Pilot on sailing).

Drawing up and Submitting of Documents: 2 hours prior to sailing, the Master shall submit the Master's Declaration, Crew List and Passenger List to the Harbour Master.

After receiving the documents mentioned above, the VTS immediately notifies the Immigration and other authorities about vessel's sailing. The above mentioned authorities carry out vessel's clearance either arriving on board or via the vessel's Agent.

Vessel's Clearance Arriving from Latvian Ports or Latvian Waters: Documents to be submitted:

1 copy Master's Declaration.
2 copies Cargo Declaration.
2 copies Crew List.
2 copies Passenger List.
Bills of Lading – To be shown.

Drawing up and Submitting of Documents: The Master or his Agent submit Master's Declaration, Crew List and Passenger List to the Harbour Master, Cargo Declaration to the Customs Authorities, and Master's Declaration and Passenger List to the Immigration Authorities.

Outward Clearance of Vessel's Sailing from one Latvian Port to another or to Latvian Waters: Documents to be submitted:

1 copy Master's Declaration.
2 copies Cargo Declaration.
2 copies Crew List.
2 copies Passenger List.
Bills of Lading – To be shown.
2 copies Sailing Permit (one copy to be submitted to the Pilot on sailing).

Vessel's Outward Clearance: At least 2 hours prior to leaving the port, the vessel's Master or his Agent submit Master's Declaration, Crew List, Passenger List and Bills of Lading to Harbour Master, Cargo Declaration, Crew List and Passenger List to the Customs Authorities, and Crew List and Passenger List to the Immigration Authorities. The Harbour Master's Permit to leave the port is valid for 6 hours. After 6 hours it has to be renewed.

DEEP SEA PILOTAGE: See "Baltic Deep Sea Pilotage".
PILOTAGE: Pilotage is compulsory for entering, shifting and leaving the port for all vessels exceeding 70 m. LOA, and for all tankers with LPG/LNG or chemical cargoes, regardless of length.

Pilots board and leave vessels in the areas of Reception Buoys "Ventspils-A" and "Ventspils-B". Pilot service is available round the clock when entering and leaving the port.

Port Control on Channels 16, 9 and 67.

ANCHORAGES: Anchorage in the outer port road for vessels loaded with chemical cargoes is allowed in Area No. 50, co-ordinates:

Lat. 57° 29.75′ N.	Long. 21° 28.62′ E.
Lat. 57° 29.12′ N.	Long. 21° 29.90′ E.
Lat. 57° 30.82′ N.	Long. 21° 31.75′ E.
Lat. 57° 31.48′ N.	Long. 21° 30.40′ E.

Area 50A: For vessels drawing over 10.0 m. co-ordinates:

Lat. 57° 31.5′ N.	Long. 21° 22.6′ E.
Lat. 57° 31.2′ N.	Long. 21° 33.5′ E.
Lat. 57° 30.2′ N.	Long. 21° 21.0′ E.
Lat. 57° 29.6′ N.	Long. 21° 22.8′ E.

Anchorage in outer port road for tankers, vessels loaded with explosive or inflammable cargoes and also for vessels holding up in quarantine is allowed in Area No. 51, co-ordinates:

Lat. 57° 29.40′ N.	Long. 21° 28.82′ E.
Lat. 57° 28.08′ N.	Long. 21° 27.15′ E.
Lat. 57° 27.90′ N.	Long. 21° 30.80′ E.
Lat. 57° 27.02′ N.	Long. 21° 28.72′ E.

Area 51A: For vessels drawing under 5.0 m. co-ordinates:

Lat. 57° 27.8′ N.	Long. 21° 31.2′ E.
Lat. 57° 27.8′ N.	Long. 21° 33.7′ E.
Lat. 57° 26.4′ N.	Long. 21° 31.2′ E.
Lat. 57° 26.4′ N.	Long. 21° 33.7′ E.

Anchorage in outer port road for all the other vessels is allowed in Area No. 52, co-ordinates:

Lat. 57° 27.98′ N.	Long. 21° 26.40′ E.
Lat. 57° 26.65′ N.	Long. 21° 24.87′ E.
Lat. 57° 26.05′ N.	Long. 21° 27.10′ E.
Lat. 57° 26.21′ N.	Long. 21° 28.88′ E.

These Areas are announced by Notices to Mariners. Depths in the anchorage are from 10 m. to 12 m. The bottom is sand; the holding ground is good.

When the wind is over 20 m./sec., it is recommended that vessels weigh anchor and drift in order to avoid losing an anchor.

The Master of a vessel has to inform the Vessel Traffic Service through their Agent of the exact position of the anchorage stating the bearing and the distance from the North breakwater lighthouse.

The anchorage in the outer road is not safe during strong Westerly winds therefore vessels are recommended to drift while awaiting entry to the port or to go to sheltered places situated in the areas of the Kolkasrags Point and the Gotland Islands.

MAX. SIZE: *Tankers:* Max. LOA 235 m. With special permission from the Harbour Master, LOA may be increased to 250 m. – 255 m. Max. draft 12.50 m. in fresh water.

Cargo vessels: Max. LOA 230 m. Max. draft 11.50 m. in fresh water. Limitations depending on type of cargo to be handled.

When proceeding along the fairway and passing through the Venta River channel, vessels should have speed not exceeding 5 knots.

HEALTH: Pratique obtainable after mooring. Sanitary Inspector visits vessel after mooring together with Immigration and Custom House Officer. If medical care required the Sanitary Inspector has to be informed.

It is strictly forbidden to throw any type of garbage materials overboard from the ship into water areas of the port (bilge water, sanitary water and other infected pollutants). There are three self-propelled barges for these services.

Note: Pratique may be granted on arrival in the roads if vessel reports "Healthy" by means of radio, radio-telephone, etc.

RADIO/VHF: Radio contact should be established via the Ventspils Radio-1 Port Radio Station which operates 24 hours a day.

Station	*Call Sign*	*Channel*
Port Radio	Ventspils Radio 1	16, 7, 22, 26, 27
Port Dispatcher	Ventspils Radio 2	16, 9, 10
Port Control	Ventspils Radio 5	16, 9
Port Fleet	Ventspils Radio 6	9
Radar Station	Ventspils Radio 9	16,14
Dispatcher oil/ chemical area	Ventspils Radio 15	16, 33
Traffic Control (SUDS)	Ventspils Radio 17	16, 9, 30, 67
Sea Channel	Ventspils Radio 20	16, 29
Bunker Service	Venoil	33

All vessels should maintain a continuous listening watch on Channel 9 whilst within the area.

ETA: The Master of a vessel shall notify, via his Agent, the Harbour Master of the estimated time of arrival 48 hours in advance, repeating it 24 hours later, and giving the final information 4 hours before vessel's arrival at the Pilot Embarkation Buoy "A" or "B".

The Master of a vessel shall furnish the following information:

Vessel's name, call sign and nationality.
Estimated time of arrival (date and hour).
Vessel's overall length and draft.
Quantity and denomination of cargo.
Vessel's Agent.

VTS: Traffic Control on VHF Channels 16, 9 and 67.

RADAR: The port has a Shore Radar Vessels' Control System.

TUGS: Use of tugs for tankers and gas tankers is compulsory. For dry-cargo vessels, the necessity and number of tugs for entering and leaving the port or shifting is determined by the Master with Pilot's agreement, in accordance with the weather conditions and other factors.

Normally tugs join vessels within the port area.

BERTHING: Berthing of vessels and shifting berths is carried out round the clock. Vessels having length over 185 m. and draft over 9.5 m. (FW) when approaching the port through the Venta River Channel are allowed to enter or leave the port, moor and shift berth during the day only and when winds do not exceed Force 5.

Cargo berths with depths alongside up to 11.9 m. situated on the right bank of the Venta River are equipped for handling general, bulk cargoes and metals. Berths of the Avantport are equipped for handling crude oil, liquid gas chemicals and oil products. They can receive vessels with the maximum permitted draft of up to 12.50 m. (FW) (at the datum at Kronstadt). There are covered warehouses and open concrete floor sheds in the port.

There is a potash handling plant.

BULK CARGO FACILITIES: *Handling Rates:* Potash 15,000 tons/day. Steel/metal products 1,500 tons/day.

CRANES: Quays are equipped with electric cranes of up to 45 tons capacity. There are floating cranes of up to 100 tons capacity, cargo handling equipment for bulk cargoes and machinery.

STEVEDORES: Master's and/or shipowner's information of cargo details, stowage – especially for ships with inward general cargoes – is required in proper time. Information has to be addressed to Agent in Ventspils.

ETA notification 48, 24 and 4 hours before arrival to Agent in Ventspils.

MEDICAL: Hospital facilities available. Advance notice desirable, however depends on kind of sickness. Master should place orders concerning inoculations, vaccination, fumigation, hospitalisation and etc., with representative of Sanitary Inspection. Veterinary Certificate is compulsory for all kinds of animals and cargoes of animal origin; phyto-certificate is compulsory for cargoes of vegetable origin.

TANKERS: Report: October 1993.

Operator: Ventspils Port Oil Terminal. Tel: 68690.

Min. Height of Manifold (m.)	3.0	3.0	3.0	3.0	3.0

Note: Berths No. 28 and 29 have the same characteristics, and Berths No. 31 and 32 have the same characteristics. There are a total of 7 berths.

Ballast Facilities: Shore reception facilities accept up to 15,000 tonnes. Deballasting rate up to 5,800 cu.m./hr. The port does not accept ballast if chemicals or leaded cargoes were onboard.

Products handled:

Berths No. 28 and 29: Gas Oil, Jet Kerosene, Jet Fuel.
Berths No. 30 and 31: Gas Oil.
Berth No. 32: Semi-Goudron and Crude Oil.
Berth No. 34: Methanol, Isobutanol, Monoetilen-Glycol, Nitrile-Acril Acid, Superphosphoric Acid, Glycerine.
Berth No. 36: Methanol and Ammonia.

Loading Rates: Oil products 2,200 t.p.h. LPG 1,200 t.p.h.

DENSITY: In port about 1002.

FRESH WATER: Fresh water available, delivered from shore or by barge (capacity 450 tons).

FUEL: All grades available subject to prior inquiry. Bunkers can be taken from the oil jetty or supplied by lighters.

CONSULS: No Consulates.

REPAIRS: Small deck and engine repairs, diving inspections can be carried out.

DRY DOCKS: None.

SURVEYORS: Maritime Register of Shipping (Russia), Saybolt and SGS Latvia Ltd.

GANGWAY/DECK WATCHMEN: Service of watchmen recommended; however, Master's option.

HATCHES: Opening and closing of hatches is normally done by the ship's crew. However, this will be done by stevedores at extra charge if requested by Master.

CERTIFICATES: Required to be on board:

International Tonnage.
International Class.
Load Line.
Safety Equipment.
International Radio.
Derat Certificates.
Certificate of Financial Security in respect of civil liability for oil pollution damage, 1969.

CUSTOMS ALLOWANCES: There is no restriction for crew use and bond locker is not sealed.

REPATRIATION: Repatriation of crew left behind by a vessel in hospital is arranged by other tramp-ships with Master's consent or by rail or air after the necessary documents have been arranged.

TIME: GMT plus 2 hours all year round.

HOLIDAYS: January 1st; April 17th (Easter); June 23rd and 24th (Midsummer's Day Holiday); 18th November (Day of Independence); December 25th, 26th and 31st (Christmas and New Year). Cargo work never stopped on holidays, except New Year.

POLICE/AMBULANCE/FIRE: If required have to be called through Maritime Agency.

TELEPHONES: It is possible to place telephones on board.

SERVICES AVAILABLE: Tankers' deballasting installation for slops; service for radar and VHF repairs; compass adjusting; workshop for ordinary deck and engine repairs; ship chandler service; bunker, water, garbage removal, bilge cleaning, surveyors.

SHORE LEAVE: Crew members allowed ashore.

GARBAGE DISPOSAL: Vessels shall deliver rubbish, garbage, any other solid waste, dirty ballast, bilge water, feces, and other sewage waters to special cars/lorries/barges. Master should give an order through agent. Services to be charged according to the tariffs effective at the time.

WASTE OIL DISPOSAL: Collection service available, capacity of shore tanks 55,000 cu.m./day, rate 5,800 cu.m./hour. Charges: £10/hour, minimum 6 hours, gasoline and vegetable oils excepted. Contact Tel: 6337, 66237.

SEAMAN'S CLUBS: 20 Dzintaru Str., Ventspils 229910, Latvia. Tel: 67068, 68356, 68292. Facilities include currency exchange, shop, bar, minibus collection.

CURRENCY: Latvian Lats (Ls). U.S.$ 1.00 = 0.60 Ls (7.3.94).

IDENTIFICATION CARDS: Seaman's Book required.

SHIPMASTER'S REPORT: 1976 (Updated 1994).

Port operation in foggy weather said to be controlled by radio and millimetre (aircraft) type radar installation, one scanner of which is situated on tower near root of Southern Breakwater.

Tugs: Alleged that 5 are available; 1 icebreaker type of 5,000 h.p. 4 medium size, and 1 small, 1 at least of which was propelled by Voith-Schnieder gear of about 750 h.p.

Pilots: To call Pilots, use Channel 16 and 9 and call Ventspils Traffic Service who make arrangements with Harbour Office and Agents.

During time vessel deballasting and loading; any problems can be resolved by call to Agents on VHF Channels 71 and 74.

Regulations: Fire Officers demand that suitable bonding wire be fitted (supplied by ship). No shore facility available.

Facilities: No. 1 Pier has (building) tower crane for handling hoses. Berths No. 2 and 3 are fitted with loading arms hoses and towers. Fresh water available. Bunker fuel available but not necessarily marine diesel.

Cargo Berths: There are believed to be 8 dry cargo berths, within the river port area, some with cranes, suitable for general cargo, together with storage buildings. Refrigerated/chilled cargoes have been handled regularly.

SHIPMASTER'S REPORT: May 1980 (Updated 1994).

Vessel: LPG carrier of 10,000 g.r.t.

Pilotage: The following are the Port Authority's comments (dated March 1994):

Vessels shall take the Pilot on board at the Light Buoys "A" or "B". In stormy weather, when embarkation or disembarkation of the Pilot at the light buoys is not possible, the Pilot, with the Master's agreement, may change his embarkation or disembarkation place, or lead the vessel with the shore based radar station's assistance. The radar service is carried out round the clock. The use of the shore based radar station is compulsory, nothwithstanding the weather conditions, if vessel's length exceeds 150 m., deadweight exceeds 12,000 tons and draft exceeds 11.5 m.

Liquified gas and chemicals carriers with deadweight under 10,000 tons are permitted to enter and leave the port round the clock, if wind does not exceed 14 m./sec., and visibility is over 2 miles. During entering or leaving the port by liquified gas and chemicals carriers, movement of other vessels in the outer harbour and in the channel is prohibited.

Pilotage time to berth is approximately 40 minutes.

Tugs: The following are the Port Authority's comments (dated March 1994):

At least one tug's assistance is compulsory for tankers and vessels with dangerous cargoes (Class 1, 2, 6, 7). At least 2 tugs' assistance is compulsory for vessels exceeding 150 m. in length or deadweight over 12,000 tons. For vessels having bow thrusters, the number of necessary tugs may be determined, taking into account the principles of good seagoing practice, depending on the actual weather conditions and other factors.

Berth: (Ammonia only – See "Plan"). Modern fendered concrete quayside with depth alongside 13 m. to 14 m. No tidal range but atmospheric conditions affect Baltic water level – density alongside 1001. Vessel generally berths port side alongside. Berth equipped with 12 in. 150 ASA liquid and vapour Chicksans. Ship's reducer used on vapour manifold. Ship's gangway used.

Cargo: Anhydrous ammonia received at −33° Celcius. Loading rate agreed before commencing loading (in this case requested 650 t.p.h.) and increased to over 1,000 t.p.h. after officially requesting for increased rate through agency. The rate agreed prior to loading is expected to be maintained throughout loading with usual reductions for topping off as required. Average rate for 10,230 tonnes loaded was 714 t.p.h.

Vapour return line connected but not required or used – high back pressure on line. Documentation slow – cargo documentation cannot commence until ship cleared and Chicksans not connected until cargo documentation completed. Shippers "Sojuzchimexport" require Quality Certificate for cargo heel onboard – accepted ship's declaration of purity. Also require cargo plan showing 100% tank volume for each tank – to prevent overloading. Bill of Lading quantity = cargo as measured onboard by shore surveyor (accompanied by interpreter).

Bunkers/Water/Chandler: None required but all available.

Agents: Efficient and friendly service. All representatives speak perfect English and very helpful in dealing with Authorities. Agents require ship information, cable 24 hours prior to arrival with following information:

(a) Ship's name, signal letters, nationality.
(b) Last port.
(c) Draft forward and aft, length, gross and nett tonnage.
(d) Cargo requirements.
(e) Owner's name and telex number.
(f) Bunkers, water and provisions required.
(g) Number of crew and health declaration.
(h) ETA at Buoy "B".

If Agents are required in port, call "Ventspils Radio" on Channel 16 and ask for connection to Agency.

Authorities:

Customs: Usual Bond Declaration required but unconcerned with bonded items onboard and bond locker not sealed in port.

Currency Declaration most important. Customs are not interested in personal cash holdings but must have a "TOTAL Cash Onboard Declaration" and the currencies involved. This total to include personal cash, bar cash, safe cash, etc.

Persons going ashore MUST obtain receipts for all expenditure which are then compared with the total declaration prior to departure.

Immigration: Usual Crew Lists required plus Discharge Books or Passports of all onboard. These are taken ashore, stamped and returned onboard. Persons going ashore will then be required to exchange Discharge Book for shore pass with guard at bottom of gangway. Prior to departure, all personnel must report to Immigration onboard for an identification check.

Port Health: Doctor boarded on arrival but formality only. Cursory inspection of store rooms only.

SHIPMASTER'S REPORT: November 1980. (Updated 1994).

Pilotage: Pilotage is compulsory. 12 Pilots available. Pilot boards at Fairway Buoy at the beginning of the old entrance channel and disembarks at Buoy No. "A" in the new deep water channel or Buoy B of the Main Channel. Docking and undocking without the aid of a Pilot is not allowed.

Restrictions: Vessels can enter and leave port during hours of darkness at any stage of the tide, however, vessels are not allowed to manoeuvre in fog or at times when the wind is strong. Shore radar is used at night and in fog for berthing.

Tugs: 4 tugs available.

Radio: Ventspils Radio, call sign "UNI", on 500 kHz, 2182 kHz and VHF Channel 16.

VHF: Pilot uses Channels 9 and 14 after initial call on Channel 16.

Facilities: The following are available: Fresh water, fresh provisions, small repairs, small machine shop, Lloyd's Surveyor, Salvage Surveyor (Lloyd's), laundry service, bunker fuel oil, diesel oil, small stock of lubricating oils, Doctor and hospital, groceries and meats, slop tanks – there is no slop storage – slops are segregated during discharge.

Tankers: There are 6 berths at the oil terminal at 3 piers (Berths No. 28 – 33).

Vessel berthed at No. 31. Ballast is required when arriving or sailing in a light condition (clean ballast may be discharged into the sea with permission from shore).

The tanker terminal exports crude oil, nafta and gas oil but no petrol. Ship's hoses are used. 2×12 in. lines are connected direct to the ship's manifold. No shore booster pump available. Max. pressure 5 kgs.

General Cargo Facilities: There are facilities for handling bulk cargo. Large number of cranes available.

Ro-Ro facilities at Berth No. 9. There is a floating crane with a 100 ton capacity. There is equipment for handling 20 ft. containers only, however, there is very little storage space available for containers.

Fuel: There are 2 tankers, capacity 3,000 tons each for fuel and diesel oil.

Fresh Water: There is one non self-propelled water barge, capacity 500 tons.

AUTHORITY: The Port of Ventspils Authority, 8 Uzhavas Street, LV-3601 Ventspils, Latvia. *Tel:* 371-36-22586. *Telex:* 161812 Admin Su. *FAX:* 371-36-21297. *Cables:* Ventspils Comport. *Contact:* Alfreds Machtams, Chief Executive. Guntis Tirmanis, Deputy Chief Executive. A. Buks, Harbour Master.

AGENT: See "Riga".

Lebanon

GENERAL:

DOCUMENTS: All vessels calling at Lebanese ports and terminals must have the following ready prior to arrival at Beirut Port:

3 copies of Cargo Manifest for Lebanese ports and terminals.
3 copies of Cargo Manifest for cargo in transit.
3 copies of Cargo Recapitulation (See below).

The Customs Authorities, by law, are the first authority to board the vessel upon her arrival to ascertain correctness of all cargo documents.

Should any of the above documents not be ready upon arrival for Customs checking, heavy fines are imposed by the Customs Authorities, and this being about 10% of the customs value.

Customs duties vary between 1% – 100%, and therefore in some cases, the Customs fine could be equivalent to the cargo value.

We quote hereunder an example of a message sent by Agent to a Principal, quoting Patrol Brigade/Customs Regulations:

"Vessel's Patrol Brigade Clearance No. 5, dated 8th May 1993, Master should be instructed that 40 miles from Beirut Port he will have to contact "Oscar Charlie" on VHF Channel 11 giving his Clearance No./cargo details.

Again, 12 miles from Beirut Port, Master should contact "Oscar Charlie" on VHF Channel 11, and he will then receive the clearance to proceed to Beirut Port for Customs inspection, which is usually carried out during daylight hours.

Please note that only after completion of Customs inspection will vessel be able to berth and then start discharging.

Moreover, and as per Customs Regulations, Master should have ready on vessel's arrival at Beirut, 3 copies of the Cargo Manifest and 3 copies of the Cargo Recapitulation.

If Loading Port Manifest not available on board, then Master has to prepare same prior to vessel's arrival.

As to Cargo Recapitulation to be prepared by Master, this can be prepared on normal A4 paper as per the below format:

Cargo Recapitulation
Port of Loading *Manifest* *Packages* *Weight*
Total
In Transit
Packages... weight...
Master's signature"

TANKERS: *Requirements for Tankers Calling at Lebanon:* We quote below new regulations imposed by the Ministry of Petroleum concerning requirements for all tankers calling at Lebanese oil terminals:

1. A certificate proving that the tanker is less than 25 years old, otherwise a special survey will be conducted and Sea-Worthiness Certificate required from one of the following classification societies:
   Lloyd's Register of Shipping.
   American Bureau of Shipping.
   Det Norske Veritas.
   Nippon Kaiji Kyokai.
   Registro Italiano Navale or Hellenic Register of Shipping or any other register, accredited by the Directorate General of Transport.
2. Following trading certificates must be in good order and valid:
   Safety Construction Certificate.
   International Tonnage Certificate.
   IMO "Gas Fitness" Certificate.
   Safety Equipment Certificate.
   Safety Radio Telegraphy Certificate.
   IOPP Certificate.
   Manning Certificate.
3. Possess an insurance policy from one of the internationally recognised insurance companies and/or vessel's P&I Club to cover the following risks:
   Oil pollution (up to 500 million Dollars).
   Physical damage to berth/terminal.
   Collision against floating objects.
   Death or personal injury.

The above required documents must be presented to the Ministry of Petroleum immediately after vessel's arrival for checking same/giving a clearance to the vessel to proceed to designated oil berth/start discharging.

Tankers Loaded with Petroleum Products: All tankers calling at Lebanese terminals will be allowed to approach Beirut Port for Customs inspection, but will not be allowed to moor at petroleum products berths, nor start discharging prior to receipt of satisfactory analysis results from the surveying company appointed by the Ministry of Petroleum.

In this respect, the receivers and after vessel's arrival at Beirut Port must advise the Ministry of Petroleum of the cargo specifications intended for discharge at their terminal in order for the Ministry's surveyors to take cargo samples for analysis.

CUSTOMS INSPECTION: All vessels calling at Lebanese ports and terminals "must" first call at the port of Beirut for Customs inspection and visa of Manifest.

Agent will, 48 hours prior to vessel's arrival, arrange for vessel's clearance and vessel's clearance number will be communicated to the Master.

In this respect and 40 miles from Beirut, Master will have to contact "Oscar Charlie" on VHF Channel 11 giving his clearance number/cargo details.

Again, 12 miles from Beirut Port, Master will have to contact "Oscar Charlie" on VHF Channel 11, and he will then receive the clearance to proceed to Beirut Port for Customs inspection.

Also see "Documents".

BEIRUT (Beyrouth): 33.54 N. 35.30 E.

See "General" before first port.

DOCUMENTS:

Manifests should be visaed by Lebanese Consul at ports of shipment, or at any port *en route* where there is a Lebanese Consul. If on account of non-existence of Lebanese Consul at ports of shipment or at any of these *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

5 copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 lists of Cigarettes and Tobacco (See "Customs Allowances").

For cargoes loaded for Lebanon, there are new regulations concerning documentation as follows:

Original Cargo Manifest to be presented to the Authorities should be rubber stamped and signed by the Customs Authorities at the port of loading.

Copy of each Bill of Lading should be attached to the above Manifest.

A letter from Owners/Charterers indicating the Agents at the respective port.

PILOTAGE: Agent arranges Pilot via Harbour Master. Agent therefore to be kept well informed of ETA, 48 hours and 24 hours prior arrival. Pilot boat white with red funnel. Sound signals, 2 long and 1 short or contact can be made via VHF to Harbour Master. Pilot boards outside main breakwater. Assistance of Pilot outside daily normal hours, Sundays and official holidays, will be cost calculated at 100% more. Official normal working hours for pilotage station as follows: from 1st October up to 30th April, 0700 till 1700 hrs.; from 1st May up to 30th September, 0700 till 1800 hrs., For tankers outside harbour, the pilotage dues will be 100% extra.

Also see "Shipmaster's Report – January 1982".

ANCHORAGE: In Roads outside breakwater. Also see "Shipmaster's Report – January, 1982".

RESTRICTIONS: No particular restrictions. Pilot normally available between sunrise and sunset otherwise by special agreement.

MAX. SIZE: Max. draft in port 13 m. No limitation to breadth or length.

HEALTH: Health Authorities board in Roads. Health Form obtainable from Agent or doctor. Yellow fever certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members.

RADIO: Cables via Beirut Radio to and from Agent.

VHF: VHF Channels 13 and 16.

TUGS: Tugs of 1,000 h.p. join vessel inside port when necessary. Ship's lines to be used.

BERTHING: If port congested priority given to vessel already registered. Passenger-tourist vessels and cargo for Army have priority. Harbour capable of berthing 24 ships simultaneously and 3 moored on buoys, discharging into barges. All discharging is by ship's gear.

Dock No. 1: Surrounded by Quay Nos. 1, 2, 3. Depth of water varies between 3 m. and 8 m. Parts of Quay No. 1 and Quay No. 2 with 3 m. depth of water are reserved for floating units of port company and for launches of Harbour Master and pilotage service. Slipway of 1,000 tons capacity and workshops.

Dock No. 2: Surrounded by Quay Nos. 4, 5, 6, 7, with water depths varying between 8 m. and 10.5 m. On Quay No. 5 berthing priority is given to passenger ships, while the other quays are for cargo vessels.

Dock No. 3: Surrounded by Quay Nos. 8, 9, 10, 11, with depths varying between 10.5 m. and 13 m. All these quays can berth ships bringing general cargo. At Quay No. 8 of 13 m. depth, priority of berthing is given to grain ships.

Grain Silo: There are 120,000 tonnes capacity silos. Ships will be unloaded by means of 2 gantry type suction machines, mobile on rails with a capacity of 6×100 t.p.h.

Containers: A ship's Master advises that containers should be loaded on one side of the vessel and vessel berth that side to the berth as crane unable to reach outboard side.

Ro-Ro: All quays in Docks No. 2 and 3 can receive Ro/Ro vessels.

CRANES: Lifting capacities:

44 × 20/100 tonnes.
4 × 127 tonnes.
4 × 150 tonnes.

STEVEDORES: Ordered by Agent. No ETA to Stevedores necessary. Working hours, 0800 – 1200, 1300 – 1600. Otherwise overtime on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required.

TANKERS: Notice: The Coral Oil Co. Ltd.: Dated November 1984. To the Master.

TANKER MOORING AND DISCHARGING PROCEDURE AT CORAL OIL TERMINAL, BEIRUT.

We should be grateful if you would kindly note the following:

1. Berthing: The following is for your guidance:

Our moorings have been laid so as to give you a stern mooring for the old lines and amidships mooring for the new line (see item 2) using ship's anchors at the head. It is recommended that both anchors should be dropped when the vessel is discharging.

The ideal position for your ship is such that she would be heading N.N.W., in which position you will be clear of all obstructions in the event of an emergency. As you are aware, there is a wreck lying on the sea-bed to the East of the moorings and a half-submerged rock to the West.

When the significant wind speed is 10 knots, it is recommended that you stop cargo operations and advise our representative on board (see item 4 below) accordingly. Our hoses will be disconnected immediately after that. Please ensure close co-ordination with him.

When the significant wind speed rises to 15 knots you are recommended to unmoor and leave the berth. It is your responsibility to ensure that arrangements are made for the Pilot's mooring boat to unmoor the ship's lines.

Please keep in touch with the Meteorological Office in periods of unstable weather, and keep your engines in a state of readiness.

N.B. For amidships discharge (see item 2 below) you are advised to have enough mooring ropes available to cover extra distance to our mooring buoys (roughly 4 × 200 m.).

Please do not "Hang On" in wind speed beyond the above limits.

2. Cargo Discharging System:
There are two systems:

(a) The "Old Lines": The so called "Old Lines" system is to be connected through our submarine hoses to your stern discharge point. At that point the following products may be discharged: Lubricating base oil through one line and Jet A-1 and a limited number of chemicals, Gasoline or Gasoil through another line. In this particular case, you are requested to pump sweet or sea-water plugs, as the case may be, to clear our submarine and shore line between products.

(b) The "New Line": The so called "New Line" is for amidships discharge and is exclusively used for chemicals through a 'pigging' arrangement. Ideally, you should have Nitrogen aboard as well as compressed air for use in conjunction with this system, bearing in mind that Nitrogen must be used (not compressed air) with low flash point products.

3. Quality of Cargo: Please hand our representative the Certificate of Quality, issued by the Refinery, corresponding to the cargo destined to us.

The cargo may not be discharged unless the Certificate of Quality is handed to us beforehand and found to be fully conforming to the latest issue of the relevant specifications.

Furthermore, we shall carry out a few tests on representative samples drawn from your tanks before discharge.

If the results of the analyses are unsatisfactory, the cargo may not be discharged.

4. Personnel on Duty: A member of our staff with a few assistants will be on duty day and night on your ship and we trust they will be allowed to use your mess-room from time to time. Installation personnel are also on constant watch checking the shore tanks, inspecting the pipelines and manipulating the signals.

We would ask you to ensure that a responsible member of your crew remain on duty at the stern or amidships to answer shore signals promptly and react accordingly.

A member of our staff is always present at the Installation while the ship is discharging and you are requested to contact him if anything should be required.

5. Security and Safety:

(i) No engine repairs should be carried out at this berth.

(ii) The Port Authority forbids gas freeing while the tanker is berthed. Besides, fishermen's practices in the immediate vicinity of the berth may endanger your ship in case of gas-freeing.

(iii) You will appreciate that we cannot be held responsible for the security of your ship or prevent unauthorised persons from going on board.

Peddlers might attempt to board tankers, in which case the safety of your operations might be affected. It is strongly recommended that you post watchmen to prevent their access to the ship.

6. Communications: (a) Pumping Signals: Shore signals are made with White and Red discs by day and coloured lights by night from the Yard Arm of the signalling mast at the shore end of our jetty.

Ship signals are a series of short blasts of 5 seconds' duration.

(i) Amidships Discharge:

	Shore Signals		*Ship Answering Signals*
	Day	*Night*	
Launch pig or sphere	One disc	One white light	One blast
Pump product	Two discs	One green light	Two blasts
Pump air or Nitrogen	Three discs	Two green lights	Three blasts
Stop pumping product, air or Nitrogen	Four discs	One red light	Four blasts
Disconnect	No disc	Two red lights	Several short and long blasts

(ii) Stern Discharge

Pump water	One disc	One white light	One blast
Pump product slowly	Two discs	One green light	Two blasts
Pump product full speed	Three discs	Two green lights	Three blasts
Stop pumping product or water	Four discs	One red light	Four blasts
Disconnect	No disc	Two red lights	Several short and long blasts

In the event of the ship having to stop pumping, please sound 4 short blasts before closing the valve, whereupon pumping should not be resumed until the appropriate signal has been run up again on our signal mast.

(b) "Walkie-Talkie": Walkie-Talkie communication is established between ship and the shore, but the equipment may fail and the above signals are essential.

(c) Motor-boat: Motor-boat is on Company service while the ship is at mooring.

7. Pumping and pumping speed: Delivery of all products may proceed day and night.

(i) "Old Lines" Jet A-1, some Chemicals, Gasoline or Gas Oil:

When delivering the above products through the "Old Line" (i.e. using water plugs), the following pumping speeds must be observed:

During the first half hour, pump slowly to clear the water plug in the pipeline and avoid development of unrelaxed static electricity. The pumping rates must be limited as follows: Kerosene/Jet A-1 90 t.p.h., Water 115 t.p.h.

After the first half hour, the rate of pumping should be commensurate with a pressure at the stern connection to the submarine hoses not exceeding 100 p.s.i. It should not be less than 300 product t.p.h.

At the end of the cargo pumping operation, sea-water is to be pumped to clear the product contained in the pipeline into the shore tanks. Pumping speed must not exceed 115 t.p.h.

(ii) "Old Lines" – Lubricating Base Oils: No restrictions except to pressure at the stern which is not to exceed 100 p.s.i.

(iii) "New Line" – Chemicals: No restrictions except to pressure at the amidships discharge point which is not to exceed 150 p.s.i.

The detailed procedure concerning the use of the sphere or pig and Nitrogen, Compressed Air, or Chemical products to push the sphere or pig will be discussed and agreed with you beforehand.

8. Quantities to be discharged: Will you please ensure that the quantities discharged agree with the B/L figures. Any difference in these figures should be confirmed in writing to the member of our staff on board your ship. In any case, the shore tanks' dips are those that will serve as a final basis for acknowledgment of the cargo received. They are witnessed and certified by the shore Customs Authorities, as well as the Insurance Surveyor.

9. Ship's Agent: The ship's Agent is expected to deal with all questions of port and harbour regulations, currency, health, etc.

Reminder: Hose-lifting derrick, air compressors and nitrogen; the tanker must be fitted with derricks of 3 to 4 tons lifting capacity (depending on the height of the connection above sea-level) to lift part of the submarine 8 in. hoses required for connection to its stern discharge or amidships discharge, as the case may be.

In the case of lubricating base oils, the tanker must be provided with an air compressor to clear the line before pumping the next grade of base oils.

In the case of chemicals, except for those to be discharged at the "Old Lines", the tanker must have Nitrogen and compressed air available in adequate quantity.

Signed: Manager Operations.

Also see "Shipmaster's Report" dated February 1983.

DENSITY: 1025.

FRESH WATER: The port company has equipped all quays with hydrants. Ships moored on buoys can also be supplied with water from cistern barge. By shore installation or by barge. Delivery rate 20/25 t.p.h. Outside harbour double price per barge.

FUEL: Fuel, gas oil, diesel obtainable. 48 hours' notice required.

FIRE PRECAUTIONS: Special berths for tankers.

CONSULS: Most countries have consulates.

REPAIRS: Most types of repairs carried out.

CUSTOMS ALLOWANCES: (Tobacco) 40 cigarettes per Crew member (Master 2-3 cartons). Customs very strict, and will search crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port, will be fixed on the basis of 2 packets per crew member, passenger per day and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port - not central Africa; and for 2 months if the vessel last port of call is in Europe, Central Africa or Mediterranean, which will be deducted port of call, until arrival at a Lebanese port. That the number of passengers to be taken into account on a tourist vessel, will be the number of berths the vessel can accommodate and not the number of passengers actually on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel at a Lebanese port and not aware of such regulations, and it was found onboard her an excess quantity to the actual one allowed, as indicated above, a Process Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within 1 month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure on the vessel will be lifted when a Bank Guarantee equalling the amount of fine and dues is placed, or a personal guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled the usual penalties will be inflicted according to the Law.

3. In the event the vessel is aware of such restriction, and for one reason or another, she is carrying an excess quantity, this excess must be, as per official regulations, shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut. Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or Spirits: 1 bottle per crew member. Master allowed 3 or 4 bottles.

HOLIDAYS:

Holidays	*Date*	*Days*
New Year's Day	January 1st	1
St. Maron	February 9th	1
Good Friday (Catholic)	Varies	1
Easter Monday (Catholic)	Varies	1
Labour Day	May 1st	1
Good Friday (Orthodox)	Varies	1
Easter Monday (Orthodox)	Varies	1
Al Fitr (Ramadan)	Varies	1
Assumption Day	August 15th	1
Al-Adha	Varies	2
Moslem New Year's Day	Varies	1
Achoura	Varies	1
All Saints' Day	November 1st	1
Independence Day	November 22nd	1
Prophet's Birthday	Varies	1
Christmas Day	December 25th	1

Port closes completely: New Year's Day, Al-Adha, Easter Monday, Labour Day, Independence Day, 1st day of Ramadan and Christmas Day. On other holidays, day work in port carried out against overtime payment.

DRY DOCKS: None except for 500/1,000 tonner.
GANGWAY/DECK WATCHMEN: Available and recommended.
OPENING/CLOSING HATCHES: For liners, by stevedores, otherwise per agreement.
REPATRIATION: Very good facilities for repatriation.
AIRPORT: About 10 km. distant, served by regular airlines.
TIME: GMT plus 2 hours. Summertime, GMT plus 3 hours.
POLICE/AMBULANCE/FIRE: Telephone numbers: Police 16, Ambulance 18, Fire 17.
TELEPHONES: Available on request by shipping agency.
SERVICES: Tank-cleaning equipment. Facilities for discharge of tank-washings, compass adjusting, laundry, etc., available.
SHORE LEAVE: Crew allowed onshore.
IDENTIFICATION CARDS: Shore pass given to each crew member. Passport and Seaman's Book to remain in Master's care.
DELAYS: 1. Unavailability of berth or barges due congestion mainly during Winter months (December to April). 2. Vessel already registered will lose turn if not returned to port in time. 3. Barge ordered for bunkering might be occupied if vessel's arrival delayed.
DEVELOPMENTS: Report: July 1992.

To bring the port up to maximum standards in its existing structure, the following measures and works remain to be carried out:

Tenders for the repair of the last four warehouses.

Purchase of equipment for Dock 3 (Estimated cost: U.S.$ 27 million).

Completion of Dock 4: Extension of the breakwater (+280 m.), construction of the breakwater head and of Quay 15 (U.S.$ 24 million; duration: 18 months).

Restoration of the superstructure and purchase of handling equipment, especially 4 container gantry cranes on Quay 14 (U.S.$ 50 million).

The rehabilitation of Beirut Port and its 4 docks should be completed by 1993/94.

In addition to the capacities of Docks 3 and 4, a fifth dock with a draft of 15.0 m. is projected to receive fourth generation container ships. With a 330,000 sq.m. open storage area, 2,000 m. of quays and 8 gantry cranes, it is designated to handle 400,000 containers per year, which will add to the handling capacity of Dock 4, i.e. 200,000.

The cost of Dock 5 and ancillary equipment is approximately U.S.$ 200 million.

SHIPMASTER'S REPORT: January, 1982.

Vessels approaching Beirut Harbour from a Southerly direction are advised to make Ras Beirut Light on a bearing of 132°. When the light is approximately 3 miles away alter course to 090° until the Eastern end of breakwater is abeam and alter course to 150° to pass Green Buoy (near end of breakwater) to starboard. The Pilot will board vessel near the green buoy or at anchorage.

Good anchorages may be obtained East of breakwater with good holding ground. In view of the prevailing tension it is advisable to approach Beirut during daylight hours as incidents of sniper fire and shelling have been reported.

Shore leave for seamen/ship's personnel may be granted during daylight hours from 0900 to 1500 only in the Christian (Eastern) Sector. It is not advisable to visit the Muslim sector of the Western Beirut.

Provisions, bonded stores and good shopping available despite tension.

SHIPMASTER'S REPORT: February 1983.

Tankers: The following are the requirements for product delivery vessels calling at tanker berths operated by Dora Terminals.

Medco Terminal:

I – TECHNICAL CONDITIONS

1. Tanker mooring should take place during daylight at the berth specially provided for discharging opposite our installations at Dora i.e. "Baie Saint Georges".
2. Tanker's d.w.t. (dead weight tonnage) must not exceed 25,000 – 30,000 metric tons.
3. Only stern discharge is permissible.
4. Submerged portion of the tanker's stern must not exceed 28 ft. – 29 ft.
5. Discharge hose facilities provided are of 6 in., 8 in. and 10 in. diameter. Working pressure must not exceed 5 – 6 kg./sq.cm.
6. Upon arrival, the Shipmaster shall abide by the instructions given to him by Beirut Pilot and Harbour Master and by employees of this company, it being understood that putting the ship at anchor immediately upon arrival is subject to weather conditions. In other words mooring, anchorage and discharge of load are not possible when sea is rough.
7. Ship must be equipped with all necessary international documents in accordance with universally accepted rules and regulations because discharging takes place under supervision of Lebanese Customs Authorities and other Government Officials.
8. Swivelling tanker's crane boom to extend outside tanker minimum 3 m. in order to lift vertically flexible hoses. Also suitably located hang-off bitts for submarine hose.
9. Discharge line to be fitted with ASA 150 8 in. flange connected (or ASA 150 6 in. connection) and pressure gauge, conveniently located.
10. Pumps to be preferably centrifuge with by-pass (or relief valve) set at 9 kg./sq.cm.
11. Tanker shall be responsible for any and all damages which may occur to our installations whether it be due to weather, natural or technical reasons. Tanker shall likewise be responsible for damages caused by negligence or faulty manoeuvres on the part of the Master or the crew.
12. The company's Superintendent at his own discretion may refuse admission to a tanker or discharge of a cargo when he notices that the tanker is not adequately equipped technically for the discharging process as is usually required. Shipowners shall then carry out all necessary repairs, wherefore demurrage, if any, shall be exclusively at the tanker's expense.
13. When the discharge process has been completed and all formalities done, hose disconnected and mooring ropes released, the tanker, using its anchor to move forward, shall leave the mooring place immediately and clear a suitable distance off marine installations without using the propeller.
14. Should weather conditions worsen during discharge operations, the Superintendent shall have the right to disconnect the hose and request Shipmaster to leave discharge berth immediately for protection of human lives, installations and ship.
15. All harm befalling divers and/or company workmen during discharge activities shall be at the tanker's expense as long as these men are on board the tanker.
16. Both tanker and company shall be prepared to tie-in the discharge hose within 6 hours period effective from the time mooring at company's berth has been performed by Beirut Pilot.
17. Master is requested to give 72/48/24 hours' pre-arrival notice through "Radio Orient" to our cable address "Geochammas Beirut".

II – GENERAL CONDITIONS

1. Details of tanker arrival and discharge must be arranged beforehand. Should two tankers arrive at the terminal preference shall be accorded the tanker that has arrived first.
   In those cases where a Government-bound tanker comes in for unloading at the same time as another tanker is discharging at our installations, no demurrage shall be due by the company.
2. Quantities received are those measured in our tanks. The company shall not be responsible for any shortage due to leakage or otherwise, notwithstanding the fact that the company shall spare no effort to avoid any such loss.
3. It is clearly understood that all discharge activities such as anchorage, discharge, material receiving, storage, etc. are for the responsibility and expense of the Government. It is likewise agreed that all damage which may befall our marine installations, tanks and the company's other installations at Dora, irrespective of cause, even if it be a force-majeure, are the responsibility of the Government as the company shall then be working in accordance with the Government's request and for its account.
4. All port dues and other charges connected with the tanker or the cargo are for the Government expense.
5. All expense for products delivered by tank trucks are for the account of the receiver.
6. Under all circumstances the company shall be held free of any responsibility whether for reasons mentioned above or omitted. It is likewise not responsible in all instances where the terms "cas fortuit, force majeure" and applicable.
7. The company may be contacted through the following means:
   (a) Radio Orient Ogero.
   (b) Telex: 22259 Menira/20816 Mecham/20112 Ctctco.
   (c) Telegram: Geochammas-Beirut.
   (d) Tel: 894077 (working hours: 0800 – 1400 hrs.)
   (e) Marine Band: Channel 16 when 30 miles away.

Wardieh Terminal:

Max. draft at Terminal 30 ft.

Max. quantity which can be received through the sealine is 200 metric tons per hour.

Type of flange – 8 in. flange.

Pumping can be effected through a 10 in. submarine pipeline.

REPORT: September 1992.

Agent's advice to Ship Operator:

Procedures for Vessels calling at Beirut:

1. Vessel's arrival must be declared to Lebanese Navy/Chamber of Maritime Operations "Oscar Charlie", at least 24 hours before arrival.
2. "Oscar Charlie" will supply an entry number which Agent must convey to Master of vessel.
3. At the 12 mile limit, Master must call "Oscar Charlie" on VHF Channel 16 or Channel 11, quoting his entry number, and declare his intention to call Beirut. "Oscar Charlie" will instruct him to proceed to near harbour entrance/anchorage. Master must call "Oscar Charlie" again at 6 miles, at 1 mile, at anchorage and upon berthing/mooring, each time quoting his entry number.
4. Beirut Port should be approached on course 090° and depart on course 270°.
5. When vessel is ready for sailing, exit number must be obtained from "Oscar Charlie". Master must call "Oscar Charlie" for permission to sail quoting exit number, again at anchorage, 1 mile, 6 miles and 12 miles, each time quoting exit number.

Note: "Oscar Charlie" is available 24 hours/day and vessels may arrive/depart Beirut 24 hours/day. However, vessels proceeding to other Lebanese ports may only do so between 0600 hrs. and 1800 hrs.

Customs: Customs require Master to produce 3 complete sets of Beirut Manifest stamped and signed on every page. They also require Master to prepare a Cargo Declaration stamped and signed in 4 copies, stating quantity and weight of Beirut cargo per port of loading. This Declaration must also state weight and quantity of cargo-in-transit, and state next port of call. These documents should be ready on arrival.

Vessels calling at Lebanese Ports other than Beirut: Vessels calling at other Lebanese ports must first proceed to Beirut Roads for clearance. Procedure with "Oscar Charlie" same as for vessels calling Beirut, but vessel must wait at Beirut Roads to be boarded by Customs, who will check Manifest and Cargo Declaration before giving vessel clearance to proceed to port of destination. Permission to proceed must then be obtained from "Oscar Charlie", who should also be informed of arrival at port of destination. Departure procedure same as Beirut.

Vessels navigating between Beirut and other Lebanese ports must do so between 0600 hrs. and 1800 hrs. at a distance of 3 miles from the coast.
Note: vessels calling at Tyre must also obtain clearance from Israeli Authorities at Haifa.

AUTHORITY: Compagnie de Gestion et D'exploitation du Port de Beyrouth, B.P. 1490, Beirut, Lebanon. *Tel:* (01) 580211/16. *Cables:* Beyrouport-Beirut. *Contact:* J. Khazen, Port Director.

AGENT: Gulf Agency Co. (Lebanon) Ltd., P.O.Box 4392, Beirut, Lebanon. Tel: (961-1) 446189, 446086, 446097, after office hours 446189. Telex: 44874, 48161 ("GAC LE"). Fax: 446097.

CHEKAA (Including Enfeh Terminal): 34.20 N. 35.43 E. (See Plan)

See "General" before first port.
Port is used for cement loading and discharge of sulphates.
ANCHORAGE: Safe anchorage in Chekaa Bay.
MAX. SIZE: See "Berthing" and "Tankers".
TUGS: None.
BERTHING:

1st Quay	Length:	40 m.
	Depth:	30/31 ft. (at pier).
	Draft:	28 ft.
	Permissible d.w.t.:	15,000 tons. **
	Working Time:	Around the clock, daily outturn about 5,000 tons/WWD.
2nd Quay	Length:	45 m.
	Water Depth:	30/31 ft. (at pier).
	Draft:	27 ft.
	Permissible d.w.t.:	15,000 tons.
	Working Time:	Around the clock, daily outturn about 5,000 tons/WWD.

** Larger vessels can be accepted, but this is subject to approval from receivers.
Discharge facilities:
2 shore cranes available: 1 fixed, 1 mobile.
Discharge effected by screw conveyors.
Maximum water-line to hatch-coaming in ballast: 9.0 m.

TANKERS: *Enfeh Terminal:* Position: Lat. 34° 20′ 31″ N., Long. 35° 43′ 54″ E. Port is used to load and discharge gasoline and bitumen.
Anchorage: Safe anchorage in Chekaa Bay.
Max. size: Draft up to 20 ft.
Berthing: Using 2 anchors and moored stern to shore facilities. In event of swell vessel required to leave quay and anchor in bay.
Storage Capacity: 5,000 tons for gasoline. 2,500 tons for bitumen under construction.
Load/Discharge: Rate 150 t.p.h. Tankers to use stern discharge and communicate with shore 48 hours prior to arrival on VHF Channel 16.
Agent: Gefco.

REPORT: November 1982.
Slag is from time to time discharged at this port.

1. Max. draft permissible: 27 ft.
2. Length of berthing quay: about 40 m. – 45 m. Therefore vessels must do several shifts ahead and astern in order to discharge all holds.
3. Discharging by 2 shore cranes (1 fixed at quay and 1 mobile) using grabs.
4. Daily quantity discharged: about 2500 – 3000 tons per weather working day of 24 hours (receivers and stevedores working 24 hours round the clock, subject weather permitting).
5. The quay is at an open road, not sheltered and well exposed to South Westerly winds.
6. Agency attendance was monopolised in Chekaa since 1975 (when war started in Lebanon) and the only agents attending are:
   - (a) Messrs. Kfoury, the Pilots of Chekaa for: The Societe des Ciments Libanais Sal Chekaa.
   - (b) Pilot and Agents: Kfoury. Cimenterie Nationale S.A.L. Chekaa, the Company who owns the above mentioned quay. (Mailing address: c/o IMS 285, P.O.Box 895, Larnaca, Cyprus).

SHIPMASTER'S REPORT: March 1994.
Ship's Particulars:
G.r.t.: 25,056.
Summer d.w.t.: 44,363.
Displacement: 33,463 tonnes.
Arrival Draft: Forward 7.35 m., aft 7.84 m.
Cargo: Petcoke in bulk.
Quantity: 21,996.3 tonnes.

General: Information available through latest Sailing Directions is very scanty. There is no large scale chart or plan of the port published by British Admiralty. The only chart which could be used is No. 2633.

B.A. Chart No. 2633 was used after enlarging the area of interest more than 300%, using a photocopier on board. It served its purpose quite well and the vessel anchored at Chekka Roads about 1.25 nautical miles off the coast.

Documentation: Apart from the usual paperwork required in most countries and as per "Guide to Port Entry", Agents had advised vessel to have 3 copies of Cargo Manifest and 3 copies of Cargo Recapitulation ready for Lebanese Patrol Brigade (PB). Example of Cargo Recapitulation is as below. Both these documents should be signed and stamped and ready for the Patrol, otherwise heavy fine may be imposed.

Example:

CARGO RECAPITULATION

M.V.:
at:
Date:

Port(s) of Loading	Serial No. of Cargo Manifest	Packages	Weight

In Transit:
Packages:
Weight:

Master

Notes: (1) This form is only for cargo destined for Lebanese ports.
(2) Date and place: Arrival date of first Lebanese port where Patrol Brigade Clearance is given.

Patrol Brigade: A few days prior to arrival in Lebanese waters, our Agents had telexed us our PB Clearance number. Vessel must contact them on VHF Channel 11 (Call Sign "Oscar November"), prior to entering Lebanese territorial waters (12 nautical miles) and request permission to enter.

As per Agents' advice, vessel called at Tripoli for PB Clearance. On anchoring at Tripoli Road, boarding party came aboard and gave the Clearance papers, which were to be handed over to Customs and other officials at Chekka.

On berthing at Chekka, Customs, Immigration, Port Health, Lebanese Army Security and Agents boarded vessel for Inward Clearance. Security personnel checked all cabins. Customs stringent about quantity of cigarettes held by each crew member, but quite lenient about alcoholic beverages.

Berthing: See "Plan".

Vessel berthed starboard side to with mooring lines as per "Plan". By using starboard anchor and two starboard quarter lines, vessel was kept slightly off the berth to avoid any contact damage to ship or jetty. As this vessel does not have bow or stern thrusters and no tugs available, these will help at the time of unberthing. No berthing or unberthing is undertaken in inclement weather, especially if wind and seas are from South to S.W. direction.

Engines were on short notice throughout the period vessel was alongside, and weather was monitored by regularly taking weather reports. Pilot remained on board for the entire stay alongside.

Gangway: Provided by port.

Discharging: Only one hopper available. Hence cargo has to be discharged from adjacent hatches using ship's cranes and thus slows down rate of discharge, and since the jetty is so short, vessel has to warp to align hatches against the hopper.

Cranes:

(1) 1 fixed electric crane 3 tons S.W.L. with grab on the jetty . The same was used by vessel.
(2) 2 mobile cranes, which can be used for discharging by much smaller vessels. Details can be had from M/S Kfoury, local Agents.
(3) 1 mobile crane 125 tons S.W.L., boom 30 m., and one mobile telescopic crane 50 tons S.W.L., boom 32 m., are available on hire ex-Beirut. Hire charges and other details available from Gulf Agency in Beirut.

Max. Draft: 27 ft. (salt water).

Fenders: 10 ordinary truck tyre fenders are rigged along the length of the jetty. They are adequate for much smaller vessels using the berth regularly, but not sufficient for this size of vessel, hence the need to lay-off the berth to minimise chances of contact damage.

Repairs: Not possible at Chekka. Facilities available at Beirut, and they do undertake repairs.

Cargo receivers M/S Cimenterie Nationale Sal have their own workshop at Beirut, and they assisted vessel to repair one crane hydraulic cylinder.

Fresh Water: Available from jetty by hoses. Rate about 15 tons per hour.
Provisions: Fresh and dry provisions readily available.
Shore Leave: Being a private berth, strict security and no shore leave granted to crew by Immigration Authorities.

AGENT: See "Beirut".

RAS SELAATA: 34.17 N. 35.40 E. (See Plan)

See "General" before first port.

(A) LEBANON CHEMICAL CO. PLANT WHARF:
(B) SELA'ATA TERMINAL PORT:

(A) *LEBANON CHEMICAL CO. PLANT WHARF:*

LOCATION: Lat. 34° 16.2′ N., Long. 35° 39.2′ E.
Lebanon Chemical Co. Port is located to the South of Tripoli and is used for dry and liquid chemical cargoes.
PILOTAGE: Pilotage is provided by the Company, and the Pilot meets vessels one mile to the S.W. of the quay.
ANCHORAGE: Good anchorage is available in Sela'ata Roads.
MAX. SIZE: Depth in manoeuvring area is 21 ft. Maximum permissible draft is restricted to 21 ft.
HEALTH: Health Authorities board in harbour. Health form obtainable from Agent. Owner should check with Agent with regard to any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.
RADIO: Cables to and from Agent sent via Beirut Radio.

VHF: See "General".
BERTHING: One pier 90 m. long, suitable for vessels up to a maximum of 6,000 tonnes d.w.t.
STEVEDORES: Cargo handling is carried out by the Company's crew round the clock.
MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required.
DENSITY: 1026 – 1027.
FRESH WATER: May be available alongside pier.
FUEL: Diesel oil available by truck.
CONSULS: Most countries have consulates in nearby Tripoli.
AIRPORT: Kleiate (Tripoli) or Beirut.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summertime.
HOLIDAYS:

Holiday	*Date*	*Days*
New Year's Day	January 1st	1
Al-Adha (Karban Bairam)	varies	2
Ashoura	varies	1
New Year (Islamic)	varies	1
Arab League Day	March 22nd	1
Good Friday	varies	1
Easter Monday	varies	1
Good Friday (Oriental)	varies	1
Easter Monday (Oriental)	varies	1
Labour Day	May 1st	1
Martyr's Day	May 6th	1
Ascension Day	varies	1
Mohamed's Birthday	varies	1
Assumption Day	August 15th	1
All Saint's Day	November 1st	1
Independence Day	November 22nd	1
Ramadan	varies	2
Christmas Day	December 25th	1

GENERAL: Lebanon Chemical Co. have VHF set in management building. Call sign is "Pilot Lebanon Chemical Co.". It has a range of 35 miles and listens on VHF Channel 16 from 0630 hrs. to 1600 hrs.
Agent: P. Adem may be contacted on VHF Channel 16 or through the Company.
Cables: Cables to Agents and Company are routed through Beirut Radio.

(B) SELA'ATA TERMINAL PORT:

LOCATION: Lat. 34° 16.97′ N., Long. 35° 39.87′ E.

Sela'ata Terminal Port is located to the South of Tripoli, and is used for dry, liquid, general cargoes and containers.

The entrance to the harbour and the channel entrance are restricted to vessel's having a maximum draft of 13.0 m.

PILOTAGE: Agent arranges for qualified Pilot to meet vessels 2 miles N.W. of breakwater.
ANCHORAGE: Good anchorage available in Sela'ata Roads.
MAX. SIZE: Depth at entrance 13.0 m. Max. draft alongside quay 13.0 m.
HEALTH: See Section "A".
RADIO: Cables to and from Agent (ASLAC) via Beirut Radio (OGERO).
VHF: See "General".
TUGS: There is one tug at Sela'ata (250 h.p.). A second tug could be made available upon request.
BERTHING: One pier about 140 m. long, 2 berths, 2 shore cranes and 1 grain unloader (250 t.p.h.), suitable for vessels up to 30,000 tonnes d.w.t.
STEVEDORES: No ETA to stevedores necessary. Working hours are 0700 hrs. – 1500 hrs. Overtime on Sundays and on official holidays.
MEDICAL: Master to advise Agent (ASLAC) by cable prior to arrival if medical attendance required.
TANKERS: *Liquid Cargoes:* A 6 in. connection is available at plant wharf with a length 800 m. and a discharge capacity of 200 t.p.h. Vessels to be equipped with a 6 in. discharge hose of 10 m. length.
DENSITY: 1026 – 1027.
FRESH WATER: May be available inside harbour premises.
FUEL: Diesel oil is available in trucks.
GANGWAY/DECK WATCHMEN: Recommended. Shore watchmen available round the clock.
OPENING/CLOSING HATCHES: For liners by stevedores, otherwise per agreement.
CUSTOMS: Available on request.
IDENTIFICATION CARDS: Due to prevailing situation, on shore passes issued to crew members.
CONSULS: Most countries have consulates in nearby Tripoli.
AIRPORT: Beirut or Kleiate (Tripoli).
TIME: GMT plus 2 hours. Summertime GMT plus 3 hours (15th June – 15th October).
HOLIDAYS: See Section "A".
GENERAL:

Agent : A. Sinno (Huiles et Derives) on Channel 16 (ZOUYOUT).
Cables : Cables to Agents routed through Beirut Radio (ASLAC).
VHF:
Equipment : Fixed Station sited in Terminal Building and used by Supervisor.
Call Sign : ZOUYOUT.
Range : Approximately 35 miles.
Frequency : Transmitting on Channel 16. Receiving on all frequencies.
Watches : 0630 hrs. – 1430 hrs.

Mobile Station
Equipment : Portable, battery operated, carried aboard vessel with loading/discharging Supervisor.
Call Sign : ZOUYOUT.
Range : Approximately 2 miles.
Frequency : Transmitting on CB bands (Domestic). Receiving on CB bands (Domestic).
Watches : Continuous, whilst vessel loading/discharging.

Note: The VHF system is not connected to the main telephone switchboard, and only selected shore stations have access to it.
AGENT: See "Beirut".

SIDON: 33.30 N. 35.21 E. **(See Plan)**

See "General" before first port.

BERTHS NO'S. 1, 3 AND 4 HAVE BEEN TAKEN OUT OF SERVICE AND ALL MOORING BUOYS HAVE BEEN REMOVED. THE SUBMARINE LINE IS STILL THERE.

BOTH THE WHITE AND THE RED SEABUOYS ARE MISSING.

OPERATORS: Trans-Arabian Pipe-line Company, Sidon Terminal. The Company transports crude oil from Saudi Arabia via pipelines and exports from terminal South of Sidon (Saida). Terminal operates 24 hours a day, 7 days a week.
Advance Information: Prior to acceptance of nomination of vessels, Tapline requires advance information regarding maximum draft, vessel's equipment and location of manifold in reference to distance from the stern of the vessel, permanent ballast, simultaneous loading of cargo and discharging of ballast, etc. Acceptance or rejection will be made after evaluation of above data by Sidon Marine personnel.
FLAG: All vessels required to fly Lebanese Ensign on foremast during daylight hours. Lebanese flags may be obtained from ship's Agent.
LOCATION: Sidon Terminal is open, unsheltered roadstead, situated immediately North of Zahrani River, about 5 miles South of City of Sidon (Saida), Lebanon. It is approximately 35 miles South of Beirut, and 17 miles North of Tyre.
DESCRIPTION: Terminal's Tank Farm consists of 23 storage tanks situated East of terminal at 360 ft. (average) above sea level. Marine and administrative offices, a laboratory for testing stocks, 2 large and 2 small storage tanks all located within area just above sea level. An "L"-shaped pier for harbouring Company's marine craft extends approximately 1,000 ft. from shore near Southern end of berthing area.
NAVIGATIONAL AIDS: Radio beacon tower located 1,200 ft. back from beach, S.E of moorings. Occulting red light (about 30 flashes per minute) mounted on top, elevation 184 ft. above sea level; position Lat. 33° 30′ 04″ N., Long. 35° 20′ 31″ E. Tower also marked with 2 sets fixed red lights located respectively 45 ft. and 90 ft. below occulting red light. Radio beacon is automatic and operates on 24 hr. basis on frequency of 296.5 kHz, with "SAD" as the identifying call sign. It will signal 2 times over a 10-second period and then give a constant 1,000 cycle tone for 72 seconds. Tower is of cage-type construction, painted red and white. About 2.5 miles S.W. of terminal sea buoy and approximately 2 miles offshore is rocky shoal with approximately 32 ft. of water over it. Vessels approaching from Southward should keep offshore until radio beacon tower bears 100° true before hauling-in.

Defense Mapping Agency (DMA) Pub. 132, "Sailing Directions (Enroute) for Eastern Mediterranean" (6th Edition 1989) reads in part:

Caution: Vessels should keep at least 3 miles offshore along this part of the coast, and in depths of not less than 27 m. (15 fathoms).

During darkness terminal range lights and mooring buoy marker lights may be visible. These lights are located inside the restricted area.

A conspicuous water tank (painted aluminium) on a tower located Lat. 33° 29′ 27″ N., Long. 35° 21′ 10″ E., the top of which has elevation of 460 ft. above sea level. Location is seaward of centre oil storage tanks.

There are a number of smaller radio towers to N.W. and S.W. of beacon tower. South of terminal, at Medreco Refinery, is a conspicuous black stack located Lat. 33° 29′ 31″ N., Long. 35° 20′ 08″ E. A little further N.W. from this stack is a tall pipe painted aluminium with a flare on top at Lat. 33° 29′ 35″ N., Long. 35° 20′ 03″ E.

Berth Locations:

Berth No. 1 (7 buoys) Lat. 33° 30.8′ N., Long. 35° 19.9′ E.
Berth No. 3 (6 buoys) Lat. 33° 32.0′ N., Long. 35° 20.4′ E.
Berth No. 4 (5 buoys) Lat. 33° 32.4′ N., Long. 35° 20.8′ E.

DOCUMENTS:

Health Declaration: International Health Form to be filled out by Master on arrival.
Cargo Manifest: No cargo arrival manifest required, as same usually prepared by local Agent.
Clearance: No clearance required.
Crew List: 4 copies required on arrival.
Passenger Manifest: If any passengers on board.
Store List: 2 copies.
Bonded Store List: 2 copies. Present regulations at Sidon Terminal allow each seaman to retain in his possession a maximum of 40 cigarettes or the equivalent weight of tobacco or cigars. The balance of all smoking items must be collected and carefully listed prior arrival. This list will be checked by Customs before sealing lockers. If any discrepancies, vessel subject to a fine.

PILOTAGE: Vessels to be moored at Sidon will be boarded by Mooring Master of Company within 2 miles to seaward of terminal sea buoy. Mooring Master will advise Ship's Master on approaches to berth, mooring, unmooring, connecting and disconnecting submarine hoses and in all other operations within berthing area. All manoeuvring of ships within berthing area shall be done only in accordance with advice of a Tapline Mooring Master, subject to the understanding that in all cases and circumstances Master of the vessel being manoeuvred shall remain solely responsible, on behalf of vessel's owner, for safety and proper manoeuvring of vessel. Ship's Master or qualified deck officer must be on bridge at all times while ship is manoeuvring.

Vessels must have a pilot ladder safely and securely rigged, and all vessels over 45,000 d.w.t. should have an accommodation ladder rigged in combination with pilot ladder for safe boarding of Mooring Master and Government officials. Pilot ladder should be abaft and close to accommodation ladder so that Mooring Master, after climbing a few steps, can use accommodation ladder for remaining climb. Since hoses handled on port side at Sidon, it is advisable to rig ladders on starboard side. If at night, adequate lighting must be rigged over-side for Mooring Master to approach side of ship and climb ladder safely.

Note: Vessels having special rigs, such as hoisting equipment on short sections of pilot ladder, are not required to rig pilot/accommodation ladders per the above.

ANCHORAGE: For vessels awaiting berth, good anchorage just W.S.W. of terminal sea buoy in 16 to 20 fathoms, sandy bottom. Vessels should under no circumstances anchor North of terminal sea buoy as depths are excessive for safe anchoring.

RESTRICTIONS: Berthing and unberthing during daylight hours only.

Vessels must not arrive with more than 50,000 tons cargo on board.

MAX. SIZE: Berth No. 2, depth approx. 67 ft. Tankers up to 80,000 d.w.t. or approx. 55 ft. draft are considered max. size which should be handled during Winter months at Sidon, and then only if vessel meets all of below recommended requirements. Otherwise, vessels of over 80,000 d.w.t. should not be nominated for liftings at Sidon during period November-April. In Summertime max. 100,000 d.w.t.

Based on previous experience, sudden and severe storms of long duration are not expected from April through October. Vessels over 80,000 d.w.t. may, therefore be accommodated during this period. However, prior to acceptance of nomination of vessels over 80,000 d.w.t. Tapline requires advance information regarding max. draft, vessel's equipment and location of manifold in reference to distance from stern of vessel which should not exceed 450 ft. Acceptance or rejection will be made after evaluation of above data by Sidon Marine personnel.

Summary of Recommendations for Vessels over 40,000 d.w.t.:

1. Capable, efficient and reliable anchor windlass(es).
2. 15 shots on starboard chain – 13 shots on port chain are satisfactory.
3. Mooring wire winches, 1 on aft well deck, 3 on poop deck, 200 fathoms wire on each, with adequate number of manila or synthetic ropes to double up as needed.
4. Capability of lifting 16 in. hose string – 6.5 tons static weight.
5. Suitably located hang-off bits.
6. Capability of keeping vessel in a reasonable safe ballast condition (November-March) by permanent ballast or loading while deballasting, or a combination of both.
7. Ship's manifold located not more than 400 ft. from stern.

RADIO:

(a) Facilities. Tapline has own ship-to-shore radio telegraph, and VHF radio telephone station at terminal. This station is not open to commercial traffic. Services limited to traffic between Tapline and tankers within 3 days' sailing time from terminal. Messages to or from tanker agents classed as "Commercial" and must be routed via Radio Orient, a commercial radio station. Its call sign is ODR.

Radio Orient Beirut, call sign ODR, transmits (CW) on 8702 kHz and 13101 kHz simultaneously half-past each hour beginning at 0630 until 2130 hrs. GMT, the traffic list; 524 kHz each hour beginning at 0600 hrs. until 2100 hrs. GMT, the traffic list. Listens on 8534–8374 kHz and 12531–12561 kHz for replies and calls each hour from half-past the hour until the hour; 500 kHz 0600 to 2200 hrs. GMT and 425, 454, 468 and 480 kHz from the hour until half-past the hour for replies and calls. Keeps watch only between 0600–2200 hrs. GMT on 500 kHz.

(b) Advice of Arrival. It is important that ships establish radio contact with "ODR" when 3 days distant from Sidon and maintain this contact at regular intervals until just prior to arrival at the terminal. All ships should send a 72-hour ETA message to Tapline, giving the best estimate of ship's arrival time, a statement of bunker requirements and other relevant information. Shorter notice may result in berthing delay. Further ETA messages should be sent when vessel is 24 hours and 12 hours distant and to cover any other time changes occurring in the original ETA or those subsequent thereto. The 12-hour ETA should include a statement regarding "ship's readiness to load" on arrival, and time required to discharge clean ballast after ship is moored. A further contact when 4 hours away is desirable for exchange of weather data and mooring schedule. Vessels failing to give minimum of 12 hours arrival notice may be subject to delays in acceptance.

(c) Ship-to-Shore Communications. Ship-to-shore communications, while ships are in moorings, will be by portable VHF radio units used by the Mooring Master only. The use of the ship's radio station (except Channels 16-14) and/or battery charging equipment is prohibited for safety reasons during cargo transfer operations.

In the event of normal ship-to-shore communications failure, the (ship's) emergency whistle signal should be used.

VHF: Tapline VHF radio telephone system operates on international Channels 14 and 16, 156.7 MHz and 156.8 MHz respectively. Channel 16 used to establish contact while all traffic handled on Channel 14. Tapline guards these channels on a 24 hour basis, and contact can generally be made at distances up to 100 miles from terminal. Conversations on these channels will be carried out in English language only.

Mooring Master only will be in direct charge of portable VHF ship-to-shore radio communications.

HEALTH: Rules governing quarantine of vessels are same as found in other ports.

BERTHING: 7 buoys at Berth No. 2. Berths numbered 1 to 4 from South to North. Vessels moored on 1 heading (West) basis using both bow anchors with max. possible spread of anchors to increase ship's anchor beam holding components. Ship's stern moored to cylindrical buoys fitted with release hooks, using 7 ropes (or wires) to respective mooring buoys. Permanent moorings consist of 7 steel cylindrical buoys in each berth.

Certain mooring buoys in all berths fitted with 1.5 in. diameter preventer wires, one end of which is secured to mooring buoys. When required, other end is brought on board vessel by a messenger line after ship moored in position. Preventer wires supplemental to ship's regular moorings during adverse conditions. Ships should have chain stoppers for handling these wires.

BALLAST: Masters are warned that no dirty ballast or bilge water may be discharged within an area extending 100 nautical miles seaward of the Lebanese coastline. All pipelines, sea suctions, strainers and pumps that are to be used for the discharge of clean ballast must be flushed clean prior to entering the 100 mile zone. Except for oil retrieved under "load-on-top" procedures, Masters must assure themselves that all oil tanks, pipelines and pumps are free of all traces of oil.

The terminal has no facilities for receiving oily ballast. A vessel must have sufficient ballast for safe manoeuvring. However, by carefully watching the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions, and, by a knowledge of the behaviour of his own vessel, a Master may desire to arrive at the terminal with minimum ballast thereby lessening any possibility of infringement of the pollution restrictions of this section, and also reducing time in berth.

As soon as practicable after arrival and prior to acceptance, all the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there accomplish the necessary tank cleaning. Any vessel required to return to a position at least 100 miles offshore for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Vessels discharging dirty ballast within the prohibited 100 mile zone may be subjected to action by the Lebanese Government. In addition, ship's owners and charterers will be promptly notified of any violation.

Masters are also warned that ship's garbage or trash should not be dumped within 50 miles from the Lebanese coast.

LOADING: *(a) Readiness:* Tenders to load will normally be accepted and berths assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time, carry clean ballast and are in all respects equipped and ready to moor. In event berthing delayed on account weather, vessels will ordinarily keep their loading priority in order of arrival. Vessels required to leave port area on account of weather (port closed), should keep in contact with terminal via VHF in order that they will be available when weather moderates. Company will make every effort to load vessels on arrival, or as promptly as berth is available, weather permitting. Notice of readiness will not be accepted unless vessel ready to load. Arrival time will be considered as time Mooring Master boards vessel underway or time vessel anchors, whichever occurs first.

(b) Connecting-up. Ships loaded by means of submarine pipelines. Weight of the 16 in. hose in No. 2 Berth about 6.5 tons. Hoses lifted by ship's gear on port side. Detail of flange templates shown in drawings below. Ships should provide manifold fittings to allow connection of flanges shown in "Plan Section".

Mooring Master advises ship's personnel in lifting, connecting, disconnecting and lowering of hoses. A ship's deck officer must be present, and must direct ship's crew in all hose handling. There must be sufficient crew on deck to perform this work.

(c) Rates: Loading is by gravity flow from tank farm which is approximately 360 ft. above sea level. Loading rates as follows (approximate maximum):

	Rates (BPH)	
Berth	*With 1 Hose*	*With 2 Hoses*
2	40,000	70,000 (16 in. hoses)

Order save ship's time and to ballast vessel as quickly as possible, as well as to make berth available for others, it is requested that ships receive oil as fast as it can be delivered, with due regard for safety. The removal of any restrictions, such as strainers, etc., is recommended.

DISCHARGING: Ships unloading crude or refined products in Tapline Seaberth must:

1. Be able to discharge at least 1,000 t.p.h.
2. Be equipped with centrifugal cargo pumps only. Piston pumps will NOT be accepted due to the damaging effect they have on the submarine hoses.
3. Ships without permanent ballast tanks must be able to discharge cargo and load ballast simultaneously.
4. Vessels must NOT strip (drain) their cargo tanks into the sealine. Air injected by this operation may cause the line to float and buckle.

Report: 1983. Cargo discharged through 8 in. line (old bunker line).

MEDICAL: Neither medical nor hospital facilities provided by Tapline. Private doctors and hospital facilities available at Sidon and Beirut. Agents acquainted with situation and can make necessary arrangements.

If unable make radio contact, then vessels requiring emergency medical assistance should hoist International Code Flag "W" in daylight, and at night, send "W" (· – –) on blinker light to attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. Signal should be repeated until acknowledged visually by either another ship in berth; from shore station or from Company launch. As soon as signal is received, terminal officials will advise ship's Agent as soon as possible of the emergency medical aid required.

DENSITY: Salinity of the sea is same as open Atlantic Ocean. Temperature ranges from 60°F. to 85°F. (15.6°C. to 29.4°C.) depending on season.

FRESH WATER: Not available.

FUEL: Bunker fuel loaded at rate of 3,000–5,000 bbls.p.h. through 8 in. deck hose. Bunker connection should be located near ship's cargo manifold. Ships calling at Sidon to load crude oil should arrange for bunker fuel nominations through one of the offtaker companies well in advance of arrival. Bunker fuel will not be delivered until Tapline has received a firm nomination. Bunker fuel will be loaded as promptly as circumstances permit, but Tapline assumes no liability for any delays incurred by a vessel in berthing or loading bunker fuel. Maritime lubricants available, through marketing representatives in Beirut by arrangement through Agents.

PRECAUTIONS: *(a) Valve Control.* Ship's valves must not be closed against the oil stream.

(b) Emergency Signal. When, and if normal ship-to-shore communications fail, the emergency signal to stop oil flow will be a continuous blast on ship's whistle, until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations in all berths will be shut down until communications can be established with vessel giving the signal. For this reason, it is requested that ships in the area refrain from using their whistles for other purposes.

(c) Readiness to Leave Berth. Port is considered an "open roadstead", and under no circumstances may engine be shut down for repairs while ships moored in submarine berths. Vessels in submarine berths must be able to clear, and shall clear immediately upon advice of Mooring Master. Ship's engine and gear must therefore be ready at all times with full power for immediate use.

(d) Loading and Deballasting Simultaneously. Properly equipped vessels will be encouraged to discharge clean ballast and load oil simultaneously. This capability is especially necessary during unsettled weather order keep vessel reasonably ballasted.

CONSULS: Italy and Norway. Consular or diplomatic representatives for most nations maintain offices in Beirut.

REPAIRS: No facilities.

SURVEYORS: Available from Beirut. Saybolt also available.

OFFICIALS: Lebanese officials, such as Customs Director, Quarantine Officer, Immigration Officer, Captain of the Port and Police, stationed at Sidon. Should Customs guards be stationed on board while in berth, it is expected that ship will provide food for these guards and other officials.

STORING: See "Prelims".

1. Barge only.
2. No storing during loading/discharging.
3. Open sea-berth
4. Open sea-berth.
6. No.

SHORE LEAVE: Arranged between Agent and Lebanese Security Officer aboard vessel. Ship's personnel (other than emergency or medical cases) not allowed to disembark at terminal. All personnel going ashore must land at Sidon where small boats must cross a shallow and sometimes impassable bar. Delays have been caused to vessels whose personnel have been unable to rejoin their ship. Sufficient personnel must be aboard at all times for letting go lines so that vessel can clear berth whenever required.

GENERAL: *(a) Mooring Wires and Winches.* Use of mooring wires to powered drums for all vessels calling at Sidon is strongly recommended. Because there are no mooring tugs available, a ship's ability to moor during marginal weather conditions is dependent upon its ability to warp itself into position. Vessels with capable wire winches and deck mooring equipment that are able to place 1 or 2 mooring ropes on a windward mooring buoy, usually able to moor without difficulty. Vessels over 40,000 d.w.t. should have mooring wires to powered drums, 1 on aft well deck and 3 on poop deck. The wires should be 200 fathoms in length and so secured as to be easily let go from ship if necessary.

(b) Ropes. Vessels should have 2 suitable, best quality mooring ropes of 200 fathoms each located on aft part of after well deck for use on either port or starboard side, 3 (min.) suitable, best quality mooring ropes of 200 fathoms each and 3 additional ropes of 150 fathoms each on poop deck plus properly located warping winches and bitts. Vessels equipped with mooring wire winches on poop deck may reduce required "additional" ropes accordingly. Wires are not used on port side of aft well deck due to possible fouling of wire with hose or pipeline underwater facilities. In this position a suitable, best quality mooring rope must be used. 2 ropes of 200 fathoms each recommended, to be used on either side while mooring, and used on port side only for securing ship in berth.

SHIPMASTER'S REPORT: February 1983.

Tankers: The following notices are presented to the Master on arrival at the terminal.

TRANS-ARABIAN PIPE-LINE COMPANY
SIDON, Lebanon
Tanker Loading Advice

Master...19...........

Your vessel is scheduled to moor in Berth No..............at..................hours...............................19.........

A Mooring Master will board your vessel prior to this hour. Engines, deck machinery, mooring lines and crew should be in readiness to proceed to berth.

The cargo (a 5 ton lift) and fuel hose will be picked up on the PORT SIDE.

The Mooring Master advises ship's personnel regarding the lifting and connecting of the submarine hoses, and after loading is completed, regarding the disconnecting and lowering. In this connection, he acts in an advisory capacity and assumes no liability on behalf of the Company. A ship's deck officer must be present, and he must approve the hose connection on board. The ship's crew will do the actual connecting and disconnecting of the hose.

The Mooring Master will be in charge of all ship to shore communications.

One prolonged blast of ship's whistle is the emergency signal to shore to stop the flow of oil to the ship and apply vacuum on the submarine lines.

SHIPS MUST NOT CLOSE VALVES AGAINST INCOMING OIL. Ships will be held liable for damage resulting from such closures.

Vessels in submarine berths must be able to clear immediately upon instructions from the Mooring Master.

CAUTION: It is the ship Master's responsibility to see that no oil (crude, bunker C, diesel or bilges) is pumped or spilled overboard from his ship either in the vicinity of the Company's Terminal area or within the area of 100 miles from the Lebanese coast. In the event of any oil spillage or loss from your vessel as the result of any act or omission of the vessel, such as but not limited to, pumping of oily water over side from ballast or bilge, or oil spill during loading, the vessel shall be responsible for all costs and expenses of clean up, or for any damages to property or injury to persons resulting from such spillage or oil loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea and will charge to vessel for all costs and expenses incurred thereby. In addition, since Tapline, as operator of the Terminal, is responsible (as a guarantor of the ship) for any damages to property of or injury to third persons, resulting from such spillages or oil losses, in the event Tapline pays or settles valid claims of third parties for such damages or injury, Tapline shall have the right to recover from the vessel all costs and expenses arising from its handling, payment and settlement of such third party claims.

The Port Authorities are very strict in this matter and a written report is submitted to ship's owners. WELL DECK SCUPPERS MUST BE PLUGGED DURING LOADING.

Please sign the attached duplicate of this notice, acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

TRANS-ARABIAN PIPE LINE COMPANY
SIDON, Lebanon

Master...19..........
Sidon, Lebanon

Dear Sir,

It is the ship Master's responsibility to assure that no oil including without limitation crude, bunker C, diesel or bilges is pumped or spilled overboard from his *vessel* in the vicinity of the Company's Terminal area or within the Prohibited Zone offshore Lebanon as defined in the International Convention for the Prevention of Pollution of the Sea by Oil, 1954, as amended in 1962. In the event of any oil spillage or loss from your vessel including but not limited to spillage due to pumping of oily water over the side from ballast or bilge or oil spill during loading, the vessel and her owners, operators, *Agents, and Master* shall be responsible for all costs and expenses of cleanup and for any injury to persons or damage to property, *including Tapline employees and property,* resulting from such oil spillage or loss. Tapline reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor on behalf of your vessel and/or her owners, operators, *Agents or Master* and will charge the vessel and/or her owners, operators, *Agents or Master* for all costs and expenses incurred thereby.

Tapline, as operator of the terminal, is responsible as a guarantor of the ship for any injury to third persons or damage to property resulting from such oil spillage or losses. The Port Authorities are very strict in this matter and a written report is submitted to *the vessel's owners, operators, Agents or Master* for any such incidents. In the event Tapline settles or is required to pay valid claims of third parties for such injury or damage, Tapline shall have the right to recover from the vessel and/or from her owners, operators, *Agents or Master* all costs and expenses arising from its handling, settlement and payment of such third party claims.

Please sign and return the attached duplicate of this notice acknowledging receipt of same.

TRANS-ARABIAN PIPE LINE COMPANY.

AUTHORITY: 1. Zahrani Terminal, Lebanon, P.O.Box 28, Sidon, Lebanon.

2. Trans-Arabian Pipeline Company, P.O.Box 11-1348, Beirut, Lebanon. *Tel:* Beirut 341270-5. *Telex:* 20769 Le Taplin. *Cables:* Tapline Beirut. *Contact:* Captain K. E. Hopen, Asst. Terminal Superintendent.

AGENT: See "Beirut".

TRIPOLI: 34.28 N. 35.49 E. (See Plan)

(a) DRY-CARGO PORT
(b) OIL TERMINAL
(c) PETRO-STORE TERMINAL

(a) DRY-CARGO PORT.

See "General" before first port.

Manifests should be visaed by Lebanese Consul at ports of shipment or at any port *en route* where there is a Lebanese Consul. If on account of non-existence Lebanese Consul at ports of shipment or at any ports *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

Non-Liner vessels calling at Tripoli, are to present on arrival to the local Customs' authorities, one copy of each manifest of cargo on board (even "IN BALLAST" manifests), DULY STAMPED AND SIGNED by the Customs' Authorities at the Loading Ports.

Otherwise, the vessel is subjected to a Customs' FINE.

APPROACHES: Sunken wreck in position Lat. 34° 30′ N., Long. 35° 49′ E.

Depth in channel 9.0 m.

DOCUMENTS:
1 Legalised copy of Cargo Manifests.
5 copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (See "Customs Allowances").

In addition to documents listed, 2 copies of each Bill of Lading are to be handed over on arrival to the Agents, for Local Customs' Authorities control and check.

PILOTAGE: Compulsory. Agent arranges with Harbour Master, therefore keep Agent closely advised ETA. Harbour Master may also be contacted on VHF Channel 16.

Pilot boarding position: Lat. 34° 29.6′ N., Long. 35° 49.5′ E.

ANCHORAGE: Good anchorage.

MAX. SIZE: Max. LOA 150 m. (occasionally 175 m.). Max. draft alongside berth 22 ft. 6 in.

HEALTH: Health Authorities board in roads. Health form obtainable from Agent or doctor. Yellow Fever Certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.

RADIO: Cables via Beirut Radio to and from Agent.

VHF: Harbour Master on Channels 16 and 6.

BERTHING: New pier about 600 m. length. 2 berths. 20 cranes, capacities 5 tons – 100 tons. 2 forklifts with capacity 20 tons each. Lighters available for discharging alongside vessel. Ship's gear often used for discharging. There is a grain silo with capacity of 4,000 tonnes. 30 steel barges of 350 tons capacity each. 40 wooden and steel barges of 200 tons capacity each. All cranes, forklift and barges are privately owned. 50 ton floating crane available, owned by port company.

STEVEDORES: Ordered by Agent. No ETA to stevedores necessary. Working hours, 0700 – 1500, otherwise overtime included on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required. Hospitals available.

DENSITY: 1025.

FRESH WATER: Available by barge.

FUEL: Available alongside by tanker trucks.

REPAIRS: Possible.

SURVEYORS:
1. Cargo inspectors are available in Tripoli.
2. Surveyor's (Lloyd's and A.B.S.) are also available in Tripoli.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCES: Tobacco. 40 cigarettes per crew member. Customs very strict, checking crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port will be fixed on the basis of 2 packets per crew member, passenger per day, and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port – not Central Africa; and for 2 months if the vessel's last port of call is in Europe, Central Africa or Mediterranean, which will be deducted from the quantity, and on the same basis the consumption by the crew members and passengers during their trip, and this to start from the last port of call until arrival at a Lebanese port.

That the number of passengers to be taken into account on a tourist vessel will be the number of berths the vessel can accommodate and not the number of passengers on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel, at a Lebanese port and not aware of such regulations, and it was found on board her an excess quantity to the actual one allowed, as indicated above, a Process Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within one month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure of the vessel will be lifted when the Bank guarantee equalling the amount of fine and dues is placed, or a Personal Guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled, the usual penalties will be inflicted according to the law.

3. In the event the vessel is aware of such restriction, and for one reason or another she is carrying an excess quantity, this excess must be, as per official regulations, be shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut.

Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or spirits: 1 bottle per crew member; Master allowed 3/4 bottles.

CARGO GEAR: Ship's gear to be used.

CONSULS: Most countries have consulates in Beirut.

AIRPORT: Beirut International Airport is 100 km. from Tripoli.

TIME: GMT plus 2 hours. Summertime, GMT plus 3 hours.

HOLIDAYS:

Holidays	*Date*	*Days*
New Year's Day	January 1st	1
St. Maron	February 9th	1

BANKS:
The British Bank of the Middle East, Mina Street, Tripoli, Lebanon. Telex: 21850 Bbme.
Banco di Roma, Tell Street, Tripoli, Lebanon. Telex: 21818 Romtri.

STORING: See "Prelims".
1. Cargo ships can be stored by barge and truck and tankers by supply launches.
2. Cargo ships – Yes. Tankers can be stored only at anchorage.
3. Yes.
4. Yes.
5. Storing can be done around the clock.
6. Storing is done by ship chandlers or their Agents.

IDENTIFICATION CARDS: Shore pass given to each crew member. Passport and Seaman's Book to remain in Master's care.

AUTHORITY: The Harbour Master, Ministry of Public Works and Transport, El-Mina, Tripoli, Lebanon. *Tel:* 600283 (Harbour Master). *Telex:* 46030 LE A/B Tihama. *Contact:* V. Ghazi, Harbour Master.

AGENT: See "Beirut".

(b) OIL TERMINAL.

See "General" before first port.
Note: Terminal storage tanks were partly destroyed in late 1983. Sea berths were re-commissioned in March 1984.

DOCUMENTS: See "Section A – Dry-Cargo Port".

PORT LIMITS: There are three spar-buoys to indicate the limits of the Company's Sea Terminal boundaries.

The location of these buoys is as follows:

1st.	Lat. 34° 30′ 03″ N.	Long. 35° 52′ 30″ E.
2nd.	Lat. 34° 29′ 42″ N.	Long. 35° 52′ 26″ E.
3rd.	Lat. 34° 29′ 03″ N.	Long. 35° 51′ 04″ E.

PILOTAGE: The company's Mooring Masters will meet tankers 2 miles N.E. of Tripoli Breakwater Head. Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend pilot ladder clear of launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules are relevant.

ANCHORAGE: Good anchorage immediately W.N.W. of No. 4 sea berth buoys.

MAX. SIZE: Least depth of water available in berth, and swinging circle, after deducting 6 ft. for the height above sea bed of the sea line and cradle is as follows: No. 1 Berth, 62 ft.; No. 2 Berth, 66 ft.; No. 3 Berth, 53 ft.; No. 4 Berth, 38 ft. The swinging circle is defined as 1.5 ship's lengths from dropping position of ship's inshore anchor. The approximate draft limits quoted are based on an under-keel clearance, in the berths, of 6 ft.

VLCCs will be handled in Berth No. 2 and loaded to a draft of 60 ft. During the period April to October, and subject to the Master and Mooring Master being satisfied that weather conditions permit loading to a reduced under-keel clearance of 4 ft., then the loaded draft may be increased to 62 ft.

HEALTH: See "Section A – Dry-Cargo Port".

RADIO: The Lebanese Oil Installations Limited, Tripoli, must be informed 48 hours prior to arrival of a vessel's ETA, quantity of cargo required, maximum loading rate, SWL of derrick for lifting hoses and confirming that the ballast for discharge in port waters is clean. Communication with Iraq Petroleum Company, Limited, should be by cable addressed to "Petriraq, Tripoli, Lebanon", or direct to Tripoli Terminal Radio Station.

Tripoli Terminal Radio Station. Call Sign – ODC 8.

Waveband	*Hours (GMT)*	*Watch Details*
	0800–0830	ODC 8 Broadcast Traffic List and calls ships on 8514 kHz. Listens on 8354–8374.
	1200–1230	Will transmit on 12831 kHz on request.
High Frequency	1600–1630	
	2230–2300	
	0000–2400	Monitor 500 kHz for calls and answers only.
	0730	Broadcast on 500 kHz QSW 442 kHz.
	0730–0800	Transmit Traffic List on 442 kHz, receives ship frequencies – 425, 454, 468, 480 and 512 kHz.
High Frequency	1130	Broadcast call on 500 kHz, QSW 442 kHz.
	1132–1200	Transmit Traffic List on 442 kHz, receives on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
Medium Frequency	1530	Broadcast call on 500 kHz QSW 442 kHz.
	1532–1600	Transmit Traffic List on 442 kHz, receive on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
	2200	Broadcast call on 500 kHz, QSW 442 kHz.
	2202–2230	Transmit Traffic List on 442 kHz, receive on normal ship frequencies – 425, 454, 468, 480 and 512 kHz.
	2232	Broadcast call QSY QSX 500 kHz.

Cables to Agents may be routed through Beirut Radio.

VHF: Tripoli:

Equipment: Fixed Station sited in Terminal Building and used by Control Room.

Call sign: Tripoli Control.

Range: Approximately 15 miles.

Frequency: Transmitting on 163.6 MHz. Receiving on 159.1 MHz.

Watches: Continuous.

Mobile Station

Equipment: Portable, battery operated, carried aboard vessel with Mooring Master.

Call sign: Ship's name (before mooring), or Berth No. (after mooring).

Range: Approximately 8 miles.

Frequency: Transmitting on 159.1 MHz. Receiving on 163.6 MHz.

Watches: Continuous, whilst Mooring Master on board.

Notes

1. Tripoli also keeps a continuous watch on the international calling frequency of 158.8 MHz. This has a range of approximately 15 miles and its call sign is "Tripoli Control".
2. The VHF System is not connected to the main telephone switchboard and only selected shore stations have access to it.

TUGS: There is no tug at Tripoli.

BERTHING: *Sea Line Berths.* 5 berths numbered from N.E. to S.W. specifications as follows:

Berth No.	*Max. t.p.h.*	*Fixed Sea Line*	*Strings of Flexible Hoses*	*Approximate Limits Draft*	*Approximate Limits Deadweight*
1	5,000	2×24 in.	2×16 in.	56 ft.	140,000
2	6,000	1×32 in.	2×16 in.	60 ft.	250,000
3	5,000	1×32 in.	2×16 in.	47 ft.	87,000
4	Products	2×16 in.	2×12 in.	32 ft.	25,000
5	LPG	1×6 in.	1×6 in.	30 ft.	5,000
		1×3 in.	1×3 in.		

As loading is by gravitation, the maximum rates are dependent upon availability of suitable shore tanks and loading lines.

LOADING:

1. *Readiness to Load*, will be received by the Mooring Master, who is the Company Representative on board. The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

2. *Derricks*

(a) Two hoses are connected on the port side amidship.

(b) Derricks or cranes reaching over the hose connection should be capable of lifting the flexible hose from the sea-bed to a height of up to 30 ft. above the deck.

(c) A minimum SWL of 5 tons is required for 12 in. hoses.

(d) The faster loading berths equipped with 16 in. hoses are available only to vessels with derricks and tackle with a minimum "Safe Working Load of 7 tons". Such vessels will be given berthing priority when queuing occurs and these berths are free but other vessels have not the capacity to handle the larger hoses.

3. *Hose Hang-off Bitts* are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on the port side.

4. *Hose Connection/Disconnection.* Ship's crew with a responsible officer in charge to perform all operations as advised by the Mooring Master, to lift, connect, disconnect and lower hoses.

5. *Ship's manifold* – to be prepared for the connection of 12 in. or 16 in. hoses with flanges of 150 series, dependent on berth allocation.

6. *Loading – Supervision and Commencement*

(a) All operations in connection with starting of loading, discharging, switching of tanks on board and topping-off must be directly and personally supervised by a responsible ship's officer.

(b) The advice from the vessel that she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

Caution: The oil loading stream to the ship is controlled on shore and it is extremely dangerous if a ship's valve is closed against the flow of oil.

To prevent excessive pressure from surge in ship and shore lines, ship's valves must not be shut-off against the stream, and when switching tanks, ship's valves must be closed slowly. Vessels will be held liable for damages resulting from any mal-operation of valves on board.

7. *Tank Dips.* During loading frequent checks should be made by the responsible ship's officer to ensure that cargo is entering the designated cargo tanks only and that there is no escape of oil into pump-rooms or through sea and overboard discharge valves. Particular care must be exercised by ship's personnel in "Topping-off" tanks and towards completion of loading to ensure that the terminal is given timely advice of any decrease in loading rate required. Adequate "standby" notice must be given before the final "stop".

8. *Loading Operations*

(a) The Mooring Master will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

(b) Loading rates requested by the vessel or quoted by the terminal will be the peak or maximum rate at any time during the loading period.

(c) While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repair should be carried out while in berth which would immobilize the ship or impair her fire-fighting efficiency.

Failure to vacate the berth on completion of loading may result in delays to other vessels, demurrage, and loss of throughput which shall be accountable to the vessel.

(d) The Mooring Master will advise the Master of the ship as to any signals needed for local requirements.

(e) The Mooring Master brings a portable radio on board for ship to shore communication.

Products: *Requirements for a Product Delivery Vessel:*

1. The discharge berth is an open sea berth.
2. Tripoli Terminal Call Sign is ODC 8 and Master's ETA should be sent at least 48 hours prior to vessel's arrival on 500 kHz.
3. Vessel to be equipped with centrifugal pumps capable of maintaining a ship's rail pressure of 120 p.s.i. (reciprocating pumps are totally unacceptable).
4. Max. draft loaded 32 ft. in Berth No. 4 and 62 ft. in Berth No. 2.
5. 5 ton derrick SWL.
6. 6 mooring ropes 120 fathoms each.
7. Port and starboard anchors to have a minimum of 8 working shackles each.
8. Midship connection (Portside 1×12 in. 150 ASA).
9. Pumping is against a head of 270 ft.
10. Laytime to be calculated at an average discharge rate of 250 t.p.h.

DENSITY: 1025.

FRESH WATER: May be available at anchorage before berthing, but it is expensive.

FUEL: Fuel oil is available at Berths 2 and 3. The 12 in. bunker hose is raised on the port side of the vessel. Bunkering rates are 100 t.p.h. to 350 t.p.h.

CUSTOMS ALLOWANCES: See "Section A – Dry-Cargo Port".

GARBAGE DISPOSAL: Garbage collected from alongside upon request. Collections are carried out only during office hours (0700 hrs. – 1500 hrs.). Charges are nominal.

WASTE OIL DISPOSAL: Not possible for large quantities, but small quantities in drums may be possible through ship's agent.

SEAMAN'S CLUBS: None.

CURRENCY: Lebanese Pound (L£).

GENERAL:

1. *Ballast*

(a) Vessels should arrive with sufficent clean ballast for safe handling of vessel under prevailing weather conditions.

(b) Ballast water must be clean and a declaration signed by the Master and delivered to the terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

(c) *Pollution of the sea – warning.* It is an offence to discharge dirty ballast or pump out bilges. The authorities are very strict and your attention is drawn to the Lebanese Notice to Mariners No. 23/1 of 29th July 1965, and to the volume entitled "International Conference on Prevention of Pollution of the Sea by Oil", issued by IMO London.

In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and port fines shall be borne by the vessel.

It is recommended that vessels carry an adequate amount of dispersants with means of application in case of oil spills.

2. *Gear to be provided by the ship*

(a) Anchor to be fitted with marker buoys and 20 fathoms line.

(b) 4 good mooring lines of not less than 150 fathoms each and of suitable size for the vessel. 2 additional 150 fathoms lines securely tailed to the first lines for cases where 150 fathoms may not reach to the stern buoys initially.

(c) For vessels of 50,000 d.w.t. and larger, powered mooring winches with 200 fathoms of wire rope.

(d) 4 suitable rope stoppers to be available aft.

(e) 2 good chain stoppers for use on 5.5 in. circumference wires (preferably carpenter's patent stoppers).

(f) 2 good 4.5 in. circumference boat ropes 200 ft. long placed one on each side of the vessel.

(g) 2 good ropes, 15 fathoms × 3.5 in. circumference and 2 heaving lines for lowering hoses.

3. *Lighting.* Manifold and poop mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

4. *Deck Watch.* A deck watch must be maintained at all times the vessel is in berth. In addition to its normal duties, the watch must inspect the hose connections and area around the ship against oil spillage, pollution, and prevent unauthorised persons from boarding your vessel.

5. *Boarding of vessel.* The control of persons boarding your vessel is the ship's responsibility. Boarding should be restricted to Company employees on duty and to persons authorised by the Port Authorities as advised by your Agents.

6. *Stores/Provisions* or other items should not be received or discharged whilst loading is in progress. Launches other than the Company's mooring launch, should not lie alongside the vessel.

7. *Tanker Safety.* Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

8. *IOTTSG Safety Check List.* The Tanker Safety check list must be completed after inspection of each item prior to commencement of and during loading. The Mooring Master is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

9. *Action in case of Emergency.* In the event of a fire, oil spillage or other emergency on the vessel,

The Emergency Signal is:—

3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

SHIPMASTER'S REPORT: February, 1983.

Documents:

1 Copy Cargo Manifest.
3 Copies Crew Lists.
1 Copy Personal Effects Declaration.
1 Copy Bonded Stores List.

Approaches: Admiralty Chart No. 2903 – Tripoli Roadstead.

Ramkin Isle Light visible on approaches to the port but cannot be relied upon for full power.

Fairway Light Buoy (flashing green every 4 seconds):
Position: Lat. 34° 30′ 00″ N.
Long. 35° 52′ 28″ E.

N.B. – The Fairway Buoy has been removed.

All buoys should be treated with caution as some removed and all unlit. Breakwater and mooring buoys give good radar targets.

Pilotage: Pilotage is compulsory. In an emergency, vessel could dock/undock without Pilot. Area on chart marked 'Pilots' should be avoided due to a wreck with only 21 ft. clearance. Most suitable position for boarding is 1 mile East of this area.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above the water. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water (U.K. Merchant Shipping – Pilot ladders – Rules 1965 is relevant).

Pilot ladder used for boarding. Accommodation ladder unsuitable due to swell.

Anchorage: Area for boarding Pilot is also suitable for anchoring, if awaiting berth due to adverse weather, and for approaches to the sealine berths. Good holding with 7 shackles of cable.

Restrictions: No night navigation.

Max. Size: Draft restricted to 62 ft. No restrictions on length or beam.

Health: Pratique granted on arrival.

Radio: Initial ETA sent to Beirut via Portishead Radio.

(a) Advice of ETA, is required 48 hours prior to vessel's ETA stating quantity of cargo required, max. loading rate, SWL of derrick for lifting hoses, and confirming that the ballast for discharge in port waters is clean.

(b) Lines of Communication:
 i. Tripoli Terminal Radio Station. Call sign ODC8.
 ii. By cable to "Petriraq Tripoli – Lebanon".
 iii. International VHF 156.8 MHz – range approx. 15 miles. Call sign "Petriraq Tripoli".

Tripoli Oil Installations – Lebanon.

Station: Tripoli Oil Installations – Lebanon, Tripoli Lebanon, private station for communication with tankers bound Tripoli, Lebanon.

Call sign: ODC8. Address: Toil, Tripoli Lebanon.

Periods open for traffic: ODC8 keeps a continuous 24 hours watch on 500 kHz for calls and answers only.

Medium Frequency Schedules: ODC8 transmits traffic list on 442 kHz and listens in the band 425-512 kHz.

0750 – 0800 hrs. GMT.	1530 – 1600 hrs. GMT.
1130 – 1200 hrs. GMT.	2200 – 2230 hrs. GMT.

High Frequency Schedules: ODC8 transmits traffic list on 8514 and 12831 kHz simultaneously and listens in the band 8554 – 8374 kHz:

0800 – 0830 hrs. GMT.	1600 – 1630 hrs. GMT.
1200 – 1230 hrs. GMT.	2230 – 2300 hrs. GMT.

Note: In addition to above, Tripoli Terminal keeps a continuous watch on the international calling frequency of 156.8 MHz. This has a range of approximately 15 miles and its call sign is "Toil, Tripoli Lebanon".

It is essential that tankers bound Tripoli Lebanon, communicate with station ODC8 at least 48 hours before arrival, and thereafter maintain contact (It may, at any time, be necessary to change orders regarding port of loading).

Radio station reported to be operating at reduced power but no contact made at all to date. Reasons given: No operators, no technicians, no maintenance, to name but a few. Contact made by VHF to 'Tripoli Oil Terminal', range varies from 15 miles down to 3 miles.

VHF: See "Radio". Pilots Channel 16, Port Channel 16, Agents' Channels 16 and 14.

Tugs: Not available. Vessels can dock/undock without tugs under favourable weather conditions.

Conditions of Use:

Notice: The facilities and assistance provided by TOIL to ships visiting the port for any purpose whatsoever are subject to the following conditions whether or not any charge is made therefor:

1. Assistance, Advice or Instructions.
   Neither the TOIL (which expression shall hereafter include any other owner of property used in conjunction with the property of TOIL) nor its servants or agents (in whatever capacity may be acting) shall be responsible for any loss, damage, injury or delay from whatsoever cause arising out of any assistance, advice or instruction whatsoever given or tendered in respect of any vessel. In all circumstances the Master of the vessel shall remain solely responsible on behalf of his Owners for the safety and proper navigation of his vessel, and the vessel and her Owners shall indemnify TOIL or its agent against all loss or damage sustained by TOIL or its servants or its agents, or for which TOIL shall be legally liable by reason of negligent navigation of the vessel.
2. Use of Sea Berths, Sea Loading Lines, Harbours, Jetties and Gear.
   (a) While TOIL has taken all reasonable care to ensure that the berths, facilities and other premises of TOIL and the gear and equipment used in connection therewith are safe, TOIL does not represent or warrant that the sea berths, sea loading or bunkering lines, harbours and jetties of TOIL or the gear and equipment (including gangways where provided) used in connection therewith are safe or suitable for any vessel, and any vessel using them or any of them shall be and remain at the sole risk of the Owners or Master thereof and in particular (but without prejudice to the generality of the foregoing) the safety or suitability of the gangway is the sole responsibility of the Master.
   TOIL does not warrant the seaworthiness of any craft hired or used by any vessel nor its fitness for any particular purpose.
   (b) TOIL will not be responsible for the acts or defaults of any of its servants or agents or of any Port Authority or its servants or agents nor for any loss, damage, injury or delay from whatsoever cause arising that may occur to the vessel or her cargo or equipment or to the Master or any member of her crew whether on board or otherwise, or in the course of mooring or unmooring or raising or lowering of the loading or bunkering lines or loading or discharging or otherwise howsoever, or to any third party, and the vessel and her Owners shall hold TOIL or its servants or agents harmless and indemnified against all claims, damages, costs and expenses arising therefrom.
   (c) TOIL will not be responsible for any loss, damage, injury or delay directly or indirectly caused by or arising from strikes, lock-outs or labour disputes or disturbances whether TOIL or its servants or agents are parties thereto or not.
   (d) If during or by reason of the use of the vessel of the sea line terminals, harbours or jetties or other premises of TOIL or its agents or the gear or equipment used in connection therewith or any craft of TOIL, any of them shall be damaged or become dangerous or unusable and irrespective of whether or not such damage has been caused or contributed to by the negligence of TOIL or its servants or agents or of any Port Authority or its servants or agents, the vessel and her Owners shall hold TOIL or its servants or agents harmless and indemnified against all loss arising therefrom.
3. These conditions shall be construed according to the law of Lebanon and if so required by TOIL the vessel and her Owners shall submit to the jurisdiction of the Lebanese Courts.

Notice of Readiness: Notice of Readiness accepted by Mooring Master at his time of boarding.

Ballast: Our vessel required a minimum of 6,000 tons of ballast on sailing light. No facilities for dirty ballast or slops.

Loading: Mooring Master remains aboard at all times. Mooring boat and crew also stand-by throughout. Meals to be provided for the extra personnel.

Loading/Discharge Operations: Ship's pumping pressure not to exceed 120 p.s.i.

Discharging: Reducers supplied by terminal. No problems for 10 in. manifold.

Programme of operations:

	Action
During Mooring Operations:	
1. Ullage, Water Dip and Sample Ship's Tanks.	Terminal for Refinery
2. Labelled Samples ex-ship and any forwarded from loading port to Refinery for checking prior to commencement of discharge.	Terminal for Refinery
3. Authority to discharge cargo after testing of ship's samples.	Refinery
General Sequence of Operations:	
1. Ship to pump sea water to clear into shore tanks the amount of gas oil contained in the sea and shore lines.	All concerned
2. When advised follow up with ship's cargo, warning of any stoppages in the ship's pumps is essential.	All concerned
3. On completion of discharge, ship to pump sea water, as required, to clear sea/shore lines.	All concerned
4. Sea/Shore Pipe-line systems to be left with sea water.	All concerned
Prior to commencement of Discharge:	
1. Pressure gauge to be fitted at hose on ship's manifold connection.	Marine Supervisor
2. Discharge pressure at ship's manifold not to exceed 120 p.s.i. (9 kgs.).	Mooring Master
3. Refinery to gauge tanks and prepare lines for the reception of gasoline (estimated at 180 long tons) and to confirm to Terminal Shift Supervisor when ready to receive the stream (time to be logged).	Refinery
4. Terminal Supervisor to ensure shift attendants are on duty to operate and supervise the booster pump at the transfer manifold.	M.M.S. and Terminal Supervisor
5. A Fireman will be required to be in attendance at the Booster Pump Manifold throughout discharge operations.	Refinery
Commencement of Discharge:	
1. Vessel to commence pumping sea water, gradually increasing pressure to maximum when all the system to the shore tank is checked and shore tank is receiving stream.	Mooring Master on board, also Ref. and Terminal Shift Supervisor
2. The booster Pump will pick up the stream at the Transfer Manifold, Pump attendants must be instructed to maintain a minimum positive suction pressure of 5 p.s.i. and operate within permissible amperage readings.	M.M.S. and Terminal Supervisor

It is VERY IMPORTANT that ship/shore operations be co-ordinated to ensure that the Booster Pump is never on stream when the ship's pumps are stopped, as this would cause DANGEROUS overheating conditions, especially dangerous in low flash point refined products.	Mooring Master, (Terminal Shift Supervisor for immediate instructions to Pump Attendant).
3. Pressure readings at ship's manifold and at Foreshore Manifold to be recorded hourly by Foreman.	Mooring Master and Terminal Foreman
During Ship's Pumping/Discharge:	
1. Refinery to sample at manifold of Tank 39 or any other points and advise when the line content of gas oil has been displaced and pumping of sea water by the ship should stop.	Refinery to Terminal Shift Supervisor
2. Refinery to advise when vessel may commence pumping its cargo.	Refinery to Terminal Shift Supervisor
3. Refinery to sample stream at Manifold of Tank 39 etc. where sea water would be drained out and switch stream into appropriate storage tanks when the required product appears in the sampling.	Refinery
4. IMPORTANT: Comply with Safety Code precautions when gauging receiving tank, especially when the oil level is below roof supports, to avoid the discharge of static electricity by the introduction of any "Conductors", such as a metal gauge tape and weight, into the space between the roof and level of the oil being received.	Refinery
Completion of Cargo:	
a) Mooring Master to advise when cargo discharge is completed and ship's tanks are dry.	Mooring Master
b) When advised, vessel to resume operations by pumping sea water to displace the line content of Blend Stock.	Mooring Master, Terminal Shift Supervisor
c) Refinery to advise when pumping of sea water may be stopped.	Refinery to Terminal Shift Supervisor
d) Refinery to gauge tanks and prepare certificate of quantity for cargo received in accordance with general procedure.	Refinery/ Terminal
e) Shore line to be re-set to "CLOSED" and to be left with sea water up to Tank 39.	Refinery to Terminal Shift Supervisor

Also see "Loading".

Density: 1025.

Fresh Water: Available by barge. Arranged through ship's Agent.

Fuel: Fuel oil is available in Berths 2 and 3 through a 12 in. hose lifted on the port side. Rates may vary between 100 and 350 t.p.h.

Diesel and lubrication oils not available.

Consuls: Nearest British Consul at Beirut.

Repairs/Dry Dock: Not available.

Surveyors: Lloyd's.

Gangway/Deck Watchmen: Due to attempted theft of paint stores by armed men, security guards recommended at the anchorage and on the berth.

Shore Leave: Not permitted.

Customs Allowances: Bond checked by Customs but not sealed.

Airport: Nearest at Beirut.

Services: Available: Laundry service, telex (unreliable), doctor, hospital, provisions, recovery of anchors, etc.

Not available: No facilities for discharge of slops or dirty ballast.

NOTICE: Responsibility for the safe conduct of operations on board your ship while at our terminal rests with you as Master. Nevertheless since our personnel, property and other may suffer serious damage in the event of accident aboard your ship, we wish before operations start, to seek your full operations and understanding on the safety requirements set out on the Ship/Shore Safety Check List.

The Safety requirements have been drawn up by ourselves in conjunction with other Terminal Operators in Middle East and representative section of the International Tanker Industry.

They are based upon the provision of the codes of safe Practice currently accepted by the Oil and Tanker Industries. We therefore expect you and all under your command to adhere strictly to them, throughout your stay in this Terminal. We, for our part, will ensure that our personnel do likewise and co-operate fully with you in the mutual interest of safe and efficient operation.

In order to assure ourselves of your compliance with these Safety requirements we have instructed our Mooring Master to report to you or your deputy and join one of your officers in a routine inspection of Cargo Decks and accommodation spaces.

If you observe any infringement of these requirements by Terminal or any other personnel on board your ships, please bring this immediately to the notice of our representative. Should you consider any immediate threat to the safety of your ships arises out of any action on our part or equipment under our control, you are fully entitled to demand an immediate cessation of operations.

Our Mooring Master is the Company Representative on board. WE RESERVE THE RIGHT IN THE EVENT OF CONTINUED OR BLATANT DISREGARD OF THESE SAFETY REQUIREMENTS IN YOUR SHIP, TO STOP ALL OPERATIONS AND ORDER YOUR SHIP OFF THE BERTH FOR APPROPRIATE ACTION TO BE TAKEN BY THE CHARTERERS AND THE OWNERS CONCERNED.

For TRIPOLI OIL INSTALLATIONS – LEBANON

AUTHORITY: *Operator:* Tripoli Oil Installations Lebanon, P.O.Box 150, Tripoli (via Beirut), Lebanon. *Tel:* 601995, 430501-8. *Telex:* 46313, 46069. *Cables:* Petriraq Tripoli. *FAX:* 06-530503. *Contact:* Captain George Abed, Marine and Terminal Manager.

AGENT: See "Beirut".

(c) PETRO-STORE TERMINAL.

PORT LIMIT: Petro-Store multi-buoy Oil Terminal is owned and operated by Petro-Store International S.A.R.L., and is situated N.E. of Tripoli Harbour in position Lat. 34° 28′ 04″ N., Long. 35° 50′ 30″ E. (British Admiralty Chart No. 2903 - Tripoli Roadstead).

DOCUMENTS: Ship's particulars, Cargo documents, Crew List, Stores Lists, Health Declaration and all tanker's certificates should be valid on date of call.

PILOTAGE: Pilotage is compulsory. Pilots meet tankers 1.5 nautical miles North of the main breakwater during daylight hours (B.A.Chart No. 2903).

ANCHORAGE: A good anchorage area is situated W.N.W. of Seaberth No. 4 of Tripoli Oil Installations - Lebanon (TOIL).

MAX. SIZE: Maximum deadweight acceptable is 35,000 tonnes with a restricted maximum draft of 7.5 m. (underwater clearance 1.5 m.).

HEALTH: Port Health Officers board tankers in Tripoli Roads. "Q" flag must be hoisted on arrival.

RADIO:

ETA: Tankers should cable their ETA 72 hours, 48 hours and 24 hours prior to their arrival at Tripoli. The Lebanese Navy (Oscar November on VHF Channel 11) should be advised of the tanker's arrival when 12 miles, 6 miles and 1 mile off Tripoli Roads.

Communications: Petro-Store International can be contacted by Telex (No. 40897, answerback FALCON), Fax (No. 966-06-610076) and by VHF Channel 16.

TUGS: Tugs of approximately 1,000 b.h.p. are available on request.

TANKERS:

Hoses: 1×12 in. and 1×8 in. hose (ASA 150 and 300) are connected on the portside.

Cargo Handling: Cargo handling is operated round the clock at a rate of 800 t.p.h.

DENSITY: Sea-water density varies between 1027 and 1030.

FRESH WATER: Fresh water is available in barges.

FUEL: Fuel oil and gas oil bunkers are available on special request.

CONSULS: British, Italian, Greek and Dutch consulates are available in Tripoli.

SURVEYORS: Most well known surveying companies are locate in Beirut and render their services in Tripoli.

CUSTOMS: Customs Officials meet tankers on their arrival at Tripoli Roads. Regulations are very strict.

GENERAL:

Tides: Tidal range is 0.3 m. to 0.45 m.

Provisions: Available in large quantities.

Deratisation: Can be obtained in accordance with International Regulations.

Garbage: Can be collected on request.

Pollution: Very heavy fines for pollution.

OPERATOR: Petro-Store International S.A.R.L. *Contact:* Mr. Ziad R. Ghandour, General Manager. Also see "Radio".

AGENT: See "Beirut".

NOTES

Please also advise Shipping Guides Ltd.

Liberia

GENERAL

COURTESY FLAG: Masters of vessels should check with the Pilot the correct times for raising and lowering (0600 – 1800 hrs.) the courtesy flag as heavy fines are imposed if raising and lowering is carried out at the wrong time. It is also advisable to carry a spare courtesy flag aboard the vessel.

PIRACY: *Notice to Mariners:*

1. Mariners are advised to exercise caution when sailing near the coast of Liberia.
2. A cargo vessels was seized by small craft believed to have been operated by the National Patriotic Front of Liberia. Information indicates that the rebel ships may be flying two flags – flag of Liberia and the flag of the National Patriotic Front (Red with Black Scorpion).
2. Mariners are advised to keep at least 30 miles off the coast.

BUCHANAN: 05.52 N. 10.02 W. (See Plan)

PORT LIMITS: A vessel shall be considered to have arrived at Port of Buchanan when she enters a circle with a 3 nautical mile radius from the beacon on the main breakwater head (FI.G.3 sec.). The above does not affect present stipulations of ore ships' Notice of Readiness, which remain unchanged nor does it limit Port Authorities exclusive right to decide in which order ships shall be worked.

Notice of Readiness: Notice of Readiness will not be accepted from vessels anchored more than 3 miles off the head of the main breakwater.

DOCUMENTS:

1 copy Clearance from last Port of Call.
1 copy Health Declaration.
6 copies Number of Passengers.
4 copies Ports of Call
6 copies Cargo Manifest (even in ballast).
7 copies Crew List.
3 copies Stores List (ship).
3 copies Personal Effects List.
1 copy Vaccination List.

Customs, health and passport inspection normally takes place at the berth.

It is recommended that the Master of the ship himself attends at the boarding party to clear the ship upon arrival and that the above documents are prepared upon the ship's arrival.

PILOTAGE: Lamco provides pilotage. Pilot boarding approximately 1.5 miles off the main breakwater, bearing 095°/110°. Pilot to be provided with a clean and safe ladder on the lee side. Buchanan Pilot on VHF Channel 16.

ANCHORAGE: If waiting for Pilot, anchor off main breakwater on bearing 090° – 110°, 1.5 miles – 2.5 miles off main breakwater (South).

Exit Channel: Anchoring is prohibited within a sector with a bearing of 060° – 080° to the head of the main breakwater, as this is the exit sector.

RESTRICTIONS: Harbour traffic hours – towage and pilotage (ore ships), 0000 – 2400 hrs. General cargo ships (tankers), 0700 – 2300 hrs.

MAX. SIZE: See "Bulk Handling Facilities", "Berthing" and "Tankers".

Arrival Draft: Maximum arrival draft for ore carriers must not exceed 8.85 m. and air draft should not exceed 15.0 m. Maximum arrival draft for cargo vessels must not exceed 9.15 m.

HEALTH: Customs, health and passport inspection normally takes place at the berths. Quarantine signal must not be hauled down before "Free Pratique" is received. If diseases are suspected on board contact the Port Authorities or Agents by radio for instructions. After call at other Liberian ports where Free Pratique has been granted, Port Health will also board here.

RADIO: Buchanan Harbour will call on 6520 kHz, 4 days before ETA, between 0800 hrs. and 0830 hrs. GMT, or when within 200 miles call Buchanan Harbour on 2182 kHz at 0800 hrs. GMT. Communications with ore ships per HF, call 2182 kHz. Traffic, 2638 kHz, 2738 kHz. VHF, call Channel 16. Traffic, Channels 6, 9, 12 and 14.

Contact immediately before arrival:

Watch schedule of Buchanan Harbour:

From about 2 hours before expected arrival of an ore ship, the LAMCO Clearing Office is keeping continuous radio watch on VHF Channel 16 and call frequency 2182 kHz, for possible subsequent switching over to VHF Channels 6, 9, 12 or 14 and 2738 kHz or 2638 kHz.

The call sign is "Buchanan Harbour", ELM 1.

All ore ships heading for Buchanan are requested to establish radio contact with "Buchanan Harbour", ELM 1, using the above frequencies approximately one hour before estimated time of arrival.

Contact 24 Hours Before Arrival:

Whenever an expected ore ship is to arrive in the Port of Buchanan within about 24 hours, the LAMCO Clearing Office will for the purpose of securing timely and accurate information on the ETA of the ship, maintain the following radio watch schedule.

Morning watch : 0800 – 0900 GMT
Afternoon watch : 1500 – 1600 GMT

Frequencies:

The radio watch is kept on call frequency 2,182 kHz for subsequent switching over to 2638 kHz, or 2738 kHz, or 6520 kHz (0830 – 0900 and 1530 –1600 GMT).

The radio set used on shore has a reach of approximately 600 miles. In accordance with the above, ore ships heading for Buchanan and having radio sets operating on frequencies listed are requested to establish radio contact with "Buchanan Harbour" and give ETA message as soon as possible after they have come within 600 miles distance from the port.

Contact at a distance of approximately 1,400 miles and on sailing from last port:

Sailing from last port: On sailing from last port for Buchanan, the owner or the Master shall telegraph to "GIMSALES", Stockholm (Telex No. 17549) and to "LAMCO", Buchanan (Telex No. 44260) stating expected date of arrival and furthermore indicate to the latter the vessel's preferred radio working frequency in the 4000 kHz – 8000 kHz range.

Radio watches: Starting 4 days before the vessel's ETA at Buchanan, "Buchanan Harbour", ELM 1, will call the vessel on 6520.0 kHz between 0830 – 0900 GMT and 1530 – 1600 GMT.

Every day, except on holidays and Sundays, Buchanan Harbour keeps watch on 2182.0 kHz between 0800 – 0830 GMT and 1500 – 1530 GMT and on 6520.0 kHz between 0800 – 0830 GMT and between 1530 – 1600 GMT. These watches will also be kept on holidays and Sundays in case a vessel is expected on those days or the following workday.

Notice in advance: The Master shall give telex or cable notice 72 hours and 36 hours prior to the vessel's expected arrival at Buchanan to LAMCO, Buchanan, if no radio contact has been established previously.

TUGS: Lamco provides towage with two tugboats 1,640 h.p. and one tugboat 3,300 h.p. Tugs join vessel about 0.5 mile North of red buoy.

BERTHING: Ore Quay: Length 257 m., depth alongside 14.0 m.
Commercial Quay: Length 320 m., depth alongside 10.0 m.
Tug Quay: Length 126 m., depth alongside 10.0 m.

Storage: A commercial warehouse with a storage capacity of 2,300 sq.m. built on the harbour along with the Customs warehouse of 1,000 sq.m.

Iron ore storage capacity: 1.7 million tons on shipping stockpiles. 0.4 million tons on feed stockpiles.

CRANES: 1×150 ton derrick crane and 1×20 ton portal crane at the Commercial Quay.

BULK HANDLING FACILITIES:

Instructions for the handling of ore ships with a draft of 39 ft. or more:

The departure shall be arranged in such a way that the following conditions are fulfilled:

1. *Minimum clearance "C"* under the ship's keel shall be 3 ft. except for ships having a beam "B" exceeding 125 ft., for which minimum clearance required shall be calculated by the following formula:

$$C = \frac{B}{125} \times 3 \text{ ft.}$$

2. *Maximum advisable draft "D" Max* in the basin shall at any time be based on the actual height of the sea level "H" at that time (measured from the project O-level) and on the required minimum clearance "C" under the keel shall under normal conditions be estimated as follows (for – 12.95 area):

$$D \text{ max} = 42.5 + H - C \text{ (all measurements in feet).}$$

3. *Departure on falling tide* is permitted only when it can be shown that the minimum clearance "C" as per above will be maintained during a period of at least 2 hours from the time the tugs start pulling. (This means as a consequence that for a ship that commences departure less than one hour *before* high water the draft shall be based on estimated level of the falling water 2 hours after commencement.

Note that the level one hour after high water has sunk about 7% and the level 2 hours after high water 25% of the total tidal range.

Deep Water Basin at Buchanan Ore Loading Quay: With the completion of the deep water basin at the Ore Loading Quay, the water depth alongside the quay is increased from 12.95 m. to 14.00 m. below the zero level of the General Elevation System.

The required keel clearance is 3 ft. for ships up to 125 ft. beam. The max. permissible draft alongside the quay is thus:

$$46 \text{ ft.} - \left(\frac{\text{beam in ft.}}{125} \times 3\right) \text{ ft.} + \text{tide}$$

Tidal range:

MHWS = +1.18 m. above zero level of the General Elevation System.
MLW = +0.05 m. above zero level of the General Elevation System.
MLWS = – 0.15 m. below zero level of the General Elevation System.

Because of the necessity to save a rock shelf to support the sheetpiling of the cells when blasting and dredging the deep water basin, new fenders have been installed at the quay in order to keep the bilges of the vessels well clear of those rocks. The new fenders have a diameter of 1.20 m. A ship loaded to maximum permissible draft can have a list of 5° without touching the rock slope but since she would touch the bottom with a list of about 3° such lists will not be tolerated.

Height of Shiploader: 17.0 m. above the water level at MHWS. A 1.0 m. safety margin is normally sufficient.

Maximum shiploader outreach (including throw) from the new fender line is 24.0 m. whereby a max. 48 m. wide vessel can be loaded. Loading rate 6,000 t.p.h. (3,000 t.p.h. July 1987).

It must be clearly understood that the sailing drafts are unchanged. The width of the deep water basin is only 60 m. It gives however, the great advantage of being able to continue loading without stopping for low water, whereby loading can often be completed 12 hours earlier than without the deep basin.

An even greater advantage is probably the increased safety, should a large ship develop engine trouble after she has exceeded the former maximum permissible low water draft, in which case operators have no alternative but to pull vessel out at HW as "dead ship" which could very easily result in a major accident with enormous economic consequences. Now operators can let vessel remain alongside over the next low tide without any risk.

Vacation of Berth: Vessels should vacate their berths immediately after completion of loading or discharging.

Ore carriers are allowed a maximum stay of 30 minutes, whereafter U.S.$1,000 per hour or any part thereof will be levied at the Harbour Master's discretion. (This may be exempt if vessel on max. draft awaiting high water sailing.)

STEVEDORES: As early as possible advance notice of ETA required latest by 1500 hrs. on day preceding arrival if a weekday, or Saturday before noon if arrival on Sunday.

Shore working hours: Ore handling: 24 hours a day.

General cargo handling:

Morning Shift:

Monday through Friday	0700 – 1500
Saturday	0700 – 1200

Afternoon Shift:

Monday through Friday	1500 – 2300
Saturday	1200 – 2300

Night Shift:

Monday through Saturday	2300 – 0700
Holidays:	0700 – 0700 of next work day.

Container vessels/Ro-Ro vessels (Afternoon Shift):

Monday through Friday	1500 – 2300
Saturday	1200 – 2300

Container vessels/Ro-Ro vessels (Night Shift):

Monday through Saturday	2300 – 0700

Container vessels/Ro-Ro vessels (Sundays and Holidays):

Sundays & Holidays	0700 – 0700

MEDICAL: Hospital and medical care is provided; advance notice should be given in serious cases. Yellow fever and cholera vaccinations are compulsory to enter the Republic. Vaccination book is required.

TANKERS: One tanker berth with 1×8 in. pipeline for discharging only. Hose connections are 6 in. and 10 in.

Max. size: 8.2 m. draft if length 170 m. or less and 7.0 m. if length over 170 m.

Oil depot capacity:
22,000 cu.m. diesel oil.
1,000 cu.m. gasoline.
15,000 cu.m. heavy oil.

Various storage tanks:
1,500 cu.m. diesel oil.
450 cu.m. heavy fuel.

DENSITY: Varying but around 1020/25.

FRESH WATER: Fresh water is available, ex-quay only, rate is 20 t.p.h. Subject to availability.

FUEL: No bunker facilities available.

GANGWAY/DECK WATCHMEN: Agent strongly recommends employment of night watchmen as thieving is commonplace.

OPENING/CLOSING HATCHES: Performed by stevedores.

CONSULS: Swedish Vice-Consul only; however, most countries are represented either by Embassy or Consul at Monrovia.

REPAIRS: No commercial facilities available. In cases of emergency Lamco might assist with minor repairs.

CUSTOMS ALLOWANCES: Direct sales from ships are strictly forbidden.

REPATRIATION: Can be arranged.

AIRPORT: Roberts International Airport about 1 hour ride by car; several connections to the rest of the world.

TIME: GMT; no alterations during the year.

HOLIDAYS: January 1st; February 11th; Second Wednesday in March; March 15th; April 12th; May 14th; July 26th; August 24th; First Thursday in November; November 29th; December 1st; December 25th. Special holidays as proclaimed from time to time by the Liberian Government. No work will be performed on January 1st, July 26th and December 25th.

POLICE/FIRE/AMBULANCE: No phone available; however the Lamco Plant Protection Force should be contacted; one Officer is normally assigned to each quay/gate.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

DELAYS: Generally, no major delays have occurred. For ore carriers and tankers the tide may occasionally involve 24/36 hours waiting time depending on the size of ships expected to load: general cargo ships; no delay.

GENERAL: *Customs:* Two Customs Officers stay on board the ship during ship's entire stay and they should be given meals in the Officers' Mess and if necessary night quarters.

Cabins: It is recommended to keep all cabins locked during the stay in port.

Provisions: There are some chandlers in Buchanan for fresh fruits, fish, etc. No duty free or wholesale facilities provided.

Tide: Range of tide 0.90 m. – 1.50 m. (3 ft. – 5 ft.)

AUTHORITY: *Port Operators:* Lamco J. V. Operating Company, c/o Roberts International Airport, Robertsfield, Liberia. *Tel:* Monrovia 224238 (local), Monrovia 221190 (overseas), Buchanan 1545, 1546. *Telex:* 44260, 44293 Lamco. *Cables:* LAMCO Buchanan (Liberia) KTB. *Contact:* Harbour Master.

AGENT: All ore carriers must employ LJVOC as their Agent.

GREENVILLE: 04.59 N. 09.03 W.

PORT LIMITS: Sea Buoy: 04° 58.27′ N., 09° 04.27′ W.

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
4 Customs and Crew Declaration.
2 Vaccination Lists and valid Cholera/Yellow Fever Certificates.
2 Copies Manifests.
2 Copies, Bills of Lading.
Load Line and Safety Construction Certificates.
Licences of Officers (for Coast Guard).
Cargo Gear Certificate.

PILOTAGE: Compulsory. Pilot embarks in position of Sea Buoy or at the authorised anchorage. Boarding is done from a launch painted black and white with the word "Pilot" inscribed. Contact can be established on a normal working day between 0730 – 1700 hrs., on Saturdays 0730 – 1200 hrs., holidays and Sundays – Office not open, but should a vessel be expected the Pilot can be contacted during the expected time of arrival on VHF Channel 16 or 12.

ANCHORAGES: Indicated on the Chart by a dotted line commencing in position Lat: 4° 58.8′ N., Long: 9° 03.4′ W. running in a direction 309° for 11 cables thence 092° for 10 cables then 188° for 7 cables with a minimum depth of 6.5 fathoms. Care should be exercised as there exists a 4 fathom patch at the edge of the anchorage area. Vessels proceeding to the anchorage area should proceed with the Sea Buoy and the North Point Lighthouse, bearing 059° to within a distance of one mile from the breakwater, thereafter altering course for the anchorage.

RESTRICTIONS: Pilotage is carried out between 0500 hrs. and 2300 hrs. daily. Under extenuating circumstances pilotage can be done after 2300 hrs., if previous arrangements are made.

MAX. SIZE: Length 156 m., beam no restriction, draft 7.31 m.

HEALTH: Pratique granted by Port Health Officer on arrival at berth, no Radio Pratique granted.

RADIO: None, ETA's should be routed to Agents via telex or cables.

VHF: Contact can be established with the Marine Office or the various Agencies during normal working hours Monday – Friday 0730 – 1700 hrs., and on Saturdays 0730 – 1200 hrs. on Channel 16 VHF.

RADAR: No Port Control radar.

TUGS: One twin screw tug of 1,450 b.h.p. available for assisting vessels. This tug is equipped with modern fire fighting appliances, and can also execute coastal towage of vessels if required. Ship's lines are preferable for towing, but if not available then tug's line can be used.

Two 192 h.p. launches are available for assisting coasters, and the towing of logs when rafting is being done.

BERTHING: One jetty 585 ft. in length with a depth of 8.1 m. Smaller jetty for vessels not exceeding 180 ft. in length with a depth of 4.9 m. alongside. In addition vessels loading floating logs can be berthed safely in the middle of the basin parallel to the main jetty with a depth of 8.1 m. Under favourable weather conditions (November – April) a third vessel can be accommodated at right angles to the jetty in a similar depth to the inner basin. All loading and discharging must be done by ship's gear.

CRANES: None presently available, but plans are underway to purchase a 70 ton mobile crane.

BULK CARGO FACILITIES: Cargo handled-forestry products only, i.e. logs, boules, sawn timber and plywood.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Arrangements can only be made on vessel's arrival as this depends on the availability of the logs and sawn timber to be loaded. The required loading rate for vessels alongside the jetty is 800 cu.m. per 24 hours and vessels in the basin 500 cu.m. per 24 hours.

MEDICAL: One Government owned hospital with 50 beds, and one private clinic, both with limited facilities available.

TANKERS: Facilities for small coastal tankers only, but larger tankers loading palm oil can use the large jetty with portable hoses/pipes connected from the permanent installation.

DENSITY: November-April 1025; May-October 1010.

FRESH WATER: Available at berth or by tug.

FUEL: Small amounts of diesel can be delivered by truck.

FIRE PRECAUTIONS: Usual precautions.

CONSULS: Nearest at Monrovia.

REPAIRS: No facilities.

DRY DOCKS: None.

SURVEYORS: All classification societies are represented at Monrovia. Surveyors will travel to Greenville if arrangements are made by Agents.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

HATCHES: Opening/closing carried out by crew but alternative arrangements can be made for shore labour.

CUSTOMS ALLOWANCES: 200 cigarettes/1 bottle spirits per crew member, but depending on duration of stay.

CARGO GEAR: Ship's gear only.

REPATRIATION: Carried out via Monrovia.

AIRPORT: Small domestic airport 5 miles from the port with two flights daily to Monrovia, approximately 45 minutes flying time.

TIME: GMT is observed throughout the year.

HOLIDAYS: There are 13 National Holidays, January 1st, New Year's Day; February 11th, Armed Forces Day; 2nd Wednesday in March, Decoration Day; March 15th, J. J. Roberts' Birthday; Good Friday; 2nd Friday in April, Fast and Prayer Day; April 12th, National Redemption Day; July 26th, National Independence Day; August 24th, National Flag Day; 1st Thursday in November, Thanksgiving Day; November 29th, Tubman's Birthday and December 25th, Christmas Day.

No work is permitted whatsoever on January 1st, New Year's Day; April 12th, Redemption Day: July 26th, Independence Day and December 25th, Christmas Day.

POLICE/AMBULANCE/FIRE: Within reach. Not available by telephone.

TELEPHONES: Not available.

SERVICES: No facilities exist for tank cleaning or compass adjusting.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.
REGULATIONS: No unusual regulations.
DELAYS: Can be expected during the rainy season (April-November) when adverse weather conditions (heavy swell) exist causing vessels to part their moorings. This usually lasts not more than 2 days in any given period. At such times, vessels are moved to the inner basin or to the roadstead until the conditions improve.
GENERAL: The port designed for the handling of logs and related wood products has just completed a re-habilitation project which included the dredging of the basin and approaches, new rafting and lighting facilities, also the placing of both fresh and salt water mains to the quay. Feasibility studies are now underway with a view to increasing the length of the Main Quay by 33 m. Despite the fact that the present facilities are for vessels of 156 m., vessels of 160 m. were safely berthed in the past year.

Navigational aids installed in 1987 as follows:
Sea Buoy R. & W. HOR. bands, Posn., 04° 58.27′ N., 09° 04.27′ W. Fl. W. ev. 10 secs.
Buoy marking mutine patch R. & W. HOR. bands, Fl. W. ev. 6 secs.
Red Buoy bearing 337° × 2 cables from the breakwater marking the Northern extremity of the Harbour, Fl. R. 3 ev. 8.5 secs.
North Pt. Lt. Ho. Sectored Fl. R. & W. 2 ev. 11 secs.

130° – 310° Obscured
310° – 040° Red
040° – 080° White
080° – 130° Red

Light at the Northern extremity of Jetty, Fl. G. ev. 3 secs.
AUTHORITY: National Port Authority, Port of Greenville, P.O.Box 165, Greenville, Sinoe County, Liberia. *Tel:* 9538/9. *Cables:* "Sinoe Port". *Contact:* Captain S. L. Wynter, Chief Pilot.

HARPER (Cape Palmas): 04.22 N. 07.44 W. **(See Plan)**

SHIPMASTER'S REPORT: August 1991.
Harper Port (Cape Palmas) located in position Lat. 04° 21.7′ N., Long. 07° 43.8′ W. is a small port with major export of logs, mainly to Europe.

The port is situated on the N.E. side of Russwurm Island.

There are buoys placed in directions and distance measured from Sea to Cape Palmas as follows (Also see "Plan"):
Buoy No. 1 – 072° × 1.6 miles. Buoy No. 2 (red) – 093.5° × 1.14 miles, near Congo Rock. Buoy No. 3 (green) – 092° × 0.6 miles, near Yoruba Rock.

Buoy No. 1 in line with beacons at Yoruba wreck (easy to spot), buoy in line with the beacons 045° × 1.8 miles which lead to Cape Palmas anchorage.

When entering the port of Harper from Buoy No. 1 steer 067°. This will bring vessel to the middle of the harbour entrance. A red buoy near Outer Rock and Cape Rock has to remain close on the portside. When entering the port the Old Jetty will remain close on starboard side. When the Old Jetty is abeam to starboard, vessel is swung to starboard in order to go portside alongside at the New Jetty. There is very little space in the port, just sufficient to swing around.

The New Jetty is about 100 m. long. There are just enough bollards to moor the ship. Several bollards are broken. Moorings break regularly and if they do not break during periods of high swell the bollards will, as happened to us, be ripped off the pier. The swell is most frequent between May and August (rainy season). The port is dangerous in the months June/July (in my opinion) when the swell is very high, especially for ships over 2,000 tons.

The New Jetty is designed for ships up to 2,000 tons but ships over 3,000 tons enter the port. Safe draft is 5.20 m., but according to personnel it is 6.0 m. at high water, but I would not recommend this. We did several trips and touched the bottom during low water with a draft of 5.2 m. (there was a big swell at the time). The swell is at times very big and it is not advisable to stay alongside the pier at night in those periods. Night navigation is also not advisable.

There are no Pilots or tugs and there is little or no communication possible by VHF or radio.

There is one working mobile crane but usually ship's gear will be used. The shipper acts as the agent so few services can be expected.

No provisions, water or fuel are available.

The following documents will be requested: 7 copies Crew List; 2 copies Narcotics List; 2 copies Stores List; 2 copies Crew Declaration; 6 copies Arms and Ammunitions List; 1 copy Health List; 6 copies Stowaway List; 6 copies Animals List; 6 copies Last Port of Call List; 2 copies Vaccinations List.

MONROVIA: 06.20 N. 10.50 W. **(See Plan)**

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists or Statements "Nil" if none aboard.
2 Manifests for Customs. This should state ballast if no cargo aboard.
4 List of Ports of call from commencement of voyage with date of calls.
1 International Health Declaration.
1 List of dates of yellow fever and cholera vaccination.
4 Stores Lists.
2 Crew Customs Declarations.
Immigration now stamp all seamen's Discharge Books or Passports.
2 Livestock Lists.

Notice:
The National Port Authority have issued Circular No. 1/1988 which reads:
"The National Port Authority, Freeport of Monrovia, is herewith announcing the following:

1. Ship's ETA, draft – and corrected ETA – shall be furnished to the Harbour Master in writing, minimum 24 hours prior to ship's arrival.
2. The following cargo documents shall be furnished minimum 48 hours prior to ship's arrival to the Operations Manager (with the exception of those cargo documents of last coastal port in West Africa, which shall be made available at ship's arrival).

Import:
6 complete and legible sets of Cargo Manifests, classing separate:
  – containers (size and type to be indicated)
  – rolling units
  – general cargo (loose)
  – LCL-container manifest (separate per unit)
  – summary.
2 Manifests of cargo to be shifted via quay
1 Stowage/bay plan
3 List of Dangerous Goods (as to IMDG-codification) for Monrovia
1 List of Dangerous Goods (as IMDG-codification) in transit

Export:
2 copies of the provisional Booking List shall be furnished minimum 48 hours prior to ship's arrival to the Operations Manager
3 complete and legible sets of Export Manifest classed as the Import Manifests – Customs passed and stamped, shall be furnished minimum 48 hours after ship's departure to the Operations Manager.

All cargo documents shall use metric system in weight and measurement.

3. As from 1st May, 1988 a new billing procedure has been established. As from this date, vessel's billing shall comprise of 2 invoices of same old form.

The first invoice shall cover marine services and facilities including water supply only, while the second invoice shall cover Operations Department tariff items i.e. shift surcharges for gangs, overtime, etc.

Payment is expected within 14 days after receipt of invoice, thereafter, port's services shall be suspended, until payment has been effected completely."

APPROACHES: The artificial harbour is protected by 2 rock breakwater extending 1.25 miles out into the open sea, encompassing some 750 acres of protected waters. The distance between the breakwater entrance is 970 ft. and in the centre of the opening a 500 ft. wide channel marked by buoys has been dredged to 49 ft. MLW. This channel is 1.33 miles long with a 30° turn half way and marked by means of 4 lighted channel buoys. North and South Mole ends of the breakwater are marked by red and green rotating light beacons respectively. The channel within the breakwaters gradually widens into a turning basin whose depth towards the Iron Ore Piers is dredged to a depth of 45 ft. MLW and 30 ft. off the General Cargo Pier.
PILOTAGE: Pilot is compulsory. Pilotage available day and night, except for vessels berthing at the oil jetties. Pilot ordered through local Agent. 24 hours or minimum 12 hours notice of ETA by Radio Telephone on 2182 kHz. Pilot instructs ship through signal tower or direct on VHF Channel 16.

Pilot comes out from inside breakwaters by pilot launch, displaying "H" flag by day and white over red light at night and "Pilot" in large black letters on side of the launch. Pilot will inform ship by VHF which direction to proceed to meet the pilot launch by the Fairway Buoy. Vessels should always keep clear of the Fairway Channel, as very large bulk carriers sail on deep draft.
ANCHORAGE: Recommended anchorage is 3 miles from breakwater (45 ft. – 60 ft.) in roadstead is to the South of the buoyed channel which provides goods holding ground on a sand and mud bottom. Vessels are not anchored within Inner Harbour except for very short periods of time.
RESTRICTIONS: Pilot service is day and night. Loaded oil tankers berth in daylight hours only. Deep loaded vessels i.e. 40 ft. draft and over are restricted to tide for berthing and sailing. Maximum draft for main ore piers is 45 ft. Vessels up to 860 ft. length can be accommodated at these piers. No restriction on beam except that carriers with beam in excess of 126 ft. may experience difficulty in loading with present loading gantries. Bulk carriers of 90,000 d.w.t. and over will berth only in daylight hours.
MAX. SIZE: Vessels loading at the Iron Ore Piers are limited to a max. draft of 45 ft. and sail from 2 hours before HW up to the time of HW.At the bunker pier vessels are limited to a draft of 32 ft. and at the marginal cargo wharf to a draft of 30 ft. Vessels exceeding these drafts can be heavily fined.

Also see "Restrictions" and "Berthing".
HEALTH: Vessels entering must fly International Code flag "Q". Port Health Officials board upon berthing. Pratique automatic for vessels having cleared at other Liberian ports, but vessel must still clear Customs.
RADIO: ETA messages from ships are received in the Freeport through Liberian Government Radio Station, Monrovia and through French Cable Station, Monrovia.

Monrovia Radio call sign ELC-2150 (6° 17′ N., 10° 48′W.) is fitted with VHF and HF radio at the Freeport, working from 0800 hrs. to 2400 hrs. The VHF is of the Marine type with Channels 6, 8, 9, 10, 11, 12, 13, 14, 15 and 16. Also transmits on 482-500-512 kHz and receives on 500 kHz A1 2.5 kW.

Other Frequencies: 8518 (8 MHz Channels 5 & 6) A1 2.5 kW
12709 (13 MHz Channels 5 & 6) A1 2.5 kW
16983 (16 MHz Channels 5 & 6) A1 2.5 kW
17146 (17 MHz Channels 5 & 6) A1 2.5 kW
22491 (22 MHz Channels 5 & 6) A1 2.5 kW

Telex Address: National Port Authority - NATPORT 44275.

VHF: Vessels arriving or sailing must make contact with Freeport Control Tower on Channels 16 and later 14 or 12 within the port area and Pilots' Office and for manouvering Channel 9.

TUGS: Use of tugs compulsory: 3 tugs available. 'Nana Kru' and 'Stockton Creek' 1,700 h.p. each and 'Bentol' 3,900 h.p. Join vessels just inside breakwater entrance. For berthing, tug lines used; for sailing, ships lines often used.

BERTHING: *Cargo Wharf:* The marginal cargo wharf is 2,000 ft. long (230 ft. leased to Amoco) and 36 ft. wide with 8 transit warehouses. The wharf has a concrete deck and has a depth alongside of 30 ft. at MLW. All cargo is discharged and loaded by ship's gear. Sufficient amount of cargo handling equipment is available such as forklift trucks ranging from 4 tons to 35 tons capacity. Tractors and trailers are available. A 40 ton capacity steam crane is available at No. 2 Berth for heavy lifts. There are also 2 mobile cranes with capacities from 25 tons to 35 tons but they are not suitable for ship discharge. Fresh water is available at this wharf, loading rate is approximately 25 t.p.h.

Bunker Pier: This is a "T" jetty on the South edge of the dredged basin with a depth of 34 ft. at MLW. No fresh water is available at this pier.

Port Authority Circular: October 1985.

"The maximum Summer deadweight of vessels allowed to berth at the Bunker Pier should not exceed 30,000 tonnes. The vessel must be provided with a minimum of 10 manila mooring ropes and under no circumstances will wire mooring lines be accepted especially those from auto-tension winches. It is also recommended that special shackles be provided by the vessels to be used in case of any unfavourable weather that will endanger the safety of the vessel while she is berthed alongside."

The bunker pier can accommodate vessels of max. LOA 700 ft. and draft 32 ft.

LPRC Crude Oil Discharging Berth: This is situated between the Bong Mine and NIOC Ore Piers and consists of one breasting dolphin and an after mooring dolphin. Tankers discharging crude oil are moored by means of 2 anchors with starboard side to the dolphin and the stern made fast to the mooring dolphin. Discharge is by means of submarine and floating pipelines connected on the starboard side amidships. Tankers are limited to a length of 700 ft. and draft of 40 ft. Fresh water is available at this pier.

Fish Pier: A pier with its own dredged channel and turning basin is used by fishing vessels to discharge cargo into cold storage. This pier is situated on the Northern Breakwater with the Cold Storage Facility located on the inshore side of the breakwater. Fresh water is available at the pier. The channel to the fish pier is 90 ft. wide and dredged to 20 ft. MLW. Size of vessels using this pier is limited to 240 ft. length and 19 ft. draft.

Iron Ore Piers:

Bong Mining Company Pier:

Approaches max. draft on MLW	45 ft.
Alongside max. LOA of vessel	900 ft.
Max. beam of vessel	125 ft.
Max. draft on HW	45 ft.
Alongside pier length	886 ft.
Depth alongside MLW	45 ft.
Loading boom height above HWOST	45 ft. 6 in.
Loading boom outreach from fenderline	57 ft.
Pier length covered by loading boom	750 ft.
Loading rate	3,200 t.p.h.

National Iron Ore Company Pier:

Approaches max. draft on MLW	45 ft.
Alongside max. LOA of vessel	1,000 ft.
Max. beam	114 ft.
Max. draft on HW	45 ft. North side 42 ft. South side
Alongside Pier length	900 ft.
Depth alongside MLW	45 ft. North side 42 ft. South side
Loading boom outreach from fenderline	60 ft.
Loading boom height above HWOST	43 ft.
Pier length covered by loading boom	640 ft.
Loading rate	1,200 t.p.h.

Fresh water available at this Pier.

Liberia Mining Company Pier: (Now used to accommodate vessels).

Approaches max. draft on MLW	45 ft.
Alongside max. LOA of vessel	830 ft.
Max. beam	130 ft.
Max. draft on HW	45 ft. North side 38 ft. South side
Alongside Pier length	825 ft.
Depth alongside MLW	45 ft. North side 42 ft. South side
Loading boom outreach from fenderline	61 ft.
Loading boom height above HWOST	46 ft.
Pier length covered by loading boom	560 ft.
Loading rate	2,000 t.p.h.

Fresh water available at this Pier.

BRIDGES: None.

STEVEDORES: Several stevedoring companies. Port Authority handles all cargo on shore and accepts cargo ex-ship's hook only.

A daily meeting with all ship's agents is conducted by the Operations Manager regarding the arrivals and departures of ships and to arrange for required gangs to load or discharge ships including requests for overtime and night work.

Stevedores gangs have to be ordered the day before required, therefore essential for Agents to receive ETA messages in sufficient time.

Working Hours: Monday-Friday: 0800-1200 and 1300-1600. Saturday: 0800-1200. Overtime is permitted at night, Sundays and Holidays if requested.

MEDICAL: Whenever possible Masters should cable Agents if require medical attention especially when arriving week-ends or during night. Hospital facilities available. Port Health require yellow fever vaccinations for crew members.

TANKERS: See "Restrictions" and "Berthing".

DENSITY: Density varies with the tide. Also varies during rainy season as river flow increases. Varies from 1009 to 1024 oz. per cu. ft. with average of approx. 1019 oz. per cu. ft.

FRESH WATER: Available (See "Berthing"). Average rate of delivery approx. 20 t.p.h.

FUEL: Light diesel oil and heavy fuel oil available and these can be blended to specification by supplying oil company. Fuel and diesel only available on bunkering pier.

CONSULS: Majority of foreign countries have Consuls.

REPAIRS: Limited deck and engine repairs can be carried out by private companies.

DRY DOCKS: One very small floating dock capable of lifting 300 tons with max. draft of 8 ft. This dock is used for small coastal craft and only accepts very limited outside work. There is also a synchrolift of about 250 tons, owned by private fishing company.

GANGWAY/DECK WATCHMEN: Private security men are engaged by the Agent. Port Security also maintain regular patrol.

OPENING/CLOSING HATCHES: Normally done by stevedores.

CUSTOMS ALLOWANCES: Tobacco, reasonable quantities for consumption while in port. Wine and/or Spirit, as tobacco.

REPATRIATION: Repatriation of crew is possible.

AIRPORT: Roberts Field International Airport 45 miles distant. Served with daily international flights to Europe and America.

TIME: GMT.

HOLIDAYS: Many official holidays during year but cargo work carried out those days on overtime rates. Port closes 3 times a year: 26th July (Independence Day), Christmas Day and New Year's Day.

POLICE/AMBULANCE/FIRE: Port Authority have own Security Force and Fire Service, situated in port area. There is also an ambulance service.

TELEPHONES: There are no facilities for telephones on board.

SERVICES: Hull, deck and engine surveys can be obtained through Lloyd's, German Lloyd, B.V., Norske Veritas, America Bureau Agents and most of the other classification societies.

Provisions are available from duty-free bonded warehouses in the Freeport area. These include frozen, chilled and tinned food, spirits and tobacco products. A wide variety of housekeeping items, such as soap, paint, etc. are also available. Fresh vegetables and fruits are available through ship chandlers. 1×100 ton capacity lighter available.

SHORE LEAVE: No restriction on shore leave.

IDENTIFICATION CARDS: Not required, but Seaman's Books are endorsed aboard by Immigration.

GARBAGE DISPOSAL: Service not available.

WASTE OIL DISPOSAL: Arranged by P & I Club.

SEAMAN'S CLUBS: None.

CURRENCY: Liberian Dollar, equivalent to U.S.Dollar.

WEATHER: *Tides and Currents:* The rise of tide varies from 2.0 ft. to 3.9 ft. from neaps to springs. The flood tide runs in a north easterly direction at approximately 1 knot and the ebb to the S.W. at approximately 1 knot. Inside the harbour a tidal flow of 0.5 – 1.0 knots is experienced. There is no prediction of the directions of flow as the water circulates around the harbour sometimes in one direction and sometimes in the opposite. The currents along the coastline are variable and not predictable.

Prevailing Wind: The prevailing wind is West to Southwest during the dry season. A Northerly wind is sometimes experienced for 2 or 3 weeks. The stronger winds are experienced during the wet season of April to November and during this period the average wind force is about Force 4 (Beaufort Scale). The wind usually rises in the afternoon or early evening and falls off during the night. During the dry season the wind is usually Northerly during early mornings and backs to the S.W. by late afternoon. Dangerous winds are revolving line squalls of intense force and usually of very short duration. Heavy rain/winds normally comes from the landside. These conditions are considered dangerous to vessels only during the process of berthing, but cause no danger to vessels in port securely moored. These infrequent tornadoes occur during the seasonal transition months of March/April and October/November.

Vessels alongside piers will sometimes experience a surge, which may part mooring lines. This is due not to the wind, but to a swell entering the harbour and is a condition which seldom occurs.

PIRACY: Acts of piracy have taken place at the port.

SHIPMASTER'S REPORT: February 1983.

Pilotage: Pilot launch has black hull, white housing and green housing top. The word "Pilot" is painted in large white letters.

Pilot boards near the Sea Buoy, 7.3 cables from Southern Breakwater.

Health: 2 Coastguard Officials and 1 Immigration Official board with the Pilot to complete formalities. We do not think that this is the case for all vessels.

Radio: The Freeport of Monrovia no longer maintains a watch on HF 2182 kHz.

Tugs: 3 tugs available.

When sailing, vessel takes 1 tug at stern, using 2 ship's lines.

Gangway/Deck Watchmen: Port security personnel maintain continuous watch while vessel is berthed.

Opening/Closing Hatches: Normally done by ship's crew.

AUTHORITY: National Port Authority, Freeport of Monrovia, P.O.Box 1849, Monrovia, Liberia. *Tel:* 221454, 222932. *Telex:* 44275. *Cables:* "Natport". *FAX:* 231-224615, 225556. *Contact:* A. Lamii Kromah, Managing Director.

AGENT: Scanship (Liberia) Inc., P.O. Box 10.0.209, Burshrod Island, 1000 Monrovia 10, Liberia. Tel: 222832, 222130. Fax: 225300. Telex: 44281. Cables: "Scanship Monrovia".

NOTES

Please also advise Shipping Guides Ltd.

Socialist People's Libyan Arab Jamahiriya

GENERAL: All ports:

NAVIGATION REGULATIONS: The following telex received from Libyan Marine Department on 21st October 1985.

Quote:

Please be advised that the following general information to be added to next edition of "Guide to Port Entry".

1. The following is a resume of instructions issued by the Libyan authorities to which all ships must abide in Libyan territorial waters (limited by 12 nautical miles and in Gulf of Sirte by parallel 32° 30′ N.).

2. Ships bound for Libyan ports must inform the authorities of the port by writing or telegram 24 hours prior to entering the Libyan territorial waters including name, flag, nationality, destination, cargo, agent, date of arrival, duration of stay in the port, port of origin and the approach route to Libyan port and the port of destination after leaving Libyan waters, they must insure continuous monitoring on Channel 16 and contact the port authorities on Channels 16, 11 or 12.

3. Commercial ships may pass on innocent passage within territorial waters only during day time provided they inform the Libyan authorities at least 12 hours prior to entering and giving the latitudes and longitudes of the points of entering and leaving, duration of stay in territorial waters, courses and speed.

4. All ships must keep to the anchorage areas shown in charts and strictly refrain from causing pollution of waters.

5. The following are declared as prohibited areas:

(A)	32° 52.8′ N.,	13° 24.5′ E.
	32° 57.7′ N.,	13° 24.5′ E.
	32° 57.7′ N.,	13° 18.0′ E.
	32° 53.8′ N.,	13° 22.3′ E.
(B)	32° 53.7′ N.,	13° 20.6′ E.
	32° 55.9′ N.,	13° 18.0′ E.
	32° 55.9′ N.,	13° 15.0′ E.
	32° 54.5′ N.,	13° 15.0′ E.
(C)	31° 09.0′ N.,	19° 42.0′ E.
	31° 09.0′ N.,	19° 19.0′ E.
	31° 56.0′ N.,	19° 42.0′ E.
	31° 56.0′ N.,	19° 19.0′ E.
(D)	32° 58.0′ N.,	13° 06.0′ E.
	32° 53.0′ N.,	13° 06.0′ E.
	32° 58.0′ N.,	12° 48.0′ E.
	32° 52.0′ N.,	12° 44.0′ E.

6. Ships that violate the instructions and the prevailing laws will be subject to punitive penalties, including opening fire at the ship and forcing her to obey the orders of the Libyan Arab Fleet.

7. All ships shall proceed to any of the following ports through the approaching point and shall inform the Port Control of her course and speed.

Tripoli Port:		
(A)	33° 00′ N.,	12° 58′ E
(B)	33° 07′ N.,	13° 10′ E
(C)	33° 05′ N.,	13° 19′ E
(D)	33° 05′ N.,	13° 04′ E
Benghazi Port:		
(A)	32° 03′ N.,	19° 50′ E
(B)	32° 09′ N.,	19° 49′ E
(C)	32° 17′ N.,	19° 53′ E
(D)	32° 20′ N.,	20° 06′ E
Zwara Port:

8. All ships shall maintain communication with the coastal stations.

9. All ships shall follow the instructions of the Port Authority about the anchorage position.

10. No ship shall have the right to change her anchorage location without port authority permission.

Unquote.

The following telex was received from Libyan Marine Department on 1st October 1990.

Quote:

The following is a resume of standard marine regulations issued by Libyan Authorities to which all ships must abide in Libyan waters, which are limited by 12 nautical miles from coastline and in Gulf of Sirte by parallel 32° 30′ N.

1. Ships bound to any Libyan port must:
   - (a) Inform her Agent in Libya, from her sailing port, of the following: Name, call sign, nationality, name and address of owner, name and nationality of Master, No. of crew and passengers (if any), G.T., type of cargo, destination port, date and ETAs or (departure), date of arrival.
   - (b) 24 hours prior to arriving at the selected approach point, vessel must contact the nearest coastal station to confirm the above information and include the following: Position, speed, course at that moment, approach point to use, state of sea, ship's condition (trim, list, draft (fore and aft)).
   - (c) On arriving at the approach point, vessel must contact the port of destination to confirm ETA, course and speed.
2. Ships leaving any Libyan port on international voyage must:
   - (a) Advise her Agent, at least 4 hours before departure, of the following: Name, call sign, No. of crew and passenger (if any), next port, cargo on board, course and speed from the outer limits of the port to the end of Libyan territorial waters.
   - (b) Insure regular communication with the port radio and coastal station on VHF Channel 16.
3. Ships on voyages between Libyan ports must:
   - (a) Advise her Agent of the following: Name, call sign, ETAs or (time of departure), cargo on board, next port, ETA, draft (fore and aft), course and speed or courses and speeds.
   - (b) Insure continuous monitoring on Channel 16.
   - (c) Insure regular contact with the port radio and/or coastal station every 4 hours or when possible.
4. All ships must abide to the anchorage and prohibited areas and must adjust their course to pass by one of the approach points.
5. All ships must insure that they have on board all certificates and documents required, including the Safe Minimum Manning Certificate, when going to any Libyan port or passing through Libyan territorial waters.
6. Ships that violate these standard regulations and prevailing laws will be subject to punitive penalties.
7. These regulations will come into force on 10th October 1990.

Unquote.

CLEARANCE: ETA to be advised to Port Authority 24 hours before arrival, including the following information: Ship's Name, type, Nationality and port of Registry; Owner, Master and Agent names; Gross and Net tonnage; Ship's length and draft forward and aft; Expected duration of stay in the port; Last port of call, tonnage, quantity and kind of cargo for discharging and loading; Full details of any dangerous liquids or cargo; Number of passengers and crew; Health situation.

Before arrival at the outer limits of the port, vessel requested to hoist the following signals: Flags of her call-sign; Flag of Quarantine; Flag of ship's Nationality; The Libyan Flag on the foremast; Red Flag during daylight and Red light during night-time, if carrying explosives or any inflammable cargo; Pilot Flag and the international flag code signals must be respected.

DOCUMENTS: *On Arrival:* Last Port Clearance; Full sets of cargo documents; Copies covering consignment; Certificate of Origin; Bills of Lading, etc. Not less than 7 copies of Crew and Passenger Lists. Other documents as required at each port.

Ship's Certificates should be delivered to the Marine Inspection Office at the port.

During the First 24 Hours of Arrival: Valid certificates to comply with all the International conventions in force for the State whose flag the ship is flying. Certificate of Registry. For the National ships, moreover, the official log book, engine log book and ship's articles.

Agency Requirements: The following agency requirements in respect of pre-arrival notices and documentation in addition to official documents and certificates needed for ordinary port clearance should be complied with. Pre-arrival notice to be communicated by telex to Agents containing following information:

(a) vessel's name and flag;
(b) g.r.t./n.r.t./s.d.w. and nature of cargo;
(c) ETA and quantity of cargo to be handled;
(d) exact address to whom disbursements accounts should be sent.

For dry cargo vessels further information should be submitted:

(e) conditions of stevedoring, whether basis liner terms or F.I.O.S.;
(f) net freight earned along with all cargo details specifically each Bill of Lading.

Upon arrival the following documents are to be handed over:

1. Masters of tankers should produce and hand over to Port Authorities 'Certificate of Discharge' pertaining to previous calls (non-compliance will cause delay in berthing);

Following only applying to dry cargo vessels:

2. 14 copies of Cargo Manifest (clearly stating measurements and weights);
3. 2 copies of Freight Manifest;
4. 2 copies each Bill of Lading;
5. 2 copies Cargo Plan.

Report: May 1984. From State Agent.

Agent to submit all ship's documents/certificates, cargo documents and crew documents and/or any other declarations connected thereto, in the Arabic language. This is effective from 1.6.84, noting until this date, we shall arrange for the required translation as a transitional period, after which and effective from the above mentioned date, all ships shall arrive with all above said documents/certificates/ declarations, etc., in the Arabic language.

Your full and strict adherence to the above is required avoiding unnecessary inconveniences to all parties concerned as any failure on your part shall never be tolerated by the concerned authorities.

Report: June 1984. From State Agent.

Please note: Temporarily vessels should arrive with the following ship certificates already translated into Arabic, otherwise vessels shall be delayed in sailing. The other documents we shall arrange for translation of same at our end on a temporary basis:

Certificate of Registry.
Safety Construction Certificate.
Safety Equipment Certificate.
Radio Telegraphy Certificate.
Load Line Certificate.

Report: September 1984. From State Agent.

Following documents imperative to be translated at your end, and not by Agent:

1. Ship's documents:

Registry Certificate.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio – Telegraphy Certificate.

2. All Cargo Manifests.

3. All other lists and declarations such as Crew List, Officers' List, Stores, etc.

Note that the competent authorities at our end (namely the Ports and Lights Department of Tripoli) are presently insisting on collecting from ship direct all the documents in question in Arabic translation upon vessel's arrival thus leaving no possibility whatsoever for any assistance previously rendered by the Agent.

PILOTAGE: Pilotage is compulsory for all vessels. Pilot boat will meet ships outside the harbour. Ships should wait for Pilot at anchor outside the harbour if weather is good. In case of bad weather, after getting permission from Harbour Master ships may enter the harbour at their own risk and anchor inside.

ANCHORAGES: *Benghazi:* Area between Lat. 32° 11′ N. and 32° 07′ N. and Long. 19° 56′ E. and 19° 59.2′ E.

Derna: Within 1.5 miles radius of position Lat. 32° 49.3′ N. and Long. 22° 39′ E.

Es Sider: Area between Lat. 30° 41.5′ N. and 30° 43.0′ N. and Long. 18° 22′ E. and 18° 25′ E.

Misurata: Within 1.5 miles radius of position Lat. 32° 23.0′ N. and Long. 15° 18′ E. (about 4.7 miles from main lighthouse).

Tobruk: Area between Lat. 32° 03.7′ N. and 32° 05.5′ N. and Long. 24° 02.0′ E. and 24° 03.0′ E.

Tripoli: Area between Lat. 32° 55.5′ N. and 32° 56.5′ N. and Long. 13° 09.8′ E. and 13° 11.7′ E.

Zuara: Within 1 mile radius of position Lat. 32° 57′ N., Long. 12° 10′ E. (in direction 065° from main lighthouse).

Also see individual oil terminals.

HEALTH: The following documents to be provided for the doctor: A valid Fumigation Certificate; International Vaccination Certificate for every person on board; Health Certificate for any animal or bird on board. No automatic Free Pratique between the Libyan Ports.

TUGS: Tugs are available at all Libyan Ports.

BERTHING PRIORITY: The berthing priority scheme, according to law, as follows: (1) Passenger ships. (2) Animal ships. (3) Liner and mail ships. (4) Cargo ships. (5) Tankers and dangerous cargo ships. Ships with cargo of less than 300 tons, may not have to comply with the scheme; subject to Harbour Master's decision.

CONSULS: Embassies in Tripoli. No consuls at any ports.

SURVEYORS: The following addresses are Agents for the mentioned Classification Societies and may be contacted for the necessary surveys on request:–

Lloyd's Register of Shipping: P.O.Box 111115 Tripoli. Telephone: 74383. Telegraphic Address: Lloydsreg Tripoli Libya.

Bureau Veritas: Tripoli: Orfelli Agencies, 109 – 1st September Street, P.O.B. 2283, Telephone: 35338 and 37398, Telegraphic address: Shetaf Tripolilibia.

American Bureau of Shipping: Tripoli: Libyan Arab Shipping, Baghdad Street, Andalus Building, P.O.B. 882, Telephone: 41712 and 39358, Telegraphic Address: Arabship Tripolilibia, Telex 20033 Arabship.

Germanischer Lloyd: Tripoli: Johs Rieckermann, Baghdad Street, Andalus Building, P.O.B. 2121, Telephone: 37021 and 31069, Telegraphic address: Rieckermann Tripolilibia.

Registro Italiano Navale (RINA): Tripoli: Mr. Mahmoud Gamar, c/o Libyan Arab Shipping Co., Baghdad Street, Andalus Building, P.O.B. 2325, Telephone: 41712 and 39358, Telegraphic address: Gamarin Tripolilibia.

OPENING/CLOSING HATCHES: To be done by crew.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member or passenger. All kinds of alcoholic drinks are forbidden, even wine and beer, and to be kept in the store under the Customs seal. Also arms, perfume, saccharine and all kinds of anaesthetic. The sum of 10 Libyan dinars allowed for each crew member. All Libyan and Foreign currency to be declared in the Currency Declaration. All personnel effects and electronics to be declared in the Crew Declaration.

BLACK LIST: Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour will be liable to heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

TIME: Local time at all the seasons is GMT plus 2 hours.

HOLIDAYS: Friday is the weekly day off. 2nd March; Revolution Day (1st Sept. yearly); Evacuation Days (28th March, 11th June, 7th October; yearly), Syrian Revolution Day (8th March, yearly); Sudanese Revolution Day (25th May, yearly); Egyptian Revolution Day (23rd July, yearly); Hijra New Year (1st Moharam, Muslim year); Ashoura (half day, 10th Moharam, Muslim Year); Mohammadan birthday (12th Rabih Awel, Muslim Year); Israa Wa Merag (half day, 26th, Rajeb, Muslim Year); Eid El-Fitr (1st, 2nd & 3rd Shawal, Muslim Year); Eid El-Adha (9th, 10th, 11th, & 12th Zi Al-Heja, Muslim Year).

TELEPHONES: All calls through Tripoli and Benghazi Coastal Stations – No calls allowed when the ship is alongside.

SHORE LEAVE: Crew members permitted ashore during daytime. Shore leave not permitted at oil terminals.

IDENTIFICATION CARDS: Seaman's Book or Discharge Book, Passports, Identity Cards — all should be valid.

Shore passes issued and Seaman's Book to be kept at the gate at port entrance.

MINE FIELDS: The following areas are prohibited area and dangerous for navigation due to mines:

(1) Lat. 32° 52.78′ N. Long. 13° 24.60′ E.
Lat. 32° 57.67′ N. Long. 13° 24.46′ E.
Lat. 32° 57.67′ N. Long. 13° 18.00′ E.
Lat. 32° 53.82′ N. Long. 13° 22.30′ E.

(2) Lat. 32° 53.70′ N. Long. 13° 20.61′ E.
Lat. 32° 55.93′ N. Long. 13° 18.00′ E.
Lat. 32° 55.93′ N. Long. 13° 15.00′ E.
Lat. 32° 54.45′ N. Long. 13° 15.00′ E.

(3) Lat. 32° 37.00′ N. Long. 23° 13.00′ E.
Lat. 32° 14.50′ N. Long. 23° 31.00′ E.
Lat. 32° 10.50′ N. Long. 23° 28.50′ E.
Lat. 32° 37.50′ N. Long. 23° 7.50′ E.

ATTENTION: It is imperative that vessels contact the wireless stations on the Libyan coast at a distance of 30 miles from the proceeding port, giving the ship's position. Ship's winches and cargo gear should be in good order otherwise they will be liable to heavy fine if any delay occurs.

FLOATING DOCK: See "Tripoli".

REGULATIONS: Foreign currency not to be taken ashore. Crew members' visits between ships are not allowed without the prior permission of Customs and Immigration. Ship's lifeboats are not to be used within harbours limits without the prior permission of the authorities. No engine repairs to be carried out in port whilst alongside or at anchor in the port without prior permission of authorities. Movements of ships in the port are not allowed without instructions. Using ship's propellers whilst in port is not allowed without permission. Ship's whistles not to be used without good reason. Cleaning funnels or making smoke whilst in port is strictly forbidden. Ship's gangway to be in position at all times whilst alongside. Rat guards to be fixed all times on every rope. Painting or scraping the outer hull of the ship not to be carried out without prior permission of authorities. Duty officer to be on board all the time accompanied by sufficient crew.

For tankers or vessels laden with dangerous cargo; moreover, the mentioned hereabove: Red flag to be hoisted in daylight and red light to be on in the night-time. No movements allowed between sunset and sunrise for such ships. Electricity to be off from ship's holds whilst loading or discharging. Towing wires with suitable shackle to be ready fore and aft. Smoking and any kind of fire are strictly forbidden on deck. All steps for safety to be carried out.

POLLUTION: Pollution of any kind is strictly forbidden. Any ship causing any kind of pollution will be liable to heavy fine.

The discharge of ballast from cargo tanks is not permitted in Libyan waters by vessels calling at Libyan ports.

DELAYS: Delays in berthing and load/discharging can normally be expected.

Telex: 40497, 40074, 40103.

BENGHAZI: 32.06 N. 20.03 E. (See Plan)

Also see "General" before first port.

PORT LIMITS: (a) The water area existing within the actual breakwater and that which may fall within any new breakwater eventually constructed up to the bridge across the shallow water basin at the Eastern side.

(b) The water area known as the navigational channel outside the harbour commencing as from the harbour entrance along the distinguishing marks of the channel for a distance of 1 mile (2 km.).

ANCHORAGE: See "General" before first port.

RESTRICTIONS: Vessels are not permitted to enter harbour between sunset and sunrise.

MAX. SIZE: All types of ships with 27 ft. draft and less in Wintertime and 28 ft. and less in Summertime are safe to enter the harbour.

RADIO: Benghazi Port Radio, from 0800 to 1800 hrs., call sign 5AV, R/T 2182, VHF Channel 16.

VHF: Port Radio on Channels 16 and 12.

BERTHING: Up to 15 vessels can be berthed at one time.

Quay No.	*Length* m.	*Depth* m.
1	310	9.0
2	280	9.0
3	170	9.0
Libya No. 1	40	5.5
Libya No. 2	130	5.5
Libya No. 3	115	5.5
F.J. No. 1	135	5.5
F.J. No. 2	135	5.5
F.J. No. 3	135	8.0

Note: F.J. No. 3 not in use at the present time.

CRANES: Electric floating crane available up to 200 tons.

STEVEDORES: All stevedoring operations and formalities to be done by Agent, 2 stevedoring companies will be formed in the near future.

MEDICAL: All facilities available.

TANKERS: *Ras al Mingar:* The jetty is near Benghazi.

One side of the jetty handles dirty products and LPG.

Max. d.w.t.: 10,000 tonnes.
Max. draft: 22 ft. in Summer and 21 ft. in Winter.
Max. LOA: 140 m.

The other side handles clean petroleum products.

Max. d.w.t.: 9,000 tonnes.
Max. draft: 21 ft.
Max. LOA: 120 m.

A derrick with SWL of 5 tonnes is required. The derrick must have a minimum outreach of 2.7 m.

Also see "Shipmaster's Report".

FRESH WATER: Available by barge and alongside. Should be obtained from Port Authority through ship's Agent.

FUEL: Available through Agents. A notice of 48 hours needed, advisable for Chief Engineer to check what grades are available.

CONSULS: None.

REPAIRS: Minor repairs are possible. Also see "Tripoli".

WATCHMEN: Compulsory, provided by Port Authority.

REPATRIATION: Facilities exist without difficulty.

AIRPORT: Benina Airport situated 29 km. away.

POLICE/AMBULANCE/FIRE: Police 99, Ambulance: 2131, 2132, 2281; Fire: 5555, 5599.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: Port extension project underway.

SHIPMASTER'S REPORT: April 1993.
Ras al Mingar: 5 miles North of Benghazi.

The jetty extends 600 m. from shore in direction 310° and is suitable for natural gas tankers. Two of the three berths are out of order as part of the jetty was destroyed by bad weather.

The inshore berth can accept tankers for gas oil, gasoline and jet fuel or LPG tankers with max. draft 21 ft. and max. LOA 110 m.

2 tugs assist with berthing and unberthing.

Ras al Mingar Pilot works on VHF Channel 72 but all procedures are through Benghazi Port Control.

Back pressure was 2.5 kg./sq.cm., sometimes one booster pump is used to assist with discharge.

When unberthing, the Pilot remains ashore and co-ordinates the operation on VHF Channel 77 with tugs and vessel.

Documents as per other Libyan ports.

Water is available, but only 10 – 15 tonnes in 24 hours.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first port.

BOURI: 33.54 N. 12.39 E. (See Plan)

LOCATION: The position of the AGIP Oil FSO "Sloug" is:

Lat. 33° 54′ 32.94″ N., Long. 12° 39′ 19″ E.

The FSO is moored to a single point mooring structure by a hinged bracket. The water depth is 161 m.

FSO "Sloug": LOA 348.9 m.; Length between perpendiculars – 330.7 m.; Moulded depth 25.5 m.; Moulded breadth 51.8 m. Max. draft 20.012 m. and Minimum draft 10.0 m.

DOCUMENTS: Documents required to obtain clearance are as follows:

5 copies Crew List.
5 copies Passenger List.
2 copies Tobacco/Spirits Declaration.
2 copies Personal Effects Declaration.
2 copies Stores Declaration.

Following certificates will also be inspected by the Libyan authorities:

Clearance from Last Port.
International Maritime Health Declaration.
Animal List, with proper Health Declaration.
Entering and Leaving Territorial Waters Certificate.
Report Inwards Certificate.
Report Outwards Certificate.
Boycott Certificates.
Tankers Characteristics Certificate.
Certificate of Discharge, signed by the discharge port authorities, of the last port (cargo) loaded in Libya.
Tovalop Certificate.

Port Entry: Offtaking Vessel's Free Pratique, Customs Entry and Clearance, Immigration inspection and documentation for the loading operation will be arranged by vessel's agents.

Agency: An Agency representative is stationed on the FSO for ship's Clearance.

APPROACHES: Two production platforms (DP4, DP3) are situated respectively in position Lat. 33° 55′ 23.38″ N., Long. 12° 40′ 50.96″ E. and Lat. 33° 53′ 39.45″ N., Long. 12° 36′ 23.83″ E.

Subsea lines run between the 2 platforms and the FSO. All ships are warned that it is strictly forbidden to anchor within 0.5 miles of the line joining the two platforms.

No ship should approach any of the structures closer than 0.5 miles and should proceed to the "Waiting Area" (2 miles South of the FSO) adhering strictly to this regulation, and await for further instructions from the FSO.

PILOTAGE: The Mooring Master will board the Offtaking Vessel in the "Waiting Area" which is located 2 miles South of the FSO. Depth of water 166 m.

Also see "Mooring/Unmooring".

RESTRICTIONS: Mooring operations normally take place during daylight.

MAX. SIZE: 35,000 d.w.t. – 150,000 d.w.t. Max. LOA 283.0 m. Max. beam 44.0 m. Draft – no limit.

RADIO/VHF: *ETA:* Vessels will inform "Agip Oil Tripoli", through their local agents, of their ETA at the designated "Waiting Area" located about 2 miles South of the FSO "Sloug" Terminal.

Notices Procedure: All vessels destined to load Crude Oil at the Bouri Field are requested to inform "Agip Oil Tripoli" of their ETA 72 hours, 48 hours and 24 hours prior to their arrival at the "Waiting Area".

The "72 hour notification" must include the following information:

1. Firm ETA (local time and date).
2. Name of tanker and Master's name.
3. Flag.
4. Gross tonnage.
5. Nett tonnage.
6. DWT.
7. Quantity of cargo required.
8. Confirm 2×16 in. connections (ASA 150) on port side manifold.
9. Confirm existence of a Smit Bracket or chain stopper forward.
10. LOA and Draft.
11. Distance from bow to manifold and stern to manifold.
12. Minimum vessel's speed and equivalent RPM.
13. Confirm availability of at least 10 mooring lines forward and 6 mooring lines aft (mooring lines should be suitable for the intended service).
14. Shipper.
15. Agent.
16. Consignee.
17. Destination.
18. Last port of call.
19. Any requirements needing early attention.
20. Confirm inert gas system operating correctly and that vessel will maintain a maximum oxygen content of 8% in the tanks throughout berthing, deballasting, loading and unberthing operations.

The 48 hour and the 24 hour notification shall specify only the latest ETA, plus any amendments to the details already advised under the "72 hour Notification".

After the initial notification has been made, any change in ETA of more than 12 hours must be immediately communicated to "Agip Oil Tripoli" through the ship's agent.

Radio Contact with the FSO "Sloug": Vessels in VHF range of the FSO will call "Bouri Terminal" on Channel 16, working on Channel 70. Once in contact, a mutually agreed upon channel will be used.

A private channel will normally be used between the FSO and the Offtaking Vessel during operations. The Mooring Master will supply portable sets equipped with this channel for operations use.

Communications during Loading Operations: Medium and high frequency radio systems are to be shut down during cargo transfer and deballasting.

Communications Failure: Should communications fail during any part of the operation (mooring, cargo transfer, unmooring), the party affected shall sound the International Code Signal "K" on her whistle and all operations, if in progress, will be stopped until normal communications are re-established.

MOORING/UNMOORING: To ensure coordination between the FSO and Offtaking Vessel, a Mooring/Loading Master will be in attendance to advise the operational procedures necessary to ensure a safe, accident and pollution-free operation.

Mooring Master: The Mooring Master will board the Offtaking Vessel at the "Waiting Area" by a tug that will remain in attendance. Necessary mooring gear (when applicable) will be transferred to the Offtaking Vessel.

Lifting Gear: The Offtaking Vessel must have her own lifting gear rigged and ready for use on her port side *but not swung out.*

Accommodation Ladder: The Offtaking Vessel must have her accommodation ladder and pilot ladder, rigged in combination, on her port side and lowered to about 2.5 m. above the water level. Crews in attendance should be in radio contact with the vessel's bridge.

Lee Side: The Offtaking Vessel shall manoeuvre in a way to make a lee on her port side, to allow the Mooring Master and other Terminal personnel to board the vessel.

Mooring Master's Station: The Mooring Master shall be stationed on the bridge of the Offtaking Vessel and advise the Master on the mooring procedures. Safety Check List(s) must be signed by the vessel's Master prior to the beginning of any operation.

Aborting of Mooring Operation: The Mooring Master will always be prepared to abort the mooring operation, either on his own initiative or upon instructions of the Master of the Offtaking Vessel. The decision should be taken in ample time whilst the situation is still under control.

If, for any reason, the Terminal Superintendent on the FSO requires to abort the operation, he will inform the Offtaking Ship immediately.

Mooring Master's Duty: The advisory service of the Mooring Master will continue until the Offtaking Vessel is safely secured to the FSO, either alongside or in tandem and will resume during the unmooring and departure operations, until the Offtaking Vessel is at a safe distance from the FSO (i.e. in the Waiting Area).

Fenders: The fendering system of the FSO consists of 5 "Yokohama" rubber fenders, secured to the FSO's side prior to the beginning of the operation. Offtaking Vessel must be ready to use her own secondary fenders.

Mooring Operations Hours: Mooring operations will normally take place in daylight hours only. In special cases the Terminal Superintendent may authorise the Mooring Master to perform mooring operations during night hours.

Mooring Manoeuvre (Side to Side): The Offtaking Vessel will manoeuvre in a safe way so as to approach the FSO's starboard side, making use of her engines and *if necessary* utilising the services of the tug in attendance, under the Mooring Master's advice. A wire rope suitable for towing should be made ready and lowered from the starboard bow to the water level when approaching the FSO until securely moored, to be used by the tug *if necessary.*

Caution: No anchors must be used. Anchors must be secured in such a way as to avoid accidental release.

Number of Mooring Lines (Side to Side): A minimum of 10 suitable lines will be secured fore and 6 aft, 2 of them must be spring lines at each end.

Unmooring Manoeuvre (Side to Side): The unmooring manoeuvre will again be monitored by the Mooring Master. The tug will be in attendance. A rope suitable for towing should be made ready and lowered, from the Offtaking Vessel's starboard bow, to the water level, to be used by the tug *if necessary.*

Mooring Manoeuvre (Tandem): The Offtaking Vessel will manoeuvre in a safe way so as to approach the FSO's stern, making use of her engines and, *if necessary,* utilising the services of the tug in attendance under the Mooring Master's advice.

Caution: No anchors must be used. Anchors must be secured in such a way as to avoid accidental release. A wire rope, suitable for towing, should be made ready and lowered from the stern central fairlead to about 1.0 m. from the water level, but *no further,* unless so instructed.

The tandem mooring assembly floating pick-up rope will be heaved up from the Offtaking Vessel's bow Panama Fairlead by a polypropelene messenger rope of 1.5 in. diameter and at least 300 ft. long, that must be made ready while approaching. The Mooring assembly will then be heaved up and the chafing chain stoppered in the bow Smit Bracket or chain stopper. In case no suitable Smit Bracket or chain stopper is available, the chafing chain will be stoppered by 2 wire snotters made fast on the ship's bollards (wire snotters and necessary gear will be supplied by the FSO when the vessel is at the "Waiting Area").

Immediately after the chafing chain is made fast, the tug will pass to the offtake vessel, a nylon towing rope, 14 in. circumference, to be made fast to one of her stern bollards. The tug maintains the towing rope on its quick release hook.

Care should be taken not to move the propeller during this operation.

The tug will remain in attendance during the whole time the vessel is in "tandem", in order to avoid any contact between the Offtaking Vessel and the FSO's stern.

Caution (Tandem and Side-to-Side Mooring): Offtaking ship's main engines must remain in constant readiness to move under its own power, during the whole time spent moored at the FSO.

Tandem Mooring Assembly Composition:

The system is composed of:

1. About 30 ft.×3.5 in. diameter chafing chain, stoppered by a Smit Bracket on the FSO

   connected to

2. About 170 ft.×21 in. circumference nylon rope

   connected to

3. About 30 ft.×3.5 in. chafing chain that will be stoppered on the Offtaking Vessel by a Smit Bracket or chain stopper, or by 2×2.75 in. diameter (approx.) wire snotters. The chafing chain is held afloat by a metalic buoy connected by a 1 in. "O" Chain, about 9 ft. long, to the extremity of it

   connected to

4. About 600 ft.×14 in. polypropelene floating pick-up line.

LOADING: Max. loading rate 9,000 cu.m.p.h. (56,610 bbl.p.h.).

Crude Oil:	Name: Bouri.	Pour Point: Less than 10°C.
	API: 26.0.	Loading Temp: +37.8°C (100°F) approximately.

Hydrogen Sulphide: Masters are warned that Bouri Crude might contain Hydrogen Sulphide (H_2S)*. Crew members involved in cargo operations should be warned of the hazard that can be faced and how to deal with it.*

Loading Operations at the FSO: Loading operations will be carried out either:

1. Side-by-Side: Export tanker moored to the FSO's starboard side by her own mooring lines (minimum 10 lines forward and 6 lines aft, of which 2 must be spring lines each end)

   or

2. Tandem: Export tanker moored to the FSO's stern by the FSO's mooring assembly. Export tankers should have a Smit Bracket or chain stopper fitted. In case no Smit Bracket or chain stopper is available, suitable wire snotters and ancilliary equipment will be supplied by the FSO to allow the mooring.

Check List: Before commencing any loading operations a Check List will be completed and signed by the Offtaking Vessel's Master and retained by the Mooring Master.

Mooring Arms or (alternative) Hoses: The FSO is equipped with 2×16 in. (150 ASA) loading arms.

Stern Loading Hose: The FSO is equipped with 1×16 in. hose floating string, about 800 ft. long, connected to the stern for "Tandem Loading". The string end will be picked-up after the completion of stern mooring, by the ship's own lifting gear and connected to the port side manifold.

Deballasting: The Offtaking Vessel must be able to load while discharging ballast from her clean ballast tanks to the sea. In case the Offtaking Vessel could not load while discharging ballast, she should be prepared to load part cargo before discharging ballast, in order to maintain a proper draft and trim, while always ensuring that no oil pollution could arise.

Commencement of Loading: Loading operations will start as soon as the mooring arms (or hoses) are connected and as soon as agreed between the Offtaking Vessel's Master/Chief Officer and the Mooring Master, who will assist with the whole operation.

Loading Rate: Loading will start at low pumping rate to ensure the tightness of the system and will then be brought to the maximum *previously agreed upon* rate.

Watches during Loading: Manifolds and mooring line watches will be continuously kept on the Offtaking Vessel during the whole loading operation.

Lack of Communications: Communications between the Offtaking Vessel and the FSO will be ensured by means of portable radio sets supplied by the Mooring Master. In no case should there be a breakdown in communications during the loading operations. In event of such breakdown, the International Morse Signals, letter "K", will be blown by the Offtaking Vessel or by the FSO whistle. Loading operations will be stopped until communications have been re-established.

Completion of Loading: As soon as the loading operation is completed the loading arms/hoses will be disconnected and the Offtaking Vessel will be unmoored and sailed to a safe distance from the FSO, with the advisory services of the Mooring Master. Cargo documents will be brought to the vessel later by the tug.

BALLAST: There are no facilities for receiving clean/dirty ballast at the Terminal. Only clean ballast can be discharged overboard.

MEDICAL: In case of need of medical attention, the following information should be sent to the Agents:

1. Name, rank, nationality and passport number of the crew member.
2. General symptoms and/or any particular requirements.

FRESH WATER/FUEL: Available in cases of emergency only.

SHORE LEAVE: Crews are not allowed shore leave, however sick crew members can be repatriated or go ashore for medical attention. In case of repatriation, the Master must agree the correct procedure with his agents.

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: Not available.

WEATHER: *Winds:* Radial distribution shows an increase of wind blowing from N.W. and a decrease when blowing from E.S.E. Maximum observed wind speed can reach gale Force 8 (sometimes more) from N.W. during Winter time.

Waves: Waves are mainly from West to North and from East to S.E.

Waves generated by cyclonic disturbances come from N.W. to S.E. across the Thyrrenean Sea. High pressure in the Bouri area direct waves from E.S.E. to North.

Currents: The prevailing current is flowing Eastward with a maximum rate of about 1.5 knots.

Miscellaneous:

Max. sea surface temperature:	31°C.
Min. sea surface temperature:	7°C.
Max. air temperature:	33.5°C.
Min. air temperature:	5°C.

Rain:

Annual average is about 381 mm. Significant periods are January – February with 68 mm. and November – December with 80 mm.

Max. tide range: 0.95 m.

Bottom conditions: 18 m., thick top silty carbonate sand.

GENERAL: *Flag:* All ships calling at Bouri Field must fly the Libyan flag and the Quarantine signal must be displayed upon the authorities visit.

Gangway: Normally no gangway will be rigged between the FSO and the Offtaking Vessel. Should one be used, a safety net must be fitted underneath.

Visitors: Unauthorised personnel are not allowed to visit the FSO or the Offtaking Vessel.

OPERATOR: AGIP Oil Ltd., Dahra Building, P.O. Box 346, Tripoli, G.S.P.L.A.J. *Tel:* 35135-35153. *Telex:* 20282 Ly. *FAX:* 46293.

Contact: Marine Co-ordinator – Production Department.

DERNA: 32.45 N. 22.40 E. (See Plan)

Also see "General" before first port.

PORT LIMITS: (a) The water area existing within the actual breakwater and an imaginary line connecting the end of the breakwater and the damaged breakwater existing at the Southern side.

(b) The water area known as the navigational channel outside the harbour commencing as from harbour entrance for a distance of 1 km.

ANCHORAGE: See "General" before first port.

RESTRICTIONS: Vessels are not permitted to enter harbour between 2100 hrs. and 0600 hrs.

MAX. SIZE: Depth of Inner Bay – 8 m., Entrance – 9 m. and Outer Channel 10 m.

RADIO: Recommended that radio messages for Agents be sent via Malta Radio or any other near coast station.

VHF: Port Control on Channel 16.

TUGS: 3 tugs available.

BERTHING: Old Quay, Length 120 m., depth 6 m. New Quay, length 950 m., depth 9 m.
CRANES: 3 cranes available.
STEVEDORES: All stevedoring operations and formalities to be done by Agent. Two new companies will be formed in the near future.
MEDICAL: Available.
TANKERS: Max. size 18,000 d.w.t. Max. draft 11.5 m. if weather conditions permit.
FRESH WATER: Available alongside, to be supplied by Port Authority through ship's Agents.
FUEL: Available through Agents, a notice of 24 hours needed. Advisable for Chief Engineer to check what grades are available.
CONSULS: None.
REPAIRS: Not available. See "Tripoli".
WATCHMEN: Compulsory, provided by Port Authority.
REPATRIATION: Available via Benghazi.
POLICE/AMBULANCE/FIRE: Call Port Manager, 2063 and 2074.
SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.
DEVELOPMENTS: New port facilities to include 1 quay, length 280 m. for general cargo and container vessels, depth alongside 9 m. – 10 m.

One quay, length 500 m., depth alongside 9 m. – 10 m. This quay will have 4 berths, one for grain cargoes, one for the Port Police, one for vessels loading and for mooring of a dry dock.
AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first port.

ES SIDER: 30.38 N. 18.22 E. (See Plan)

Also see "General" before first port.

DOCUMENTS: Waha acts on behalf of tankers loading at Es Sider and shall prepare all crude oil loading documents. Germa Shipping and Stevedoring Co. or Universal Shipping Co. Agency is contracted by Waha for all normal agency duties. This agency is currently the only agency used by the four Owner Companies.

After a tanker arrives at the anchorage or is moored in a berth, an agency representative will come aboard, accompanied by Jamahiriya Customs Officials and Immigration Police. The agency representative will present certain clearance forms to the Master, which should be completed as soon as possible. After these forms have been signed by the Master, they shall be returned to the agency representative, who shall make the necessary distribution.

Crude oil loading documents shall be prepared by the Waha documentation group prior to and during loading operations, to expedite their final completion. When the tanker has been loaded, the documents shall be completed and endorsed by the Customs Officer and by the representative of the Secretariat of Petroleum. The documents shall then be distributed aboard the tanker and elsewhere, in accordance with previously arranged standard documentation schedules.

The tanker shall be considered clear to depart Es Sider when the crude oil loading documents have been delivered to the Master.

Jamahiriya Customs Authorities:
- *(a)* List of the crew with a declaration of their personal belongings (Form supplied by the Customs Authorities).
- *(b)* List of tanker's stores.
- *(c)* List of passengers.
- *(d)* Six copies of Cargo Manifest for cargo to be discharged at Es Sider.
- *(e)* One copy of Cargo Manifest for cargo in transit.

Blank copies of "Certificate of Discharge" are placed on board every vessel at Es Sider. These certificates must be endorsed by the Customs, or other recognised authority, on completion of discharge. One completed certificate must then be forwarded to the Libyan Customs Authorities according to the instructions contained in the "Certificate of Discharge". At least one further copy should be retained on board, to be produced to the Customs on any subsequent voyage to a Libyan port. Failure to produce the certificate may result in delays to loading, or even rejection of the vessel by the Libyan authorities.
APPROACHES: Coastal landmarks in the area are as follows:
- *(a)* The most prominent landmark is a water tower in the terminal area which is painted white and is 180 ft. above sea level. This water tower is located at Lat. 30° 38′ 00″ N., Long. 18° 21′ 01″ E. and displays a fixed red light at night.
- *(b)* A communications tower in the Terminal area is a most conspicuous landmark. It is located at Lat. 30° 37′ 59.5″ N., Long. 18° 20′ 54.5″ E.
- *(c)* A radio antenna tower which is 395 ft. above sea level is located at Lat. 30° 36′ 56″ N., Long. 18° 16′ 55″ E. At night this tower is lighted by an occulting red light, flash two seconds, eclipse one second, and there is a fixed red light halfway up the mast. It is flanked by two dish shaped aerials.
- *(d)* There is a water tower at Ras Lanuf Terminal with a highest elevation of 179.5 ft. above sea level located at Lat. 30° 30′ 42″ N., Long. 18° 32′ 22″ E. It is white in colour. A white light, characteristics:– flash two every 5 seconds, height above sea level 163 ft., is mounted on the seaward side. There is also a fixed red air warning light on the top of the structure.
- *(e)* An omni-directional aircraft radio beacon is situated at Lat. 30° 37′ 31″ N., Long. 18° 21′ 04″ E. transmitting "OJ" 5 times every 60 seconds on 300 kHz.

Range lights and mooring buoy marker lights will appear and disappear with unscheduled frequency. These lights are for the use of the Mooring Masters at the Terminal and should be disregarded by any tankers using the Terminal.

PILOTAGE: Vessels to be moored, anchored or manoeuvred will only be boarded within the recommended anchorage area (Pilot boarding area centred at Lat. 30° 40′ N., Long. 18° 23′ 30″ E.). A vessel is not considered arrived until it is in the recommended anchorage area. The Mooring Master will advise the Master on approaches to berths, mooring, unmooring, connecting and disconnecting the hoses and in all operations within the anchorage or berthing area. All manoeuvring of ships shall be done only in accordance with the advice of a Waha Mooring Master, subject to the understanding that in all cases and circumstances the Master shall remain solely responsible for the safety and proper manoeuvring of the tanker. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

Tankers not equipped with pilot hoists shall provide a pilot ladder, or ladders, constructed and placed in accordance with latest Safety of Life at Sea Convention. Tankers having a large freeboard are requested to use a combination of pilot ladder and accommodation ladder, which is also in accordance with the above Convention. A ship's officer, plus the necessary crew members, shall be present at the ladder or hoist to ensure the safe embarkation and disembarkation of Mooring Masters and Port Authorities. All such ladders and hoists shall be thoroughly tested and inspected before the vessel arrives in the recommended anchorage.

The Mooring Master shall be in direct control of all tanker communications while in the Terminal area. Any unauthorised communications will result in the immediate cessation of all operations excepting clearing of the berth. Such tanker immediately nullifies its Notice of Readiness.
ANCHORAGE: The recommended anchorage area is a rectangular area bounded by the following co-ordinates:
(1) 30° 43′ N., 18° 22′ E.
(2) 30° 43′ N., 18° 25′ E.
(3) 30° 41.5′ N., 18° 22′ E.
(4) 30° 41.5′ N., 18° 25′ E.
MAX. SIZE: The following are the approximate berth limitations:–

	Length	*Draft*
No. 1 Berth	920 ft.	51 ft.
No. 3 Berth	950 ft.	51 ft.
No. 4 Mono-Mooring	1,150 ft.	62 ft. 6 in.
	Max. beam 158 ft.	Max. d.w.t. 250,000
No. 5 Mono Mooring	1,165 ft.	73 ft.
	Max. beam 184 ft.	Max. d.w.t. 300,000

Note: No. 4 Mono-Mooring: The max. length overall is 1,150 ft. The max. draft to which vessel can load in good weather is 62 ft. 6 in., and when vessel lies within 30° of loading line. During adverse weather causing vessel to roll and pitch, draft may be restricted to 58 ft. The max. draft limitation in good weather is due to depth to top of loading line being 63 ft. at distance of 1,900 ft. from buoy.

Length, beam and d.w.t. could all be extended provided draft does not exceed 62 ft. 6 in.

All the above limitations are based upon standard tankers in normal weather conditions.

Waha reserve the right to vary the above limitations, depending on vessel's freeboard, (OBO's – ore/oil vessels, etc.) and also the prevailing weather conditions.
RADIO/VHF: Waha maintains direct communication with Tripoli Radio, details of which are shown in publication 205 of the U.S. Hydrographic Office and are included in the Berne Lists. Waha also maintains a VHF station at Es Sider Terminal.

Cables should be addressed to: Wahaoil Pipeline Tripolilibya. Cables addressed in this manner will be received directly by the Waha Communications Centre in Tripoli and relayed immediately by voice radio or teletypewriter to the terminal at Es Sider. Vessels with a telex facility on board should telex directly to 20158 Wahalibya, Attention Marine Superintendent.

Within 6 hours of clearing its last port for its voyage to Es Sider, each tanker shall provide the Terminal with the following information by cable addressed to Wahaoil Pipeline Tripolilibya:
- *(a)* The name of the tanker.
- *(b)* The name of the port from which the tanker last cleared.
- *(c)* The date and hour of the ETA at Es Sider Terminal.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 72 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, or telex as above, providing the following information:
- *(a)* The name of the tanker.
- *(b)* ETA at Es Sider.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 24 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, providing the following information:
- *(a)* The name of the tanker.
- *(b)* ETA at Es Sider.
- *(c)* Quantity of cargo required, maximum draft on departure Es Sider, and deballasting time required before vessel can commence loading.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 12 hours of arrival at Es Sider, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, or telex as above, providing the following information:
- *(a)* The name of the tanker.
- *(b)* ETA at Es Sider.

4 hours before the Master expects to arrive at Es Sider to receive a Mooring Master on board, he shall notify the Terminal by cable addressed to Wahaoil Pipeline Tripolilibya, or telex as above, and also pass the same by VHF radio, providing the following information:
- *(a)* The name of the tanker.
- *(b)* Precise ETA at Es Sider.

If the tanker is equipped with a FM radio-telephone in the 156–162 MHz band, communications may be established with the Es Sider

Terminal Dispatcher by calling on Channel 16, 156.8 MHz. This frequency is monitored continuously. The range of the Terminal station is approximately 100 miles.

VHF Channel 8 is also available for use as a marine working frequency.

When the Master submits his first estimated time of arrival to the Terminal he shall indicate if the vessel is to load a part cargo, in which case it should be stated clearly whether it is first or second part of loading.

Jamahiriya Local Time is GMT plus 2 hours (GMT plus 1 hour in Winter).

ARRIVAL PROCEDURE: Tenders to load crude oil cargo will normally be accepted and berths will be assigned to tankers in order of arrival, provided they have valid nominations for cargo and carry clean ballast, if any, and are in all respects equipped and ready to berth. In the event that berthing is delayed on account of weather, tankers will normally keep their position in line. Tankers required to leave Terminal area on account of weather (port closed) shall maintain contact with the Terminal via Tripoli Radio or VHF so they will be available when the weather moderates. Waha reserves the right to decline to berth a specific tanker if its condition or facilities are unsafe for berthing or loading, even though the Terminal may be open to other tankers. Waha Marine Superintendent's decision shall be final.

As soon as practical after arrival, all tanks will be inspected for evidence of oil in ballast. Similar inspections will continue during discharge of ballast. If evidence of oil appears at any time, the tanker shall be rejected forthwith and shall not again be accepted until it is shown the ballast can be properly discharged.

If during inspection or during progress of loading it is revealed that tanks are not tight or that oil is leaking from the tanker, it shall be rejected from further loading. Tanker shall not be later accepted for loading unless satisfactory evidence of repair is submitted, duly certified by Lloyd's or ABS Surveyors, or other recognised surveyors.

Upon arrival at the Terminal of Es Sider, the Master shall give Notice of Readiness to load by wireless or VHF but not before one or other of the following events shall have transpired:

(a) The Master shall have received the Mooring Master on board; or
(b) The Master shall have dropped anchor in the anchorage.

However, the Notice of Readiness shall not be accepted unless the tanker is in every respect ready to load.

In reporting readiness to load, the Master of any vessel arriving at Es Sider for the first time shall state whether the flanges on the manifold of his vessel are such as to permit hose connections without modification.

A tanker shall have sufficient ballast for safe handling, and in any case not less than 25% of Summer deadweight. Careful watch of the weather, frequent interchange of information between the tanker and the Terminal and the knowledge of the behaviour of his tanker may permit the Master to bring his tanker with minimum of ballast.

HEALTH: Tankers shall fly "Q" on arrival by day and display a red light over a white light at night to indicate quarantine conditions.

VHF: Tankers shall keep continuous watch on VHF Channel 16 when at anchor in the anchorage. Failure to keep watch on Channel 16 may lose them their berthing turn.

TUGS: Not required. Waha maintains launches to assist in berthing tankers. These are under the direct supervision and control of the Mooring Master.

BERTHING: The 2 (7-Buoy) conventional berths are approximately 1 mile from shore and in approximately 65 ft. of water. Central Spar Buoys of these 3 berths are:

Berth No. 1 (Easternmost)	
Lat. 30° 38′ 58″ N.	Long. 18° 22′ 43″ E.
Berth No. 3 (Westernmost)	
Lat. 30° 39′ 35″ N.	Long. 18° 21′ 53″ E.

To the West of the 3 conventional berths is a mono-mooring berth. It is about 2 miles from shore in approximately 80 ft. of water.

Berth No. 4	
Lat. 30° 40′ 31.5″ N.	Long. 18° 21′ 43.7″ E.

To the East of the 3 conventional berths is a second mono-mooring berth. It is about 3.5 miles from shore in approximately 100 ft. of water.

Berth No. 5	
Lat. 30° 39′ 55.95″ N.	Long. 18° 25′ 19.13″ E.

Conventional Berths:

The Mooring Master may reject a tanker if he deems that the tanker is not properly equipped; or that the tanker fails to have a full complement of trained personnel capable of carrying out all the berthing procedures and in particular the hose connecting as directed by him; or that the tanker has dirty ballast; or that the tanks are not suitable for carrying crude oil. Tankers having a separate system of ballast tanks shall be permitted to discharge ballast and load oil simultaneously; however, approval shall first be obtained from the Waha Marine Superintendent.

Tankers shall be equipped with an adequate propulsion unit as certified by an appropriate Survey Society. Tankers with inoperative or partially inoperative propulsion units shall be rejected. No repairs shall be made while the tanker is in or near a berth.

Tankers shall have 2 bower anchors and ground tackle in good working condition and in sizes and class to qualify under either Lloyd's or ABS ratings, even though they may have been classified by other Societies. Vessels should be capable of running out a minimum of 165 fathoms (11 shackles) of chain on each anchor in order that they may be berthed at one of the sea loading berths.

Tankers shall have at least one winch, in good working order, on the poop deck capable of heaving on two ropes simultaneously. The winch drums must be of such a size to be able to take at least 5 turns of mooring rope.

Tankers shall have one winch on the after end of the main deck, so sited that ropes led through the fairleads at the after end of the main deck, port and starboard, can be hove on. The winch drum must be of such a size to be able to take 5 turns of mooring rope.

All tankers shall have suitable stoppers for all lines and stoppers for wire ropes. Wire ropes are a part of the permanent berths and all tankers shall pick up the wire ropes unless an exception is approved by the Marine Superintendent. The exception may be based upon tanker having suitable wires with nylon or synthetic rope tails for ease of handling by launch and launch crews. These tails should be of appropriate strength and of a suitable length to enable them to be manhandled on to the mooring buoy hooks. Constant tension winches may not be used except where they can be solidly locked and the constant tension feature not used. The making fast of berth mooring wires on ship's reels will be treated as a last resort to be used only in the absence of sufficient bitts.

Tankers shall have at least 9 good synthetic fibre lines of not less than 9 in. circumference and at least 120 fathoms in length, with an eye spliced in each end. These lines shall be placed out free for running; 3 on the after end of the main deck, and 6 on the poop deck. The 3 lines on the after end of the main deck shall be married together so that if the need arises the double length can be run on either side of the tanker. The Mooring Master may require the use of additional ropes or wires to effect a safer mooring, and these are to be supplied on his advice.

Tankers shall be equipped with blocks, tackle, booms, runners, and sundry equipment to efficiently hoist the submarine hoses (5 tons at conventional berths and 10 tons at monobuoys) from the sea bottom. Other necessary equipment includes wrenches, gaskets, nuts, bolts, strops, drip pans, sawdust, drift pins, etc. The derrick should be rigged with a single wire runner of sufficient strength to be able to lift 10 tons.

After the tanker is securely berthed, the submarine hoses shall be lifted amidships on the port side. The base lift may weigh up to 10 tons. Hoses shall be lifted and connected by the tanker crew. The Mooring Master shall advise the tanker's officer-in-charge concerning lifting techniques; however, the responsibility for all operations shall remain with the officer.

It is believed that the facilities at Es Sider are similar to those of other Mediterranean Terminals, and that, generally speaking, no unusual or unique equipment shall be required by the tankers.

Shore Stops: If it is requested by the Master of the tanker that the cargo flow should be stopped from the shore at a predetermined tonnage, it must be clearly understood that Waha Oil Company of Libya, Inc. will not be held responsible for any error, and that in the case of overloading, the excess cargo cannot be pumped back ashore.

Vessels are encouraged to load and deballast at the same time providing that segregated ballast tanks or double valve separation exists.

Mono Moorings: Nos. 4 and 5 Berths are single point buoy moorings. The body of the buoy is secured in a fixed position by means of 8 moorings, whilst the top of the buoy is in the form of a turn-table, allowing the ship's moorings and hoses to rotate and take up the position the vessel naturally lies due to wind, sea and current conditions.

Vessels are normally moored by 2 bow lines only, these being provided by Waha. A selection of wire strops and shackles will also be placed on board for mooring purposes. The 2 mooring lines are hove in until the length of chafing chain to O.C.I.M.F. standards is brought inboard. According to the mooring arrangements, the Mooring Master will advise on the method of securing the vessel. Ship's wires or ropes may be required to back up mooring equipment supplied by Waha. Smit towing brackets will be utilised when fitted in suitable position and if they are of adequate strength and size. Other O.C.I.M.F. standards chain compressors and fittings are acceptable. However, it should be noted that 2 ropes are provided and therefore 2 chafe chains must be hove inboard and properly secured. Under no circumstances shall the ship be moored with the lead-in ropes.

On advice from Waha that a vessel is to load at the mono moorings, she will have the following ready before the Mooring Master boards:

(a) Port side derrick to be rigged ready to lift various wire strops, shackles, and hose securing equipment. This equipment will be placed on board at the same time as the Mooring Master boards, or as soon as possible thereafter, who will advise on its disposition.
(b) Forward, the vessel should have ready 2 good synthetic fibre mooring lines, at least 9 in. circumference, 2 good 4 in. circumference rope messengers at least 400 ft. long, or two 3 in. wire messengers of the same length, each fitted with a suitable screw shackle. Also a crowbar, spikes and hammers.
(c) No moorings will be required aft.
(d) The vessel shall make a good lee on the port side, taking due care that ladders and accommodation ladders are clear of the tanker's manifold area and overboard discharges.

It is essential on this berth that the hoses be picked up immediately mooring operations are complete. On advice from the Mooring Master, part of the ship's crew must be standing by at the port manifold for this operation.

Hose lifting and connecting operations are basically the same as in conventional berths, except that hose strings are floating and therefore may require bowsing in rough weather.

Vessel's engines must be ready at all times, and under no circumstances is the propeller to be turned ahead without prior consent of the Mooring Master. Failure to comply with this may result in cessation of operations, and possible rejection as being unsuitable for a single point mooring. Any damage caused to berth or hoses as a result of turning propeller ahead without consent will be charged against the vessel.

In adverse weather, a continuous lookout will be required on the forecastle head, by responsible persons, to keep watch on the moorings, manifold and hoses.

In adverse weather the Mooring Master may require cargo to be loaded, in the initial stages, into the forward compartments and this should be complied with when requested.

Vessels are encouraged to load and deballast at the same time, where this is possible. In the case of vessels with permanent ballast tanks, this ballast should not be started without first consulting the Mooring Master.

LOADING: Raising, lowering, connecting and disconnecting of submarine hoses, as well as all other labours and duties on shipboard, shall be performed entirely by the ship's crew. Lack of co-operation by the crew in this operation will result in the rejection of the tanker, her return to the anchorage and any consequent loss of loading turn until crew are prepared to perform this work.

Mooring Masters shall report unsatisfactory conditions to the Waha Marine Superintendent, who may reject the tanker until corrections are made. All costs accruing from these conditions shall be for the tanker's account.

Loading Rates:

Conventional Berths No. 1 and 3	40,000 b.p.h.
No. 4 Mono-Mooring	30,000 b.p.h.
No. 5 Mono-Mooring	50,000 b.p.h.

BALLAST: 4 hours deballast time (before commencing loading) is the maximum time allowable in consideration of the open and exposed nature of the berths. Vessels which take longer to deballast put the berth at unacceptable risk if the weather deteriorates. Should a tanker be unable to comply with this stipulation, Waha Marine Superintendent may berth more suitable vessels ahead of her if poor weather conditions dictate. Vessels with an unduly long deballast time may be rejected.

There are no facilities at Es Sider for the discharge of dirty ballast, and vessels arriving with dirty ballast will not be authorised to deballast in the vicinity of the Terminal. Any tanker rejected because of dirty ballast or sea pollution will automatically nullify its Notice of Readiness to load and thereby relinquish any right to priority of loading position.

It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his tanker. This includes oily water from bilges, residuals from previous voyages or any other matter that may result in pollution of the sea. Owners and Masters are invited to examine all laws concerning pollution of the sea, especially in regard to the Mediterranean Sea area. Inspections may be made by the Libyan Ports & Lights Authorities, whose opinion of the cleanliness of the ballast shall be final.

The waters in and adjacent to the Terminal of Es Sider must not be polluted, and only clean oil-free ballast may be discharged anywhere inside of a line 100 miles to seaward and roughly parallel to the Libyan Coastline.

Prior to acceptance all tanks will be inspected for evidence of oil in the ballast and during discharging similar inspections will continue.

Masters are warned that when disposing of dirty ballast outside Libyan waters, all pipelines, sea-suctions, strainers and pumps that are later to be used to discharge clean ballast, must be flushed clean so that there will be no chance of even a small amount of pollution when the clean ballast is pumped out.

Any vessel required to return to a position outside the Mediterranean Sea for cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Master's attention is directed to Es Sider Notices concerning oil pollution and to the serious consequences of discharging dirty ballast, besides having his tanker rejected.

MEDICAL: Medical assistance shall be on an emergency basis only. The Doctor will only board a vessel if it is physically impossible for the patient to attend the clinic ashore and there is no priority need for the Doctor's services on shore. Normally the Doctor will require the accommodation ladder rigged for boarding.

If it is necessary to land a patient at Es Sider, he must be accompanied by an officer able to speak English or Arabic. Patient and accompanying person must have their Passports and International Certificates of Vaccination and Immunisation, and the Authorities must be advised prior to their leaving the ship.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Consulates are located in Tripoli, which is approximately 650 km. by road from Es Sider. Some countries having Consulates are: Algeria, Argentina, Belgium, Brazil, Chad, Czech Republic, Denmark, Finland, France, Germany, Ghana, Greece, India, Italy, Japan, Jordan (represented by Indian Embassy), Kuwait, Lebanon, Morocco, Nigeria, Nationalist Republic of China, Pakistan, Russia, Saudi Arabia, Spain, Sudan, Syria, Sweden, Switzerland, Tunisia, Turkey, Venezuela and Yugoslavia.

REPAIRS: When a tanker is in or near the berth, its engines shall remain ready with full power for immediate use. Engine repairs shall not be performed near any berth.

WATCHMEN: Not less than one capable deck officer and three able seamen shall be available on the deck at all times. No person under the influence of alcohol shall be allowed on deck. The Mooring Master's opinion on the sobriety of an individual shall be final.

CUSTOMS ALLOWANCES: Cigarettes, cigars, matches, tobacco, spirits, wines, beers, perfume, arms, ammunition, saccharine, and certain other items shall be placed under Customs seal from the time of arrival in port until such time as the tanker has left territorial waters.

Each officer and crewman is allowed the following ration for each day the tanker is in port: *(a)* 25 cigarettes per day, or 25 grammes of tobacco or 25 grammes of cigars. *(b)* One litre of beer or 0.5 litre of wine. *(c)* Special provisions are sometimes made for the Master.

REPATRIATION: No facilities exist for crew changes or repatriation.

TIME: GMT plus 2 hours.

SHORE LEAVE: None of the officers and none of the crew of any tanker shall be permitted shore leave at Es Sider.

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: No facilities.

GENERAL: The Terminal of Es Sider operates 24 hours a day, 7 days a week, while weather permits.

Range lights and mooring buoy marker lights will appear and disappear with unscheduled frequency. These lights are for the use of Mooring Masters at the Terminal, and should be disregarded by any tankers using the Terminal.

Waha maintains launches to assist in berthing tankers. These are under the direct supervision and control of the Mooring Master. Any service and facilities provided by Waha, including the services of the Mooring Masters, launches, or berthing equipment, are at the vessel's risk. The furnishing of a Mooring Master, launches, or other services and facilities shall not be construed to be, or give rise to, a personal contract. Waha shall have benefit of all exemptions from the limitations of liabilities to which an owner or a vessel is entitled under the laws of the United States of America.

When a Mooring Master and his assistants, possibly apprentice Mooring Masters, are assigned to a tanker, the tanker shall supply them with accommodation of the same standard and meals in the same manner as comparable personnel of the tanker. No special meals or special foods shall be required unless to comply with Moslem religious teachings. The intent is that the furnishing of meals to Waha personnel be kept to the minimum, compatible with the ordinary working of the Terminal.

No boats may be lowered into the water, except in an emergency.

Adequate deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the submarine and cargo hose connections during hosing and loading operations. During the discharge of ballast at night, the sea area around the vessel must be adequately lighted. If vessel is berthed on mono-mooring buoy, in addition to the foregoing, lights MUST be provided on forecastle head and over bow to facilitate supervision of moorings.

Stores of any sort shall not be handled while tanker is under "Notice of Readiness". No stores shall be handled while the tanker is in or near a berth.

Use of anchor marker buoys recommended.

Should any tanker or craft become an obstruction in any part of the Terminal or approaches thereto, or in any area of the submarine pipeline. Waha shall be empowered and shall have the right to take any steps it may deem necessary to remove the obstruction without notice to the Owners. All expenses of such removal shall be borne by the tanker or craft or by those owning it at the time of the accident causing the obstruction, and Waha shall be entitled to reimbursement by them for any such expenses incurred by it.

Power must be available at all times on all deck winches and on anchor windlass while the vessel is in the moorings.

If mooring wire winches are used, wires should be secured so as to enable them to be quickly let go from the vessel without damage.

Only in an emergency shall the tanker manifold valves be closed against crude flow, and then only with the Mooring Master's consent.

Should communications fail, the cessation of loading may be effected by a continuous sounding of the ship's whistle. This procedure will then stop the loading of all tankers in the area.

The bridge and/or control area shall not be locked nor otherwise arranged to prevent immediate entry at all times by the Mooring Master.

In adverse or marginal weather conditions Mooring Master may request that extra personnel be placed on duty on deck for tending moorings or hoses as required. Masters are advised to comply with this request.

The Mooring Master shall witness the plugging of all scuppers. Failure to plug scuppers shall result in the tanker's rejection.

The presence of unauthorised craft alongside a tanker will render it unacceptable. It shall be the duty of the tanker's personnel to clear all such craft away from the tanker.

When tankers are loading or discharging crude oil or ballast, and while tank tops are open or ullage plugs are open, boiler tubes shall not be blown. Every precaution shall be exercised to prevent sparks escaping through the funnel or stack or from the galley stack. The Mooring Master may demand all fires extinguished if he deems it necessary for safety.

Under the interpretation accorded to the Libyan "Boycott of Israel" Law, it is considered to be a violation thereof if a vessel calling at a Libyan terminal has on board any item of Israeli origin, irrespective of the nature thereof, including but not limited to manufactured products, fruit and vegetables, as well as empty crates, cartons, bottles and paper wrappings, regardless of the country where any of the foregoing was obtained. The law is strictly enforced, and the minimum penalty for violation thereof normally includes a fine and confiscation of all such items. Fines can exceed $1,000.

Charts: B.A. 3344 and Italian No. 431.

SHIPMASTER'S REPORT: May 1987.

Prior to arrival *all* storerooms were thoroughly checked to ensure that no produce, tools or equipment indicated that they were of Israeli or South African origin. "Magazines", Time, Newsweek, old newspapers etc., were put out of sight as many of these publications contain political cartoons. Israeli (and South African national flags) were removed from the flag locker together with their respective name tags. ALL alcohol placed in the bonded store and listed. An *accurate* Stores List of selected items together with a comprehensive *accurate* Crew Declaration List were prepared.

Fifteen minutes after berthing, Agent, Customs, Immigration and Port Captain boarded. Immigration checked Crew List against Passports. Customs checked Bonded Stores List against Bond Locker. Customs checked coffee and sugar against Stores List. No discrepancies were found and all other items were accepted. Port Captain checked vessel's trading certificates and had to be convinced why the vessel could not produce the trading certificates translated into Arabic. This could cause a delay on any subsequent voyage to Libya.

As stated in "Guide to Port Entry", Master has to sign a Declaration of Discharge, which *must* be endorsed by the Customs at the Port of Discharge and *must* be posted back to Libya, a copy *must* remain with the vessel. Failure to comply with the regulation will automatically mean a long delay and possible rejection of the vessel on any subsequent visit to Libya.

As all the necessary papers were in order and no discrepancies found all official were polite and quite happy.

There were no problems with mooring, loading cargo, figures, etc. However, this vessel does not have the required number of mooring ropes to berth as per port requirements. (9 ropes required Aft). See "Plan Section".

AUTHORITY: Waha Oil Co., P.O.Box 395, Tripoli, S.P.L.A.J. *Tel:* 31116/29 (ext. 6311). *Telex:* 20158 Wahalibya. *Cables:* Wahaoil. *Contact:* Captain A.R. Dunn, Marine Superintendent.

AGENCY: See "General" before first port.

MARSA AL HARIGA: 32.04 N. 24.00 E. (See Plan)

Also see "General" before first port.

LOCATION: Marsa al Hariga Oil Terminal is located on the South side of the harbour of Tobruk, approximately 1 mile Eastward of Marsa al Hariga.

DOCUMENTS:

A. Customs Requirements. On the arrival of a vessel, the Tobruk Customs Authorities will require from the Master of the vessel:

- 4 copies of a Crew List.
- 2 copies of a List of Ship's Stores.
- 2 copies of a Declaration of the Crew's Personal Belongings, including currency, cigarettes, gifts, etc.
- 4 copies of a Passenger List.
- Last Libyan (cargo discharge certificate) to be checked for validity on boarding, if not correct vessel has to wait outside for ship's purposes.

B. Harbour Master's Requirements. On the arrival of a vessel, the Tobruk Harbour Master will require from the Master of the vessel:

- 1 copy of a Crew List.
- 1 copy of a Passenger List.
- 1 copy of the Ship's Manifest.
- 1 copy of a Port Declaration (form will be made available to each vessel on arrival).

APPROACHES: Vessels bound for the terminal should approach the harbour of Tobruk from the North-East with the lighthouse on Tobruk Point bearing 238° (true). In daylight this lighthouse should be kept in line with the conspicuous German War Memorial on the South side of the harbour.

When about 4 miles from Tobruk Point, course should be altered to 224.5° (true) to bring the leading lights on Marsa Umm esc-Sciausc in line. This course should be maintained until the vessel is close to the outer buoy, where one of the company's Berthing Masters will board.

Deep-draft vessels sailing from the terminal should avoid navigating North-Westward of the leading line from Marsa Umm esc-Sciausc, owing to the presence of shoal water off Tobruk Point.

PILOTAGE: Vessels coming to and departing from the Terminal will be berthed and unberthed by Berthing Masters provided by the company, subject to the understanding that in all circumstances the Master shall remain solely responsible on behalf of his Owners for the safety and proper navigation of his vessel.

Berthing Masters will board at the Outer Buoy.

The Pilot and Loading Master are to be provided with cabins whilst the vessel is alongside.

ANCHORAGES: If a berth is not immediately available on a vessel's arrival off the harbour of Tobruk, the vessel will be advised by the company where she is to anchor.

Anchorage position for tankers waiting to be berthed is 1.5 miles N.E. of the Outer Buoy.

MAX. SIZE: Max. Summer deadweight 150,000 long tons and Max. draft 56 ft. at No. 1 and Max. Summer deadweight 130,000 long tons and Max. draft 52 ft. at No. 2. The berths are located at the end of a T-head jetty which extends some 700 ft. from the shore. There is a minimum depth alongside of 60 ft. and approach to and departure from the berth can be made in not less than this depth of water. Freeboard at any time whilst deballasting must not exceed 55 ft.

HEALTH: The Libyan Authorities will grant clearance by radio of a vessel coming to the terminal. Radio messages requesting clearance should be sent not earlier than 48 hours prior to vessel's arrival off the harbour of Tobruk and should give the details required in the Maritime Declaration of Health which must also be completed.

COURTESY FLAG: On entering the territorial waters of the Libyan Arab Republic which commence 6 miles off the coast of Libya, vessels should if possible, hoist the Libyan flag, and in any event the Libyan flag must be hoisted before entering the harbour of Tobruk. Should a vessel arrive without a Libyan flag on board, one may be obtained from the Company's Berthing Master when he boards at the Outer Buoy.

ARRIVAL MESSAGES: In addition to their arrival messages to Agent, vessels must pass an arrival message to the terminal via the company's radio station giving at least 72 hours notice of ETA and advising their estimates of:

- *(a)* The quantity of cargo (in long tons) to be loaded at the terminal.
- *(b)* The cargo loading rate (in long tons) per hour.
- *(c)* The quantity of ballast (in long tons) to be discharged ashore at the terminal.
- *(d)* The ballast discharge rate (in long tons).

If, subsequent to advice of their ETA there is any material change, a further ETA message must be passed via the company's radio station.

RADIO: Tobruk Radio 5 A1 (MF & HF). Position: 32° 02′ N. 24° 00′ E. Frequency: 420, 500 A1, A2, 0.5 kW. 4241 kHz at 2130 GMT, 8480 kHz at 1730 GMT, 16963 kHz at 0930 and 1330 GMT. All using A1 0.5 kW. *Note:* Station owned by Arabian Gulf Oil Company. Company telegraphic address: "Injaz Tobruk". Telex: No.: Agoco Ly 50023. All times given are GMT. Station keeps watch on 500 kHz during 24 hours.

TUGS: For berthing and unberthing at the terminal, vessels will be required to use the 2 diesel tugs which are available at the terminal. Each of these diesel tugs has a bollard pull of approximately 25 tons.

BERTHING: *Jetty:* Vessels will berth on the jetty starboard side alongside, depending on the prevailing weather conditions, though starboard side alongside is preferred. Each berthing head is "T" shaped and is protected by 4 breasting dolphins.

Moorings: Normal requirements are 4 head ropes, 3 breast ropes and 2 springs (springs to be ropes whenever possible).

All moorings, except the backsprings to the outer breasting dolphins at Jetty Berth No. 1 attached to quick release hooks.

Buoy Berth: Removed.

HOSES: New loading arms installed (balanced type) are Woodfield Mark 4, manifold size 16 in. ASA. Loading rate is maximum of 4,000 t.p.h. per hose.

OIL BARRIER: "Gemlen" floating anti-pollution booms on reels at jetty heads. Boat with chemical dispersants standing-by. Anti-pollution barge with floating boom and oil skimmer is available.

BALLAST: Vessels should make every effort to arrive at the terminal with clean ballast and with the minimum quantity for safe handling under prevailing weather conditions.

All ballast must be discharged into shore tanks provided by the company, unless it is clean ballast, carried in tanks which are completely isolated from the vessel's cargo system. However, the discharge of such ballast into harbour waters must not be commenced until the ballast has been inspected by a company official, and he has certified that it is in order to commence discharge.

Ballast can be accepted into the Company's store tanks at rates up to 4,500 t.p.h. from the jetty berths. Ballast is discharged ashore over the jetty by way of a loading boom. Max. quantity 35,000 tons.

LOADING: Cargo loading at each jetty berth is by means of four 16 in. Woodfield Mark 4 loading arms. Cargo loading at the buoy berth is by means of a 34 in. submarine line to which two 12 in. flexible hoses are attached.

This system permits a max. loading rate of approximately 8,000 t.p.h. over each jetty berth. The actual loading rate for a particular vessel will be determined prior to the commencement of loading by agreement between the Master and the Company.

Jetty: Method: gravity loading, max. head 360 ft. rate regulated to requirements. Loading rates: 2 lines each 4,000 t.p.h. Two 8,000 t.p.h. maximum.

FRESH WATER: Not available.

FUEL: Not available.

SAFETY: A copy of the Regulations will be given to Master when Company's Berthing Master boards at outer buoy. Masters should make themselves thoroughly acquainted with these Regulations, strict observance of which is required by the Company.

In the event of any infringement of the Regulations, operations may be stopped and, if so, will not be recommenced until the Company is satisfied that appropriate action has been taken by the Master to comply with all the Regulations. The Company also reserves the right to unberth a vessel in the event of a continued or blatant disregard of any of the Regulations. Any loss or expense to the Company resulting from an infringement of the Regulations and, in particular, in the event of an infringement leading to an interruption of operations and/or unberthing of a vessel, will be for the account of the Owners.

CONSULS: None.

REPAIRS: No shore facilities for carrying out repairs to vessels either at the terminal or at Tobruk.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and saccharine have to be locked up under Customs' seal from time of vessel's arrival in harbour of Tobruk until time of departure.

Whilst in harbour, each member of crew allowed following: 200 cigarettes. All spirits, beer and wines to be placed under seal.

No fixed allowances for cigars and tobacco.

Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour of Tobruk will be liable to a heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

REGULATIONS:

1. *Ship's Garbage.* Whilst within limits of harbour of Tobruk the throwing overside of ship's garbage is prohibited.
2. *Ship's Radio.* Once vessel berthed at Terminal the use of her radio will not be permitted.
3. *Ship's Boats.* Use of ship's boats not permitted within limits of harbour of Tobruk.

SHIPMASTER'S REPORT: April 1983.

Anchorage: Anchorage position for tankers is from 1.5 miles – 2 miles N.E. of the Outer Buoy. Holding ground is bad. As soon as wind increases up to Force 7 and swell grows, it is best to heave up the anchor and to proceed to sea and wait, keeping watch on VHF Channel 16.

Many vessels have lost anchors.

Max. Size: Berth No. 1 – Max. draft 56 ft. Berth No. 2 – Max. draft 52 ft.

AUTHORITY: General Ports and Lights Administration, P.O.Box 648, Tripoli, Libya.

Operator: Arabian Gulf Oil Co., P.O. Box 44, Tobruk. *Tel:* 87-22044/7. *Telex:* Agoco Ly 50023. *Cables:* Injaz Tobruk. *FAX:* 22044 Tobruk. *Contact:* Marine Department or Terminal Manager.

AGENCY: See "General" before first port

MARSA EL BREGA: 30.25 N. 19.34 E. (See Plan)

Also see "General" before first port.

SIGNALS/FLAGS: The Libyan maritime authorities require all vessels conducting business with Libyan ports, or plying the Libyan territorial waters, to strictly comply with the following standing international maritime practices:

1. To sound whistle signals appropriate to the different vessel manoeuvres, as well as during entering and leaving ports.
2. To fly the flag of the country of registration when approaching port(s) of destination, and during vessel's stay in port.
3. To salute Libyan navy vessels upon approaching such vessels.
4. All ships must fly the Libyan flag when inside territorial limits.
5. Libyan Law does not permit ships using Libyan waters to retain Israeli flags, stores or literature pertaining to Israel on board, even though these may be normally part of the vessel's navigation equipment.

Failure to adhere to the above may result in penalties by the Authorities.

LOCATION: Marsa-el-Brega is located in the South-Eastern part of the Gulf of Sirte in Lat. 30° 25′ 0″ N., Long. 19° 34′ E. It is an open bay contained between Ras Magdar and an unnamed headland some 3 miles to the West.

Vessels calling at Brega should have on board B.A. Charts No. 3350 and 3354, or H.D. Chart No. H203. No charts are available at Brega.

The Brega Sea Buoy is located in Lat. 30° 27.55′ N., Long. 19° 35.1′ E. A white flashing light is exhibited on a orange/white pillar buoy at a height above the water of 6.1 m. The light's characteristic is one flash every ten seconds (Fl. 10 sec.).

Single point mooring Berth No. 5 (SPB 5), is located in position Lat. 30° 26′ 45.26″ N., Long. 19° 34′ 7.4″ E.

Single point mooring Berth No. 6 (SPM 6), is located in position La. 30° 26′ 17.3″ N., Long. 19° 33′ 1.3″ E. The mooring buoys exhibit a white flasing light (characteristic "U").

Bow mooring (out of service) in position Lat. 30° 26′ N., Long. 19° 33.9′ E. with a flash red light (2 ev. 5 sec.) at a height of 28.34 m. above sea.

Radio beacon (Aero) is located in Lat. 30° 25′ N., Long. 19° 34′ 14″ E. Call sign is "MB" and operates continuously on a frequency of 403 kHz.

A single flare is located in Lat. 30° 24′ 31.9″ N., Long. 19° 35′ 49.7″ E. Three other flares are located approximately 2,213.36 m. to the West and Southwest. The flares, when burning, can be seen at extreme distances.

Numerous lit and unlit buoys are located within the restricted area shown on B.A. Chart No. 3350. Vessels are cautioned that these buoys may change position due to weather. Vessels are not permitted to enter restricted area shown, without a Brega pilot on board.

Brega is radar controlled with scanner in position Lat. 30° 25′ 02.5″ N., Long. 19° 34′ 55.6″ E. Height of tower 34.19 m.

Berth No. 2 (Naphtha) consists of 5 mooring buoys in position Lat. 30° 25.30′ N., Long. 19° 35.45′ E.

DOCUMENTS: Customs and Immigration Officials will board the vessel, except in adverse weather. All relevant documents are supplied by the Agent. The Master will sign and stamp the papers. These will then be handed over to the Authorities before clearance for loading is granted.

When ships clear inwards, they should complete the necessary forms for members of the crew, and all goods held (e.g. liquor, cigarettes, cameras, money, etc.) with the crew members' signature and rank. This form is ordinarily supplied in advance, however ships making their first call at Libya will receive advance forms for future calls.

Customs, Immigration and Lights Authorities Forms:

Port Declaration – Form P.L. 7 (1 copy).
(Title in Arabic) Inward Report – Form C.L. 128 (3 copies).
Cargo Manifest Inward – Form C.L. 1 (3 copies).
Report Outwards – Form C.L. 4 (3 copies).
Crew Manifest Inwards – Form C.L. 31 (2 copies).
Export Manifest Form C.L. 155 (6 copies).
Certificate of Discharge (see below).

Ship's Forms:

Crew List (3 copies) (also 1 copy to be handed to Pilot).
Stores List (2 copies).
Clearance from Last Port (1 copy).
Certificate of Discharge (Tankers only) from last Libyan Cargo.

Certificate of Discharge: If vessel has not called at a Libyan port since October 18th, 1973, then a letter is required from the Master, addressed to the Secretariat of Petroleum, stating that he undertakes to mail the Certificate of Discharge, for the present cargo, from the port of discharge and retain one signed stamped copy on board. It is essential that the Certificate of Discharge for any petroleum cargo loaded after that date, be on board the vessel and it must be clearly signed and stamped by the Authorities at the port receiving the last Libyan cargo. Vessels may incur delays or be refused loading permission where this is not complied with.

One copy to Secretariat of Petroleum, P.O.Box 2655 and 5335, Tripoli.

One copy to Marine Superintendent, Sirte Oil Co., Sirte Field, P.O.Box 385, Tripoli.

PILOTAGE: The services of a Pilot/Mooring Master are provided. He will normally board the vessel in the vicinity of the Brega Buoy and will advise the Master on approaches to the berths, mooring and unmooring, connecting and disconnecting cargo hoses, and all other operations within the berthing area. Vessels are cautioned not to enter the restricted area without the services of a Brega Pilot. Pilot ladder must conform to international safety standards.

The Master of the vessel shall notify the Pilot of any special conditions, difficulties or peculiarities, such as defective equipment, lines or gear, which might impose special hazards in connection with handling, mooring or loading the vessel.

The pilot will decline to moor vessels if they are not equipped with satisfactory mooring equipment, lines, gear, etc.

Vessels must be moored to the entire satisfaction of the Pilot, and must be ready at all times, to put out more lines or to adjust the lines as required by any change in the weather, or as requested by the Pilot. Masters are responsible for the frequent monitoring and careful tending of moorings throughout period on the berth.

Masters of vessels are reminded of their obligation to comply with statutory rules, and are requested to comply with the following:

The officer responsible for the embarkation or disembarkation of the Pilot must be a *Watchkeeping Officer*.

The pilot ladder must be properly secured and adequately illuminated.

The ladder must be in good condition.
The length of the ladder should not exceed 30 ft.
For vessels loading Crude/Naphtha, a combination accommodation/pilot ladder should be used.

Spreaders are to be positioned at intervals of not more than 10 ft.

Two manropes in good condition should be ready but not lowered, unless so instructed by the Pilot.

A lifebuoy with a safety line and self-illuminating light must be available at the embarking area.

If, in the opinion of the Pilot, the pilot ladder is not safe, the Pilot may refuse to board the vessel, and thus cause delay to the ship. Such delay would be for ship's account.

Vessels are cautioned not to enter the restricted area without the services of a Brega Pilot.

ANCHORAGE: Suitable anchorages are located 0.5 miles – 2.0 miles Northeast to East of the Brega Buoy in 22 m. – 23 m. depth.

Vessels are not permitted to anchor within 0.5 miles of the channels into the inner harbour, and are to keep clear of the 143° 41′ leads.

RESTRICTIONS: Shahat Shipping Co., Benghazi, advised in January 1984 that only tankers and self-equipped Ro/Ro vessels with forklift and drivers are acceptable at the port, due to non-availability of labour.

No conventional general cargo ships can be discharged until further notice.

In February 1984 Shahat further advised that receivers may discharge cargo by their own labour.

MAX. SIZE: Maximum draft for vessels entering or sailing from the inner harbour is 10.0 m.

Also see "Berthing".

TUGS: Marsa-el-Brega Port maintains tugs and mooring launches to assist vessels to moor and unmoor.

HEALTH: Quarantine signals must be displayed upon entering Brega port limits in accordance with international practice, and shall be continuously displayed until Pratique is granted.

RADIO: *Arrival Advice:* The Owner, Master, Charterer or Agent should cable the following information to Brega Marine, P.O.Box 385, Tripoli, Libya, S.P.L.A.J. (Telex 30120/21/22 SIRTCO LY or 50557 SIRTCO LY) through Tripoli or via Malta, if beyond communication range of Tripoli, 72 hours in advance, and at least 48 hours with subsequent update message 24 hours before arrival.

The cable/telex office is closed between 1900 hrs. and 0700 hrs., allowance for delays due to this, and other causes, should be allowed for.

ALL VESSELS:

Name of vessel.
Flag.
Gross tonnage.
Nett tonnage.
Summer deadweight.
Anticipated draft at loaded condition.
Last port.
Next port.
ETA at Brega (local time).
Agent.
Length of vessel.

TANKERS LOADING CRUDE:

Distance bow to manifold.
Segregated ballast or deballast time required.
Size of manifold (1×16 in. American Standard).
Safe working load of derrick.
Inert Gas System working and tanks inerted.
Vessel fitted with bow chain stopper (AKD).
Certificate of Discharge on board from last Libyan cargo, and if port of discharge same as port cleared for.
Cargo required by vessel.

TANKERS LOADING NAPHTHA:

Segregated ballast or deballast time.
Size of manifold (1×12 in. American Standard).
Minimum of 10×10 in. circumference fibre or synthetic mooring ropes (for use at after end of ship).
Safe working load of port derrick.
Certificate of Discharge on board from last Libyan cargo, and if port of discharge same as port cleared for.
Inert Gas System working and tanks inerted.

CARGO SHIPS:

Amount of cargo on board for discharge.
Receivers of cargo.
Advise number of stevedore gangs required.

Latitude 32° 30′ N.:

As a rule, vessels are no longer required to receive permission prior to crossing Lat. 32° 30′ N. en route to Brega. It is sufficient to contact Maritime Radio Tripoli or Benghazi giving ETA at Lat. 32° 30′ N. and proceed to Brega. Should permission be denied, vessels will be contacted accordingly.

VHF: *Port Control:* Marsa-el-Brega Port Control is equipped with VHF radio.

The following communication procedure should be adhered to:

Vessels approaching Brega should call Brega Port Control on Channel 16, at least 1 hour before arrival.

Prior to Pilot boarding, the vessel will be allocated one of 5 working channels (6, 9, 12, 13, 14). Sirte Co. vessels are equipped to operate on these channels.

Note: Whilst in Libyan Territorial waters, it is prohibited for vessels to use Radio and Wireless Telegraphy. However, VHF communications between vessels and Libyan Ports Authorities are not affected by this prohibition.

BERTHING: *Crude Oil Berths, SPM No. 5 and SPM No. 6:*
Maximum size of vessel: 300,000 d.w.t.
Length and draft unrestricted.
Flowrate: 48,000 bbls./hr.
API approximately 40.5.

Mooring consists of a monobuoy to which are attached 2×15 in. Samson lines. These are shackled to a single 3 in. Chaffing chain, which is attached to a pick-up line.

1. The ship's Panama lead should have minimum inside dimensions of 40 cm. high and 60 cm. wide. In the event that a vessel is not equipped with a suitable Panama lead, alternative fairleads will be examined. Should the alternative fairleads be considered insufficient to accommodate the 3 in. Chaffing chain, the vessel will not be berthed.
   In case of vessels without Chain stoppers (AKD) fitted, strops and shackles will be placed on board. *PLEASE ADVISE.*
2. The vessel is required to have ready a good 3.5 in. – 4 in. messenger line ready, and at least 137.25 m. in length.
3. Port derrick should have a S.W.L. of 10 tons, and be ready on arrival.
4. Vessels berthing at the SPM's must have their anchors secured, due to underwater PLEM and pipelines.
   Floating hose is 24 in. with a 16 in. over-the-rail hose. Ship's manifold should be ready to receive 1×16 in. hose (American Standard).
5. All mooring, unmooring and hose operations are done by the ship's crew as indicated by the Mooring Master.
   Notice of Readiness will be accepted only when the Pilot boards the vessel in the vicinity of Brega Buoy.

Naphtha Berth No. 2:
Maximum size of vessel: 55,000 d.w.t., in good weather.
Maximum length: 244 m.
Maximum draft: 12.8 m.
Maximum flowrate: 21,000 bbls./hr.
API approximately 70.

1. Ships should have ready aft, a minimum of 10×10 in. circumference fibre or synthetic mooring ropes in good condition, each not less than 230 m. (120 fathoms) in length. Mooring wires are not normally acceptable. It is recommended that 4 ropes be ready on the main deck, two on each side.
2. Port derrick to be ready to receive one 12 in. hose.
3. Both anchors to be ready and working.
4. Mooring and hose operations by ship's crew.

Product Dock:
Maximum draft: 7.92 m.
Jetty length: 260 m.
Loading arm 129 m. from corner.

Vessels loading or discharging refined petroleum will be berthed at the product jetty.

Vessels cannot remain alongside the Breakwater except in fine weather.

LNG Jetties A (North) and B (South):
Head, stern and breast lines to dolphins.

Springs are secured to the central pier, and in addition shore springs from the pier are taken on board.

Vessels must be ready to leave at short notice.

LPG Jetty A: Connection on East Breasting Dolphin.
LPG Jetty B: Connection on centre berth position.
Caustic Jetty A: Connection on North Breasting Dolphin.

Cargo Quay – West Side (Sirte Oil Co.):
Maximum size of vessel: 152.5 m.
Maximum draft: 7.92 m.
Ships must have adequate unloading gear.

The following restrictions and conditions shall be observed by Masters, consignees and Agents:

1. The permission of the Operations General Manager must be obtained before a ship can berth to handle cargo that is non-Sirte Oil Co.
2. Unloading must be from ship to truck, and no marshalling arrangements can be made available inside the area.
3. Unloading operations may not be performed, except during daylight hours as determined by the Marine Superintendent.
4. Loading trucks will adhere strictly to Sirte Oil Co. safety rules.
5. Arrangements for the entrance and movements of stevedoring personnel must be coordinated with Sirte Oil Co. Security Division.
6. The stevedores will be held responsible for cleaning up after unloading the vessel, under direction of Sirte Oil Co. Materials Division.
7. Ten (10) days advance notification must be given to the Marine Division.
8. All vessels with or loading Sirte Oil Co. cargo will be given priority, even if this requires interruption of the unloading operations of other cargo vessels.

Ro-Ro facility can be used by suitable vessels when Product Jetty is not occupied.

Height of jetty above sea level approximately 1.5 m.

East Side of Inner Harbour (NAPETCO):
Jetty No. 1: Ammonia and methanol.
Jetty No. 2: Ammonia, methanol, acid and caustic.
Maximum size of vessel: 30,000 d.w.t.
Overall moorings: Jetty No. 1 – 334 m. Jetty No. 2 – 341 m.
Load section: 42 m.
Maximum draft: 10 m.

Urea Berth:
Overall length: 200 m.
Yokohama fenders in centre, 62.5 m. from each end.
Draft restriction: 8.8 m. (29 ft.) even keel.

East Cargo Quay:
Length of Quay: 394 m.
Maximum draft: 9.2 m.
Height of Quay: 2.7 m.
Maximum size of vessel: 15,000 d.w.t.
Suitable Ro-Ro vessels may berth stern on to the quay.

Ships using the Eastern part of the harbour are controlled in the same manner as in the Western part of the harbour, together with any particular rules concerning the individual berths therein, that the National Petrochemical Co. may apply.

TANKERS: *Communications:* During loading offshore communications between ship and shore is via VHF. In the event of a breakdown in communications, the ship should sound the emergency signal, comprising a succession of short blasts on the ship's whistle. All loading will then cease until radio contact with the shore has been re-established.

Safety Rules: Safety rules for tankers are as the "International Safety Guide for Oil Tankers and Terminals." and IMO Recommendations on the Safe Transport, Handling and Storage of Dangerous Substances in Port Areas (Assembly Resolution A.435 (XI).

The Mooring Master is authorised to suspend operations in any cases where dangerous conditions or practices are deemed to exist, and if need be removed from berth.

Vessels at Sea Berths are not to adjust mooring lines before consulting the Pilot/Mooring Master.

Ballast: As soon as practicable after arrival and prior to acceptance, ballast will be inspected for evidence of oil. Samples will be sent ashore for testing. Inspection will continue during discharge of ballast.

If evidence of oil appears, the vessel may be returned to sea, or made to keep the dirty ballast on board.

Any vessel required to return to sea for the purpose of cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness, and at the same time loses priority held for loading. On return, a new Notice of Readiness must be tendered.

Vessels not having sufficient illumination will not berth if discharge of ballast continues after dark.

Loading Precautions: Masters are responsible to see that no oil is spilled from their ship.

If during inspection while loading, it is revealed that the ship's hull is not oil-tight, the ship will be rejected and refused further loading.

Vessels will be encouraged to discharge ballast and load oil simultaneously, subject to the loading rate.

Vessels Loading Crude and Naphtha: Inert Gas/Closed Ullage Requirements: It is a requirement of the amendment to "International Convention for the Safety of Life at Sea 1974", Regulation 60, that the vessel be fitted with an Inert Gas System. It is also a requirement of the same convention and the "International Safety Guide for Oil Tankers and Terminals" (ISGOTT) that, prior to loading, the cargo tanks must be inerted in accordance with the guidance laid down in Chapter 9 of ISGOTT and the I.M.O. Publication "Inert Gas Systems" 1983 edition.

Unless vessel's cargo tanks have been inerted to the required standards, that is, not more than 8% oxygen content by volume, the terminal operators will not commence loading and any delays arising, until such time tanks are inerted to the required oxygen level, will be to vessel's own account, and Notice of Readiness will not be accepted.

Furthermore, it is also a requirement of Regulation 60 that the vessel is fitted with a Closed Ullaging System. The use of which, during loading, will ensure that the inert gas/hydrocarbon vapour mixture is expelled only through the venting system designed for the purpose, and not through the ullage/sighting ports or any other deck openings.

These requirements are necessary to comply with "SOLAS" requirements, and to protect the terminal facilities and Sirte Oil Co. require vessel to confirm that they will in fact be met by signing and stamping last page of the terminal booklet.

SPM Berths No. 5 and 6, (Crude Cargo): Forecastle Head Watchman: A watchman *must* be stationed on the forecastle-head at all times to report any failure of moorings. He should also report immediately if the vessel tends to "ride-up" to the buoy.

He should be equipped with the appropriate means to communicate with the Officer of the Watch.

INSPECTION/POLLUTION: *Arrival*: As soon as practicable after arrival and prior to acceptance, all of the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to sea and clean tanks, etc., in accordance with the procedures as laid down in the booklet entitled "Clean Seas Guide for Oil Tankers – The Operation of Load on Top" as issued by the International Chamber of Shipping – Oil Companies International Marine Forum.

Any vessel required to return to sea for the purpose of cleaning tanks or for any similar reason automatically nullifies any Notice of Readiness already tendered, and at the same time loses priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival when a new Notice of Readiness will be tendered.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area round the ship to the satisfaction of the Mooring Master in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels not having sufficient illumination will not berth if discharge of ballast continues after dark. Vessels having sufficient illumination will take precedence in berthing order. Vessels should provide suitable floodlights for working on deck during night operations, and should designate a responsible person to keep a continuous watch on hoses and moorings at all times during sea berth occupancy.

Loading Precautions: Masters are responsible to see that no oil (crude, bunker, diesel or bilge) is pumped or spilled overboard from their ships. Cargo hose should be inspected to ensure proper connection; drip pans should be in place, especially when disconnecting hose; scuppers should be plugged tight to contain possible spills; loading valves should be checked and tested to ensure proper operation and tight shut off; unused cargo and bunker connections should be blanked off; stern discharge line, if any, should be closed and blanked off; all sea valves should be closed and lashed shut upon completion of deballasting; the ship should provide sufficient staff (a minimum of one officer and three other crew members are recommended) to ensure proper supervision of loading and topping off operations.

If, during first inspection or during progress of loading, it is revealed that ship's hull is not oil-tight, ship will be rejected and refused further loading. Ship will not later be accepted for loading unless satisfactory evidence, duly certified by Lloyd's or American Bureau of Shipping or other recognised survey agency, of effective repair is submitted.

Contamination of the Sea: In the event any vessel should discharge dirty ballast or spill oil in the vicinity of the Brega Terminal area, Sirte Oil Co. retains the right to take any action that may be necessary to clean up the contaminated area whether the contamination is upon the sea or the shore, or upon any structures or properties located in or upon the sea or upon the shore. In addition, Sirte Oil Co. shall have the right to settle any claims of third parties arising from such contamination. All costs and expenses incurred by Sirte Oil Co. to carry out the cleaning up of such contamination, or the settlement of third party claims, shall be borne by the vessel or by those owning the vessel at the time of the said contamination, and Sirte Oil Co. shall be entitled to reimbursement by said owners for any such cost and expenses.

FRESH WATER: No fresh water is available.

FUEL: No bunkers are available.

REPATRIATION: Crew members cannot pay off or leave the vessel at Marsa el Brega except in cases of emergency. Even in an emergency, it should be noted that Seamen's Books are not valid under the Libyan law. A valid passport is required, and with adequate notice by radio it is possible to obtain an exit visa for a crew member leaving in an emergency.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Mooring Master, having in mind the hazards of the operation because of the product being loaded, weather conditions and any other circumstances requiring special care or caution.

While a vessel is moored, all the vessel's personnel and vessel's operations must comply with or be in accordance with the following Safety Rules:

(a) *Smoking is prohibited on the open decks of vessels. Smoking is permitted on board vessels only in enclosed spaces specifically assigned by the Master as Smoking Areas.*

(b) Before any loading commences all scuppers on the loading deck through which oil might escape overside must be tightly plugged and must be so maintained throughout the period the vessel remains within the limits of the harbour.

(c) The Master is responsible to see that oil from the vessel is neither spilled nor pumped into the water. At all times while loading cargo, all openings to the loading deck from crew, engine, galley and other dangerous areas shall be tightly closed.

(d) Boiler tubes are not to be blown. Every precaution must be taken so that sparks do not at any time escape from the funnel or stack.

(e) Ship's wireless is not to be operated while vessel is in the berth.

(f) Two hoses with spray nozzles to be laid out near manifolds and pressure maintained on fire mains at all times. Two suitable portable fire extinguishers (foam or dry powder) should also be available and bags of sand kept near manifold to contain any small oil spillage.

(g) Please note carefully that the Mooring Master is authorised to suspend operations in case any of the foregoing Safety Rules are not observed and in all cases where dangerous conditions or practices are deemed to exist.

Shore Alarm Signals:

Category 2 (Serious Incident): Three 2 second blasts of the District siren.

Category 3 (Major Disaster): A series of three Category 2 alarms.

Ships:

Fire: Six (6) or more short blasts, followed by a long blast repeated until shore contact, and continuous ringing of vessel's fire alarm system.

VHF Radio: *All* vessels to stand by Channel 16.

Fire or Explosion on Board Crude Vessel Berthed Offshore:

A. Responsible officer to man bridge, engines to be put on standby and crew to disconnect hoses as soon as possible.

B. Loading to be stopped on other vessels berthed offshore. Hoses to be disconnected and hung off, engines put on standby and crew standing by to vacate berth if necessary.

C. Vessels at anchor in the vicinity of the Brega Buoy to have engines on standby, with crews ready to heave up and put to sea if need arises.

Fire or Explosion on Board Ships in Inner Harbour:

A. Master to call Port Control on VHF Channel 16 with details.

B. Loading arms or hoses to be disconnected as soon as possible.

C. Loading or discharging to cease immediately on other vessels in harbour and offshore berths. Vessels to standby to vacate berths if necessary.

Fire extinguishers and hoses with nozzles capable of projecting a fine spray (fog) should be rigged in the vicinity of the loading/discharging manifold with fire mains pressurised at all times. (See 13.2.2.3 of I.O.T. & T.S.G., 2nd Edition).

Crude Oil Health Hazards (Hydrogen Sulphide Content)

A sour crude can be defined as one containing Hydrogen Sulphide (H_2S) within the range of 0.05 cu.ft. to 8.8 cu.ft. per 100 gallons or capable of generating atmospheric Hydrogen Sulphide concentrations of 5 to 1,000 p.p.m. Hydrogen Sulphide vapours in air are extremely toxic and the Maximum Allowable Concentrations (MAC) for personnel exposure throughout an eight hour day is 10 p.p.m. The gas is highly odorous and a particular hazard is its special effect of causing paralysis of the olfactory nerve, thus destroying the sense of smell.

Escape of Hydrogen Sulphide vapours from crude oil is relatively facile and due to a heavier than air effect (S.G. 1.19) may justify additional precautions under some atmospheric conditions.

The following medical effects on personnel exposed to Hydrogen Sulphide represent an indication of the degree of vigilance necessary to prevent or minimise exposure:

	Atmospheric Concentration Range	*Personnel Reaction*
(i)	50–100 p.p.m.	Slight irritation after exposure for 1 hour.
(ii)	200–300 p.p.m.	Marked irritation after exposure for 1 hour.
(iii)	500–700 p.p.m.	Loss of consciousness after exposure of 30–60 minutes.
(iv)	700–900 p.p.m.	Rapidly produces unconsciousness and death occurs a few minutes later.

The particular hazards introduced by the carriage of crudes containing Hydrogen Sulphide may be restricted by observing the following practices:

(1) Every opportunity should be taken to utilise closed loading facilities to discharge displaced gas remote from deck areas.

(2) During loading operations, where large volumes of gas are discharged to atmosphere, regular observations should be made of gas concentrations about the decks.

(3) Any persons engaged in sampling, gauging, sighting open cargo tanks or disconnecting cargo hoses, should work windward of the vapour source and should be kept under surveillance from a safe area.

(4) In the event of a person being rendered unconscious by vapours with high Hydrogen Sulphide content, urgent removal to a safe area and application of artificial respiration is of prime importance, followed by the early attention of a qualified medical practitioner.

(5) In respect of loading crude with a high Hydrogen Sulphide content, it is not necessary to take water dips after loading and ullages as indicated by "Whessoe" or other automatic gauges are acceptable on vessels fitted with this type of equipment. Cargo samples taken from the shore meter battery are acceptable.

(6) In respect of transporting crudes with a high Hydrogen Sulphide content, one day prior to arrival at the discharge port, the pressure/vacuum valves should be jacked open to allow gas concentrations to escape to atmosphere at the masthead; then prior to berthing those valves should be reset in the operating position.

The degree of sourness is normally indicated by the Hydrogen Sulphide content in p(arts) p(er) m(illion) *liquid measure.* The Hydrogen Sulphide contents of various types of sour crudes so defined are as follows:

Crude	*Hydrogen Sulphide (p.p.m. Liquid Measure)*
Agha Jari	20
Jambur/Bai Hassan	40
Kirkuk	40–70
Gach Saran	70
Brega	260
Qatar	200–300

The *Atmospheric* Hydrogen Sulphide concentration varies materially with atmospheric conditions. Particular caution should be exercised when petroleum vapours generally tend to concentrate about the decks. H_2S is readily detected with a MSA Toxic Gas Detector.

The precautions referrred to above should be carefully observed at all times.

MEDICAL: There are limited medical and dental facilities at Marsa el Brega. Personnel requiring urgent medical treatment may obtain it, but this will only be undertaken in serious cases. The cost of transport and treatment will be charged to the vessel. A form entitled "Charges for Ship Account" must be completed in quadruplicate and sent ashore with the person requiring treatment. This form can be obtained from the ship's Agent.

Masters of vessels arriving at Marsa el Brega who require medical treatment should give advance notice of their requirements by radio whenever possible.

REPAIRS: No repairs are allowed to ship's engines while vessels are moored in the berths. Ship's engines should be ready for use on short notice in case the vessel has to vacate the berth suddenly because of bad weather. There are no repair facilities for ships available at Brega.

SHORE LEAVE: Ship's personnel are not permitted ashore, nor on the wharves or jetties for any purpose whatsoever.

PORT REGULATIONS:

Cargo Vessels: Also see "Max. Size".

The following restrictions, conditions, rules and priorities shall be observed by Masters, Consignees and Agents of non-Sirte Oil Co. cargo vessels calling at Marsa el Brega and berthing at the Sirte Oil Co. cargo jetty.

1. The permission of the Operations General Manager must be obtained before a non-Sirte Oil Co. cargo vessel can discharge. The Operations General Manager also designates certain priorities which may change from time to time. Agents of cargo ships must keep in touch with Marine Superintendent who will advise them of the priority assigned to their vessel.
2. Maximum vessel draft 26 ft.
3. Maximum length overall 500 ft.
4. No repairs may be carried out to the propulsion machinery during the unloading operation and the ship must remain mobile and be ready to manoeuvre at all times.
5. Vessels must be equipped with their own unloading Gear.
6. Unloading must be from ship to truck and no marshalling arrangements can be made available inside the reserved area. The unloading operations must be completed rapidly.
7. Unloading operations may not be performed except during daylight hours as determined by the Marine Superintendent.
8. Loading trucks will be required to adhere strictly to Sirte Oil Co.'s safety rules, particularly while operating within the limits of the Industrial area.

9. Arrangements for the entrance and movement of the stevedoring personnel must be coordinated with Sirte Oil Co.'s Industrial Security Division. No housing or victualling will be provided for stevedoring personnel. All expenses, costs, remunerations and compensations associated with this activity will be borne directly by the company concerned.

10. The stevedores will be held responsible for cleaning up after completion of unloading.

11. No victual, water supply or bunkering service is available for vessels calling at Brega.

12. Advance notification must be given to Sirte Oil Co. Marine Division at least 10 days prior to arrival of vessel at Marsa el Brega. ETA of vessel to be notified 72 hours prior to arrival and confirmation and reconfirmation 48 hours and 24 hours respectively prior to arrival.

13. A system of priorities for cargo vessels entering Brega is in operation as follows: 1st – Sirte Oil Co. cargo, 2nd – N.O.C., 3rd – other vessels. This system will apply even though this requires interruption of operations of vessels already berthed.

14. Weather and sea conditions, particularly during the period December to April of each year, impose severe restrictions on the cargo pier usage. Among these restrictions are the discontinuation of unloading and the unberthing of the ships as a safeguard against ship and berth damage.

One hour's notice will be given to Masters should it be deemed necessary to vacate the berth due to bad weather.

15. Sirte Oil Co. shall not be held reponsible for any waiting period or delay (demurrage) related to the entry of cargo ships, nor be liable for any costs or compensation in that connection, regardless of the circumstances.

16. Sirte Oil Co. shall not be held liable for any loss, damage or injury that may occur to any property or persons whatever the cause thereof as long as they are related to or resulting from the use of the port. Such loss, damage or injury shall be the liability of the Master, Consignee or Agent irrespective of whether they are real or alleged. The above named shall also undertake to indemnify Sirte Oil Co. for any such losses and damages and to hold Sirte Oil Co. harmless from any liability that may arise as a result thereof.

17. All vessel movements will be subject to the control and direction of Sirte Oil Co. Marine Division Superintendent.

Tankers: Permission for overside painting is to be obtained through the Agent before painting can be started.

No repairs are allowed to ship's engines while vessel is moored in the berths. Ship's engines should be ready for use on short notice, in case the vessel has to vacate the berth suddenly because of bad weather.

Vessels should have sufficient ballast aboard for safe manoeuvring, but should not arrive excessively ballasted. The propeller should be submerged, and vessel trimmed not more than 2.43 m. by the stern.

Vessels not properly ballasted will not be berthed in turn, and will not have their Notice of Readiness accepted.

There are no facilities for the discharge of dirty ballast. *All Ships must arrive with clean Ballast.*

All tank lids must be closed and vented to the atmosphere via the agreed system.

WEATHER: *Meteorologic and Oceanographic Information:*

1. Sea conditions: Mid December to mid April, maximum wave height 25 ft. – 30 ft. Late April to early November wave height can reach 12 ft., particularly during afternoons, when winds can attain a velocity of up to 35 knots.
2. Wind direction and velocity: Late December to end of February wind direction mostly North-Westerly with a velocity of up to 75 knots. March to May wind direction varies with land/sea breeze effect with a velocity up to 15 – 35 knots. June to August mainly Northerly sea breezes. September to early November mainly light winds but with occasional gales and sand occurring. Maximum wind velocity 45 knots.
3. *Vessels should not remain at Anchor in bad weather.*
4. All berths in the inner harbour are adversely affected during periods of bad weather, particularly when the prevailing wind is from the North-West.
5. All vessels in the inner harbour are therefore required to be ready to proceed to sea, as directed by the Marine Superintendent or his representative, when adverse weather prevails or is expected. One hour's notice will be given to Masters, should it be deemed necessary to vacate the berth.
6. Masters of cargo/product vessels are cautioned that seaweed in suspension is present in the inner harbour area, and all precautions should be taken to avoid blockage of main engine intakes.

Weather:

Rain and thunderstorms	September – April
Sand storms	March – June
Fine with mostly little cloud	June – August.

Temperatures: May to October: Maximum temperature 120° F. Normal day temperature 95° F.

November to April: Minimum temperature 35° F. and maximum 85° F.

Humidity: Generally low during periods of maximum temperature.

GENERAL: *Provisions:* There are no fresh or dry provisions available at Marsa el Brega.

Mail: The Ship's Agency will handle all official and crew ship's mail.

Harbour Work: Dredging is in continual progress in the vicinity of the inner harbour. Vessels are cautioned not to enter the restricted area (B.A. Chart 3350) without the services of a Brega Pilot/Mooring Master.

All mooring lines to be fitted with adequate ratguards.

All berths in the inner harbour are adversely affected during periods of bad weather, particularly when the prevailing wind is from the North-West.

All vessels allocated berths in the inner harbour are therefore required to be ready to proceed to sea as directed by the Marine Superintendent or his representative when adverse weather prevails or is expected.

Smoking is strictly prohibited on board all tankers except in locations approved by the Masters of the vessels. No smoking on deck even if gas free.

Full power must be available for all manoeuvring to and from all berths. During deballasting and loading, vessels must maintain engines and propulsive machinery in readiness at all times to leave the berth on short notice.

No repairs are permitted which will delay or interfere with this contingency. Contravention of this ruling constitutes a serious safety hazard and will entail towage from the berth and possible delay to the vessel for which Sirte Oil Co. will accept no responsibility.

It is the responsibility of the vessel, before arriving, to see that ballast water is free of oil and to *discharge ballast water through ballast discharge lines* prior to arrival to ensure their cleanliness.

All tankers for sea berths must have port derrick ready for use.

Masters are warned that no contaminated ballast or bilge water may be discharged within Libyan territorial waters. It is the responsiblity of the vessel before arriving to ensure that ballast water is free of oil, and that all pipelines, sea suctions, strainers and pumps have been flushed clean of oil.

SHIPMASTER'S REPORT: August 1984.

Charts: British Admiralty 3354, 3350. French 5792.

Approach: Refinery buildings are radar identifiable at over 20 miles and the fairway buoy (Lat. 30° 27.55′ N., Long. 19° 35.1′ E.) at over 6 miles, also at about this distance it is possible to make out the shape of the harbour breakwaters on radar. The line of soundings is very sharp on the echosounder, and the 50 m. line 7 miles out when coming from the North was raised very easily.

Pilotage: Pilot boarded at the fairway buoy from a large tug (Dutch company contracted to the port). Vessels are not allowed to proceed into the restricted area 0.5 miles South of the fairway buoy without a Pilot. The area inside the restricted zone having several tanker SPM's and other obstructions.

The Pilot was immediately concerned about the vessel's air draft for berthing at the Urea Berth. After berthing I made a rough calculation and would say a vessel with a main deck air draft of over 38 ft./40 ft. would have great difficulty accommodating them. Our main deck air draft at the time was 31 ft. When asked the Pilot stated that the maximum departure draft was 29 ft.

To approach the berth vessels enter with 2 tugs (2,000 h.p.) fast on the starboard shoulder and quarter, berthing being port side alongside. When the breakwater has been rounded vessel is headed East until clear of the Fl. 5 sec. elbow buoy when the swing to starboard with engines and tugs is started (starboard anchor ready in case of emergency). Once vessel is swung until heading about S.W., tugs then push her alongside as near into the corner with the general cargo berth as she she will go, in our case about 8 m. (this is also to facilitate the after elevator being used to work No. 1 Hatch, on this vessel LOA 169.1 m.).

Survey/Loading: Shippers are National Petroleum Co. and all cargo survey work is done by Societe Generale de Surveillances S.A. The surveyor was very helpful. Stowage factor for treated urea is approximately 48/49.5 cu. ft. per ton. The loading rate stated was 400 tonnes p.h. although in actual fact we never achieved an average of more than 300 tonnes p.h. Treated urea is very hydroscopic, with the climatic conditions in Libya, it is impossible to load if the relative humidity is over 75%. This usually involved stopping in the evenings around 1800/1830 hrs. and restarting in the morning 0800/0830 hrs., although on one occasion we did manage to work all night.

The elevator is self-trimming and does a reasonable job, however, with the high stowage factor some hatches were filled but because of the restricted height of the elevator, it proved impossible to get the loading chute high enough to fill the coamings as we would have liked, and thus our intake per hatch was reduced.

Clearance/Customs formalities: Libyan Government have issued a statement that from 7th June, 1984, all incoming ships must have all ship's papers and documents translated into Arabic. This we managed to have done but only because of the length of stay in the previous port. In actual fact the Agent took no notice of these translations, they wanted their own forms filled in by the Master. The Customs Officials were very courteous. No alcohol is allowed, also all cameras had to be locked in the bond as El Brega is a restricted port because of the oil installations, and hence no shore leave. The main transmitter was also sealed.

SHIPMASTER'S REPORT: November 1987.

Vessel: 95,000 d.w.t. tanker.

We were advised by Charterers to inform Germa Shipping, Tripoli of our ETA and other relevant information. They in turn advised us that we should contact Shahat Shipping, Brega, but they were in fact already receiving all ETAs.

We were unable to contact the terminal until some 2 hours off as they were in the process of moving their VHF aerial. When re-sited, communications are likely to be much improved.

No information is passed by the terminal to the pilots until just prior to arrival of the vessel. It is therefore a good idea to send a 24 hour ETA to Sirte Oil Company (Telex No. 30120, 30121, 30122) who will pass messages to the pilots.

Samples were taken of all ballast tanks (even segregated ballast) for analysis ashore. If excess oil is found, vessel will be ordered off the berth for extra cleaning.

Maritime Declaration of Health not required. Pilot grants Pratique on boarding. Pilot also carries out safety and anti-pollution check lists.

Tug does not usually tow astern as an on/off shore breeze keeps the vessel clear of the buoy, however engines are to be kept on 10 minutes notice in order to give stern power.

After berthing, the Pilot gives papers to the Master, 2 of which have to be completed and signed. The remaining papers have to be signed and are taken away by the Agent. The ship's stamp is to be placed on all papers.

Libyan Discharge Certificate: It is essential that the discharge figures inserted at the discharge port are exactly the same as the Bill of Lading figures.

The Crew Declaration has to be transferred to a local form and signed by each crew member. If some of the crew members are too busy to sign this form and in order to avoid delays to the Customs, it is in order for the Master to sign on their behalf.

On departure, call Port Control and give time of departure, course, speed and destination.

A new SBM is being laid in a position 242° True × 1.04 nautical miles from the existing SBM.

Shahat Agency. Telex: 50635 Shahat Ly.

Also see "General" before first port.

MISURATA (Qasr Ahmed): 32.22 N. 15.13 E.

(See Plan)

Also see "General" before first port.

GENERAL: The harbour is enclosed by 2 rubble mound breakwaters armoured by tetrapods. The North Breakwater extends 1,400 m. due East from Ras Zarrugh Lighthouse and East Breakwater extends 1,800 m. due North from the shore near the prominent radio station about 2 km. South of the Ras Zarrugh Lighthouse. There are lights on the breakwater roundhead. On the North Breakwater a green flashing light (0.3 secs.) every 3 secs. and on the Eastern Breakwater a red flashing light (0.3 secs.) every 3 secs. The Ras Zarrugh Lighthouse at the foot of the North Breakwater is a square tower with black and white vertical stripes. The structure is 8 m. high and is on the top of a 16 m. hill. The light is flashing white (0.5 secs.) every 5 secs. with a range of 8 miles.

On the South side of harbour there is Steel Mill Harbour which is under construction.

There is a radio mast 7.6 miles W.N.W. of Ras Zarrugh with fixed red flashing lights.

For Harbour Entrance there are guides, 2 fixed red lights and 1 green flashing light, bearing 273° N.W. from breakwater roundheads. The Harbour Entrance Channel is 150 m. wide and 12 m. deep.

Inside the entrance there is a turning circle, diameter 470 m., depth 12 m. and the harbour dredged area 920 m. × 200 m. to a depth of 11 m. leads due South alongside the berth. A 500 m. × 300 m. dredged area to a depth of 8 m. leads to the West alongside the North Breakwater.

Directions: Keep 2–3 miles offshore before turning due West for entrance.

Currents: Predominantly N.W. at mean rate of 0.5 to 0.75 knots but in Winter winds can reverse the flow and induce S.E. set in excess of 1 knot.

DOCUMENTS:

Maritime Declaration of Health (to be completed on arrival).
Crew List.
Passenger List (if any).
Ship's Stock.
Stores List.
Animals Aboard List.
Ship's Log.
Last Port Clearance.
Safety Certificate Certificate.
Construction Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Radio Certificate.
International Oil Pollution Prevention Certificate.

Where possible Cargo Manifests and Stowage Plans should be forwarded by airmail to the local Agent, ahead of the vessel's arrival.

PILOTAGE: Compulsory, Pilot will board about 1 mile outside the port entrance.

ANCHORAGES: Bearing approximately 273° to lighthouse on Ras Zarrugh 13 m. depth 1 mile (2 km.) offshore but holding ground is poor and it is advisable to leave anchorage at signs of onset of bad weather.

RADIO: "Misurata Port Control" should be worked as early as possible.

VHF: A high powered base station operates at the top of a 16 m. hill at the foot of the lighthouse at Ras Zarrugh. A continuous watch is maintained round the clock on Channel 16. All other Authorities such as Harbour Master, Customs, etc., should be contacted through "Radio Misurata Port Control" on Channel 16. Channel 10 can be used inside the harbour.

TUGS: Join the vessel outside the Harbour Entrance. The tugs are m.t. "Sorman", m.t. Kiklah", each 565 b.h.p. and m.t. "Al-Keriat", 2,520 b.h.p.

BERTHING: There are 6 berths, totalling 1,120 m. of concrete quay dredged to 11 m. with timber and rubber fenders and bollards at 15 m. intervals, the quay deck is at an elevation of 2.25 m. The berths include a Ro/Ro facility at Berth No. 1.

CRANES: The following types of shore cranes are available and in the near future, a floating crane of 100 tons will be available. Capacity of cranes are 57, 45, 35 and 25 tons.

STEVEDORES: *Working Hours:* 0630 to 2400 hrs., even on holidays.

MEDICAL: Full hospital facilities are available without prior notice.

TANKERS: Tankers berth at Berth No. 28. Depth alongside 11.0 m.

FRESH WATER: Available alongside and by barge.

FUEL: Available.

CONSULS: Nearest consuls are at Tripoli.

REPAIRS: See "Tripoli".

REPATRIATION: Possible.

AIRPORT: Tripoli Airport situated about 220 km. from Misurata.

TIME: Local time GMT plus 1 hour from 1st day of October until 31st March, and GMT plus 2 hours from 1st day of April to 30th September.

HOLIDAYS: Fridays; 1st day of Lunar calander year; Idd-ul-Ahada, 4 days; Idd-ul-Zoha, 4 days; 2nd March; 8th March; 28th March; 11th June; 23rd July; 1st September; 7th October. Even on holidays cargo work continuously maintained.

POLICE/AMBULANCE/FIRE: Call Port Manager Tel: 21101 & 21094.

SERVICES: All kinds of food and soft drinks are available except alcoholic drinks and pork.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: Grain silos are under construction.

Stage II (Berths No. 7 – 18) has already been started for 1 passenger berth, 4 general cargo berths, 4 container berths, 2 Ro/Ro berths and sheds, etc.

SHIPMASTER'S REPORT: December 1977.
Chart: British Admirality Chart No. 3353 "Ras Ashdir to Sirte".

A mole has been constructed from Ras Zorog in an East direction, the length of which is approximately 1,100 m.

A second mole extends from the shore in a Northerly direction, approximately 1,800 m. in length. Entrance to the harbour is between the outer ends of both moles.

Wharves and sheds are being built along three quarters of the length of the Northerly direction mole, and around the South part of the inner harbour perimeter. At the time of the visit by this vessel about 350 m. of quay was completed, with depth alongside of 11 m.

All the construction work appears to be done by Yugoslavian labour. The "Overseer" acted as Pilot and was a very able and pleasant person. All questions regarding cargo and fresh water, provisions, etc., were dealt with by him. He supplied 10 tons of fresh water by road tanker, and organised a visit from a ships' chandler for a small quantity of fresh salad and potatoes.

There are 2 small tugs which were used in berthing under the Pilot's direction. These were very necessary owing to a number of obstacles in the harbour (divers boats, pipes, etc.). The Pilot's knowledge of English was limited and it is most necessary for the ship's Master to judge his intentions carefully.

Without a doubt the Port of Misurata when open for commerce will be a very useful port, although a small port (inside harbour space was roughly estimated to be about 1,500 m. × 700 m.). The Pilot advised that it was expected to be opened about the middle of 1978.

The vessel anchored off the port entrance at 0800 hrs. and Pilot boarded at 1100 hrs., vessel berthed shortly afterwards. Discharge of 208 tons of construction material from No.1 hold commenced at 1330 hrs., and ceased at 2400 hrs. for the day. Work resumed at 0930 hrs. on the following day, and was completed at 1330 hrs. A mobile shore crane was used throughout for discharge into lorries.

All Agency work was attended to by our Tripoli Agent, who arrived onboard at 1700 on day of arrival. As Tripoli was our next port, he was most helpful in advising our berthing prospects at that port, and delivering ship's mail.

The entering and clearing formalities were attended to by 2 Customs Officers. They advised that there was strictly no shore leave for the crew. All accommodation was diligently searched including the Master's for alcohol, and none whatever was allowed to be in crew's possession. However when all was found to be in order, on request a small amount of bond stores was released for Christmas.

The vessel departed at 1600 hrs. for Tripoli where the Agent's estimate of 2 – 3 days waiting (although there were 50 ships at anchor) proved to be correct.

SHIPMASTER'S REPORT: March 1978.

Work is still in progress on the Southern Mole. More warehouses are to be erected there, also a grain silo. On the Western shore of the harbour more berths are to be constructed possibly for containers, but nothing finalised yet.

Misurata is to be principally a Ro/Ro port specialising in transit cargoes. A nearby motorway runs in a Southerly direction for 1,000 miles into Central Africa.

There will be facilities for conventional cargoes. Dredging is in progress in the Western part of the harbour in preparation for the new berths. The area is being marked by red marker buoys. The port is scheduled to open in June/July this year and to date there are no services excepting Customs who attend to all the Entering and Clearing formalities. All pilotage being performed by the Master, the contractors work boats will act as tugs if requested.

Documentation is similar to requirements for other Libyan ports also the same strictness regarding alcohol. All Officers and Ratings were allowed to retain a small quantity of beer, all other alcoholic drinks being placed under Seal.

SHIPMASTER'S REPORT: February 1988.
Chart: B.A. Chart No. 3353.
Documents:

8 copies Crew List.
2 copies Crew Declaration (on Libyan forms).
2 copies Manifest.
1 copy Health Declaration.
2 copies Currency Declaration (on Libyan forms).
All Passports.
1 copy Arms and Ammunition List.
1 copy Drugs List.
2 copies Cargo Manifest.

Cameras placed under seal. No cigarette issue allowed. Bond remains sealed if proceeding to another Libyan port. Definitely no alcohol. Customs would not allow beer issue. Ship's Certificates to be in Arabic. Passports exchanged for Landing Cards at the gate. All stores checked for signs of South African and Israeli produce.

Approaches: The name Qasr Ahmed is not used. All local people use the name Misurata and all Libyan Customs and cargo documents refer to Misurata.

The harbour area and power stations (32° 20′ N., 15° 13.5′ E.) were identified on the radar at 24 miles.

There are two harbours, the older general cargo and tanker port of Misurata and the recently constructed Steel Harbour which is about one mile to the South.

On approach, the power station chimneys and the gantry crane on the new Steel Harbour breakwater and the grain silo at Misurata are visible. At night, the flashing red lights on the power station chimneys and the horizontal red flashing lights between the chimneys are very conspicuous.

There are 2 sets of antenna dishes (32° 21.25′ N., 15° 13.3′ E.) just South of Misurata Harbour which are conspicuous.

Anchorage: Vessels may anchor anywhere off the breakwaters but not within 2 miles of the port. Anchorage exposed to heavy swells.

Channel: The leading line to Misurata Harbour is 270° and is indicated by leading marks/lights (red and white horizontal, inverted triangles and a front light exhibiting flash green every 5 seconds and the rear green light flashing green every 12 seconds). The front daymark is barely visible.

The Fairway Buoy has been removed.

The Pilot advises that the depth at the tanker berth is 38 ft. and eventually all the harbour will be the same depth. The maximum draft permitted at the tanker berth is 36 ft. and this was confirmed by the echo sounder.

2 sets of buoys and a Fairway Buoy in position 32° 30.9′ N., 15° 19.0′ E. mark the channel to the Steel Harbour. The leading light is 263°. There are no leading marks or lights visible. The Channel depth is believed to be 50 ft. and this was confirmed in part by echo soundings. The channel width is approximately 200 m.

Pilotage: The Pilot boards outside Misurata Harbour entrance from a small grey tug. Pilot normally boards between 0800 hrs. and 2000 hrs. Normally there are no movements on Friday.

Tugs: There are 2 tugs available, the larger tug being approximately 2,000 h.p.

VHF: On arrival, vessels should call Misurata Port Control on Channel 16, working Channel 12. On approach all the usual details are required (See "Tripoli – Shipmaster's Report" dated March 1988). Misurata Port Control on Telex No. 90130221 PORTMSLY

Harbour: The harbour is being extended beyond the existing breakwaters. New berths are under construction to the West of the existing Eastern breakwater berths.

The new oil terminal in position 13° 22.3′ N., 15° 13.2′ E. is capable of taking product tankers up to about 30,000 d.w.t.

All charted buoys inside the harbour have been removed.

The new Steel Harbour appears to be completed and has conveyors which are adjacent to the steel mills and one gantry type grab crane.

Within the Steel Harbour there is a service harbour with control tower.

Tanker Berth: The tanker berth is on the N.W. corner of Misurata Harbour. Vessels berth port side alongside.

The newly constructed concrete berth is a pier with outlying mooring dolphins each end, which are connected to the pier by steel walkways. The mooring points and fendering are very good.

This berth handles product imports for the local area including the steel mills and the power station. The products are LPG for cooking and heating fuel, jet fuel/Avgas, gas oil and fuel oil.

At the present time, there are no bunker or fresh water facilities, however, we understand that IFO and gas oil and fresh water pipelines are to be laid to the pier.

The gangway was easily landed.

Moorings: The moorings consisted of 2 head/stern lines, 1 breast line and 2 springs at each end. The starboard anchor with one shackle in the water was used for approaching the berth and a mooring boat assists with running lines.

Cargo: LPG is handled by a 6 in. Chicksan arm with clamps, the shore required a 6 in. spool. The pipeline is 8 in. diameter and runs a distance of 5.3 km. to 5 spheres with a total capacity of 8,000 cu.m.

The terminal requires cargo at 0°C. Max. pressure 8 kg./sq.m. Maximum pumping rate 145 cu.m./h. The shoreline relief valves are set at 16 kg./sq.m. and the maximum pressure in the shore tanks is 7 kg./sq.m. The average discharge is 68 t.p.h.

There was no surveyor in attendance and no shore calculations made. The Receivers, "Breganaft" checked the ullages.

The pipeline was hot gassed for 45 minutes.

Gas oil and Avgas are handled through 2×10 in. Chicksans and fuel oil is handled through 1×12 in. Chicksan.

Fresh Water: Fresh water is available by barge and should be ordered well in advance. While we were in port the barge was moored astern of us at the Port Authority Jetty. The capacity of the barge is 200 tonnes. It will also take water to vessels at anchor in calm weather.

Customs: Customs authorities make a very thorough search of the vessel.

Shore Leave: Not permitted.

General: Friday is a holiday so there is very little movement on that day.

AUTHORITY: Port of Misurata, P.O.Box 18218, Misurata, Libya. *Tel:* (051) 24457, 29428. *Telex:* 30221 Port Ms Ly. *FAX:* (051) 22492. *Contact:* The General Manager.

RAS LANUF: 30.31 N. 18.35 E. (See Plan)

(A) VEBA OIL OPERATIONS (V.O.O.)
(B) RAS LANUF OIL & GAS PROCESSING CO. INC. (RASCO)

(A) VEBA OIL OPERATIONS (V.O.O.)

Also see "General" before first port.

DOCUMENTS: Customs will require:

4 Crew Lists.

1 Crew Declaration of personal belongings (including cigarettes, etc.)

2 Stores Lists.

1 Passenger List.

Crew Lists and Crew Declaration of personal belongings must be on the approved Libyan Government Documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits. Also required are:

6 Copies of Cargo Manifest for Ras Lanuf Discharge.

1 Copy of Cargo Manifest for transit cargo with a summary.

1 Copy of Passenger Manifest.

A copy of a Certificate of Discharge of the last cargo loaded at a Libyan port is required. Said Certificate to be duly signed and stamped by Customs Authorities at the discharge port. Blank forms will be delivered with the cargo documents.

Clearance from the last port of call will be required by the Government authorities. The police will require 4 copies of a Crew List and a Passenger Manifest if any passengers on board.

PILOTAGE: It is most important that ships establish communications with the Terminal, Ras Lanuf Control, by VHF on Channel 16 within 3 to 4 hours or earlier before arrival.

Upon contact, the vessel will be requested to switch to Channel 14. This channel is used by the Terminal Marine Section for internal use and tanker mooring operations.

Channel 11 is reserved for communications between ships in moorings and Ras Lanuf Control, and should only be used for general purposes after obtaining clearance from Ras Lanuf Control.

Vessels to be moored at the Offshore Terminal at Ras Lanuf will be boarded by the Company's Mooring Master in the close vicinity of the suggested Anchorage Area mentioned below.

The Mooring Master will advise the ship's Master on approaches to the assigned berth, mooring, unmooring, connecting and disconnecting hoses, and in all other operations within the port area.

The Mooring Master will have sole control of all radio communications during the period the vessel is manoeuvring or moored in a berth.

NAVIGATION AIDS:

Seabuoy, white, with white flash every 5 seconds, in approximate position Lat. 30° 33′ 56″ N., Long. 18° 34′ 35″ E.

Vessels in the vicinity should not navigate or anchor inshore of a bearing 280° and 130° from this buoy.

A white unlit spar buoy, with a 1 m. horizontal orange stripe, fitted with a radar reflector, is located in a position Lat. 30° 32′ 12″ N. Long. 18° 33′ 22″ E. This buoy marks the tie-in position between the old Berth No. 3 and the new Berth No. 3 SPM.

A Fairway Channel Entrance Buoy flashing white every 2 secs. is located in a position approximately 30° 30′ 46″ N., 18° 37′ 44″ E.

A Channel Buoy flashing red every 5 secs. is located in a position approximately Lat. 30° 30′ 17″ N., Long. 18° 36′ 16″ E.

North Breakwater Light with occulting light green 2 every 10 secs. is located in a position approximately 30° 30′ 38″ N., 18° 35′ 43″ E.

East Breakwater Light with occulting light 2 red every 10 secs. is located in a position approximately 30° 30′ 29″ N., 18° 35′ 24″ E.

A Rear Range Light with a fixed white light is located in a position approximately Lat. 30° 30′ 56″ N., Long. 18° 34′ 09″ E.

A Front Range Light with a fixed white light is located in a position approximately Lat. 30° 30′ 54″ N., Long. 18° 34′ 17″ E.

An Unlit Spar Target Buoy, colour white is located in a position approximately Lat. 30° 31′ 20″ N., Long. 18° 35′ 21″ E.

An Unlit Spar Target Buoy, colour white is located in a position approximately Lat. 30° 31′ 12″ N., Long. 18° 35′ 35″ E.

The Mooring Area has been swept to a depth of 73 ft. in Berth Nos. 1, 2 and 3, at the SPM to a depth of 96 ft.

There are very few coastal landmarks in this area. The following should prove helpful to visiting mariners:

The Terminal Water Tower with highest elevation of 179 ft. 6 in. above sea level is located in Lat. 30° 30′ 42″ N., Long. 18° 32′ 22″ E. It is coloured white. A white light (Characteristics: flash 0.2 secs., eclipse 1.05 secs., flash 0.2 secs., eclipse 3.55 secs.) is mounted on the seaward side of the structure at 163 ft. above sea level. There is also a fixed red warning light on top of the tower.

Large oil storage tanks with highest elevation 376 ft. above sea level are located in approximately Lat. 30° 27′ 24″ N., Long. 18° 29′ 58″ E. They are coloured white.

ANCHORAGE: Suggested anchorage area is within a 3,000 ft. radius of position Lat. 30° 33.5′ N., Long. 18° 36′ E. in approximately 90 ft.

MAX. SIZE: Conventional berths: Up to 56 ft. draft; up to 130,000 d.w.t.

Single Point Mooring: Up to 75 ft. draft, up to 300,000 d.w.t.

HEALTH: By day – fly flag "Q" and by night display red light over white light for Quarantine Service.

Libyan Customs, Federal Police and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and "Pratique" services. Libyan Government Regulations are strictly enforced. The vessel should have a clean Bill of Health or equivalent document from the last port of call.

RADIO: ETA messages and cargo requirements should be transmitted to Veba Oil Operations, Tripoli, Libya. Telex: 20260 LY and 20892 LY.

The first message should include, if the vessel has on board a Certificate of Discharge of the last Libyan cargo loaded, duly signed and stamped by Customs Authorities at the discharge port.

To avoid unnecessary delays, it is essential that the Master reports any discrepancies on the above certificate, in particular when the cargo was not discharged at the port stated under Section B – Port of Discharge Details.

VHF: Ras Lanuf Oil Movements Control Centre keeps continuous watch on VHF Radio-telephone Channel 16 (156.80 mHz), Channel 14 (156.70 mHz) and Channel 11 (156.55 mHz). Vessels approaching the port should make contact on Channel 16 when shore will request her to switch to Channel 14. This Channel will also be used by terminal Marine Section for internal use and tanker mooring control. Channel 11 is reserved for communications between ships in mooring and Terminal Oil Movements Control Centre and should only be used for general purposes after obtaining clearance from Oil Movements Control on Channel 16. This is a safety measure since oil flow to ships is controlled through Channel 11 and therefore it must be clear at all times in case of need to stop oil flow for any cause. Channel 16 is for calling and safety use only.

TUGS: 2×730 h.p. The company maintains launches (3×360 h.p.) to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Mooring Master.

BERTHING: There are 4 submarine loading pipelines which terminate in the following approximate positions which are each marked by an unlit white spar buoy.

Berth No. 1: Lat. 30° 31′ 35″ N., Long. 18° 34′ 37″ E., from which a submarine pipeline runs to shore on a bearing of approximately 224°. Depth of water at spar buoy 70 ft.

Berth No. 2: Lat. 30° 31′ 55″ N., Long. 18° 33′ 58″ E., from which a submarine pipeline runs to shore on a bearing approximately 197°. Depth of water at spar buoy 70 ft.

Berth No. 3: Lat. 30° 32′ 54″ N., Long. 18° 34′ 40″ E., a Single Point Mooring buoy in 96 ft. water.

Berth No. 4: Lat. 30° 31′ 50″ N., Long. 18° 36′ 06″ E. – a Single Point Mooring buoy in 96 ft. of water.

In Berths No. 3 and 4, vessels are secured to the SBM by one mooring hawser. The SPM berths are designed to handle tankers up to 255,000 d.w.t. in Berth No. 4, and up to 300,000 d.w.t. in Berth No. 3.

Raising, lowering, connecting and disconnecting of submarine hoses, as well as all other labours and duties on shipboard, will be performed by the ship's crew under direction of the Mooring Master.

LIFTING HOSES: After the vessel is safely moored, the submarine hoses will be lifted on the port side. Berths No. 1 and 2 are each equipped with 2×12 in. loading hoses, the weight being approximately 5 long tons.

Berths No. 3 and 4 (SPM) are equipped with 2×16 in. loading hoses, the weight being approximately 7 long tons. Therefore, vessel must have a derrick with a cargo winch or a crane with a S.W.L. of a minimum 7.5 tons by the port side manifold.

Hose connection to be performed by the ship's crew. The derrick should be ready on arrival to lift up the Terminal's hose gear.

MEDICAL: No medical services (except in case of emergency and subject to a doctor being available) or other services are to be expected at Ras Lanuf.

BALLAST: There are no ballast reception facilities at this Off-shore Terminal. Local regulations require that ballast may only be discharged from permanent and/or segregated ballast tanks. Any vessel arriving with ballast in her cargo tank(s) must retain that ballast on board or she will be rejected. All costs accruing therefrom will be to the ship's account.

Vessels arriving at Ras Lanuf Terminal shall retain sufficient ballast on board, and shall comply with the draft requirements of Regulation 13 of Annex I of Marpol to permit safe handling of the vessel in the prevailing weather conditions.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: The only consulates are located in Tripoli which is 670 km. by road from Ras Lanuf.

REPAIRS: When a ship is in the moorings or vicinity, its engines must remain on standby with full power for immediate use. Deck machinery shall be kept in instant readiness. *Positively no repairs of any sort will be permitted in the moorings.*

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition, saccharine and possibly other items have to be locked up under Customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed 25 cigarettes per day of stay or 25 grams of tobacco or cigars in lieu.

REPATRIATION: Crew members cannot pay off or leave the vessel at Ras Lanuf except in cases of extreme emergency. Even in an emergency it should be noted that Seamen's Books are not valid under the Libyan law. A valid passport is required.

TIME: Libyan local time is GMT plus 2 hours.

SHORE LEAVE: Not allowed.

GENERAL: No stores, foodstuffs or goods whatsoever of Israeli origin may be on board any ship calling at Ras Lanuf.

Penalties: Fine, confiscation of goods and possibly more. The Libyan Government strictly enforces this law.

Whilst arriving fly the Libyan Ensign (plain green).

Due to the existence in these waters of the fish commonly called "Weaver" fish, ship's crew are urged to exercise extreme caution in fishing whilst lying off the port area. There have been several cases of poisoning by these fish, all of which were distressingly painful, caused by contact with the fins.

AUTHORITY: Veba Oil Operations (V.O.O.) – Ras Lanuf (V40), P.O.Box 690, Tripoli, S.P.L.A.J. *Tel:* Tripoli 30081 (ext. 4116). *Telex:* 20260, 20892. *Cables:* Pegasus Tripolilibya. *Contact:* Captain B. Michels – Ras Lanuf Marine Office.

AGENCY: See "General" before first port.

(B) RAS LANUF OIL AND GAS PROCESSING CO. INC. (RASCO)

PORT LIMITS: Southward of area bound by Latitude 30° 32.7′ N. and between Longitudes 18° 34′ E. and 18° 39′ E.

DOCUMENTS: 4 copies of Crew List on approved Libyan government document. (Vessels are advised to obtain sufficient forms for future visits during their stay).

1 copy of Personal Effects including cigarettes, etc.

2 Lists of Stores.

1 List of Passengers.

6 copies of Cargo Manifest for cargo to be discharged at Ras Lanuf Harbour.

1 copy of Cargo Manifest for cargo in transit.

1 copy of Certificate of Discharge (of the last cargo) at Libyan port duly signed and stamped by the Customs Authority at the discharge port. Blank forms will be delivered with the cargo documents. If not done on board the Ship's Purser should make request for them to be provided.

Clearance from the last port of call is required by the Government Authority.

4 copies of Crew List and the Passenger Manifest are required by the Police.

PILOTAGE: Ras Lanuf Harbour (RASCO) should be advised by telex (Telex: Ras Lanuf 50618, 50650 – Rasco Ly). Cable: Rasco, Ras Lanuf (Telephone via Tripoli 49994-99: via Benghazi 86744-48) at least 72 hours in advance, the ETA at RASCO Anchorage. It should be constantly updated/confirmed when 24 hours, 12 hours, and 4 hours distant. If more than 1 hour change in ETA occurs, the new ETA must be given. Clear specification should be made if ETA is in GMT or local Libyan time. The information in the ETA cables should be completed as per the terms of the charter party. The 72 hours message must include the ETA, last port of call, if any sickness on board, and if vessel has clean Bill of Health and cargo quantity expected to be lifted in net metric tons at 60°F (15.6°C). The 12 hour message should include definite indication as to the vessel being ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when ship is 4 hours distant from the terminal. On arrival at the anchorage, the vessel must contact RASCO Port Control on VHF Channel 16 to register herself.

Also see "Anchorage".

ANCHORAGE: Vessels to be secured alongside will be boarded by the Pilot in the anchorage or in its vicinity. The vessel should not manoeuvre or navigate in the vicinity of any sea buoys but should make directly for the anchorage which is a circle of diameter 1 nautical mile with centre in position Lat. 30° 32′ N., Long. 18° 38.09′ E., in more than 30 m. of water. For shallower draft vessels it is permissible to anchor due Southward as close as possible to this position, in an adequate and safe depth, Northward of the Fairway Buoy (position: Lat. 30° 30.6′ N., Long. 18° 37.7′ E.), leaving seaway free for approaching and manoeuvring. If need be vessels may anchor in safe waters Eastward of this anchoring area. Anchoring Westward of this area is prohibited.

MAX. SIZE:

(a) Tankers 3,000 – 50,000 d.w.t. will be catered for on finger jetties 1A and 1B which have a dredged depth of 14.0 m. Tankers 3,000 – 30,000 d.w.t. will be catered for on Berths 2A and 2B which have a dredged depth of 12.5 m. and Berths 3A, and 3B which have a dredged depth of 11.5 m. The quay wharf has a dredged depth of 11.5 m., on which 3 dry cargo ships of 5,000 – 20,000 d.w.t. can be berthed at one time. The quay wharf is 672 m. in length with a 35 ton multi-purpose crane to be installed and able to run the entire length of quay wall. Caustic soda discharging facilities are also available on the wharf, but the LOA of the vessel is limited as the distance between the ship's manifold and the extreme part of the vessels' stern should not be more than 48 m.

(b) *Max. Size:*

Jetty 1-A, 1-B:	
Max. LOA	250 m.
D.w.t.	50,000 tons
Max. Draft	12.5 m.
Jetty 2-A, 2-B:	
Max. LOA	189 m.
D.w.t.	30,000 tons
Max. Draft	10.5 m.
Jetty 3-A, 3-B:	
Max. LOA	189 m.
D.w.t.	30,000 tons
Max. Draft	9.5 m.
Quay Wharf:	
Max. LOA	177 m.
D.w.t.	20,000 tons
Max. Draft	9.5 m.

(c) Hooks have been provided on dolphins which are of 100 tons capacity. All bollards on the quay wharf fitted on the finger jetties are of 100 tons capacity. Other bollards are of 50 tons capacity.

HEALTH: For quarantine services:

(a) By day: Flag "Q" (yellow flag).

(b) By night: Red light over white light.

(c) Libyan Customs and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and Pratique services. Libyan government restrictions are strictly enforced. The vessel should have a clean Bill of Health or equivalent document from the last port of call.

RADIO/VHF: Direct communication between ship and shore will be made by VHF. RASCO Communication Centre maintains a continuous VHF watch on VHF channels. On approaching, vessels should make contact on VHF Channel 16 when they will be requested to switch over to another channel. ETA messages can presently be received only on telex (See "Pilotage"). When 4 hours distant arrival messages are to be passed on VHF in addition. VHF Simplex Channels allotted to this harbour are 10 and 12. The Duplex Channel allotted is 22. Vessels must confine themselves to the channel ordered by Port Communications.

RADAR: There is no radar in operation.

TUGS: The harbour will maintain 2 coastal tugs (approx. 2,000 h.p. each) with anti-pollution and fire-fighting capabilities, 2 dual purpose launches and 3 mooring launches, when the harbour is fully operational. Vessels are, however, presently berthed by hiring of tugs.

BERTHING: There are presently 6 finger jetties and a quay wharf (See "Max. Size"). Berthing will be done at the instructions of the Pilot who will board at the anchorage or in the vicinity. Vessels are to have their berthing gear in readiness well before berthing. 2 good lines forward and 2 lines aft will be required for passing to the tugs. Vessels must keep their fire-fighting and emergency system in operational readiness for their own use.

Hoses and Fuel Connections: No dirty ballast facilities at present.

All work on the ship is to be carried out by harbour staff.

BERTHING: Arrangement of Facilities at Quay Wharf and Finger Jetties

* Other sized spools are provided.

** Jetties assigned for cryogenic products (Ethylene, Propylene, Butadine (C4)) now in operation. Vessels should arrive ready to load – cooled down with cargo vapour in vessels's tanks similar to the cargo to be loaded.

MEDICAL: Medical service can be provided in the event of an emergency. For an emergency having occurred at sea the terminal should be informed by quickest means. The patient should be kept ready for evacuation with his gear, CDC, Passport and one person in attendance.

There are limited hospital and dental facilities available at a distance of about 30 km. from the harbour. During working hours, at a distance of about 3 km. medical facilities are available.

BALLAST: Presently there are no facilities to handle dirty ballast. Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will have to tender a fresh Notice of Readiness to load on the second arrival. Tank cleaning and gas freeing alongside will not be permitted under any circumstances.

DENSITY: 1027.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: When the ship is berthed, its engines must remain on standby with full power for immediate use. No repairs of any kind will be permitted when alongside.

FIRE PRECAUTIONS: Fire precautions are strictly enforced. Any laxity on this account will cause stoppage of operations.

CONSULS: Consulates are located at Tripoli 670 km. away by road from Ras Lanuf.

SURVEYORS: No facility for surveying will be provided by the terminal.

GANGWAY/DECK WATCHMAN: Vessels are to employ their own watchman on the gangway.

HATCHES: Where hatches are required to be opened, the crew will be required to open them.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfumes, arms, ammunition, saccharine and other items have to be locked up under Custom's seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed 25 cigarettes per day of stay or 25 grams of tobacco or cigars in lieu. Liquor is not allowed to be possessed or consumed by any member of the crew.

CARGO GEAR: The vessel's cargo gear is to be ready in all respects. The cargo gear may be augmented from shore. The Notice of Readiness will not be considered valid if cargo gear is not ready for instant use.

REPATRIATION: Crew cannot sign-off except in the event of extreme emergency. Even in an emergency it should be noted that Seaman's Book (CDC) are not a valid document under Libyan law. A valid Passport is needed.
TIME: Libyan time is GMT plus 2 hours (1st April to 30th September) and GMT plus 1 hour (1st October to 31st March).
AIRPORT: Although the nearest airport is about 10 km. from the terminal the flight schedules are irregular, and are operated by private airlines. Regular flights operate from Tripoli 670 km. and Benghazi 375 km. by road.
HOLIDAYS: Notice of Readiness will be accepted and cargo work will be carried out on holidays. Fridays are weekly holidays.
POLICE/AMBULANCE/FIRE: In the event of an emergency, the Duty Loading Supervisor on the berth is to be contacted.
EMERGENCY CO-ORDINATION: Call Duty Loading Supervisor.
TELEPHONES: At present no facility exists for making a local call or international telephone calls from the vessel. Telex facility is available if arranged with the agent.
SERVICES: No special service is available.
BANKS: No banking or exchange facilities are available.
STORING: No storing facilities are available.
SHORE LEAVE: Not allowed.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Libyan Dinar.
GENERAL: (a) No stores, foodstuffs or goods of Israeli or South African origin may be on board any ship calling at Ras Lanuf. Penalties are fines, confiscation of goods and possibly more. The Libyan government strictly enforces this law. (b) On arrival fly Libyan ensign: plain green flag. (c) Once the ship is berthed, there is likely to be no delay in commencement of operations.
DEVELOPMENTS: The port is under development and more information, if needed, is obtainable from the Loading Supervisor on duty.

SHIPMASTER'S REPORT: October 1987 (Updated 1992).
Documents:
5 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
1 copy Currency List.
2 copies Arms and Ammunition list.
2 copies Drugs List.

All alcohol is placed in bond and seals are checked during vessels stay. Vessels should not have on board any produce from Israel or South Africa.

This was the vessel's first call and Arabic documentation was not required.

Certificate of Discharge of previous Libyan cargo is required.

The figures for the bond are required in bottles and not litres or weight. For first Libyan call the Master is to make a declaration that the vessel has not called before and that a Negative Certificate of Discharge is held.

Charts: BA. Chart No. 3343 and 3354.

Approaches: Vessels are to approach and report to Libyan coastal station on reaching position Lat. 32° 30′ N., Long. 18° 30′ E.

On approach we used Benghazi Radio (5AB) on M/F-R/T (The ship does not have W/T). Service was clear and prompt.

The first radar target sited was the tanks at Es Sider (Lat. 30° 37′ N., Long. 18° 17′ E.). These tanks were sighted at 80 miles.

The wreck in position (Lat. 30° 49′ N., Long. 18° 05′ E.) was conspicuous at 29 miles.

Anchored vessels at Es Sider and Ras Lanuf also make a good target.

Ras Lanuf RASCO Harbour was picked up at 24 miles.

An ETA was sent to RASCO and Benghazi Radio 4 hours before arrival.

Anchorage: The anchorage is that indicated on the BA. Chart No. 3343 (Lat. 30° 32′ N., Long. 18° 38.09′ E.)

If vessels have to wait for departure documents and are required to vacate the berth they anchor 0.5 miles east of the main breakwater.

Pilotage: Pilots for RASCO Harbour are available 24 hours. There are no night restrictions.

The Pilot boards from a tug near the Sea Buoy and on departure the pilot leaves just inside the breakwater heads.

VHF: Channel 10 is used for communicating with the Pilots. RASCO Port Control on Channel 16 after which communications are on either Channel 12 or Channel 22. Port Control normally gives 1 hours notice for raising anchor and berthing.

Tugs: At the present time there are 3 tugs in operation in RASCO Harbour. 1 × 3,000 h.p., 1 × 2,500 h.p. and 1 × 500 h.p.. Ship's lines are used to the large tug. The small tug pushes alongside.

Berthing: Vessels normally berth head out at all berths, port side to. However, if vessels manifold is in an awkward position vessel can berth starboard side to. The depths are as charted on BA. Chart No. 3343. Pilots report the maximum Winter draft at Gas Berths No. 3A and 3B as being 9.5 m. In Summer a slightly increased draft is allowed.

The very large breakwaters afford the vessel good shelter.

Gas carriers berth at the innermost berths - Berth 3A and 3B. Berth 3A handling propylene and butadine (C4) and Berth No. 3B handles ethylene and straight LPG.

Moorings consist of 2 head/stern lines, 1 breast line and 2 springs fore and aft. The finger piers are well fendered. Ship's gangway used. A mooring boat assists with running the ship's lines.

Berths 1A, 1B, 2A and 2B are for products.

Cargo: Vessel loaded propylene at Berth No. 3A. Largest vessel handled to date was 30,000 cu.m., which was a full load of propylene. The average sized vessel handled is 4,000 cu.m.

Export of ethylene and propylene commenced in May 1987 and C4 shortly thereafter. LPG production is to start in the near future. The plant which is immediately behind the general cargo berth produces 1,000 tonnes of ethylene, 500 tonnes of propylene and 300 tonnes of C4 per day.

At Berth No. 3A the propylene Chicksans are 8 in., 300 ASA for liquid and vapour. The maximum pressure on the liquid line is 5 kg./sq.cm. and on the vapour return line 1.2 Kg./sq.cm. Connection is by hydraulic clamps and shore reducers are provided.

Maximum propylene loading rate is 450 tonnes per hour.

The supply line is 3 km. in length and this causes a warm initial "slug". The coldest temperature achieved was −45°C for propylene (Terminal written advice), we got down to −44°C. There is no recirculation line. The pier staff who were mainly Yugoslavians were very co-operative. The SGS/Redwood Surveyor was from Belgium.

There is no nitrogen for purging at the present time as the plant uses the total supply capacity. It is believed that additional nitrogen production is planned.

Fresh Water: Not available.

Agent: We used Universal Tripoli who are the Government Agent. The local representative will have his own telex by November, telex number will be 50608 Uniship. We used the plant telephone to contact the agent, number being 3331/3332.

General: There is a general cargo quay called "Marginal Quay" inside of Berths No. 3A and 3B. The quay is well fendered and has a large flat quayside.

The LPG plant is immediatley behind with tanks to the South and 2 conspicuous flares in positions Lat. 30° 28.35′ N., Long. 18° 34.95′ E. and Lat. 30° 29.40′ N., Long. 18° 34.30′ E.

The breakwater lights are flashing (not occulting).

Further expansion is taking place to the South of the harbour in position Lat. 29° 12′ N., Long. 18° 35.5′ E.

No services are available at RASCO.

No alcohol is allowed in cabins. Everything is to be placed in bond. Customs check the seals at odd times.

We were advised that regular traders are sometimes made a special concession and are allowed beer and wine but only after arrival.

Positively no South African or Israeli produce to be on board. Large fines are imposed for contravention.

Ship's Certificates should be in Arabic for regular traders. However this is not necessary for the first call.

The Discharge Certificate is to be endorsed by the Customs at the port of discharge. Two copies are to be mailed to Libya and one copy is to be retained on board for the vessels next visit to Libya.

Passes are required if crew members wish to travel in the area. These are frequently and carefully checked.

AUTHORITY: Owners of the harbour: The Ras Lanuf Oil & Gas Processing Co. Inc., Ras Lanuf, Libya.

PORT LIMITS: The complete water area existing within Tobruk Bay or that water area existing to the West of an imaginary line commencing as from Tobruk Peninsula up to the coast to the South.

It is formed by 3 areas inside the Bay, namely Marsa Tobruk, the proposed naval base and Marsa Al-Hariga Oil Terminal.
ANCHORAGE: See "General" before first port.
MAX. SIZE: Max. draft: 29 ft. Max. length: 400 ft.
RADIO: Tobruk Radio (Station operated by Arab Gulf Oil, Operating times 0900/0930, 1300/1330, 1700/1730, 2100/2130 hrs.) 5AL: 420, 425 and 500, VHF (24 hours) Channels 12, 16 and 19.
BERTHING: Berths in Tobruk Harbour:
Quay No. 3: Length 82 ft., draft 11 ft.
Quay No. 4: Berth 1: Length 560 ft., draft 20 ft.
Berth 2: Length 395 ft., draft 28 ft.
Berth 3: Length 410 ft., draft 30 ft.
STEVEDORES: All stevedoring operations and formalities to be done by Agents. 2 companies to be formed in the near future.
MEDICAL: Available.
TANKERS: Refer to "Marsa Al Hariga".
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: Not available; see "Tripoli".
REPATRIATION: Available via Benghazi.
DEVELOPMENTS: Port extension project underway.
AUTHORITY: Port Manager and Harbour Master.
AGENCY: See "General" before first port.

TRIPOLI: 32.54 N. 13.13 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing inside the actual breakwater and that which may fall within any new breakwaters eventually constructed in accordance with the Port Developments Project.

(b) The outer water area known as the navigational channel commencing as from the harbour entrance along the distinguishing marks of the channel for a distance of about 1 mile.

PILOTAGE: Compulsory Pilot boards at entrance of channel.

ANCHORAGE: See "General" before first port.

RESTRICTIONS: Any containers arriving on Ro/Ro ships should be on trailers.

MAX. SIZE: All types of ships with 28 ft. draft and less are safe in harbour.

RADIO: Tripoli Radio (coast station – 24 hours), 5AT, 476 and 500 kHz, R/T 2182 and 2197, VHF Channels 16 and 6.

Tripoli Port Radio (24 hours), 5AI, 500 kHz, R/T 2182, VHF Channels 8, 12 and 16 and in an emergency Channel 14. Tripoli Port Radio Telex No. 20464.

CRANES: 2 floating cranes, 100 tons and 200 tons capacity. 25 electric cranes 5 tons - 30 tons capacity. 67 cranes of various capacities up to 50 tons.

STEVEDORES: Two companies available. Working hours: 0700-2000.

MEDICAL: All facilities available.

FRESH WATER: Available by barge and alongside. Passenger vessels 100 tons maximum and cargo vessels 50 tons maximum.

FUEL: Available through Agent. A notice of 24 hours needed, advisable for Chief Engineer to check what grades are available.

CONSULS: Algeria, 34631; Belgium, 37797; Bulgaria, 35733; China, 32300; Denmark, 39413; France, 33526 & 33527; Germany, 33827 & 30554; Greece, 36978 and 36689; India, 41835; Iraq, 34235; Italy, 34131; Jordan, 32707; Kuwait, 40282 and 40281; Lebanon, 33733 and 32289; Pakistan, 40072; Malta, 38081 and 38082; Morocco, 34239 and 40188; Netherlands, 41549 and 41550; Poland, 31768; Russia, 30554; Saudi Arabia, 30486; Spain, 35463 and 33275: Sudan, 39181 and 39182; Sweden, 32343; Switzerland, 32416; Syria, 31783; Tunisia, 31051/2; Turkey, 37728; Venezuela, 36838; Yugoslavia, 34114 and 33392.

DRY DOCK: *Floating Dock:*

Length over platform	136.700 m.
Length over pontoon	121.200 m.
Moulded outer breadth	30.600 m.
Inner clear breadth	23.400 m.
Depth of pontoon at centre line	3.100 m.
Height of keel blocks	1.200 m.
Depth of water above keel blocks	6.400 m.
Lifting capacity	5,000 tons

Spare parts to be supplied by ship's owner. 3 kinds of marine paint are available.

WATCHMEN: Available.

REPATRIATION: Crew changes are possible.

AIRPORT: A number of major air lines operate to and from Tripoli Airport which is about 27 km. from the city.

POLICE/AMBULANCE/FIRE: Main port call; 39111, 35010, 31518. Karamanly Wharf call: 30378, 35010, 31518.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: 2.6 km. of new quays under construction with depths of 10.0 m. – 12.0 m. The second phase of new construction will include berths for container vessels and Ro/Ro vessels.

SHIPMASTER'S REPORT: March 1988.

Chart: BA. Chart No. 248.

Documents:

8 copies Crew List.
2 copies Crew Declaration (on Libyan forms).
2 copies Manifest.
1 copy Health Declaration.
2 copies Currency Declaration (on Libyan forms).
All Passports.
1 copy Arms and Ammunition List.
1 copy Drugs List.
2 copies Cargo Manifest.

Cameras are placed under seal. No cigarette issue allowed. Bond remains sealed if proceeding to another Libyan port. Definitely no alcohol, Customs would not allow beer issue. Ship's Certificates to be in Arabic. Passports exchanged for Landing Cards at the gate. All stores checked for signs of South African and Israeli produce.

Approaches: Vessels are to contact Tripoli Radio on 2182 kHz. at least 8 hours before arrival and obtain current navigational warnings. At the same time advise Tripoli Radio of vessel's ETA and inward course and speed.

Tripoli Radio normally uses 2197 kHz. as the main M/F transmitting frequency. Their reply was prompt and English was good.

Tripoli Radio has Telex Nos. 90129515 AT TPLY and 90120300 TAT TPLY.

Tripoli Port should be contacted on VHF Channel 12 as early as possible, giving ETA Tripoli and inward course and speed.

Tripoli Port will require the following information: LOA, Beam, Gross Tonnage, Nett Tonnage, Draft, Cargo Tonnage, Agent, Charterer, Owner, Flag, Number of Crew and Nationality, Last Port of Call and Next Port of Call.

Tripoli Port Control has Telex No. 90120464 TRIPORTHLY.

On approach, Tripoli Port shows up well on radar at 30 miles when there are ships anchored off.

D/F Station "Tarabulus" was not obtainable.

The N.E. Breakwater and Tarabulus High Light Tower were conspicuous but the light was weak.

All Channel Buoys except No. 3 have been withdrawn. Only the beacons are in position.

Pilot: The Pilot may be contacted through Tripoli Port Radion on VHF Channel 16, working on Channels 12 and 8. The Pilot boards from a grey tug near Beacon No. 2. If the weather is poor, Pilot may board inside the breakwaters. The Pilots speak good English and are competent.

When leaving the Port, the Pilot disembarks in the Outer Harbour before reaching the new Breakwater's entrance.

Entry: Maximum draft handled to No. 3 Pier and Karamanli Mole is 29 ft. Tidal range 1 ft. 6 in. Minimum depth found at Karamanli Mole Oil Berth was 32 ft. There are no tanker movements from 30 minutes before sunset until 0730 hrs. the next day.

Generally, cargo vessels are not handled at night, however, movements may be undertaken if absolutely necessary.

In Winter the Port is often closed due to bad weather which causes very heavy N.W. swells across the breakwater entrance near Buoy No. 3.

Anchorage: The anchorage is that indicated on BA. Chart No. 248. Anchored vessels were spread out to the East of the limits on the chart but West of the Channel Leading Line. The anchorage is unprotected from all winds except those off the land. We anchored with Tarabulus Lighthouse bearing 165° × 1.5 miles for a period of 12 hours in a Force 9 wind from the W.N.W. and whilst trying to get underway we parted our cable.

Tugs: Tugs are not used by small vessels. Pilot reports that only 2 tugs are in operation at the present time.

Berth: LPG imports are handled at the outer end of Karamanli Mole. This berth only handles LPG. The old oil product pipelines are no longer in use.

The berth face consists of old sheet piling and is in a poor state of repair, protected by old tractor tyres. Inner Karamanli Mole is generally used by bulk carriers discharging grain, this can restrict the size of ships using the oil berth. Normally LPG is handled by small vessels.

Vessels normally berth port side alongside but can berth starboard side alongside if required and if space permits.

Mooring/Gangway: There are very few bollards on the berth and only breast lines can be run. Insufficient room to run stern lines. Ship's gangway was used and it was easy to land.

Cargo: LPG mix. Normally 75% Butane and 25% Propane, but this depends on the season (cooking fuel, etc.).

Liquid and vapour lines were 3 in. rubber hoses which were connected to 6 in. and 4 in. lines respectively. The distance to the pressure tanks (20 tonnes each) is 4 km. Pressure tanks product is bled off to road tankers and also piped inland. Discharge pressure was 9 kg./sq.cm. and the minimum temperature −2°C. via ship's heater and booster pump.

The line pressure fluctuates when product is bled off to road tankers.

The liquid shore line is to be hot gassed/blown clear for 2 hours on completion of liquid discharge.

Vapour is returned to ship, only opened 2 tanks for this operation, which reached 3 kg./sq.cm.

Average rate 40 t.p.h.

No surveyor attended. The receiver "Breganaft", also the shipper, was in attendance at the start and on completion and was of assistance.

Tank Dry Certificate required on completion.

Fresh Water: Fresh water is available by tanker truck of 10 tonnes capacity or by barge of 200 tonnes capacity. 2 self propelled barges were observed in the harbour. Cost of delivery inside the harbour is U.S.$10.0 per tonne.

Agent requires 48 hours' notice for fresh water in order to prepare paperwork.

Fresh water also obtainable at the outer anchorage in calm weather but cost is high.

VHF: Tripoli Radio on VHF Channel 26 but also uses Channel 22 and others as per ALRS. The Ship's Radio Station was sealed by Port Police whilst in Port.

International calls by vessels at anchor to Italy and Greece were handled quickly.

Customs: Officials visited the vessel 17 hours after arrival. As we were under seal on coastwise voyage from Zuetina they only checked seals on the bond. We were given a cigarette issue but no alcohol of any description was issued. All alcohol remains under seal whilst on the coastal trade. All radios and cameras were manifested so were allowed to be kept in cabins.

Agent: Vessel handled by "Universal". Agent attended with Customs 17 hours after arrival and was helpful with regard to ordering stores. If vessel finishes overnight she has to wait for clearance until 1000 hrs. the following day as the Customs House does not open until 0800 hrs.

Stores: Imported stores not available. Fresh produce available but dependent upon the season, prices are high. Basic items are obtainable.
Bunkers: Most grades available by road tanker through "Breganaft".
Forms: Also see "Documents". Crew Manifest and Money List to be on Libyan forms but if first visit to Libya, international forms are acceptable. All Ship's Certificates to be in Arabic.

Crew Manifest.
8 copies Crew List on IMO Forms acceptable.
2 copies Cash in Master's Safe.
2 copies Ship's Fixture List.

Port Clearance and Customs Clearance from Last Port (very important).

General: Vessels on coastwise trade must keep at least 12 miles offshore.

The local currency is the Libyan Dinar and 1 Dinar = U.S.$3.5 (official).

Mail can be sent out via the Agent.

Repatriation and crew changes are possible but outward tickets must be paid for in Tripoli (not PTA) by remittance of hard currency. There are nearly always vacant seats on all outward flights. All crew joining require a visa.

Shore leave is only allowed during daytime. Passport is handed in at the gate and a local I.D. card is given in exchange.

Friday is the Moslem holiday. March 2nd was a Public Holiday.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first Port.

ZAWIA (Azzawiya): 32.48 N. 12.42 E. (See Plan)

Also see "General" before first port.

LOCATION: Zawia Offshore Oil Terminal is situated about 50 km. West of Tripoli.

PORT LIMITS: Seaward limits extend from 32° 50′ 30″ N. to the coastline between 12° 40′ 00″ E. and 12° 44′ 00″ E. (refer Port Plan on B.A. Chart No.3353). Vessels are considered to be "Arrived Ships" and (subject to charter party terms) laytime will commence, when the ship is approximately 2 miles off the S.A.L.M. berths. The port is operated by the National Oil Corporation of the Socialist People's Libyan Arab Jamahyria.

DOCUMENTS: Masters are advised to have the following documents prepared before arrival in order to expedite ship's inward clearance:

6 copies Crew List.
2 copies Stores Manifest.
2 copies Personal Declaration (Crew).
Health Documents.
Cargo Documents (Cargo Inwards).
Ship's Papers.
Ship's Certificates.
Discharge Certificate (of last cargo loaded at any Libyan Port - duly authenticated at port of discharge. Loading cannot be undertaken until document presented to shore official via ship's Agent.).

PILOTAGE/APPROACHES: Vessels are advised to anchor Westwards of a position about 1 mile Northwards of Berth No.1 and not closer than 7.5 cables from any berth or to approach any berth closer than 7.5 cables without having received Harbour Master's or Duty Pilot's permission.

S.A.L.M. Berth No.1:	32° 48′ 18″ N., 12° 42′ 00″ E.
C.B.M. Berth No.2:	32° 48′ 06″ N., 12° 42′ 38″ E.
S.A.L.M. Berth No.3:	32° 48′ 12″ N., 12° 41′ 12″ E.

Flare Stack (2 Flares in North/South orientation)
North Flare: 32° 47′ 24″ N., 12° 42′ 00″ E.

Azzawiya Oil Terminal is adjacent to the flares. Tankers are warned that it is unsafe to remain at anchor during adverse weather conditions. The bottom is sand, overlaying bed-rock and the depth of water about 35 m. When unable to remain at anchor vessels are to keep Northwards of Lat. 32° 52′ N.

RESTRICTIONS: Whilst at a berth, tankers must have main engines ready for immediate use at all times. Sudden and often violent changes of weather may occur without prior indication at any time and vessels may be required to curtail cargo operations, disconnect hoses and vacate the berth at very short notice, the Loading Master will advise accordingly.

The Pilot (Loading Master) and when appropriate a Cargo Surveyor will be in attendance prior to berthing and until berth vacated, suitable accommodation, etc., and normal courtesies to be provided. The Pilot may on occasions be detained on board. Pilot, Agent and Port Officials and Service craft are available during daylight hours only. Cargo documentation and outward clearance for vessels loaded will be completed during normal daytime working hours.

Vessels must have sufficient ballast for safe manoeuvring with propeller immersed and trimmed to about 8 ft. by the stern. If in the opinion of Harbour Master/Pilot the ship has insufficient ballast she may not be allowed to berth.

The discharge of dirty ballast is strictly prohibited. There are no facilities for the reception of water ballast or tank washings ashore. In the case of crude oil vessels Crude Oil Washing is not permitted.

HEALTH: Local Officials will board vessels to grant Free Pratique. Vessels must report any suspected disease or fever to local Authority prior to being boarded by Agent or Pilot. There are facilities to treat serious injuries or illness. Inoculations and vaccinations cannot be dealt with.

VHF: Call sign: "Zawia Port Control".

Zawia Port Control keeps 24 hours watch on Channels 16, working channels 22 and 27. Vessels approaching the anchorage must give the following information when possible:

(a) Ship's name and flag.
(b) Up-dated ETA.
(c) Cargo nomination, grade and quantity.
(d) Vessels discharging to give grade and Bill of Lading figures.
(e) Distance between Ship's rail and manifold, manifold size and derrick SWL.

For cargo operations Ship/Shore communication is maintained by Loading Master via Walkie-Talkie radio or by VHF Channel 12, Call sign "Tank Farm".

Service launches operate on Channel 12, though all are equipped with standard Ship VHF sets.

Link calls may be established via Tripoli Radio.

BERTHING: Prior to berthing, vessels should have the port derrick rigged with a SWL of 10 tons if nominated for SBM No.3 (Crude Oil discharge), 7 tons for SBM No.1 (Fuel loading and Crude Oil/Reduced Crude Oil discharge) and 5 tons for CBM No.2 (Vessels handling White Oils, Vacuum Gasoil, Lubricating Oils).

Vessels proceeding to SBM's will have 2 wire rope strops with shackles placed on board to secure chafing chain ends of nylon mooring ropes.

Vessels loading Fuel Oil or discharging Reduced Crude Oil will have a special device placed on board to accommodate 2 hoses connected to one ship's manifold.

Hose handling, connecting and disconnecting to be carried out by ship's crew under the supervision of a Deck Officer to Mooring Master's advice.

Masters are requested to have available adjacent to port side manifold:

2×15 m. lengths of synthetic fibre rope 127 mm. circumference.
1×14 lb. (6 kilo) and 1×7 lb. (3 kilo) hammer.
2×1.5 ton chain blocks and/or suitable rope tackle.
Large Shifting Spanner.
1 Wire strop of 20 mm. – 25 mm. diameter, about 2 m. – 3 m. length.
Rope lashings.

S.A.L.M. Berth No.1: Buoy is moored approximately 1,400 m. offshore with a least depth of 22 m. in a position 32° 48′ 18″ N., 12° 42′ 00″ E. The berth can accommodate vessels of 15,000 d.w.t. to 100,000 d.w.t., max. draft 17.0 m. The vessel is secured at the bow with 2 nylon mooring ropes. Chafing chain ends are secured by shackles and wire strops. The floating hose strings on vessel's portside terminate in 12 in. diameter flanges, A.S.A. 150, fitted with neoprene 'O' ring gaskets. Minimum distance 3.5 m. between manifold and ship's hose rail. Cargo boom 7 tons SWL.

C.B.M. Berth No.2: "See Plan". CBM No.2 is approximately 1,100 m. offshore with an average depth of 21 m. in position 32° 48′ 06″ N., 12° 42′ 38″ E. (approx). The berth can accommodate vessels of 5,000 d.w.t. to 25,000 d.w.t. maximum 175 m. LOA and max. draft 10.0 m. The vessel is berthed heading about 310° (T) with 2 bow anchors and 3 buoys (one stern, one starboard quarter, one port quarter).

One 8 in. diameter hose (one hose each for leaded and unleaded products) terminating in an 8 in. diameter flat face bolted flange. One 10 in. diameter hose (for lubricating oils only) terminating in a 10 in. diameter flat face bolted flange.

For those vessels discharging Lub oils, a spherical device (pig) will be placed on board with air compressor.

Two refinery employees will oversee the discharge operation, control line clearing procedures and will remain on board. Food will be supplied from ashore.

S.A.L.M. Berth No.3: Buoy is moored approximately 1,350 m. offshore with a least depth of 24 m. in position 32° 48′ 06″ N., 12° 42′ 38″ E. (approx). The berth can accommodate vessels of 25,000 d.w.t. to 140,000 d.w.t., max. draft 19.0 m. The vessel is secured at the bow with 2 nylon mooring ropes. Chafing chain ends are secured by suitable shackles and mooring strops (supplied). Two floating hose strings are taken on vessel's port side, terminating in 16 in. diameter flanges A.S.A., fitted with neoprene 'O' rings and 'Camlock' bolts. Cargo boom 10 tons SWL.

No lights have yet been installed to mark CBM No.2.

SALM Berths No.1 and No.3 are each equipped with radar reflectors installed at top buoy and lights mounted on the buoy deck with the following characteristics: Colour White Fl. "U" ev. 12 secs (unreliable).

A light Fl.R.G. ev. 7 secs. is exhibited on Eastern end of small craft harbour breakwater.

Tidal streams are generally weak and ineffectual. Sub-sea and surface currents often run in differing directions. Current strengths of about 2 knots are not uncommon and are largely influenced by the wind.

GARBAGE/WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

SAFETY: *Fire and Safety:* Fire and Safety Regulations will be *strictly* enforced at all times and regular checks will be made by the responsible Refinery Official. A safety check list is to be completed and signed by the Master, the Chief Officer and Loading Master. Anti-pollution of the sea precautions are to be observed at all times. A pollution control vessel is available for use in the event of accidental spillage.

GENERAL:

No fresh water, fuel or diesel bunkers available.
No provisions or supplies available.
No shore leave or crew changes possible.
No cranes or lighters available.
No repair facilities available.
No lifeboats or other craft to be lowered in to water.
No swimming over the side allowed.

AUTHORITY: Azzawiya Refinery, P.O.Box 15715, Azzawiya. P.O.Box 6451, Tripoli. *Tel:* Tripoli 30423/24/35. *Contact:* Mohamed M.Zerti, Marine Co-ordinator.

AGENCY: See "General" before first port.

ZUARA: 32.55 N. 12.07 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing between the actual breakwater and that which may fall within any new breakwater eventually constructed.

(b) The water area known as the navigational channel existing outside the harbour entrance for a distance of about 0.5 miles (1 km.).

APPROACHES: If approaching from the East, vessels are to give the coast a berth of at least 3 nautical miles.

ANCHORAGE: See "General" before first port.

RESTRICTIONS: Port for ships laden with direct delivery cargo only.

MAX. SIZE: Ships up to 13 ft. draft and 65 m. length are safe in the harbour.

RADIO: Tripoli Radio and Port Radio use VHF Channel 16.

BERTHING:

Quay No.	*Length*	*Depth*
Shore quay	2 ships	13 ft.
F.J. Stb.S.	165 ft.	13 ft.
F.J. Pt.S.	165 ft.	13 ft.

STEVEDORES: 2 companies available.

MEDICAL: Available.

REPAIRS: Not available, see "Tripoli".

REPATRIATION: Possible.

AIRPORT: Tripoli Airport situated about 127 km. from Zuara.

POLICE/AMBULANCE/FIRE: Call Port Manager, Tel: 025305.

SHORE LEAVE: Allowed after Free Pratique, Customs and Immigration formalities completed.

DEVELOPMENTS: 18 berths to be constructed in a new master plan.

AUTHORITY: Port Manager and Harbour Master.

AGENCY: See "General" before first Port.

ZUEITINA: 30.51 N. 20.00 E. (See Plan)

Also see "General" before first port.

LOCATION: The Terminal Fairway Buoy, moored in position Lat. 30° 55′ 00″ N., Long. 19° 59′ 48″ E., is painted black; it shows at night a white light flashing "Z" every 10 seconds. A prominent landmark is the radio mast (height 451.5 ft. above sea level) in position Lat. 30° 49′ 57.6″ N., Long. 20° 03′ 05.5″ E.; it displays at night 3 red lights in a vertical line – the top light flashing, the 2 lower fixed. The top light is on top of the mast (which is 400 ft. above the base), the middle light is 266 ft. above the base, and the lowest light is 133 ft. above the base. At night flares at the Liquid Petroleum Gas Plant, in position Lat. 30° 54.2′ N., Long. 20° 05.4′ E., can be seen from a considerable distance; by day a column of smoke emanating from this position is also conspicuous. 14 large oil tanks, painted white, near the foot of the Radio mast, are prominent landmarks.

Positions of Moorings:

"Alpatah" berth	Lat. 30° 53′ 30″ N.	Long. 20° 01′ 05″ E.
"Brega" berth	Lat. 30° 52′ 18″ N.	Long. 20° 01′ 24″ E.
"Chahett" berth	Lat. 30° 52′ 08″ N.	Long. 20° 00′ 11″ E.
"Dalila" berth	Lat. 30° 50′ 56″ N.	Long. 20° 00′ 26″ E.
"Echbar" berth	Lat. 30° 50′ 16.4″ N.	Long. 19° 59′ 16.1″ E.

"Alpatah" out of service, marked by navigation buoy.

FLAGS: When arriving at Zueitina by day, ships must display, in addition to their own national ensigns, the Libyan flag and the appropriate quarantine signal. Throughout the ships' stay, during daylight hours, they must display the Libyan flag, their own national ensigns and, when applicable, the International Code signals "B", "H" or "G", and the appropriate quarantine signal.

DOCUMENTS: Soon after vessel's arrival, a Custom's Officer will board, accompanied by a Shahat Agency representative, who will act on behalf of the ship and its Agent, as well as on behalf of the Company, in the execution of essential business. The following documents, signed by the Master and imprinted with the ship's official stamp, are required by the Customs Official for the Customs and Immigration Departments and for the Port and Lights Authority:

2 copies Entering and Leaving Territorial Waters Certificates.
2 copies Report Inwards Certificates.
2 copies Crew Declarations of Dutiable Goods.
2 copies Crew Declaration List.
2 copies Report Outwards Certificates.
3 copies Boycott Certificates.
2 copies Stores Lists.
5 copies Crew Lists.
1 copy Clearance from Last Port of Call.
2 copies Tanker Characteristics Certificates.
1 copy Certificate of Discharge, from the Discharge Port Authorities, of the last cargo loaded in Libya.

With the exception of the Crew Lists and the Stores Lists and the clearance from the Last Port, the above forms will be provided by the Company clerk.

It is important that the Master should be able to produce a properly authenticated certificate of discharge covering the last cargo loaded into the ship in Libya. If for some reason he is not in possession of such a certificate, he must write a letter of explanation which includes the pertinent extracts from the ship's log book, append his own signature to it and stamp it with the ship's official seal, and address it to the Secretariat of Petroleum, Es Zueitina, SPLAJ. If the explanation for failure to produce the certificate is considered satisfactory the ship may be permitted to load. If there appears to be any suspicion that the last port was not as stated, the ship will be turned away.

If the vessel has not previously loaded in Zueitina, the Master is required to confirm this fact in an official letter, stating also the ship's last port of discharge and giving an undertaking that the cargo about to be loaded will not be discharged in any of the countries to which the Arab embargo extends.

The Mooring Master will, after boarding, lose no time in informing Zueitina Marine that he has received one or other of these foregoing documents from the Master, which he will, at the first opportunity, send ashore for delivery to the Secretariat of Petroleum representative. This will ensure that there is no unnecessary delay in the commencement of loading.

On completion of loading, the Shahat Agent will again board the ship with the cargo documents which are to be signed by the Master. The clerk has to deliver to the Master one copy of each document for his own use and one copy for consignee and bring the rest of documents ashore with him.

1. Bill of Lading
2. Cargo Manifest
3. Time Sheet
4. Certificate of Origin
5. Master's Receipt
6. Export Manifest

All of which forms are provided by the Company or by the Agency. He will also take ashore any letters to be posted. On occasions, a Customs Official will visit the ship with the documentation clerk prior to sailing to ensure that the seals which were put on the bonded stores lockers have not been tampered with before the ship has left Libyan waters.

The documentation formalities prior to the ship's departure, are usually completed whilst the ship is unmooring from the berth, or just after it has left the berth, hove to with the Mooring Master still aboard. Sometimes, however (and particularly after the loading of "Agip" cargo), the processing of the papers ashore may take longer than usual, and the ship may have to anchor to await the clerk's eventual arrival, in which case the Mooring Master will direct it to a safe anchorage before disembarking. Zueitina Marine will then inform the Master when the launch bearing the clerk is about to leave the Small Craft Harbour, in order that the anchor may be weighed, and a lee side presented to the launch.

ACCEPTANCE PROCEDURE: *Notice of Readiness, Laytime, etc:*

Vessels Loading Crude Oils: A vessel for which a berth is available on arrival will be boarded by the Mooring Master at the Terminal Fairway Buoy and, providing that the vessel is in all respects ready to commence loading (except for the necessary de-ballasting time), the Notice of Readiness will be accepted at the time of the Mooring Master boarding, subject to the provisos – a, b, c and d, below.

If the vessel is not in all respects ready to proceed to the berth, with main engine and auxiliaries fully manoeuvrable, mooring ropes on deck, anchors, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

A vessel which has been instructed by Zueitina Marine to anchor in the roadstead on arrival should, after doing so, inform Zueitina Marine of the precise anchorage time, which time will, for the purposes of berthing order and the Port Log, be considered as the vessel's arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:–

(a) that it is within the hours of daylight – deemed to be from 0600 hrs. (local time) to 1800 hrs. (local time),
(b) that it is not a Public Holiday, or a Friday (the Libyan Sabbath), unless the vessel is actually handled on that day,
(c) that the port is open, and
(d) that the vessel has been nominated to load.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In the case of a vessel arriving without nomination, the Notice of Readiness will be accepted when notification of her nomination has been received at the Terminal, subject to provisos (a), (b) and (c) above, and instructions from the Company's Operations Department. On occasions when the Company deems it advisable to berth a vessel prior to the date of the nominations, acceptance of the Notice of Readiness will be at the time the Mooring Master boards, providing that the anchor is then aweigh.

In addition to clauses (a), (b) and (c) and (d), above, vessels will not necessarily be accepted when arriving at a time ahead of, or behind, their last scheduled Estimated Time of Arrival, especially if such acceptance would be at the expense of a vessel that has arrived within its nominated period.

Vessels Loading Liquid Petroleum Gas: A Liquid Petroleum Gas Tanker's Notice of Readiness will be accepted on arrival, provided that:

(a) the port is open ("port" meaning, in this case, the LPG berth),
(b) that it is not a Friday (the Moslem Sabbath) or an official holiday, unless the ship is actually handled on that day,
(c) that it is not during the night hours – deemed to be, at the LPG berth, between 1800 hrs. and 0600 hrs. (local time) – unless the ship is actually handled during that period,
(d) that the ship does not arrive on the same day, or clash with the loading of, another LPG tanker chartered under a LINOC contract,
(e) that the ship's tanks are in such a state of readiness, i.e., requiring no cooling, no purging, that loading can be commenced at *full rate* immediately the hoses are connected,
(f) that the arrival time does not differ appreciably, either before or after, from the last signalled ETA sent by the ship and received at the Terminal, and

(g) that the vessel has been nominated to load.

When a Liquid Petroleum Gas tanker does arrive whilst the port is closed, the Notice of Readiness will be accepted at the time of the opening of the port, subject to provisos (b), (c), (d), (e), (f) and (g).

The N.O.R. of an LPG loader arriving on a Friday or on an official holiday, or during the aforesaid night hours, will be accepted at 0600 hrs. (local time) on the first subsequent working day, subject to provisos (a), (d), (e), (f) and (g).

An LPG tanker arriving on the same day as an LPG tanker scheduled to load under a LINOC contract, or whose loading would clash with an LPG tanker scheduled to load under a LINOC contract, will have its N.O.R. accepted on the completion of hose connection, subject to provisos (e) and (f).

PILOTAGE: A Mooring Master will board the vessel in the close vicinity of Terminal Fairway Buoy and advise Master on all manoeuvres relative to berthing, connecting and disconnecting the hoses, and in all operations within the anchorage or berthing area.

Vessels of 40,000 d.w.t. and upwards should have a pilot ladder long enough to reach the Mooring Master's launch rigged just abaft the accommodation ladder, in such a manner that the Mooring Master can transfer to the accommodation ladder when about 10 ft. from sea level. Ladders must be strong, clean, and in good state of repair and conform to international requirements. In cases where the ladder(s) fails to conform with these requirements, the Mooring Master will decline to board until an adequate ladder has been provided. A good lee should be made, to allow the launch to come alongside and the Mooring Master to board safely. (Note: Ships which have been instructed to berth at the S.P.M's, and need to take the Company's gear aboard, should have the ladder(s) rigged on the port side, in order that they may take it aboard from the Mooring Master's launch with the working derrick as soon as the Mooring Master has boarded).

The Mooring Master may require the vessel to unberth at any time he deems it necessary for the safety of the vessel, or the installations, or both, or because of infringements of the Port Rules by the vessel.

As soon as practicable after boarding, the Mooring Master will inspect the mooring and lifting equipment and the ballast, and not until he has assured himself that the equipment is adequate, and the ballast clean, will the ship be accepted. His opinion of the adequacy of the gear, and of the cleanliness of the ballast, shall be final.

ANCHORAGE: Vessels awaiting the Mooring Master, whether for berthing in the crude oil berths or alongside the LPG berth, should heave to in the close vicinity of the Terminal Fairway Buoy. If they are obliged, or instructed to anchor, they should do so in the recommended anchorage, which is within the radius of a circle centred in position Lat. 30° 55′ N., Long. 20° 01′ E. Under no circumstances should they anchor South of the 30° 54′ 00″ parallel. Whilst at anchor, they should exercise the utmost vigilance, as they are liable to drag anchor in rough weather, and should keep in VHF radio-telephone with the Terminal at all times. If heavy weather necessitates them heaving up anchor and proceeding to sea, Zueitina Marine must be informed accordingly.

HEALTH: Pratique will be granted by the Custom's Official. He will examine the ship's logbook, and will inspect and seal the bonded storerooms.

All ships must display the appropriate quarantine signal until given Pratique.

RADIO: 72 hours prior to arrival at Zueitina, Masters should advise the Company of their vessels' ETA via Tripoli and via Portishead Radio. They should subsequently confirm or amend them when they are 48 hours and again when they are 24 hours distant from the Port.

All messages to Zueitina Terminal should be addressed to the Operations Manager, Zuetina Oil Company, with copies to the Terminal Superintendent.

Messages should include the quantity and grade of cargo to be loaded, the last port of call and destination, Bill of Health status and details of any sickness on board. Estimated times of arrival should be given in GMT. (Libyan Standard Time is GMT plus 2 hours).

Masters of vessels equipped with VHF radio-telephones should contact Zueitina Marine on Channel 13 or Channel 16 when within range, and give a firm calculated time of arrival at the Zueitina Fairway Buoy. They should also again inform Zueitina Marine Duty Officer of the quantity and grade of cargo required, the last port, estimated deballasting time and the destination. They should confirm that they have in their possession a Certificate of Discharge for the last cargo loaded into their ships in Zueitina or, in cases of ships arriving in Zueitina for the first time, that they have ready for the Secretariat of Petroleum a letter which certifies that the cargo which they are about to load will not be discharged in any country against which the Arab Oil Embargo extends. In vessels paying their first visit to the Terminal, Masters should also inform the Duty Officer of the size and type of the manifold connections (i.e. 12 in. ASA, or 10 in. European, etc), and whether or not they have on board heavy wires and shackles for mooring at the mono-buoys.

(N.B. It is important that all ships arriving at Zueitina are fitted with VHF radio-telephones, capable of operating on the main working Channels. Without VHF communications, Zueitina Marine cannot always know with accuracy a vessel's arrival time, and as a result that vessel might well lose its loading turn and be subjected to an appreciable – and, with VHF, avoidable – delay in consequence.)

An aerial radio beacon is located on the North-Eastern arm of the Small Craft Harbour, in position Lat. 30° 54′ 05″ N., Long. 20° 04′ 12″ E., intended as an aid to navigation for aircraft flying to and from Zueitina airstrip. The beacon transmits continually the call sign ZUE, on 369 kHz: the signal, which is omni-directional, has a range in excess of 100 miles.

TUGS: One tug ("Saladin") of 4,600 h.p., bollard pull 55 tons now available to assist in berthing at CBM and LPG berths.

One to six mooring launches of 370 h.p. available, normally two launches assist berthing at SBM's.

BERTHING: The sea terminal consists of five berths for loading crude oil products, two of which – "Brega" and "Dalila" – are conventional buoy moorings, and the others – "Alpatah" ("Alpatah" buoy at present temporarily removed but position marked by Tower Buoy with same characteristic light) "Chahett" and "Echbar" – are single-point moorings, or mono-buoys. Conventional buoy moorings "Brega" and "Dalila" are approximately 2.5 miles offshore, with an average depth of 70 ft. and 80 ft. respectively. 42 in. (ID) submarine lines connect the berths to the shore installations. To the header at the seaward end of each of these submarine lines are connected two strings of flexible reinforced rubber hoses, laid on the sea bed and buoyed when not in use. The forward of the two strings is made up of (from the header) three 30 ft. lengths of 24 in. i.d. hose, two 30 ft. lengths of 20 in. i.d. hose, and seven 30 ft. lengths of 16 in. i.d. hose. The after string is similar, but with one less length of 16 in. i.d. hose. To the seaward extremity of each hose string is fitted a 16 in. to 12 in. ASA reduction flange. When the ship has berthed, each hose string is towed in to the ship's side below the manifold by the attendant launch, to be hove up by crane or derrick and bolted to the ship's connections, *invariably on the port side.* Where the ship's connections differ from the 12 in. ASA flange on the hose, suitable reduction spools must be fitted. The weight to be lifted on each hose is approximately 7 tons.

Single-point moorings, "Alpatah", "Chahett" and "Echbar" are all approximately 3 miles offshore, in an average depth of 100 ft. of water. The submarine pipelines to "Alpatah" and "Chahett" berths are of 48 in. i.d., that to "Echbar" berth, 42 in. i.d. Particulars of the strings of hoses from the header to the ship's manifold are described in detail in the chapter on "Single-point Moorings". As in the conventional buoy berths, *the hoses are always taken up on the port side,* and the connecting flange on the hose is 12 in. ASA pattern. The weight to be lifted is approximately 7 tons, but this is to some extent dependent on the ship's freeboard.

Mooring Equipment: As a guide to Masters who intend to save time and labour, especially in these days of reduced "general purpose" crews, by equipping their ship with the requisite mooring gear, the following standard requirements is suggested:

(a) Two (2) flexible steel slip wires, 1.75 in. dia., 5.5 in. circumference, 130 ft. in length, or longer if the distance from the fairlead to the bitts is such that 130 ft. would be insufficient to make fast safely. Such slip-wires will have an eye spliced in one end only.

(b) Two (2) screw-pin or threaded bolt and nut, bow shackles, bow size 2.5 in., pin diameter 2.75 in., minimum width, jaw to jaw, 4 in.: breaking strain 150 tons.

Vessels fitted with A.K.D. chain stoppers will reduce mooring time.

Single-Point Moorings: The "Mono-buoy" is a large cylindrical buoy (weight 106 tons), divided by steel bulkheads into four water-tight compartments, through the centre of which emerges the loading hose. The perimeter of the buoy, to which the buoy-to-ship moorings are attached, is a turntable which revolves on bogies round the centre – hose-supporting – section, in such a manner that the vessel berthed on the buoy will always lie head to wind. The minimum depth of water within the swinging radius of the largest ship envisaged at the buoy is approximately 95 ft.

To the mono-buoy is attached a 240 ft. length of chain cable, made up of 2.375 in. U3 steel studded links, and supported in polyurathene buoyancy collars, at the seaward end of which is a "chafing chain". This "chafing chain" is 20 ft. long and of similar construction to the main chain, but with three open links at the end: it is detachable for periodic renewal. To the end of the chafing chain is attached the "approach rope" – a 200 ft. length of 10 in. circumference plaited polypropylene which, when not in use, is allowed to float out free from the buoy.

The ship approaches the buoy from downwind, taking care to keep the wind right ahead (adequate ballast should be retained aboard to provide manoeuvrability). When sufficiently close, the crew will lower to the attendant launch the end of a good mooring rope, to the eye of which has been attached a stout nylon lashing, about 2 fathoms long. This mooring rope should be passed out through a central Panama lead, if a suitable one exists (or from a fairlead on the port bow (when the ship is fitted with a bulbous bow) a line put out through a central lead, should be brought back along the forecastle, clear of the bulbous bow, and then be lowered to the water to avoid the possibility of the launch coming into contact with the bulb when coming in to collect the end of the rope. Meanwhile, two heavy 5.5 in. circumference flexible steel slip wires will have been made fast in readiness, preferably on different sets of bitts, in such a manner that there is an adequate number of turns around the bitts and that the end of the eye reaches to approximately 10 ft. and 10 ft. 9 in. respectively from the Panama/fairleads. When the chain comes aboard, it is quickly secured to the wires by two 150 tons B.S. shackles, which are bolted through two of the open links in the chafing chain. The strain on the approach rope (which had followed the ship's rope round the drum-end of the windlass) is now released, and the weight allowed to come on to the wires. The approach rope is then "turned-up" as an additional mooring and the ship is now all fast in the berth. Ship's tension wires, or other mooring lines, should also be shackled or lashed to the chain, for added security.

A GOOD A.K.D. STOPPER OR SIMILAR, BUT NOT A TOWING BRACKET SHOULD BE FITTED.

When leaving the berth, the ship's additional moorings are first detached from the chain, any slack which is in the approach rope is taken in and that rope made fast very securely. The slip wires are then slacked off slowly and carefully until the strain comes on to the approach rope (when strong winds have tightened the mooring, it will probably be necessary to put the engine slow ahead before attempting to do this). The shackles can then be taken adrift, freeing the wires, and the approach rope slacked off until the chain reaches the water – care being taken to ensure that it is not allowed to fall across the hoses. The engine is then put astern, and the rope allowed to pay out easily (with half a turn around the bitts to stretch it clear) as the ship leaves the buoy.

(Reminder – unlash the ship's rope from the approach rope before unmooring from the buoy!).

Loading: Rate of loading is between 32,000 b.p.h. and 36,000 b.p.h.

Conventional Buoy Moorings: In berths "Brega" and "Dalila" the ship is berthed with two anchors streamed out ahead and mooring lines to 5 buoys round the stern and quarters. In addition, to all buoys except No. 3 (right astern) there are attached 5.5 in. circumference steel wires, laid on the sea bed, buoyed, when not in use – in all but the most settled weather these are brought into the ship by the mooring launch, hove up and made fast on board. Vessels should have ready a good 3.5 in. rope messenger to take up these wires, and strong chain stoppers, or "carpenter's stoppers", for use when securing them.

Before the ship reaches the berth, there should be three good mooring lines ready on the after end of the main deck, two of which have been securely married in readiness to be sent away first, to warp the ship round. At least seven good ropes should be ready for running out from the poop, with lashings ready in case one rope has to be married to another. Plaited polypropylene ropes, at least 120 fathoms long and of a diameter and strength appropriate to the size of the vessel, are recommended: large manilla ropes, slow and cumbersome to handle, are definitely unsuitable for berthing under these conditions.

Synthetic ropes on automatic winches are favoured in this port, but it is recommended that they be at least 150, and preferably 200 fathoms long. The winches must be capable of being firmly locked when in the moorings – any tension feature is not permissible.

When it has been necessary to slip moorings in order to leave the berth quickly and without the assistance of the mooring launches, the Company will make every effort to recover them and to return them to the vessel as soon as possible. Normally the Company makes no charge for recovering anchors and moorings, but it reserves the right to do so under exceptional circumstances.

In the conventional buoy moorings, in order that ships may be securely moored against beam winds and with sufficient chain leading ahead to ride out heavy swells, it is recommended that they be equipped with ample chain on both bower anchors. Experience gained in sea berths suggests that the chain required on each anchor should be more than the length of the ship. In vessels of 100,000 d.w.t., for which the berths were designed, it is recommended that there should be 14 shackles (1,260 ft.) of chain on each anchor. A minimum acceptable amount of chain is 10 shackles (150 fathoms) for the safety of the ship and the company's installations. Anchor marker buoys should be used.

HOSES: The lifting, lowering, connecting and disconnecting of the cargo hoses will be done by the tanker's personnel in accordance with the advice and directions of the Mooring Master. Ship's derricks and deck winches should be capable of operating with a safe working load of 7.5 tons and preferably 10 tons. Vessels with inadequate hose-lifting equipment will be rejected. All derricks should be fitted with "preventer-guys" in addition to normal guy tackles.

The port derrick must be rigged and ready for use on arrival. In addition ships leaving SPM should have the starboard derrick ready, too, in order to facilitate the discharge of the mooring gear on the lee side.

Sets of bitts, or strong staghorns, for hanging off the hoses, must be provided, suitably located near the manifold.

On the surface, extending from the buoy (to which it is connected by a Chicksan swivel (a universal joint)), is a hose string comprised of 24 (at "Echbar") 26 (at "Alpatah" and "Chahett") 30 ft. lengths of 24 in. i.d. floating hose, culminating in a floating junction box: from the other side of this junction box emerge two strings of four lengths of 16 in. i.d. hose. The end ones – the "over-rail" hoses – are fitted with 16 in. to 12 in. ASA reduction flanges, which, after the hose has been hove aboard, are bolted or clamped to the ship's manifold.

For VLCCs, additional lengths of floating hose are inserted if necessary.

LOADING: *Zueitina Crude Oils and Debutanized Condensate:* The principal cargo loaded at Es Zueitina Terminal is Zueitina Field Blended Crude Oil, pumped in from the Company's wells, 212 km. inland, but in addition certain other grades of crude oil are loaded, namely, Zueitina Medium Crude, Zueitina Premium Crude, and Zueitina Debutanised (Stabilised) Condensate. Also loaded are Liquid Petroleum Gas products, Butane and Propane (LPG) see "LPG Loading Berth", and "Agip" Buattifel Crude Oil, from the wells of Agnezia Generale Italiana Petroli, in concession 100.

Virgin naphtha also exported.

The following pertinent data will, we believe, be of interest to tanker owners and operators, Masters and Mates, and to refinery operatives nin the discharging ports:-

Zueitina Field Blend
Average A.P.I. 40.1
Average Specific Gravity 0.8246
Pour point +35
Reid Water Vapour Pressure +5.2 p.s.i. at 100°F
H_2S less than 5 p p m.
Flash Point below 60°F
Average loading temperature on board 108°F
Barrels per long ton at 60°F 7.741

Zueitina Medium Blend
Average A.P.I. 36
Average Specific Gravity 0.8448
Pour point +85
Reid Water Vapour Pressure +5.0 p.s.i. at 100°F
H_2S less than 5 p p m
Flash Point below 60°F
Average loading temperature on board 98°F
Barrels per long ton at 60°F 7.582

Zueitina Premium Crude
Average A.P.I. 43.5
Average Specific Gravity 0.8086
Pour point +30
Reid Water Vapour Pressure +5.6 p.s.i. at 100°F
H_2S less than 5 p p m
Flash Point less than 60°F
Average loading temperature on board 108°F
Barrels per long ton at 60°F 7.922

Zueitina Debutanised (stabilised) Condensate and Debutanised Condensate:
Average A.P.I. 78.0
Average Specific Gravity 0.6706
Pour point −60°F
Reid Water Vapour Pressure 11.0 p.s.i. at 100°F
H_2S less than 1 p p m
Flash Point less than 0°F
Average loading temperature on board 75°F
Barrels per long ton at 60°F 9.555

The grades of cargoes to be loaded will affect the berthing schedule, irrespective of the chronological sequence of vessels' arrival times.

It is recommended that vessels take the maximum flow with due regard to safety, in order to both expedite the turn-round time and to obtain the bottom-weight to counteract the possible effect of local winds which frequently spring up with little warning.

Care must be taken not to overload, as there is no provision whatsoever for cargo once loaded to be pumped back ashore.

Warning is given of the danger of closing hoses against an incoming oil flow. Such a procedure may create excessive pressures which result in damage to loading hoses, sea lines, and other Terminal equipment. Vessels which ignore this warning and do in consequence cause such damage will be held responsible for all costs incurred for the renewal or restoration of the damaged equipment.

The attention of Masters is drawn to Safety Precautions, wherein they are reminded of their responsibilities for ensuring that all persons aboard their ships are cognizant with the hazards involved in the loading operations, and with the need for strict observance at all times of the Fire and Safety Rules. Debutanised Condensate, in particular, is a highly volatile fluid which must be treated with the utmost prudence.

(N.B. particulars of cargoes included in the foregoing are for information only and do not constitute a guarantee of quality).

Loading – A.G.I.P "Buattifel" Crude: Because of its high wax content – 37% – A.G.I.P. "Buattifel" Crude Oil, (hereafter referred to as "Agip") has to be maintained at a very high temperature throughout its entire transit from the wells to the Terminal system, and thence via the sea lines to the berth and the loading vessel: it will arrive on board at approximately 140°F, and the heating coils in the cargo compartments must be motivated in readiness and be capable of keeping the oil at above this temperature.

Two berths "Brega" and "Chahett", have been modified for the loading of Agip cargoes – ships may be moored in either of these berths but because of the considerable heating problem involved only one of the berths at a time can be used for loading Agip cargo. Through the submarine lines to "Brega" and "Chahett" central "gut" lines have been inserted – at "Chahett" berth where the sea line is 48 in. diameter, the gut line is of 18 in. diameter, and at "Brega" – sea line 42 in. diameter – the diameter of the gut line is 16 in. These two gut lines (which are, of course, tied in ashore with the Terminal tank and metering and pumping complex) terminate 20 ft. from the headers at the seaward ends of the sea lines. The area between the outside of the gut line and the interior wall of the sea line is called the "annulus". To the headers (from which emanate the strings of flexible hoses which are ultimately bolted to the ship's manifold connections) are fitted remote control hydraulic valves, operative from the loading station within the Terminal.

Immediately prior to the berthing of the prospective Agip loading ship, hot Zueitina crude oil is circulated from its storage tank, through the gut line, and back through the annulus, heating the entire system. Once the ship is securely moored, preparations are made to replace the hot "Zueitina" oil with hot Agip oil. (60,000 barrels is the full line content at "Chahett", 33,600 barrels at "Brega"). This process will take about four hours, and ship and shore must work in conjunction to ensure that the deballasting and the recirculation of the line with hot Agip oil are completed at about the same time. This is of vital importance, for once the line system is filled with hot Agip cargo it cannot remain in circulation for more than one hour. If the ship is not then ready to receive it, the Agip oil must be replaced by Zueitina oil, and only after this has been circulated round the line can the line be again replenished with another circulation of Agip oil. This entire process may take about 12 hours – a wastage of time which neither the Terminal nor the ship operators can afford to contemplate with unconcern.

When ship and shore are ready to begin loading, the remote control valves are opened and, at a very slow rate, the cold Zueitina oil which has been in the flexible hoses is loaded – 1,500 barrels at "Chahett", 300 barrels at "Brega".

At this point, the loading officer in the ship will transfer the cargo to other tanks to avoid intermingling of the two types of crude, for now hot Agip is entering the ship's system, from the gut line. Loading continues at a slow rate until the contents of the gut line – 6,000 barrels at "Chahett", 3,600 at "Brega" – have been pumped into the ship, after which the loading of the Agip, at normal rate, is through the annulus only. (The gut line is, at this point, filled with Zueitina oil, which will remain static throughout the loading of the Agip cargo).

With about 2,000 barrels of Agip cargo to go to completion, loading is stopped in order that the ship's loading officer may check his ullages and calculations. When, in "Brega" there are 300 barrels to go, in "Chahett" 1,500 barrels, loading is again stopped briefly: this marks the completion ashore of Agip cargo being pumped into the circuit. Now the Zueitina oil in the gut line is pumped into the flexible hose strings, so that when the required quantity of Agip oil has been loaded into the vessels, the hose strings – from the headers to the terminal flanges, disconnected from the manifold – are filled with Zueitina crude oil, which will not solidify whilst the hoses lie dormant under the sea. Similarly, the Agip crude oil in the annulus of the sea line is pumped back into the tank ashore and replaced throughout the system by Zueitina crude.

The foregoing explanation pertains to vessels loading Agip cargo only, taking the minimum essential Zueitina oil solely as a line flush. If, however, a ship requires a part cargo of Zueitina crude, it will load that after completing the Agip cargo, except for that small quantity used as the line flush at the commencement.

A.G.I.P. "Buattifel" Crude, particulars:-
Average A.P.I. 41.0 at 60°F
Average Specific Gravity 0.806
Wax Content 37%
Pour point +95°
H_2S Nil
Flash Point 68°F (ABEL)
Average Loading Temperature on board 140°F to 150°F
Barrels per Long Ton 7.9 (approximate)

(N.B. The above data is for information only and does not constitute a guarantee of quality).

LPG LOADING BERTH: *Berth, Location and Nature:* The LPG loading berth is S.S.W. of the Small Craft Harbour, inside Tre Scogli Reef. It is designed for vessels of approximately 700 ft. in length, with a cargo capacity of 32,000 cu.m. The max. permissible loaded draft (1977) is 28 ft.

The channel through the reef, between Trinity Buoy (painted yellow, quick flash green, Lat. 30° 53′ 30″ N., Long. 20° 02′ 48″ E.) and Wafeya Beacon – Scoglio Sud – (white skeleton tower, group flash, 6 every 10 seconds) runs in a 315° (T) – 135° (T) direction: it is marked by two leading marks, the front one in position Lat. 30° 53′ 16″ N., Long. 20° 03′ 42″ E., and the rear one 750 m. (2,460 ft.), 135° (T), from this position. Both marks are black steel pylons with black and red oblong grid topmarks: the front one shows at night an amber light flashing every 1.5 seconds, whilst the rear one shows an amber occulting light, the period of light being six seconds every ten seconds. A small white spar buoy, showing at night a quick flashing red light, marks the turning position for ships approaching or leaving the berth.

The loading platform is of structural steel, supported on concrete piles, and faced with heavy rubber fenders. Ships are berthed alongside four breasting dolphins (two of which are incorporated into the loading platform), with other mooring dolphins ahead and astern and on the inside bow and inside quarter. Ships approaching the berth swing round on the port anchor and about six shackles of chain – when moored, the chain is hove tight.

Only one loading line is used, with a connecting flange of 6 in. ASA 1,300 lbs. It is hove on board the ship with the ship's derrick or crane, or radial davit. A 12 in. Chicksan available for large vessels. Vapour line to "flare" only provided.

Such is the location of the berth – fully exposed to winds from most directions but sometimes protected partially by the reef from the worst effects of the swell – that on occasions LPG tankers cannot be berthed although the crude oil berths in the harbour are operational. And vice versa. Consequently, with regard to Port Closure Time, the LPG berth is regarded as a separate entity from the main harbour.

Arrival: On first contacting Zueitina Marine by VHF (Channel 13 or 16), the Master of an LPG tanker should, in addition to giving his ETA at the Terminal Light Float, inform Zueitina Marine of his last port, the intended port of discharge after leaving Zueitina, the quantity and grade of cargo required, the temperature at which he wishes the cargo to be loaded, the size of the ship's manifold connections, and whether or not he has aboard a Certificate of Discharge for the cargo loaded in Zueitina.

If the vessel is to berth on arrival, the Mooring Master will board in the close vicinity of the Terminal Fairway Buoy. If the ship is instructed to anchor, the Master should do so in the recommended anchorage.

Pratique, Customs Formalities: If the ship has been obliged to anchor, Pratique and Customs formalities may be dealt with in the anchorage. Alternatively, they may be attended to on board after the ship has berthed.

For information regarding documents required on arrival, Customs and Immigration procedure see "Documents".

Loading: For a ship which needs tank purging and cooling prior to loading, the minimum rate will be approximately 100 b.p.h. Inert gas is not provided at Zueitina Terminal – the vessel must provide inert gas for purging after previous cargoes other than butane or propane. The ship will not be loaded until the air has been purged to a maximum oxygen content of 0.5%. When loading has commenced, the minimum rate permitted by the Libyan Secretariat of Petroleum is 1,500 b.p.h. The maximum rate available is between 6,000 and 7,000 b.p.h. For "topping off", the rate can, within these limits, be adjusted to the requirements of the loading officer. Arrangements can be made in advance for the LPG plant to stop loading when the desired quantity has been metered into the ship, or alternatively, the ship's loading officer can instruct the Terminal to stop loading when he sees that the correct amount has been received aboard.

Loading operations on board are the responsibility of the ship's personnel. The Master's attention is particularly drawn to the Terms of Acceptance as detailed in the "Tanker Loading Advice" letter which he has signed, and to the "Zueitina Marine Terminal, Fire and Safety Rules".

The loading platform – abreast of the ship's manifold and within easy hailing distance – is manned at all times during loading operations, and the ship *must* maintain a continuous verbal contact with the loading operative. In addition, VHF contact between ship and loading installations must be maintained on Channel 12. In the event of any emergency – fire, leakage, parting of moorings, etcetera – the operative on the platform can stop the loading by remote control.

Unberthing in Bad Weather: Should deteriorating weather conditions necessitate the vessel leaving the berth quickly, a Mooring Master will be speedily available at all hours.

Cargo Particulars: The following data will, we believe, be of interest to Masters and Mates and operators of vessels loading LPG products:-

Propane
Average A.P.I. 146
Average Specific Gravity 0.510 60/60°F
Reid Vapour Pressure 175 p.s.i.g
Free Water Nil
Copper Strip Corrosion 1a
Flash Point less than 0°F
Average Loading Temperature −40°F (−40°C)
Barrels per Metric Ton at 60°F 12.3 (approx).

Butane
Average A.P.I. 114.2
Average Specific Gravity 0.576 60/60°F
Reid Vapour Pressure 48 p.s.i.g
Free Water Nil
Copper Strip Corrosion 1a
Flash Point less than 0°F
Loading Temperature at Ship's Request, within Ranges +18°F (−8°C) to +35°F (+2°C)
Barrels per metric ton at 60°F 10.8 (approx.)

(N.B. The foregoing data is intended for information only, and does not constitute a guarantee of quality.)

Departure: Immediately after completion of loading, the manifold connections are unbolted and the loading arms retracted. Shortly afterwards the Mooring Master will board and, with the assistance of adequate mooring boats, unberth the ship and pilot it through the reef to a safe anchorage in the outer harbour before disembarking.

When the documents pertaining to the ship's loading have been completed ashore, a clerk will take them out to the ship. (On occasions he will be accompanied by a Customs Official, boarding the ship to ensure that the seals which were put on bonded storerooms on arrival have not been tampered with before the ship has left Libyan territorial water.) It is customary for Zueitina Marine to inform the ship's Master when the documents clerk leaves the Small Craft Harbour, so that the anchor may be hove up and a lee side presented to the launch.

After the documentation formalities have been completed on board, the Master is required to pass by VHF to Zueitina Marine the official sailing time of his ship.

MEDICAL: Medical facilities are limited to emergency cases only. Under certain circumstances, however, the Terminal medical practitioner will give advice to Masters by VHF in cases where Crew members appear to be suffering from undiagnosed ailments. If it is essential for a sick person to be landed, the ship's Agent must first obtain the approval of the Government authorities.

The sick person when coming ashore must be accompanied by an officer or other responsible person able to speak English, and both the patient and the person accompanying him must be in possession of passports. (Not seamen's discharge books, which are not recognised in Libya).

BALLAST: Because of the exposed position of the sea berths, it is essential that vessels arrive with sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Experience has shown that a fair estimate of the amount required is one third of the summer deadweight. A tanker found by the Mooring Master to be insufficiently ballasted will be rejected. However, it is imperative for the safety of the ship and of the installation that deballasting should be as speedy as possible, to reduce the period wherein the ship is most vulnerable to any sudden deterioration in the weather. It is, indeed, to the advantage of everyone concerned if the ship is able to commence loading as soon as the hoses are connected, deballasting simultaneous with the loading of the cargo. In cases when it is essential to complete the deballasting before loading can start, and deballasting time in excess of 6 hours will be deducted from the lay time.

As there are at Zueitina no facilities for discharging it ashore, vessels must arrive at the Terminal with clean ballast.

The Mooring Master will inspect ship's ballast on boarding, and he has the power to reject any vessel that he deems would cause pollution in the Terminal waters. A vessel so rejected must proceed to a position over 100 miles from the coast, re-ballast, and return only when the ballast is completely clean. A new notice of readiness must then be tended, and the loading turn will be counted as from this second arrival.

The sea area round the ship shall be adequately lighted, as frequent inspection by the Mooring Master will be made during ballast discharge. Any pollution whatever, including bilge discharge, will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection – a vessel rejected on these grounds will not be re-accepted until satisfactory evidence of repairs has been certified by a qualified surveyor.

On completion of deballasting, all unused cargo connections must be blanked off, sea valves closed and lashed, deck scuppers securely plugged, and drip pans placed below the cargo hose connections. All the requirements listed on the Company's Safety and Fire Precautions Check Form must be seen to be complied with before loading is commenced.

In the event that the Company has to settle any third party claims as a result of damage to property caused by pollution attributable in any way to a vessel, the Company will have the right to reimbursement by those responsible for the vessel for all expenses incurred.

FRESH WATER: No fresh water available.

FUEL: No bunkers available.

CONSULS: None locally. See "Tripoli".

REPAIRS: There are no engineering repair shops.

SURVEYORS: Various companies of cargo inspectors perform duties at Zueitina, but must be arranged prior to vessel's arrival through U.K. or Paris headquarters. No Classification Societies at Zueitina.

CUSTOMS ALLOWANCES: Each member of the crew is allowed 25 cigarettes, or 25 grammes of tobacco (Note: No alcohol), for every day of the ship's stay in port. Other tobacco and cigarettes, wines, beers and spirits, as well as matches, arms and ammunition, and saccharine, will be retained under seal whilst the ship is in Libyan waters.

REPATRIATION: Only in an emergency can any crew member be paid off. Seamen's discharge books are not recognised in Libya. Crew members are advised to have a valid passport in their possession in case of emergency.

SHORE LEAVE: No shore leave is permitted.

WEATHER: Weather conditions in Zueitina are generally clement. The temperature during the Winter seldom falls below 10°C (50°F), and in the Summer, even at midday, is rarely in excess of 35°C (95°F). The prevailing winds are Northwesterly. During the mid-Summer months, the land- and sea-breezes phenomenon is very apparent: a Northwesterly wind springs up at about 1100 hrs. sometimes to reach near-gale force by late afternoon, then gradually dying away during the evening. At about 2300 hrs. the wind begins to blow off the land – again sometimes to a fresh breeze or near-gale – before falling away completely around dawn.

During the Spring and Autumn, and in the early Winter months, there are frequent prolonged periods of calm, tranquil weather. However, in Spring especially, and again in the Autumn, such periods may be interrupted by the onset of the "gibli", an off-shore wind which, like the "khamsin" wind in Egypt, springs up with little warning to reach gale intensity, laden with sand and dust to such an extent that visibility is reduced to a few yards.

In the Winter months, prolonged periods of strong Northwesterly gales, with very heavy seas and high swells, accompanied by frequent rain squalls, are experienced. Even after the strong winds have subsided, long, high swells may continue for several hours to prevent mooring operations. Such Northwesterly gales are usually accompanied by a sharply rising barometer, and follow the passing of a cold front, with winds from the West.

Rainfall is confined to the Winter months only. Fog is rare, though it does occasionally occur in the Spring and Summer around dawn, generally dissipating after two or three hours.

GENERAL: Vessels are advised not to have on board any articles whatsoever of Israeli origin. If anything of such a nature is found it will be confiscated and the ship be liable to a fine and possibly to a delay for further investigation.

Goods – and, in particular, alcohol and tobacco – must not be taken from ship to shore, or from ship to ship.

Being an open roadstead, vessels must keep engines in a state of immediate readiness. No repairs to main engine may be undertaken in berth. Steam or electric power must be available on deck in case adjustments to anchor cables or mooring lines are found necessary. Power must be available on ship's whistles and sirens. Ship's boats must not be lowered into the sea and detached from the falls. Swimming is prohibited. The Mooring Master (and, when applicable, his assistant(s)) assigned to a tanker, will remain on board until after the vessel has loaded, unmoored, has completed documentation formalities and has cleared the Company's installations and is safely heading for she open sea. During the time he is aboard he is to be provided with accommodation suitable for one of Master Mariner status, and with palatable meals.

SHIPMASTER'S REPORT: March 1988.

Chart: B.A. Chart No. 3346.

Documents:

8 copies Crew List.
2 copies Crew Declaration.
2 copies Ship's Manifest.
1 copy Health Declaration.
2 copies Currency List.
All Passports.
1 copy Arms and Ammunition List.
1 copy Drugs List.

No alcohol allowed in cabins, all must be place in bond and manifested. "Magazines" and "calendars" must be placed under seal.

Money in the ship's safe is to be manifested. If vessel staying in Libyan coastal waters the bond remains sealed. Customs may issue a limited amount of beer but for ship use only.

Stores must be checked to make sure that there is no produce from South Africa or Israel.

The Crew Declaration and the Crew Money List must be on Libyan forms, unless first Libyan port of call.

Approach: The harbour area was observed on radar at 24 miles and Zuetina Light was observed at 15 miles. The Light Float light is weak. Zuetina D/F was operational. Taking of soundings on approach can be of assistance.

Bengazi Radio should be contacted on 2182 kHz. when inward bound. The Station was difficult to raise but the operators were polite and spoke good English. They require vessel's destination, ETA, position, course and speed.

Zuetina Terminal Telex No. 90120130 ZUELY.

Anchorage: LPG ships anchor in the anchorage indicated on BA. Chart No. 3346. If the vessel is familiar with the Port she may anchor 0.75 miles N.W. of Scoglio Sud Reef Lighthouse.

Pilot: The Pilot/Mooring Master boards at the anchorage from a mooring launch and on departure leaves at the same position. Zuetina Marine is on VHF Channel 13. Pilots stay on board whilst the vessel is at the Offshore Mooring but does not normally stay on vessels at the LPG Berth unless the weather is poor.

Entry: Between Scoglio Sud Reef Light and Q.Fl.R. Buoy in position 30° 53.55′ N., 20° 03.40′ E. less water reported. Approach and departure to the LPG Berth is made to the South and West of the Q.R. Buoy between the buoy and Trinity Shoal. Minimum depth from the Light Float to the berth was found to be 39 ft.

Tugs: One large tug/mooring vessel of 4,500 h.p. used at the offshore moorings. 3 mooring launches of 350 h.p. used at the LPG berth, these launches also used at the offshore moorings. A total of 4 launches are available and a 5th launch is under repair.

Berth: Vessels berth starboard side to. The berth is very exposed and often closed in Winter.

Berthing and unberthing possible at night time if the weather is calm, however, night berthing and unberthing not carried out if the tanks are full.

The Radar Station at Zuetina is in the same position as Zuetina Light.

The berth flat fender face is 25 m. in length with one breasting dolphin at each end. Small vessels tend to lie on the berth flat face. The berth is aligned 104° – 284°.

There is a Q.Fl.R. Light on the N.W. breasting dolphin.

Vessels leave the berth as soon as hoses are disconnected and complete paperwork at the anchorage.

Moorings: Moorings consist of 2 head/stern lines, 2 breast lines and 2 springs at each end. The head and stern lines are sent to buoys and the breast lines to the mooring dolphins. Springs are sent to bollards on the berth.

The port anchor was let go to approximately 3 shackles when approaching the berth. The mooring launches push the vessel into the berth and hold her there until all fast.

Cargo: The Chicksan arms have been taken down and only rubber hoses are used. Liquid hose is 6 in. 300 ASA. A vapour return line is available but metered and charged. It was not used.

There is a hydraulic crane on the berth for hose handling. A ship's derrick/crane is also required and ship's crew are required to make connection.

If vessel is handling butane and propane, butane is handled first. There is about 4.5 hours' wait between products whilst the line is cleared. Normal minimum rate is about 55 t.p.h. but can go slower for short periods while cooling. The normal maximum for hose loading is 200 t.p.h. Butane chilled to about −5°C. Beware of pressure reduction on loading chilled butane.

No surveyor or terminal representative was in attendance for figures at the start or finish.

There is a terminal representative in a hut on the berth during loading with a walkie-talkie on Channel 12. Channel 12 also connects with the LPG Control Room and can be contacted if there are any queries. The Bill of Lading is on the shore figures and this compares favourably with the ships's figures.

Propane can be loaded first by prior arreangement, however, the Terminal is not keen on doing this as the line is normally left under butane.

Average Specific Gravity of butane 0.567 and propane 0.508.

Facilities: Emergency medical attention is available at the Terminal Clinic. Agent advises that there are a few fresh stores available.

Customs: Beer is sometimes allowed out of bond if the vessel is proceeding outside Libya, but alcohol will not be issued if vessel is on the coastal trade. A cigarette issue is allowed.

If vessel is on the coastal trade, make sure the "Customs Rider" is correct on departure.

Papers: All departure documentation completed at anchorage after loading. The agent attends but no representative of the terminal. Completion of documentation can take up to 3 hours. The Libyan Discharge Certificate is very important and must be properly signed at the port of discharge even if on Libyan coastal trade.

General: The oil company has flights twice a week from Tripoli. Terminal personnel often arrive and leave via Benghazi which is 2 hours by road and take Air Malta flight to Valletta for onward connections.

AUTHORITY: Zueitina Marine Terminal, Zueitina Oil Co., P.O.Box 2134, Tripoli, S.P.L.A.J. *Tel:* Tripoli 38011 (ext. 116-119 Zueitina). *Telex:* 20289, 20130 Zue Ly. *FAX:* 39109. *Contact:* Captain J. Folkestad, Marine Superintendent. M. Oun, Operations Manager.

AGENCY: All ships must have an approved Agent to look after their interests. As from 1st June, 1978, all shipping agencies in the Socialist People's Libyan Arab Jamaharaya have been superseded by one nationalised company, known as The Shahat Shipping Agency.

See "General" before first port.

Cables of estimated time of arrival sent to the Agent should be in addition to, and not in place of, those sent to Zueitina Oil Company, Tripolilibya. Total charges are 750 Libyan dinars for the first 30,000 tons summer deadweight, or part thereof, plus 2 dinars 500 Dirhams for every 100 tons or part thereof in excess of 30,000 tons, plus 2% of the total sum in revenue stamps.

NOTES

Please also advise Shipping Guides Ltd.

Lithuania

KLAIPEDA: 55.43 N. 21.07 E. (See Plan)

GENERAL: A Baltic seaport, Klaipeda is situated in a narrow strait called the "Sea Canal", which connects the Kursiu Marios (Gulf) with the Baltic Sea.

The port is open for navigation all the year round.

During strong winds blowing from directions between the S.W. and N.W., lying in the port is dangerous due to strong waves and surge. In this event vessels must proceed to sea.

DOCUMENTS:

5 copies Crew List.
2 copies Passenger List.
2 copies Ship's Stores Declaration.
2 copies Crew Effects Declaration.
2 copies Cargo Declaration.
5 copies General Declaration.
1 copy List of Ship's Certificates (date of validity).

APPROACHES: The width of the approaching channel to the port is 100 m. and depth 11.5 m. Depths of the channel at a distance of 400 m. – 600 m. from the entrance to the Sea Canal are subject to changes due to lots of sand and mud brought down from the Kursiu Marios (Gulf) by the Spring floods, in particular. The entrance to the Sea Canal is protected by the Northern and Southern moles.

The length of the fairway of the Juru (Sea) Canal from the entrance up to the Kiaules-Nugara shoal at the entrance to the Kurshiu Marios Gulf is 4 miles, width varies from 180 m. to 300 m. and the depths are from 6 m. to 9 m. at the mean water level.

The permissible drafts for vessels navigating along the Sea Canal are as follows: 10.6 m. to 8.0 m. from the canal entrance up to the Winter Harbour, but further up to the Fishing Port situated 1.5 miles and Ferry Terminal situated 2.5 miles to the South of the Dane River estuary – not more than 7.5 m. From the Fishing Port up to the Timber Harbour – not more than 5.0 m.

DEEP SEA PILOTAGE: See "Baltic Deep Sea Pilotage".

PILOTAGE: A Pilot boat usually meets a vessel at Light Buoy No. 1 (Lat. 55° 44′ N., Long. 21° 00′ E.). It carries the Pilot flag by day and lights prescribed for a Pilot boat by night.

Pilot's watch is kept 24 hours a day except in periods of dense fog and strong S.W. – N.W. winds over Force 7 Beaufort Scale.

The Master of a vessel shall order a Pilot via the Shipping Agency in advance.

The port is equipped with a coastal radar vessels' movement control system (Atlass type).

ANCHORAGE: Anchorage can be obtained in the outer roads at Receiving Light Buoy No. 1 (Lat. 55° 44′ N., Long. 21° 00′ E.).

The outer roads anchorage for tankers is situated at a distance 3.5 miles (N.W.) from Receiving Light Buoy No. 1. Depths from 31 m. – 35 m.

The holding ground is sand and clay. Anchorage in the outer roads is not safe during heavy seas caused by Westerly winds.

RESTRICTIONS: There are no restrictions for the entry to the port.

The width of the approaching channel to the port is 100.0 m. and depth 11.5 m.

MAX. SIZE: Length not greater than 193 m. and breadth unlimited. Max. permissible draft for all vessels entering the port, 10.5 m.; and for tankers loading at installations outside main port area, 10.5 m. and LOA 185 m.

RADIO/VHF: Vessels can establish radio contact through the port radio station Klaipeda Radio, operating 24 hours per day on the following frequencies:

Call sign	*Frequencies (kHz) or Channel* *Working*	*Calling*	*Type of transmission*	*Time of work*
LYK	500	500	A1	H24
	523	454	A1	H24
	4229	4186	A1	*
	12703	12554	A1	**
Klaipeda Radio	2182	2182	A3	H24
Klaipeda Radio – 1 (VIENAS)	16, 26, 27		F3	H24
Klaipeda Radio – 2 (DU) (Dispatcher of Port)	14		F3	H24
Klaipeda Radio – 15 (Penkiolika) (Oil Harbour)	30		F3	H24
Klaipeda Radio – 5 (Penki) (Pilot Control)	16, 9		F3	H24
Klaipeda Radio – 17 (Septyniolika) (VTC).	9		F3	H24

* 1900 hrs. – 0500 hrs. (UTC).
** 0700 hrs. – 1500 hrs. (UTC).

Vessel traffic in the roads and harbours is governed by the Shore Signal Station equipped with radar which gives all possible information for ensuring safe pilotage.

TUGS: Ordered by Pilot if necessary. Mooring and unmooring of large sea-going vessels can be effected with tugs' assistance only. Number of tugs to be ordered depends on the weather conditions and can be agreed upon between Master and Pilot. Master should order tugs by radio well in advance. Ship's lines to be used.

BERTHING: No specific requirements. Vessels allocated berth according to kind of cargo to be loaded/discharged and their turn.

The quays of the port with depths alongside of up to 10.6 m. are equipped to handle general, bulk and liquid cargoes. There are enclosed warehouses and concrete floor sheds.

Cranes of up to 40 tons capacity are operated along quayside and by warehouses. There are also other cargo handling facilities including floating cranes up to 50 ton capacity.

STEVEDORES: Report 12 days, 96 hours, 24 hours and then 12 hours prior arrival giving ETA, and 72 hours then 12 hours prior arrival advising perishable goods, characteristics of vessel, gross capacity, number and measurement of hatches, tween-decks, shelter-decks, description and quantity of cargo, stowage plan, heavy lifts, pieces of above 3 tons each especially indicated. Day and night loading/discharging operation, Sundays and holidays included.

MEDICAL: Master to advise by radio prior arrival if medical attendance required on board.

TANKERS: Three berths. Max. draft 10.5 m. Shore facilities for discharge of ballast.

Products handled:
Fuel oil – storage 60,000 cu.m.
Gas oil – storage 4,000 cu.m. (for bunkers only).

DENSITY: Fresh water (not affected by tide).

FRESH WATER: Most berths supply by shore installations, otherwise barge.

FUEL: Deliveries only by bunker barge.

CONSULS: Russia. Tel: 5-75-00, 9-23-35.

REPAIRS: All kinds of repairs for vessels of 10,000 d.w.t. can be effected.

SURVEYORS: Saybolt in Ventspils (Latvia).

GANGWAY/DECK WATCHMEN: Compulsory for gangway checking. Guard net and life buoy required.

OPENING/CLOSING HATCHES: Normally done by crew.

CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes and 1 litre wine/spirits.

REPATRIATION: No facilities for crew changes. Arranging any necessary repatriation at Master's request effected by Immigration Authorities.

AIRPORT: At Palanga (25 km. from Klaipeda), served by regular lines Palanga-Vilnius, Palanga-Kristianstad, Palanga-Hamburg.

TIME: GMT plus 2 hours in Winter and GMT plus 3 hours in Summer (1st April – 1st October).

POLICE/AMBULANCE/FIRE: Police, Tel: 02; Ambulance, Tel: 03; Fire, Tel: 9300, 001.

CERTIFICATES: All ship certificates required on every call.

TIDE: There are periodical alterations in the water level, chiefly due to the effects of the wind. In general, strong Westerly, Northerly, N.W. and sometimes S.W. winds raise the water and Southerly and Easterly winds lower it.

The water level usually begins to rise suddenly. It rises very quickly but lasts for a very short period of time. The max. difference between high and low level is usually observed in Autumn and Winter.

Sometimes the changes in the water level can be caused by the considerable variation in atmospheric pressure ("Seish" effect).

TELEPHONES: May be arranged on board.

SHORE LEAVE: Crew members allowed ashore with shore-pass obtainable from Immigration Authorities.

GARBAGE DISPOSAL: Ring 99414. Two small vessels "Fauna" 306 tons, and "Flora" 417 tons, and 8 containers. Cost of removal is 100 Rub./ton.

WASTE OIL DISPOSAL: See above.

CURRENCY: Local currency is Litas (Lt).
U.S.$ 1.00 = 3.96 Lt. DM 1.00 = 2.32 Lt (10th March 1994).

SEAMAN'S CLUBS: Seaman's Club, Sankryzhos 7, Klaipeda, Lithuania. Tel: 95-88, 1-64-14. Facilities: Bar, currency exchange office, duty-free souvenir shop, library, sightseeing tours of the town/out of town, tickets for performances, concerts, movies, football, basketball, table tennis and other indoor and outdoor sports games.

The Seaman's Club opens daily from 1630 hrs. – 0030 hrs.

GENERAL: In case of stormy weather or dense fog vessels are lying at Outer Roads until entering permitted by Harbour Master. In such cases vessels lying alongside berth to be shifted to Inner Road.

AUTHORITY: The Port of Klaipeda Authority, Zauerveino 18, 5813 Klaipeda, Lithuania. *Tel:* 1-45-94, 9-95-10. *Telex:* 278127. *FAX:* 5-58-62. *Cables:* Juru Uostas (Sea Port), Klaipeda. *Contact:* The Harbour Master.

Democratic Republic of Madagascar

ANTSIRANANA (Diego Suarez): 12.14 S. 49.26 E.

DOCUMENTS:

Documentation on Arrival:

Customs:
- 2 Crew Lists.
- 2 Personal Effects Lists.
- 2 Stores Lists (Bonded).

Immigration/Police:
- 4 Crew Lists and inspection of vessel and Seamen's Book.

Port Health:
- 1 Vaccination List and inspection of Derat Certificate.

Agents:
- 3 Crew Lists.
- Ship's Register to be lodged ashore.
- Clearance from Last Port.

Documentation on Departure:

An Official from the Port and the Agent visit and will wish to see:

For a Liner:
- Load Line Certificate.
- Safety Equipment Certificate.
- Derat Certificate.

For a Cargo Ship:
- Load Line Certificate.
- Safety Construction Certificate.
- Safety Equipment Certificate.
- Safety Radio Equipment.
- Derat Certificate.
- Ship's Register (held by the Agent).

After checking all these an Outward Clearance Certificate will be presented. One is then free to leave the Port, the Agent having given an undertaking that all Port dues have been paid.

APPROACHES/PILOTAGE: Tides run fast in the Orangea Pass, but seem to follow the pattern as per the Admiralty Pilot. Until experience is gained it should only be taken in the hours of daylight. There are numerous natural transit marks available to the navigator, all very clearly described in the 'Pilot'. For this reason it would be essential to take this in fine visibility. Pilot can be taken at Cape Mine but this can be difficult and dangerous in the S.E. Trade season and ships are advised that they can proceed on into the Bay right up to Port Antsiranana Point.

Harbour is large and commodious but subject to very strong N.E. winds from May to October, width of entrance 300 m. Tidal current in Roads, which may attain 3 knots. HWST 2.36 m., LWST 3.56 m., HWNT 1.63 m., LWNT 0.99 m. Pilotage compulsory for vessels of 150 n.r.t. and more. For obtaining Pilot, ETA must be sent 24 hours in advance including ship's characteristics. Course to steer: From Lat. 12° 13′ 09″ S., Long. 49° 26′ 00″ E. Entrance 275° thence beacons in line heading 230°.

ANCHORAGE: There are many splendid anchorages available in this vast Bay. Vessels can anchor 2 cables off the N.W. corner of the wharf at Antsiranana (Diego Suarez).

RESTRICTIONS: No entry for vessels or crews from: Taiwan(Formosa) and South Korea.

MAX. SIZE: No restriction except max. draft alongside 11 m.

HEALTH: Yellow fever/cholera certificates required for vessels coming from African/Indian countries. Pratique is automatic for vessels entering after calling at another port in the same country.

RADIO: Radio station is "Diego Radio".

VHF: Harbour Master's Office does not have VHF. Navy have VHF Channel 16.

TUGS: Three small tugs available (belonging to Navy and require 24 hours' notice).

BERTHING: Ocean Vessel Wharf: Length 300 m., max. depth 11 m. HW.

Coaster Quay Wharf: Length 60 m., max. depth 4.20 m.

With Pilot, vessel can come alongside day or night.

CRANES: Two port cranes, only used for small coasters. 1×5 tons and 1×2 tons.

STEVEDORES: Advise before 0700 hrs. in order to commence the same day and before 1700 hrs. in order to commence next day at 0600 hrs. with maximum gangs.

Working Hours: 0700 – 1100 hrs., 1300 – 1700 hrs. Overtime Working: 0600 – 0700 hrs., 1100 – 1300 hrs., 1700 – 0600 hrs. No half shifts.

MEDICAL: Difficult to find medicines. In case of serious illness hospital facilities available.

TANKERS: See "Berthing". Discharging rate 200 cu.m.p.h. with flexible hose. Loading rate 30 – 50 t.p.h., depending on ship.

FRESH WATER: Available.

FUEL: Not available.

CONSULS: French Consul.

REPAIRS: All types of deck and engine repairs can be carried out.

DRYDOCK: *Shipmaster's Report:* 1975.

Length overall	199.05 m.	653.00 ft.
Subdivided into sections	128.96 m. 70.09 m.	424.00 ft. 229.00 ft.
Breadth at Bottom	28.40 m.	93.00 ft.
Breadth at Coping	36.60 m.	120.00 ft.
Depth at sill and blocks at MHWS	10.42 m.	34.40 ft.

Yard Services: Nothing was too much trouble for any of their staff attending this ship. Power was a bit of a problem but they did everything to help. Fire mains, fresh water, cranes were all good. Toilets and shower-rooms were more than adequate especially after we were given our keys and had them cleaned.

Workshops: A modern well equipped yard with every conceivable service from an iron foundry to upholstery shops. A clean, well kept set of shops including the building of small craft. The Engineers of this ship were very favourably impressed with the shops and technical services.

From time to time, the yard meet with certain material supply difficulties to satisfy full needs for ship repairs. It is recommended that Owners interested in docking their vessels at this yard study this matter before contracting.

Firms Address: Societe d'Exploitation pour la Construction et la Raparation Navale, B.P. 135, Antsiranana, Madagascar. Tel: General Manager (Home) 221-70, (Office) 226-84, Central 212-65 and 222-98. Telex: 93 103. Cables: Secren, Diego Suarez.

GANGWAY/DECK WATCHMEN: Trade Union on the spot can supply.

OPENING/CLOSING HATCHES: Usually by ship's crew.

SURVEYORS: There is no Lloyd's Surveyor in the country. Often when required Lloyd's Representative flies up from Durban. Sometimes it is agreed that the resident Bureau Veritas Surveyor will subsititute. M. Ralibera Henri in Tananarive is the principal B.V. Surveyor in Madagascar. M. Ralibera received agreement from his head office in Paris to act as non-exclusive surveyor of N.K., N.V. and local insurance company.

CUSTOMS ALLOWANCES: (Tobacco/wine, spirits) Quantity permitted to be held out of bond is only for the personal consummation of each crew member.

CARGO GEAR: Load/discharge effected by ship's gear, no heavy lift cranes available.

REPATRIATION: For crew changes Entry-Visa is required and repatriation can be carried out according to Harbour Master's Certificate and Immigration permission.

AIRPORT: AirMad Services are available each day to connect with the international Air France flights to Orly from the local airfield about 8 miles from the town.

TIME: Local time is GMT plus 3 hours.

HOLIDAYS: Sunday, but can be worked on overtime from 0600 hrs. to 1400 hrs.

New Year's Day, Commemoration of 29th March 1947, Easter Sunday and Monday, May 1st, Ascension Day, Whit Monday, Independence Day (June 26th), Assumption BV Mary (August 15th), All Saints' Day (November 1st), Christmas Day, Anniversary of the Democratic Republic of Madagascar (December 30th). No work possible on these holidays. Overtime rates for all other holidays.

TELEPHONES: No telephones placed on board.

SERVICES: Facilities for compass adjusting, radar and radio repair by Secren (See "Drydock").

BANKS:

Bankin'Ny Indostria (BNI), Angle Rue de France et Rue Colbert, B.P. 4., Antsiranana, Madagascar. Tel: 221-46, 221-52.

Banky Fampandrosoana Ny Varotra (BFV), (Banque Nationale Pour Le Commerce), Rue Richelieu, B.P. 18. Tel: 211-89.

Bankin'Ny Tantsaha Mpamokatra (BTM), (Banque Nationale Pour Le Developement Rural), Rue Richelieu, Antsiranana, Madagascar.

STORING: Local stores can be delivered directly on board even during loading/discharging, by the ship chandler. Agent will arrange Customs formalities.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

SPECIAL PORT REGULATIONS: See "Restrictions".

REGULATIONS: Any repair work involving even small temporary repairs only with Harbour Master's permission. Using vessel's lifeboat subject to Harbour Master's and Customs permission. Landing of foreign currency is strictly prohibited. Possession of local currency must be justified.

DELAYS: None.

AUTHORITY: Service Provincial de la Marine Marchande, au Port, P.O.Box 109, Antsiranana, Madagascar. *Tel:* 211-33.

AGENT: SCAC Transport International, Box Poste 384, Antsiranana, Madagascar. Tel: Antsiranana 21327 and 21549. Telex: 93102. Cables: Freight Antsiranana.

FORT DAUPHIN: 25.02 S. 47.02 E.

DOCUMENTS:
- Manifest of Cargo for discharge.
- Manifest of Cargo in transit.
- Ship's Stores List.
- List of Passengers Landing.
- Crew List.
- Franchise Certificate (for mail-carrying vessels).

PILOTAGE: The port is an open roadstead and pilotage not required.

ANCHORAGE: In depths of 8 m. Vessels anchoring are charged with port dues.

RESTRICTIONS: Port is normally used by coastal trading vessels. In case of liners handling cargo exceeding 150 tons, special permission required which is obtained by Agent.

HEALTH: Pratique should be requested from the Health Department, Tel: 36.

RADIO: Fort Dauphin Radio, call sign 5RD, between 0400 and 1630 hrs. GMT on following frequencies: 458, 500, 2182 and 2712 kHz.

TUGS: None available.

BERTHING: There are no berths alongside. Vessels work cargo at anchorage.

There is a crane on the dock with a capacity of 3 tons.

STEVEDORES: Arranged by the Fort Dauphin Lighterage Company. Advance notice of ETA required to arrange gangs. Average loading/discharging rate is 10 tons per hold per hour.

MEDICAL: 2 hospitals available in the town.

TANKERS: 1 buoy berth for tankers.

FRESH WATER: No water barge. Only small quantities can be supplied in emergency.
FUEL: Not available.
CONSULS: France.
REPAIRS: Only facilities available for repairing lighters.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Opening and closing hatches carried out by stevedores.
CUSTOMS ALLOWANCES: 1 carton of cigarettes per man. No alcohol.
REPATRIATION: No facilities for effecting crew changes.
AIRPORT: Situated 5 km. from the port, 3 regular flights per week.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Days on which work is normally carried out with overtime payment: Easter; Ascension Day; Whitsun; Assumption; Christmas.

Official holidays on which work can be arranged by special permission: 1st January; 1st May; 26th June (Independence Day); 30th December; Festival of the Republic.
FIRE/POLICE/AMBULANCE: Police Tel: 49; Fire 19; Ambulance 36.
SHORE LEAVE: Not permitted.
AUTHORITY: Service des Ports' Phares et Balises, Tananarive.

AGENT: SCAC Transport International, BP 425, Tananarive, Madagascar. Tel. 20631. Cables: "Freight Tananarive". Telex 22251. Fax: 233730.

MAHAJUNGA (Majunga): 15.44 S. 46.20 E.

DOCUMENTS:
List of Crew Members.
List of Passengers.
Customs Documents.
Health Documents.
Manifests.
Bills of Lading.
Ship's papers.
PILOTAGE: Vessels requiring Pilot must apply by cable to Mahajunga Harbour Master's office at least 24 hours before arrival. Pilot embarks at Narcissus buoy.
ANCHORAGES: Indicated to Ship's Master by cable from Mahajunga Harbour Master's office.
RESTRICTIONS: Ships can enter day and night. Max. draft allowed 10 m.
MAX. SIZE: No restriction except for max. 10 m. draft.
HEALTH: Pratique automatic when vessel comes from a Madagascar port. Pilot is health agent.
RADIO: Radio Mahajunga.
STEVEDORES: Vessel informs Agent by telegraph 24 hours in advance of number of gangs needed.
MEDICAL: Hospital available.
TANKERS: 1 berth, max. draft 10 m.
FRESH WATER: Unlimited drinking water.
CONSULS: French and Greek Consulates.
REPAIRS: Minor repairs only.
CERTIFICATES: See "Toamasina".
CUSTOMS ALLOWANCES: See "Toamasina".
REPATRIATION: All facilities available.
AIRPORT: Served by regular airlines; 7 km. from town.
TIME: GMT plus 3 hours.
HOLIDAYS: Catholic and official holidays. Commercial transactions possible on public holidays.
POLICE/FIRE/AMBULANCE: Police 24–85; Fireman 13; Hospital 29–15.
AUTHORITY: Harbour Master.

AGENT: SCAC Transport International, B.P. 256, 401 Mahajunga. Tel. 22070, 22387 and 22008. Telex: 62710. Cables: Freight Mahajunga.

PORT ST.LOUIS: 13.05 S. 48.50 E.

SHIPMASTER'S REPORT: August 1990.

CHARTS: B.A. Chart No. 3873 and French Chart No. 5404.
DOCUMENTS:
Clearance from last Port.
1 Health Declaration.
1 Vaccination List.
7 Crew Lists.
4 Personal Effects Declarations.
2 Stores Lists.
1 Passenger List.
1 Arms and Ammunition List.
1 Narcotics List.
1 Parcel List.
4 Cargo Manifests.
PILOTAGE/APPROACHES: The port is an open roadstead and pilot is not available and also not required.

The approach to the anchorage with radar presents no difficulties. At night time without a radar, however, it is difficult, because of the non-existence of any buoys or lighthouses.
ANCHORAGES: As per Port Control's advice, the vessel anchors in position 13° 04.6′ S., 48° 45.7′ E., about 3.5 miles off the closest shore line, in about 9 m. of water. The holding ground is soft mud and sand, vessel did not drag.
RESTRICTIONS: No information available.
MAX. SIZE: No information available.
HEALTH: Pratique is normally granted after doctor visits the vessel.
RADIO: All local W.T. stations are reported to be inoperative. Cape Town Radio (ZSC) was used to relay ETA messages, which seemed to have arrived in time.
VHF: Channel 16 is used by Port Control and agents.
RADAR: No port radar services available.
TUGS: There are 3 small tugs of about 500 h.p., used for towing the barges to the anchored vessel. One tug is permanently under repair.
BERTHING: No berthing. There are two small tide bound jetties of 100 m. length each, which are used to load and unload the barges.

It is said that there are 12 barges, but 7 barges are in a very bad state of repair. The capacity of each barge is about 100 tons.
CRANES: It is said that there is 1 crane of 20 tons, and 2 cranes of 3.5 tonnes, on the jetties. One crane is under repair.
BULK CARGO FACILITIES: No facilities. Export products are raw sugar and molasses. Sugar is brought to the vessel in bags, hauled aboard with slings and nets, and poured into the holds through openings between hatch covers or pontoons, by cutting the bags.
STEVEDORES: Available in sufficient numbers at all times and on very short notice. Stevedores in port work in two shifts (0600 hrs. – 1800 hrs. and 1800 hrs. – 0600 hrs.).
MEDICAL: It is said that there is a hospital with all facilities.
TANKERS: No information available.
DENSITY: 1025.
FRESH WATER: It is said that fresh water can be supplied by barge. The cost is about U.S.$ 3.00 per ton.
FUEL: No information available.
CONSULS: There are no consuls locally.
REPAIRS: No information available.
DRY DOCKS: None.
SURVEYORS: None available.
GANGWAY/DECK WATCHMEN: Not compulsory, and also not necessary.
HATCHES: Opening and closing of hatches is normally carried out by crew.
CUSTOMS ALLOWANCES: No restrictions, stores are not sealed. 1 Customs Officer stays on board.
CARGO GEAR: Ship's gear is used.
REPATRIATION: There is a small local airport at Sirama, 7 km. away from Port St.Louis, which is connected with daily flights to Antsiranana (Diego Suarez), 134 km. away, and from there via the international airport of the Capital.
AIRPORT: See "Repatriation".
TIME: Local time is GMT plus 3 hours.
HOLIDAYS: See "Antsiranana" (Diego Suarez).
POLICE/AMBULANCE/FIRE: No information available.
EMERGENCY CO-ORDINATING CENTRE: No information available.
TELEPHONE: No information available.
SERVICES: No information available.
BANKS: Banque Tantsaha Mpamokatra BTM at Sirama.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: ID cards are not issued.
REGULATIONS: No particular or unusual regulations.
DELAYS: Delays are normally caused when tugs cannot bring barges, due to the tide bound jetty. Also tugs are not powerful enough. Due to the delays, an average loading rate of about 750 tons per working day (2 gangs) was experienced.
GENERAL: 6 persons are accommodated on board. Since most stevedores are also staying on board, a fire burning portable stove for feeding the stevedores, as well as a portable water tank, is put on board. Tugs and barges are in a poor state. Robberies were not reported.
AUTHORITY: See "Antsiranana" (Diego Suarez).

AGENT: Local Agent: Direction d'Etablissement at Sirama.

Main Agents: Societe Siramamy Madagascar, Rue de Belgique, Boite Postale 1633, 101 Antananarivo, Madagascar. Tel: 252.35. Telex: 22372. Cables: Sirama Antananarivo.

TOAMASINA (Tamatave): 18.08 S. 49.22 E. **(See Plan)**

1 Full Set Cargo Manifest.
Health:
International Maritime Certificate of Health.
List of Passengers Disembarking.
Transit Passengers List if any.
Derat Certificate.
Crew List.
Immigration:
List of Passengers Disembarking (required on arrival and before ship's departure).
Transit Passenger List if any.
4 Copies Crew Lists.
Customs:
Ship's Register.
3 Stores Lists.
3 Crew Effects Lists.
3 Crew Lists.
5 Full Sets Cargo Manifests.
3 Lists Passengers Disembarking and Transitting if any.
Port:
4 Full Sets Cargo Manifests.
4 Dangerous Cargo Lists.
Agents:
2 Full Sets Cargo Manifests.

PILOTAGE: Compulsory. Telegraphic address: Porttave Toamasina. Telex: 55619 Port Mg. Ships advise Agents hour of ETA. Pilots informed by Agents. Due to the extension of breakwater, the South Pass is closed to deep-sea ships, except small coastal vessels. For large vessels, the pilot boat waits on the East Pass on line 277° True or range approximately 3.3 miles S.S.E. of Prunes Island Lighthouse.

The pilot boat is fitted with a small portable VHF set (Channels 16, 12, 9 and 6) but its effective range is only about 5 miles.

ANCHORAGES: No special anchorage. If no berth available on ship's arrival, Pilots put ships at best anchorage, according to draft and length of ship, between Reef and shore.

Acts of piracy have taken place at the anchorage.

RESTRICTIONS: Ships enter and sail day and night any time. Max. tide only 3 ft. However, tankers berth in daytime only between 0500 hrs. and 1500 hrs.

MAX.SIZE: For Roads, max. length about 200 m. (concerns only passenger ships). For cargo vessels max. length 180 m.; max. draft 31 ft. 2 in. (9.5 m.).

For tankers, max. LOA 230 m., max. beam 31 m., max. draft 12.20 m. in salt water. Distance from stern to manifold 110 m.

HEALTH: Quarantine message sent to Agents who inform Health Service. "Q" flag must be hoisted during daytime or red over white light at night time if health satisfactory. Master presents Maritime Declaration of Health. Health Officer and Immigration board at Quarantine Anchorage.

RADIO: Toamasina Radio, call sign 5RS.

VHF: Toamasina Radio – Channels 16, 26 and 27.

TUGS: 1 tug of 1,750 h.p. available to assist berthing. One tug 200 h.p. for towing fresh water barge.

BERTHING: 4 berths for deep-sea ships and 2 berths for coastal ships. Ships moored at berth in order of arrival and according length and draft. Mooring has to be very strong, due to swell that may sometimes enter harbour when S.E. trade winds are strong, or if cyclone in vicinity. Swell is so dangerous that ships have to go to anchorage or put to sea until weather improves.

CRANES: Mobile crane of 45 tons available.

STEVEDORES: ETA to Agents must give hatches, tonnages, and all information about cargo.

Working hours: 1st shift 0700 – 1400 hrs., 2nd shift 1400 – 2100 hrs. On Sundays there is one shift 0700 – 1400 hrs. at overtime rates.

MEDICAL: Preferable to inform Agents in advance. All hospital facilities available.

TANKERS: 1 refinery imports crude oil and exports fuel and refined oils. Tankers moored using anchors forward, and moorings aft.

Diameter of lines 12 in. No slop discharge facilities. If tanks are to be washed, slops must be discharged outside harbour.

Shipmaster's Report: A brief description of the berthing manoeuvre is as follows:

About 350 m. from the berth, let go starboard anchor and swing around to starboard with the assistance of a tug, slacking the cable all the time. As vessel completes swing, let go Port anchor, then slack down both anchors. Vessel usually finishes up with about 9 shackles on each anchor. Aft, vessel secures with 4 lines from the starboard quarter to the buoy and 4 lines from the port quarter to the quay. The mooring operation takes about 2.5 hours and unmooring about 1.5 hour.

Facilities:

1. One 12 in. rubber hose, connected always from the starboard side. You can expect 4-5 hours for connecting up the hose and about 2-3 hours for disconnecting.
2. The shore tanks are situated about 5 km. from the vessel, and have a total storage capacity of about 100,000 cu.m. The tanks are located about 4 m. above sea level, the heights of the tanks being approximately 13 m.
3. The main pipeline is 20 in. diameter by 5 km. long.
4. Maximum back pressure permitted is 6-7 kg. However, in view of the length and size of the line it is very difficult to obtain such a pressure, even with all 3 pumps going all out. Understand from the refinery Superintendent that maximum back pressure so far attained was 4 kg. The back pressures are monitored by gauges fixed on the manifold and on the quay.
5. The maximum draft permitted at the Tanker mooring is 40 ft. Fully laden tankers arriving can berth only in daylight hours. However, 24 hour sailing is possible.
6. The cargo discharging operations are as follows: The main pipeline is kept constantly filled with bunker fuel and has a capacity of approximately 1,000 cu.m. After connecting up vessels commence discharge of their crude. The bunker fuel in the line is thus pushed back and stored in a separate tank ashore. The vessel then continues to discharge her full cargo. After completing discharge, all tanks are inspected and a dry certificate obtained. The refinery then pushes back the pipeline crude (1,000 cu.m.) and about 1,200 cu.m. of bunker fuel, which must be stored on the ship in separate tanks. Thereafter, the vessel must discharge all crude, and finally the bunker fuel.

   Thus the pipeline is constantly kept filled with bunker fuel.

   The drawbacks to the vessel are obvious. 3 individual stripping operations are involved viz. stripping the crude during completion of discharge, stripping of pipeline crude stored in the ship and stripping of the bunker fuel.

   Note: Capacity of shore pumps (when transferring oil back to ship) is 800 t.p.h.
7. Communications: A telephone is installed aboard for contact between ship and shore. This however, never seems to be at its best when you need it most. Other difficulties are the language barrier (French being spoken). Notwithstanding, the slow rate of discharge obtainable, helps to offset in part the lack of communications.
8. Out-turn quantities: It is understood that these are checked by sounding shore tanks.
9. Bunkers are available on 24 hours notice. Range Redwood 1,000–1,500 seconds.
10. Diesel oil is available, however, as the supply barge has been out of commission for sometime now, supply cannot be depended upon.
11. Fresh Water available.
12. Connection and disconnection of the cargo pipeline is undertaken by the refinery personnel.

DENSITY: 1023.5.

FRESH WATER: Delivered by water-boats at rate of about 100 t.p.h.

FUEL: Available alongside. Gas oil and diesel oil at 70 t.p.h. Fuel oil at 110 t.p.h.

FIRE PRECAUTIONS: 1 fire-boat stationed near tankers.

CONSULS:

Denmark Tel: 2615	Great Britain Tel: 2680
Netherlands Tel: 2632	Norway Tel: 2549
France Tel: 2721	Sweden Tel: 2136

REPAIRS: Only small repairs possible.

GANGWAY/DECK WATCHMEN: Recommended. Very low cost.

OPENING/CLOSING HATCHES: Booms always operated by crew. If hatches are Macgregor type, by crew; otherwise by stevedores.

CERTIFICATES: Safety Certificates (3), Derat or Exemption Certificate, Register, Load Line Certificate.

CUSTOMS ALLOWANCES: 200 cigarettes. Wine/Spirits, 1 opened bottle.

REPATRIATION: Possible, arranged by Agents.

AIRPORT: Served by regular airlines. 1 flight a day by Air Madagascar to Tananarive and 4 to 6 flights a week from Tananarive to Africa and Europe.

TIME: Local time GMT plus 3 hours.

HOLIDAYS: 13 holidays per year. Cargo work cannot be arranged on holidays but can be on about every second Sunday.

TELEPHONES: 2 connections at 2 berths used for passenger ships, but may be requested by other ships.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Only seaman's papers required.

GARBAGE DISPOSAL: The Port Authority provides a collection service on request.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Apostolat de la Mer, P.O.Box 98, 16 Rue de la Reunion, Toamasina. Tel: 324-11.

CURRENCY: Malagasy Franc (FM).

DELAYS: Not fixed. When all berths occupied, ships wait at anchorage.

GENERAL: Small tugs and lighters for ships operating on roads. One port launch for crews of ships at anchor.

DEVELOPMENTS: New quay recently constructed.

SHIPMASTER'S REPORT: January 1994.

Approaches: We kept about 10 miles off-shore until abeam of the harbour breakwater and then altered course for the pilot boarding ground.

Navigational Aids: Ile Aux Prunes Light is operative and has a maximum range. Leading marks are white stone buildings and clearly visible from seaward. They are in line 277° (T) and give the passage through Passe de L'Est. We entered at daylight, but could only ascertain that the rear marker was lit.

Shoal: When entering and leaving, we passed over two pinnacles some 5 m. shallower than the surrounding water, estimated at 23.0 m. depth. These 2 points are very close together and are on the leading line, with Ile Aux Prunes Lt. bearing 005° (T).

Pilotage: Despite information to the contrary, in the Pilot Books and Port Information Book, the Pilot does not board at the position marked outside the reef. Vessels have to enter through the reef and pick-up the Pilot inside. Standard of piloting was good.

Anchorage: Either outside the reef in depths of 22 fathoms upwards or inside in depths of 15 fathoms. The inshore anchorage is preferable, as vessels are sheltered from the swell and the prevailing S.E.'ly winds.

Berth: The tanker berth is an extension of the general cargo berth with the last 40 ft. sealed-off by a security fence. The sterns of cargo vessels on this berth are close to the shore manifold, and there are no smoking restrictions.

The Mediterranean moor is used, with the vessel approaching the quay head-on and letting-go the starboard anchor when approximately 3 ships length off the berth. The anchor is slacked out to 5 shackles, whilst the vessel is turned with the assistance of 2 tugs, and the port anchor is then let go (a second Pilot controls operations from the Fo'cs'le). Both anchors are then paid out, with the engines on slow astern until the mooring ropes can be run from the stern. 3 or 4 lines are then run to the quay. The first pair being crossed and the vessel is finally secured some 70 m. from the quay.

As we were to find out, this is not a very safe berth, as the prevailing winds are on the port quarter, and the stern falls off to starboard. This means that the starboard ropes lead across the stern and are subject to chafe. If possible, these ropes should be lead from right aft. Should the moorings part, then the stern would swing towards the vessels on the Container Terminal, without sufficient room to clear them. If problems do arise, the Port Office can be contacted by VHF, call "Securite", but whether the tugs would be available in the middle of the night is not known.

Communications: Port Office VHF is bad, and even at 5 miles the transmission is broken up. The pilot boat has a much better set and normal communication is possible.

Discharge: For refined products, a 6 in. floating hose is led from the quay to the port manifold. The hose is in poor condition and maximum pressure allowed is 5 Bar at the manifold. This gave a discharge rate of 220 t.p.h. (which was considered to be good by the local representative).

Communications from ship to shore during pumping operations are not satisfactory, the normal method being shouting and whistling from the quay until someone's attention is attracted onboard.

Prior to disconnecting, a water flush is required, followed by pumping air for 5 minutes. This is to reduce the weight of the pipeline when lifting back onto the quay.

Facilities: A launch service is available for transporting crew and officials to and from the quay. The trip is of about 2 minutes duration, and each trip costs U.S.$ 70.00.

Water is available by barge with capacity 80 tons, and appears plentyful.

Currency: Malagasy Francs, at 1977 to U.S.Dollar.

Max. Draft: Tankers 12.2 m. Cargo 10.2 m.

Messages: Send Pratique and ETA via Agency, who will pass on to appropriate officials.

AUTHORITY: Societe d'Exploitation du Port de Toamasina, B.P. 492, Republic of Malagasy. *Tel:* 321-55/56, 327-60/68/69/71. *Telex:* 55619 Port Mg and 55623 Port Mg. *FAX:* 33558.

AGENT: SCAC Transport International, Rue du Capitaine-Shoel, BP 411, Toamasina, Madagascar. Tel. 5320-48; 5320-49; 5326-80; 5326-81. Telex: 55610/55611/55628. Fax: 532910. Cables: "Freight Toamasina".

NOTES

Please also advise Shipping Guides Ltd.

Madeira

FUNCHAL: 32.38 N. 16.55 W. (See Plan)

DOCUMENTS:

Maritime Declaration of Health.
5 Crew Lists.
12 Lists of Passengers Finally Landing.
5 Lists of Passengers in Transit.
1 List of Stores and Provisions, including Deck and Engine Stores.
1 List of Contents of Shops on board.
6 Copies of Manifest of Cargo for Discharge.
2 Copies of each B/Lading of Cargo for Discharge.
1 Copy of Manifest of Cargo in Transit.
1 List of Passengers Finally Landing, visaed by Portuguese Consul at original port.

All other entry and clearance documents are arranged by the Agents.

PILOTAGE: Vessels should radio their ETA to Agents who order Pilot. 24 hours' notice requested. Pilot launch flies "H" flag during day. Exhibits bright white light over red at night. To request Pilot on approach by day fly international "G" flag, or give 2 long and 1 short blast on whistle. At night flash 2 long 1 short. For vessels berthing alongside Pilot boards in bay; for vessels anchoring Pilot does not board but pilot launch indicates where vessel should anchor. Pilot boat equipped with VHF, Channel 16 (calling) and Channel 6 (working).

ANCHORAGE: Permitted anchorage within 800 m. – 900 m. East from end of breakwater or 300 m. – 500 m. South of breakwater within a limit of 400 m. from shore.

RESTRICTIONS: None.

MAX. SIZE: No limit to size of vessels which can anchor, but all anchorage positions should be indicated by pilot launch. For vessels berthing alongside quay max. permissible length 990 ft. max. draft 36 ft. Oil carriers discharge at buoys at Praia Formosa 3 miles to West of Funchal. Max. length of oil tankers than can berth at oil discharge buoys 665 ft. max. draft 36 ft.

HEALTH: Free Pratique may be arranged by Master sending wireless message addressed "Port Doctor Funchal" – "Request Free Pratique arriving . . . from . . . sailing to . . . number passengers . . . landing . . . number passengers in transit . . . number of crew . . . all well. Master".

In event suspected disease or fever on board Master should wireless either Port Doctor direct or to ship's Agents, who will inform Port Doctor. The Master will then be instructed what further action he is to take.

When vessel other than of national flag arrives after calling at another port in same country usual procedure applies, i.e. Masters' radio for Free Pratique or Pratique granted by Doctor visiting in bay.

RADIO: Maderia Radio Station, call sign "CUB" 500 kHz. Same station normally used by Agent when communicating with vessel.

TUGS: Two tugs each of 1,000 h.p. – 1,100 h.p. (bollard pull 18 tons) are available.

N.B. Vessels up to 2,000 gross tons are not obliged to use tugs.

Vessels of between 2,000 and 15,000 gross tons are obliged to use 1 tug. Vessels over 15,000 gross tons are obliged to use 2 tugs.

BERTHING:

Quay No. 1 Length 139 m., depth 6 m.
Length 41 m., depth 7 m.
Length 19 m., depth 8.5 m.
Quay No. 2 Length 425 m., depth 11 m.
Quay No. 3 Length 347 m., depth 11 m.

CONTAINER FACILITIES: Container Terminal: Length 260 m. Depth 7.0 m.

Equipment: 1 Crane, 25 tons at 20 m.
1 Crane, 30 tons at 30 m.
1 Mobile Crane, 22 tons at 20 m.
1 "Travelift" of 45 tons capacity.
4 Container Handling Cranes with extendable spreaders for 20 ft., 30 ft. and 40 ft. containers.

STEVEDORES: When ships require labour, Agents must be notified before 1600 hrs. on working days and on Sundays and holidays before 1100 hrs., after these hours labour not available for last minute engagement. On Christmas Eve work stops at noon, even if ships loading or discharging. No labour available Christmas Day, New Year's Day or Easter Sunday.

Grain cargoes can only be worked from 0800 hrs. to 2400 hrs. daily, including Sundays, and a maximum of 4 gangs only can be worked simultaneously.

Bulk cargoes such as potash and fertilisers need to be bagged on board. Receivers supply the bags – and this generally applies to grain. Bulk cement, clinker and granulated plaster is discharged by grabs.

MEDICAL: Advance notice is required by Agents for any medical attention required. Hospital facilities available. No inoculations required.

TANKERS: Diameter of connection of discharge lines 8 in. into pipelines of 12 in. diameter for black fuel and 10 in. diameter for white fuel. 1 anchorage buoy berth with max. draft of 36 ft.

DENSITY: Salt water.

FRESH WATER: Available at all berths. Order through Agent. Approximate delivery rate 60 t.p.h.

FUEL: Fuel oil available from 3,500 seconds Redwood 1 to 200 seconds Redwood 1. Also marine diesel and gas oil. 12 hours' minimum notice required.

FIRE PRECAUTIONS: At discharging buoys usual non-smoking precautions.

REPAIRS: Repair yard available which can carry out most engine repairs on board except removing or replacing main engines. Hull work limited to removing riveting or replacing hull plates above water line, electric and oxy-acetylene welding. Most electrical work can be effected but notice required in regard to materials necessary. Foundry where castings can be made up to one ton weight.

DRY DOCKS: None.

CONSULS:

GANGWAY/DECK WATCHMEN: Gangway watchmen recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, Wine and Spirits: Moderate supplies allowed for personal use during ship's stay.

CARGO GEAR: No specific local safety regulations. Vessels discharging must provide strops, slings and nets. Lifts over 5 tons must be effected by ship's gear.

10 mobile cranes are available.
1 crane – 6 tons at 12 m., 3 tons at 24 m.
3 cranes – 5 tons at 20 m.
3 cranes – 3 tons at 12 m.
1 crane – 15 tons at 13 m.
1 crane – 45 tons at 3 m.
1 crane – 20 tons at 3 m.

A floating crane is available which can lift up to 27 tons from the water line up to 8 m. This same crane can lift up to 20 tons from the water line to 12 m.

REPATRIATION: Limited facilities for crew changes. Necessary repatriations can be made.

AIRPORT: At Santa Cruz, 20 km. East of Funchal. Service between Funchal and Lisbon operated by national airline TAP, 19 flights weekly Funchal/Lisbon/Funchal.

TIME: GMT maintained throughout year.

HOLIDAYS: New Year's Day (totally unworkable); Easter Sunday (totally unworkable); Municipal Holiday (local) (workable, 50% overtime); Camoes Day (workable, 50% overtime); Corpus Christi (workable, 50% overtime); Assumption (workable, 50% overtime); Proclamation of the Republic (workable, 50% overtime); All Saints (workable, 50% overtime); Independence of Portugal (workable, 50% overtime); The Immaculate Conception (workable, 50% overtime); Christmas (totally unworkable).

Workers' Day, Portugal Day and Good Friday are also totally unworkable.

Saturday is an ordinary working day. December 24 (workable up to 1500 hrs. only).

POLICE/AMBULANCE/FIRE: Police 222022; Ambulance 222122; Fire 221163.

SHORE LEAVE: All crew visiting shore must be in possession of special Landing Card, plus Identity Cards, Discharge Books or Passports, which must be shown to Immigration Officer at gangway. Crew Landing Cards must be stamped by Immigration Officer before crew can proceed ashore.

IDENTIFICATION CARDS: Required.

GENERAL: There is a marina for 200 craft with depths between 3 m. and 6 m.

AUTHORITY: Capitania do Porto do Funchal, 9000 Funchal, Madeira.

Direccao do Porto do Madeira, Av. Sa Carneiro, 9000 Funchal, Madeira. *Postal Address:* Apartado 246, 9003 Funchal, Madeira. *Tel:* 221041, 225281, 225288. *Telex:* 72290 Dipmad P. *FAX:* 220196, 221042. *Contact:* Menezes Vasconcelos, Port Director.

NOTES

Please also advise Shipping Guides Ltd.

Malaysia

BINTULU, Sarawak: 03.16 N. 112.59 E. (See Plan)

PORT LIMITS: Following the arc of a circle with a radius of 10 nautical miles radiating from Tanjong Kidurong Point in position Lat. 03° 16.1′ N., Long. 113° 03.20′ E.
Fairway Buoy: Lat. 03° 16.35′ N., Long. 112° 59.0′ E.

DOCUMENTS: The required documents are:
4 copies Last Port Clearance/Shipping Arrival Report.
1 original Maritime Declaration of Health.
6 copies Crew List.
4 copies Voyage Memorandum.
6 copies Passenger List.
3 copies Vaccination/Cholera List.
3 copies Personal Declaration.
1 original Bonded Stores List, Ex-Customs.
5 copies Provisions List.
3 copies Engine Stores List.
3 copies Arms and Ammunition List.
3 copies Transit Manifest.

APPROACHES: The approach channel is a dredged channel 5.7 km. long, 240 m. wide with a depth of 15.0 m. at Chart Datum and is provided with leading lights and buoys. All navigational aids are reliable. For prominent points refer to B.A. Chart 2100. Current runs at 2 knots and tidal range is 2.2 m.

PILOTAGE: Pilotage is compulsory and available day and night.
Notification of Arrival: 24 hours notice of ETA required.
LNG/LPG/Ammonia vessels to give 72 hours notice.
Pilot Boarding Ground: Lat. 03° 18.0′ N., Long. 112° 58.5′ E.
VHF: All vessels shall contact Port Control by VHF Channel 12 at least 3 hours before arrival at the Pilot Boarding Ground or as soon as VHF contact can be established.

ANCHORAGE: Depth at anchorages varies from 12.0 m. to 26.0 m.
There are different anchorages within the Bintulu Port water limits:

Areas	*Depths*
(a) General Cargo Anchorage	5.0 m. – 22.0 m.
(b) Waiting Anchorage	24.0 m. – 28.0 m.
(c) Gas Tanker Anchorage	24.0 m. – 26.0 m.
(d) Petroleum Anchorage	21.0 m. – 25.0 m.
(e) Explosives Anchorage	7.0 m. – 21.0 m.

RESTRICTIONS: Depth at General Cargo Wharf is 10.5 m. Depth at Bulk Cargo Wharf is 13.5 m. Depth at LNG Jetty is 15.0 m.
No berthing after sunset at LNG Jetty.

MAX. SIZE: Max. draft for general cargo vessels is 10.0 m.
Also see "Tankers".

HEALTH: Maritime Declaration of Health to be completed on arrival in accordance with International Sanitary Convention, 1944.

VHF: Receiving channels used within Bintulu Port are as follows:
Channel 12 – Working channel.
Channel 14 – Port Operations.
Channel 16 – International calling.
Port offers 24 hours service.

Vessels are required to establish contact with Terminal Operator's Control Tower, call sign "Mike Kilo" (MK) on Channel 12 for pilots, etc., at least 3 hours before the expected time of arrival and departure from the port.

TUGS: Use of tugs is compulsory and depends on the size/length of the vessel:

Particulars of 4 Steerable Thruster Tugs:

LOA:	37 m.
Length of Design Waterline:	35.5 m.
Breadth (moulded):	11.0 m.
Depth (moulded):	4.20 m.
Main Engines:	MWM TBD 441 V12 2×1,956 h.p. @ 900 RPM each. Engine couple to Liaaen CP compass thruster type TCN 92/68-230.
Auxilliary Engines:	3×MWM D232V8 85KW/415V/50 HE.
Speed	13.5 knots.
Bollard pull:	42 tonnes.

Particulars of 2 Twin-Screw Tugs:

LOA:	27 m.
Length of Design Waterline:	26.5 m.
Breadth (moulded):	8.00 m.
Main Engines:	2×MWM TBD 440-6. 2×929 HP @ 900 RPM.
Auxilliary Engines:	2×MWM TD 232 V8.
Speed:	11.5 knots.
Bollard pull:	23 tonnes.

BERTHING: 3 berths with a total length 514.5 m. for general cargo.
1 berth of 270 m. for bulk cargoes.
1 Ro/Ro Ramp of 25.5 m.
1 Jetty for LNG vessels only.
1 Jetty for petroleum products.

The wharf apron for the General Cargo Wharf is 24 m. and for the Bulk Cargo Wharf it is 30 m. The depth alongside the General Cargo Wharf is 10.5 m. and alongside the Bulk Cargo Wharf it is 13.5 m.

CRANES: 1 Gottwald mobile crane with 100 tonnes lifting capacity, 1 mobile crane with 30 tonnes lifting capacity at 10 m. radius and 1 mobile crane with 15 tonnes lifting capacity at 7.0 m. radius.

STEVEDORES: Stevedores and cargo handlers are obtainable from the Terminal Operator's Cargo Handling Services Department.

TANKERS: *Shell MDS Jetty:*
Max. LOA: 177 m.
Max. d.w.t.: 38,000 tonnes.
Minimum Size: 1,500 S.d.w.t.
Max. Draft: 12.5 m.
Minimum Depth and U.K.C. (Berth): 13.5 m./1.0 m.
Minimum Depth and U.K.C. (Approaches): 13.5 m./1.0 m.
Density: 1016.
Night Berthing/Unberthing: Allowed.
Bunkers: Not available at berth (supply available at anchorage).
Fresh Water: Available at berth.
Max. Freeboard: 13.5 m.
Type of Berth: Finger jetty.
Lighterage: Not available.
Grades Handled: Gas Oil, Kerosene, Naphtha, Solvent Feedstock, Detergent Feedstock, Waxy Raffinate and Liquid Waxes.
Dirty Ballast Facilities: None.
Slop Facilities: None.
Tugs: 3×2,500 h.p. and 2×1,500 h.p.

General: Information on bow to centre manifold (BCM) is always required due to position of stern mooring dolphin and close proximity of shallow water to the stern.

When a LNG carrier is in the approach channel, restriction will be imposed on the movement of all other vessels entering or leaving the port.

Also see "Bintulu Terminal".

DENSITY: Average 1009 – 1025.

FRESH WATER: Available at berth. No limitation as to vessel's requirement. Rate approximately 35 – 40 tonnes per hour.

FUEL: High speed diesel available. Price varies from time to time. The supply is by bunker barge and tank trucks at all berths. Other fuel as well as marine lubricants can be obtained through suppliers.

REPAIRS: Deck and engine not attended. Minor repair facilities exist.

SURVEYORS: Kinabalu Adjusters and Surveyors Sdn. Bhd., Mr. Mathews G. Ingan. Tel. 086-34620. Kinabalu Adjusters and Surveyors Sdn Bhd., includes insurance for cargo and cargo claims.
Class survey – available by special arrangement.

GANGWAY/DECK WATCHMEN: Usually ship's crew and ship's gangway.

OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever to ship's advantage.

CUSTOMS ALLOWANCES:
25 sticks cigarettes per day per man.
1 quart beer/stout/wine per day per man.
One-eighth quart spirit per day per man.
8 sticks cigars per day per man.
1 oz. tobacco per day per man.

CARGO GEAR: Cargo gear is available for loading/discharging, etc., for heavy lifts up to 100 tonnes.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: Distance 20 km., served by Malaysian Airline System (MAS).

TIME: Local time is GMT plus 8 hours.

HOLIDAYS:
(a) First Day of Chinese New Year.
(b) First Day of Hari Gawai (1st June).
(c) First Day of Hari Raya Puasa.
(d) National Day (31st August).
(e) Christmas (25th December).

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.

TELEPHONES: Connecting points available at berth.

BANKS:
1. Bank Bumiputra Malaysia Bhd., Bangunan BDA, Bintulu. Tel: 086-331320.
2. Bank Utama Malaysia Bhd., Jln. Sommerville, Bintulu. Tel: 086-331133.
3. Hock Hua Bank Bhd., 23 Jln. Sommerville, Bintulu. Tel: 086-331433.
4. Malayan Banking Bhd., 24 Jln. Abang Galau, Bintulu. Tel: 086-331635.
5. Standard Chartered, 89 Jln. Keppel, Bintulu. Tel: 086-331272.
6. Malayan United Bank Bhd., 186 Taman Sri Dagang, Bintulu. Tel: 086-332393.
7. Public Bank Bhd., 28 Jalan Sommerville, Bintulu. Tel: 086-337751.

SHIP SUPPLY SERVICE: Pau Chiong Tai is the local ship chandler. Prices are reasonable.

SHORE LEAVE: Shore leave is normally allowed up to 1800 hrs., according to Immigration bye-law.

GARBAGE DISPOSAL: Garbage disposal service is available. Rubbish bins are provided at strategic locations throughout the port. The service is provided free of charge.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Malaysian Ringgit (MYR$).

DELAYS: Vessels generally berth on a "first come first served" basis, irrespective of day or night. No delays experienced so far at Bintulu Port.

GENERAL: The port is an "all weather port" and the most modern port in Sarawak. When a vessel is within the port limits, extra precautions must be taken to avoid oil spillages, etc.

When vessel is lying at berth no rubbish should be thrown overboard.

The Port Safety Officer will board vessel, under normal circumstances, to inspect the ship prior to loading.

Preventive measures must be taken to avoid the risk of fire whilst at the Port wharf.

AUTHORITY: Bintulu Port Authority, P.O. Box 296, 97007 Bintulu, Sarawak, Malaysia. *Tel:* 086-253888, 253130. *FAX:* 086-252929. *Contact:* Captain Awangku Malyx Pengiran Mahran, General Manager. *Operator:* Bintulu Port Sdn. Bhd., P.O.Box 996, 97008 Bintulu, Sarawak, Malaysia. *Tel:* 086-251001/7 (7 lines). *Telex:* Biport MA 73179. *FAX:* 086-253597. *Contact:* En. Ramli Abu Samah, C.E.O./Managing Director.

AGENT: See "Sibu".

BINTULU TERMINAL: 03.16 N. 113.04 E. (See Plan)

LOCATION: The single buoy mooring is positioned at Lat. 3° 20′ N., Long. 113° 01′ E. and can accommodate tankers with max. SDWT of 350,000 tonnes.

Charts: B.A. Charts No. 2100 and 1748.

DOCUMENTS:

Last Port Clearance.
9 Crew Lists
3 Malaysia Crew Lists (Provided on arrival).
2 copies General Stores Lists.
1 Shipping Arrival Report (Provided on arrival).
1 Application for Clearance (Provided on arrival).
5 Passenger Lists.
3 Narcotics Lists.
3 Arms and Ammunitions Lists.
2 Crew Personal Declaration Lists.
2 Vaccination Lists.
3 copies Inward Manifest ("Nil" Manifest required).
International Maritime Health Form, provided by Agent.

Customs and Health Requirements: A detailed Shipping Report has to be completed for Government Marine Department. Local Agents will provide the necessary forms for completion. If the vessel originates from an infected port, or if the state of health is suspect, the Port Medical Officer may board the vessel, in order to inspect the crew and relevant International Medical Certificates.

PILOTAGE: Pilotage is compulsory and is operated by Bintulu Port Authority. The Pilot boards vessels calling at the SBM at the pilot boarding ground in position Lat. 03° 13.0′ N., Long. 112° 55.2′ E. Shell Loading Master, Mooring Assistant and Cargo Surveyors board in the same area from the mooring launch.

The regulation pilot ladder should be rigged well aft on the lee side. Prior to moving to berth mooring equipment is loaded onto vessel's forecastle.

Officials: The Berthing/Loading Master, Mooring Assistant, Petronas Representative, Independent Cargo Surveyor(s) and Customs Officer remain on board throughout the vessel's stay at the SBM. It is possible that the vessel's Agent will also remain on board.

APPROACHES: *Approaches to the Port:* References should be made to the appropriate charts for the berth. From seaward, various oil and gas exploration and platform installations are spread throughout Brunei and Sabah waters. Masters of vessels are advised to give such facilities a wide berth.

ANCHORAGES: A petroleum anchorage bounded by the following co-ordinates has been established:

Lat. 03° 24.4′ N., Long. 112° 57.3′ E. Thence to position
Lat. 03° 21.3′ N., Long. 112° 59.6′ E. Thence to position
Lat. 03° 22.0′ N., Long. 113° 02.4′ E. Thence to position
Lat. 03° 26.0′ N., Long. 113° 01.2′ E. Thence along the port limits to position Lat. 03° 24.4′ N., Long. 112° 57.3′ E.

Refer to B.A.Chart No. 2100.

Use of ship's anchors is strictly prohibited except in extreme emergency. In any case, the anchor must never be dropped anywhere within a distance of 400 ft. (122 m.) on either side of the pipeline, its entire length, nor closer than 0.5 nautical miles (5 cables) radius from the SBM. Both anchors should be secured prior to berthing operations.

RESTRICTIONS: Berthing/unberthing is carried out night and day, weather permitting.

MAX. SIZE: The maximum water depth in the manoeuvring area is 62 ft. and the max. permissible draft 52 ft. Max. distance bow to centre manifold 590 ft. No restriction on LOA.

DEPARTURE ROUTE: For deep draft vessels the following departure routes (approaching – opposite course) are recommended:

North-West Route:

From SBM steer 304° to position: Lat. 3° 51′ N., Long. 112° 14′ E.

Along this route 2 navigational light buoys have been laid both South Cardinal:

1. Parsons Shoal (Beting Tugau) position: Lat. 3° 52′ 22″ N., Long. 112° 16′ 06″ E.
2. South Acis Shoal (Beting Likau) position: Lat. 3° 35′ 50″ N., Long. 112° 39′ 36″ E.

North-East Route:

From SBM steer 015° to position: Lat. 3° 35′ 25″ N., Long. 113° 05′ 25″ E., which is marked by East Cardinal light buoy (Beting Nabau).

Onward course 042° to position: Lat. 3° 52′ N., Long. 113° 20′ E.

The N.N.E.'ly tip of the Cochrane Bank is marked by an East Cardinal light buoy (Permating Payong) in position: Lat. 3° 51′ 38″ N., Long. 113° 18′ 06″ E.

A 36 in. gas trunk line has been laid to the North and East of the SBM.

HEALTH: See "Documents".

RADIO: Standard message by the Masters of vessels calling at Bintulu SBM must be sent at least 96 hours before arrival at Bintulu. ETA at Bintulu shall be addressed to the local Agents and copied to Saroilco Miri.

Also see "General".

W/T traffic should be passed through Singapore Radio, Kuching or Miri Radio.

Pre-Arrival Information: Prior to vessel's arrival at SSB/SSPC berths, 72 hours before her arrival, Master of vessel shall answer SSB/SSPC Questionnaire as outlined below.

Messages shall be sent to the local Agent and copied to Sarawak Shell Berhad/Sabah Shell Petroleum Company (Telex: MA74424/74425/74426. Fax: 085-454857).

AAA	Vessel's name, previous name (if any), call sign and nationality.
BBB	Master's name.
CCC	GRT, NRT and SDWT.
DDD	ETA, date and local time (GMT +8 hours).
EEE	Last Load Port/Discharge Port.
FFF	Next Load Port/Discharge Port.
GGG	Number of Crew.
HHH	Grade and Quantity of Cargo on arrival, previous cargo and cargo to be loaded at SSB/SSPC Terminal and tanker's maximum loading rate per manifold.
JJJ	Quantity of ballast in SBT and CBT and confirmation that the vessel is able to load and deballast simultaneously.
KKK	Arrival drafts.
LLL	Any defects that may cause pollution or affect loading.
MMM	Confirm vessel has a fully operational I.G. system and meets all SOLAS/IMO/OCIMF requirements.

All vessels loading at SSB/SSPC berths for the first time shall include the following additional information:

NNN	Length overall (LOA) and distance of bow to centre manifold (BCM).
PPP	Do manifolds meet OCIMF standards.
QQQ	What is the SWL of Tanker's starboard derrick.
RRR	Number and size of AKD bow chain stoppers.

Berthing Instructions: After ETA advice the following message will be transmitted to the Master.

AAA	Based on your ETA . . . present intention is to berth you on arrival.
BBB	Pilot will board at the boarding area of 2 miles diameter in the following position: Lat. 03° 22′ N., Long. 112° 58′ E.
CCC	Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival at Bintulu Terminal on VHF Channel 18 or 16.
DDD	Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE	After having established radio contact on VHF you will receive further instructions.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

VHF: Bintulu Port Authority Control operates on VHF Channels 12, 14 and 16, and Bintulu Crude Oil Terminal stands by on Channel 18. Ships should inform Bintulu Port Control and Bintulu Terminal on the proper frequency of their ETA at least 3 hours before arrival at pilot boarding station, or as soon as VHF contact can be established.

Bintulu Port Authority requires every vessel whilst underway within port limits and in the approaches thereto to maintain continuous watch on Channel 12.

TUGS: Bintulu Port Authority makes it compulsory for tankers calling at the SBM to use a tug for berthing/unberthing. 3×3,500 b.h.p. and 2×1,500 b.h.p. tugs are available for such purposes.

Mooring Launch: The mooring launch will be in attendance throughout the tanker's stay at the SBM. The launch is used to send the messenger end of the pick-up ropes to the vessel. On completion of mooring operations, the launch picks up the hoses for connection and remains at the vessel until the completion of loading operations.

BERTHING: *Mooring Procedure:* The tanker is moored to the SBM by 2×16 in. circumference (8 strand plaited) mooring lines 150 ft. (45.72 m.) in length, each connected to a 3 in. (76 mm.) chafing chain. A pick-up rope 10 in. × 150 ft. in length is connected to the chafing chain. A suitable standard mooring rope must be lowered down by the vessel to the mooring launch in order to hoist the pick-up ropes.

The starboard (inner) line will be the first line to be picked up as the tanker approaches the SBM.

Closing speed, when the vessel is within range of the pick-up rope (approximately 100 m. from the SBM), must not exceed 0.5 knots.

As the vessel slowly closes in on the buoy, the pick-up rope and chafing chain are hove on board until the chafing chain is in position in the fairlead (chain support buoy just outboard of the fairlead). The chain is then secured in the bow stopper.

While the starboard mooring is being tended to, the mooring boat clears the port mooring rope from the buoy. The rope is then hove on board and is connected in the same manner to the starboard one.

Note: The vessel should have 2 mooring ropes ready on the forecastle.

Unmooring: Weight on the mooring lines may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winches, and the weight is taken off the bow stopper. The bow stoppers are released, and the moorings and pick-up ropes lowered from the bow into the water.

The port mooring is normally disconnected and lowered first.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings. The mooring and hose connection equipment is then transferred to the mooring launch.

LOADING: *Position of Hose Connection:* 2×16 in. cargo loading hoses (length 840 ft.) will be connected on the starboard side amidships.

Mooring and hose connection is carried out by the vessel's crew, as advised and supervised by the shore mooring assistant.

Connecting Hoses: Hose connection is carried out by ship's crew.

The hoses are lifted and connected one at a time. The forward or 'inner' hose is tended to first. The derrick runner is hooked into an enlarged link in the hose lifting chain and the hose end is then lifted out of the water until sufficient length is available for direct connection to the tanker' manifold. The weight of the hose in this position is transferred to the hose hang-off chain and the hose end is then lowered onto the deck. The blank flange is removed and the hose connected to the vessel's manifold. After connecting, the hoses are supported at the tanker side by flat webbing slings hung from the derrick runner in order to maintain a reasonable radius of bend. They are also suitably lashed to the hose bar of the side rail to reduce movement caused by sea conditions. In seas exceeding 5 ft., the floating hose strings become lively and require attention. Excessive movement of the hoses will result in chafe and strain on the flanges in way of the manifold. This can be reduced to a minimum by a suitable suspension of the hoses from the derrick runner backed up by rope lashings at the side rails or hose bars. Such preventive measures depend largely on the construction and layout of the tanker in the manifold area, also on the distance of the manifold from the vessels' side.

Loading Procedure: Three grades of crude oil are exported from Bintulu Terminal. Bintulu Crude Oil (approximate API 33.0), Bintulu Light Condensate (approximate API 60.3) and Bintulu Spiked Crude (i.e. Crude/Condensate Blend – approximate API 38.3).

The maximum loading rate on three pumps in 5,300 cu.m./hr., and a maximum back pressure of 120 p.s.i. (approximately 10 bars) at the Terminal's end. The rate will be slightly lower for Condensate and Spiked Crude. The Loading Master shall advise the vessel as to the loading rate for the lifting prior to commencement of cargo operations.

The Loading Master will remain on board throughout the vessel's stay at the berth, acts as the Terminal's representative, and will attend to all cargo formalities.

As soon as possible, the Master shall provide cargo requirements, tanker maximum loading rate and any other pertinent data as required by the Loading Master.

After all pre-loading formalities have been attended to, the following steps will be taken:

(a) Joint inspection to be carried out by the ship and the Berthing/Loading Master to ensure all requirements on the Safety Check List are adhered to.
(b) Method of communication and emergency shut-down procedure between ship and shore is established and understood. Prior to commencement of operations, the radio communication shall be tested to ensure the system is operating satisfactorily.
(c) Ship and shore to confirm readiness to commence loading operations.
(d) Commencement of loading operations to be at slow rate.
(e) Once loading operation commences, manifold connections and loading hoses are checked for leaks, and faults rectified. The mooring launch shall patrol round the vessel and the SBM to check for possible leakages into the sea.
(f) Once the vessel has confirmed receipt of cargo, the Emergency Shut Down trip is tested. On completion of the trip test, pumping is resumed and the loading rate gradually increased to the agreed loading rate.
(g) Manifold connections, hoses and water around the vessel are again checked for faults and/or leakages.
(h) Lines are to be checked at frequent intervals, and the Berthing/Loading Master shall be immediately informed of any abnormality.
(i) Ship and shore figures are to be compared every 2 hours at agreed times, and any discrepancies investigated.

Suspension of Loading Operation: If loading operations are suspended for excessive periods (e.g. leakages, ship/shore breakdown, etc.), or due to impending heavy weather, the hoses shall be disconnected, blanks flanged and made ready for lowering into the sea. The Berthing/Loading Master shall give the Master the instructions to do so after monitoring the situation.

Disconnecting Hoses: The "after" or outer hose is disconnected first. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted. Each hose is lowered over the side and towed clear from the tanker's side by the mooring launch to prevent possible entanglement with the tanker's propeller.

General Information: Tanker's manifolds should conform to/with the standards recommended in the OCIMF publication "Standards for Tanker Manifolds and Associated Equipment".

Tanker mooring equipment shall be in line with the recommendations contained in the OCIMF publication "Standards for Equipment Employed in the Mooring of Ships at Single Point Moorings".

Ship to shore communication during loading operations is by way of a portable VHF radio set provided by the Terminal. Additionally, communication can be used by VHF Channel 18.

Rig starboard derrick to maximum S.W.L.

Minimum acceptable:

16,000 – 60,000 S.d.w.t. : 10 tonnes
Over 60,000 S.d.w.t. : 15 tonnes

BALLAST: For ships with Segregated Ballast Tanks (SBT's), Masters are advised to deballast concurrently with loading, to avoid excessive trim while at the same time taking stresses on the hull into consideration. The vessel must at any time be able to manoeuvre and vacate the SBM.

For vessels with combination Clean Ballast Tanks (CBT's) and SBT's, Masters are advised to confer with the Berthing/Loading Master for directions. Nevertheless, for vessels of 70,000 tonnes S.d.w.t. and above, the ballast/cargo configuration must at all times not be less than 25% of the vessel's S.d.w.t.

MEDICAL: Medical and dental services are available at Bintulu through the local Agents.

Ship's personnel given special permission to go ashore for medical treatment must be in possession of an identification card and/or passport.

DENSITY: Varies between 1020 and 1025.

FRESH WATER: Limited supply available by water boat.

FUEL: Not available.

REPAIRS: No facilities available.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

TIME: GMT plus 8 hours.

SHORE LEAVE: Not permitted.

WEATHER: All the SBMs concerned are positioned in the open sea. The weather in this region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into 3 and the terminology used is consistant with that of South East Asia. These 3 types are:

(1) S.W. Monsoon (June-October).
(2) N.E. Monsoon (December-March).
(3) Transitions between the Monsoons.

Persistant bad weather occurs during the N.E. Monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. Monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

GENERAL: *Conditions of Acceptance:* SSB/SSPC accepts vessels for handling at Miri, Bintulu and Labuan on the undertaking that operations are conducted safely and expeditiously, and that berths are vacated as soon as possible after operations are completed.

The Company reserves the right not to accept vessels at the SBMs which do not adhere to the following:

(a) For tankers of 70,000 tonnes S.dw.t. and above, be capable to retain on board at all times a minimum of 25% of their S.d.w.t., either in the form of cargo, ballast water or both (Tankers with segregated ballast tanks would therefore be preferred).
(b) Be fitted with Inert Gas System and Cargo tanks to be inerted.
(c) Be fitted with bow stopper(s) to OCIMF requirements (Refer to Terminal Information for size of stopper(s)).
(d) Be capable of loading the cargo nominated at a rate of 3,000 tonnes per hour and above.
(e) Be covered by Tanker Owners Voluntary Agreement concerning Liability for Oil Pollution (TOVALOP), and the purchasers of the crude oil shall be subscribers to the Contract Regarding an Interim Supplement to Tanker Liability for Oil Pollution (CRISTAL).
(f) Be capable of complying with latest issues of OCIMF Standard for Tanker Manifolds and Associated Equipment, International Safety Guide for Oil Tankers and Terminals (ISGOTT), MARPOL, or such other safety guide as shall be agreed between the parties. The Terminal Operator shall provide for the updates to be sent to each party and acknowledgement of receipt of the same shall be sent to the Terminal Operator as soon as possible before its implementation.

The Company further reserves the right to suspend operations and require the removal of any vessel from the SBM for:

(a) Flagrant or continued disregard to Berth Regulations and ISGOTT.
(b) Defects in the vessel, equipment or manning or operations which in the reasonable opinion of the Company presents a hazard to the Company's facilities, personnel or operations.
(c) Operational performance, in the reasonable opinion of the Company, constitutes an unacceptable constraint on the Company's operation.

The Company shall not be liable for any cost incurred by the vessel, its Owners, Charterers or Agents as a result of a refusal to load all or part of a nominated shipment, delays or suspension of loading or a requirement to vacate the SBM arising from this Regulation (3) or Regulation (14) hereof.

Conditions to be observed during Loading Operations: In general, operations shall be conducted in accordance with the current requirements of the current edition of the International Safety Guide for Oil Tankers and Terminals (ISGOTT) in particular:

(a) Deck/cargo watch shall be manned by sufficient crew under the continuous supervision of a responsible officer, to control routine operations and any emergencies.
(b) A responsible English speaking ship's officer must be on watch at all times. A responsible member of the ship's crew shall be stationed at or near the ship's manifold at all times.
(c) There must be an efficient communications means between the Cargo Control Room (CCR) and the ship's crew on deck watch at all times.
(d) All doors, portholes and openings leading from the main deck to the accommodation or machinery spaces with the exception of the pumproom shall be kept closed, and doors, portholes and openings at any deck level above the main deck which overlook that deck shall be kept closed. Cargo Control Room doors opening onto or above the main deck may be opened momentarily for access.
(e) All ventilators, through which gas can enter, shall be suitably trimmed, and mechanical ventilation and air conditioning shall be stopped if gas is being drawn into the accommodation. Window type air conditioning units shall be electrically disconnected, unless situated wholly within the accommodation.
(f) The cargo pumproom mechanical ventilation system shall be kept in operation, and the atmosphere within the pumproom maintained in a condition such as to permit safe entry. On demand from the Loading Master, the responsible ship's officer shall provide evidence of safe entry conditions.
(g) The responsible ship's officer shall give a verbal notice to the Loading Master at least 15 minutes before any requirement to slow down the pumping rate. The Loading Master shall also be duly informed prior to topping of any cargo tanks, valve operations which may cause an increase in back pressure of the shore pumps.
(h) During loading operations, the responsible ship's officer must ensure that before closing any tank valve(s), another set of tank valve(s) must be in the open position. Under no circumstances must total closure of the ship's system be carried out against cargo flow.

Prevention of Sparking and Excessive Funnel Smoke: Connecting and disconnecting of cargo hoses and other operations on deck involving the use of metal instruments shall be carried out in a manner that avoids the generation of sparks.

Blowing through of boilers and main engines, resulting in production of excessive funnel smoke, is permitted for short period only.

Weather Precautions: Operations shall be stopped during severe electrical storms or periods of high winds at the discretion of the responsible ship's officer or the Loading Master, and all tank openings and cargo valves shall be effectively closed. The Berthing/Loading Master will then decide if it is necessary to disconnect the loading hoses and unmoor.

The moorings to the SBM shall be checked frequently and the Loading Master shall be advised accordingly of any abnormality.

Smoking: Smoking is only permitted in those enclosed spaces specifically designated by the Master in consultation with the Berthing/Loading Master as "Smoking Areas". Smoking is not permitted outside the designated areas.

Portable Radios, Torch (Flash) Lights: Only intrinsically safe and approved portable VHF radios and torch (flash) lights shall be used on board the vessel.

Immobilistaion of Main Engines/Generators for Repairs, etc.: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM. Engines must be ready for use at any time the Berthing/Loading Master decides to unmoor for breach of safety requirements or due to weather.

Fire Precautions: Vessel's fire fighting appliances, including main and emergency fire pumps, shall be ready for immediate use, and pressure shall be maintained while at the SBM. At least 2 fire hoses, fitted with jet/fog nozzles, shall be uncoiled and connected to the fire main on the main deck close to the manifolds. At least 2 portable fire extinguishers shall be appropriately placed in the vicinity of the cargo loading manifold(s).

Avoidance of Oil Pollution: No oil or ballast water (other than clean ballast from segregated ballast tank) shall be discharged or allowed to escape from a vessel into the water, unless they comply with MARPOL 73/78 requirements that the oil content of the effluent does not exceed 15 p.p.m., and no visible traces of oil is sighted on the surface of the water.

When alongside the SBM, during cargo operations all scuppers shall be effectively plugged.

Any leakages or spillages must be reported *immediately* to the Loading Master and operations suspended to minimise/contain such leakage or spillage. Loading Master shall then take further appropriate action after assessing the situation.

Discarding Material/Garbage Overboard: No garbage, hazardous materials or any other objectionable material(s), either solid or fluid, shall be thrown/discarded overboard.

Inert Gas Operations:

(a) The inert gas system must be capable of delivering inert gas with oxygen content of not more than 5% by volume in the inert gas supply main. The atmosphere in the cargo tanks must at all times be maintained at positive pressure, and the oxygen content must not exceed 8% by volume.

(b) In the event of failure in the inert gas system in port, the Loading Master is to be informed immediately.

(c) The Company reserves the right not to accept any tanker to the berth, unless all cargo tanks are fully inerted. The Company shall not be responsible for any loss or delays as a result thereof.

Information required prior to Arrival: The vessel's Agent will send a comprehensive message to the Master advising and requesting information. Masters of vessels should advise estimated time of arrival (ETA) at intervals of 72, 48 and 24 hours before arrival. The Bill of Health should be advised at least 24 hours prior to arrival.

Pilot Ladders: If the freeboard of a vessel exceeds 5.0 m., combination ladder shall be rigged on the leeside. Pilot ladder used must be in good condition, fitted with spreaders and securely fastened. A lifebuoy with a heaving line attached shall be sited ready for use. At night, sufficient illumination shall be provided.

AUTHORITY: *Operator:* Sarawak Shell Berhad, Locked Bag No. 1, 98009 Miri, Sarawak, Malaysia. *Tel:* 085-454545. *Telex:* MA 74424/74425/74426. *FAX:* 085-452030. *Cables:* SAROILCO. *Contact:* Captain Lionel Rodrigues, Head of Marine Services.

AGENT: See "Sibu".

DULANG MARINE TERMINAL: 05.48 N. 104.10 E. (See Plan)

LOCATION: The Dulang Marine Terminal is situated off the East coast of peninsular Malaysia. It is approximately 70 nautical miles (130 km.) N.E. of Kuala Terengganu in position Lat. 05° 48.6′ N., Long. 104° 10.1′ E.

The terminal consists of a Floating Storage and Off-loading vessel (FSO) named "Puteri Dulang". It is located 1 nautical mile South of the Dulang "B" Production Platform which processes and stabilises the Dulang crude oil prior to pumping to the FSO via a submarine pipeline.

The positions of the platforms are as follows:

Dulang "A" Platform:	Lat. 05° 49.3′ N.,	Long. 104° 11.8′ E.
Dulang "B" Platform:	Lat. 05° 44.4′ N.,	Long. 104° 09.7′ E.
Dulang "C" Platform:	Lat. 05° 50.5′ N.,	Long. 104° 08.0′ E.

The FSO has an integral Single Point Turret (SPT) attached to the bow which permits it to pitch, roll and weathervane 360°, according to wind and current conditions. It is permanently moored in 77 m. of water by means of 6 pre-tensioned anchor chains attached to sub-sea piles.

The terminal, with associated production platform, is operated by Petronas Carigali Sdn.Bhd. It is used for shipping crude oil on behalf of both Petronas and Esso Production Malaysia Inc.

All platforms are equipped with fog horns and navigation lights. The navigation lights can be seen from a distance of 2 miles and flash in sequence the Morse code letter "U". The Dulang "B" Platform can easily be seen for several miles due to its flare. The platforms are approximately 15.0 m. above the water line and can easily be detected on radar.

Caution: Dulang "B" flare may not be lit and should not be relied upon for navigation.

Mooring Method: The terminal is equipped for Alongside Mooring and Tandem Mooring. The method to be used shall be at the discretion of the Dulang Marine Terminal Representative.

THE TANDEM MOORING IS THE PREFERRED METHOD

DOCUMENTS: The following documents are required to be prepared prior to arrival to ensure speedy clearance:

16 copies Crew List.
2 copies Stores List.
2 copies Personnel Effects List.
6 copies Passenger List.
2 copies Cargo Manifest.
4 copies Drugs/Narcotics List.
4 copies Arms/Ammunition List.
2 copies Vaccination List.
4 copies Voyage Memo/Itinery.
2 copies Derat Certificate or Derat Exemption Certificate.
2 copies Tanker's General Information.
Last Port Clearance.
Ship's Certificates for inspection.

PILOTAGE: The Pilot/Mooring Master will normally board tankers from a tug at one of two boarding positions:

"North" in position Lat. 05° 52′ N., Long. 104° 11′ E.
"South" in position Lat. 05° 47′ N., Long. 104° 07′ E.

Tankers will be informed by VHF, prior to berthing, of the position to be used.

Notice of Readiness: Tankers calling at Dulang Marine Terminal are to be in all respects ready to commence loading. The Notice of Readiness will be acknowledged at the time of pilot boarding.

ACCEPTANCE CRITERIA FOR "ALONGSIDE BERTHING": At the discretion of Carigali, tankers between 40,000 d.w.t. and 85,000 d.w.t. with a length of 242 m. or less and with a maximum full load displacement of 100,000 tons can be safely accommodated alongside the FSO, provided they comply with the following minimum standards:

1. Moorings:

Forward:	4 winch mounted ropes.
Maindeck forward:	2 winch mounted ropes.
Maindeck aft:	2 winch mounted ropes.
Aft:	4 winch mounted ropes.

All to lead through closed chocks (fairleads).

Note:

(a) Tankers not equipped with self-stowing winches are not acceptable at the terminal.

(b) All moorings should be synthetic fibre ropes or wire ropes with synthetic tails. Mixed moorings are not acceptable.

(c) Winches and brakes must be in good operating condition.

(d) Mooring lines must be of adequate size and in good condition.

(e) Winch mounted wires must be fitted with synthetic tails in order to provide needed elasticity and to permit cutting in an emergency.

Additionally, closed chocks (fairleads) and bollards must be available on the tanker for making fast FSO provided preventer wires:

Forward:	2 wires.
Maindeck forward:	1 wire.
Maindeck aft:	1 wire.
Aft:	1 wire.

2. Hose Connection: The tankers must have 2×12 in. 150 ANSI flanged connections ready at port side midships manifold.

The manifolds must comply with "OCIMF Standards for Oil Tanker Manifolds and Associated Equipment".

ACCEPTANCE CRITERIA FOR "TANDEM MOORING": At the discretion of Carigali, tankers up to 150,000 d.w.t. with a length of up to 281 m. and with a maximum full load displacement of 196,000 tons can be moored astern of the FSO, provided they comply with the following minimum standards:

1. Mooring Equipment: The tanker must be equipped with correct mooring equipment relevant to it's size as recommended in the "OCIMF Standards of Equipment Employed in the Mooring of Ships at a Single Point Mooring". The minimum dimensions of the centre bow fairlead should be not less than 600 mm. wide and 450 mm. deep, in order to accommodate the FSO hawser chafing chain.

   Tankers which do not comply with "OCIMF Standards of Equipment Employed in the Mooring of Ships at a Single Point Mooring" will not be accepted for tandem mooring.

   Forward winches/windlasses must be in good condition and have sufficient capacity (10 tons S.W.L.) to lift the mooring hawser assembly. Tankers not equipped with self-stowing winches are not acceptable at the terminal.

   Tankers not fitted with a bow chain stopper will be considered "unsafe" for normal mooring operations and will not be accepted for tandem mooring at the Dulang Marine Terminal.

2. *Hose Connection:* The tanker is to be equipped with a loading manifold in accordance with the "OCIMF Standards for Oil Tanker Manifolds and Associated Equipment". It is to have 1×16 in. 150 ANSI flanged connection ready at the port side midship manifold.

APPROACHES: *Restricted Area:* Due to the presence of numerous platforms, submarine obstructions and pipelines, a Restricted Area bounded by the following coordinates has been established:

A.	5° 30′ N.	104° 34′ E.
B.	5° 10′ N.	105° 34′ E.
C.	5° 20′ N.	105° 40′ E.
D.	5° 46′ N.	105° 14′ E.
E.	5° 46′ N.	104° 48′ E.
*F.	5° 56′ N.	104° 04′ E.
*G.	5° 46′ N.	104° 04′ E.

*Note: Positions 'F' and 'G' have not yet been gazetted or included in nautical publications.

Waiting Area: A Waiting Area centred on position Lat. 5° 44′ N., Long. 104° 00′ E. and with a radius of 5 nautical miles has been established.

Navigation: Tankers bound for Dulang Marine Terminal should approach the Waiting Area keeping well clear of the Restricted Area.

Tankers should under no circumstances enter or anchor in or near the Restricted Area.

The platforms and FSO are good radar targets, normally detectable on the radar at 20 miles. However, due to the possible presence of drilling tenders and construction work taking place in the area, platforms or the FSO should not be used as navigational aids, except when positively identified and position confirmed by other means.

Tankers which have received VHF instructions from the FSO shall proceed to one of the pilot boarding positions and must maintain a distance of not less than 2 miles from all oil platforms, structures, work or crane barges within the Restricted Area. Should this distance need to be increased, they will be so advised by Dulang Marine Terminal.

ANCHORAGE: Depth of water in the Waiting Area ranges between 60 m. and 90 m. The sea bottom consists of fine mud and sand and provides poor anchor holding ground. Anchoring is therefore not recommended in the Waiting Area.

Tankers awaiting berth at Dulang Marine Terminal are advised to drift or slow steam in the Waiting Area or in the area S.W. of the Waiting Area, while keeping in VHF contact with the Terminal.

RESTRICTIONS: Berthing is carried out only during daylight hours whereas unberthing will take place day and night.

RADIO/VHF: *Radio Advice:* All radio traffic to be channelled through Singapore Radio and vessels should monitor traffic lists from the same station.

1. Cables for Petronas to be addressed to:
   Petron MA 30032 or MA 30696.
   International Marketing, KL
   with copy to Carigali MA 51487,
   Production Operations, Kemasik.
2. Cables for EPMI to be addressed to:
   Essosupply MA 30293, KL
   with copy to Offprod MA Kemasik.

Arrival Advice: Immediately after having received instructions to proceed to the Dulang Marine Terminal, the Master is required to cable Carigali and Agent the following:

AAA Tanker name, previous name (if any), call sign and flag.
BBB ETA date and local time (GMT + 8 hours). ETA to be confirmed 72 hours, 48 hours and 24 hours prior to arrival. If there are any major changes, the ETA should be reconfirmed.
CCC Master's name and nationality.
DDD GRT, NRT, SDWT, light and full load displacement tonnage.
EEE Last discharge port and intermediate ports.
FFF Next discharge port and intermediate ports.
GGG Number of crew and nationality.
HHH Number of passengers.
III Grade and quality of cargo on arrival, previous cargo and cargo to be loaded at Dulang Marine Terminal and loading rate per manifold.
JJJ Whether previous cargo or any cargo on board has high H_2S contents and H_2S concentration in tank vapour spaces.
KKK Malaysian Light Dues receipt number and date.
LLL Arms on board.
MMM Confirmation that vessel is able to load and debaliast simultaneously.
NNN Arrival draft.
OOO Any leaks which would cause pollution or affect loading.
PPP Pratique granted: Place/date. If any sickness on board or Clean Bill of Health.
QQQ Confirm inert gas system operational and cargo tanks inerted on arrival.
RRR Confirm cargo heating system operational and able to maintain Dulang Crude at 50° C. during loaded voyage.

All tankers loading at Dulang Marine Terminal for the first time to include the following additional information:

SSS Length overall and the distance from the bow to centre of the midship manifold.
TTT 1. *For Alongside Berthing:*
  (a) Confirm that 2×12 in. 150 ANSI flanges are available at port midship manifold.
  (b) Advise the number and type of moorings on self-stowing winches with location of port side chock (fairlead) in relation to midship manifold centre line. Specify whether chocks are open or closed type.
 2. *For Tandem Mooring:*
  (a) Confirm that a 16 in. 150 ANSI flange is available at port midship manifold.
  (b) Confirm that the tanker complies with "OCIMF Standards of Equipment Employed in the Mooring of Ships at Single Point Moorings" and that the minimum dimensions of the centre bow fairlead is not less than 600 mm. wide and 450 mm. deep.
 3. The tanker will be required to supply the necessary reducer for the above.
 4. In each case confirm that manifold arrangements comply with "OCIMF Standards for Oil Tanker Manifolds and Associated Equipment".
UUU Confirm that combination of gangway and pilot ladder will be ready on arrival. Only the pilot ladder will be required if freeboard is less than 4.6 m.
VVV Whether vessel is diesel or steam turbine powered.

VHF Communications: Dulang Marine Terminal keeps a 24 hour watch on Channel 12.

Communications language of the terminal is English.

Arrival Procedures: Masters should endeavour to establish contact with Dulang Marine Terminal as soon as they are within VHF radio range. Instructions thereafter will be given for further approach and also the berthing schedule.

BERTHING: *Preparation:* Prior to arrival vessels should prepare the following:

1. Pilot Ladder: A pilot ladder (with 2 side ropes) in combination with the tanker's accommodation ladder, complying with SOLAS recommendations, should be safely and securely rigged on the port side for tandem mooring and starboard side for alongside mooring. So that boarding personnel can first use the pilot ladder until part way up the tanker's side and then transfer safely and easily to the accommodation ladder.

Tankers with a freeboard of less than 4.6 m. need to only rig-up the pilot ladder with the 2 side ropes. Air operated pilot hoists are not acceptable. A responsible officer and competent personnel are to attend the pilot ladder when the Pilot and lifting crew board and leave. A light heaving line and canvas bag should be ready to take on board the Pilot's equipment.

During the hours of darkness, the pilot ladder and adjacent deck areas are to be adequately illuminated.

The tanker will provide a lee for the Mooring Master and lifting crew boat when boarding and leaving.

2. Mooring Equipment:
For Alongside Berthing: Winches, mooring and heaving lines (at each station) are to be ready on the tanker's port side to facilitate berthing on the starboard side of the FSO. 2 or 3 portable rattan or manila fenders with suitable lines are to be ready at the forward mooring station. The tug is usually secured on the starboard shoulder or bow.
For Tandem Mooring: The winch-mounted rope from the forward port winch is to be removed and replaced with a 3 in. messenger rope 200 m. long. The chain stopper and hawser handling equipment are to be inspected and readied for operation.

3. Derricks: For Alongside Berthing: The derrick is to be rigged on the port side for use when connecting the hoses. The size of derrick shall be in accordance with "OCIMF Standards for Tanker Manifolds and Associated Equipment".
For Tandem Mooring: The derrick is to be rigged on the port side to pick-up a tool-basket from the tug/support vessel for the hose connection. This derrick will subsequently be used for lifting, connecting and securing the cargo hose. The derrick shall be in accordance with "OCIMF Standards for Tanker Manifold and Associated Equipment".

4. Manifold:
For Alongside Berthing: The manifold on the port side is to be readied, for connecting 2×12 in. cargo hoses with Camlock couplings. At least 200 mm. clear space behind the manifold is necessary for connecting the Camlock couplings.
For Tandem Mooring: The manifold on the port side is to be readied for connecting 1×16 in. cargo hose with a Camlock coupling. At least 200 mm. clear space behind the flange is necessary for connecting the Camlock coupling.

Floating Storage and Off-loading Vessel (FSO): The FSO is a flat (slab) sided barge, fitted with fenders, cranes, mooring hawser and hose for alongside and tandem loading. Its overall length is 242 m. and the total crude oil capacity is 135,000 kilolitres. The FSO is fitted with a meter and prover system for the measurement of the crude.

A dedicated tug is in close attendance for assisting in the berthing and mooring of the tankers.

Tankers between 40,000 d.w.t. – 85,000 d.w.t. can be accommodated alongside the FSO's starboard side, in which case a dedicated tug will assist in the berthing operations. 2×12 in. cargo hoses will be used for transferring the crude from the FSO to the tanker.

Tankers of the larger sizes, up to 150,000 d.w.t., can be moored in tandem astern of the FSO by means of a mooring hawser secured via a chafe chain to the bow chain stopper of the tanker. Dedicated tug and support vessel will assist in the mooring operation. When so moored, crude oil is transferred from the FSO by 1×16 in. floating hose string to the port midship manifold of the tanker.

Berthing and Mooring: Prior to berthing, the Pilot/Mooring Master will discuss with the Master of the tanker the intended berthing/mooring operation and make sure that the tanker is fully manoeuvrable. He will also inspect the tanker's ballast to ensure that only clean ballast is carried and that its disposal overboard will be safely carried out if done simultaneously with the loading of cargo.

Berthing is carried out only during daylight hours, whereas unberthing can take place at any time of the day or night.

After ensuring that the manoeuvring area is clear of other traffic, and that weather and sea conditions are suitable, the Pilot/Mooring Master will manoeuvre the tanker for the approach to the FSO. The heading of the tanker will normally be such that she will have the wind ahead, but currents may have to be taken into account.

Alongside Berthing: When the tanker is about 1.0 nautical miles from the stern of the FSO, the tug will be made fast, using its own ropes, on the tanker's starboard shoulder normally in the push/pull mode.

The tanker will then be positioned, with minimum speed through the water, 50 m. – 80 m. off the starboard side of the FSO and then either a mooring boat will bring a messenger line to the tanker's bow or a light line connected to the messenger will be shot onto the tanker's forecastle head/foredeck by means of a line throwing device. When the messenger line is on board, the tanker's first two mooring ropes will be attached, retrieved by the FSO and made fast. A similar operation occurs aft.

When within heaving-line throwing-distance, the remaining moorings will be sent across to the FSO in a planned sequence, according to conditions. The tanker will the heave itself alongside the FSO.

It is important that 2 – 3 portable fenders of rattan or manila be ready to be deployed over the bow in the event there is any contact by the tanker to the FSO.

Depending upon prevailing and forecast weather conditions, the tanker's moorings will be augmented by wire-rope/nylon-grommet moorings from the FSO.

As soon as the tanker is safely moored alongside the FSO, a gangway will be rigged between the two vessels and Malaysian Officials, surveyors and the tanker's Agent will board the tanker for clearance and tank inspection, etc.

Tandem Mooring: A Mooring Master, Mooring Supervisor and other essential personnel will board the tanker for clearance and tanker inspection. The Mooring Master will be the Carigali representative on board the tanker. The Mooring Supervisor will advise the tanker's crew in hooking-up the hawser and hose. The Malaysian Officials will clear the tanker and the surveyors will inspect the tanker's cargo tanks and take ullages.

Immediately after all personnel are on board, a tool basket will be lifted on board at the midship manifold area. The tanker should have the derrick plumbed 3 m. off the ship's side. A guide line should be connected to the derrick lifting hook. Sufficient crew must be available on deck at that time to expedite the lifting of the tool basket onboard.

The following equipment, provided by the tanker, shall be in position and ready for use when the Mooring Master and Mooring Supervisor board:

On the forecastle-head:

(1) One messenger line, minimum 3 in. circumference × 200 m. long.

(2) A selection of shackles, strops and tools (sledge hammer, crowbar, etc.).

On the Poop-deck:

(1) One messenger line, minimum 3 in. circumference × 200 m. long.

When the approach to the FSO commences, the support vessels and tug will be in attendance to assist.

Approach to the FSO involves manoeuvring at close quarters to the FSO. It is imperative, therefore, that all measures are taken to ensure that there is no loss of steering during the manoeuvring.

The Mooring Master will test the tanker's engines ahead and astern and also the full port to starboard rudder movement before commencing his approach run.

The hawser messenger line is connected to the 10 in. pick-up rope followed by a 76 mm. or 54 mm. chafe chain (depending upon the size of the tanker). This chain in turn is shackled to a 24 in. circumference nylon hawser shackled to a 76 mm. chafing chain which is secured to the stern of the FSO.

During the approach of the tanker to the FSO, the tanker's crew, under the advice of the Mooring Supervisor, will prepare the forecastle for the mooring operation. This will include passing one messenger rope through the centre bow fairlead (or other fairlead designated by the Mooring Master) ready to be sent to the tug/support vessel.

Once the tanker is close to the FSO, the tug/support vessel will manoeuvre alongside the tanker and take on board the messenger line. It will then attach the tanker's messenger to the end of the hawser messenger line. The tanker will then heave in both messengers, taking up slack as the tanker approaches the stern of the FSO, until the end of the 10 in. pick-up rope is secured.

Once the 10 in. pick-up rope is safely onboard and connected to the winch, tension should be applied as the tanker moves slowly forward to the FSO. Care should be taken not to apply any excess tension on the line, until the chafe chain on the end of the pick-up rope is secured in the chain stopper.

During this operation, the distance and speed of the tanker's bow to the stern of the FSO will be continuously relayed by the Mooring Supervisor and Captain of the tug/support vessel to the Mooring Master on the bridge. The tug/support vessel will be utilised, if required by the Mooring Master, for manoeuvring the tanker into position.

After the hawser chafe chain is safely secured in the tanker's bow chain stopper, the tanker will then be allowed to settle back gently onto the chafing chain and mooring hawser assembly until she is riding safely to the stern of the FSO.

On completion of mooring operation, the tug/support vessel will be secured to the stern of the tanker, to prevent the tanker from oscillating and coming into contact with the FSO. Until the tug or the vessel is secured, it may be necessary to use the tanker's engine for this purpose.

Caution: Very slow astern should be used due to the recoil action of the hawser.

Once the vessel is secured, the tanker's engines must be maintained in a state of constant readiness, and at no time during the tanker's stay at the terminal may the engines be immobilised.

The Mooring Master will remain onboard the tanker throughout the lifting operation.

Unberthing and Unmooring: Prior to unberthing from alongside and unmooring from tandem, the Mooring Master will discuss these procedures with the Master of the tanker to ensure a safe disconnection. Upon receipt of the cargo documents, the unberthing/unmooring shall commence.

Alongside Berthing: The loading hose shall be disconnected while waiting for the cargo documents. Upon receipt of the documents, the tug will be made fast to the tanker's starboard bow, using it's tow rope. All FSO wire-rope/nylon-grommet moorings will be cast-off followed by the tanker's mooring ropes as per the Mooring Master's instructions.

Tandem Mooring: Immediately after the hose is disconnected, and the receipt of the cargo documents, unmooring of the tanker will commence. The support vessel at the stern of the tanker will be released at the discretion of the Mooring Master. On the instructions of the Mooring Master, the mooring hawser will be hove in to disconnect the chain from the chain stopper. The mooring chain and hose will then be released and the tanker will be allowed to drift away from the FSO. While the tanker moves away with or without the assistance of the tug/support vessel, the mooring hawser will be lowered into the water by easing back on the pick-up rope.

When the tanker is safely clear of the FSO, the tool basket will be lowered to the tug and the personnel will disembark.

HOSES: *Hose Connection:* The hose connection will be done by the tanker's crew, supervised by a responsible officer from the tanker. The FSO Mooring Supervisor will oversee the operation to ensure proper procedures are followed.

Alongside Berthing: 2×12 in. hoses with 150 ANSI Camlock fittings will be connected to the tanker's midship manifold. The hoses will be transferred from the FSO to the tanker using the FSO crane. If the weather conditions are poor, the tanker's derrick may be used to facilitate and expedite the hose hook-up.

Tandem Mooring: Upon completion of the mooring operation, a single cargo hose will be connected to the tanker's port midship manifold which must be prepared prior to the mooring to accept the 16 in. hose with a 150 ANSI Camlock fitting.

Depending upon the freeboard of the tanker, the weight of the hose string to be lifted could approach 8.5 tons. All tankers calling at Dulang Marine Terminal must have their port derrick rigged for a safe working load of 10 tons.

The tug will tow the end of the hose string to the tanker's port midship manifold area and connect the tanker's cargo hook to the hose pick-up chain. The hose will then be lifted to a position sufficiently above the main deck so that the hang-off chain can be connected to the snubbing chain which will be secured to the manifold bitts. The blank will be removed and the hose connected to the manifold by means of a Camlock coupling.

When the hose is connected, the length between the manifold and the rail will be supported by a nylon sling suspended from the tanker's derrick. This is to ensure that there is no undue strain on any part of the manifold or hose string.

Hose Disconnection: The hose disconnection will be done by the tanker's crew, with the FSO Mooring Supervisor monitoring the operation to ensure it is done correctly.

Alongside Berthing: On completion of loading, and when the tanker is informed by FSO Cargo Control Room that all flow has ceased, the tanker's manifold valve will be closed and drain valve opened. Once hoses have been drained, they can be disconnected from the tanker's manifold and blanked.

Tandem Mooring: During the last few minutes of loading, insignificant quantity of pour point depressant chemical shall be injected at the manifold to prevent crude solidification, for crude that will remain inside the hose string after the loading. This treatment will have negligible effect on the crude properties.

Upon completion of loading, the tanker will then be advised to first close the manifold valve followed by the hose end butterfly valve. The hose will then be disconnected, blanked and lowered into the water with the hose pick-up rope secured to the tanker's manifold bitt while waiting for unmooring.

LOADING: *Transfer Plan:* Prior to commencement of loading, an agreed oil transfer plan must be established and understood by both parties. This will include loading rates for start-up, maximum bulk, tank top-off rates and also the emergency stop procedure.

When the tanker is ready, the responsible officer will advise the Mooring Master who will in turn advise the FSO Cargo Control Room by VHF that loading may commence. The FSO will then commence the loading at the agreed start-up rate, adhering to the start-up procedures. The rate will not be increased to the bulk loading rate until it has been established that there are no leaks or significant rise in pressure on the loading line(s).

The loading operations will be controlled by VHF radio communication between the FSO and Tanker Control Rooms.

Tankers are required to maintain a 24 hour watch on the bow, midship manifold and bridge/cargo control room during the lifting and communications procedures are to be established to provide for prompt stoppage of the transfer in case of overflow or other emergency.

When the tanker is at the terminal, the boiler tubes are not to be blown. Every precaution must be taken so that no sparks escape from the funnel.

Crude Transfer Rate: The FSO pumping rate ranges from 4,500 kl./hr. to 5,700 kl./hr.

In order to expedite turn-around time, tankers are encouraged to take maximum loading rate when they can safely do so. Care must be taken not to overload.

Caution: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressure which may result in damage to the loading hoses and terminal facilities. Tankers will be held liable for damage resulting from failure to observe this precaution.

Heating Coils: Tankers shall be equipped with cargo tank heating coils able to maintain Dulang Crude Oil at a temperature of at least 50°C. during the voyage or as instructed by the Owner, Charterer or Consignee.

Dulang Crude Properties: Stabilised Dulang Crude Oil loaded from the FSO will have the following approximate characteristics:

API	39.4.
Specific gravity	0.8276.
Temperature	48°C – 50°C.
H_2S content	Nil.

It is a waxy crude with a pour point of about 32°C. and requires heating.

BALLAST: Tanker Owners and their Masters are responsible for complying with all International Convention Laws and Local Regulatory Body Requirements concerning pollution of the sea, having particular regard for this area.

There are positively no facilities for disposal of dirty ballast. It is the tanker Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his ship. This includes oily water from bilges, crude residues from previous voyages or any other matter that may result in pollution of the sea. Any fines imposed and cleaning costs shall be for tanker's account.

If evidence of oil appears during deballasting, the tanker will be rejected forthwith and will not be accepted until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If during inspection or during the progress of loading it is revealed that the tanker's tanks are not tight or that oil is leaking from the ship, the tanker may be rejected or refused further loading. The tanker will not be accepted later for loading, unless satisfactory evidence of repair is submitted, duly certified by a recognised Classification Society.

Any tanker rejected because of dirty ballast or sea pollution will automatically nullify her "Notice of Readiness" and will lose any priority of position for loading.

The tanker must have proper trim and sufficient ballast and/or cargo already on board for safe handling, having due regard to existing weather and sea conditions. The propeller is to be covered and stern trim should not be more than 2 m.

Tankers equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, provided that approval is first obtained from the Representative.

All spillage of oil must be reported immediately to the Dulang Marine Terminal Representative and a detailed report must be written, signed and submitted by the Master of the tanker concerned.

Deballasting: Ballast water pumped overboard should not contain oil or mixtures containing oil (a mixture with an oil content of one hundred or more parts in one million parts of the mixture) in accordance with Section 27(1) of the Environmental Quality (Amendment) Act, 1985 with regard to Malaysian waters and Section 20(1) of the Exclusive Zone Act, 1984 with regard to the exclusive economic zone.

The tanker's ballast tanks will be carefully inspected. Tankers with dirty or doubtful ballast water will not be accepted unless analysis of water samples for oil content show otherwise.

POLLUTION: The terminal is located within Malaysia's Exclusive Economic Zone and the Master or Owner of a vessel is subject to prosecution if oil is discharged or escapes into the sea.

Dulang Crude is a high wax content oil which solidifies at sea temperature. It is therefore imperative that escape of oil, whether from cargo or otherwise is prevented.

Master and Owner will be held liable for all clean-up costs and third party claims.

Oil Spills: Should an overflow or hose leak occur during loading: Immediately advise the FSO to stop loading, retain the spillage onboard and clean up or recover the oil. All spillage of oil must be reported immediately to the Dulang Marine Terminal Representative and a detailed report must be written and submitted by the Master of the tanker concerned.

TIME: GMT plus 8 hours.

SERVICES: The Dulang Marine Terminal is located offshore and the only means of transport to and from shore is via helicopter to Kerteh or by supply boat to Kemaman Supply Base (KSB). The terminal can therefore not provide logistical support to tankers calling at the terminal. There is:

No shore leave.
No crew changes.
No provisions or stores.
No bunkers or fresh water.
No Consulates/Embassies.
No engine repairs or spare parts.
No dirty ballast/slop disposal.
No doctor or clinic, however in emergencies, exceptions may be permitted for humanitarian reasons.

Only authorised personnel are permitted to board tankers while at the terminal.

GARBAGE DISPOSAL: Dumping of garbage overboard, of whatever kind, is strictly forbidden.

CHARTS: USNOA 71024, B.A. 2660(a), B.A. 2414, B.A. 3543.

SAFETY: *Ship/Shore Safety Check List:* A Ship/Shore Safety and Pollution Check List is used at the terminal and all operations closely follow recommendations contained in the International Safety Guide for Oil Tankers and Terminals.

Deck Watch and Mooring Management: It is imperative that a continuous deck watch, with a responsible officer, be kept at all times.

The quantity of cargo received by the tanker and the pressure at the loading manifold should be recorded and compared with those of the FSO at regular intervals.

Unberthing due to Weather/Emergency: If wind and sea conditions, or the load on the alongside moorings or the tandem mooring hawser, reach designed limits for the terminal, loading will be suspended and, where necessary, the tanker unberthed.

The tanker's engines should be on stand-by at all times for immediate evacuation of the berth, in case of an emergency.

VHF Communications Failure: VHF radio communications should be maintained at all times. Loading operations will be stopped if contact is lost.

Electrical Storms: Loading will be stopped during thunderstorms or when there are electrical storms in the immediate vicinity.

Fire: In the event of fire on board, immediately advise the FSO Cargo Control Room to stop loading, and prepare to disconnect the hose(s) and evacuate the berth. The tug standing-by may assist if required, under the FSO Mooring Master's guidance. In case of VHF communications failure, sound 10 short blasts on ship's whistle.

WEATHER: *Reference:* China Sea Pilot Volume 1.

Weather: S.W. Monsoon (May to September).

Winds are generally from the South or S.W. during this period and can reach gale force in local squalls.

N.E. Monsoon (November to March):

Winds are generally from the N.E. during this period, intermittent bad weather occurs during this monsoon and high sea and swell conditions can persist for extended periods.

Transition Periods (April and October):

Winds are generally variable during the transition periods, but may freshen in the late afternoon and early evening. Occasionally, local gale force squalls may occur, but these are generally of short duration.

Currents: Ocean currents are variable except in the N.E. monsoon period when a 1.0 knot – 1.5 knot S.W. setting current predominates.

CAUTION: Severe squalls often occur suddenly without warning. It is therefore important when moored that an alert deck watch is kept at all times.

AUTHORITY:

Operator: Petronas Carigali, Peninsular Malaysia Operations, Petronas Office Complex, 24300 Kerteh, Kemamam, Terengganu, Malaysia. *Tel:* 09-540722. *Cables:* Cagali. *Telex:* 51487 MA. *FAX:* 09-540855.

Shippers: Petroliam Nasional Berhad (Petronas), International Marketing Division, Menara Dayabumi, Kompleks Dayabumi, Jalan Sultan Hishamuddin, 50050 Kuala Lumpur, Malaysia. *Cables:* Petron. *Telex:* 30839 MA, 30696 MA, 30032 MA. *FAX:* 03-230-4931.

Esso Production Malaysia Inc., Supply Department, Kompleks Antarabangsa, Jalan Sultan Ismail, P.O.Box 10857, 50728 Kuala Lumpur, Malaysia. *Cables:* Essoprod/Esso Supply. *Telex:* 30293 MA. *FAX:* 03-242-8760.

KEMAMAN, Malaya: 04.16 N. 103.29 E. (See Plan)

LOCATION: Kemaman Port is situated on the East coast of peninsular Malaysia in position Lat. 04° 16.6′ N., Long. 103° 28.8′ E.

PORT LIMITS: The seaward limits of Port of Kemaman are contained between Lat. 04° 16′ 24″ N. and Lat. 04° 11′ N., and Long. 103° 34′ E.

DOCUMENTS: Following documents should be kept ready for submission:

Document	*Number of Copies*					
	Port	*Customs*	*Immigration*	*SD Police*	*Harbour Master*	*Port Health*
Declaration of Health	–	–	–	–	–	1
Crew List	1	1	3	1	1	1
Passenger List	1	1	1	1	1	1
Vaccination Certificates	–	–	–	–	–	Orig.
Derat/Derat Exemption Certificates	–	–	–	–	Orig.	Orig.
Transit Order	–	–	–	–	–	Orig.
Crew identification Documents	–	–	Orig.	R	–	–
Stowaway List	–	1	1	1	1	1
Bonded Stores/Personal Effects	–	1	–	–	–	–
Port Clearance	P.C.	Orig.	–	–	Orig.	–
Import Manifest	2	2	–	–	–	–

Safety Equipment Certificate	–	–	–	–	Orig.	–
Loadline Certificate	–	–	–	–	Orig.	–
Radio Safety Certificate	–	–	–	–	Orig.	–
Ship Construction Certificate	–	–	–	–	Orig.	–
Tonnage Certificate	–	–	–	–	Orig.	–
Ship's Articles	–	–	Orig.	–	Orig.	–

Note: Numerals indicate number of copies.
'Orig.' indicates original
'R' indicates on request
'P.C.' indicates photocopy

Identification documents should be arranged in the same sequence as Crew List.

PILOTAGE: The pilot can be contacted at the port on VHF Channels 16, 12, 11, 9 and 68. The pilot meets in the vessel in the port area. Pilotage is available round the clock. Pilot ladder must be on lee side.

Anchorage position for vessels awaiting a pilot is Lat. 04° 11.5′ N., Long. 103° 31.9′ E.

ANCHORAGES:

Petroleum Anchorage: Lat. 04° 10.4′ N., Long. 103° 30.7′ E., in depths of 20 m.

Deep Water Anchorage: Lat. 04° 12.2′ N., Long. 103° 33.1′ E., in depths of 24 m.

Working Anchorage: Lat. 04° 12.9′ N., Long. 103° 32.2′ E., in depths of 22 m.

Supply Vessel Anchorage: Lat. 04° 14.6′ N., Long. 103° 29.5′ E., in depths of 13 m.

The above anchorages have a bottom of mud and sand with good holding ground providing shelter in the basin.

Also see "Pilotage".

APPROACHES: *Entrance Channel:* The depth in the dredged channel is 15.0 m., length is 3.0 km. and minimum width is 250 m. The channel is marked with lighted Beacons No. 1 – 4 and an onland transit marker.

MAX. SIZE: Vessels having a max. size of 120,000 d.w.t., length of 260 m., beam 35.0 m. and a max. draft of 13.5 m., can berth alongside.

HEALTH: Healthy vessels are brought to berth. Suspect or infected vessels are taken to Quarantine Anchorage to await clearance from Port Health Authorities. Automatic health clearance is not granted.

RADIO: Radio messages are routed through Penang Radio.

VHF: Vessels should contact "Kemaman Port Control" on Channel 16.

Working channels for Kemaman Port Control are Channels 16, 11 and 68.

RADAR: There is no port radar station in Kemaman Port.

TUGS: 2 tugs available. Tugs lines are used.

1 tug (2×600 h.p.) and 1 tug (2×1,600 h.p.).

BERTHING:

Quay Name	*Length* (m.)	*Depth* (m.)	*Cargoes handled*
1-KSB	360	9.0	Supplies for offshore activities.
2-East Wharf	648	14.5	General cargo/bulk cargo.
3-Export Terminal (LPG)	320	14.0	Liquid petroleum gas.

BULK CARGO FACILITIES: Commodities handled are steel billets, hot briquette iron, scrap iron, ilmenite ore and copper slag. Cargoes handled are mainly to cater for the industries near the port.

CRANES: There is one container gantry crane with 38 ton S.W.L. and 2 privately owned cranes to handle bulk cargoes of 37 tons and 25 tons capacity.

STEVEDORES: The port works 24 hours a day, 365 days a year.
MEDICAL: Hospital/doctor are not available at Kemaman Port. General hospital/doctor are available in Kemaman Town, which is about 8 km. from Kemaman Port.
TANKERS: There are no facilities for oil tankers in Kemaman Port. The facilities at the LPG Export Terminal cater for Petronas (National Oil Company) activities.
BALLAST: No slop reception facilities available.
DENSITY: 1023.
FRESH WATER: Fresh water is supplied at 50 metric tons per hour, and is pumped from a reservoir (at KSB) direct to vessel.
FUEL: Available by truck. Advance notice required.
FIRE PRECAUTIONS: Fire fighting tugs are compulsory for LPG vessels only.
CONSULS: The nearest consuls of most countries are located in Kuala Lumpur, the capital of Malaysia, which is about 350 km. from Kemaman Port.
REPAIRS: Minor repairs possible.
DRY DOCKS: The nearest dry dock is 150 km. away in Kuala Terengganu.
SURVEYORS: The Surveyors available nearby are Caleb Brett and Ranaco Marine in Kemaman Port area, and SGS in Kuantan Port area.
GANGWAY/DECK WATCHMEN: The employment of watchmen from shore is not compulsory.
HATCHES: Crew open/close hatches.
CUSTOMS ALLOWANCES: See "Kuantan".
AIRPORT: The nearest airports are Kerteh Airport, 40 km. distant, and Kuantan Airport, 75 km. distant.
TIME: GMT plus 8 hours throughout the year.
HOLIDAYS: Port works 365 days a year.

Overtime payments are payable on public holidays as determined by the Terengganu State Government and Government of Malaysia. Overtime payments are also payable for weekends and after office hours, in which for Kemaman Port the weekends are after 1245 hrs. Thursday, and the whole of Friday, and after office hours are from 1600 hrs. until 0800 hrs.

On public holidays, as listed below, a charge of an additional 50% for pilotage and towage, and additional 25% for mooring is imposed.

Public holidays for Kemaman:

New Year Day – 1st January.
Chinese New Year – varies from year to year.
Aidil Fitri – varies from year to year.
Aidil Adha – varies from year to year.
National Day – 31st August.
Christmas – 25th December.
Deepavali – varies from year to year.
Maal Hijrah – varies from year to year.
Maulidur Rasul (Prophet Muhammad's Birthday).
Sultan Terengganu – 21st March.
Coronation Day.
Sultan Terengganu's Birthday – 29th April.
Labour Day – 1st May.
Wesak Day.
King's Birthday.
Nuzul Quran.

POLICE/AMBULANCE/FIRE: Police 09-592222. Ambulance 09-593333. Fire 09-594444.
TELEPHONES: Telephones cannot be placed on board.
SHORE LEAVE: Shore leave is permitted.
IDENTIFICATION CARDS: Seaman's Book or Passport are sufficient.
GARBAGE DISPOSAL: Garbage disposal is compulsory at the East Wharf only. Drums are provided. Charges are as follows:

Ships under 750 g.r.t.: $10.00 per vessel per day or part thereof.

Ships 750 g.r.t. – 3,000 g.r.t.: $30.00 per vessel per day or part thereof.

Ships over 3,000 g.r.t.: $50.00 per vessel per day or part thereof.

WASTE OIL DISPOSAL: Available on request. Arrangements made with private contractors. Rates negotiable with contractors.
SEAMAN'S CLUBS: None.
CURRENCY: Malaysian Ringgit (MRG).
GENERAL: *Stores:* Provisions are plentiful.
Tides: Tidal range 3.2 m.
Wind/Sea: Maximum 25 knots during North East Monsoon with choppy sea from November to January.
DEVELOPMENTS: There are plans to develop the port into a distribution centre of bulk cargoes for the ASEAN region.
AUTHORITY: Kemaman Port Authority, East Wharf Building, Teluk Kalong, 24000 Kemaman, Terengganu, Malaysia. *Tel:* 09-531590,09-531706 (Marine Department). *Telex:* PORTKM MA 51334. *FAX:* 09-531599. *Contact:* See "Kuantan".

KERTEH TERMINAL: 04.31 N. 103.33 E. (See Plan)

PORT LIMITS: The port area is enclosed between Latitudes 4° 30′ N. and 4° 37′ N. and between Longitudes 103° 26.8′ E. and 103° 33′ E.
LOCATION: The Kerteh Port Marine Terminal is situated off the East Coast of Peninsular Malaysia in the South China Sea approximately 13 miles South of Kuala Dungun.

The marine facilities consist of 3 single buoy moorings located in a 20 square mile Restricted Area which extends about 5 miles from the coast.

One CALM operated by Petronas Penapisan (Terengganu) Sdn. Bhd. (PP(T)SB), suitable for vessels up to 85,000 d.w.t. (limited by loaded draft of 11.1 m.) is used for loading refined products from the Petronas Refinery.

Two SALMs, operated by Esso Production Malaysia Inc. (EPMI) are used for loading crude oil from the Terengganu Crude Oil Terminal (TCOT).

DOCUMENTS: Masters are required to prepare documents prior to arrival in port such as:

Last Port Clearance.
Ship's Certificate.
Manifests (List of Cargo onboard).
8 Crew Lists.
8 Passenger Lists.
2 Stores Lists.
2 Personal Effects Lists.
2 Lists of Narcotics.
2 Vaccination Lists.
5 List of Arms/Ammunition.

Boarding and Duty Personnel: Tankers will be boarded, normally on arrival, by Mooring Masters, Loading Operators, Customs, Agents, Surveyors and Petronas Representatives. They will usually stay onboard till the vessel's departure and should be provided with meals and suitable accommodation. However, alcoholic beverages should not be offered to shore personnel, nor should vessel's personnel consume alcoholic drink during the vessel's stay at the terminal. A very serious view is taken of the matter which is an important aspect of vessel and terminal safety.

PREPARATIONS: Vessels should prior to arrival prepare:

(a) *Pilot Ladder:* Safely and securely rigged a combination of pilot ladder with 2 side ropes and ship's accommodation gangway, so arranged that personnel can first use the pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder. Vessels with less than 9.0 m. freeboard need only rig the pilot ladder with 2 side ropes. Air operated pilot hoists are not acceptable. A light heaving line should be ready to take the Mooring Masters' and Loading Operators' equipment onboard.
(b) *Derricks:* Derrick to be rigged on port side.
(c) *Bow Arrangements:* Vessels should be prepared to be moored to the SPM's and to make ready at forecastle: 1 coil of messenger rope of 2.5 in. circumference, minimum length 200 m., and one empty self-stowing drum.
(d) *Reducers:* The port side manifold is to be prepared for either 12 in. (PP(T)SB) or 16 in. (TCOT) hoses. In addition, 2 chain blocks SWL 2 tonnes and small wire strops to be available.
(e) Pilot hoist is not acceptable.

PILOTAGE: Two Mooring Masters normally board tankers at pilot station from a launch or tug.

Pilot Station No. 1 is located at N.E. Corner Buoy (position Lat. 4° 37′ N., Long. 103° 31′ E.).

Pilot Station No. 2 is located at position Lat. 4° 34′ N., Long. 103° 33′ E.

During the N.E. monsoon period (November-March) vessels may be requested to pick-up personnel at a position off Tanjong Berhala about 20 miles S.E. of the terminal area.

Masters should ensure that the Malaysian Flag together with the appropriate International signals are displayed for a vessel approaching port.

NAVIGATION: *Charts:* U.S. 71024, B.A. 770, B.A. 1374, B.A. 2660 (a), B.A. 2414, B.A. 3543 and Mal 6441 (Kerteh Port approach chart. Published by the Royal Malaysian Navy).
Approaches: Approaching the anchorage area from the N.E. – S.E. quadrant, there are no outlying dangers.

Pulau Tenggol, a steep-to 900 ft. high island, situated 20 miles N.E. of the terminal area, and Bukit Labohan, a 1,200 ft. high hill just South of the terminal, are excellent radar targets, easily identified.

The Kerteh Port Marine Control is equipped with a radar-based vessel tracking and traffic management computer system, and will advise vessels when VHF contact has been established.

CAUTION:

(i) Beware of the presence of fishing craft as normally they do not show any lights at night.
(ii) The refinery flare and gas plant flare are visible at a great distance, but should not be relied upon for position fixing purposes as they may not be burning at all times.
(iii) Vessels should give all structures and working vessels a wide berth and not approach closer than 2 miles.

Restricted Area: The Restricted Area is bounded by imaginary lines connecting the following points:

1. Lat. 4° 34′ N., Long. 103° 28′ E.
2. Lat. 4° 37′ N., Long. 103° 31′ E.
3. Lat. 4° 32′ N., Long. 103° 33′ E.
4. Lat. 4° 33′ N., Long. 103° 28′ E.

Vessels should under no circumstances enter the Restricted Area without the service of the Mooring Master.

NAVIGATION AIDS: In addition to the navigational aids noted on the Navigation Charts, the following Navigational Lights and buoys are placed:

1. Kerteh Port Sea Buoy:

Position	Lat. 4° 32′ N., Long. 103° 34.9′ E.
Shape	Pillar
Colour	Red and white vertical stripe
Light Characteristic	Fl. (W) every 10 secs.
Visibility	8 nautical miles
Radar Reflector	8 nautical miles

2. Paton Bank Buoy:

Position	Lat. 4° 32′ 41″ N., Long. 103° 31′ 27″ E.
Shape	Can
Colour	Red
Light Characteristic	Fl. (R) 5 secs.
Visibility	8 nautical miles
Radar Reflector	8 nautical miles

3. N.E. Corner Buoy:

Position	Lat. 4° 37′ N., Long. 103° 31′ E.
Shape	X
Colour	Yellow
Light	Fl. (4) Y 10 secs.

4. Tg. Labohan Light:

Position	Lat. 4° 31′ 18″ N., Long. 103° 28′ 18″ E.
Characteristic	Fl. (W) 4 secs.
Visibility	15 nautical miles

5. Danger Line Buoys:

These buoys are 1,000 m. apart and indicate the 15 m. (50 ft.) Admiralty Chart Datum line.

Shape	Pillar
Colour	Yellow
Light Characteristic	N1 – Fl. Y 4 secs. N2 – Gp. Fl. Y (3) – 5 secs. N3 – Gp. Fl. Y (4) – 10 secs.
Visibility	2 nautical miles
Positions as follows:	
B-4 Danger Buoy N1	Lat. 4° 33′ 33.7″ N., Long. 103° 28′ 46.7″ E.
B-3 Danger Buoy N2	Lat. 4° 34′ 06.5″ N., Long. 103° 28′ 38.3″ E.
B-2 Danger Buoy N3	Lat. 4° 34′ 35.9″ N., Long. 103° 28′ 29.1″ E.

6. Refinery SBM:

Position	Lat. 4° 34′ 32.2″ N., Long. 103° 29′ 02.1″ E.
Colour	Orange with white superstructure.
Light Characteristic	White, Fl. Letter U (· · –) every 15 secs.
Visibility	2 nautical miles

7. SALM No. 1:

Position	Lat. 4° 34′ 21.9″ N., Long. 103° 30′ 18.1″ E.
Colour	Yellow with black vertical stripes
Light Characteristic	White, Fl. Letter U (· · –) every 7.5 secs.
Visibility	2 nautical miles

8. SALM No. 2:

Position	Lat. 4° 33′ 26.5″ N., Long. 103° 30′ 45.4″ E.
Colour	Yellow with black vertical stripes
Light Characteristic	White, Fl. Letter U (· · –) every 15 secs.
Visibility	2 nautical miles

The above buoys with the exception of the SBM and SALM's are subject to shift position and should not be relied upon for navigational purposes.

When approaching the Terminal, Kerteh Port Marine Control will advise if the above buoys are in position.

ANCHORAGE: The Anchorage area is 4 miles square bounded by Lat. 4° 30.0′ N. and Lat. 4° 32′ N., and Long. 103° 32.0′ E. and Long. 103° 34.0′ E.

Vessels are strictly prohibited to anchor in any position, whether inside or outside the Restricted Area other than in the designated Anchorage Area. Crude and gas pipelines and a telephone cable are laid in the vicinity and are not shown on all charts.

During severe weather conditions it is not advisable to anchor as holding ground is poor and vessel should slowly steam 5 to 10 miles off the coast, and remain within VHF radio range.

In the event VHF radio contact cannot be established, Masters are advised not to anchor but keep to seaward of the Anchorage Area and the Restricted Zone. Contact will then be made by the Terminal's Support Craft.

ACCEPTANCE CRITERIA:
PP(T)SB: (Product).

I-*SPM Limitations:*

(i) SPM is designed to handle vessels of 15,000 to 35,000 d.w.t. However, partially loaded vessels up to 85,000 d.w.t. can also be accommodated up to a maximum draft of 11.1 m.

(ii) SPM is equipped with 2 mooring hawsers fitted with 2 in. diameter chafing chains which requires Panama leads with minimum dimensions 450 mm. × 600 mm. Bollards with snotter wires and bow shackles (See III-(x)) can be used as an alternative to secure the chafing chains.

(iii) Maximum loading rate of 20,000 bbls.p.h.

(iv) Minimum flow rate of 3,100 bbls.p.h. is acceptable for initial loading and topping-off operations. The operation at this flow rate should not exceed 15 minutes.

(v) Maximum loading temperature 75°C.

(vi) Maximum allowable working pressure of hoses 225 p.s.i. (15.8 kg./sq.cm.).

(vii) Weather Limitation: Vessels to stop loading when wind speed reaches 22 knots. When wind speed reaches 27 knots and 12 ft. swell, vessel to disconnect hose and be ready to vacate berth. However, final decision to vacate the berth lies with the Mooring Master at the scene.

II-*Port Limitation Ex-Kerteh Refinery-Safe-Dimensions of Vessel:*

	Vessel Data	
	Min.	*Max.*
Size	20,000 d.w.t.	85,000 d.w.t.
Length	163 m.	265 m.
Width	20 m.	38 m.
Loaded Draft	8.8 m.	11.1 m.

III-*Tanker Requirements:*

(i) The tanker must be able to handle the hose rigging on the port side and must be able to lift and swing safely 5 ton over and above the ship's rail. Hose has to be lifted to a height of 4.5 m. – 6.0 m. above ship's rail.

(ii) The tanker must have sufficient clear deck area adjacent to the cargo manifold. Distance from manifold to ship's rail should be a minimum of 3.7 m. Free area around centreline of manifold must be 36 in. as the end of the rail hose near the loading flange has a 30 in. diameter.

(iii) Tanker must have 12 in., 150 p.s.i. ASA (or ANSI) manifold flange connection on port side to fit on a 12 in. Camlock coupling loading/discharge hose.

(iv) Tanker must have sufficient chain falls and rigging gear to secure the loading hose.

(v) Product tankers must be able to receive water plug of 300 bbls. in a segregated tank or clean slop tank prior to commencement of loading. The water plug to be pumped back on completion of the loading plus an extra 200 bbls. of clean water (if required by PP(T)SB.

(vi) On arrival all tankers must have adequate segregated or clean or permament ballast for safe manoeuvring at all times (i.e. Propeller must be adequately submerged without excessive trim).

(vii) Refinery cannot receive slop or oily ballast, therefore any ballast discharged must be absolutely clean.

(viii) Minimum 10 ton capacity port side derrick required.

(ix) Tanker's crew are responsible for mooring, hose connection and unmooring.

(x) Mooring of product tankers at Kerteh SPM: (PPTSB)

All product carriers proposing to use the SPM facilities at Kerteh should have available onboard in case of requirement the following:

2×12 m.×54 mm. dia. (for tankers up to 40,000 d.w.t.) or 2×12 m.×64 mm. dia. (for tankers above 40,000 d.w.t.) wire rope bridles (fibre core) with a thimbled eye at one end and a soft eye on the other end.

2×50 ton safe working load bow shackles.

1×200 m. × 30 mm. and 1×100 m. × 30 mm. messenger lines.

The Loading Operator, who is responsible for the loading operations, will inspect the ship on arrival to ensure the ship's compliance to Kerteh Terminal's requirements for final acceptance. PP(T)SB reserves the right to reject any non-compliance vessel at Kerteh Port.

TCOT: (Crude)

Tankers between 40,000 and 250,000 d.w.t. can be accepted at the TCOT SALMs provided they:

1. Re: Mooring equipment, etc. comply with "Recommendations for Equipment Employed in the Mooring of Ships at Single Point Moorings", published by OCIMF 1990, particularly Section 6.1 to 6.5., i.e. in brief:

   (i) Tankers of 140,000 d.w.t. or more are not acceptable during N.E. Monsoon (November to March). During other periods, these tankers must be accompanied by a tug of 6,000 t.p.h. or more, capable of operating in a pull/push mode and fitted with a towing line with stretcher rope and eye large enough for securing on bitts.

   Tugs to arrive 3 hours earlier than vessel for inspection prior to berthing operation.

   (ii) Tankers up to 140,000 d.w.t. to have bow mooring arrangements for connecting a single 76 mm. (3 in.) chain.

   (iii) Tankers over 140,000 d.w.t. to have bow mooring arrangement for connecting 2×76 mm. (3 in.) chains.

   (iv) Bow fairleads for 76 mm. (3 in.) chain to measure at least 600 mm. × 450 mm.

   (v) All tankers to have bitts, bollards, bow stoppers of minimum SWL:

Under 100,000 d.w.t.:	1×100 tonnes.
100,000 – 150,000 d.w.t.:	1×200 tonnes.
Over 150,000 d.w.t.:	2×200 tonnes.

   with adequate forward winch heaving capacity for heaving up corresponding chain system with buoy.

   Note: It is recommended that all tankers calling at this terminal be fitted with approved bow stoppers for safe and efficient mooring and unmooring operations.

   (vi) Tankers with one bow stopper to prepare one self-stowing drum and tankers with 2 bow stoppers to prepare 2 self-stowing drums to accommodate 1 or 2 × 150 m. (10 in.circumference) pick-up ropes.

   Note: Warping drum not to be used to heave up chain system on board for safety reasons.

2. Have 1×16 in. standard ANSI-B 16.5, BS 1560 Series 150 or equivalent flange ready at port side manifold, with bitts, straps, tuggers, etc. ready for connecting 1×16 in. over-the-rail hose to the manifold. The connecting 16 in. manifold flange shall be fitted to a spool piece of minimum length 200 mm. to allow sufficient space to connect the Camlock coupling of the hose end. Port side manifold arrangement to comply with OCIMF "Standard for Oil Tanker Manifolds and Associated Equipment" – Page 17. SWL of port side derrick to comply with ISGOTT (Appendix C.10.2 weight of hose strings) for single buoy moorings i.e.: Minimum SWL 10 tonnes for port side derrick is required.
3. Maximum vessel loaded draft at SALM-1 is 17.4 m. (57 ft.). Maximum vessel loaded draft at SALM-2 is 20.4 m. (67 ft.).
4. Have on arrival adequate clean or segregated ballast for safe manoeuvring and be able to limit freeboard by loading crude and discharge segregated/clean ballast simultaneously.

During the N.E. monsoon season (November-March), vessels must arrive with forward draft not less than 5.50 m., adequate ballast or cargo onboard to have propeller covered and with no more than 6 ft. trim by the stern. Vessels with only CBT system on board must be able to retain ballast or to load and discharge simultaneously without any risk of pollution or cargo contamination.

NOTE: There are no ballast receiving facilities and ballast pumped overboard must be absolutely clean.

HEALTH: Radio Pratique should be requested through a local shipping Agent.

TUGS: A tug and mooring launch will be in attendance during mooring operation.

SBM: One tug of 2,600 h.p. and 2 launches.

SALMs: Two tugs, 3,500 h.p. and 1,000 h.p.

Note: See "Acceptable Criteria – TCOT – Section 1(i)" for tug requirements for tankers over 140,000 d.w.t.

RADIO: All radio traffic to be channelled through Singapore Radio. Vessels to maintain radio watch on the same station.

(a) Cables for Petronas to be addressed to PP(T)SB, Kerteh. Telex: Petref MA 51326 and copy to "International Marketing, Petronas", Kuala Lumpur. Telex: Petron MA 30032 or MA 30696.

(b) Cables for EPMI to be addressed to TCOT, Kerteh. Telex: MA 51384 and MA 51397 with copies to Essosupply Kuala Lumpur MA 30621.

Singapore Radio works on the following frequencies:–

Call Sign	*Transmit (kHz)*	*Receives (kHz)*	*Watch (GMT)*	*Remarks*
9VG4	2182	2182	0000-2400	Call, replay and safety
9VG87	4125	4125	0000-2400	
9VG88	6215.5	6215.5	0000-2400	
9VG89	8780	8257	0000-2400	Common calling frequencies
9VG90	13162.9	12392	0000-2400	
9VG91	17294.9	16522	0000-2400	
9VG5	2760	2527	0000-2400	Working frequencies for passing of radio telegrams
9VG60	4369.8	4075.4	0000-2400	
9VG63	8728.2	8204.3	0000-2400	
9VG67	13156.6	12385.8	0000-2400	
9VG52	2780	2685	On demand

9VG66	13147.3	12376.5	On demand	
9VG68	17270.1	16497.2	On demand	
9VG69	17356.9	16584	On demand	
9VG70	22630.1	22934.1	On demand	

Traffic lists will be transmitted on the following listed frequencies, except during transmitter maintenance periods when the list will be broadcast on the two frequencies consecutively.

Transmit (kHz)	*Receives (kHz)*	*Time (GMT)*
2760	2527	0005, 0405, 0805 and 1205
8728.2	8204.3	
2760	2527	1605
4369.8	4075.4	

Approximate geographical location of Singapore Radio Station is Lat. 01° 20′ N., Long. 103° 40′ E.

Notice of Arrival:

Upon departure from last port or immediately after having received instructions to proceed to Kerteh Port Marine Terminal, Master is requested to cable to either EPMI (if scheduled to load crude) or to PP(T)SB (if scheduled to load product) the following:

AAA	Vessel name, previous name (if any), call sign and flag.
BBB	ETA, date and local time (GMT + 8 hours).
CCC	Master's name and nationality.
DDD	G.r.t., n.r.t., d.w.t., s.d.w.t. and Light Displacement Tonnages.
EEE	Last discharge port and intermediate ports.
FFF	Next discharge port and intermediate ports.
GGG	Number of crew and nationality.
HHH	Number of passengers.
III	Grade and Quantity of cargo on arrival, previous cargo and cargo to be loaded at Kerteh Marine Terminal and loading rate per with 1×16 in. hose connection for crude loading and 1×12 in. connection for product loading.
JJJ	Whether previous cargo or any cargo on board has high H_2S contents and H_2S concentration in tank vapour spaces.
KKK	Malaysian light dues receipt number and date.
LLL	Arms on board.
MMM	Deballasting. Confirm that the vessel is able to load and deballast simultaneously.
NNN	Arrival drafts.
OOO	Any leaks which could cause pollution or affect loading.
PPP	Pratique Granted: Place/Date. If any sickness on board or of clean bill of health.
QQQ	Confirm inert gas system operational and whether all cargo tanks in inert atmosphere on arrival.
RRR	Length overall, breadth and bow to centre of manifold distance.
SSS	Size of port manifold flange and confirm that 2×12 in. (150 p.s.i.) ASA flanges are available for product tankers on port side manifold or confirm that 1×16 in. 150 ASA flange is available for crude tankers on port side and able to connect Camlock couplings. Confirm that manifold arrangements comply with OCIMF standards for oil tankers manifold standard and associated equipment.
TTT	Confirm that combination of gangway and pilot ladder ready on arrival. Only pilot ladder is required if freeboard is less than 9 m.
UUU	If loading products, is vessel fitted with 2-valve separation for parcels?
VVV	Is vessel fitted with segregated ballast tanks?
WWW	Is vessel diesel or turbine powered?
YYY	Confirm that vessel can moor to an SPM and indicate what bow connection equipment is available. (See "Berthing").
ZZZ	What is SWL of port side derricks for hose hoisting.

Updated ETA to be reconfirmed 72, 48, 24 and 12 hours prior arrival.

VHF: When within range, vessels should contact Kerteh Port Marine Control initially on Channel 16 for berthing instructions and assignment of working channel. Working Channels are 9, 67, 69 and 73.

The language of the Terminal is *English*.

Arrival Procedures: Masters should endeavour to establish contact with Kerteh Marine Control as soon as they are within VHF radio range.

Instructions thereafter will be given for further approach procedures.

RADAR: Marine control tower has radar.

BERTHING: *Petronas Penapisan (Terengganu) Sendirian Berhad (PP(T)SB) SPM:* The Catenary Anchor Leg Mooring (CALM) is located in 60 ft. of water in position Lat. 04° 34.5′ N., Long. 103° 29′ E. It is designated for 85,000 d.w.t. tankers on restricted draft. The SBM is fitted with 2 mooring hawsers and 2 strings of loading hoses, one for loading black oil and one for loading clean products.

CAUTION: The SBM is only a distance of 1 nautical mile from the beach. The bottom shelves from the SPM for a distance of approximately 5 cables (900 m.) to a Danger Line of 3 buoys in 50 ft. A.C.D. of water.

When the SBM is at maximum excursion, i.e. 2 mooring chains tight on the weather side, no vessels, such as tugs or standby boats, can approach this SBM closer than 50 ft. Otherwise, they will foul the anchor chain.

Therefore the terminal insists that vessel engines and crew are at all times on standby whilst moored to this SBM.

TCOT SALMs: SALM 1 is located in 26 m. of water in position: Lat. 04° 34.4′ N., Long. 103° 30.3′ E. It is designed for fully loaded 140,000 d.w.t. tankers.

SALM 2 is located in 28 m. of water in position: Lat. 04° 33.5′ N., Long. 103° 30.7′ E. It is designed for fully loaded 250,000 d.w.t. tankers with certain limitations.

Both SALMs are fitted with a single hawser system terminating in a 3 in. chafing chain. Vessels over 140,000 d.w.t. will be moored at SALM 2 and a second hawser, also terminating in a 3 in. (76 mm.) chain, will be fitted.

Berthing and Mooring: Prior to berthing the Mooring Master will discuss with the Master the berthing and mooring operations and ascertain that the vessel is fully manoeuverable. He will also inspect the vessel's ballast to ensure that only clean ballast is carried and its disposal overboard will be safely carried out simultaneously with the loading of cargo.

The second Mooring Master will discuss with the Officer on the bow the mooring operation and will via the Officer supervise the mooring operation performed by the vessel's crew.

After ensuring that the manoeuvring area is clear of other traffic and weather and sea conditions are suitable, the vessel will be manoeuvred for the approach to the mooring buoy. The heading of the vessel will normally be such that she will have the wind ahead but tidal effects may have to be taken into account. A tug of suitable power and a mooring launch will be in attendance. During the final approach, the mooring launch will pick up a messenger line from the vessel's bow and maintain station approximately 91 m. ahead of the vessel. When the mooring launch reaches the end of the mooring system's pick-up line, the vessel's messenger line will be made fast and the vessel's crew will heave in the slack as the vessel moves closer to the mooring buoy.

When the pick-up line is on board the crew will commence heaving on this line the chafing chain is on board and secured.

The Refinery *SBM is fitted with 2×54 mm. diameter chafing chains* which require *Panama Leads with minimum dimensions of 450 mm. × 600 mm.* It is the vessel's responsibility to ensure that the 2 chafing chains on the Refinery SBM are brought on board in equal lengths in order to share the load equally between the 2 mooring hawsers which are seperate and not mated or secured together in any way.

The crude oil *SALMs are fitted 1×3 in. (76 mm.) diameter chafing chain,* which requires a Panama Lead with minimum dimensions of 450 mm. × 600 mm. Vessels greater than 140,000 d.w.t. will be berthed at SALM No. 2 and two chain mooring systems will be connected, which requires 2 Panama fairleads as per the OCIMF recommendations.

Chafing chains will be connected to or bow stoppers. An alternative connecting system will be used when vessels are not fitted with the connections mentioned above. Bollard with 6 m. long×64 mm. diameter snotter wire and bow shackles can be used as an alternative to secure the chafing chain.

HOSES: *Connection Hoses:* Once the vessel is moored, the floating hose(s) will be towed alongside and connected to the vessel's port manifold under the supervision of the Mooring Master.

Connecting and disconnecting of hose(s) will be the responsibility of the vessel's crew.

While vessels are moored, it is imperative that a careful watch is maintained on the mooring systems and cargo hose.

Main engines should be kept on standby and should be ready for immediate use in the event the vessel starts to ride up on the mooring buoys.

On the Refinery SBM the floating hose strings are 12 in. ASA on the rail and have a total length each of 230 m. Camlock couplings are fitted.

On the crude SALMs 1 floating hose string terminates in 16 in. ASA flange on the rail and is fitted with butterfly valve – lock arrangements with Camlock. (Also see "Radio" – SSS).

LOADING: *Loading Rate:* Prior to the commencement of loading operations, an agreed upon oil transfer plan must be established. This will include commencement, maximum and topping-off loading rates and emergency stop procedures.

Maximum loading rate at the Refinery SBM will be approximately 20,000 bbls.p.h. through each hose and at the crude SALM, approximately 40,000 bbls.p.h. Vessels should take maximum flow, with due regard to safety, in order to expedite turnaround time. Minimum bulk loading rate shall not be less than 25,000 bbls.p.h. Care should be taken not to overload. Topping-up rate for products is between 2,100 – 3,800 bbls.p.h. Final topping-up rate for crude is between 10,000 – 14,000 bbls.p.h.

Vessels with or without permanent ballast tanks should retain ballast onboard until the vessel has taken sufficient cargo to be manoeuvrable, after which simultaneous loading and deballasting operations could commence. Such practice improves turnaround time and keeps the windage area down to acceptable levels. Vessels with excessive deballasting time may incur considerable delay in berthing. At crude SALM, no deballasting is allowed prior to loading.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressure which may result in damage to the loading hoses and Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution. The Refinery and TCOT will automatically stop pumping when back pressure reaches 200 p.s.i. and 220 p.s.i. respectively.

Electrical Storms: Loading will be suspended when severe Electrical Storms are in the near vicinity to prevent the possibility of cargo gases igniting.

SAFETY/FIRE/POLLUTION:

General: A Ship/Shore Safety and Pollution Check List is used at the terminal and all operations closely follow recommendations in the International Safety Guide for Oil Tankers and Terminals.

Fire: In the event of fire onboard: Immediately stop loading, advise the Mooring/Loading Master onboard and prepare to disconnect hoses and evacuate the berth. A well-equipped tug is standing by and may assist under the Mooring Master's guidance. In case of VHF communications failure sound 10 short blasts on the ship's whistle.

Pollution: The terminal is located in an extremely pollution sensitive area, a short distance from high amenity beaches with a valuable and vulnerable marine life. It is therefore imperative that all pollution of the sea is avoided. Master will be held liable for all clean-up-costs and third party claims and Owners promptly advised in case of pollution.

Deballasting: Ballast water pumped overboard should not contain oil or mixture containing oil (a mixture with an oil content of 100 parts or more in 1 million parts of the mixture) in accordance with the Section 27(1) of the Environmental Quality (Amendment) Act, 1985 (See "Below") with regard to Malaysian waters and Section 10(1) of the Exclusive Economic Zone Act, 1984 (See "Below") with regard to the exclusive economic zone.

Vessels ballast tanks will be carefully inspected. Vessels with dirty or doubtful ballast water will not be accepted unless analysis of water samples for oil content show otherwise.

Oil Spills: Should an overflow or hose leak occur during loading; immediately advise shore to stop loading and retain oil onboard and clean-up or recover oil.

The stand-by tug is equipped with spill-booms, skimmers and oil spill dispersant spraying booms. However, spraying of chemicals should only be done as a last resort after clearance from the relevant Authorities has been obtained.

Garbage Disposal: Dumping of garbage overboard, of whatever kind, is strictly forbidden.

Appendix:

SECTION 10(1), EXCLUSIVE ECONOMIC ZONE ACT, 1984

If any oil, mixture containing oil or pollutant is discharged or escapes into the exclusive economic zone from any vessel, land-based source, installation, device or aircraft, from or through the atmosphere or by dumping:

(a) the Owner or Master of the vessel, if the discharge or escape is from a vessel;
(b) the Owner or occupier of the place on land, if the discharge or escape is from land;
(c) the Owner or person in charge of the installation or device, if the discharge or escape is from an installation or a device; or
(d) the Owner or Pilot of the aircraft, if the discharge or escape is from an aircraft,

shall each be guilty of an offence and shall be liable to a fine not exceeding 1,000,000 ringgit.

SECTION 27(1), ENVIRONMENTAL QUALITY (AMENDMENT) ACT, 1985

No person shall, unless licensed, discharge or spill any oil or mixture containing oil into Malaysian waters in contravention of the acceptable conditions specified under Section 21.

NOTES: (i) SECTION 21, ENVIRONMENTAL QUALITY ACT, 1974

The Minister, after consultation with the Council, may specify the acceptable conditions for the emission, discharge or deposit of wastes or the emission of noise into any area, segment or element of the environment and may set aside any area, segment or element of the environment within which the emission, discharge or deposit is prohibited or restricted.

(ii) SECTION 2, ENVIRONMENTAL QUALITY ACT, 1974

"Mixture containing oil" means a mixture with such oil content as may be specified by the Minister or, if such oil content is not specified, a mixture with an oil content of one hundred parts or more in one million parts of the mixture.

MEDICAL: No doctor or clinic available, however in emergencies, exceptions may be permitted for humanitarian reasons.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

REPAIRS: Not possible.

Note: Vessels are strictly prohibited to carry out hot work or repairs of any kind which could cause fire hazard *or* immobilise engine at the berth or within the port area except at the designated anchorage area, with the approval of Terminal Superintendent or Representative.

SURVEYORS: Trident Malaysia Sdn. Bhd., Straits Trading Building, Lebuh Pasar Besar, Kuala Lumpur. Tel: 03-926410. Telex: MA 39551.

Caleb Brett Malaysia Sdn. Bhd., Room 301, 3rd Floor, Bangunan Yayasan Selangor, Jln. Bukit Bintang, Kuala Lumpur. Telex: MA 30579.

CUSTOMS ALLOWANCES: Usual allowance for ports in Malaysia.

REPATRIATION: Not possible.

TIME: GMT plus 8 hours.

WEATHER: The seasonal weather patterns are broadly divided into three types and the terminology used is consistent with that of S.E. Asia. These three types are:

1. S.W. Monsoon (May to September): Winds are generally from the South or S.W. during this period and can reach gale force in local squalls.

2. N.E. Monsoon (November to March): Intermittent bad weather occurs during this monsoon and high sea and swell conditions can persist for extended periods.

3. Transition Periods (April and October): Winds are generally variable during the monsoon transition periods but may freshen in the late afternoon and early evening with the sea breeze effect. Occasionally, local gale force squalls may occur but these are generally of short duration.

CAUTION: The severe squalls often occur suddenly without warning. It is therefore important whether at anchor or moored that an alert deck watch is kept.

Refer to China Sea Pilot – Volume 1 for further meteorological information.

TIDES AND CURRENTS: *Currents:* The tides off Kerteh vary widely, with periods of only one HW and one LW each lunar day, there are also marked inequalities in times and heights of high and low waters.

The tides at Kerteh are on average 30 minutes earlier than the standard Port of Tanjung Gelang but there are wide variations.

The ocean currents off the Kerteh Coast are the result of the monsoon wind pattern, setting South during the N.E. Monsoon and North during the S.W. Monsoon. The average currents are:

January	1.0 knot	180°
April	0.5 knots	170°
July	1.0 knot	010°
October	0.5 knots	variable

Combination Tide and Current: The strength of the current is dependent on the strength of the monsoon wind and when winds are strong the current can increase to 2 knots or more.

Thus in the N.E. Monsoon the combination of current and flood tide can produce a South running stream of 3 knots or more, and with a very weak North running stream. The same occurs in reverse during the S.W. Monsoon.

CAUTION: When at anchor it should be noted that with the tidal streams and currents in "conjunction" they can exceed 3 knots in strong winds and as the holding ground is not good, it is important that a very careful check is kept on the ship's position at all times.

EMERGENCY CO-ORDINATING CENTRE: Contact Kerteh Marine Control on VHF Channel 16 or other assigned working Channels 67, 69 and 73. Tel: 09-8271277, ext. 5233 (Kerteh Marine Control). Telex: MA 51384.

SHORE LEAVE: No shore leave.

GENERAL: *Language:* The language of the Terminal is English.

Mail: (a) Mail for tankers loading at PPTSB or Petronas cargoes at TCOT should be addressed to the ship's Agent.

(b) Mail for personnel on incoming crude tankers loading an Esso cargo may be sent to EPMI's Kuala Lumpur Office marked for the attention of the "TCOT Marine Superintendent" for transmission to the vessel when it arrives at Kerteh Port Marine Terminal.

Personnel: Only authorised personnel are permitted to board vessels while berthed.

Provisions: Not available.

Ballast: No dirty ballast or slop disposal.

Terminal: The Kerteh Port Marine Terminal is located off-shore and the only means of transportation available to the shore is by marine support craft to Tanjong Berhala Supply Base situated 24 miles to the S.E. As such, the terminal can offer no logistical support to the vessels calling at the Kerteh Port.

AGENT: See "Port Kelang".

KOTA KINABALU (including Sapangar Bay), Sabah: 05.59 N. 116.00 E. (See Plan)

PORT LIMITS: Gaya Bay and waters to the S.W. bounded by a line joining Tanjong Aru and the Northern point of Pulau Gaya thence a line to Gaya Head including rivers entering same for a distance of 600 ft. inland from the mouth of the river.

DOCUMENTS:
Documents to be produced on arrival:
Port Clearance from Last port.
6 copies Inward Cargo Manifests.
2 copies Hatch List, *or* 1 copy Stowage Plan.
9 copies Crew Lists.
9 copies Passenger Lists.
2 copies Bonded Stores Lists (incl. Arms and Ammunition Lists).

In addition, the Master has to complete a Shipping Arrival Report Form and a Maritime Declaration of Health Form.

Notes: (a) If vessel arrives from any port outside those declared infected.

(b) These 2 copies (Inward Cargo Manifests) must be certified by the Master as follows: "I hereby certify that to the best of my knowledge and belief this manifest is complete and correct. . . . .Master".

To be supplied to Ship before Departure:
1 set Agents Outward Manifests.
2 copies Passenger Lists for Immigration.*
1 copy Passenger Lists for Customs.*
1 set Manifests for Customs.*
*To be supplied by Agent.

If vessel departs to a port outside Sabah, 2 copies outward crew list are also required for Immigration.

Where possible, cargo manifests and stowage plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

PILOTAGE: Not compulsory. Pilot normally available between 0600 hrs. and 1800 hrs. only. Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot Services are required. Pilot boats are between 30 ft. – 40 ft. length and equipped with VHF/AM sets – 80.4 MHz frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within port limit. Marine Department Tel. 52213.

ANCHORAGES: (Also see "Health").
Special Anchorages and Prohibited Areas

(1) *Prohibited Anchorage:* No vessels shall anchor as to swing within 3,000 ft. of the F.R.G. Light on the N.N.E. end of the Authority Wharf in approx. position Lat. 05° 59′ 51″ N., Long. 116° 04′ 30″ E. Vessels under 150 ft. in length may anchor within this area, East of a line joining the F.R.G. Light and Gueritz Shoal Light Beacon.

(2) *Prohibited Area:* Except with the previous permission in writing of the Authority, no logs or timber shall be allowed to lie afloat within the area – Eastward of a line drawn in a 172° direction from Grieve Reef Beacon.

(3) *Explosives and Dangerous Goods Anchorage:* Vessels having explosives and Dangerous Goods on board shall anchor within a line drawn from a position in Lat. 06° 01′ 21″ N., Long. 116° 05′ 45″ E. thence in a 360° direction for 6.5 cables thence in a 270° direction for 10 cables thence in a 180° direction for 6.5 cables thence in a 090° direction for 10 cables to the starting point.

(4) *Dangerous Petroleum Anchorage:* A vessel having dangerous petroleum on board shall anchor within a line drawn from a position in Lat. 06° 00′ 42″ N., Long. 116° 05′ 45″ E. thence in a 270° direction for 10 cables thence in a 360° direction for 6.5 cables thence in a 090° direction for 10 cables thence in a 180° direction for 6.5 cables to the starting point.

(5) *Quarantine Anchorage:* A vessel which is required to proceed to a Quarantine Anchorage shall anchor within an area bounded by a radius of 3 cables from a position in Lat. 06° 01′ 34″ N., Long. 116° 03′ 46″ E.

RESTRICTIONS:

1. Entering. Vessels with dangerous cargo such as benzene are not allowed to stay alongside wharf or to berth after 1800 hrs. Vessels arriving from any port within hours of day-light not allowed to berth until they see the signals at the Customs House directing them. This applies equally to vessels arriving on schedule as well as unscheduled vessels and any infringement of these regulations can have very serious consequences.

Master of ship not sailing within 48 hours after port clearance to report to Harbour Master reason for not sailing, and, if so required obtain a fresh port clearance.

2. Shifting. The Authorities must be informed prior to shifting.

3. Immigration. No person may leave ship before clearance has been given by Customs/Immigration Officers.

4. Currency. No restriction on amount of currency which can be brought into this State but max. amount allowed to be taken out is MAL$100. Foreign exchange must be conducted through recognised banks.

MAX. SIZE: Max. size at general cargo berths is 20,000 d.w.t.

HEALTH: (Also see "Regulations"). *(a)* Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board unless vessel comes from infected port. Instead, Maritime Declaration of Health to be filled out and handed to Boarding Officer of Health Department who will require 1 copy of Crew List and 1 copy of Passenger List. Vessels should cable Agent prior arrival advising last port of call and whether vessel is healthy. Pratique normally cabled to ship but if unreceived, vessel need not proceed to Quarantine anchorage unless coming from infected port.

(b) Vessels arriving from ports outside the State will anchor until boarded by Authorities unless previously instructed by telegram to come alongside.

TUGS: Tug 280 h.p. available to assist vessels berthing and unberthing without a Pilot at inner berth. Ship's lines used.

RADIO: Singapore Radio recommended. (Also see "Health"). Local radio call sign "Control K.K.".

Berthing Application: Application for berthing has to be made 24 hours prior to actual time when berthing is required.

Details and Requirements: Name of vessel, gross and net tonnage, length overall, draft (fore and aft) ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded, number of gangs required, amount of water, Pilot requirements. Vessels given berth on first come, first served basis.

Tankers: As much notice of arrival as possible is essential.

(a) If first port in Sabah and communication is difficult send message through Singapore Radio.

(b) If to be second or subsequent port in Sabah ensure that Agent/Installation Representative in the previous port gets an accurate ETA before vessel's departure so that this can be passed on by telephone.

VHF: Port Control on VHF Channels 12 and 16 (office hours only).

To reach the Agents directly during office hours contact 9WH26 on VHF Channel 26. The call charges will be reversed by 9WH26 which is an unofficial telecommunications VHF station.

BERTHING:

Berth No.	*Berth Length* (ft.)	*Depth* (m.)	*Capacity* d.w.t.
1	400	9.10	20,000
2	400	9.10	20,000
3	350	9.10	20,000
4	400	7.62	5,000
5	370	5.79	3,000
6	300	5.79	4,000
7	400	7.62	7,000
8	300	6.88	18,000
9	300	6.88	4,000
10	400	7.50	5,000
11	320	5.5 – 6.8	700
12	420	5.5 – 6.8	2,000

Note: The Old Wharf was closed to berthing and operations with effect from 31st December, 1987.

Ro-Ro: Facilities available at the Fast Erect Jetty. Max. size: LOA 180 m., beam 25 m. and max. draft 5.5 m.

CARGO: (Also see "Berthing".)

1. Tally: The Agent can provide tally clerks at ship's expense.

2. Inward cargo: Ship's responsibility ceases as soon as consignees take delivery ex-sling.

3. Transhipment cargo: Transhipment cargo handles via Port Authority Godown.

4. Outward cargo: All cargo is brought to the ship alongside wharf either by tractors and trailers.

5. Special cargo regulations:

(a) Dangerous Cargo: Vessels carrying explosives as cargo: All vessels arriving at, or remaining within the limits of, any port with explosives on board shall fly the gunpowder flag at the foremast.

No vessel having explosives on board shall, without the permission in writing of the Harbour Master, come or remain within 500 yards of the shore or any other vessel:

Provided that such a vessel may, with the written permission of the Harbour Master, come and remain within such limit where:

(i) such explosives are wholly and exclusively of Class V (Fulminate) or Class VI (Ammunition) or both such classes in the second schedule; and

(ii) the total quantity of such explosives does not exceed two thousand pounds; and

(iii) such explosives are carried in a properly constructed magazine duly certified as such by a British Board of Trade Surveyor or by an officer fulfilling similar functions appointed by a Government of any British possession or the vessel has a certificate from one of Her Majesty's Inspectors of Explosives or from an Officer fulfilling similar functions appointed by the Governments of Singapore, the Federation of Malaysia or Hong Kong and approved by the Governor that all the explosives on board such vessel have been properly stored and the Master of such vessel further certifies in writing that no other dangerous cargo is carried by the vessel; or where:

(iv) such explosives are wholly and exclusively explosives of one or any of Class III (Nitro-compound), Class IV (Chlorate mixture) or Class VII (Firework); and

(v) the total quantity of such explosives does not exceed three thousand pounds.

No such explosive shall be landed, shipped or transhipped between sunset and sunrise without the previous permission in writing of the Harbour Master. Any Master of a vessel offending against the provisions of this section shall be liable to a fine of MAL$1,000.

(b) Livestock: Pigs or cattle may not be loaded or discharged on any wharf without permission of the S.P.A.

CARGO HANDLING FACILITIES: *Cargo Handling Equipment:*

Equipment	*Manufacturer*	*No. of Unit*
Forklifts	Mitsubishi FD20	2
	Mitsubishi FD30	12
	Toyota 3FD30	56
	Komatsu FD30-8	8
	Toyota 3FD60	4
	Toyota FD190	2
	Toyota FD250	1
Towing Tractors	Chamberlain	8
	Toyota TD20	25
	Toyota 42-3TD20	2
	Toyota TD35	13
Trailers (5,000 kg.)	Hargill (Volvo)	30
	T.S. Engineering	18
	Besi Asia Engineering	21

Trailers (20,000 kg.)	Hargill Malaysia	6
	Rumpun Hijau	2
	Hargill	8
Trailers (30,000 kg.)	Wagon Engineering	2
Trailers (40,000 kg.)	Hargill	2
Straddle Carriers	Valmet	2

Pallets, Pallet Bridles, Wire Net Slings, Car Slings and Lorry Sling are also available for hire.

Storage Facilities:

Godown 1: 6,693 sq.m.	
Godown 2: 8,366 sq.m.	
Godown 3: 4,648 sq.m.	
Godown 4: 2,789 sq.m.	
Godown 5: 2,882 sq.m.	
Container Yard (bitumen)	2.5 acres (1.01 hect.)
Container Yard (Concrete)	2.08 acres (0.842 hect.)
Paved Area	4.20 acres (1.70 hect.)
Open Storage Area 1 (between bridges)	6,420 sq.m.
Open Storage Area 2 (opposite canteen)	6,770 sq.m.
Open Storage Area 3 (behind Godown 3)	6,330 sq.m.
Open Storage Area 4 (behind Godown 4)	2,700 sq.m.
Wharf Deck Storage Area (Northern extensions)	2,700 sq.m.
Ideal for sawn timber (7 days' free storage)	16,500 sq.m.

STEVEDORES: Stevedores provided by SPA; labour supplied for working in ships' holds and on ships' winches (if required). For cargo delivered direct ex-wharf consignee provides wharf labour; cargo for Sabah Ports Authority godown labour provided by Sabah Ports Authority.

Arrangement of stevedores should be made with 48 hours' notice to Shipping Agent. Average gang performance is 20 tons per gang hour for conventional traffic (excluding vehicles) and 40 tons per gang hour for pre-palletised cargo (excluding vehicles). Cargo work is carried out in 3×4 hour periods namely:

1st Period	0730 – 1130 hrs.
2nd Period	1300 – 1700 hrs.
3rd Period	1800 – 2200 hrs.

Work outside these hours is by prior application.

MEDICAL: Medical Officer of Health: Medical Services Department, Tel. 54303. Vaccination and inoculation (incl. Yellow Fever) can be arranged via Agent at any time during working days. In case of death on board, Agent and Harbour Master as well as the Police to be informed.

TANKERS: The port operates on a "first come-first served" basis in allocating the jetty but palletised vessels will get priority. Port Rules state that no other vessel allowed alongside when tanker discharging A-class products. As cargo vessels stop discharging at 2200 hrs., tankers are normally allowed to discharge A-class cargo until the following morning at 0600 hrs.

Berth is timber piled with concrete deck jetty, continuous 650 ft. by 40 ft. wide. Maximum displacement allowed – 13,000 tons. Maximum draft allowed – 22 ft.

Vessels berth either port or starboard side alongside according to the weather and tidal conditions prevailing at the time of berthing. Tankers berth on the outer side of the jetty only.

Fresh water available from wharf only. Vessels to provide hoses. Advance notice of requirements advisable. Rate 25 t.p.h.

Shore Line System:

(a) For Mogas, 1,440 ft.×8 in.

(b) For Jet A.1/Kerosene 1,450 ft.×8 in.

(c) For Gas oil/Light Fuel Oil, 1,380 ft.×8 in. hoses used to connect ship and shore.

(d) For Bitumen, 1260 ft.×8 in.

Sapangar Bay Oil Terminal: *Location:* 06° 05′ 10″ N., 116° 07′ 19″ E.

Pilotage: Pilotage at Sapangar Bay Oil Terminal is optional. Vessel's Master is advised to contact the Marine Department at Kota Kinabalu with any enquiries. Pilot boarding and anchorage position is at the Petroleum Anchorage at Lat. 06° 01′ 00″ N., Long. 116° 05′ 15″ E.

Navigational Aids: 5 channel markers with flashing lights are provided at Sapangar Bay. Three of the markers have red flashing lights and two have green flashing lights. The location of all the markers are as follows:

Marker No.	*Location*		*Light*
1	6° 4′ 39.5″ N.	116° 6′ 6″ E.	Red
2	6° 5′ 15″ N.	116° 6′ 46″ E.	Red
3	6° 5′ 30″ N.	116° 7′ 19″ E.	Red
4	6° 5′ 19″ N.	116° 7′ 34″ E.	Green
5	6° 4′ 39″ N.	116° 7′ 5.5″ E.	Green

Jetty Head: The jetty head/main berth is located at Lat. 06° 05′ 10″ N. and Long. 116° 7′ 19″ E.

Restrictions: Berthing and unberthing possible daily between 0600 hrs. and 1800 hrs.

Max. Size: 30,000 d.w.t. Max. draft 36 ft. Max. LOA 815 ft.

Radio/VHF: Radio/VHF facilities not available, terminal uses Kota Kinabalu Marine Tower facilities only.

Tugs: Tugs not available. Shipping Agents are required to contact Marine Department or private company.

Berthing: Length of jetty head 82.32 m. Depth alongside 12.2 m. Tidal rise 2.3 m.

Pipelines: There are a total of 8 common users' pipelines and 1 single user pipeline between the jetty head and the individual user's boundaries.

Discharge pipeline – common users	*Max. discharge rate*
10 in. dia. Gasolene (Premium and Regular)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Diesel (DE 1)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Jet A-1 (DPKE)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Domestic Kerosene (DKE)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Light Fuel Oil (LFO)	500 t.p.h. at 150 p.s.i.g.
3 in. dia. LPG (V)	500 cu.m.p.h. at 150 p.s.i.g.
6 in. dia. LPG (L)	500 cu.m.p.h. at 150 p.s.i.g.
Discharge pipeline – Single users	
10 in. dia. Bitumen (B)	500 t.p.h. at 150 p.s.i.g.
Bunkering pipeline – Common users	
6 in. dia. Diesel (DE 2)	200 t.p.h. at 150 p.s.i.g.

Bitumen and bunkers handled through hoses and all other products by marine loading arms.

Security: The Authority provides its own security personnel.

Fire Fighting Facilities: 2 Tower Fire Monitors are available at the Jetty Head which are capable of delivery of sea water or foam at 1,350 U.S.g.p.m. each. The monitors are hydraulic powered and electrically controlled remotely at the foam making plant about 150 ft. behind the jetty head.

Medical: Medical facilities only available at Menggatal town about 11 km. from Sapangar Bay.

Fresh Water: Fresh water is available at the jetty head at a pumping rate of about 50 tonnes per hour.

Slop Facilities: Not available.

Authority: Sapangar Bay Oil Terminal, Pejabat Pengurus Terminal, P.O.Box No. A/150, Teluk Sapangar, 89357 Inanam. Tel: (088) 411069, 411079, 411090, 411070. Telex: Saport MA80074. Contact: Terminal Manager.

DENSITY: Average 1020.

FRESH WATER: Can be supplied from wharf. Supply rate is 20 tons per hose per hour.

FUEL: Not available.

CONSULS: Denmark, Indonesia, Japan and United Kingdom.

REPAIRS: Some private firms and workshops undertake small engine and deck repairs in Kota Kinabalu.

DRY DOCKS: See "Labuan" and "Sandakan".

GANGWAY/DECK WATCHMEN: Not necessary. Agents may exercise option.

OPENING/CLOSING HATCHES: Normally by stevedores.

CERTIFICATES: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany. Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.

CARGO GEAR: Ship's gear used, also for containers ex-feeder ships and heavy lifts in major ports.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

HOLIDAYS: Cargo work can be arranged if necessary during official holidays but not for Hari Raya Puasa, Chinese New Year and Christmas Day. Also see "Sandakan".

POLICE/AMBULANCE/FIRE: Police/Fire, Tel: 088-54111. Hospital, Tel: 088-54911.

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

TELEPHONES: Available.

BANKS:

Sabah Bank Berhad, G.P.O. W.D.T.132, Sinsuran Complex, 88999 Kota Kinabalu, Sabah, Malaysia. Tel: 088-218911. Telex: MA 80694. Fax: 088-231184.

Hongkong & Shanghai Banking Corp. Ltd., 56, Gaya Street, 88817 Kota Kinabalu, Sabah, Malaysia. Tel: 088-212622. Telex: HBC 80031. Fax: 088-2133041.

SHORE LEAVE: Crew members allowed ashore after inspection by Immigration Officer.

IDENTIFICATION CARDS: Not required.

GARBAGE: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Malaysian Ringgit (MYR$).

REGULATIONS: *(a)* Arrival and Departure:

1. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

(c) Priority. First come first served.

DELAYS: Due to weather conditions only.

GENERAL: Ship Chandlers: All kinds of stores and provisions available.

Recreation facilities. Two cinemas in town which show English films frequently. Three tennis courts available and football matches may be arranged. Sports Club is next to town Padang, about half a mile from wharf and golf and yacht clubs situated on beach at Tanjong Aru, 4 miles from town.

Surveyor: Harrisons & Crosfield (S) Ltd. are Lloyd's Sub-Agents and can arrange a surveyor provided prior warning is given.

Fumigation: No facilities.

'R' indicates on request
'P.C.' indicates photocopy

Identification documents should be arranged in the same sequence as Crew List.

APPROACH CHANNEL: A straight 220 m. wide channel aligned on 311°(T) leads from Pilot Boarding Station to Harbour Entrance. Length of this channel is 4.8 km. The dredged length (6.5 cables) is marked by 2 pairs of light buoys. Leading lights mark the centre line of the channel with minimum depth of 13.0 m. During N.E. monsoons underkeel clearance (allowance) of 3.5 m. is required.

The following navigational aids are available within the port approaches:

Designation	*Lat.*	*Long.*	*Light*
Channel Buoys:	*(N.)*	*(E.)*	*Characteristics*
No. 1	3° 57′ 02″	103° 27′ 57″	Fl. G. 5 secs.
No. 2	3° 56′ 52″	103° 27′ 50″	Fl. R. 5 secs.
No. 3	3° 57′ 26″	103° 27′ 29″	Gp.Fl. (2) G.10 secs.
No. 4	3° 57′ 03″	103° 27′ 36″	Gp.Fl. (2) R.10 secs.

Front Transit Lt.	3° 58′ 56″	103° 25′ 59″	Fl. Amber 1.5 secs.
Rear Transit Lt.	3° 58′ 57″	103° 25′ 36″	Fl. Amber 3 secs.
Tg. Gelang Lt. Ho.	3° 57′ 49″	103° 26′ 19″	Gp.Fl. (3)W. 10 secs.

Tidal streams: – During HW, direction is Southward and during LW, direction is Northward. Tidal range is 3.5 m. at springs.

PILOTAGE: Pilotage is compulsory. Ships should advise their ETA at least 48 hours in advance by telegram or telex Portku Ma 50305, marked for the attention of Marine Manager. ETA Pilot Boarding Station (Tanjung Gelang Lt. Ho 305°×3.9 miles) is to be reported to Port Control by VHF Channels 12 or 16 at least 2 hours in advance.

Pilot boats are painted international orange with white superstructure and the word "Pilot" written in black letters. Ships awaiting Pilot should display international code flag signals and sound or flash "G", if specifically requested by the port. Adequate anchorage is available. Pilot Boarding Station: Lat. 03° 55′ 33″ N., Long. 103° 29′ 30″ E.

Ships are expected to come up to the Pilot Boarding Station for the Pilot, provide a good lee for the pilot boat and rig the pilot ladder, manrope and light (at night) in accordance with IMO requirements (SOLAS 1977) and to be clear of all discharges and outlets and all outboard fittings which might foul the pilot boat.

During very bad sea conditions small vessels may be requested to follow the pilot boat and to pick up the Pilot inside the enclosed harbour.

Arriving/Departing vessels are required to produce Port Clearance to the Pilot for verification.

ANCHORAGES: Reserved anchorages are available for ships carrying general cargo, explosives and petroleum products, suspect or unhealthy ships and men-of-war (B.A. Chart No. 1379). Pilotage is compulsory except for men-of-war. Drafts of up to 11.5 m. can be accommodated safely.

RESTRICTIONS: The port is open 24 hours, but is subject to occasional restrictions due to weather during monsoon months of November – January or other similar constraints. Passage of ships drawing more than 11 m. is subject to tide.

MAX. SIZE: Max. LOA permissible 228 m.

Berth	*LOA* (m.)	*Draft* (m.)	*Displacement* (tons)
Nos. 1 to 4	200	11.2	45,500
Palm Oil Berth (Outer)	180	11.5	54,400
Palm Oil Berth (Inner)	125	8.0	8,000
Mineral Oil Berth	125	8.0	8,000
Ro-Ro ramp (Berth No.4)	150	6.5	Liveload 360 tons
Berth 1A	70	8.0	8,000

HEALTH: Healthy vessels are brought to berth. Suspect or infected vessels are taken to Quarantine Anchorage to await clearance from Port Health Authorities. Automatic health clearance is not granted.

RADIO: All communication must be routed through Penang Radio, which provides telegram, telex and telephone facilities.

VHF: 24 hour watch is maintained on VHF Channel 12 and 16 by the Port Control, additional operational channel is Channel 20.

At least 2 hours before arrival at pilot station, following particulars are to be conveyed by VHF: Name, official number, nationality, g.r.t., n.r.t., LOA, Summer d.w.t., deepest arrival draft and arrival displacement, quantity and commodity of cargo onboard and dangerous cargo, if any. Last port of call, last port clearance number and date, ETA pilot station and special berthing requirements, if any.

Ships sailing are required to confirm their readiness by displaying "Pilot Required" signals and VHF report to Port Control at least 2 hours in advance.

Tugs and pilot boats work on Channel 12 but can switch over to other channels if required.

TUGS: The port operates 2 tugs of 2,800 b.h.p. Ropes are used from the ship or the tug as demanded by situation. Tug operations on VHF Channel 12.

BERTHING: Total quay wall length is 725 m. divided into 4 berths numbered from seaward. Berth Nos. 1, 2 and 3 handle general and bulk cargoes of all types and are provided with transit sheds and apron width of 25 m. Berth No. 4 handles container and Ro-Ro cargoes.

A crane is provided at Berth No. 4 to handle containers, heavy cargoes and bulk cargoes with maximum lift of 40 tons.

EQUIPMENT: The port has adequate numbers of forklifts, tractor heads and trailers for handling general cargo and containers.

4 front loaders/reach stackers with topping-lift to handle 20 ft. and 40 ft. containers; 2 mobile cranes with lifting capacity of 11 tons and 35 tons; 40 forklifts with lifting capacity ranging from 2 tons – 8 tons; 3 tugmasters; 4×40 ft. container trailers; 12 prime movers and 27 flatbed trailers of 20 – 40 tonnes capacity are available.

BULK CARGO FACILITIES: Bulk cargoes can be handled for direct delivery at any of the berths using portable hoppers and conveyors.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 4 (length 225 m.) is designed for container handling and other cargoes requiring open storage with priority berthing for container carriers. A container handling crane has been commissioned. Ro-Ro ramp (stern ramp) is fitted at the end of Berth No. 4.

Ro-Ro cargoes can also be handled by vessels fitted with side ramps.

DENSITY: 1025.

MEDICAL: Hospital and doctor/dentist are not available at the port. Government clinic and doctor are available in Balok about 5 km. away from Kuantan Port. Government hospital and doctor/dentist are available in Kuantan Town, which is about 25 km. from Kuantan Port. Private dentists and doctors are available at Balok and also in Kuantan Town.

TANKERS: Palm Oil Berth (POB) and Mineral Oil Berth (MOB) handle bulk edible oils (250-300 t.p.h.) and petroleum products (200 t.p.h.) respectively. Loading hose diameters are 10 in. for crude palm oil, 8 in. for refined palm oil and 6 in. for petroleum products.

FRESH WATER: Available at all berths at a rate of 25 t.p.h. Water barge supply not available.

FUEL: Vessels up to 177 m. length, subject to max. draft 9.0 m., can bunker at Mineral Oil Berth for diesel. Diesel can also be supplied through road tankers at all general cargo berths. Bunkering facilities for Heavy Fuel Oil are not available to date.

SURVEYORS: Caleb Brett, S.G.S. and Ritchie and Bissett maintain offices in Kuantan. Other surveyors may be contacted in Kuala Lumpur, Port Kelang or Singapore.

HATCHES: Mechanical hatch covers must be operated by ship's crew. Stevedores handle 'lift and place' type covers including beams, if any.

CUSTOMS ALLOWANCES: Cigarettes, tobacco, wine and liquor allowed by Customs per day as follows:

(i) Spirits/Liquor – 0.125 qt. per person per day or;
Wine – 1 qt. per person per day or;
Beer/Stout – 1 qt. per person per day.
(ii) 25 cigarettes per person per day or;
8 cigars per person per day or;
1 oz. tobacco per person per day or;
1 oz. snuff per person per day.

CARGO GEAR: Normal cargo handling gear is provided by stevedores but ships have to provide heavy lift and special cargo gear.

REPATRIATION: Facilities are available.

AIRPORT: Airport handling domestic flights is 41 km. (25 miles) from the port and international connections are available at Subang Airport, Kuala Lumpur and Singapore. It is also possible to drive to Subang Airport (5 hours) and Singapore Airport (7 hours). Taxis and buses operate at frequent intervals.

TIME: GMT plus 8 hours.

HOLIDAYS: Port works 365 days a year.

There is no extra charge for public holidays. The rate imposed is the normal rate as for any other working days.

POLICE/AMBULANCE/FIRE: Fire and ambulance assistance is provided by the Port Fire Department, Tel. (09) 433201 ext. 333, or (09) 433282. Nearest Police Station is at Beserah, Tel. (09) 587222.

TELEPHONES: Public telephone available in Port Area and can be used for international calls.

BANKS: Bank Bumiputra Sdn. Bhd. operates a branch in Kuantan Port providing full banking facilities.

STORING: Ships' stores can be taken over the wharf. Lorries can go alongside except at dolphin berths where they have to park about 100 m. away. Forklifts are available. Shore gangs may be used with prior arrangement.

SHORE LEAVE: Ship's crew are permitted to land and are required to carry their passports.

GARBAGE DISPOSAL: Collection service available. Drums are provided. Request to be made via Agents at the berth meeting. Charges are as follows:

Ships under 750 g.r.t.: $10.00 per vessel per day or part thereof.
Ships 750 g.r.t. – 15,000 g.r.t.: $30.00 per vessel per day or part thereof.
Ships over 15,000 g.r.t.: $50.00 per vessel per day or part thereof.
Collection done in the morning only.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Malaysian Ringgit (MRG).

Bank Bumiputera accepts all major currencies. Bank sited at the port.

REGULATIONS: No special regulations.

DELAYS: Average time from pilot station to berth is 1.5 hours. Minimal delay may be experienced in commencement of cargo loading due to Customs and Immigration formalities, normally 30 minutes.

GENERAL: *Signals:*

Significance	*By Day*	*By Night*
1. Immigration and Customs (for ships not carrying passengers)	International Code Signal "25"	Two all-round green lights, in vertical line, 2 m. apart seen all round the horizon at a distance of at least 3 km.
2. Immigration and Customs (for ships carrying passengers)	International Code Signal "34"	Two all-round green lights, in vertical line, 2 m. apart seen all round the horizon at a distance of at least 3 km.
3. Quarantine (vessel is healthy requests Pratique)	International Code Signal "Q"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
4. Quarantine (vessel requires health clearance)	International Code Signal "QQ"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
5. Quarantine (vessel is infected)	International Code Signal "QL"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
6. Request Police Assistance	CB 3	Two all-round lights in a vertical line 2 m. apart, the top light being red, and the lower light white, seen all round the horizon at a distance of at least 3 km.
7. Port is closed and vessel not allowed to enter the breakwater mouth	Answering Pennant	Two all-round lights in a vertical line 2 m. apart, the top of which is green and the bottom red, seen all round the horizon at a distance of 5 km.

Supplies: Provisions are available in Kuantan Town. General stores can be arranged through Ship Chandlers/Agents. Bonded Stores are not available.

DEVELOPMENTS: Construction of 2 additional berths and one dangerous cargo berth is expected to commence in 1994.

AUTHORITY: Kuantan Port Authority, P.O. Box 161, 25720 Kuantan, Pahang, Malaysia. *Tel:* (09) 433201 (10 lines). *Telex:* Plara Ma 50234. *FAX:* (09) 433866. *Contact:* Dato Tik Mustaffa, General Manager. Abdul Aziz Yaakub, Traffic Manager. Wong Soon Fah, Planning and Marketing Manager and Captain Ibrahim Lambay, Marine Manager (Telex: PORTKU 50350. Fax: (09) 433588).

AGENT: Pesaka Jardine Shipping Agencies East Coast Sdn. Bhd., Lot 4, Tingkat 3, Bangunan Perdagangan, Lembaga Pelabuhan Kuantan, 25720 Kuantan. Tel: (09) 433509. Telex: MA50363. Fax: 60-9-433539. Cables: "Jarship Kuantan".

Associated with Jardine Shipping Agencies.

KUCHING, Sarawak: 01.34 N. 110.21 E. (See Plan)

DOCUMENTS:

Port Clearance to be surrendered to Customs when boarding.
Crew Lists and Passenger Lists, 2 copies for Immigration Department, 2 copies for Kuching Port Authority, 3 copies for Customs, 1 copy for Port Health Officer.
List of Ship's Stores (2 copies for Customs).
List of Ammunition (3 copies for Customs).
Health Documents (Vaccination Certificates and Cholera Inoculation Certificates to be examined by Health Inspector).
Manifests (3 sets for Customs, 5 sets for Kuching Port Authority, 1 set for Health Inspector).
Ship Stowage Plan (2 copies for port).

Customs: Permit to go alongside a legal landing place or an ocean-going vessel within the port limits is required by Customs 24 hours prior to berthing.

APPROACHES: The Channel from the pilot station to the Wharf is buoyed and is restricted by the presence of two bars. The outer bar, of sand bottom is located about 2 miles East South East of Tg. Po Lighthouse with a depth of 5.2 m. above Chart Datum and the inner bar which lies approximately one nautical mile East by South of Tg. Muara Tebas, has a depth of 5.1 m. above Chart Datum.

Recent survey indicates that shoaling has occurred in certain parts of the river. Vessels drawing more than 5.0 m. (especially during the N.E. Monsoon, October to March) on account of the swell, are advised to ensure an under-keel clearance of at least 2.0 m. when approaching and crossing the bars.

PILOTAGE: Pilotage services are provided by the Marine Department. Application for pilots could be made by giving at least 24 hours' notice of arrival by telegram to "Shipping Kuching" or telex to MA 70933. Vessels are requested to report to Marine Signal Station/Biawak Signal Station on Channel 20 at least 2 hours before arrival and listen on the above channel for information on pilotage and berthing information.

The pilot station is at one mile North East of Tanjong Po Lighthouse at Latitude 01° 44.2′ N., Longitude 110° 31.8′ E. During the North East Monsoon (October to March) the station is moved to the Embang and Senari Leads at location 01° 39.3′ N., 110° 31.3′ E. (Buoy 6).

ANCHORAGES: The existing Explosives Examination Anchorage is shifted temporarily to the bay opposite Tanjong Renard owing to the wreck at Kampong Sijingkat and is bounded by the following co-ordinates:

(i) 01° 36.60′ N. 110° 27.54′ E.
(ii) 01° 36.60′ N. 110° 27.35′ E.
(iii) 01° 35.70′ N. 110° 27.75′ E.
(iv) 01° 35.26′ N. 110° 27.62′ E.
(v) 01° 35.05′ N. 110° 27.62′ E.

Vessels loading logs under pilotage may anchor at the prohibited anchorage which is bounded by the following co-ordinates:

(i) 01° 35.10′ N. 110° 27.22′ E.
(ii) 01° 35.10′ N. 110° 26.55′ E.
(iii) 01° 35.35′ N. 110° 26.55′ E.
(iv) Along the coast of Batu Blat to the explosive and dangerous goods anchorage at Lat. 01° 34.69′ N., 110° 24.63′ E.
(v) Across the River to Tanjong Bako at 01° 34.55′ N., 110° 24.86′ E.
(vi) Along the coast to Tanjong Bako, Tanjong Buaya, Tanjong Sedup and the White Disc Beacon at 01° 34.86′ N., 110° 27.22′ E.

Vessels drawing less than 4.0-m. draft may anchor at Beting Tanju which is bounded by the following co-ordinates:

(i) 01° 35.55′ N. 110° 27.46′ E.
(ii) 01° 35.10′ N. 110° 27.22′ E.
(iii) 01° 35.10′ N. 110° 26.55′ E.
(iv) 01° 35.35′ N. 110° 26.55′ E.

The Explosive and Dangerous Goods Anchorage is 16 miles from the pilot station and is suitable for one vessel of not more than 100 m. in length.

RESTRICTIONS: Tide restriction and max. draft 5.18 m. at high tide. Not advisable to enter port at Tanah Puteh at night.
MAX. SIZE: Max. permissible length overall for vessel entering port at Tanah Puteh is 100 m. and max. draft 5.18 m. Max. overall length for oil carriers proceeding to oil installation at Baiwak Wharf, Pending Point is 110 m., and max. draft 6.4 m. At Pelabuhan Datuk Sim Kheng Hong (Pending), the LOA of ship permissible is 150 m. with a max. draft of 7.62 m.
RADIO: ETA cable to ship's Agent can be sent to Department of Telecommunications, Kuching. Code words, Kuching Radio.
VHF: All ships equipped with the Hague Plan Radio Equipment and within 40 km. to 50 km. of the Kuching Port will be able to establish communications on the following channels:

Channel No. 16 – Safety, calling and distress: A 24 hour listening watch is maintained on this channel by the Syarikat Telekom Malaysia in Kuching. (Call sign: Kuching Exchange).

Channels No. 24 and 26 – Public Correspondence: All ships after having established initial contact with the Syarikat Telekom Malaysia on Channel 16 can communicate with telephone subscribers on this channel.

Channel No. 20 – Port Operations: A 24 hour listening watch is maintained on this channel by the Marine Department, Kuching. (Call sign: Marine Signal). For pilotage, river traffic control and berthing information.

Channel No. 18 – Port Operations: A 24 hour listening watch is maintained on this channel by the Kuching Port Authority (Call sign: Kuching Port Control). For berthing and unberthing, loading and unloading of cargoes.
TUGS: 2 × 1,000 h.p. and 1 × 164 h.p. 3 mooring boats available.
BERTHING: Application for berth must be made by Agents at least 24 hours before berthing.
Tanah Puteh Terminal 244 m. wharf of the deck on piles with shore-bridge type with 13,600 sq.m. of covered storage space and 14,864 sq.m. of open storage space, depth at lowest water 5.18 m.; at *Pending Terminal* 613 m. marginal wharves, depth at lowest water 8.53 m. with 26,800 sq.m. covered storage space and 26,743 sq.m. of open storage. Feeder Container Services are available but ship must provide lift-on/lift-off gear for ship/shore and vice versa operations. Ro/Ro ramp, pontoon (40 m.×25 m.) and berth located at Eastern end of Pending Terminal.

Shore based container handling equipment: 1×42 tonne front loader with telescopic spreader. 2×32 tonne front loaders with 20 ft. and 40 ft. spreaders. 1×41 tonne reach stacker with 2.6 m. working radius, able to stack 4-high. 1× 5-high empty container handling forklift with 20 ft. – 40 ft. sidelift adjustable spreader. 6×35 tonne prime movers. 5×25 tonne 20 ft. trailers. 6×35 tonne 40 ft. semi-trailers.
Sejingkat Terminal: 125 m. long by 20.8 m. wide reinforced concrete wharf deck with two approach driveways, each measuring 25 m. × 8.0 m. with 1,872 sq.m. of covered storage space and 12,070 sq.m. open storage yards. This terminal is designed to cater for vessels of up to 5,000 d.w.t. and a maximum draft of 6.7 m. at low water level.
CRANES: *Cargo Handling Equipment:* 15 units towing tractors. 1×8 tonne forklift truck. 5×6 tonne forklift trucks. 57×3 tonne forklift trucks. 7×3 tonnes low-mast LPG forklifts. 4×3 tonnes forklift trucks with paper-roll clamp. 25 units trailers (3 – 20 tonnes). 2×35 tonnes mobile cranes.
STEVEDORES: Normal port operating hours are as follows:
(a) Discharging and loading of cargoes, First shift, weekdays including Saturdays and Sundays 0730 – 1200 hrs.; 1300 – 1530 hrs.; Second Shift, 1530 – 1700 hrs., 1730 – 2300 hrs., Fridays, First Shift, 0730 – 1130 hrs.; 1430 – 1530 hrs.
(b) Delivery of Cargoes/Receiving of export cargoes, Monday to Thursday 0730 – 1200 hrs., 1300 – 1645 hrs., Fridays 0730 – 1130 hrs. – 1430 – 1645 hrs. Saturdays 0730 – 1145 hrs.

Arrangements can be made for delivery of perishable cargo during the weekends and public holidays provided prior approval of the Customs Department is obtained.

Tractor/trailer trains are used for transfer of cargoes within the port area while forklift trucks are used for stacking palletised/unitised cargoes and storage pallets.

Cargo handlers who are stevedores as well as longshoremen working under a fully integrated gang system are employees of the Authority. The Authority receives gang orders daily between 1400 hrs. and 1500 hrs. on normal working days and between 1000 hrs. and 1030 hrs. on the days preceding Sundays and public holidays. Gang orders are placed on a shift basis.
MEDICAL: Necessary for Agents to receive advance notice of required medical attention at least 24 hours before arrival. Hospital facilities available. Crew should possess Cholera inoculation and Vaccination Certificates.
TANKERS: Tankers berth at Biawak Oil Jetty for discharge of their oil. Diameter of pipeline 6 in. Two tankers can berth at a time and max. draft is 6.4 m.

Berthing carried out near to the time of High Water. Starboard side alongside using port anchor. No berthing during darkness. Unberthing on flood tide. Mooring boat required, supplied by Kuching Port Authority.
Shorelines:

Mogas and Avgas	Single 8 in. discharging line.
Gasoil	Single 8 in. discharging line.
Jet A1	Single 8 in. discharging line.
Bitumen 80/100	Single 8 in. discharging line.
LPG	Single 4 in. discharging line, 3 in. vapour line.
Light F.O.	Single 6 in. discharging line.

DENSITY: 1008.
FRESH WATER: Available and can be supplied to vessel alongside Authority's Wharf by hose about 25 t.p.h.
FUEL: High-speed diesel fuel oil can be supplied to vessel by making arrangement with either Shell or Esso Oil Installation at Biawak.
CONSULS: Indonesia.
DRY DOCKS: Not suitable for sea-going vessels. Coastal vessels up to 220 ft. long.
REPAIRS: Minor repairs to vessels only.
GANGWAY/DECK WATCHMEN: Usually available. Ship should also provide own watchmen.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Ship should possess all relevant certificates on board in case required for reference.
CUSTOMS ALLOWANCES: Tobacco: 1 oz. tobacco or 25 cigarettes or 8 cigars permitted for each crew member daily. Up to three days ration in port. Wines and/or Spirits, 0.125 qt. bottle of spirits or 0.25 qt. of beer or 1 qt. of wines is permitted for each crew member daily. Up to 3 days' ration in port.
CARGO GEAR: Ship provides own gear especially for handling heavy lifts, vehicles, etc. Rope slings, pallets and safety nets, etc., will be provided by the Authority.
REPATRIATION: Facilities available.
AIRPORT: Airport about 10 km. from port at Tanah Puteh. It is served by MAS which operate daily flights to Kuala Lumpur, Singapore and Kota Kinabalu.
TIME: Local time GMT plus 8 hours.
HOLIDAYS: Port work can be arranged on all official holidays on overtime rates except Chinese New Year Day, Hari Raya Puasa Day, International Labour Day (1st May), Dayak Festival Day (1st June), and Christmas Day, during which the port at Tanah Puteh and Pending will be closed.
POLICE/AMBULANCE/FIRE: For emergency call, Tel: 999 is applicable to all these three services. Individual call: Central Police Station Tel: (082) 22181; General Hospital Tel: (082) 57555; Fire Station Tel: (082) 21033.
SHORE LEAVE: Crew members are allowed ashore provided permission is granted by Immigration Department.
IDENTIFICATION CARDS: Required.
GARBAGE DISPOSAL: Whilst at berth, garbage service can be arranged with the Port Authority.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: There is no Seaman's Club. However, the Port has a Social & Recreational Club whose members are employees of the Port. Games, e.g. football, basketball, volleyball, tennis, badminton, table-tennis, chess, etc. could be arranged with the Club. There is a coin-operated public telephone from which international calls could be made in the Operations Area. Postage and church services are located in the city and are within a radius of 10 km. from the Port. The ship's Agent or Port Authority would be most willing to help with any arrangements.
CURRENCY: Malaysian Ringgit (MYR$).
REGULATIONS: Refer to Sarawak Merchant Shipping Ordinance and Kuching Port Authority's Ordinance and Bye-laws.
DELAYS: At present ships can normally secure a berth within 24 hours of arrival if tide is right.
AUTHORITY: Kuching Port Authority, P.O.Box 530, 93710 Kuching, Sarawak, Malaysia. *Tel:* Headquarters and Pending Terminal – 082-482144 (10 lines). Tanah Puteh Terminal 082-333122 (5 lines). *Telex:* 70420 MA Kuport. *FAX:* 082-481696, 334776. *Cables:* Kuport, Kuching. *Contact:* The General Manager.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Lot 8235, Section 64, No. 7, 1st Floor, 2 1/2 Miles Jalan Pending, 93450 Kuching, Sarawak, East Malaysia. Tel: (082) 334268, 334287. Telex: MA70207 Jarship. Cables: "Jarship Kuching". Fax: (082) 331471.
Associated with Jardine Shipping Agencies.

KUNAK, Sabah: 04.41 N. 118.15 E. (See Plan)

Sabah Government Requirements
(a) Customs will treat port as sufferance wharf as defined in Section 2 of Customs Ordinance (Cap. 33), with control from Lahad Datu. Agent will be required to make application to Customs for sufferance facilities in respect of each vessel, on appropriate form. Officer-in-Charge of Customs, Lahad Datu will arrange to send a supervising officer with ship; this officer will attend vessel's inward and outward Customs clearance. Transport, food and shelter of Customs Officer are for vessel's account, though it is envisaged that his transport can be concurrent with boarding and departure of the Pilot, i.e. per Marine Department launch.
(b) Immigration requires that vessel shall be cleared inwards and outwards in Lahad Datu. As Marine Department launch will be required to run mooring lines at Kunak, it will not be available to transport Immigration Officer who will *not* accompany vessel. His transport will therefore be a matter for Agent to arrange.
(c) Medical will grant Pratique by radio by Medical Officer, Lahad Datu: whose right to carry out full inspection is not affected thereby. This will only be exercised, it is anticipated, when vessel has called at an infected port within prescribed period. Radio messages should therefore give this information, e.g. "Malay Maru Hongkong Twentieth Tokyo Thirtieth Manila Second All Well Request Pratique Master".
(d) Marine Dept. In the case of a vessel arriving from foreign ports will ultimately place a Pilot on board in Lahad Datu, if requested.
(i) Pilot will receive vessel's arrival report and sight her last port clearance. Pilotage will commence at any such point on route as Master may request, at rates laid down in the Merchant Shipping (Fees) Regulations, 1961. The Pilot launch carrying berthing crew will arrive in advance of vessel at Kunak and assist in making fast.

(ii) As there is no accommodation available at Kunak, the Pilot it is hoped, can be accommodated on board ship during her stay.

(iii) Return to Lahad Datu will follow as in sub-para (i) with the Pilot issuing Port Clearance on completion of Immigration formalities.

(iv) Requests for Pilot should be made *at least* 24 hours in advance to Marine Sandakan via Sandakan Radio, 9WHZ1. Initially this service will be offered from Sandakan, and ships proceeding Kunak from there will retain the Pilot on board. Ships from foreign ports will be served by air; charges to their account.

There is now a Pilot based at Tawau, who will berth vessels at Kunak.

For information the port limits of Lahad Datu are "a line drawn from Tanjong Melandong on the South-west point of Darvel Peninsula to the most Westerly point of Sakar Island and thence to the mainland, etc." From this it can be seen that large vessels need not enter the narrow waters of the inner bay.

MAX. SIZE: *Palm Oil Jetty:* 28,000 d.w.t.

BERTHING: 1. Wharf consists of:

(a) A raised cement platform 30 ft.×30 ft. on wooden piling.

(b) Three lazy piles with rubber fendering situated 20 ft. from the front edge of the platform and 125 ft. in each direction from the centre of the platform.

(c) Two cement mooring dolphins 20 ft.×20 ft. situated 350 ft. each side of the platform and 50 ft. from the rear edge of the platform.

(d) A metal jetty approach 10 ft. wide×350 ft. long.

(e) A coral bund 24 ft. wide at the base and approximately 16 ft. wide at the top.

(f) Mooring Buoy placed 600 ft. off head of jetty.

2. Depth of water alongside: Minimum depth of water outside the lazy piles is in excess of 35 ft. datum.

3. Bulk oil will be pumped from installation along a metal pipe via coral bund and metal jetty. At a point approximately 15 ft. before cement platform the pipe bifurcates and the two terminals are situated two-thirds the way along each side of platform. To these terminals will be attached a flexible steel hose for connection with ships. Hose will be provided by shippers, and is 400 ft. long if required.

4. Pumping capacity. Maximum overall rate of pumping palm oil will be 100 t.p.h. Palm oil pipe is of 6 in. diameter.

AUTHORITY: See "Kota Kinabalu".

Thomas Soon Min On, Port Manager, Tawau.

LABUAN, Sabah: 05.17 N. 115.15 E. (See Plan)

Island of Labuan is 12 miles long and 7 miles wide lying off N.W. coast of Borneo at entrance at Brunei Bay. It is off the State of Sabah and is only 4.5 miles from mainland and some 77 miles from the State Capital of Kota Kinabalu.

DOCUMENTS:

(a) On arrival, when vessel has arrived from ports outside Sabah, Health Officer, Boarding Officer, Customs and Immigration or their representatives will board vessel. Agent cannot board until ship has been cleared.

(b) Health Officer will require Maritime Declaration of Health duly completed together with 1 copy of Passenger List and 1 copy of Crew List whenever vessel's last port of call has been outside State of Sabah.

(c) Boarding Officer will require 1 copy of Shipping Arrival Report, 1 copy of Passenger List and 1 copy of Crew List. He will also inspect various Certificates such as Load Line, Life Saving Equipment, etc.

(d) Following is summary of documents required:

	Customs	*Immigration*	*Boarding Officer*	*Agent*	*M.O.*
Passenger List	2	2	1	1	1
Crew List	2	2	1	1	1
Stores List	2	—	—	1	—
Maritime Declaration of Health	2	—	—	—	1

(e) To be supplied before Departure:

Manifests as necessary.

Master's copies of Bills of Lading.

Port Clearance.

Customs Clearance.

Certificate of *(a)* Buoys and Lights Dues and *(b)* Port and Harbour Dues.

PILOTAGE: Pilot available if adequate notice given but pilotage not compulsory. Vessels normally berth between 0600 hrs. and 1800 hrs., unberthing at any hour, day or night, provided that notice of such movements received between 0800 hrs. and 1600 hrs.

ANCHORAGES: Good anchorage for large vessels in a least depth of 5.75 fathoms South and S.E. of Beacon No. 6.

Quarantine: Vessels arriving from an unhealthy port should proceed to Quarantine Anchorage for Pratique. This anchorage is bounded on North by a line drawn 090° from Harbour Shoal Beacon to Eastern Harbour Limit; South by a line drawn between S.W. point of Papan Island and Enoe Beacon; on West by Eastern Boundary Limit of Explosives Anchorage (as under). If vessels arriving from healthy port and healthy themselves, they need not proceed to Quarantine Anchorage.

Explosives: No vessels having explosives on board may come or remain within 500 yards of shore or of any other vessel; such vessels shall fly Gunpowder Flag at foremast, and should anchor in Explosives Anchorage which is within a line drawn from Enoe Beacon to Harbour Shoal Beacon thence in 090° for 6 cables thence in 180° direction until it joins line between S.W. point of Papan Island and Enoe Beacon.

Dangerous Petroleum: A vessel having dangerous petroleum on board shall anchor within a line drawn from Harbour Shoal Light Beacon in a 360° direction for 2,500 ft., thence in a 090° direction for 3,600 ft., thence in a 180° direction to join Northern Boundary Limit of Explosives Anchorage.

Prohibited Anchorage: No vessel shall anchor within 2,000 ft. from the light of Southernmost dolphin of Liberty Pier.

TUGS: One tug, 750 b.h.p., twin screw, available to assist with berthing and unberthing.

BERTHING: 1. Wharves:

(a) Liberty Wharf: A permanent concrete wharf, measuring 800 ft. with dolphins 100 ft. off each end – least depth of water is 28.5 ft.

(b) Victoria or Small Ships' Wharf (marked on Chart as H. & C.'s Wharf): A wooden structure – length 270 ft. with min. depth of 12 ft. No longer usable except by kumpits. No vehicles allowed on wharf.

(c) New Shell Installation Wharf: Concrete jetty 170 ft. long with 2 dolphins at each end with a total length between of 700 ft., least depth of water 31 ft.

Shore Lines:

1. For Mogas 8 in. × 1,200 ft.
2. For D.P. Kero 8 in. × 1,250 ft.
3. For Gasoil 8 in. × 1,350 ft.
4. For Fuel Oil 8 in. × 1,350 ft.

8 in. hoses used to connect ship and shore.

(d) Brown & Root Jetty: A timber decked jetty with following dimensions:

Length of main jetty – 160 ft., width 40 ft.

Length of causeway – 476 ft., width 22 ft.

Least depth alongside approximate 28 ft.

Max. load (proven) – 800 lb./sq.ft.

Max. single approximate 100 short tons.

2. Buoys: No mooring buoys in Labuan.

3. Monsoons: N.E. monsoon prevails from December to April and S.W. monsoon from middle of May to middle of October. Harbour is well sheltered from both monsoons.

4. Flags and Berthing Signals:

(a) When entering port vessel should fly Signal Letters, Mail Flag if applicable, and "G" flag if requiring Pilot, and also Quarantine Flag.

(b) Berthing Signals: Following berthing signals will be used at Labuan and will be displayed from Flagstaff in Harbour Office in vicinity of Liberty Wharf, Victoria Harbour. A red and white chequered flag and International Code numbered pendant will indicate berth number allocated. Berth numbers have been allocated as follows:

(c) Berth and Pendant No.

1. Esso Wharf.
2. LCT. Landing Ramp.
3. Victoria Wharf (small ships) S.E. Section.
4. Old Liberty Wharf (inner section).
5. Old Liberty Wharf (outer section).
6. New Liberty Wharf (inner section).
7. New Liberty Wharf (outer section).
8. Brown & Root Jetty.
9. Shell Installation Jetty.
10. Anchor.

On receipt of berthing signal, vessel should acknowledge in the usual manner with the answering pendant and proceed to berth.

(d) Tidal Signal: A tidal signal consisting of a cone and ball is hoisted in conjunction with berthing signal showing state of tide at berth indicated. A cone point down signifies flood tide (West-going), a cone point up ebb tide (East-going), a ball slack water.

(e) Facilities: Max. single load without special precautions on Old Liberty Wharf is 25 tons and New Liberty Wharf is 650 lbs./sq.ft. i.e. 180 tons four axle vehicles. Any load over this figure will require to be distributed over two or more panels of 10 ft. by 10 ft. each according to weight. However, special arrangements must be made prior to discharge, and Agent should be consulted in advance.

RESTRICTIONS: Tides. Subject to diurnal inequalities but usually one HW and one LW a day. Average HW is 6.5 ft. and LW 3 ft. above datum of soundings.

Clearance: Port is open from 0600 hrs. to 1800 hrs. although vessels can be cleared later than 1800 hrs. on application provided they are sighted from Papan Lighthouse at 1800 hrs.

HEALTH: See "Regulations" and "Anchorages".

RADIO: Information required before ship's arrival. ETA Labuan, with as much prior notice as possible. Number of gangs required. Quantity of fresh water required. Whether Pilot required for berthing.

Labuan has no radio facilities and messages are received via Kota Kinabalu, Miri, Singapore, etc.

Port VHF Service operates on Channels 16 and 12, between 0530 hrs. and 2400 hrs. Also see "Tankers".

BULK HANDLING FACILITIES: Rancha Rancha Industrial Estate: One jetty for iron ore carriers up to 150,000 d.w.t. nearing completion. Unloading rate 2,000 t.p.h.

CARGO: 1. Inward: Inward cargo is tallied out of ship on to wharf or into lighter. Damaged cargo is surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge is carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of shortlanded cargo, reasonable proof must be given to Customs that the cargo has not been landed. A shortlanded Memo certified by the Chief Officer is usually accepted as proof.

2. Transhipment: After discharge of cargo from the 1st carrier, transhipment cargo is placed under supervision of Customs, unless it is

possible to arrange direct transhipment into small coastal vessel. Customs do not accept responsibility for cargo in Customs Bond.

3. Refrigerated: Only small quantities of refrigerator cargo loaded or discharged.

4. Explosives: Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for their importation must be obtained from the police prior to arrival of cargo, and harbour and police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

STEVEDORES: Supplied by contractors as arranged by Agent. Working hours 0800 – 1200 hrs., 1300 – 1700 hrs. Working outside these hours on Sundays and Public holidays is overtime.

MEDICAL: Hospitals: Not possible for Government Medical Officer to visit ships but patients can be sent to Cottage Hospital. Four 1st class beds, 10 2nd class beds, 46 3rd class beds. Two private clinics, Dr. Chan Clinic and Dr. Wong Clinic, are located in town.

Dentist: A Government Dental Clinic, located in Cottage Hospital area. In addition, a dentist is available in town.

TANKERS: *Labuan Terminal (Shell):* The SBM is positioned at Lat. 5° 15′ 59″ N., Long. 115° 07′ 08″ E. and designed for tankers with max. s.d.w.t. 350,000, but currently fitted with hose strings to suit a maximum BCM of 540 ft. (165 m.).

The maximum water depth in the manoeuvring area is 84 ft. (25.6 m.) and the max. permissible draft 74 ft. (22.5 m.).

Port Restrictions: None. Berthing and unberthing is carried out day and night, weather permitting.

Sea Anchorage: A tanker anchorage 2 nautical miles in diameter is located approximately 2 nautical miles from the SBM in position Lat. 05° 15.0′ N., Long. 115° 04.0′ E.

Approaches to the Berth: References should be made to the appropriate charts for the berth. From seaward, various oil and gas exploration and platform installations are spread throughout Brunei and Sabah waters. Masters of vessels are advised to give such facilities a wide berth. At the SBM, there is a tapering of water depth to the East as well as to the South. Up to an approximate distance of 8 cables, there is sufficient water of 60 ft. (18.3 m.) in depth.

Pipelines and Cargo Hoses: A 48 in. submarine/land pipeline connects the SBM with the storage tanks on shore. Beneath the SBM, the pipeline terminates in a manifold (PLEM) for connecting the underwater hoses of the buoy. The PLEM is fitted with 2 non-return, non-slam "Mockveld" valves to eliminate potential leakage and surge pressure being built up from shore to the SBM.

Two underwater hoses, each 120 ft. in length, connect the SBM to the PLEM with a lazy 'S' configuration. Each string consists of 4×30 ft. lengths of hose.

Information Required Prior to Arrival:
Radio Advice: Vessel's Master should confirm estimated time of arrival (ETA) 72, 48 and 24 hours prior arrival. Messages should be sent to the local Agents and copied to Shell.

"Labuan Terminal" maintains a continuous radio listening watch on VHF Hague Plan Channel 14, and vessels are to contact "Labuan Terminal" when within VHF range.

Customs and Health Requirements: A detailed Shipping Report has to be completed for Government Marine Department. Local Agents will provide the necessary forms for completion. If the vessel originates from an infected port, or if the state of health is suspected, the Port Medical Officer may board the vessel, in order to inspect the crew and relevant International Medical Certificates.

Papers required on Arrival:
Master is required to provide the following:

(a) 1 copy Last Port Clearance.
(b) International Maritime Declaration of Health.
(c) 9 copies Crew List.
(d) 3 copies Crew Manifest.
(e) 4 copies Stores List (Deck, Engine and Catering).
(f) 5 copies Arms and Ammunition List (if nil, no declaration required).
(g) 4 copies Cargo Manifest.
(h) 9 copies Passenger List.
(i) 2 copies Vaccination List.
(j) 3 copies Narcotics List.

Pre-Arrival Information: Prior to vessel's arrival at SSB/SSPC berths, 72 hours before her arrival, Master of vessel shall answer SSB/SSPC Questionnaire as outlined below.

Messages shall be sent to the local Agent and copied to Sarawak Shell Berhad/Sabah Shell Petroleum Company (Telex: MA74424/74425/74426. Fax: 085-454857).

AAA	Vessel's name, previous name (if any), call sign and nationality.
BBB	Master's name.
CCC	GRT, NRT and SDWT.
DDD	ETA, date and local time (GMT +8 hours).
EEE	Last Load Port/Discharge Port.
FFF	Next Load Port/Discharge Port.
GGG	Number of Crew.
HHH	Grade and Quantity of Cargo on arrival, previous cargo and cargo to be loaded at SSB/SSPC Terminal and tanker's maximum loading rate per manifold.
JJJ	Quantity of ballast in SBT and CBT and confirmation that the vessel is able to load and deballast simultaneously.
KKK	Arrival drafts.
LLL	Any defects that may cause pollution or affect loading.
MMM	Confirm vessel has a fully operational I.G. system and meets all SOLAS/IMO/OCIMF requirements.

All vessels loading at SSB/SSPC berths for the first time shall include the following additional information:

NNN	Length overall (LOA) and distance of bow to centre manifold (BCM).
PPP	Do manifolds meet OCIMF standards.
QQQ	What is the SWL of Tanker's starboard derrick.
RRR	Number and size of AKD bow chain stoppers.

Berthing Instructions: After ETA advice the following message will be transmittted to the Master.

AAA	Based on your ETA . . . . present intention is to berth you on arrival.
BBB	Pilot will board at the boarding area 2 miles W.S.W. of SBM in the following position: Latitude: 05° 15′ 00″ N. Longitude: 115° 04′ 00″ E.
CCC	Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival to Labuan Terminal on VHF Channel 16 with Channel 14 as a working channel.
DDD	Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE	After having established radio contact on VHF you will receive further instructions.

Mooring Operation: Use of ship's anchors is strictly prohibited except in extreme emergency. In any case, the anchor must *never* be dropped anywhere within a distance of 400 ft. (121.92 m.) on either side of the submarine pipeline, for the entire length, *nor* closer than 0.5 miles (5 cables) radius from the SBM.

Floating Mooring Rope Assembly: The buoy to tanker mooring comprises 2×16 in. circumference×150 ft. nylon double braided ropes. At the buoy end, the hawsers are joined to the pad eyes of the Rotation Mooring Arm with heavy duty shackles. Each hawser of the dual floating mooring hawser is fitted with a 3 in. diameter chafing chain.

The pick-up assembly consists of:

(i) 10 in. circumference polypropylene pick-up rope with spliced eyes 2 ft. on each side. Length 150 ft.
(ii) Pick-up support buoy.

Mooring Craft: The pilot/mooring launch will be in attendance throughout the tanker's stay at the SBM. The launch is used to send the messenger end of the mooring ropes to the vessel. On completion of mooring, the launch assists in picking up the hoses for connection and remains at the vessel until the completion of loading.

Piloting Information: Piloting is compulsory and is operated by Sabah Shell Petroleum Company Limited. The Berthing Master, Mooring Assistant and Surveyors board the vessel approximately 2 nautical miles W.S.W. of the SBM. Masters are requested to provide a good lee for the pilot boat to facilitate the boarding by these persons and lifting of 2 radio sets and other equipment.

Mooring Procedure: The tanker is moored to the SBM by 2×16 in. circumference (8 strand plaited) mooring lines 150 ft. (45.72 m.) in length, each connected to a 3 in. (76 mm.) chafing chain. A pick-up rope 10 in. × 150 ft. in length is connected to the 2 in. chafing chain. A suitable standard mooring rope must be lowered down by the vessel to the mooring launch in order to hoist the pick-up ropes.

The starboard line will be the first line to be picked up as the tanker approaches the SBM.

Closing speed, when the vessel is within range of the pick-up rope (approximately 100 m. from the SBM), must not exceed 0.5 knots.

As the vessel slowly closes in on the buoy, the pick-up rope and chafing chain are hove on board until the chafing chain is in position in the fairlead (chain support buoy just outboard of the fairlead). The chain is then secured in the bow stopper.

While the starboard mooring is being tended to, the mooring boat clears the port mooring rope from the buoy. The rope is then hove on board and is connected in the same manner as the starboard one.

Note: The vessel should have 2 mooring ropes ready on the forecastle.

Cargo Loading Operations: Throughout the vessel's stay at the SBM, the Berthing Master will remain on board to co-ordinate ship/shore operations and one launch will remain at location as a safety precaution.

Connecting Hoses: Hose connection is carried out by ship's crew as advised and supervised by the Shore Mooring Assistant.

Position of Hose Connection: Two cargo hoses will be connected on the starboard side amidships. A 16 in. hose will be connected to the forward manifold, and a 12 in. hose will be connected to the aft manifold connection.

Length of hose 815 ft. (248.41 m.).

Loading Procedure: Labuan Crude Oil is loaded at Labuan Terminal. Approximate API 32.0 and temperature 30°C.

The Master shall provide cargo requirements, tanker loading rate and other pertinent information as required by the Berthing/Loading Master. The Terminal's maximum loading rate on 3 pumps is approximately 6,500 cu.m./hr., and a maximum back pressure of 120 p.s.i. (10 bars) at the Terminal's end. The Berthing Master also acts as the Loading Master and as the Terminal's Representative, and will attend to all cargo formalities. He will remain on board the vessel throughout the vessel's stay at the SBM.

After all pre-loading formalities have been attended to, the following steps will be taken:

(a) Joint inspection to be carried out by the ship and the Berthing/Loading Master to ensure all requirements on the Safety Check List are adhered to.
(b) Method of communication and emergency shut-down procedure between ship and shore is established and understood. Prior to commencement of operations, the radio communication shall be tested to ensure the system is operating satisfactorily.
(c) Ship and shore to confirm readiness to commence loading operations.
(d) Commencement of loading operations to be at slow rate.
(e) Once loading operation commences, manifold connections and loading hoses are checked for leaks, and faults rectified. The mooring launch shall patrol round the vessel and the SBM to check for possible leakages into the sea.
(f) Once the vessel has confirmed receipt of cargo, the Emergency Shut Down trip is tested. On completion of the trip test, pumping is resumed and the loading rate gradually increased to the agreed loading rate.

(g) Manifold connections, hoses and water around the vessel are again checked for faults and/or leakages.
(h) Lines are to be checked at frequent intervals, and the Berthing/Loading Master shall immediately be informed of any abnormality.
(i) Ship and shore figures are to be compared every 2 hours at agreed times, and any discrepancies investigated.

Ballast: For ships with Segregated Ballast Tanks (SBT's), Masters are advised to deballast concurrently with loading, to avoid excessive trim while at the same time taking stresses on the hull into consideration. The vessel must at any time be able to manoeuvre and vacate the SBM.

For vessels with combination Clean Ballast Tanks (CBT's) and SBT's, Masters are advised to confer with the Berthing/Loading Master for directions. Nevertheless, for vessels of 70,000 tonnes S.d.w.t. and above, the ballast/cargo configuration must at all times not be less than 25% of the vessel's S.d.w.t.

Suspension of Loading Operations: If loading operations are suspended for an excessive period (e.g. leakage, ship/shore breakdown, etc.) or due to impending heavy weather, the hoses shall be disconnected, blanks flanged and made ready for lowering into the sea.

The Berthing/Loading Master shall give the Master the instructions to do so after monitoring the situation.

Disconnecting Hoses: The "after" or outer hose is disconnected first. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted. Each hose is lowered over the side and towed clear from the ship's side by the mooring launch to prevent possible entanglement with the vessel's propeller.

Unmooring: Weight on the mooring lines may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangular plates of the chafing chains, are lead to the winches. The weight is then taken off the bow stopper. The bow stoppers are then released and the moorings and pick-up ropes lowered to the water.

The port mooring is normally disconnected and lowered first. When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings. The mooring and hose connection equipment is then transferred to the mooring launch.

Facilities:

Bunkers and Lubricants	– Not available.
Fresh Water	– Not available.
Stores and Laundry	– Limited availability.
Tank Cleaning and Dirty Ballast Facilities	– None available.

Repair Facilities: Emergency minor repairs can be arranged through local Agents with Sabah Shipbuilding, Repairs and Engineering or Sabah Government Marine Dept., Engineering Works.

Special Regulations: None. Vessels are berthed day and night, weather permitting.

Other Points of Interest:
(a) Local time is GMT plus 8 hours.
(b) The Berthing/Loading Master, Mooring Assistant, Petronas Representative, Independent Cargo Surveyor(s) and Customs Officer remain on board throughout the vessel's stay at the SBM. It is possible that the vessel's Agent will also remain on board.
(c) Tanker's manifolds should conform to the standards recommended in the OCIMF publication "Standards for Tanker Manifolds and Associated Equipment".
(d) Tanker's mooring equipment shall be in line with the recommendations contained in the OCIMF publication "Standards for Equipment Employed in the Mooring of Ships at Single Point Moorings".
(e) Medical and dental services are available at Labuan through the local Agents.
(f) Crew members are not permitted shore leave.
(g) Ship's personnel given special permission to go ashore for medical treatment must be in possession of an identification card and/or passport.
(h) Ship-to-shore communication during loading operations is by way of a portable VHF radio set provided by the Terminal. Additionally, communication can be used by VHF Channel 14.
(i) Rig starboard derrick to maximum S.W.L.
    Minimum acceptable:
    16,000 – 60,000 S.d.w.t. : 10 tonnes.
    Over 60,000 S.d.w.t. : 15 tonnes.

Weather: All the SBM's concerned are positioned in the open sea. The weather in the region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into three and the terminology used is consistent with that of S.E. Asia. These three types are:
(1) S.W. Monsoon (June-October)
(2) N.E. Monsoon (December-March)
(3) Transitions between the monsoons.

Persistent bad weather occurs during the N.E. monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome times of the periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

Also see "Bintulu Terminal – General".

Operator: Sarawak Shell Berhad, Locked Bag No. 1, 98009 Miri, Sarawak, Malaysia. Tel: 085-454545. Telex: MA 74424/74425/74426. Cables: SAROILCO. Fax: 085-452030. Contact: Captain Pui Voon Sen, Acting Head of Marine and Land Transport Services.

FRESH WATER: Only available in small quantities (usually 30 tons maximum) and at restricted hours.

FUEL: Bulk furnace oil and high speed diesel usually available but 48 hours' notice of requirements must be given.

FIRE PRECAUTIONS: In case of fire, the Harbour Master, OCPD, and Agent should be telephoned immediately. A mobile gas turbine fire pump is available.

CONSULS: None.

REPAIRS: Marine Department operates engineering workshops at Labuan.

DRY DOCKS: Marine Department has 3 Slipways in Labuan which are capable of slipping vessels of 60 tons, 200 tons and 500 tons displacements.

A Government-owned shipyard/dry dock known as Sabah Building, Repairing and Engineering Sdn. Bhd. exists in Labuan to undertake full repairs services has been established for ocean-going vessels.

TIME: GMT plus 8 hours.

POLICE/AMBULANCE/FIRE: Medical Officer 224; Asst. Commissioner of Customs 201; OCPD 400; Police Station 297; Hospital 222.

REGULATIONS: *(a)* Arrival and departure:

1. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs Officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessels shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals:

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

GENERAL: *Surveyors:* Harrisons & Crosfield are Lloyd's Sub-Agents in Labuan and may appoint a surveyor as necessary.

Ship Chandlers: Fresh fruits, vegetables and fish available and price list can be obtained from ship chandler through Agent. Cold storage with limited supplies.

Recreation Facilities: If owners pay a monthly subscription to the Labuan Recreation Club, ship's crew are automatically members. Football and cricket, etc., can usually be arranged on application to Agent. Two cinemas in town which show American, English, Chinese, Malayan and Indian films.

Good beaches all round island, however, it is strongly recommended that bathers should remain in shallow water. It is not considered safe to bathe from the ship.

Victoria Hotel situated in town. All rooms air-conditioned and have private bathrooms or showers attached. Lodging house accommodation available in town for Chinese Crew members.

A newly constructed 12 storey Labuan Hotel is situated in the town. All rooms air-conditioned with bathroom attached.

A nine-hole golf course situated about 1 mile away from town.

DEVELOPMENTS: See "Bulk Handling Facilities".

AUTHORITY: The Director, Marine Department Office, P.O.Box No. 5, 87008 Federal Territory of Labuan, Malaysia. *Tel:* 087-412208. *FAX:* 087-413515.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Lot No. 17, 2nd Floor, Jalan Bunga Dahlia, WDT No. 81, 87009 FT. Labuan. Tel: (087) 413568/9. Telex: MA85065. Cables: "Jarship Labuan". Fax: (087) 413580.

Associated with Jardine Shipping Agencies.

LANGKAWI, Telok Ewa, Malaya: 06.26 N. 99.46 E.

(See Plan)

SHIPMASTER'S REPORT: December 1987 (Updated 1994).

Langkawi Port is one of the newest ports on the Malayan Peninsular. The port is designed to handle Bulk (both dry and liquid) petroleum products as well as general cargo. Major exports are clinker and bulk/bagged Cement. The port is approximately 80 nautical miles North of Penang Island, and in position Lat. 06° 25′ 36″ N., Long. 99° 46′ E.

PORT LIMITS: All the waters enclosed within the area bounded by a line drawn from a point at Lat. 06° 30′ N., Long. 99° 52′ E. in a Southeasterly direction to Lat. 06° 25′ N., Long. 99° 58′ E., thence in a Southerly direction to Lat. 06° 08′ N., Long. 99° 58′ E., thence in a Westerly direction to Lat. 06° 08′ N., Long. 99° 37′ E., thence in a Northerly direction to Lat. 06° 27′ N., Long. 99° 37′ E. and thence in a Northeasterly direction back to Lat. 06° 30′ N., Long. 99° 52′ E. and any navigable waters therein.

DOCUMENTS: The following documents, together with ship's documents and certificates and copies of manifest, are to be presented to the Port Officer at time of report.

Crew List.
Vaccination List.
Stores List.
Personal Declaration.
Drug and Narcotic List.
Passenger List.
Last three ports of call.

PILOTAGE: Pilotage is compulsory for all vessels entering or leaving the port limits. Pilots are available throughout 24 hours and the boarding point is in position Lat. 06° 27.8′ N., Long. 99° 45.5′ E.

While rounding off Tanjung Chinchin it is preferable to keep North of the fairway during the N.E. monsoon as considerable S./S.W. set is experienced with strong and persistent E/N.E. winds.

ANCHORAGES: Anchorage area is situated East of Pilot boarding station marked on BA. Chart No. 3943.

MAX. SIZE: There is a restriction of 9.0 m. draft at present alongside. Permission to exceed 9.0 m. may be given under exceptional circumstances with a tug on stand-by during manoeuvres.

HEALTH: Health Official boards vessel when alongside. A close check is carried out on Vaccination List.

TUGS: No tug available (July 1994). It is only used during deep draft vessels unberthing. Usually ships berth heading into the wind/tide using the off-shore anchor.

BERTHING: See "Plan".

STEVEDORES: Arranged by Kedah Cement. They usually need notice of 7 days, 72 hours, 48 hours and 24 hours.

CRANES: For clinker and bulk cement, Kedah Cement, the operators of the terminal, use one shoot of about 500 t.p.h. capacity and for raw material imports such as Bauxite/Iron ore a grab crane of 11.2 tonnes SWL is in operation at present. For loading bagged cement, ship's own gear is used.

MEDICAL: There is a hospital, for minor surgery only, at Kuah which is 24 km. from the berth. For serious cases, patients to go to the mainland, one hour further by ferry.

DENSITY: 1020/1021.

FRESH WATER: Available at the berth, rate about 20 t.p.h.

REPAIRS: All repairs are carried out on the mainland.

AIRPORT: There are daily flights to Penang and Kuala Lumpur.

TIME: GMT plus 8 hours all year round.

STORING: Fresh provisions can be obtained locally but at least 2 days notice required as some items may have to be brought from the mainland.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, nor is there a church. There are duty-free shops in the port, international telephone service can be arranged at the large hotels. Transportation from the port to the town can also be arranged, postage service is available and sight-seeing can also be arranged.

CURRENCY: Malaysian Ringgit (MYR$).

DELAYS: None, except rain.

GENERAL: Well organised port with efficient and skilled labour and a very co-operative stevedore. No thefts reported on board. When nearing 9.0 m. draft it is preferable to check depths even though we found 9.6 m. up to chart datum at the general cargo berth.

AUTHORITY: Marine Department Peninsular Malaysia, Telok Ewa Port Office, 07000 Langkawi, Kedah Darul Aman, Malaysia. *Tel:* 04-9591505. *FAX:* 04-9591354. *Contact:* Baharin Bin Dato Abd. Hamil, Senior Marine Officer. Badrul Hisham Bin Umar, Assistant Marine Officer.

LIMBANG, Sarawak: 04.48 N. 115.05 E.

Limbang is the principal town of the Fifth Division and is situated 8 miles above the entrance of the Limbang River. There is an anchorage for ocean-going steamers 5 miles below the Limbang Bar Buoy with a least depth of 26 ft.

Depth on Bar. The least depth reported on the bar is about 2 ft. with a highest rise of 12 ft. The channel is marked by stakes with red/white and black/white top markers and a flashing light buoy Fl.1 sec. at the entrance.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine Signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

PILOTAGE: Pilot available at Muara Port, Brunei. No pilot available locally.

REPAIRS: Siong Hing Shipyard Company, Limbang, Sarawak.

SURVEYORS: Cargo inspectors available. Local marine surveyor available.

BANKS: Malayan Banking Berhad and Kongming Bank Bhd.

STORING: See "Prelims".

1. By truck.
2.
3. Yes.
4. Yes.
5. —
6. Yes.

AUTHORITY: Marine Department, 98700 Limbang, Sarawak, Malaysia. *Tel:* 21130 (office), 22105 (home). *Cables:* Shipping Office, Limbang. *Contact:* Port Officer.

LUMUT, Malaya: 04.14 N. 100.38 E.

SHIPMASTER'S REPORT:

DOCUMENTS:

Customs:

4 Crew Lists.
2 Report of Arrival – Appendix "A".
1 Passenger List ("Nil" certificate required).
2 Dutiable Stores Statements.
5 Inward Manifests (prepared by Agent).
1 Personal Effects List.
1 List of Cargo in Transit.
1 Lists of Arms and Ammunition ("Nil" Certificate required).
Last Port Clearance.
2 Copies Loading Manifests.
3 Outward Manifests (prepared by Agent).
1 List of Narcotics ("Nil" certificate required).

Immigration:

2 Crew Lists.
1 Passenger List.
All Passports and Seaman's Books.

Boarding Office (Port Authority):

2 Reports of Arrival.
2 Reports of Departure (Forms provided by Agent).
2 Crew Lists.
Register, Load Line, Derat Certificate.
Radio, Safety Equipment and Safety Construction Certificates.

Port Health:

2 Vaccination Lists (Cholera).
2 Health Forms.
Derat Certificate.
All International Health Certificates (Yellow Books).

Traffic Control Officer:

1 Crew List.
1 Passenger List.
1 Arms and Ammunition List. ("Nil" certificate required).
1 Narcotics List.

Clearance of vessel carried out on arrival at Lumut Anchorage or berth before loading or discharging is allowed. Usually Customs', Immigration, Traffic Control Officer, Health will come together on board and Free Pratique issued by Health Officer.

PILOTAGE: Pilot boarding position Lat: 4° 10′ 50″ N., Long. 100° 35′ E., which is 1 mile South of Pangkor Island S.E. Point light. Berthing and unberthing will only be carried out during daylight hours and at slack water or beginning of flood tide. Pilot comes from Penang for berthing and unberthing. Pilot leaves vessel at Hospital Rock on departure. Pilot launch painted blue with white superstructure and named "King Miller". Pilot rates: Launch fee M$400 in and out minimum M$750 – maximum M$2,800, depending on d.w.t. of vessel.

ANCHORAGE: Just inside harbour limits, 7 cables South of S.E. Point Light in about 12 fathoms. Bottom said to be sand and shells and reputed good holding ground.

MAX. SIZE: Max. length on grain berth 575 ft.

Max. draft into port 30 ft. 6 in. salt water on Spring tides. This is due to a bar at the entrance of Dindings River and a rather sharp turn around buoy of 125° to miss rocks marked by unlit buoy. (Lloyd Rocks, B.A. Chart 792 vicinity of River Passage).

HEALTH: See "Documents".

RADIO: *ETAs:* Sent through Penang or Singapore Radio to Flourmill Lumut, Flourmill Kuala Lumpur and ship's Agents. 72, 24 and 12 hours notice required. Agents will keep Flourmill Lumut and Pilots informed. Authorities like 5 days notice of a vessel's impending visit. Telex: MA 44285 Miller.

VHF: There are VHF communications in the port with pilot boat on Channel 12.

Reporting System of Merchant Vessel When Entering and Leaving Port of Lumut

1. Every Master of a merchant vessel when coming to Port of Lumut shall advise the Port Officer of Lumut as follows:
   (i) One hour before the arrival of the vessel to the Pilot Station (i.e. one nautical mile due South East Point Lighthouse) the following particulars:
      The name and the nationality of the vessel and the Master.
      The arrival draft.
      The gross and nett tonnage of the vessel.
      The nature of the cargo.
      The next and last port of call.
   (ii) When arriving at the Pilot Station and when the Pilot is on board.
   (iii) When the vessel is passing abeam of Dinding Buoy.
   (iv) When the vessel is at anchor or berthing at the jetty/wharf.
2. The same procedure is also applied to vessel when leaving the Port of Lumut.
   (i) To advise the Port Officer of the sailing time of the vessel one hour before the departure.
   (ii) When the Pilot is on board.
   (iii) When the vessel is passing abeam of Dinding Buoy.
   (iv) When the Pilot is away and when the vessel is abeam of South East Point Lighthouse.
3. The working hours of Port Office of Lumut are as follows:
   Monday to Friday: 0800 hrs. – 1615 hrs.
   Saturday: 0800 hrs. – 1245 hrs.
   The office is closed on Sunday and Public Holidays.
4. Calling: Marine Department Lumut
   or "Lumut Mardep".
   VHF Channel 16.

TUGS: There are no tugs at Lumut – nearest Penang (small) and Singapore (large).

BERTHING: Port side to at Malayan Flour Mill Private Wharf in position Lat: 4° 16′ N., Long: 100° 39.5′ E., ship's head in. Depth of water at wharf is 32 ft. 6 in. A modern wharf supporting two movable discharging elevators. Conveyor belt runs under wharf.

South side of dock is used by coastal tankers and has 20 ft. of water. Dock is of concrete construction with heavy wood and steel girder fendering which is rubber mounted. End of wharf has a separately fendered concrete construction which is fitted with rubber shock absorber.

STEVEDORES: Mill employs own stevedores and work continues throughout 24 hours. No cargo work on Sundays and Public Holidays unless requested by either party when the overtime charges will be borne by the said party. Discharge rate is about 118 m.t.p.h. with 2 suckers (wheat). Reported to be about 100 m.t.p.h. with corn.

MEDICAL: Doctor in Lumut and Sitiawan (7 miles from Lumut). Local hospital usually has large queue, therefore better to attend private doctor. Private doctor may be called onboard if necessary.

DENSITY: About 1022 at berth. Water is brackish both at anchorage and berth.

FRESH WATER: Available at berth, arranged through Flour Mill at $10.00 (local currency) per ton during working hours. 24 hours' notice required.

FUEL: By arrangement and brought to ship in road tankers. Cargo cannot be discharged while bunkering as the trucks are not able to pass under the grain discharger (Agent informs that one weeks' notice required for bunkers). Fuel and diesel supplies come from Shell installation at Batu Undan about 1.5 miles from mill.

REPAIRS: Minor repairs only at mills workshop, firms can be called in from Kuala Lumpur or Singapore or Ipoh.

SURVEYORS: Trident Malaysia Sdn. Bnd. in Penang.

GANGWAY/DECK WATCHMAN: Private wharf and protected area - no shore watchman required on board - only ship's watchman for ropes and safety. Shore mill patrol is armed with shotgun.

REPATRIATION: Can be arranged but make sure travel documents, i.e. passports are valid and air tickets are ready.

AIRPORT: Nearest local airport is Ipoh and then fly or by road to Kuala Lumpur International Airport. Ipoh is about 1 hour's drive and Kuala Lumpur 4 hours drive.

EMERGENCY CO-ORDINATION CENTRE: Harbour Master, Penang or Port Kelang.

TELEPHONE: On berth and in Flour Mill entrance hall during office hours only.

BANKS: The Chartered Bank, Jalan Lumut, Sitiawan, Perak; Malayan Banking Berhad, Lumut, Perak; Bank Bumiputra Malaysia, Lumut, Perak. Money Changer at Malaysia Raya Restaurant, Lumut.

STORING: See "Prelims".
1. Yes, both.
2. Yes.
3. Yes.
4. Yes.
5. Prior approval must be obtained.
6. No.

SHORE LEAVE: Local leave only, except with special permission and pass. Boats to be laid on by ship for crew shore leave to Lumut and this is about a 20 minute boat ride to shore. Charges – $25 per trip. A boat from the anchorage may be laid on. Also to Sitiawan about 7 miles from Lumut. To Ipoh 52 miles by taxi $6.00 per person one way. Special Immigration pass is required and can be arranged through Agent.

GARBAGE DISPOSAL: Can be arranged, contact Agent for service.

WASTE OIL DISPOSAL: Can be arranged, contact Agent for service.

SEAMAN'S CLUBS: None.

CURRENCY: Malaysian Ringgit (MRG).

GENERAL: The Flourmill is situated on the N.E. side of Lumut about 40 miles by road and 20 minutes by launch from Lumut town. There is a good canteen at the Flourmill which serves Chinese and Muslim foods and soft drinks. Ship's personnel are allowed and welcome to use these facilities.

There are 5 reasonable hotels in Lumut, Dindings Hotel which has only 3 rooms air conditioned, Lumut Villa Inn, Hotel Indah Lumut, Hotel MDM and Lumut Country Resort, a 3 star hotel with 40 air-conditioned rooms. If possible book in advance especially on Saturdays, Sundays and Holidays.

At Pangkor Island there are good hotels; Sea View Hotel, Beach Hut Hotel, Pan-Pacific Resort with 100 air-conditioned rooms and Pangkor Laut Resort, both are of International Standard. At Teluk Batik 10 chalets available, about 5 miles from Lumut town.

Dindings Soya and Multifeeds Sdn. Bhd. is a subsidiary of Flourmills and now in operation, using same facility of Flour Mill Wharf.

Customs: Allowances – 75 cigarettes per man for 3 days and one bottle of spirits for 8 men every 3 days. Customs office is at Lumut. One and sometimes two, Customs men remain on vessel throughout and accommodation is to be provided for them.

Immigration: Immigration clearance required.

Tide: Ebbs for 5.25 hours on berth. Tides times are based on Port Kelang – difference is minus 1 hr. 40 min. Rise and fall about 2 m. – see Admiralty Tide Tables and Admiralty N.P. 214, Malacca Strait and Southern Approaches to Malacca Strait. Atlas of Tides and Tidal Streams.

Provisions/Stores: Bonded items, beer and cigarettes and fresh provisions available but advisable to give 24 hours notice as some of the items come from outside Lumut. Fruit and vegetables are available in season from local supply and are reputed to be reasonably priced. Some fruit and vegetables imported and may be expensive. Chandlers can be arranged by Agent.

Laundry; Arranged by Chandler (see above), takes about three days.

Charts: BA 1009 Perak River & Approaches when approaching from South and BA 792 Dinding River & Approaches with inset covering flour mill wharf.

AUTHORITY: Port Office, Marine Department, 32200 Lumut, Perak. *Tel:* 05-935477. *FAX:* 05-913260. *Contact:* Meor Abd. Manap, Deputy Port Officer.

Operator: Malayan Flour Mills Berhad, Jalan David Sung, Batu Undan, Lumut, Perak, Malaysia. *Telex:* Miller MA 42285. *Cables:* Flourmill Lumut, Perak, Malaysia. *FAX:* 05-912296. *Contact:* Raja Toran Shahriman, Chief Administration Officer.

MALACCA (Tanjong Bruas), Malaya: 02.13 N. 102.09 E. (See Plan)

DOCUMENTS:
1. *Malacca Port Authority*
(a) Ship's arrival advice 72 hours prior to arrival stating estimated time of arrival and date.
(b) Ship's Manifest 48 hours prior to arrival with particulars of cargo.
(c) Berth and stevedore application for ship's working arrangement.
(d) Dangerous Goods Declaration (if any).
(e) Passenger List (if any).
2. *Harbour Master's Office*
(a) "Report of Arrival of Vessel" on prescribed form obtainable from Harbour Master's Office on arrival.
(b) One copy Passenger List, specifying names and nationalities.
(c) Port Clearance from last port and copy of Manifest of Cargo to be discharged.
(d) List of all arms and explosives on board.
(e) In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port produce to Port Officer the Certificate of Registry and ship's Articles.
3. *Immigration Authorities*
(a) Crew List (3 copies).
(b) Passenger List (3 copies).
(c) Produce all Passengers Passports/Visas.
(d) Produce all Seaman's Cards/Books.
(e) Fill embarkation/disembarkation card obtainable from Immigration Department on arrival.
4. *Port Health*
(a) Crew List showing last date of vaccination.
(b) Passenger List, showing the last date of vaccination.
(c) Produce all Seamen's and Passengers' vaccination cards.
5. *Customs Department*
(a) Crew List (2 copies).
(b) Passenger List (2 copies).
(c) Personnel Effects List (2 copies).
(d) Cargo Manifests (4 copies).
(e) Last Port Clearance.
(f) Bonded Stores List (2 copies).
(g) Full and correct statement of dutiable goods carried as ship's stores (2 copies).
(h) Customs Form CD 15 obtainable from Customs Department on arrival.

APPROACHES: Approachable from all directions as port is located in an open-sea area. Harbour open all year round.

PILOTAGE: Pilotage service is compulsory for vessels entering or leaving port limits and during berthing/unberthing. Vessels to give Malacca Port Authority 12 hours' notice. Vessels from West take Pilot 2.75 miles W.S.W. of Tanjong Kling and vessels from East take Pilot 5 miles S.S.W. of Tanjong Kling. Pilot on VHF Channels 12 and 16.

ANCHORAGES: Located approximately 1 mile – 1.5 miles off the Malacca River mouth with depth of 3 fathoms – 6 fathoms. No specific prohibited anchorage.

TUGS: One 800 b.h.p. twin-screw tug available to assist with berthing and unberthing operation and emergencies.

BERTHING: One 'T' shaped jetty of 170 m. length, capable of accommodating one vessel of 125 m. LOA on the seaward side and one vessel of 65 m. LOA on the inner side at any one time. Least depth alongside is 9.0 m.
Storage Areas: 4 modern covered warehouses with a total storage area of 10,800 sq.m. for dry bulk and break bulk cargo. Two tank farms of 6,543 tonnes storage capacity for liquid bulk cargo.

STEVEDORES: Privatised stevedoring companies working on a two-shift basis with cargo discharging capacity per day of 1,500 tonnes for dry-bulk and 1,000 tonnes for breakbulk.

MEDICAL: Modern Government and private hospitals readily available in the town centre. There are private clinics in the vicinity of the port area.

TANKERS: Sungai Udang Port:
Berth Operator: Petronas Penapisan Melaka Sendiran Berhad.
Port Managed by: Sungai Udang Port Sendiran Berhad, Serahan Tingkap No. 2023, Pejabat Pos Tanjong Kling, Tel: 06-617014. Telex: Suport MA 62461. Fax: 06-517185. Contact: Captain Safi'uddin Ali, Marine Superintendent.
Max. LOA: 297 m.
Max. Deadweight: 120,000 tonnes.
Max. Draft: 17.3 m.
Minimum Depth at Ocean Berths: 20.0 m. (Minimum 10% U.K.C. required).
Minimum Depth in Approaches: 20.0 m. (Minimum 10% U.K.C. required).
Density: 1025.
Night Berthing: LPG vessel berth in daylight only.
Bunkers and Fresh Water: Available via pipeline at the berths (At present (May 1994) only FW available).
Berthing available as follows:
  2 Ocean Berths for vessels of 20,000 d.w.t. – 120,000 d.w.t.
  2 Coastal Berths for vessels of 2,000 d.w.t. – 10,000 d.w.t.
  2 Coastal Berths for vessels of 2,000 d.w.t. – 7,000 d.w.t.
  1 LPG Berth for vessels of 1,000 d.w.t. – 6,000 d.w.t.
Minimum Size of Vessel:
  Ocean Berth: 20,000 d.w.t.
  Coastal Berth: 2,000 d.w.t.
  LPG Berth: 1,000 d.w.t.
Lighterage: Not available.
Cargoes handled:
  DPK (Dual Purpose Kerosene).
  MTBE.
  Diesel.
  Mogas.
  LSWR (Low Sulphur Waxy Residue).
  Crude.
  Condensate.
  PCN (Naphtha).
  LPG (Liquified Petroleum Gas).
Dirty Ballast Facilities:
  Light slop tank capacity: 56,900 barrels.
  Heavy slop tank capacity: 53,916 barrels.
Slops accepted:
  Slop barge capacity: 490 tonnes (98% capacity).
Tugs: 3×40 ton and 3×16 ton bollard pull tugs.
No airdraft restrictions caused by bridges.
Pilot boards at Fairway Buoy (Position Lat. 02° 11′ N., Long. 102° 07′ E.).

FRESH WATER: Available from elevated water tank of 50,000 gallons capacity through pipelines.

FUEL: Supply by road tankers with advance notice.

REPAIRS/DRY DOCKS: None.

CUSTOMS ALLOWANCES: Tobacco, cigarettes 25 in number per man per day, or cigars, 8 in number per man per day, or Tobacco, 1 oz. per man per day, or snuff, 1 oz. per man per day.
Wine and/or Spirit: Spirit, 0.125 quart per man per day, or wines, 1 quart per man per day, or beer or stout, 1 quart per man per day.

HOLIDAYS: *Port Closed Days:* Chinese New Year, Hari Raya Puasa (1 Syawal), Deepavali, National Day and Christmas Day.

AIRPORT: Batu Berendam, 15 km. from port, catering mostly for domestic flights.

GARBAGE DISPOSAL: Drums provided alongside the wharf by the Port Authority.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

CURRENCY: Malaysian Ringgit (MYR$).

AUTHORITY: Malacca Port Authority, Tanjung Bruas Port, Tanjung Kling, 76400 Melaka, Malaysia. *Tel:* 06-511766, 511216. *Contact:* Chua Yew Liang, Port Manager.

AGENT: Pesaka Jardine Shipping Agencies Sdn.Bhd., Lot 47, No. 136/2 Jalan Munshi Abdullah, 75100 Malacca, Malaysia. Tel: 60-6-237850/237381. Fax: 60-6-248588. (Associated with Jardine Shipping Agencies).

MIRI, Sarawak (incl. Lutong Terminal, Kl. Baram, Kl. Niah & Kl. Suai): 04.26 N. 113.55 E. (See Plan)

Miri Roads is an open roadstead in a shallow bay, bounded at North by Tanjong Baram and at South by Tanjong Lobang.

PORT LIMITS: All navigable waters up to the high water mark and all land from the high water mark to the land boundary within the following limits:
Inner Limit:
Batang Baram within the high water lines, from the line delineating the Coastal High Water Line at the river mouth, upstream to the geographical parallel across the river at Lat. 3° 45′ 00″ N.
Outer Limit:
(i) From a point on the Coastal High Water line on the Sarawak/Brunei International Boundary, Lat. 4° 00′ 18″ N., Long. 114° 36′ 27″ E. (approx.)
(ii) Thence along the Coastal High Water Line in a generally Southwesterly direction to a point on the Miri/Bintulu District Boundary, on the N.E. bank of Sungai Selungun, Lat. 3° 35′ 19″ N., Long. 113° 20′ 18″ E. (approx.)
(iii) Thence along a line drawn in a 324° direction to its intersection with the limit of the Sarawak Territorial Sea, Lat. 4° 48′ 30″ N., Long. 113° 20′ 18″ E. (approx.)
(iv) Thence Northeasterly along the boundary of Sarawak Territorial Sea to its intersection with the International Boundary between Sarawak and Brunei on the Continental Shelf, Lat. 4° 48′ 36″ N., Long. 113° 57′ 12″ E. (approx.)
(v) Thence along the same International Boundary to the initial point defined in Clause (i) above.

DOCUMENTS: (a) Health. Vessels exempted from inspection (see "Health") should deliver to Agent on arrival, a Declaration of Health, Last Port Clearance and 2 Crew and Passenger Lists.
(b) Inward Clearance (Also see "Anchorage"). All vessels calling Miri Roads for passengers or cargo must be cleared by Immigration and Customs and, if necessary, by Port Health.
Inward Clearance effected only between 0600 hrs. and 1800 hrs. and following signals must be shown: if passengers carried, flags "3" and "4"; if no passengers carried, flags "2" and "5"; if Free Pratique requested, flag "Q".
Following papers will be required on arrival for inward clearance:
Port Health:
Declaration of Health.
1 Crew List.
1 Passenger List, inward and through.
Customs Boarding Officer:
As above, if not boarded by Health Officer, and 2 Inwaro Cargo Manifests.
(c) Outward Clearance. All vessels will be issued a Port Clearance by Customs Officer after the application has been verified by Port Officer at their respective office. Papers required are 2 Outward Manifests, 2 Crew Lists and, if any embarked, 2 Outward Passenger Lists.

APPROACHES: The loom of gas flares on Seria Oilfields 30 miles N.E. of Miri are a general guide at night but should not be used as a bearing because flares movable within area of oilfield and liable to be extinguished at any time. Following bearings exist. By night, three lighthouses:

(a) *Tanjong Baram:* Lat. 04° 35′ 47″ N., Long. 113° 58′ 25″ E., white single light 680,000 candle power, visibility 17 miles, elevation 120 ft. in grey steel lattice tower, group flash 3 every 20 secs.

(b) *Lutong:* Lat. 04° 28′ 30″ N., Long. 113° 59′ 46″ E., white single light, 13,500 candle power, visibility 10 miles, elevation 80 ft. in grey steel lattice tower, group flash 2 every 10 secs.

(c) *Tanjong Lobang:* Lat. 04° 21′ 48″ N., Long. 113° 57′ 36″ E., white single light 20,150 candle power, visibility 18 miles, elevation 155 ft. in grey steel lattice tower, 60 ft., flash 1 every 10 secs.

By day, above lighthouses difficult to distinguish and following may be used for day-time bearings:

(a) Lutong radio mast F.R 210 ft., position Lat. 04° 26′ 25″ N., Long. 113° 59′ 54″ E.

(b) Tanjong Lobang radio masts as marked on chart.

PILOTAGE: No official Pilot stationed at Miri but Shell Company provide Berthing Masters to moor vessels at their Lutong SBM's (See "Tankers").

ANCHORAGE: For tankers, please refer to "Tankers". For cargo, passengers or clearance, the outer area within an area to Northward of Lat. 04° 25′ 42″ N., Eastward of Long. 113° 55′ E. and Southward of Lat. 04° 23′ 42″ N. It is recommended that vessels of less than 5 m. draft may anchor close inshore directly opposite Miri River Mouth, but caution must be exercised as sudden squalls and swell up to 1.5 m. can occur, for which allowance should be made. For logs at Kl. Baram it is recommended that vessels anchor close inshore S.W. of Baram River Mouth, but caution must be exercised as sudden squalls and swells up to 2 m. can occur, for which allowance should be made. Extra caution must be exercised not to intrude the prohibited anchorage area at the further end of S.W. of Baram River Mouth and the numerous submarine gas lines around the area. For logs at Kuala Niah and Kuala Suai it is recommended that vessels anchor close inshore directly opposite Niah River Mouth and Suai River Mouth, but caution must be exercised as sudden squalls and swell up to 1 m. can occur, for which allowance should be made.

Cargo usually worked into or from wooden lighters or steel dumb barges ranging from 30 tons – 300 tons capacity. Swell often restricts work to landward side only and swell or wind often make it difficult to work Hatch No. 1 in some vessels. Accommodation ladder should be lowered on landward side to enable shore personnel to board.

Prohibited Anchorage and Berthing Area. From *(a)* Lat. 4° 30′ 54″ N., Long. 113° 56′ 19″ E. in a 090° direction to the shore; and from *(a)* to *(b)* in Lat. 4° 27′ 30″ N., Long. 113° 47′ 01″ E., thence in a 090° direction to the shore.

HEALTH: Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine Signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

Free Pratique granted without health inspection to vessels calling, provided ship healthy. Vessels with unclean bill of health or vessels which have not declared themselves healthy in their arrival notice telegram are subject to normal Port Health inspection procedure. Therefore of utmost importance that arrival notice is sent not less than 24 hours before arrival and contains all information requested (See "Radio") in order to prevent unnecessary delay.

RADIO: Miri Radio, call sign 9 WW21, frequency 500 kHz, operates at following hours local time: 0800 – 0830, 0900 – 0930, 1200 – 1230, 1600 – 1630. Present station has a limited range and if difficulty is experienced making contact or contact outside the above hours, vessels should pass messages through other stations, such as Kuching Radio or Singapore Radio, or through other ships in close vicinity of Miri.

Arrival notice must be telegraphed at least 24 hours before arrival and should contain following information:

All vessels
(a) expected time of arrival (local time GMT plus 8 hours);
(b) name of last port of call and next port of call, if not previously advised;
(c) whether or not ship is healthy.
For cargo
(d) tonnage to discharge, if any;
(e) number of gangs required to load;
(f) number of winchmen required to load.
Passengers
(g) number of passengers to disembark.

Also see "Tankers" – Communications.

VHF: Vessels arrived at the anchorages and wishing to contact their local/abroad Agents should contact "Miri Control" by Channel 16 which will be subsequently transferred to either Channel 25 or 27 for through calls. "Miri Control" operates 24 hours daily.

BERTHING: Cargo vessels – see "Anchorage", oil carriers – see "Tankers".

MEDICAL: Treatment of urgent cases available on shore subject weather conditions. Early notice should be telegraphed of medical requirements.

TANKERS: SBM No. 5:

Miri Single Buoy Mooring (SBM No. 5) is positioned at Lat. 04° 26′ 49″ N., Long. 113° 53′ 48″ E., and is designed for tankers with a maximum S.d.w.t. of 150,000 tonnes.

The minimum water depth in the manoeuvring area is 64 ft. (19.5 m.), and the maximum permissible draft is 56 ft. (17.07 m.).

Information Required Prior to Arrival – Radio Advice: Standard message by the Masters of vessels calling at Miri SBM must be sent at least 96 hours before arrival at Miri. ETA at Miri shall be addressed to the local Agents and copied to "Saroilco Miri".

The Bill of Health should also be advised at least 24 hours prior to arrival.

Sarawak Shell maintains an Offshore Communications Station operating a 24 hours service (call sign "Lutong Radio") and listens on VHF Channels 18 and 22. Accurate ETA can be passed through this station when in radio range.

Alternately, if vessel is arriving during office hours on weekdays (0700 hrs. to 1600 hrs. local time, Mondays to Fridays), "Shell Marine" can be contacted direct on VHF Channel 18, and berthing instructions/prospects can be confirmed.

Pre-Arrival Information: Prior to vessel's arrival at SSB/SSPC berths, 72 hours before her arrival, Master of vessel shall answer SSB/SSPC Questionnaire as outlined below.

Messages shall be sent to the local Agent and copied to Sarawak Shell Berhad/Sabah Shell Petroleum Company (Telex: MA74424/74425/74426. Fax: 085-454857).

AAA	Vessel's name, previous name (if any), call sign and nationality.
BBB	Master's name.
CCC	GRT, NRT and SDWT.
DDD	ETA, date and local time (GMT +8 hours).
EEE	Last Load Port/Discharge Port.
FFF	Next Load Port/Discharge Port.
GGG	Number of Crew.
HHH	Grade and Quantity of Cargo on arrival, previous cargo and cargo to be loaded at SSB/SSPC Terminal and tanker's maximum loading rate per manifold.
JJJ	Quantity of ballast in SBT and CBT and confirmation that the vessel is able to load and deballast simultaneously.
KKK	Arrival drafts.
LLL	Any defects that may cause pollution or affect loading.
MMM	Confirm vessel has a fully operational I.G. system and meets all SOLAS/IMO/OCIMF requirements.

All vessels loading at SSB/SSPC berths for the first time shall include the following additional information:

NNN	Length overall (LOA) and distance of bow to centre manifold (BCM).
PPP	Do manifolds meet OCIMF standards.
QQQ	What is the SWL of Tanker's starboard derrick.
RRR	Number and size of AKD bow chain stoppers.

Berthing Instructions: After ETA advice the following message will be transmitted to the Master.

AAA	Based on your ETA......................present intention is to berth you on arrival.
BBB	Pilot will board at Pilot anchorage area at the following coordinates: Lat. 04° 25′ N., Long. 113° 54′ E. Lat. 04° 27′ N., Long. 113° 56′ E.
CCC	Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival to Miri Terminal on VHF Channel 18 with Lutong Radio.
DDD	Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE	After having established radio contact on VHF you will receive further instructions.

Customs and Health Requirements: A detailed Shipping Report has to be completed for Government Marine Department. Local Agents will provide the necessary forms for completion. If the vessel originates from an infected port, or if the state of health is suspect, the Port Medical Officer may board the vessel, in order to inspect the crew and relevant International Medical Certificates.

Papers required on Arrival: Master is required to provide the following:
(a) 1 copy Last Port Clearance.
(b) 3 copies Crew List.
(c) 5 copies Passenger List.
(d) 3 copies Malaysian Crew List.
(e) 2 copies Stores List.
(f) 1 copy Ship Arrival Report.
(g) 1 copy Application for Port Clearance.
(h) 2 copies Narcotics List.
(i) 2 copies Arms and Ammunition List.
(j) 2 copies Crew Declaration List.
(k) 2 copies Vaccination List.
(l) 3 copies Inward Cargo Manifest.

Note: Vessels arriving from the Philippines require additional documents, and local Agents will advise.

Pilotage: Pilotage is compulsory and is operated by Sarawak Shell Berhad. The Berthing/Loading Master, Mooring Assistant and Surveyors board at or around the anchorage area (approximately 2.0 nautical miles South of SBM No. 5). Masters are requested to provide a good lee for the pilot boat to facilitate the boarding by these persons and lifting of gear and equipment.

Port Restrictions: None. Berthing and unberthing is carried out day and night, weather permitting.

Sea Anchorage: A petroleum anchorage is bounded by the following co-ordinates:

From	Lat. 04° 25′ 42″ N.,	Long. 113° 53′ 00″ E. to
	Lat. 04° 25′ 42″ N.,	Long. 113° 55′ 00″ E. to
	Lat. 04° 23′ 42″ N.,	Long. 113° 55′ 00″ E. to
	Lat. 04° 23′ 42″ N.,	Long. 113° 53′ 00″ E.

Masters are advised that anchoring is strictly prohibited within the area described, "See Caution" encompassing West Lutong oilfields, pipeline areas and SBMs on B.A.Chart No. 1949.

Approaches to the Berth: There are many oil production structures in the waters off the coasts of Sarawak, Brunei and Sabah, together with a large amount of exploration and drilling activities. Masters are advised to give such structures and activities a wide berth.

Anchors: Use of the vessel's anchor(s) is strictly prohibited except in extreme emergency. In any case, the anchor must never be dropped anywhere within a distance of 400 ft. (122 m.) on either side of the pipeline, its entire length, nor closer than 0.5 nautical miles (5 cables) radius from the SBM.

Mooring Craft: The mooring launch will be in attendance throughout the tanker's stay at the SBM. The launch is used to send the messenger end of the pick-up ropes to the vessel. On completion of mooring operations, the launch picks up the hoses for connection and remains at the vessel until the completion of loading operations.

Mooring Procedure: The tanker is moored to the SBM by 2×16 in. circumference (8 strand plaited) mooring lines 150 ft. (45.72 m.) in length, each connected to a 3 in. (76 mm.) chafing chain. A pick-up rope 10 in. × 150 ft. in length is connected to the 3 in. chafing chain. A suitable standard mooring rope must be lowered down by the vessel to the mooring launch in order to hoist the pick-up ropes.

The starboard (inner) line will be the first line to be picked up as the tanker approaches the SBM.

Closing speed, when the vessel is within range of the pick-up rope (approximately 100 m. from the SBM), must not exceed 0.5 knots.

As the vessel slowly closes in on the buoy, the pick-up rope and chafing chain are hove on board until the chafing chain is in position in the fairlead (chain support buoy just outboard of the fairlead). The chain is then secured in the bow stopper.

While the starboard mooring is being tended to, the mooring boat clears the port mooring rope from the buoy. The rope is then hove on board and is connected in the same manner as the starboard one.

Note: The vessel should have 2 mooring ropes ready on the forecastle.

Tugs: Not available.

Cargo Loading Operations: Mooring and hose connection is carried out by the vessel's crew as advised and supervised by the shore mooring assistant.

Position and Size of Hose Connection: 2×12 in. cargo loading hoses (length 840 ft.) will be connected on the starboard side amidships.

Loading Procedures: Miri Light Crude is loaded at Lutong Terminal (approximate API 32.0 and temperature of 32°C).

The Terminal's maximum loading rate on 3 pumps is 3,500 cu.m./hr., and a maximum back pressure of 120 p.s.i. (approximately 10 bars) at the Terminal's end. The Berthing Master also acts as the Loading Master and as Terminal's Representative, and will attend to all cargo formalities.

As soon as possible, the Master shall provide cargo requirements, tanker maximum loading rate and any other pertinent data as required by the Loading Master.

After all pre-loading formalities have been attended to, the following steps will be taken:

(a) Joint inspection to be carried out by the ship and the Berthing/Loading Master to ensure all requirements on the Safety Check List are adhered to.

(b) Method of communication and emergency shut-down procedure between ship and shore is established and understood. Prior to commencement of operations, the radio communication shall be tested to ensure the system is operating satisfactorily.

(c) Ship and shore to confirm readiness to commence loading operations.

(d) Commencement of loading operations to be at slow rate.

(e) Once loading operation commences, manifold connections and loading hoses are checked for leaks, and faults rectified. The mooring launch shall patrol round the vessel and the SBM to check for possible leakages into the sea.

(f) Once the vessel has confirmed receipt of cargo, the Emergency Shut Down Trip is tested. On completion of the trip test, pumping is resumed and the loading rate gradually increased to the agreed loading rate.

(g) Manifold connections, hoses and water around the vessel are again checked for faults and/or leakages.

(h) Lines are to be checked at frequent intervals, and the Berthing/Loading Master shall be immediately informed of any abnormality.

(i) Ship and shore figures are to be compared every 2 hours at agreed times, and any discrepancies investigated.

Ballast: For ships with Segregated Ballast Tanks (SBT's), Masters are advised to deballast concurrently with loading, to avoid excessive trim while at the same time taking stresses on the hull into consideration. The vessel must at any time be able to manoeuvre and vacate the SBM.

For vessels with combination Clean Ballast Tanks (CBT's) and SBT's, Masters are advised to confer with the Berthing/Loading Master for directions. Nevertheless, for vessels of 70,000 tonnes S.d.w.t. and above, the ballast/cargo configuration must at all times not be less than 25% of the vessel's S.d.w.t.

Suspension of Loading: If loading operations are suspended for excessive periods (e.g. leakages, ship/shore breakdown, etc.), or due to impending heavy weather, the hoses shall be disconnected, blanks flanged and made ready for lowering into the sea. The Berthing/Loading Master shall give the Master the instructions to do so after monitoring the situation.

Disconnecting Hoses: The "after" or outer hose is disconnected first. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted. Each hose is lowered over the side and towed clear from the vessel's side by the mooring launch to prevent possible entanglement with the vessel's propeller.

Unmooring: Weight on the mooring lines may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winches, and the weight is taken off the bow stopper. The bow stoppers are released, and the moorings and pick-up ropes lowered from the bow into the water.

The port mooring is normally disconnected and lowered first.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings. The mooring and hose connection equipment is then transferred to the mooring launch.

Facilities Available:

Bunkers and Lubricants	– Not available.
Fresh Water Facilities	– None.
Stores and Laundry Facilities	– Limited stores available.
Tank Cleaning and Dirty Ballast Facilities	– None available.

Repair Facilities: Small repairs of urgent nature can be undertaken by local ship repairers through the local Agents.

Special Regulations: None.

Points of Interest:

(a) Local time is GMT plus 8 hours.

(b) The Berthing/Loading Master, Mooring Assistant, Petronas Representative, Independent Cargo Surveyor(s) and Customs Officer remain on board throughout the vessel's stay at the SBM. It is possible that the vessel's Agent will also remain on board.

(c) Tanker's manifolds should conform to the standards recommended in the OCIMF publication "Standards for Tanker Manifolds and Associated Equipment".

(d) Tanker's mooring equipment shall be in line with the recommendations contained in the OCIMF publication "Standards for Equipment Employed in the Mooring of Ships at Single Point Moorings".

(e) Medical and dental services are available at Miri through the local Agents.

(f) Crew members are not permitted shore leave.

(g) Ship's personnel given special permission to go ashore for medical treatment must be in possession of an identification card and/or passport.

(h) Ship-to-shore communication during loading operations is by way of a portable VHF radio set provided by the Terminal. Additionally, communication can be used by VHF Channel 18.

(i) Rig starboard derrick to maximum S.W.L.
Minimum acceptable:
16,000 – 60,000 S.d.w.t. : 10 tonnes.
Over 60,000 S.d.w.t. : 15 tonnes.

Berth Limitations:

Maximum Draft	: 56 ft. (17.07 m.)
Maximum LOA	: No restriction.
Maximum S.d.w.t.	: 150,000 tonnes. (Dependent on BCM – see below)
Hose Length	: 815 ft.
Maximum BCM	: 560 ft.

Pilotage: Pilotage is compulsory and is operated by Sarawak Shell Berhad.

Miri Products SBMs: There are 2 products SBMs in Miri. They are located about 1.1 miles apart and closer to the shore in more restricted water. These SBMs are meant for shipment of finished products from the Lutong Refinery for local consumption, export and importation of certain grades of products.

Coastal product tankers are berthed at these SBMs and at times ocean-going product tankers also.

Arrival procedures, pilotage requirements, customs and immigration requirements are the same as for vessels arriving for SBM No. 5 (see above).

SBM No. 1: *General Information:* This SBM is positioned at Lat. 04° 28.35′ N., Long. 113° 56.3′ E. There are 3 hose strings to this SBM, each for a different grade of product as follows:

Line 1A –	Miri Tops	Connection: 6 in.
Line 1D –	Mogas	Connection: 6 in.
Line 1C –	Gas Oil/Kerosene	Connection: 6 in.

Minimum water depth in the manoeuvring area is 43 ft. (13.1 m.), and the maximum permissible draft is 37 ft. (11.27 m.).

Maximum S.d.w.t. that can be handled is 100,000 tonnes.

Berth Limitations:

Maximum Draft	: 37 ft. (11.27 m.)
Maximum LOA	: 630 ft. (192.0 m.)
Maximum S.d.w.t.	: 100,000 tonnes
Maximum BCM	: 315 ft. (96.01 m.)
Hose Length	: 520 ft. (158.5 m.)

Mooring Procedures: The mooring is carried out in a similar manner as discussed for SBM No. 5 (see above). The notable difference is that the tanker is moored to the SBM by 2×15 in. circumference single (8 strand plaited) mooring lines 150 ft. (45.72 m.) in length. The starboard line is connected to a 1.2 in. (30 mm.) chafing chain. For larger vessels, this will be changed accordingly prior to the vessel's arrival. The port line is connected to a 30 ft. long × 2.5 in. wire fitted with a large eye splice, so that it can be put over the vessel's forward bollard.

Generally for vessels below 40,000 tonnes S.d.w.t., only one line is connected to the vessel. For vessels above 40,000 tonnes S.d.w.t., both moorings will be connected to 2.1 in. (54 mm.) chain accordingly.

SBM No. 3: *General Information:* This SBM is positioned at Lat. 04° 29.4′ N., Long. 113° 56.3′ E. There are 3 hose strings to this SBM, each for a different grade of product as follows:

Line 4D – Waxy Residue (SWR)/LFO	Connection: 6 in./12 in.
Line 3B – Naphtha	Connection: 6 in.
Line 4B – Gas Oil/Kerosene	Connection: 6 in.

Minimum water depth in the manoeuvring area is 43 ft. (13.1 m.), and the maximum permissible draft is 39 ft. (11.89 m.).

Maximum S.d.w.t. that can be handled is 100,000 tonnes.

Berth Limitations:

Maximum Draft	: 39 ft. (11.89 m.)
Maximum LOA	: 804 ft. (245.05 m.)
Maximum S.d.w.t.	: 100,000 tonnes
Maximum BCM	: 400 ft. (121.91 m.)
Hose Length	: 795 ft. (242.31 m.)

Mooring Procedure: The mooring is carried out in a similar manner as discussed for SBM No. 5 (see above). The notable difference is that the tanker is moored to the SBM by 2×12 in. circumference (8 strand plaited) mooring lines 150 ft. (45.72 m.) in length, each connected to a 2.1 in. (54 mm.) chafing chain.

Weather: The SBMs are positioned in the open sea. The weather in this region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into three and the terminology used is consistent with that of South East Asia. These three types are:

(1) S.W. Monsoon (June – October)
(2) N.E. Monsoon (December – March)
(3) Transitions between the monsoons.

Persistent bad weather occurs during the N.E. monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome features of the periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

Also see "Bintulu Terminal – General".

Operator: Sarawak Shell Berhad, Locked Bag No. 1, 98009 Miri, Sarawak, Malaysia. Tel: 085-454545. Telex: MA 74424/74425/74426. Cables: SAROILCO. Fax: 085-452030. Contact: Captain Pui Voon Sen, Marine Supervisor – Tanker Operations.

FRESH WATER: No fresh or boiler water available.

FUEL: Not available.

REPAIRS: Emergency deck and hull repairs can be carried out offshore. Please contact Harbour Master for arrangements if required. Tel: 085-32911 (office hours) or 085-33232 (outside office hours).

CUSTOMS ALLOWANCES: Bonded Store on vessels other than those berthing at Lutong Moorings for bunkers only and exempted from formal clearance, sealed by Customs after allowing a daily ration for duration of stay in port.

One Customs Officer will remain on board all vessels anchored in Miri Roads and accommodation, if necessary, should be arranged for them. The Agents' staff will remain on board throughout all cargo operations and it would be highly appreciated if meals could be supplied to them and to the Customs Officer in view of the long time occupied travelling by launch between ship and shore.

REPATRIATION: Crew changes and repatriation can be carried out at Marine Office, Kubu Road, Miri with little difficulty.

AIRPORT: Distant 10 km., daily, day and night flights.

TIME: GMT plus 8 hours. Permanent.

HOLIDAYS: New Year's Day; Chinese New Year; Good Friday; Labour Day; Wesak Day; Dayak Festival Day (Gawai); Yang Dipertuan Agong's Birthday; Hari Raya Puasa; T.Y.T. Yang Dipertua's Birthday; National Day; Hari Raya Haji; Awal Muharram; Prophet Mohammad's Birthday; Christmas Day.

Chinese New Year; Dayak Festival Day (Gawai); Hari Raya Puasa normally has 2 days holiday.

POLICE/AMBULANCE/FIRE: Tel: 999.

SHORE LEAVE: It is regretted that both passengers and crew must be dissuaded from coming ashore other than for medical attention, owing to weather and tidal restrictions.

IDENTIFICATION CARDS: Seaman's Record Book is sufficient.

LUBRICANTS: Generally, lubricants not available but in emergency certain grades sometimes obtainable in very limited quantities.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Malaysian Ringgit (MYR$).

PROVISIONS: Limited fresh provisions and ex-bond stores available for which vessels should give 72 hours notice of requirements so that arrangements can be made to secure the required supplies.

REGULATIONS: The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than east 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

AUTHORITY: Marine Officer, Marine Department, Kubu Road, Miri, Sarawak, Malaysia. *Tel:* 085-32352; 085-32911, 085-33301. *Cables:* "Shipping Miri".

Miri Port Authority, River Road, P.O.Box 1179, 98008 Miri, Sarawak, Malaysia. *Tel:* 085-38481; 085-38529. *Telex:* 74227 MA Tyseng. *FAX:* 085-417191. *Contact:* The General Manager.

AGENT: See "Kota Kinabalu".

PASIR GUDANG, Johor: 01.26 N. 103.54 E. (See Plan)

LOCATION: The port is situated on the East Coast Southern tip of Peninsular Malaysia above the Straits of Johore, 10 nautical miles East of Johore Bahru Town. The approximate position is Lat. 01° 26′ 06″ N., Long. 103° 54′ 25″ E.

PORT LIMITS: The area is enclosed by the following imaginary lines:

(A) From a point of the coast at the Southernmost tip of Tanjung Datuk or Tanjung Penyusup at Lat. 01° 22.20′ N., Long. 104° 17.05′ E. direct to
(B) Lat. 01° 19.28′ N., Long. 104° 15.78′ E. thence to
(C) Lat. 01° 17.82′ N., Long. 104° 07.43′ E. thence to
(D) Lat. 01° 18.31′ N., Long. 104° 06.78′ E. thence following the boundary of the Malaysia territorial waters until reaching the Eastern side of the Johore Causeway to the coastline Eastwards and returning to position (A), including the Johor River up to the bridge where the Johor Bahru to Kota Tinggi road crosses the said river and all other navigable rivers and tributaries flowing into these waters and all piers, jetties, wharves, landing places, quays, docks and other similar works, whether within or without the high water mark and any portion of shore or bank within 45.72 m. of the high water mark, subject to any rights of private property therein.

DOCUMENTS:

Customs:

2 Personal Effects List,
2 Narcotics Lists,
2 Arms and Ammunition Lists,

2 Stores Lists made out on ships forms only, no special forms issued by the port. Customs Boarding Officer also requires a full and correct statement of all dutiable liquor and tobacco carried as ship's stores, the statement which is to be submitted in duplicate on forms provided by the Boarding Officer is to show in detail the quantities of dutiable goods held:–

(a) in the ship's stores, bars and shops;
(b) in the possession of Officers and Crew.

Immigration: 3 Crew Lists, all Crew Seaman's Books for entry visa stamp.

Port Health: 1 Vaccination List, Maritime Declaration of Health.

Police: 1 Crew List, 2 Narcotics Lists, 2 Arms and Ammunition and Explosives Lists.

APPROACHES: *Fairway:* There is no limitation imposed on size of vessels passing through the fairway except for the draft. The main channel in the East Johore Strait has a depth of water up to approximately 12.4 m. ACD up to the Port Waterfront and 11.4 m. ACD up to Sembawang Shipyard and 10.9 m. up to the causeway.

PILOTAGE: Pilotage is compulsory for vessels either exceeding 45 m. in length and/or with height structure above 30 m. or without any radio communication on board, entering or leaving the Port Water Limits. Pilotage is provided by Johor Port Sdn. Bhd. and licensed by Johor Port Authority. The pilot boarding point is 2 miles S.W. of Tanjung Stapa Lt. (01° 20.6′ N., 104° 08.2′ E.).

ETA to be sent to Harbour Master 24 hours prior to arrival, and to "Johor Port Control" 3 hours prior to arrival or departure.

ANCHORAGE: Anchorage areas have been designated within the port water limits and as indicated in all navigational charts for the following:

(a) General purposes.
(b) Dangerous goods and explosives.
(c) Quarantine.
(d) Petroleum.
(e) Lay-up.

RESTRICTIONS: A 24 hour pilotage service for all vessels entering or leaving Johore Port is provided. However, the following restrictions are imposed.

1. *Recommended Speed:*

(a) The maximum recommended speed should not exceed 12 knots and when passing Fairy Point, the speed should not exceed 6 knots.
(b) Vessels are required to slow down when passing Johore Port area, Malaysia Shipyard Engineering (MSE) and Sembawang Shipyard areas.

2. *Reporting:*

When entering, transitting or leaving the East Johore Strait, all ships of 2,000 g.r.t. and above or whose masts or superstructures exceed 30 m. above the waterline or where the vessel is under tow and the combined length of the towing vessel and the tow exceed 30 m. are requested to comply to the contents of the Port of Singapore Circular No. 23 of 1981 (See "Traffic Information") in providing the following data:–

(a) Name and Call Sign of vessel;
(b) Type of vessel (stipulate floating crane, oil rig, etc.);
(c) Max. height above waterline in metres:
(d) Destination (Sembawang port, name of shipyard, etc.);
(e) Point of origin (Sembawang port, Johore Port, Johore Shoal Buoy, etc.);
(f) ETA at Johore Shoal Buoy or ETD.

on VHF Channels 11, 21 and 63.

3. *Tugs:*

Tug services are available for towage, berthing and unberthing operations within the port's water limits. The tugs are mostly equipped with fire fighting and anti-pollution equipment.

(a) VLCCs or vessels of more than 280 m. in length are to be provided with at least 2 escort tugs when transitting the East Johore Strait.
(b) Vessels of more than 240 m. in length are required to be provided with 1 escort tug when transitting the East Johore Strait.

4. *General:*
   - (a) When a nuclear powered ship is underway in the East Johore Strait no vessel should be underway forward of her.
   - (b) Vessels above 180 m. in length will not be programmed to pass any vessel exceeding 280 m. in length transitting the East Johore Strait between Changi and Sembawang Shipyard.
   - (c) VLCCs or vessels of more than 280 m. in length will be programmed to transit the Fairy Point/Changi area during slack water or stemming the tidal current.
   - (d) Vessels of more than 240 m. in length will be permitted to transit the East Johore Strait only during daylight hours.
   - (e) Vessels of between 210 m. and 240 m. in length are permitted to transit East Johore Strait during non-daylight hours provided they have full use of engines and are programmed to transit during slack tide or stemming the tidal current.
   - (f) Anchoring is prohibited in the main channel. Any unauthorised anchoring must be reported immediately to Johore Port Control and Sembawang Control.
   - (g) During the hours of darkness, tows are generally not permitted to transit East Johore Strait.

For the purposes of the above guidelines:–
- (a) A VLCC (very large crude carrier) is deemed to be a tanker of 150,000 d.w.t. and above.
- (b) Length of vessel refers to her overall length.
- (c) Daylight hours means from 0700 hrs. to 1900 hrs.

VHF: Vessels can communicate direct with the pilot control station tower via ship to shore VHF on the following Channels:

Channel	*Ship Stations*	*Shore Stations*
11	156.550 MHz	156.550 MHz
21 (Listening Frequency only)	157.050 MHz	161.650 MHz
63	156.175 MHz	160.775 MHz

VHF network links the tugs, launches and the Port personnel working on board vessels at the anchorages.

TUGS: See "Restrictions" and "Facilities".

FACILITIES: *Oil Jetty:* Depth of water 9.0 m. (inner berth), 11.0 m. (outer berth), T-shaped with 4 berths.

Dangerous Cargo Jetty: Depth of water: Jetty No. I – 11.0 m., Jetty No. II – 9.0 m., Jetty No. III – 12.0 m.

Ocean Wharves: Depth of water 12.5 m., length 1,093 m.

Coastal Wharf: Depth of water 6.0 m., length 107 m.

Lighterage Wharf: Depth of water 5.0 m., length 61 m.

Transit Shed: (2) 21,256 sq.m.

Godown: (3) 23,411 sq.m.

Open Storage Yard: 2.05 hectares.

Container Yard: 44,175 sq.m.

Container Freight Station: 7,750 sq.m.

Palm Oil Tank Installation: Present capacity for crude and refined palm oil 121,000 tonnes.

Petroleum and Petroleum Products: Storage capacity 63,000 tonnes.

Grain Silos: 72,000 tonnes.

Fertiliser Storage: 59,000 tonnes.

Clinker and Gypsum: 27,000 tonnes.

Timber Terminal: 4.36 hectares.

Other facilities, such as bauxite and ore jetties, as well as a shipyard (Malaysian Shipyard and Engineering) are available and operated by private companies. The shipyard undertakes repairs and docking to vessels up to 400,000 d.w.t.

Shore Equipment:

	Capacity	*Unit*
Forklift Trucks	8 tonnes	6
	6 tonnes	3
	3 tonnes	24
Towing Tractors		7
Trailers		20
Mobile Cranes	less than 200 tons	3
	200 tons	1
Level-Luffing Crane	15/400 tonnes/hr.	1
	35/400 tonnes/hr.	1
Mechanical Grab	5 tonnes	6
Container Cranes	36 tonnes	2
Container Cranes (post Panamax)	45 tonnes	2
October 1994	–	1
Reach Stacker		1
Straddle Carriers	36 tonnes	6
Transfer Cranes	45 tonnes	9
August 1994		2
Skeletal Semi-trailers		50
Container Terminal Tractors		35

Floating Equipment:

Tugs	2 – 3,200 b.h.p.
	1 – 2,600 b.h.p.
	1 – 1,220 b.h.p.
	1 – 1,084 b.h.p.
Launches	4 – pilot launches
	2 – security launches
	2 (for hire)

STEVEDORES: Stevedore and shore labour undertaken by the Port Contractors and shift times are as follows:–

0700 – 1500 hrs.
1500 – 2300 hrs.
2300 – 0700 hrs.

Stevedores may undertake work of opening/closing of hatches but rigging of gear must be done by the crew.

FRESH WATER: Fresh water connections are on the berth. The rate of supply being 20 t.p.h.

FUEL: All grades of Bunkers are available at short notice.

REPAIRS/DRY DOCKS: Situated in Pasir Gudang Industrial area is Malaysia Shipyard & Engineering Sdn, Bhd. MSE is a fully equipped up-to-date engineering establishment. With facilities for ship repairing, new-building up to 12,000 d.w.t. and general engineering works.

(1) Dry dock, length 395 m., width 80 m., depth 14 m., capable of handling ships of 400,000 d.w.t.

(2) No. 2 dry dock, length 270 m., width 46 m., depth 12.5 m. capable of handling up to 140,000 d.w.t.

(3) Newbuilding dock, length (approx.) 123 m., width 25 m., depth 8.0 m., capacity approx. 12,000 d.w.t.

Berthage: No. 1 quay, 390 m. long × 7 m. draft. 1 × 15 ton luffing crane. No. 2 quay, 268 m. long × 7 m. draft. 1 × 15 ton luffing crane. No. 3 quay, 268 m. long × 7 m. draft. 1 × 15 ton luffing crane.

SURVEYORS: Classification Surveyors are available from Singapore and Kuala Lumpur. Cargo Surveyors are represented locally by Caleb Brett, General Superintendents and Trident Malaysia.

GANGWAY/DECK WATCHMEN: The Port has a Security Division responsible for the general security of the port area. The force consists of a detachment of trained armed guards. Their services are available if requested through the Agents.

CUSTOMS ALLOWANCES: Spirits: 0.125 of a quart per man per day or wine 1 quart per man per day; beer 1 quart per man per day, cigarettes: 25 in number per man per day or cigars 8 in number per man per day or tobacco 1 oz. per man per day.

Customs will issue allowance for total of 3 days, and on request to a Proper Customs Officer the seal may be broken for further issues.

CARGO GEAR: All loading and unloading is carried out by either ship's derrick or shore equipment. Mobile cranes of varied capacities available for bulk cargoes, e.g. grains, fertilisers handling via conveyors or conventional method.

REPATRIATION: Ship's crew with valid or recognised International Passport are permitted to enter and sign-off through Malaysia/ Singapore checkpoint at Causeway, provided they obtain a transit visa from the Malaysia Authorities through the ship's Agents. Ship's crew without International Passport, and only Seamen's Books must join/ leave ships via Kuala Lumpur.

TIME: GMT plus 8 hours.

HOLIDAYS: The port is operational 24 hours a day, 365 days a year.

TELEPHONES: Available.

SERVICES: *Provisions:* 6 licensed ship chandlers are able to provide and attend to all requirements.

SHORE LEAVE: Shore leave for crew members is permissible. The nearest town centre is Pasir Gudang town centre, approximately 4 km. from the port. Business class hotel, dining facilities and business centres available. Johor Bahru is approx. 40 km. from the port by road. Crew members are allowed to cross the Causeway into Singapore, providing they obtain the Immigration Authorities permission through the ship's Agent.

DEVELOPMENTS: The new full fledged container terminal Phase 3 expansion project will be fully operational by end 1994.

The terminal measures 710 m. long, 400 m. wide, with 15.0 m. water depth, capable of handling 500,000 to 600,000 TEU's of containers annually.

Phase 4 expansion project started April 1994 and expected completion end of 1996. Under this phase, a further 1,000 m. quay line with 5 multi-purpose berths, back-up area of 48.5 ha., and will enhance the port's cargo handling capacity by a further 3.5 million tonnes, as well as creation of additional capacity at the other wharves.

The port is expected to be fully privatised in July or August 1994.

TRAFFIC INFORMATION:

Port of Singapore Authority – Port Circular No. 23, dated 20th March, 1981.

To: Shipping Community

Traffic Information System for Ships Transitting Serangoon Harbour: 1. In exercise of the powers conferred by section 65 of the Port of Singapore Authority Act (Cap 173) 1970, I hereby direct that Masters of vessels entering, transitting or leaving the traffic information area shall, in the case of vessels having a gross registered tonnage of 2,000 and above or whose masts or superstructures exceed 30 m. above the waterline or where the vessel is under tow and the combined length of the towing vessel and the tow exceeds 30 m., comply with the new VHF reporting system which is given in this circular with effect from 1st June, 1981.

2. *Method of Communication:*

2.1 The VHF traffic is conducted on VHF Channel 21 and Masters of vessels are required to listen to this Channel continuously while their vessels are entering, transitting or leaving the traffic information area.

2.2 In the event that Channel 21 is inoperative, Channel 13 will be used. Masters of vessels are required to contact Port Operations on Channel 12 for confirmation of breakdown of Channel 21 prior to using Channel 13 for communication with the PSA Control Station.

3. *Notification:*

3.1 Master of vessels mentioned in paragraph 1 intending to enter or transit the traffic information area shall give at least 24 hours notice to the PSA Control Station. The information required together with this notice are:
- (a) Name and Call Sign of Vessel;
- (b) Type of vessel (stipulate floating crane, oil rig, etc.);
- (c) Max. height above waterline in metres;
- (d) Destination (Sembawang Port, name of shipyard, etc.);
- (e) Point of Origin (Sembawang Port, Johore Port, JSB, etc.);
- (f) ETA at Johore Shoal Buoy or ETD.

3.2 This notification may be given to the PSA Control Station by telephone, VHF, telex, public telegram or W/T.

3.3 Between 2 and 3 hours before arrival at Johore Shoal Buoy (approx. positon Lat. 01° 18′ 53″ N., Long. 104° 05′ 00″ E.) or 3 hours before departure from a berth within East Johore Strait, Masters of vessels mentioned in paragraph 1 shall notify and seek permission from the PSA Control Station on Channel 21. In seeking permission from the Control Station, the following information is required.

(a) Eastbound:
ETD from berth
ETA at Setia Jaya Jetty (approx. position Lat. 01° 26′ 33″ N., Long. 103° 53′ 02″ E.).
ETA at Malang Papan Beacon (approx. position Lat. 01° 24′ 07″ N., Long. 103° 59′ 27″ E.).
ETA at Malang Tiga Buoy (approx. position Lat. 01° 23′ 09″ N., Long. 104° 01′ 33″ E.).

(b) Westbound:
ETA at Johore Shoal Buoy (approx. position Lat. 01° 18′ 53″ N., Long. 104° 05′ 00″ E.).
ETA at Malang Tiga Buoy.
ETA at Malang Papan Beacon.
ETA at Setia Jaya Jetty (if applicable).

Following approval from the PSA Control Station, Masters of Westbound vessels when passing Johore Shoal Buoy and Angler Buoy (approx. position Lat. 01° 21′ 06″ N., Long. 104° 03′ 07″ E) shall confirm or update their ETAs at Malang Tiga Buoy and Malang Papan Beacon.

3.4 Masters of Eastbound vessels shall confirm or update their vessels' ETAs at Malang Papan Beacon and Malang Tiga Buoy when passing Punggol Beacon (position Lat. 01° 25′ 19″ N., Long. 103° 54′ 48″ E.) and Squance Buoy (approx. position 01° 23′ 43″ N., 103° 58′ 00″ E.).

3.5 Masters of vessels should check their vessels declared ETAs at Malang Tiga Buoy and Malang Papan Beacon when their vessels are between Angler Buoy and Squance Buoy. Should the new ETAs at Malang Tiga Buoy and Malang Papan Beacon differ by 5 minutes or more from the last declared ETAs, they should update their vessels' ETAs with the PSA Control Station.

4. Masters of vessels failing to comply with these directions shall be guilty of an offence punishable under Section 66 of the Port of Singapore Authority Act.

Signed: Port Master, Port of Singapore Authority.

SHIPMASTER'S REPORT: February 1979. (Updated 1994).

Documents: Agent: Last Port Clearance, Manifest, Bills of Lading, Ships Certificates, Crew Agreement (Articles).

Pilotage: Pilots board off Johore Shoal Buoy, request for Pilot to be made via Agents. Confirmation of Pilot boarding obtained from Johore Port Control, VHF Channels 11 and 63.

Pilot launch is a fast motor cruiser.

Pilotage is compulsory for all vessels over 45 m. in length.

Anchorage: Ships proceeding to call at any of the docks within Johore Port Limits, may be requested to use the anchorage to the East of the pilot boarding point.

Max. Size: The navigational conditions in the Straits are adequate for vessels of sizes expected to call at Johore Port as determined by depths at Ocean Wharf, Oil Jetty, and Coastal Wharf. No limitations on the size of vessel passing through the fairway except for controlling draft in the East Johore Channel of up to approx. 12.5 m. Large vessels up to 400,000 d.w.t. can navigate the Straits in ballast proceeding to Malaysia Shipyard also situated in Pasir Gudang.

Health: Vessels Agent to give advance notification to the Health Officer, if possible 48 hours prior to ETA of vessel, together with a list of ports visited within the preceding 14 days. Vessels from infected ports, or without valid Derat Exemption Certificates, or with cases of sickness or death on board, must fly the quarantine flag, and proceed to quarantine anchorage until boarded by the Port Health Officer.

Radio: Singapore Radio 9VG is the most reliable, and messages are telexed direct to local Agent in Johore Baru.

VHF: The base station is situated at Pasir Gudang, Channels presently in use are 11 and 63.

Tugs: Tugs normally meet vessels off the wharf. Tug's lines used.

Berthing: Oil Jetty: Depth alongside 10.2 m.; "L" shaped jetty, with 2 berths.

Ocean Wharves: Depth alongside 12.5 m.; length of wharf 1,093 m.

Coastal Wharf: Depth alongside 5.0 m.; length of wharf 107 m.

The Ocean berth is designed for general cargo vessels, and bulk carriers, of approx. 20,000 – 60,000 d.w.t.

All cargo work is carried out by ship's gear, shore equipment is available, e.g. mobile cranes, side loaders, vacuvators.

Specialised Cargo Handling Facilities: Oil Jetty capable of handling Palm oil shipment. Liquid chemical installation of 21,500 tonnes capacity. Grain silos, 72,000 tonnes capacity. Fertiliser storage 59,000 tonnes. Timber terminal 4.36 acres.

Medical: Medical service is available from the nearby town of Pasir Gudang, which is only a short distance from the port. There is a General Hospital situated in Johore Baru to attend to serious cases.

Fresh Water: Fresh water is available through hydrants installed at frequent intervals on the wharves and the breasting island of the oil jetty. Fire fighting hydrants are installed throughout the port area, using separate fresh water, and sea water systems. Fresh water may also be supplied to vessels in the anchorage if required by water barge.

Fuel: Bunkers are available by pipeline installed along the quay, or alternatively by barges. Bunkering is undertaken by Petronas.

Fire Precautions: The Port maintains a fire and rescue service, with trained firemen responsible for fire fighting on board, and on shore. The brigade is equipped with modern fire fighting appliances, and salvage equipment. Tugs are also equipped with fire fighting equipment, and anti-pollution equipment.

Consuls: Nearest Consuls are situated in Singapore, and arrangements can be made to obtain Visa to proceed to Singapore to carry out ships business.

Hatches: Preferably all opening/closing to be carried out by ship's crew, as the stevedoring labour is inexperienced.

SHIPMASTER'S REPORT: April 1979 (Updated 1994).

Position: The port is situated at the Southern tip of the Malaysian peninsula on the East of Johore Straits, about 10 miles East of Johore Bahru town. The straits separating Malaysia and Singapore provides good shelter and safe anchorage.

The exact position is Lat: 1° 26′ 06″ N., Long: 103° 54′ 25″ E.

Approaches: Pilot is picked up at Johore Shoal buoy. Pilots can be contacted on VHF Channels 11, 21 and 63. The access route for vessels proceeding to the port branches via the buoy off Johore Shoal, passes through Kuala Johore and the bend off Serangoon North of Pulare Ubin. From Serangoon the route leads straight N.W. of the port. The East Johore channel has a depth of 41 ft.

Berths: There are at present 13 berths in the port.

Boarding Officials: Since this vessel came from Singapore, all clearances were arranged by the Agent there. The Customs boarded to check the seal on the bond. The Immigration, Port Health, etc. also boarded for a cursory check.

Discharging: Discharging was carried out using grabs which were attached to the ship's cranes (1994: 6×5 ton grabs available). The grabs had no weight marked on them, hence it was insisted that the grab along with one full lift of cargo be weighed. This was done and the average weight of the grab was found to be 2 tons and the maximum cargo possible that could be lifted was 2.5 tons.

This port apparently handles a lot of fertiliser, but never in large parcels. This parcel of 6,000 tons was the second largest discharged. 4 cranes were used throughout and the discharge rate worked out to nearly 2,000 tons/day. The stevedores were initially warned against mishandling the cranes, and it was found that the operators handled the cranes very slowly and carefully.

Provisions: Available, but slightly more expensive than Singapore. No bonded stores available at this port.

Density: Varied from 1018 to 1021.

Shore Leave: There is no restriction on shore leave. No special permits/passes are issued, but the Agents suggested that persons going ashore should preferably carry their Passports/Discharge Books. The nearest city is Johore Bahru which is 20 miles away. Ample transport is available at moderate rates. About 4 miles away from the port there is also a village called Masai.

Medical: All types of normal medical attention available.

SHIPMASTER'S REPORT: December 1991 (Updated 1994).

Charts: B.A. Charts No. 2585 and 2586.

Documents:
8 copies Crew List.
2 copies Stores List.
2 copies Crew Personal Effects List.
2 copies Ports of Call List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
1 copy Arms and Ammunition List, or "negative" Declaration.

Pilotage: Pilot boards between Angler Buoy and Johor Buoy from a fast pilot boat (4 units, each 18 knots). The pilot comes from Pasir Gudang. Berthing and unberthing take place throughout 24 hours. On departure the pilot leaves at Angler Buoy. Time from Johor Buoy to the Vegetable Oil Berths is about 1.5 hours.

Johor Control can be contacted on VHF Channel 11. Pilot requires 2 hours notice of arrival and 3 hours notice of departure.

Approaches: Tanjong Stapa Lighthouse is conspicuous on the S.E. shore of Johor Strait and Changi Airport control tower (Singapore) is conspicuous on the S.W. shore.

Singapore Strait VTS is in operation on VHF Channel 10 up to Johor Buoy.

Anchorages: Anchorages are as indicated on B.A. Chart No. 2569. Most vessels anchor in the "General Purpose" area to the South of the designated area.

The designated areas for different classes of vessels do not appear to be adhered to. The Southern end is very crowded. The holding ground is fair and in December and January there are sudden rain squalls.

VTS: Johor Control is on VHF Channel 11 throughout 24 hours and answers calls quickly. This station accepts orders for pilots from Shipping Agents only.

A Height Declaration (air draft) must be made before entering Johor Strait, when inbound and outbound, due to Changi Airport flight path over the shipping channel. Aircraft movements have priority and ships with air draft over 60.0 m. may have to wait for clearance.

Channel: Johor Channel is very busy with small craft and shipping going to the shipyards. It is also very busy in Pasir Gudang area. The tidal current runs at 1.5 knots. The normal maximum transit draft is 12.5 m.

Tugs: There are 5 tugs available and tugs lines are used. We used 1 tug forward.

Berths: Berthing and unberthing throughout 24 hours.

There are 4 vegetable oil berths on the jetty to the West of the general berths. The outer berths accept vessels up to 35,000 d.w.t. with draft 11.8 m. There is a new extension of jetty to the West.

The old section to the East consists of a berthing platform 70 m. in length with 2 berths (No. 1 Outer and No. 1 Inner). There are 2 breasting dolphins to the East connected by a catwalk. The platform has a roadway to the shore and a pipe gantry with hydraulic cranes serving both berths.

The Western extension has pipes on the jetty deck. The ship's gear is required for handling hoses.

Vessels berth either side alongside, depending on tide.

Fresh water is available at all berths at a good rate. The waterman ashore supplies the hoses.

Landing of the gangway is difficult at the old section as the stern overhangs and a long brow is required. Alternatively the pilot ladder can be used. There are large rubber fenders which keep the vessel 1.5 m. off the face. Moorings were 3 headlines and 1 spring forward and 3 sternlines and 1 spring aft.

Cargo: There are 10 lines to the jetty with flexible hoses. The old section is served by hydraulic cranes, and there are cranes on the new section, so ship's gear is not required.

Eight grades of vegetable oil are handled through 6 in. connections. The cargo is pumped from tanks about 0.5 miles away and the rate for each line is 220 t.p.h. We used 1 line for PKO and 2 lines for RBD Olein.

There are numerous terminal staff in attendance to adjust the lines.

Short stoppages are required for line clearing.

General: It is about 2 hours by road over the causeway to Singapore city. The nearest large town is Johor Bahru, which is 12 miles to the West.

Developments: There is an extension underway with a new container terminal to the West and the area to the East of the general cargo berths is also being developed.

AUTHORITY: Johore Port Sdn. Bhd., P.O. Box 151, 81707 Pasir Gudang, Johore, Malaysia. *Tel:* 07-2525888. *Telex:* MA 60192. *FAX:* 07-2510281 (Operations), 2510291 (Administration). *Cables:* Johan Pasirgudang. *Contact:* HJ. Nik Mohd Hashim Bin Nik Jaffar, Director – Operations.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Container Building, P.O.Box 51, 81707 Pasir Gudang, Johore. Tel: 60-7-2514312/3. Telex: MA65084. Cables: "Jarship Pasir Gudang". Fax: 60-7-2514314.

Associated with Jardine Shipping Agencies.

PENANG, Malaya: 05.25 N. 100.21 E. (See Plan)

DOCUMENTS:

The Report of Arrival (provided in Marine Shipping Ordinance, 1952).

A copy of Passenger Statistics on prescribed forms.

A List of Crew Members.

A List of Passengers.

Evidence of last Port Clearance.

All Ship's Documents (Safety Equipment, Derat, Radio, Load Line and Register).

Maritime Declaration of Health.

International Health Certificate for passengers and crew.

Vaccination List, for Cholera, for passengers and crew.

Departures: Port Clearance Certificate signed by the Port Health Officer, to be shown to the Port Officer issuing clearance.

Clearance also required from Immigration.

For oil tankers, a copy of Ship's Manifest to be submitted. Ship carrying explosives, Master required to fill prescribed Form "D" stating quantity of explosive cargo ship is carrying together with copy of Ship's Manifest.

PILOTAGE: Vessel approaching port has to send telegram to Pilot Office direct (cable address "Pilots Penang") or to ship's Agent stating "ETA North Channel Light Float" or in case of South Channel "ETA Pulau Rimau". Draft of vessel to be given. The Pilot Office could be contacted direct on VHF Channel 12 or through Penang Radio Exchange on VHF Channel 16 to local telephone No. 613313. At least 3 hours' advance notice should be given before arrival at Pilot point.

Pilot boat painted with International red colour hull with white upperworks with "Pilot" written in bold letters on both sides of boat and fitted with VHF which operates on Channel 12.

Pilot is usually taken onboard in vicinity of the North Channel Light Float in position Lat. 5° 35.9′ N., Long. 100° 12.45′ E. for vessels entering the harbour through the North Channel. For entry through the South Channel the Pilot will be taken onboard in vicinity of Rimau Wreck Buoy, 1 mile South of Pulau Rimau Lighthouse.

Vessels awaiting Pilot can anchor, in case of North Channel, in the Pilot waiting area within the following co-ordinates:

1. Lat. 05° 35.8′ N.	Long. 100° 10.9′ E.
2. Lat. 05° 34.3′ N.	Long. 100° 10.9′ E.
3. Lat. 05° 32.7′ N.	Long. 100° 13.0′ E.
4. Lat. 05° 34.2′ N.	Long. 100° 13.0′ E.

An approach channel of 10 nautical miles × 183 m. wide for one line of traffic has been dredged at the North Channel. The available depth of water at the channel is periodically declared to port users. Current depth available is – 10.2 m. A.C.D.

Approach through the South Channel is restricted to vessels of 28 m. air draft - due to existence of the Penang Bridge. Current depth 5.8 m. A.C.D. Must comply to Merchant Shipping Ordinance 1952. Under Penang Port (Navigation within the area of the Bridge) Rules 1986.

Pilotage is compulsory for all vessels navigating in pilot district of Penang with the exception of fishing vessels and vessels of 600 g.r.t. and below.

ANCHORAGES: The Man of War, Petroleum, Quarantine, Explosive and local vessel anchorages are marked on Charts of the Penang Harbour (A.C. No. 3732).

There is no specific anchorage area in the harbour for vessels other than mentioned above. These other vessels are normally anchored South of Lat. 5° 26′ N. and North of Lat. 5° 22.80′ N. between the mainland and the island, clear of the berths, fairways and shallow areas.

RESTRICTIONS: No entry restrictions imposed other than those dictated by state of tide and draft of vessel.

Also see "Pilotage".

RADIO: Penang Radio, call sign 9MG. Channel 16 VHF for ship/shore telephone.

VHF: The Penang Port has various working Channels as follows:

Channel 16 – Watching Channel.
Channel 12 – Pilotage.
Channel 20 – Port Operations/ferries.
Channel 13 – Working Channel between tugs/Pilot.
Channel 8 – Ferry operations.

TUGS: May be required to berth vessels at all berths in the port. 3 tugs available, 2,000 b.h.p., 1,320 b.h.p. and 1,200 b.h.p.

BERTHING: Berthing facilities are available at Butterworth Wharves, Vegetable Oil Tanker Pier, Bulk Cargo Terminal, Prai (all of which are located on the Mainland) and Swettenham Pier on the island of Penang.

Conventional Cargo handled at Butterworth Wharves and Swettenham Pier.

Butterworth Wharves: 3 ocean berths with a total quay length of 549 m. Depth alongside 8.9 m. There are 3 transit sheds of 10,033 sq.m. and 5 storage godowns with an area of 19,509 sq.m. An open-sided timber shed of 4,738 sq.m. and an open storage area of 2,000 sq.m. are also available.

Swettenham Pier: 2 berths with a total quay length of 366 m. Depth alongside 10.0 m. There are 2 transit sheds of 4,464 sq.m. and 5 storage godowns of 10,900 sq.m. This terminal which is equipped with a modern passenger terminal also caters for cruise liners from all over the world.

Also see "Equipment".

BULK HANDLING FACILITIES: *Bulk Cargo Terminal:* A bulk cargo terminal has been constructed to service dry and liquid bulk carriers. The terminal comprises 2 berths of 338.2 m. length and an inner berth of 154 m. length. Private pipelines are used for the handling of liquid cargo. Depth alongside is 10.0 m. The terminal is serviced by a luffing crane and a high speed gantry crane, capable of handling 100 tonnes and 300 tonnes per hour respectively. The berths are linked to the storage area by a 1,219 m. access bridge. An area of 30.6 hectares forms the back-up for the storage sheds, stockpiling and tank farms.

Vegetable Oil Tanker Pier: A dolphin-type berth used exclusively for the Butterworth Vegetable Oil Installations. Pipe-lines connect the tanks to the berth providing speedy and efficient loading and discharge of vegetable oil, particularly palm oil, direct to and from the vessels. Depth alongside is 8.9 m.

Also see "Equipment".

EQUIPMENT:

Butterworth Wharves:	*No. of Units*	*Capacity*
Conventional:		
Prime movers	8	12 tons each
Forklifts	4	16 tons each
	46	3 tons each
Trailers	12	12 tons each
Container:		
Gantry cranes	4	30-40 tons each
Transtainers	12	30-40 tons each
Trailers	75	20-40 tons each
Prime movers	28	20-40 tons each
Front-end loaders	3	35 tons each
Reach stackers	2	40 tons each
Forklifts	16	3 tons each (for CFS operation)
Power points for refrigerated containers	122	
Bulk Cargo Terminal		
High speed gantry crane	1	300 tons per hour
Kangaroo crane	1	12.5 tons
Payloaders	2	5 tons each

For liquid bulk cargo, pipelines connect the berths to the tanks, located outside the Port area.

CONTAINER HANDLING FACILITIES: The Port has 3 container berths with total quay length of 497 m. Berth No. 6 is equipped with a Ro/Ro ramp of 8 m. wide and 28 m. long to service container and Ro/Ro vessels. Servicing the berths are 4 gantry cranes of 30-40 tonnes capacity.

An 15.4 hectare marshalling yard with a static storage capacity for 10,245 TEU of containers and 2 freight stations of 11,892 sq.m.

LIGHTERAGE: In the event of a vessel working in the Roads, lighterage is available for the transport of goods to and from the vessel. There are about 105 lighters operated by private companies.

BRIDGE: Channel width 156 m. Overhead clearance 28 m.

STEVEDORES: Stevedores and cargo handlers are obtainable from registered labour contractors. A Port Labour Board exists to register and control the employment of all categories of port labour.

Working Hours:

The Port operates round the clock. The working hours are as follows:

1st shift 0730 – 1530 hrs. (meal break 1130 – 1230 hrs.)
2nd shift 1530 – 2300 hrs. (meal break 1930 – 2030 hrs.)
3rd shift 2330 – 0730 hrs. (meal break 0330 – 0430 hrs.)

MEDICAL: Advance notice is necessary if medical attention is required so that arrangements can be made with Medical Department by Agents.

TANKERS: See "Fuel".

FRESH WATER: Fresh water is available at all times for supply to ships. Delivery can be through hydrants for vessels alongside wharf or by means of water-boats to vessels anchored in the Roads.

FUEL: Bunkering facilities are available from Shell Malaysia Ltd. and Esso Standard (M) Ltd., at their own wharves at Butterworth with a depth of 8.2 m. and from Caltex Ltd. at its wharves at Prai with alongside depth of 10.7 m.

Limited supply can be obtained by vessels anchored in the roads.

CONSULS: Danish Royal Consulate, Consulate of the Republic of France, Consulate of Germany, Honorary British Representative, Consulate of the Republic of Indonesia, Consulate General of Japan, Consulate of the Netherlands, Royal Norwegian Consulate, Swedish Consulate, Thai Royal Consulate General, Consulate of the Republic of Sri Lanka, Consulate of the Republic of Bangladesh and Consulate of the Republic of Turkey.

REPAIRS/DRY DOCKS: The Penang Port Sdn. Bhd. operates the Bagan Dalam Dockyard on the mainland for minor and urgent repairs of vessels up to 700 tons displacement. All floating craft of the Penang Port Sdn. Bhd. are serviced at the Dockyard. Two private dockyards available, capable of servicing vessels up to 700 g.r.t. and 8,000 g.r.t. respectively.

GANGWAY/DECK WATCHMEN: Services of a watchman recommended.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriation.
AIRPORT: Distance from port to airport approximately 18.3 km. Served by both international and local airlines.
TIME: 8 hours ahead of GMT. No alteration to clocks during year.
HOLIDAYS: Port works 365 days a year.
POLICE/AMBULANCE/FIRE: Dial 999 for Police and Ambulance. Dial 994 for Fire Brigade.
TELEPHONES: Available on request.
BANKS: Algemene Bank, Nederland NV, Bank Hin Lee Bank Bhd., Bank Bumiputra (M) Bhd., Bank Pusat Kerjasama Bhd., Chung Khiaw Bank Ltd., Citibank NA, Development & Commercial Bank (Ltd.) Bhd., Hong Kong & Shanghai Banking Corp., Lee Wah Bank Ltd., Malayan Banking Bhd., MUI Bank, Overseas-Chinese Banking Corp. Ltd., Overseas Union Bank Ltd., Public Bank Bhd., Southern Bank Bhd., Standard Chartered Bank, The Bank of Commerce, United Malayan Banking Corp. Bhd.
SERVICES: Some of the minor marine services provided by private firms are draft survey, general conditioning of ships, valuation of ships, accident survey, inspection of refrigeration, radar adjusting service, compass adjusting and tank cleaning.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Needed only when a crew member is discharged after hospitalisation or when he is repatriated.
REGULATIONS: When a vessel calls at port, Customs search party may go on board vessel to search for contraband goods.
DELAYS: Rain is only factor that may delay a ship's discharging or loading operations.
DEVELOPMENTS: There is a new container terminal currently under construction. The position of the container terminal is Lat. 05° 24.9′ N., Long. 100° 21.65′ E. It will be operational in early 1995.
Scope of Project:

1.	Wharf	350 m.
2.	Depth	–12 m. A.C.D.
3.	Approach Bridge	520 m. × 19 m.
4.	Land Area	Land Reclamation – 42 hectares.
5.	C.F.S.	1 Godown × 6,000 sq.m.
6.	Equipment	3 gantry cranes, 8 rubber tyred transfer cranes. A fleet of trailers and prime movers.

Implementation Programme:
Phase 1: (1991 – 1992).
Dredging and Reclamation – 42 hectares of sea-bed (completed).
Phase 2: (1992 – 1994).
Construction of wharf and bridge.
Phase 3: (1992 – July 1994).
Construction of port buildings, marshalling yard and utilities.
Phase 4: (March 1995).
Acquisition of container/cargo handling equipment.

SHIPMASTER'S REPORT: January 1992 (Updated 1994).
Charts: B.A. Charts No. 1366 and 3732.
Documents:
6 copies Crew List.
2 copies Crew Effects Declaration.
2 copies Stores List.
1 copy Ports of Call List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
Cargo Manifest ('nil' declaration if not discharging cargo).
Officials: Immigration required that all foreign crew signing-off must have flights booked before being allowed off the ship. Crew members are not allowed to travel overland to Kuala Lumpur Airport. Travel must be from Penang Airport.

Certified officers must have a relief on board before the Shipping Master will allow them to sign-off. Ship's articles must be presented to the Shipping Master.

Customs officials may visit the vessel at any time after arrival.
Pilotage: The pilot boards from a fast cutter with an orange hull at Buoy No. 1. The pilot departs at Buoy No. 4. The pilot station is located at Swettenham Pier and can be contacted on VHF Channel 12 throughout 24 hours.

A pilot is required when anchoring in the roads for vessels more than 600 g.r.t., and for berthing of vessels more than 200 g.r.t.
Anchorage: We anchored with Swettenham Pier bearing 348°×1.25 miles to work cargo from barges. Other vessels were working cargo from barges in the same area. Officially it is prohibited to anchor on the ferry route and pilots report that coasters do not obey this rule.
Approaches: Muka Head Light was not operating at the time of our call. The pilot reports that since its conversion to mains electricity power its operation has been unreliable.

North Channel Light Float is a buoy and is a dim light.

Penang Island was observed at 64 miles on the radar.
Channel: The channel is dredged to 9.7 m. MLWS. At present no maintenance dredging is in progress but this is expected to resume when the new container terminal is completed.
Tugs: Three port authority tugs of moderate power available.
Cargo: Latex is loaded from lighters via 1×4 in. hose, using the air pressure method. There are three lighters with 80 tonnes capacity and one lighter of 40 tonnes capacity which shuttle back and forth to the loading facility at Butterworth. There are small barge tugs to tow the lighters.

The total average loading rate was 80 tonnes/hr. The surveyor boarded at the start and completion of operations. No certificates required.
Airport: Penang Airport is at the South end of the Island. There are frequent flights to Kuala Lumpur.

AUTHORITY: Penang Port Sdn. Bhd., P.O.Box 1204, 10710 Penang, Malaysia. *Tel:* 04-612211. *Telex:* Pelpin Ma 40157. *Cables:* "Wharves Penang". *FAX:* 604-613336. *Contact:* Chief Executive Officer, General Manager (Operations) or Chief Marine Officer.
AGENT: Pesaka Jardine Shipping Agencies SDN. BHD., 29, 1st Floor, Lebuh Pantai, 10300 Penang, Malaysia. Tel: (04) 624144/5. Telex: MA40073 Jarship. Fax: (04) 626531.
Associated with Jardine Shipping Agencies.

PORT DICKSON, Malaya: 02.31 N. 101.47 E.

(See Plan)

DOCUMENTS:
1. *Harbour Master's Office or Marine Department*
   - (a) "Report of Arrival of Vessel" on prescribed Form (Marine 28) obtainable from Harbour Master's Office on arrival.
   - (b) One copy, Passenger List, specifying names and nationalities and required to report any casualties, accidents, births or deaths that have occurred during the voyage to the passengers, crew, ship or cargo.
   - (c) Port Clearance from last port and copy of Manifest of Cargo to be discharged.
   - (d) List of all arms and explosives on board.
   - (e) In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port, produce to Port Officer the Certificate of Registry and ship's Articles.
   - (f) All ship's certificates such as Safety Equipment Certificate, Radio Certificate, Load-line Certificate, Safety Construction Certificate, Ship's Registry, Passengers' Certificate, Derat Certificate and all Certificates of Competency of all Officers on board.
   - (g) Crew List.
2. *Immigration Authorities*
   - (a) Crew List (3 copies).
   - (b) Passenger List (3 copies).
   - (c) Produce all passengers passports/visas.
   - (d) Produce all Seaman's Cards.
   - (e) Forms A and B – "Immigrant and Emigrant" obtainable from Immigration Department on arrival.
3. *Port Health*
   - (a) Crew List showing last date of vaccination.
   - (b) Passenger List showing the last date of vaccination.
   - (c) Produce all seamen and passengers' vaccination cards.
4. *Customs Department*
   - (a) Crew List (2 copies).
   - (b) Passenger List (2 copies).
   - (c) Personnel Effects List (2 copies).
   - (d) Cargo Manifests (2 copies).
   - (e) Last Port Clearance.
   - (f) Bonded Stores List (2 copies).
   - (g) Full and correct statement of dutiable goods carried as ship's stores (2 copies).
   - (h) Customs Form C.D.15 obtainable from Customs Department on arrival.

APPROACHES: Deep water approach channel from N.W., marked by 5 light buoys, presents no difficulties and is clear.
PILOTAGE: The Port Dickson area does not constitute a Compulsory Pilotage District under provisions of Merchant Shipping Ordinance, 1952. Private pilotage services are, however, operated by Shell and Esso for vessels making use of their respective marine installations. Mooring Master boards tankers at Banbeck Shoal Buoy. Pilots on VHF Channel 19.
Ship's Officer's Report: Pilot boards one mile off Fairway Buoy. However, vessels of less than 30,000 d.w.t. holding Admiralty Chart No. 1140 may be requested to proceed inwards, Pilot boarding at No. 1 Buoy. Coasters proceeding to Headlands Jetties may be required to do own pilotage.
ANCHORAGES: *(a)* Good anchorage may be obtained in depths from 15 to 20 fathoms, Westward and South-Westward of Tanjong Kamunin. Small vessels may obtain anchorage in depths from 4 to 5 fathoms North-Eastward of Pulau Arang Arang, but holding ground is poor.

(b) Prohibited Anchorage Area indicated by pecked lines on chart and described under Port (Negeri Sembilan) (Amendment) Rules, 1963. This area contains a tanker SBM, with extensive ground tackle and floating hose attachments, which is connected to the shore by a submarine pipeline. Passage between the buoy and the shore is also prohibited.
RADIO: *Ship's Officer's Report:* Send ETA 96 hours and 24 hours in advance. Two hours before arrival keep listening watch on Channel 16. Shell Oil Terminal on VHF Channel 16 and 19. Cargo operations are carried out on Channel 9.
TUGS: No tug-boats available.
MAX. SIZE: Up to 49 ft. draft at S.B.M. terminal.
BERTHING: Port installations at Port Dickson comprise the following:

A small boat harbour contained in the curve of the stone approach to the Railway Jetty which affords little shelter against Southerly winds dries out at low water.

The Shell Jetty – property of the Shell Refining Co. (Malaysia) Ltd. (Private). Reinforced concrete jetty 700 ft. with "T" head 170 ft.×36 ft.

The Esso Jetty – property of the Esso Standard Malaya Ltd. (Private). Reinforced concrete island jetty 200 ft.×24 ft.

The Railway Jetty – property of the Malayan Railway Administration. Stone pier 600 ft. length terminating in a crosshead 150 ft. long with steel piling and wooden deck.

The Joint Shell/Esso single-buoy Tanker Mooring and Crude Oil Discharging Terminal (see "Tankers").

Stone ramp on foreshore usable by lighters at high water.
MEDICAL: District hospital with 150 beds.

TANKERS: *Cautionary Advice - Operating Conditions - Esso SBM:* Strong local winds, ("Sumatras"), often occur during darkness and without any advance warning. For this reason, it is essential that arrangements be made during the early part of discharge in order that a sufficient number of tanks are ready to receive ballast as soon as required.

In order to safeguard the SBM installation and the ship, no large crude carrier is permitted to fully discharge without having ballasted to at least 15% of her deadweight. For ships completing discharge and sailing during daylight hours, a 20% minimum deadweight is usually acceptable but all cases are treated on an individual basis, season of year, present weather conditions, tidal stream, etc. being considered.

If during discharge of cargo, stoppage of some hours is advised by the installation, then opportunity should be taken, after joint consultation between ship and shore, to ballast to normal sea ballast condition, to avoid a delay after the cargo discharge is finally completed, assuming that the Master wishes to take ballast additional to his permanent ballast prior to sailing.

Upon arrival, ullages and samples are taken by shore representatives. Prior commencing ballasting, tanks are certified dry by a shore representative. Likewise if ballast is taken on board prior to completion of cargo, tanks should be inspected.

Shore will instruct at what stage of the operation the compartments containing the residues and the load on top or parcels should be discharged.

Vessels moored at the SBM must keep engine ready on short notice. Immobilisation of engine is not permitted. Propeller of turbine engine should be turned at minimum revolutions. This point should be discussed and co-ordinated with the Marine Superintendent since higher revolutions may cause vessel to surge forward and damage SBM, hoses and ropes.

On approach of the "Sumatras" engine should be immediately put on standby. The critical moment is when a vessel lying with the tide is caught by the wind and swung around the buoy. During the swinging-process the vessel may gain great momentum and put the hawsers under heavy strain.

The Marine Superintendent does not remain on board the vessel during the discharge, but may be reached at any time via VHF Channel 9.

A launch remains in attendance at the ship for tending hoses, mooring, etc. In addition to the VHF radio operators, 2 workers, per shift, remain on board.

The terminal requires that a seaman from the vessel is stationed on the forecastle to watch moorings at all times and alert the Master whenever vessel's bow tends to touch the SBM and/or at anytime anything is going wrong with mooring arrangements.

General: The Shell/Esso SBM is located West of the town of Port Dickson. It is used for the crude discharge by Exxon controlled tonnage and by Shell for both crude discharge and fuel oil loading. The SBM is operated by Shell. In addition each company also operates a conventional type of wharf for export cargoes.

Communications: Radio traffic to and from vessels to be directed via Penang Radio. Vessels to monitor Penang Radio or Singapore Radio for traffic list.

Vessels should listen on VHF Channel 16 (alternate 9) 2 hours before arrival. Call sign "Shell Port Dickson".

Arrival Advice: Vessels should include in their arrival message, ETA at Fairway Buoy, draft forward and aft, Bill of Lading figures in barrels and Long Tons, number and location of tanks where slops were consolidated prior to loading and amount of water, residues and cargo loaded on top. Also include measurements of bow openings, cargo manifold and lifting capacity of ship's boom, if problem is foreseen. For crude oil washing request "Essoref PortDickson" well in advance for the COW questionnaire to be completed and cabled back to 'Essoref'.

Preparations: Crude vessels bound to SBM should have their accommodation ladder rigged on the starboard side. Port and Starboard derricks rigged. 2 good mooring ropes should be readily available on the forecastle head to be used as messenger lines. "Panama" centre fairlead to be uncovered.

Navigation: On approaching the Fairway Buoy moored in position Lat. 02° 30′ 00″ N., Long. 101° 42′ 48″ E.; the National Electricity Board Power Station chimneys provide a prominent landmark. The refinery flares also provide landmarks which can be easily identified. It should be borne in mind that the 2 gas flares may be extinguished at times. Position of NEB Power Station: Lat. 02° 31′ 58″ N., Long. 101° 47′ 30″ E. Painted white horizontal bands and red horizontal fixed lights at top and mid height. Height above sea level 307 ft.

Position of Shell flare: Lat. 02° 32′ 02.3″ N., Long. 101° 48′ 45.3″ E. The Esso flare is about 1 mile East of the Shell flare.

Fishing boats may be encountered in the approaches to the Fairway Buoy and they may present a navigational hazard.

Anchorages: It is sometimes necessary for vessels to anchor to await berth or suitable tides for berthing. Anchoring position for large crude carriers is 1 mile North of Fairway Buoy. If wait at anchorage is expected to be more than 3 days then vessel to anchor about 1.5 miles East of Fairway Buoy in order not to hamper navigation of other vessels in the Fairway Channel. Masters not familiar with this port should not enter the channel without a Pilot and should drop anchor outside at the Fairway Anchorage.

Product vessels routinely trading Port Dickson normally enter the channel and anchor about 0.5 miles N.E. of Buoy No. 2.

Pilots and Tugs: The Shell Refinery Marine Superintendent will board crude vessels for pilotage and mooring at the anchorages or 1 mile off the Fairway Buoy while underway if vessel is to berth on arrival. Anticipated time of boarding, etc. will be advised by Radio W/T or VHF. The Shell Marine Superintendent monitors VHF Channel 16 (alternate 9) on 24 hours basis. No tugs are available.

Esso/Shell SBM: General: The SBM is moored in position Lat. 02° 31′ 19.6″ N., Long. 101° 47′ 03.5″ E. (Pulau Arang Lighthouse bearing 122° 8 cables distance).

The SBM is moored in 16 fathoms of water and the least depth within a radius of 1,000 ft. from the SBM is 53 ft.

Berth Approach: Vessels from the anchorage proceed towards the SBM through the buoyed channel at the time established by the Marine Superintendent. Vessels up to 30,000 d.w.t. berth at any stage of the tide. Vessels in excess of 30,000 d.w.t. generally moor at SBM during ebb tide when N.W. tidal stream is running. There are no night restrictions for berthing.

Mooring: Vessels are moored to the SBM by means of 2×120 ft.×12 in. nylon ropes with a breaking strength of 125 tons each which are connected to 6 in. wire snotters secured on the ship's bollard. Hawser's chafing chains are, if possible, led through the ship's centre line "Panama" type fairlead. Large crude carriers may connect a third nylon preventer rope.

Mooring/unmooring is done by a shore gang, but assistance of the ship's crew will be required to operate all ship's equipment, winches, etc.

Certain mooring equipment, i.e. shackles, wires, snotters, etc. will be brought on board from the pilot mooring launch.

When the vessel is about 600 ft. from the SBM the mooring launch will run out to the vessel's port bow with one 12 in. nylon rope to which is connected a 10 ft. length of 2.25 in. diameter chain and a monkey face. To this monkey face, the launch will have connected a 500 ft. long 10 in. polypropylene pick-up rope. The tanker then lowers a ship's rope as a messenger from the port bow to the launch, which will connect the ship's rope to the polypropylene pick-up. The tanker will then heave up on the messenger and the pick-up until the monkey face is in-board when it will be shackled to the 6 in. wire snotters already fastened around the ship's bollards. When the launch has made fast the port messenger connection to the ship's rope, she will then run out the second ship's rope to the buoy and connect the second 12 in. buoy assembly line. Whether the third 12 in. nylon preventer should then be connected will be advised by the Marine Superintendent.

There is no night restriction for unberthing but awaiting of flood current is strongly recommended.

Cargo Operations: There are 2×16 in. hoses, each string 700 ft. long supported by flotation beads.

Each string terminates at the ship's end with a keystone valve having a flange of 12 in. ASA (150 psi).

Connecting and disconnecting of hoses is done by shore gang with the assistance of ship's crew and under ship's responsibility. A large crude tanker in empty condition is required to have derricks with safe lifting capacity of 10 tons to take the weight of a full hose. Hoses are fastened to the ship's main deck and are supported by means of chains. Connections from the SBM to the 30 in. diameter submarine pipeline to the shore is by means of 2×16 in. diameter submarine hoses. Hydraulically shore operated valves are fitted at the connecting points on the sea bed.

The line from the shore to the refineries is 31 in. diameter – about 2 miles long to Shell and 3 miles to Esso.

The shore system has proved capable of handling rates of 5,500 cu.m.p.h. but the governing factor at all times is the Ship's Rail Pressure. Ship's Rail Pressure must never exceed 120 p.s.i. (10 kg./sq.cm.).

Due to the SBM being a jointly owned facility, the system will on occasions contain oil owned by the other party, or another grade of crude oil. It is therefore often necessary for line clearing operations to be carried out before bulk discharge commences. Ship's manifold should remain closed when no cargo is being discharged as there may be static head back pressure of some 30 p.s.i. (2 kg./sq.cm.) once the shore lines are opened.

Line clearing involves the pumping of approximately 1,500 tons of cargo to shore tanks. The exact figure will be advised and controlled by shore; ships are, however, required to keep a close check in order that over clearance be avoided or in case radio contact is lost. Esso Refinery representative will board the vessel when berthed and will advise the quantity and procedures to be followed. Once line clearance has been completed and the necessary tanks lined up, readiness to receive cargo will be advised by shore. Discharge should commence using one pump first when oil is being received by shore, the ship will be advised to increase the pumping rate, until 120 p.s.i. at rail is reached.

Due to refinery operating requirements, it will sometimes be necessary to stop pumping during the change over of shore tanks. Shore will give ship at least 20 minutes notice before the ship is required to stop.

Advice to stop pumping will be confirmed 5 minutes before actual stoppage is required. If at that time, or any other time, radio contact is lost the ship should stop pumping until contact is re-established.

Every hour the quantities received ashore are advised by the refinery control. Ships are asked to check that these figures tally with the amount discharged.

The stripping and draining of cargo tanks should be commenced as soon as possible and every endeavour made to keep ahead of discharge, in order that no delay be incurred by draining. It is also essential that sufficient tanks be drained during the early part of the discharge, as it may at any time be necessary to suspend discharge and commence ballasting due to weather deterioration. This applies particularly to vessels without permanent ballast tanks or vessels whose permanent ballast is less then 20% of deadweight. In Port Dickson, experience has shown that a good trim is required for an efficient and quick draining. This is of particular importance for vessels stripping high vapour pressure crudes.

Two battery operated VHF radios on Channel 9, with an operator on a 6 hour shift, will be placed on board for all ship/shore contact throughout a vessel's stay at the SBM. It is suggested these should be sited in the ship's office or in some convenient room near the centre of operations (Cargo Control Room).

Ship/shore radio checks are to be made every hour, or more frequently if reception conditions are poor and if contact is lost cargo operations should cease immediately. Ship's VHF should be ready at all times to be used in case of failure of the portable sets.

Environmental Conditions: Strong local winds, known as "Sumatras" occur during the period May to October. They blow usually from a Southwesterly to a Northwesterly direction, are of short duration (1 to 4 hours average) and velocities of between 40 and 50 knots have been experienced. They are usually followed shortly after onset by very heavy rain.

Direction of the tidal current at the SBM is approximately 326°-146° with a maximum rate of 3 knots. The Northwesterly current (ebb) which normally flows for 6 hours starts 3-4 hours after HW and ends about 3-4 hours before HW. Port Dickson tides are semi-diurnal.

Density of water at the SBM varies between 1018-1023.

Safety, Fire and Protection: General: A Safety and Pollution Check List is used at each terminal and international accepted safety and pollution rules are strictly enforced. Discharge should be stopped immediately and the Marine Superintendent advised promptly in case of pollution incident.

Fire Fighting: In the event of fire on board, cargo operations should be stopped immediately, valves closed and terminal's superintendent advised.

No fire fighting facilities are available. The Marine Superintendent will be available to advise Masters and to assist if feasible in moving the vessel to an anchorage clear of the berth.

In case of breakdown of communications via VHF ships should use their whistle (six long blasts).

Security: No security problems have been reported, and shore leave is permitted.

Services: Fresh Water: Fresh water requirements should be cabled to the Agent prior arrival. It is supplied by a 180 ton steel barge.

Bunkers: All grades of bunkers are available alongside at both Esso and Shell Product Piers. No bunker barges are available to supply crude vessels at SBM or at anchor.

Provisions, Laundry, etc.: Fresh and dry provisions are available through a ship chandler. Limited selection of bonded stores also available. 24 hour laundry service available, if arranged prior to arrival. No deck/engine store available.

Tank Cleaning: There are no tank cleaning facilities. Facilities for receipt of dirty ballast are limited to Esso and Shell product piers.

Crew Change and Repatriation: Available through Kuala Lumpur airport.

Esso Product Jetty: Berth is constructed of reinforced concrete. The island jetty is 200 ft.×24 ft. with 4 off-lying mooring buoys inshore for mooring purposes. Accommodation for one vessel on outer face only.

Max. LOA 575 ft.; max. draft 34 ft.; max. size 19,500 d.w.t.

Shore connections: 1 crane to handle hose.

1×20 in. black oil/ballasting
1×16 in. white oil line
1×10 in. LPG line
1× 4 in. inert gas line

Report: December 1992.

New SRC Import/Export Facilities: Under development (See Plan).

Berth No. 1:

Max. Draft: 10.50 m.
Displacement: 14,000 tonnes.
LOA: No restriction for the above displacement.
Beam: No restriction for the above displacement.
Grades Handled: Fuel Oil, Kero, Leaded and Unleaded Mogas, Naphtha, Gas Oil.
Cargo Arms: "Kanon" 3×10 in. bolt flange connections.

Berth No. 2:

Max. Draft: 7.50 m.
Displacement: 7,500 tonnes.
LOA: No restriction for the above displacement.
Beam: No restriction for the above displacement.
Grades Handled: Base Lube Oils (Import), Kero, Leaded and Unleaded Mogas, Naphtha, Gas Oil.
Cargo Arms: "Kanon" 2×10 in. and 1×6 in. (lubes) bolt flange connections.

Berth No. 3:

Max. Draft: 10.50 m.
Displacement: 14,000 tonnes.
LOA: No restriction for the above displacement.
Beam: No restriction for the above displacement.
Grades Handled: LPG, Fuel Oil, Kero, Leaded and Unleaded Mogas, Naphtha, Gas Oil.
Cargo Arms: "Kanon" 3×10 in. with bolt flange connections and 1×6 in. for LPG with bolt flange connections and ESD and automatic release.
N.B. No vapour return line for LPG.

Bunkers up to 180 cSt available at each berth.

Bunker gas oil available at each berth.

Fresh water available ex-barge at anchorage.

Fendering: Cylindrical fenders and rectangular panels are fixed to the Outer Breasting Dolphins.

Type: Bridgestone SUC 145OH. 2 fitted to the Outer Breasting Dolphins of each berth.

Mooring Hooks: Stevens Quick Release Mooring System.

Type: U4 03008D 01.
Hook SWL 30 tons.
Hook Proof Load: 45 tons.
Capstan Load 2 tons.; speed 30 m./min.

Made by N.V. Steditek, Diepenbeek, Belgium.

Gangways: One provided for each berth with craneage.

General: Each berth also equipped with remote controlled fire water monitor and Closed Circuit TV.

On completion of construction, SRC (Marine Department) intend to sound berths to obtain detailed soundings.

No bollards are fitted to the jetty structure. All vessel impact loadings are taken by the Mooring Dolphins, the Outer Breasting Dolphins and the Inner Breasting Dolphins.

Latitudes and Longitudes for the final jetty structure will be submitted shortly.

A study will be undertaken shortly to determine the feasibility of berthing a 30,000 tonne displacement tanker with a fuel oil import cargo.

Additionally 2 transit navigation lights have been placed in a North/South line to indicate the approximate line of the subsea pipeline. Visible range of these lights will be 2 nautical miles. They will be sector lights. The rear light will be 100 m. North of the jetty, and will be white with a 10° visible sector showing to the South. The forward navigation light will be located on the jetty trestle. It will also show a 10° visible sector white light to the South. In addition, it will also show a 5° red and green sector to each side of the white light. By day, the rear navigation light shall have a daymark of a triangle point downward, and the forward navigation light shall have a daymark of a triangle point upwards.

FRESH WATER: Available at Shell and Railway jetties.

FUEL: Bunker fuel oil available. No diesel.

REPAIRS/DRY DOCKS: None.

CUSTOMS ALLOWANCES: Tobacco, cigarettes 25 in number per man per day, or cigars 8 in number per man per day, or tobacco 1 oz. per man per day, or snuff oz. per man per day. Wine and/or spirits, spirit 0.175 qt. per man per day, or wines 1 qt. per man per day, or beer or stout 1 qt. per man per day.

AIRPORT: No airport locally.

HOLIDAYS: Official holidays in the state as follows: New Year's Day, 1 day; Chinese New Year's Day, 2 days; Muslim New Year's Day, 2 days; Wesak's Day, 1 day; His Majesty's Birthday, 1 day; Prophet Mohammed's Birthday, 1 day; His Excellency Governor's Birthday, 1 day; Malaysia Day, 1 day; Deepavali, 1 day; Hari Raya Huji, 2 days; Christmas Day, 1 day. No cargo is worked on any of the above gazetted public holidays – port closed.

DEVELOPMENTS: Proposal to enlarge facilities and to provide deep-water berths.

AUTHORITY: See "Malacca".

AGENT: Pesaka Jardine Shipping Agencies Sdn.Bhd., Lot 47, No. 136/2 Jalan Munshi Abdullah, 75100 Malacca, Malaysia. Tel: 60-6-237850, 237381. Fax: 60-6-248588. (Associated with Jardine Shipping Agencies).

PORT KLANG, Malaya: 03.00 N. 101.24 E. (See Plan)

PORT LIMITS: *Northern Limits:* A line from Beacon B running N.W. towards Pulau Angsa Lighthouse until it intersects Lat. 3° 07′ 24″ N., thence extending due East along this latitude till it meets the mainland; *Southern Limits:* A line from Tanjung Ru running West along Lat.2° 50′ 21″ N. till it intersects Long. 101° 14′ 00″ E., thence extending due North along this longitude till it meets Pulau Pintu Gedong;

There shall be included within the limits all waters in the Klang Straits, Selat Lumut, Sungai Puluh, Sungai Aur, Sungai Langat and other waterways contained within the Lat. 3° 07′ 24″ N. and 2° 50′ 21″ N., and Westwards towards the coast from Long. 101° 28′ 30″ E. (which passes through Connaught Bridge): including all piers, jetties, landing places, wharves, quays, docks and other similar works whether within or without the line of high-water mark and any position on the shore or bank within 45.72 m. of the high-water mark, subject to any rights of private property therein.

APPROACHES: Ships from and to Penang enter and leave the port by the North Klang Straits, and ships from and to Singapore enter and leave by the South Klang Straits. The entrance channel at the North Klang Straits is dredged to 11.3 m. below datum. A very large deep water anchorage for ships is available at the North Klang Straits. Ships can also navigate in and out of Port Klang through a secondary channel at the South Klang Straits. At all times the channel is dredged to 10.8 m. below datum.

DOCUMENTS: *(a) For Agent.* Vessels required to fill in arrival report which may be obtained from Agent at Singapore or Penang or Boarding Agent on arrival. This should be completed and handed to Boarding Agent together with last Port Clearance and one copy each of Crew List and Passenger Lists for submission to Marine Department.

Vessels should have ready and hand to Boarding Agent on arrival the following:

Arrival Report.
Last Port Clearance.
Two copies of Crew List.
Two copies each of Disembarking and Transit Passenger Lists (if any).
List of Explosives, dangerous cargo on board.

Following documents should also be handed to Boarding Agent on arrival and will be returned to vessel after perusal by Marine Department:

Malaysian Light Dues Receipt (if any).
Ship's Register.
Radio Safety Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Derat Certificate.

Port Health Officer now requires all vessels arriving from foreign ports to submit an "Entry Declaration" on form Health 43, on the International "Maritime Declaration of Health" form or on a similar copy, and this should be handed to Boarding Agent, together with copy of Crew List, in cases where vessels are not in Quarantine, in which case doctor does not attend on board.

Note: Endorsement of Port Clearance must be obtained from Port Office at Marine Office before a fresh Port Clearance can be issued by local Customs Authorities and handed to vessel before sailing.

(b) Immigration
2 copies Crew List.
2 copies Passenger List (Disembarking and Transit).
(c) Customs
2 copies Customs List (CD.15).
1 Crew List.
1 Passenger List.

FLAGS: The Malaysian flag. Flag "Q" meaning Health Clearance required. *Flag 2/5 meaning no passengers on board, or *flag 3/4 meaning passengers on board. Pennant Zero is not required since Boarding Officers do not board the ship on arrival. Flag "H" meaning Pilot on board. (*Applies only to vessels arriving from foreign ports, which includes Singapore.)

Note: Except for vessels under way, no vessel in port may use its siren except in case of an emergency when no other means of communication is available. The Authorities strictly enforce this rule and vessels infringing it become liable to heavy fine.

Shipmaster's Report: June 1983 (Updated 1994): Flags 2/5 must be flown by day, or red light over white light (all round visibility), shown by night until Immigration clearance has been obtained, otherwise the ship is liable to be fined.

PILOTAGE: Available 24 hours a day. Pilotage compulsory.

(a) Application: Piloting carried out by Klang Port Management. Masters to cable "Pilots Port Klang" giving ETA and point of arrival, i.e. Pintu Gedong or Pulau Angsa and draft at least 4 hours before arrival, as Pilots will not leave shore until confirmation received from vessel or Agent. Both North and South Channels are well marked and Pilots consider it quite safe to arrive and depart at any hour.

Vessels approaching this port normally apply through Agent, giving ETA Pintu Gedong or Pulau Angsa, together with draft and port of departure.

(b) VHF: If vessels wish to communicate direct all pilot boats are fitted with VHF for use between pilot office, pilot boats, pilot boat to pilot boat and where necessary to vessels arriving at this port. Operated on Channel 12 of International Maritime VHF radio telephone bands, and of a range of 20–25 miles.

(c) Recognition: Pilot boats painted blue and have white superstructure.

(d) Boarding. Unless advised otherwise Pilots will be ordered to board vessels at Pulau Angsa (North Channel), or Pintu Gedong, East of Fairway Buoy (South Channel).

Pilot ladders should be of approved Standard pattern internationally used. (e) Waiting for Pilot: Location for a vessel awaiting Pilot is at Pintu Gedong, 8 cables South of Temsan Buoy, at Pulau Angsa 1 mile East of Pulau Angsa Island, and at Deep Water Point where anchorage is available according to number of vessels already anchored.

ANCHORAGES: Per latest Admiralty charts. Vessels may load timber and LASH barges from privately owned junks at Deep Water Point Anchorage. In exceptional cases and with permission of Port Authority it is also possible to work with Authority Lighters at Deep Water Point.

Special Anchorages: The Port Authority provides an explosives anchorage and a LASH anchorage situated North of Tanjong Bakau in the North Klang Straits. The quarantine anchorage is located North-West of the North Port wharves.

RESTRICTIONS: (See "Max. Size"). At Pintu Gedong, the Southern Channel Pilot Station, there is a restriction which vessels will be advised of when giving their ETA.

MAX. SIZE: Maximum length of vessels using South Port is: Dry cargo vessels, 192 m. LOA and draft of 10.5 m.; tankers, up to 178 m. LOA and draft 10.5 m. Tidal conditions govern movements of all tankers over 90 m. LOA in the South Port but not at the North Port. At the North extension wharves container ships of 300 m. can be berthed.

HEALTH: Port Health Officer will board vessels arriving from infected ports, or carrying deck passengers at Deep Water Point at any time of day. All vessels should include in arrival cables confirmation that all well on board and also that all health papers in order. It should be understood that the health papers referred to include Derat, or Derat Exemption Certificate. Also it is necessary to furnish information on the last 5 ports called within 14 days and the expiry date of Derat Certificate.

RADIO: ETA cables normally routed via Singapore or Penang as no radio station in Port Klang. Such messages when received are transmitted by telephone to Agents/and or Pilots at Port Klang.

TUGS: Supplied by Klang Port Management and normally "stand-by" vessels berthing at wharves as and when required. Tugs towing use ship's lines, tugs pushing use their own lines. 8 tugs available (800 h.p. – 3,200 h.p.) to assist in berthing and unberthing and are equipped with fire-fighting appliances and radio communications system. When vessels berth or unberth at wharf tugs ordered by Agent in consultation with Pilots and once in attendance are charged for whether used or not. Tugs are also used to swing vessels in stream which are stemming ebb tide on departure.

VHF: (See "Pilotage"). Ship to shore telephones available at all berths at North Klang Straits, and VHF sets available for ships in moorings. Klang Exchange keeps a 24-hour watch on Channel 16 and will connect the vessel to any telephone receiver ashore (Channels 24, 26 and 27). For local calls the cost is RM 1.92 for three minutes (approx.).

BERTHING: There are 2 ports viz: the South Port and the North Port. Vessels berthing in the South Port are governed by tidal conditions which vary considerably. Vessels over 160 m. LOA are usually berthed port side to on the ebb and then only when tides are favourable. Night berthing at South Port commenced in July 1992, but a Letter of Indemnity is required from shipping agent before vessels are allowed to berth at night.

(a) South Port: 4 ocean wharves of 677 m. in length out of which 3 wharves are with 10.0 m. of water alongside, and 1 wharf with 9.5 m. of water alongside. 4 coastal shipping wharves of 402 m. length. Of these, 1 wharf with 6.0 m. of water alongside and 3 wharves with 5.5 m. of water alongside. Vessels of not more than 90 m. in length and with drafts of up to 4.0 m. can be accommodated at the North shore anchorage.

Berth Nos. 1 – 4 are for ocean-going vessels while Berth Nos. 5, 6, 7 and 7A are used principally by coastal vessels with a maximum size of about 6,000 deadweight tonnes. The wharf apron is 15.2 m. (50 ft.) wide and carries 3 rail tracks.

(b) North Port Wharves: There are 18 ocean wharves with a total length of 3,939 m. Of these, 6 are container berths with 13.2 m. of water alongside, 1 Ro/Ro berth with a depth of 11.0 m., 4 general cargo berths with 9.0 m. of water alongside, 7 general cargo berths with 11.5 m. of water alongside, 2 dry bulk berths with 11.0 m. of water alongside for bulk carriers of 36,000 d.w.t., and 2 dolphins for tankers up to 60,000 displacement tonnes.

There are 11 container cranes on the container wharves.

Depth of water alongside is 13.2 m. 68 acres of stacking area, capacity 10,800 TEU's (excluding 182 reefer points). Freight station measures 600 ft.×120 ft.

Container Handling Equipment: 5 container cranes of 35 tons capacity each.
52 straddle carriers of 30 to 35 tons capacity.
69 tractors and prime movers.
40 × 20 ft. and 44 × 40 ft. trailers.
27 trailers, capacity 50 tonnes.
5 Samsung rubber-tyred gantries.
61 forklifts with capacity 3 tons – 15 tons.

(d) Berth No. 8, is for Ro/Ro as well as container traffic. The Ro/Ro ramp at the Southern end of the berth is 45 m. (147 ft.) long and 8 m. (27 ft.) wide. The maximum gradient is 1:10 at tides between +0.3 m. (1 ft.) and +5 m. (17 ft.). There are 3 forklifts of 22.5 tonnes capacity specially for Ro/Ro operations, as well as 3 tractors and 3 trailers. The berth can cope with ships of up to 40,000 tonnes and is capable of accommodating vessels with 20 m.to 32 m. beams and 1.0 m. to 4.5 m. freeboards.

DENSITY: Varies considerably with state of tide and heavy monsoon rains.

BULK HANDLING FACILITIES:

South Port: The South Port caters mostly to coastal traffic between Peninsular Malaya and Sabah and Sarawak, as well as the major portion of Port Klang's bulk liquid cargo.

North Port: Located in the North Port are the Container Terminal, Breakbulk Terminal, Dry Bulk Terminal and the Liquid Bulk Terminal.

Container Terminal: This is a privatised terminal, managed and operated by the Klang Container Terminal. The second container terminal is operated by Klang Port Management (KPM).

Breakbulk Terminal: Berthing facilities (11 berths totalling 2,209 m.).

Liquid Bulk Terminal: Facilities at the terminal include a tank farm for edible oils and two fuel depots.

Storage Capacity:
Fimaly Bulking Services:
  20 edible oil storage tanks.
  37,000 cu.m., on a common user basis.
  13 tanks for chemicals, 9,900 cu.m.
Petronas (National Oil Corporation):
  3 tanks for aircraft fuel, 8,500 tonnes.
  8 tanks for petrol, fuel oil and diesel, 17,900 tonnes.
BP Malaysia:
  11 tanks for petroleum and related products, 35,879 tonnes.
  1 tank for styrene monomer, 700 tonnes.

Dry Bulk Terminal: This terminal is operated and maintained by a private company appointed by the Port Authority. The terminal is a free trade area to enable shippers to import, consolidate and re-export cargo at low cost.

There are 2 berths of length 426 m. with 11.0 m. of water alongside.

Facilities include:
  2 grab cranes, maximum lifting capacity 12 tonnes. The cranes have interchangeable grabs, one of 10.3 cu.m. and the other 6.9 cu.m. capacity; conveyor belt, 1,200 mm. wide and can convey between 800 – 1,200 tonnes of material per hour.
  3 warehouses, 45,000 sq.m.
  Maximum vessel's size, 45,000 tonnes displacement.

STEVEDORES: Working hours throughout the port: 1st shift 0000 to 0800 hrs. (meal break 0300 – 0400 hrs.). 2nd shift 0800 to 1600 hrs. (meal break 1200 – 1300 hrs.). 3rd shift 1600 to 2400 hrs. (meal break 1900 – 2000 hrs.).

MEDICAL: A number of private doctors in Port Klang and it is often not necessary to give any advance notice of medical attention being required. In event of vessel requiring urgent medical attention on arrival, advisable for Master to cable Agent in advance. First class medical facilities available in Klang. As vessels arriving at Port Klang normally do so after calling at Penang or Singapore no inoculation, vaccination or fever certificates are required unless either Singapore or Penang is declared an infected port.

TANKERS: Tankers always berth port side to on ebb and near slack water. Vessels with bulk liquid cargoes to load or discharge will berth at Wharves 1, 2, or 3. When a number of pumping vessels in port, vessels will usually occupy these wharves only for the time it takes to complete pumping and may then have to shift to stream or another wharf. Three of the ocean wharves are provided with facilities for handling liquid cargo. Liquid cargoes now being handled are: latex, palm, coconut oil, petroleum products, alkane, tallow and fuel oil.

Shell Company has a private jetty on which vessels up to 90 m. in length with drafts not exceeding 6.0 m. can be berthed.

Also see "Bulk Handling Facilities".

FRESH WATER: 3 waterboats of total capacity 750 tons, available to supply vessels in South Port and at Deep Water Point with fresh water. As much notice as possible should be given if waterboat required. At North Port (North Klang Straits) water available from wharf. Pumping rate about 20 – 25 t.p.h.

FUEL: Bunkers are available.

FIRE PRECAUTIONS: In respect of tankers loading or discharging inflammable cargo, necessary to have wharf cordoned off and "No Smoking" signs exhibited prominently. Port Fire Brigade required to be on stand-by at wharf whilst operation in progress. Vessel may not disable engines whilst alongside wharf and shall have axes ready in event has to leave wharf urgently and necessary to cut ship's lines. Port Fire Service on duty 24 hours a day throughout year. Service is capable of fighting all types of fire whether on land or on sea. Fire service has following equipment: 3 fire engines, 1 Land Rover fire engine, 2 trailer pumps, 3 fire fighting tugs, 1 elevated tank in South Port (capacity 200,000 gallons), 2 elevated tanks in North Port (capacity 200,000 gallons), 3 vans at the fire brigade station, 4 ambulances, fresh water hydrants at various points in the Ports.

CONSULS: Consulates/Embassies/High Commissions in Kuala Lumpur (28 miles from Port Klang).

Australian High Commissioner's Office.

REPAIRS/DRY DOCKS: There are no major ship repair facilities at the port. Klang Port Management operates 3 slipways for its own crafts.

Slipway No. 1 can accommodate vessels up to 27.4 m. long with a 3.10 m. draft and a displacement of 150 tonnes.

Slipway No. 2 designed for flat bottomed vessels, can cater only for craft up to 23.1 m. length, 2.1 m. draft and with a displacement of 100 tonnes.

Slipway No. 3 can accommodate vessels up to 45.7 m. in length, 4.4 m. draft and with a displacement of 450 tonnes.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS/IMMIGRATION: Customs Officer will board vessel soon after arrival to seal the "Bonded stores". For vessels staying in port some time it is usual to issue 3 days supply – a further issue may be made on request after 3 days.

Immigration Officer will clear vessels arriving from foreign ports on a 24 hour basis. No one may board or leave or approach within one cable length of such vessel without special permission until vessel has been cleared by Immigration Officer and Immigration Signal is hauled down. No Immigration formalities required for vessels arriving from or leaving for other West Malaysian ports (Malacca and Penang).

REPATRIATION: Crew changes and repatriation must be arranged by Agent. Harbour Master attends signing-on and signing-off of the crews on ship's articles.

AIRPORT: Subang International Airport approximately 20 miles from port on main trunk route to Malaysian capital of Kuala Lumpur and served by regular domestic flights and international flights.

HOLIDAYS: Port works 365 days a year.

TELEPHONES: At North Port (North Klang Straits) Wharves telephones installed on board if required. At wharves in South Port there is always a telephone within easy reach at Wharf Office.

VHF radio sets available to vessels at anchor.

IDENTIFICATION CARDS: Advisable that members of crew carry identification cards when leaving ship.

GENERAL: *(a)* Ship-Shore Communication. When vessels are berthed in stream or at Deep Water Point a 24 hour launch service can be supplied. Arranged by Agent in consultation with Master to suit requirements of ship.

Vessels permitted use own boats with proper navigation lights at night.

(b) Seamen's Club. "Mariner's Club" for officers and seamen outside No. 3 Gate of South Port. Club has swimming pool, bar, restaurant and accommodation.

(c) Diving. Diving services available for salvaging lost cargoes, examining underside of ships, etc. Divers capable of deep-sea diving down to 36 m.

DEVELOPMENTS: North Port: *Free Commercial Area:* In line with its role as trade facilitator, KPA has already set in motion plans to create a conducive environment, in which port users can carry out their business with minimal red tape.

The whole of the North Port is a Free Commercial Zone (FCZ) to reduce Customs formalities to a minimum, so as to encourage transhipment trade and to develop the port into a regional distribution centre.

A FCZ authority is being established.

Distribution Park: A distribution park (Distripark) is available within the FCZ. This is jointly developed by KPA and a private company.

Forty hectares have been earmarked for the initial development of the Distripark. Facilities being considered include coldrooms and a multi-storey warehouse.

The Distripark will offer a wide range of services, including cargo consolidation, grading, packaging, trading and other value-added activities.

West Port: A third port called West Port, will be built on Pulau Indah, an island off South Port. The new port will be the focus of development for Port Klang well into the 21st Century.

Construction of the facilities will be undertaken in three phases.

Phase I: (Construction to begin in 1992 and completed in 1994).
3 general cargo/container berths.
2 liquid bulk berths.
Phase II:
4 general cargo/container berths.
2 dry bulk berths.
1 LPG berth.
Phase III:
7 container berths.
1 dry bulk berth.
1 liquid bulk berth.
9 general cargo/container berths.

All the berths are 200 m. in length and can accommodate vessels of up to 80,000 displacement tonnes.

Construction works on a bridge linking the mainland to Pulau Lumut, and a two-lane carriageway is now completed.

Situated almost next door to the industrial and commercial heartland of Malaysia, and with a promising cargo generation from the proposed development of a huge industrial park on the island, West Port is poised to be a new growth centre of the country.

SHIPMASTER'S REPORT: May 1986.

The following advices were received from our Agents in Port Klang.

Water Supply to Ships: Owing to lack of facilities presently in the port, the Port Authority is unable to supply fresh water to vessels promptly.

Compulsory Pilotage in Port Klang: We would advise you that pilotage is compulsory throughout the pilotage district of Port Klang.

In order to ensure that the Pilot boards your vessel immediately on your arrival at the Pulau Angsa/Pintu Gedong Pilot Station (North/South Entrance Pilot Station), please cable us and "Pilot Portklang" advising your ETA, deepest draft and vessel's Readiness to Load (if berth required for that purpose) as soon as possible.

Panamanian Vessels: We would advise you that quite a number of Panamanian vessels have experienced extreme difficulties in obtaining Sailing Clearances from the Harbour Master, Port Klang, owing to expiry of Crew Rolls and/or absence of Panama Consul's endorsements on signed on/signed off entries in the Crew Rolls.

To avoid encountering this problem at Port Klang, please ensure that your Crew Roll is valid and in order.

For your information, there is no Panama Consulate in Kuala Lumpur. The nearest one in this region is in Singapore where you can have your Crew Roll validated, if necessary.

SHIPMASTER'S REPORT: December 1991.

Charts: B.A. Charts No. 3453, 2152 and 2153.

Documents:
8 copies Crew List.
2 copies Stores List.
2 copies Crew Personal Effects List.

1 copy Ports of Call List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.

Officials: Immigration boarded on arrival and Customs authorities boarded 5 hours later. The health authorities never visited the vessel.

All ships statutory documents are taken to Harbour Master's office.

Pilotage: South Boarding Station: Pilot boards in the channel near Tengah Buoy and departs off Makong Point.

North Boarding Station: Pilot boards deep-draft vessels off Angsa Lighthouse and other vessels ay Buoy No. 4. Pilot departs off Buoy No. 6.

The pilot boat for the North Port has an orange hull and pilotage to the North Port from the North or South entrances takes about 1 hour. Pilots require 3 hours notice of arrival.

Berthing is carried out throughout 24 hours at the North and South Ports but vessels may be delayed at the South Port if vessel's length over 100 m.

Pilots available throughout 24 hours on VHF Channel 12.

Approaches: When approaching from the South, the leading marks on Makong Point are conspicuous. The channel is 400 m. wide and vessels up to 10.0 m. draft plus tide may use this entrance. There are strong cross currents in the channel.

When approaching from the North, Pulau Angsa Island has a conspicuous lighthouse. Vessels with a draft of 12.0 m. plus tide may use this entrance when proceeding to the North Port. The maximum draft for proceeding to the Power Station Jetty is 13.0 m.

Anchorages: The Southern anchorage is outside the South Fairway Buoy. The Northern anchorage is North of Batu Penyu Beacon.

The North Port anchorage is as indicated on B.A. Chart No. 2152.

Deep Water Point Reserve Anchorage and Deep Water Point South Anchorage accept vessels up to a maximum of 113 m. LOA and 6.5 m. draft. The Deep Water Point Northern Anchorage accepts vessels up to 200 m. LOA and 10.0 m. draft maximum.

All anchorages experience strong currents.

There is a boat service from the inner anchorages to the South Port.

Tugs: The port authority operate 8 tugs (4×2,000 h.p. and 4×1,000 h.p.). Vessels usually use 2 tugs, except at the Power Station Jetty when large bulk carriers use all the tugs. Ship's lines used.

Berthing: There is 24 hour berthing at both ports. At the North Port vessels berth either side alongside, depending on the tide. At the South Port vessels swing off the town and normally berth starboard side alongside, head out.

All berths are well fendered. The tidal range is 3.0 m. The density of the water on a rising tide at Berth No. 22 was 1020.

Vegetable oil and latex are loaded in the North Port at Berths No. 22 and 23. Fuel oil is discharged at Berth No. 23.

Vegetable oils and latex are loaded in the South Port at Berth No. 2.

Berth No. 22 of the North Port has loading platforms of 35 m. in length with breasting dolphins North and South. The depth alongside at low water was found to be 12.0 m. The vessel lies against the dolphins with the loading face set back about 1.5 m. from the fender line. The dolphins and platform are connected by catwalks. Ship's brow gangway used onto the loading platform. A mooring boat was used to send moorings (3 headlines, 1 forward spring, 1 aft spring and 3 sternlines).

Berths in the South Port are generally for break-bulk cargoes and liquids and berths in the North Port are mainly for container and bulk traffic. The pilot reported that the container berths in the North Port (Berths No. 8, 9 and 10) have a depth of 12.0 m. at L.W.

The Power Station Jetty (Lat. 03° 06.5′ N., Long. 101° 18.7′ E.) handles bulk carriers of 240 m. LOA and 13.0 m. draft. Berthing takes place at slack water and vessels berth starboard side alongside.

Cargo: Vessels load latex at Berths No. 22 and 23 of the North Port. A maximum of 2 hoses were used straight into the tank hatches through flow control valves. The average rate per line was 70 t.p.h., which included short stops to clear the lines of blockages.

Shore personnel tend the hoses. Hoses and flow control valves are rigged quickly by the shore personnel. The whole operation is very efficient. On completion of latex loading it takes about 2 hours before shore tank figures are issued, this is due to tank settling, and figures are only approximate. Vegetable oils are also loaded at Berths No. 22 and 23. Loading is through flexible pipes from the shore manifolds.

On completion of loading latex at the North Port we proceeded to Berth No. 2 of the South Port and loaded palm oil at a rate of 240 t.p.h. through a 5 in. line.

There is a tanker lightening area off Angsa Bank light beacon (Lat. 03° 21.5′ N., Long. 101° 00′ E.).

Fresh Water: Fresh water available at all berths from a shore hose and rate was good (no meter).

Holidays: All public holidays (mainly religious) now being observed in the port will cease in 1992 when the port will operate 365 days.

Developments: There is a bridge under construction from Beacon No. 15 (Lat. 02° 59.25′ N., Long. 101° 23.85′ E.) to Pulau Lumut Island (Lat. 02° 59.35′ N., Long. 101° 24.45′ E.) which will serve the new tanker jetty at Seconda Point and the container terminal (Lat. 03° 57′ N., Long. 101° 18.3′ E.).

AUTHORITY: Klang Port Authority, Jalan Pelabuhan Utaru, Mail Bag Service 202, 42005 Port Klang, Malaysia. *Tel:* 3688211 (20 lines). *Telex:* MA 39524. *FAX:* 03-3670211. *Contact:* M.Rajasingam, General Manager/Chief Executive.

ROMPIN (Kuala Rompin) inc. Pahang, Malaya: 02.43 N. 103.30 E.

DOCUMENTS:

Register.
Last Port Clearance.
7 copies Crew List and 4 for Agent.
5 copies Passenger List (if any).
5 copies Stowaway List (if any).
2 copies Stores List (including firearms and ammunition).
2 copies Dutiable Liquor and Tobacco List.
2 copies Crews Declaration List (cameras, radios, etc.).
1 copy Vaccination List.

Masters of vessels to fly the necessary following flags on arrival as required under Section 448 of the Merchant Shipping Ordinance and Sub-Section (9) of the Federation Port Rules, 1953.

(1) The Federation of Malaysia Flag.
(2) The Pennant "O" Flag (Request Port Officer).
(3) The "Q" Flag (request Port Health Officer).
(4) The Pennant "2"; "5" Flags if no passengers and "3"; "4" Flags if there are passengers on board (Immigration).

PILOTAGE: Compulsory to the loading berths. Extra charge for pilotage outside normal office hours and holidays.

LOADING. *(a)* Ladders. Masters particularly advised to see that a sound and adequate ladder provided at each lighter to allow labourers engaged in loading to pass to and from ship with no undue risk. Regulations are provided in the Merchant Shipping Ordinance, Section 445, Sub-Section (O) which takes care of this requirement and failure to take adequate precaution in seeing regulation is observed may result in serious consequence to those responsible.

Masters requested to ensure that in addition to ladders for labourers, an extra ladder, preferably a clean pilot ladder, be made available at all times for the Agent for boarding. This ladder should be made fast on lee side, just forward of any scuppers in vicinity, and a heaving line from ship's rail made fast to bottom rung. When ladder not in use, bottom of ladder can be pulled up a few feet with heaving line to prevent labourers from using it or damage from lighters.

(b) Winches. All winches must be in single gear at all times.

(c) Derricks. Practice to work 2 sets of derricks to 1 lighter where practicable.

(d) Trimming. No manual trimming undertaken.

(e) Damages. In the event of your vessel sustaining damage by stevedores during loading, you are requested to inform the clerk and foreman on board immediately and as soon as practicable confirm same in writing to the Eastern Stevedoring Co. Ltd., Kuala Rompin, with copies to Hong Kong & Eastern Shipping Co. Ltd., Hong Kong, and Malay States Shipping Ltd., Kuala Rompin. It is important that full details of damage are given, together with measurements whenever possible.

Minor damage has occurred on vessels due to hatch beams not being bolted or lashed. Masters therefore requested ensure all beams adjoining working parts of hatches either bolted or lashed, otherwise stevedores will repudiate liability for any damage incurred.

ANCHORAGE: On arrival, vessels required to anchor about 1 mile outside berthed ships to obtain pratique. An accommodation ladder must be rigged on lee side to allow Port Authorities to board.

READINESS: Notice of Readiness cannot be accepted until vessel is in Free Pratique, Customs Inward Examination completed, and in all respects ready to load.

OPENING/CLOSING HATCHES: Removal and replacement of hatch beams and covers must be done by ship's crew. Ship's Officers should see that any tween-deck beam removed is replaced before ore reaches that height.

CUSTOMS: Customs office hours 0830 to 1630 Monday to Friday, 0830 to 1300 hrs. Saturday.

HOLIDAYS: New Year's Day; Hari Raya Puasa, 2nd day; Chinese New Year, 2nd day; Hari Raya Haji, 2nd day; First Day of Muharram; Vesak Day; Birthday of Sultan of Pahang; Birthday of H.M. The Yang Di-Pertuan Agong; Birthday of Prophet Muhammad; Malaysia Day; Deepavali; Christmas Day.

Note: Where a holiday falls on a Sunday, the following day will be observed as a holiday, and if such latter day is already a holiday, then the day following shall be a public holiday.

SHORE LEAVE: No seaman may proceed more than 3 miles from Kuala Rompin Customs House. The Officer in Charge Customs, as acting Immigration Officer, has authority to limit or prohibit shore leave in all cases.

IDENTIFICATION CARDS: Every member of crew must produce Identity Document or Shore Leave Pass at Customs House when landing and again when returning to vessel.

GENERAL: *(a) Scrap Iron.* Steel mills in Japan complain from time to time of finding pieces of scrap iron in the iron ore cargoes. If this scrap is not found it will cause serious damage to the plant and occasion considerable delay to production: furthermore, should scrap iron enter the machinery there is always the possibility of it endangering life, and several fatal accidents have been attributed to this cause.

The assistance of officers and crew is requested in reporting any scrap iron they see being loaded, advising shippers into which hold it went and number of the lighter it came from to enable us to take appropriate action.

(b) Whistle, Radio. Wireless Transmitters, Whistles and Sirens etc., must not be used by vessels at anchor off Kuala Rompin.

(c) Stores. Bonded stores can be obtained from Kuala Lumpur and Kuantan at prices roughly same as Singapore. Essential, view Customs formalities, that Masters give Malay States Shipping Ltd., Kuala Rompin 6 days prior notice of requirements.

SABAH (Minor Ports):
KUDAT: 06.53 N. 116.51 E. (See Plan)
LAHAD DATU: 05.02 N. 118.20 E. (See Plan)
SEMPORNA: 04.29 N. 118.37 E. (See Plan)

DOCUMENTS: 8 copies all usual documents, i.e. Crew List, Passenger List, Manifest. Others include Store List, Stowage Plan, Sea Worthiness Certificate and Last Port Clearance Certificate. Where possible, Cargo Manifests and Stowage Plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

PILOTAGE: Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot services required. Pilot boats between 30 ft. – 40 ft. length and equipped with VHF/AM Sets – 80.4 MHz frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within port limit.

ANCHORAGE: All ports within bays and they provide good safe anchorages.

RESTRICTIONS: No restrictions for vessels entering port at night.

MAX. SIZE: There is no limit on cargo vessels worked at anchorage. Also see "Berthing".

HEALTH: To obtain Pratique, arrange with Shipping Agent. Pratique for vessel entering, after calling at another port in same state, is not required. Anchor in quarantine anchorage if vessel is suspect and display following signals: *By Day:* International Code Signal "QQ". *By Night:* A Red light over a White light and a separate hoist of Red light over a Green light. Hoisted vertically 6 ft. apart where best seen.

RADIO: Singapore Radio recommended.

BERTHING: Application for berthing has to be made within 24 hours prior to actual time that berthing is required.

Details and Requirements: Name of vessel, gross and net tonnage, length overall, draft (fore and aft), ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded. No priority for berthing ships and the turn is, first come first served.

Kudat: L-shaped wharf with 2 berths. Western berth – length 112 m., min. depth 6.4 m. Eastern berth – length 91 m., min. depth 6.4 m. Max. size 3,000 d.w.t.

Lahad Datu: Outer Berth: Length 152 m. Depth 9.3 m. Max. size 25,000 d.w.t.

Inner Berth: Length 90 m. Depth 6.4 m. Max. size 2,000 d.w.t.

Also see "Developments".

Semporna: T-shaped wooden wharf with 2 berths. Outer berth, length 46 m. min. depth 7.9 m. Inner berth, length 39 m., min. depth 6.1 m.

The wharf is operated by the State Government.

STEVEDORES: Arrangement of stevedores should be made with 48 hours' notice to Shipping Agent. Average gang performance is 20 ton-per-gang-hour for conventional traffic (excluding vehicles) and 40 ton-per-gang-hour for pre-palletised cargo (excluding vehicles). Cargo work is carried out in 3 × 4-hour periods namely:–

1st Period 0730 hrs. to 1130 hrs.
2nd Period 1300 hrs. to 1700 hrs.
3rd Period 1800 hrs. to 2200 hrs.

MEDICAL: Arranged on arrival by Shipping Agent.

DENSITY: Average density in the ports 1020.

FRESH WATER: Available at General Cargo Wharves at a rate of 20 t.p.h.

CONSULS: Consulates in Kota Kinabalu:

United Kingdom	Japan
Indonesia	Denmark

REPAIRS: Marine Department operates engineering workshops at Labuan and Sandakan. Some private firms and workshops also undertake small engine and deck repairs in Kota Kinabalu.

DRY DOCKS: Marine Department has 3 slipways in Labuan which are capable of shipping vessels of 60 tons, 200 tons and 500 tons displacements. One in Sandakan for vessel up to 120 tons.

GANGWAY/DECK WATCHMEN: Not necessary. Agents may advise option.

OPENING/CLOSING HATCHES: Normally by stevedores.

CERTIFICATES: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits: No control and up to discretion of Officers of Customs and Excise.

CARGO GEAR: Ship's gear used also for containers ex-feeder ships and heavy lifts in major ports.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Most airports in State between 4 km. to 10 km. from the town.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

HOLIDAYS: Cargo work can be arranged if necessary during official holidays, but not for Hari Raya Puasa, Chinese New Year and Christmas Day. Also see "Sandakan".

POLICE/AMBULANCE/FIRE:

	Fire/Police	*Hospital*
Kudat	333	335
Lahad Datu	81999	81522
Semporna	SPA 599	SPA 522

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not needed.

DELAYS: Due to weather conditions only.

DEVELOPMENTS: LAHAD DATU PORT EXPANSION PROJECT: (See "Plan").

Introduction: The port of Lahad Datu is the biggest of the four existing minor ports in Sabah. Due to its demanding role in the port's industry, it is currently entering into a new era and fast becoming a next major port. This is evident based on the ever increasing volume of liquid bulk cargo handled and apparent cargo congestion at the port.

Existing Port Facilities: The existing port facilities are specifically used to cater for the needs of the Lahad Datu district proper and its hinterland. In addition, they also play a back-up role to the two major ports of Tawau and Sandakan in the event of future port congestion in both major ports.

Expansion Projects: These projects for Lahad Datu port's expansion are to be undertaken in two different phases (Phase I and Phase II) as outlined under the second SPA 20 years Masterplan (1995-2015).

Phase I: Phase I of the expansion project will commence in October 1994, and completion is projected in early 1996. A proposed new L-shape jetty is designed under this phase to handle dry cargo and containers. This jetty will eventually have 3 berths to be built which comprise the outer, river and side berths altogether.

Under this phase, the land side work will involve the reclamation of approximately 8 acres of foreshore land, which will be partly upgraded to container yard, a new gate and gatehouse plus some ancillary facilities. This phase will be constructed to cater for SPA needs until the year 2000.

The budget requirement for this Lahad Datu Port Expansion project – Phase I is estimated to be 64 million Ringgit. This amount will among others cover consultancy design, construction work, supervision and land acquisition.

Phase II: The second phase (Phase II) is projected to commence only by the year 2001, and bound for completion by latest the year 2003 A.D. The phase will again depend on a number of factors such as the increase in future traffic growth and other ports requirements.

AUTHORITY: Sabah Ports Authority, Jalan Tun Fuad, Tanjung Lipat, Locked Bag No. 2005, 88617 Kota Kinabalu, Sabah, Malaysia. *Tel:* 088-56155/088-52140. *Telex:* Saport MA80074. *FAX:* 088-223036.

Contact: The General Manager.

Lahad Datu: Sabah Ports Authority, P.O.Box No. 143, 91107 Lahad Datu, Malaysia. *Tel:* 81244, 81610, 81213. *Telex:* MA 83207.

Kudat: Office of the Assistant Traffic Superintendent, Kudat Port Area, P.O.Box 228, 89058 Kudat, Malaysia. *Tel:* 088-61261.

Semporna: See "Tawau".

SANDAKAN, Sabah: 05.48 N. 118.05 E. (See Plan)

FLAGS: Signal letters, Mail flag (if any mail on board for discharge); "Q" flag is essential if Sandakan is the first Sabah port at which a vessel calls. If ship carrying passengers it should fly Immigration Signal Nos. 3 and 4; if no passengers Nos. 2 and 5.

PORT LIMITS: The limits of the port of Sandakan shall be Sandakan Bay bounded by a line drawn in a West-South-West direction from the Northern point of Pulau Berhala to the mainland, and by another from the same point on Pulau Berhala to the most Eastern extremity of Tanjong Aru and thence to the opposite bank at the entrance of Trusan Duyong, including all passages and rivers entering the same for a distance of 600 ft. inland from the mouth of the river.

DOCUMENTS: 5 sets of Inward Manifest in the prescribed form to be airmailed to Agent to arrive at least 48 hours before the vessel.

(a) To be Produced on Arrival:

1 Sabah Lights and Harbour Dues form
2 Manifests in the prescribed form
3 Crew Lists
1 Last Port Clearance
3 Stores Lists
3 Passenger Lists
2 Arms Lists
3 Narcotics Lists
2 Parcels Lists

(b) Required by Agent:

2 sets of Inward Manifests for all inward cargo
5 sets of Transhipment Manifests for all cargo to be transhipped at Sandakan.
2 copies of Hatch List.
1 copy of Passenger List.
1 copy of Crew List.
1 copy of List of Arms and Ammunition.
1 copy Narcotics List.
1 copy Stores List.

(c) To be Supplied to Ship before Departure:

Manifests, as required by vessels.
Master's copy of Bills of Lading.
Port Clearance and Customs Clearance.
Sabah Lights and Harbour Dues form.

(d) Immigration: Immigration Officer will board vessel on arrival and clear her inward. No restrictions on crew and/or passengers going ashore. Immigration require 2 copies of Crew List and 2 copies of Passenger List. Vessels cleared inward until 1800 hrs. only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

(e) Marine Department: Shipping Arrival Report to be signed by Master of Vessel.

PILOTAGE: Pilotage not compulsory but if required the Harbour Master acts as Pilot. Private pilots available by air from Kota Kinabalu. At least 24 hours' notice should be given and position where Pilot is required to embark (i.e. the bar buoy or within harbour limits) should be included in the message.

ANCHORAGES: For loading timber: A black and white conical buoy situated 1.2 miles S.W. from Government Wharf indicates the anchorage. It is important that vessels should anchor as close to this buoy as possible, when anchored further from shore it may take up to an hour longer for launches towing rafts of timber to reach ship and in addition there is less shelter from wind and weather and consequently raftsmen have to cease work earlier.

For discharging: Unless it is intended to come alongside the wharf, vessels discharging should anchor 4 cables due South of wharf. Wharf is 750 ft. long with dolphins placed 100 ft. from each end giving a total length of 950 ft. If discharging into lighters and loading log timber simultaneously vessels should proceed to Timber Anchorage.

RESTRICTIONS: *(a)* Shifting: Vessels may not berth alongside after dark without special permission but they may leave the wharf, having given prior notice.

(b) Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset, except at discretion of Harbour Master. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Harbour Master. Livestock: subject to approval of Veterinary Authority. Certain animals, including cattle, are prohibited imports and exports except under licence.

MAX. SIZE: 20,000 d.w.t. Draft restriction is 24 ft. on the Bar plus the height of tide, mean high water being about 6 ft.

HEALTH: (Also see "Radio" and "Regulations"). If Sandakan is first port of entry into Sabah a vessel must proceed to quarantine anchorage until cleared by Health and Immigration Officials.

The Sabah Government are signatories to the WHO convention on quarantine regulations. If vessel comes from outside State of Sabah then Port Health Authority will require to board in quarantine anchorage before vessel can proceed to wharf or timber anchorage. If, however, vessel is not coming from an infected port Pratique may be granted providing vessel cables Agent prior arrival advising last port of call and whether vessel healthy. Pratique normally cabled to ship but if unreceived, vessel must proceed to quarantine anchorage.

Port Health Authority require completed copy of Maritime Declaration of Health, and copies of Crew, Passenger and Narcotics Lists.

RADIO: Singapore Radio recommended.

(Information required before ship's arrival.) ETA, number of passengers, health situation, Manifest, amount of water required. Vessels not allowed to use their radio in port.

VHF: Marine signal station keeps watch on VHF Channel 16, from 0530 to 2000 hrs.

TUGS: A tug of 636 h.p. stationed at Sandakan.

BERTHING: (Also see "Anchorages").

(a) Mooring: The numbers of a vessel which is berthing alongside will be shown from signal station on Eastern end of Customs House. In addition, a cone indicating tidal stream will be hoisted pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines, a mooring boat will be provided by Marine Department if it is necessary to send lines to dolphins. Old Government Wharf, least depth 19 ft.

(b) Buoys: No mooring buoys.

(c) Lighters: No lighter fleet. The timber companies have their own lighters and scows which can sometimes be hired if not being used by these companies.

Rectangular Island Wharf: The particulars of the berths are as follows:

Berth No.	*Length* (m.)	*Depth* (m.)
1	213	9.45
2	122	6.4 – 9.4
3	76.2	6.1
4	164	7.8 – 9.4

The berths were dredged in 1989.

The berths are constructed to receive containers.

Storage:

2 godowns 12,054 sq.m.
2 open storage areas 5,926 sq.m.
1 container yard 4,182 sq.m.

Equipment:

Container handling:
4 forklifts (6-25 tonnes).
2 tractors (3.5 tonnes).
4 trailers (20 tonnes/20 ft.).

Conventional cargo:
35 forklifts (2 and 3 tonnes).
4 tractors (2 tonnes).
41 trailers (5 tonnes).

CARGO: (a) Tally: Tally clerks supplied by Agent if required. Sawn timber tallied on to scows by timber companies' clerks and tallied into ship by ship's tally clerks. Ship responsible for total number of pieces of timber shown on Mate's receipts. Letters of Credit do not allow the clause: "A quantity said to be" to be inserted on the B/Lading. Log timber tallied into ship by checking against specifications supplied by timber companies.

(b) Inward Cargo: Is tallied out of ship on to wharf or into lighter. Local watchmen can be supplied by Agent if necesary but it is generally found to be more satisfactory if these duties are carried out by crew. Damaged cargo is surveyed on the spot, otherwise no liability of vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-handed Memo certified by Chief Officer is usually accepted as proof.

(c) Heavy Lifts: Usually landed overside on flat-top scows for delivery to private jetties, where they are man-handled to required site. Occasionally consignees provide low-loaders.

(d) Transhipment Cargo: After discharge of cargo from first carrier, transhipment cargo placed under supervision to Ports Authority, unless it is possible to arrange direct transhipment into small coastal vessels.

(e) Outward Cargo: Main export is log timber and is towed out to loading vessels in rafts, each one accompanied by 2 raftsmen. Loading is on a single swinging derrick with gun tackle; the other derrick being used for pulling the logs into position in the holds. Vessels should have, if possible, 2 snatch blocks available at each hatch where log timber is being loaded. Sawn timber loaded in normal manner from scows and lighters. Documents required are shipping order issued by Agent and list of specifications supplied by timber companies. Other exports are rubber, copra, coconuts, palm oil, jungle and sea produce.

(f) Refrigerated cargo: Only small quantities of refrigerated cargo loaded or discharged. No formalities or certificates being required other than compliance with Customs and Agriculture Department Regulations. Inward fridge cargo is confined to foodstuffs, meat, etc., and outward to frozen prawns. 1×65 amp and 3×30 amp reefer points available.

(g) Explosives: Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior to arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

(h) Damaged Cargo: Direct delivery/cargo surveyed at shipside. Cargo discharged into godowns surveyed jointly between Port Authority and ship's representative in damaged cargo lockers.

STEVEDORES: Stevedoring in hands of Port Authority who supply gangs as required.

(a) Working hours, 0730 – 1130, 1300 – 1700 and 1800 – 2200. Gangs ordered at least 12 hours before a vessel arrives.

(b) Overtime. When working in stream, overtime usually from 1100 to 1200 and 1800 to 2200 hrs. Application for permission to work overtime must be made to Customs not later than 1500 hrs. on the afternoon that overtime is to be worked or 1100 hrs. on Saturday for weekend overtime.

(c) Working Sundays and holidays. Work is normally carried out Sundays and it is sometimes possible to arrange for work on some public holidays. Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

See "Holidays".

(d) Rate. Log loading is good, comparing more than favourably with other Borneo ports. Rate of loading about 800 cu. ft. hoppus (20 B/L tons) per gang hour for logs, and 6 B/L tons per gang hour for sawn timber. Discharging general cargo about 20 tons per gang hour. Palletised cargoes about 40 tons per gang hour.

MEDICAL: *(a)* Hospitals: Duchess of Kent Hospital will receive sick seamen or officers. Three classes of wards, also isolation wing. Hospital equipped to carry out normal surgery.

(b) Inoculation: PHO will vaccinate or inoculate crew members at Duchess of Kent Hospital.

(c) Death on Board: PHO and Police to be informed immediately. They will then make an investigation into cause of death. If satisfied that death was due to natural causes, a certificate will be issued, and arrangements may then be made for interning the body. Harbour Master must also be informed in the case of seamen.

TANKERS: Two bulk oil installations at Karimunting (Pavitt Point). Esso, with storage capacity of 2,080 tons and Shell, with storage capacity 15,730 tons.

Shell Jetty extends 550 ft. from shore, is 128 ft. long with mooring dolphins 125 ft. from each end. Min. depth alongside 24 ft.

S.P.A. Oil berth, 1,000 ft. length between dolphins, with central discharging pier (73.2 m.). Least depth alongside 31 ft. This berth also used for loading palm oil in bulk. Max. size 30,000 d.w.t.

FRESH WATER: Can normally be supplied from wharf at rate of 20 t.p.h. Private water boat available on request. Occasionally water is not available and, at such times, Agent warns Principals in advance.

FUEL: Lubricants can be obtained in drums and bulk diesoline available at Shell/Esso jetty. Approval must be obtained first from Customs Department and Ministry of Trade and Industry before loading.

FIRE PRECAUTIONS: No fire-floats and in case of a vessel alongside, fire brigade should be summoned by dialling 999. The OCPD should be informed also.

CONSULS: At Kota Kinabalu.

REPAIRS: Marine Department operates engineering workshops at Sandakan.

DRY DOCKS: One in Sandakan for vessels up to 120 tons.

A Government-owned shipyard/dry dock known as Sabah Building, Repairing and Engineering Sdn. Bhd. exists in Labuan to undertake full repairs services has been established for ocean-going vessels.

WATCHMEN: No regulations regarding use of watchmen, who, however, can be supplied if required. There have been only very isolated reports of pilferage in Sandakan.

OPENING/CLOSING HATCHES: Normally by stevedores.

CERTIFICATES: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.

CARGO GEAR: Ship's gear used, also for containers ex-feeder ships and heavy lifts in major ports.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.

TIME: Local time is 8 hours ahead of GMT. No alterations to clocks.

HOLIDAYS:

Closure of SPA Ports
During Sabah State Public Holidays – 1990:

All ports under the jurisdiction of the Authority shall be closed completely during the following public holidays:–

(a) New Year	Monday	1st January
(b) Chinese New Year	Saturday	27th February
(c) Good Friday	Friday	13th April
(d) Hari Raya Puasa * (2 days)	Thursday & Friday	26th & 27th April
(e) Labour Day	Tuesday	1st May
(f) Harvest Festival	Wednesday	30th May
(g) Hari Raya Haji *	Tuesday	3rd July
(h) Birthday of Sabah Head of State	Sunday	16th September
(i) Christmas Day	Tuesday	25th December

* Subject to alteration.

The ports will however remain open during other public holidays.

POLICE/AMBULANCE/FIRE: Ambulance: Duchess of Kent Hospital, tel. 2111; Police/Fire: Police Station Emergency, tel. 999.
TELEPHONES: Available.
SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.
IDENTIFICATION CARDS: Not required.
DELAYS: Due to weather conditions only.
REGULATIONS: 1. Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing by filling in Form "A" – "Notice of Arrival" to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

9. Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

GENERAL: *(a) Surveyors:* Harrisons & Crosfield (Sabah), Sdn. Bhd. are Lloyd's Agents, neither Bureau Veritas nor the American Bureau of Shipping are represented.

(b) Fumigation: No facilities.

(c) Ship Chandlers: All kinds of stores and provisions can be supplied at reasonable prices.

(d) Call Signals and Call Flags: (i) Continuous watch kept by signal station during day-light hours. In emergency such as serious injury or fire a ship should hoist appropriate International Code signal and blow whistle or siren to attract attention. Apart from these circumstances and for purposes of navigation vessels are prohibited from using sound signals for any other reason.

(ii) Signals for attracting Public Service Launch: By day: International Code Pendant No. 8. By night: Three red lights vertical. Owing distance of anchorage from jetty these signals often indistinguishable by hire launches unless they are cruising in the harbour. Regular launch services can be arranged if required by Master. No restrictions against a vessel using its own launch or motor lifeboat but it must not land anywhere other than at Customs wharf.

(e) Recreation Facilities: Three cinemas in town which show English-language films. Cricket, football, and hockey matches can be arranged with local teams and several tennis courts available. Only suitable swimming beaches at Berhala Island at mouth of harbour. Yacht Club and Golf Club for members only, but several Shipping Companies pay Corporate Membership fee which enables all officers and first-class passengers to use club. Recreation Club offers facilities for large variety of sports and entertainment; visitors must be accompanied by a member. Churches in town for Anglican, Catholic, Seventh Day Adventist and Lutheran worship.

AUTHORITY: Sabah Ports Authority, Pejabat Pengurus Pelabuhan, Peti Surat 1368, 90008 Sandakan, Sabah, East Malaysia. *Tel:* Sandakan (089) 612411-8 (PABX), 612751 (Direct line). *Telex:* MA 82013. *Cables:* Saports. *FAX:* (089) 612975. *Contact:* Francis Lee Fah Hin, Port Manager.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Room 902, 9th. Floor, Wisma Khoo Siak Chiew, Jalan Buli Sim Sim, 90000 Sandakan, Sabah, Malaysia. Tel: (089) 213448/271362. Telex: MA 82887 Jarship. Cable: Jarship Sandakan.

SARAWAK COASTAL PORTS

Coastal anchorages at Sibuti, Niah and Suai, 28, 30 and 47 miles S.W. of Miri respectively are being used increasingly for the export of round logs, good holding ground is to be found approximately 3.5 miles offshore in 30 ft. of water. Caution should be observed in the event of sudden wind squalls from the West.

Vessels destined for coastal ports should report to Miri for Customs and Immigration Clearance.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International code Flag "P") to be hoisted, during day-light hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

AUTHORITY: Kuching Port Authority, P.O.Box 530, 93710 Kuching, Sarawak. *Tel:* (082) 482144. *Telex:* MA 70420-Kuport. *FAX:* (082) 481696. *Cables:* Kuport Kuching. *Contact:* General Manager.

SEJINGKAT (Sungei Sarawak), Sarawak: 01.35 N. 110.26 E.

Anchorage off Kampong Sejingkat approximately 14 miles from mouth of river and 3 miles below Pending Point. (See "Kuching".)

Main timber loading point for the First Division of Sarawak. Loading used to be seasonal due to log rafts having to be towed from felling areas along coast. Since this is not possible during North-east monsoon season shippers now stockpile during favourable weather and loading continues throughout monsoon period.

Vessels up to 580 ft. length and 25 ft. draft regularly use anchorage. No facilities for obtaining fuel. Fresh water obtainable through Marine Department.

Pilots may be picked up off Tanjong Po in the area marked "Pilots" on Admiralty Chart 1822 or at Sejingkat. In rough weather it may be necessary for a ship to follow or meet the pilot launch at the junction of Embang and Senari leads. Pilots for the Batang Lupar, Triso or Lingga Anchorages are also normally embarked off Tanjong Po by arrangement.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The port clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

AUTHORITY: Kuching Port Authority, P.O. Box 530, 93710 Kuching, Sarawak, Malaysia. *Tel:* 082-482144. *Telex:* MA 70420-Kuport. *FAX:* 082-481696, 334776 *Cables:* Kuport Kuching. *Contact:* General Manager.

SIBU, Sarawak (incl. Bintangor, Sarikei and Sungai Merah): 02.24 N. 111.56 E. (See Plan)

Sibu is the second largest town in Sarawak. There are 2 navigable routes *(a)* via Paloh River and *(b)* via Rajang River and a third entrance from the North i.e. via Igan River, is uncharted. Sibu is 61 miles from the sea via Paloh, and 70 miles via Rajang.

APPROACHES:

(a) Paloh Channel: The bar was resurveyed in 1975 and shoaling was reported in 1981 to depths of 2.7 m. below chart datum at the middle of the Fairway and Inner Buoys. Masters of ships are advised to consult their tide tables before entering. The buoys are fitted with radar reflectors and the Fairway Buoy is visible for a distance of 10 miles. A conspicuous wreck in position Lat. 2° 28′ N., Long. 111° 14.6′ E. has 2 posts above chart datum, serves as a good approach to the Kuala Paloh entrance, and Tanjong Sedi which is on the North bank of the river is marked by a light beacon.

Vessels using this entrance are restricted to a maximum length of 152 m. and drafts of 6.0 m. during the S.W. Monsoon and reduce to 5.0 m. during the N.E. Monsoon period from November to March. During the N.E. Monsoon periods, vessels of 5.5 m. have entered the Paloh Channel but entrance depends on the state of the sea.

When crossing the Kuala Paloh Channel, strong currents and swell (especially during the N.E. Monsoon period) are liable to be encountered thus necessitating caution.

An Inner Bar with at least depth of 3.7 m. exists where the Paloh joins the Seredang at Tanjong Gelang. This crossing is marked by unlit transits and is sheltered.

(b) Rajang Entrances: Vessels intending to use the Rajang River to Sibu are restricted to 61 m. in length and 7.0 m. in draft as after Tanjung Manis deepwater anchorage, the river is winding, narrow and shallow. The depth of the bar is 5.8 m. below chart datum. 2 wrecks in position Lat. 2° 07.6′ N., Long. 111° 7.25′ E. and another in position Lat. 2° 8.7′ N., Long. 111° 14.2′ E. are marked by starboard hand buoys. There is a bar situated about 3 miles below Sarikei with at least depth of 3.9 m. below chart datum.

From Sarikei to Bintangor the river is winding with some shallow patches. Lebaan Corner which is 15 miles below Sibu has a charted depth of 2.2 m.

There is an obstruction off Tanjong Ensurai approximately 6.25 miles upriver from Lebaan with a depth of 4.6 m. Caution should also be exercised when rounding Tanjong Binjei due to 3 shoals across the river, one of which has at least depth of 3 m.

Vessels using this route to Sibu are advised to navigate with caution as tugs towing barges and logs of 100 m. or more are often encountered.

DOCUMENTS: Port Clearance to be surrendered to Customs when boarding.

Crew Lists and Passenger Lists, 2 copies for Immigration Department, 2 copies for Rajang Port Authority, 2 copies for Customs, 1 copy for Port Health Officer and 1 copy for Port Officer.
List of ship's stores (2 copies for Customs).
List of ammunition (2 copies for Customs).
Health Documents (Vaccination certificates and Cholera Inoculation Certificates to be examined by Health Inspector).

PILOTAGE: Pilotage is handled by the Marine Department. Although pilotage is not compulsory, large vessels are advised to have a Pilot on board when entering the port. Movements of vessels are restricted to daylight hours only. Ships requiring a Pilot enroute to Sibu must indicate the approach channel they will be using. Ships can contact the Pilot via the "Hague Plan" and communicate with the shore via Channel 18, both on VHF radio.

(a) Kuala Paloh. The Pilots embarked off Tanjong Sedi, at position Lat. 2° 25.5′ N., Long. 111° 18′ E. and application for Pilots should be made giving at least 24 hours notice of arrival to "Shipping" Sibu.

(b) Pilots for Sarikei, Bintangor and Sibu via this river normally embarked in buoyed channel West of Jerijeh Lighthouse but it may be necessary for a ship to follow the pilot speedboat to sheltered waters inside turning buoy. Application for Pilots should be made giving at least 24 hours notice of arrival to "Shipping" Sarikei.

ANCHORAGES: *(a)* Sibu Anchorage. Some foreign-going vessels load, with Customs permission, at the mid-stream anchorage.

(b) Restricted Anchorages.

(i) The Anchorage defined by a line running 045° 2.6 cables from position: Lat. 02° 16.89′ N., Long. 111° 49.28′ E. on Pulau Kerto, thence 135° 8 cables to position; Lat. 02° 16.5′ N., Long. 111° 50.4′ E. thence 225° 1.9 cables to shore on Pulau Kerto. For loading and discharging dangerous goods other than petroleum.

(ii) The berth alongside the Sungai Merah Oil Wharf in position approximately 2 miles downstream from the junction of the Rajang/Igan River on the true right bank. For loading and discharging petroleum.

MAX. SIZE: Largest vessel to berth Sibu was 7,372 gross tons and overall length 137 m.

Deepest drafted vessel to berth Sibu was 7.1 m.

Also see "Approaches".

HEALTH: Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

BERTHING:

(a) Principal wharves at Sibu.

1. Rajang Port Authority Wharf 447.5 m. long with least depth of 8.5 m.
2. Sungai Merah Oil Wharf is a 48.8 m. long concrete wharf with at least depth of 4.6 m.

(b) Sarikei Wharf.

Rajang Port Authority Wharf 145.6 m. long with at least depth of 7.6 m.

(c) Bintangor Wharf.

Rajang Port Authority Wharf 48.5 m. long with at least depth of 4.6 m.

STEVEDORES: The Rajang Port Authority provide all labour necessary for loading and discharging at Sibu, Sarikei and Bintangor.

REPAIRS: Sibu is one of the major shipbuilding and repair ports in Sarawak and there are 8 shipyards with slipways of which one of them can accommodate vessels up to 2,000 gross tons.

GARBAGE DISPOSAL: All domestic disposals from vessels, if deposited and properly packed within the port are collected by the Sibu Municipal Council.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No seaman's clubs are available, but Sibu town centre provides all the usual facilities.

CURRENCY: Malaysian Ringgit (MYR$). U.S.$ 1.00 = MYR$ 2.6845 (11.4.94).

REGULATIONS: The Merchant Shipping (Ports and Rivers) Regulations, 1961:–

8. The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during day-light hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

9. (i) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(ii) The Port Clearance shall be in the form as prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

10. A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

50. No oil, oily bilge water or substance containing oil of any description shall be discharged or allowed to escape from any vessel or allowed to run off any wharf, into any river or port.

GENERAL: Small quantities of diesel oil bunkers available, also provisions and fresh water. Principal exports rubber, pepper, timber and sago.

AUTHORITY: Rajang Port Authority, 96000 Sibu, Sarawak, Malaysia. *Tel:* (084) 319004-9. *Telex:* LPR MA 72121. *FAX:* (084) 318754. *Cables:* Raport Sibu. *Contact:* Hj. Mohidin Hj. Seman, General Manager.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Room 505, 5th. Floor, Grand Merdin Building, 131 Jalan Kampong Nyabor, 96000 Sibu, Sarawak, East Malaysia. Tel: (084) 332673/332668. Telex: MA72194. Fax: (084) 318689. Cables: "Jarship Sibu".

Associated with Jardine Shipping Agencies.

SIPITANG, Sabah: 05.03 N. 115.31 E.

SHIPMASTER'S REPORT: February 1987.

LOCATION: A new jetty called the "SFI Jetty" has been built for vessels up to about 15,000 tons deadweight at Sipitang in Brunei Bay. Approximate position of jetty is Lat. 05° 02.7′ N., Long. 115° 30.65′ E.

DOCUMENTS: Before proceeding to Sipitang we called at Labuan Quarantine Anchorage to meet Authorities (Customs, Quarantine and Immigration Officers) after which vessel proceeded to Sipitang Anchorage. A pilot was not supplied for above manoeuvring.

APPROACHES: The light which should be in position Lat. 05° 03.65′ N., Long. 115° 30.1′ E. was not in position.

ANCHORAGE: When anchoring at Sipitang, vessels should not proceed nearer than 2.5 miles to 3.0 miles off the jetty as there are fishing stakes in the vicinity and 2 obstructions located at Lat. 05° 02.4′ N., Long. 115° 29.35′ E. and Lat. 05° 03.3′ N., Long. 115° 29.4′ E.

RESTRICTIONS: Great care should be taken when crossing Brunei Bay at night as there are many unlit laid-up tankers and small fishing boats in the area.

TUGS: One tug available.

BERTHING: When going alongside the tug makes fast aft. The starboard anchor was dropped to stop the bow and vessel berthed port side alongside.

Vessel Particulars:

Length	172.0 m.	
Breadth	25.9 m.	
G.R.T.	16,703	
Arrival Draft	Forward	28 ft. 00 in.
	Aft	31 ft. 00 in.

Cargo Discharged: Wood Pulp from West Coast U.S.A./Canada.

GENERAL: There are no banks or chandlers at Sipitang.

We obtained fresh fish and vegetables at the local market and rice, flour, sugar, eggs, cooking oil, etc., at a local store called Rocky Liam.

TANJONG MANIS, Sarawak: 02.09 N. 111.21 E.

(See Plan)

APPROACHES: Rajang River entrance has at least depth of 5.8 m. below chart datum. The entrance is well lit by two lighthouses and one light beacon and the bar is marked by two light buoys.

There is a wreck situated at Lat. 2° 7.6′ N., Long. 111° 7.25′ E. which is approximately 8 cables S.E.×E. of the inner Fairway Buoy marked by a starboard hand buoy and about 7 miles further inwards South-West of Kampong Rajang another wreck at Lat. 2° 8.7′ N., Long. 111° 14.12′ E. which is also marked by a starboard hand buoy.

PILOTAGE: Pilots embarked, weather permitting in the buoyed channel West of Jerijeh Lighthouse but occasionally the Pilot will request ships to proceed into sheltered waters as they use 5 m. fibre-glass speedboats, fitted with VHF.

Application for Pilot should be made giving 24 hours notice of arrival to "Shipping Sarikei" and Masters can call "Rajang Pilot" before arrival.

ANCHORAGE: *Tanjong Manis Anchorage:* This is a deepwater anchorage 20 miles from the Fairway Buoy, used by vessels loading timber. The anchorage can accommodate approximately 3 vessels of 183 m. and 12 vessels of 120 m. – 150 m. in length.

Restricted Anchorage: Abeam of Loba Selemit on the North bank of the Rajang river in position Lat. 2° 08′ N., Long. 111° 16′ 35″ E. is restricted to loading and discharging any dangerous goods.

MAX. SIZE: The maximum length of a vessel permitted is 183 m. and max. draft 8.4 m. and max. size 20,000 d.w.t.

AUTHORITY: Rajang Port Authority, 96000 Sibu, Sarawak, Malaysia. *Tel:* (084) 319004-9 (6 lines). *Telex:* LPR MA 72121. *FAX:* (084) 318754. *Cables:* Raport Sibu. *Contact:* Hj Mohidin Hj. Seman, General Manager.

Marine Department, Sibu, Sarawak. *Tel:* 332754/332752. *Cables:* "Shipping" Sibu.

TAWAU, Sabah: 04.14 N. 117.52 E. **(See Plan)**

PORT LIMITS: The Port of Tawau shall comprise the waters of Cowie Bay and Wallace Bay and rivers entering same contained within the following limits:

A line from Lat. 4° 13.3′ N., Long. 118° 00.0′ E. to the National boundary mark on the Eastern shore of Sebatik Island, thence to the National boundary mark on the Western shore of the said island, thence in a 270°(T) direction to the shores at Burs Point, thence in a 311°(T) direction to Lat. 4° 20.0′ N., Long. 117° 25.9′ E. thence in a 070°(T) direction to Lat. 4° 25.0′ N., Long. 117° 40.0′ E., thence in a 120°(T) direction to the point of commencement.

DOCUMENTS:

(a) To be Produced on Arrival:

Customs

2 Manifests in prescribed form.
2 Crew Lists.
1 Last Customs Clearance.
2 Stores Lists.
2 Passenger Lists.
2 Arms Lists.
2 copies Through Cargo Manifest.
2 copies Crew Personal Effects List.
2 copies Parcels List.
2 copies Narcotic & Dangerous Drugs List.
2 copies Customs Clearance (Last Port).
1 copy Ship's Arrival Report.
2 copies General Information or Vessel's Particulars.

Marine

1 Marine Dept. Boarding Report, required to be completed.
1 Last Port Clearance.
1 Crew List.
1 Passenger List.

Agent

4 (2 for SPA) Manifests in the prescribed form.
1 Crew List.
1 Passenger List.

Immigration

2 Crew Lists.
2 Passenger Lists.

Travel Control Office

2 each, Crew Lists and Passenger Lists.

(b) To be Supplied to Ship before Departure:

Manifests, as required by vessel.
1 Port Clearance and 1 Customs Clearance.
3 copies of Passenger List.

(c) To be supplied by ship prior to arrival:

Where possible, cargo manifests and stowage plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

PILOTAGE: Not compulsory. A Pilot is available from 0600 to 1800 hrs. for berthing vessels given reasonable notice (48 hours). Marine Department Tel: 73510.

Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot Services are required. Pilot boats are between 30 ft. – 40 ft. length and equipped with VHF/AM sets – 80.4 Mc/s. frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within Port Limits.

ANCHORAGES: Good anchorage in 8 fathoms 1,000 yd. to 1,300 yd. W.N.W. of wharf; and 350 yd. South there is an anchorage in 8.5 fathoms.

Petroleum Anchorage: An area bounded by parallels of Lat. 04° 15′ N. and Lat. 04° 16′ N. and meridians of Long. 117° 51′ E. and Long. 117° 52′ E. This area is to be marked "Petroleum Anchorage".

Explosives Anchorage: An area bounded by parallels of Lat. 04° 12′ N. and Lat. 04° 13′ N. and meridians of Long. 117° 52′ E. and Long. 117° 53′ E. This area is to be marked "Explosives Anchorage".

Quarantine Anchorage: An area bounded by parallels of Lat. 04° 12.5′ N. and Lat. 04° 13.5′ N. and meridians of Long. 117° 54′ E. and Long. 117° 55′ E. This area is to be marked "Quarantine Anchorage".

RESTRICTIONS: *(a)* Communication ship/shore when lying on Roads: Regular launch services difficult to arrange if required by Master. No recognised signals for summoning a launch, as distance between small boat jetty and anchorage is too great for flag signals to be recognised. No restrictions against a vessel using its own launch or motor life-boat apart from fact that it must not land anywhere other than at Ports Authority Wharf.

(b) Explosives: No vessel carrying explosives shall come within 500 yards of shore or any other vessel except with written permission of Port Manager which will be given provided that:

(i) quantity does not exceed 2,000 lb. of explosives of Class V and VI and are carried in a certified magazine, and there is no other dangerous cargo on board as certified in writing by the Master.
(ii) quantity does not exceed 3,000 lb. and are exclusively of one of the following classes III, IV or VII.

Danger flag must be flown by day and a red light by night.

HEALTH: *(a)* Quarantine: The Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board, unless vessel comes from an infected port. Instead Maritime Declaration of Health is to be filled out and handed to Boarding Officer of Marine Department, who will require one copy of Crew List and one copy of Passenger List. Vessels should cable Agent prior arrival advising last port of call and whether vessel healthy.

(b) Immigration: Immigration officer will board vessel on arrival and clear her inwards. No restrictions on crew and/or passengers going ashore. Immigration will require 2 copies of Crew List and 2 copies of Passenger List. Vessels are cleared inward until 1800 hours only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

RADIO: Singapore Radio recommended.

Application for berthing has to be made 24 hours prior to actual time when berthing is required.

Details and requirements:

Name of vessel, gross and nett tonnage, length overall, draft (fore and aft) ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded, number of gangs required, quantity of fresh water required. Vessels given berth on first come, first served basis.

VHF: A Maritime VHF radio telephone service now operates in the Port of Tawau on Hague Plan Channels 16 and 12.

Continuous listening watch is kept on Channel 16 and the station is operative between the hours of 0600 and 2000 daily.

Vessels are requested to make use of the above facility for notifying ETA, pilotage requirements, etc. Berth availability will be notified on vessel's call.

TUGS: No tugs available.

BERTHING: *(a)* Wharf Light at Tawau in position on N.W. end of Old Wharf, Lat. 04° 14′ 32″ N., Long. 117° 52′ 56″ E.

(b) Tides/Linesmen. The numbers of a vessel which is berthing alongside will be flown from signal station. In addition a cone, indicating tidal stream will be hoisted, pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines; a motor boat can be hired to assist in berthing if prior advice is given.

(c) Old Wharf. Berths No. 1 and 2: Consists of a 220 ft. long approach causeway extending from a reclamation area and a 650 ft. long wharf, 40 ft. wide with a dolphin in line +100 ft. off each end.

New Wharf. Berths No. 3, 4, 5 and 6: Located 400 ft. North West of Old Wharf. 3 berths on the outer side (No. 3, 4 and 5) with a total length 1,000 ft. 1 berth on inner side (No. 6) with a length of 500 ft.

Berth No.	*Depth* (m.)
1	6.09
2	6.09
3	6.5
4	7.5
5	9.14
6	5.0

(d) Monsoon. During strong wind from S.E. and S.W. ships are liable to range alongside wharf, and during S.W. monsoon sea breeze may make it difficult for ships to leave wharf in the afternoon.

(e) Buoys: No mooring buoys in Tawau.

(f) Lighters: No lighters available except a few wooden and steel lighters owned by Bombay Burmah Trading Corpn. Ltd. and Borneo Abaca Limited. Hire of these lighters can be arranged when they are not being used by owners, which is seldom.

CARGO HANDLING FACILITIES: 41 Fork-lift trucks 3-6 tonnes capacity; 19 Towing tractors; 51 Trailers 5-7 tonnes.

Container Facilities: 1×40 tonne super stacker, 1×7.5 tonne Boss forklift truck, 2×40 ft. drawback container trailers, 8×5,000 kg. industrial trailers, 2 forklifts (25 tonne and 19 tonne), 6 trailers (20 tonnes) and 3 towing tractors.

CARGO: *(a)* Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset except at discretion of Port Manager. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Port Manager.

Heavy lifts usually handled at new wharf only. Customs bonded store is available with about 4,000 sq. ft. of space including Customs Liquor and tobacco store. There are no private bonded warehouses to date. There are no facilities for handling or storing bulk cargoes in any quantity.

Livestock: Subject to approval of Veterinary Authority, certain animals including cattle are prohibited imports and exports except under licence.

(b) Damage. Ship's survey should be carried out on all cargo discharged in a damaged condition and Chief Officer should note extent of damage, and sign, certifying same. Cargo coming alongside in a damaged condition should be noted and M/R claused accordingly. Chief Officers are reminded that it is most unwise to load any copra which is rain or salt water damaged.

(c) Tally: Tally clerks can be supplied by Agent if required, on receiving advance notice.

(d) Inward. Inward cargo is tallied out of ship onto wharf or into lighter. Damaged cargo surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side, but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-landed Memo certified by Chief Officer is usually accepted as proof.

(e) Transhipment. After discharge of cargo from first carrier, transhipment cargo is placed under the supervision of the Customs, unless it is possible to arrange direct transhipment into small coastal vessel.

(f) Outward. When vessels berth alongside, packages are brought by motor transport and lighters; when in roads, by lighters.

(g) Refrigerator. Only small quantities of refrigerated cargo loaded or discharged. No formalities or certificates being required other than compliance with normal Customs Regulations. Inward refrigerated cargo is confined to foodstuffs, meat, etc., and outward to frozen fish.

(h) Explosives. Explosives must be discharged into lighters or immediately on arrival onto wharf under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge, or as through cargo.

STEVEDORES: *(a)* Stevedoring in the hands of Sabah Ports Authority who will supply gangs as required.

(b) Working hours 0730 – 1130 hrs., 1300 – 1700 hrs., 1800 – 2200 hrs.

(c) Overtime: Overtime working hours are from 1800 to 2200 hrs. Application must be made to Customs 1 day in advance; double rate charged.

(d) Sundays and holidays: Work normally carried out on Sundays and holidays (See "Sandakan"). Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

(e) Handling Rate: (Net).

Conventional Vessel	:	25 t.p.h./gang
Palletised Vessel	:	50 t.p.h./gang
Container Vessel	:	150 t.p.h./gang

MEDICAL: *(a)* Hospitals. Government General Hospital is only hospital in town, and will receive any sick seamen or officers. 3 classes of wards, but first class ward can only accommodate 2 persons. Hospital is equipped to carry out normal surgery.

(b) Inoculation. Port Health Officer will vaccinate or inoculate Crew members at General hospital.

(c) Port Health Officer. General Hospital, General Office 73533, 72191. Medical Officer-in-Charge 71206. M.O.'s Residence 72239.

TANKERS: Shell Jetty: Least depth 14 ft.

S.P.A. Oil Jetty: Length 76.3 m. Depth alongside 9.75 m. The jetty is about 2.4 km. from the general cargo berths.

DENSITY: 1020 (approx.).

FRESH WATER: Can only be supplied at wharf. 24 hours' notice should be given of a vessel's water requirements. Usual rate of supply is about 15 t.p.h. A water barge is available but no guarantee of availability.

FUEL: Not available except diesoline in drums.

FIRE PRECAUTIONS: No fire floats and in the case of a vessel alongside catching fire, the fire brigade should be summoned by dialling 2999. The OCPD should also be informed.

CONSULS: At Kota Kinabalu.

REPAIRS: No facilities.

GANGWAY/DECK WATCHMEN: Not necessary. Agents may exercise option.

OPENING/CLOSING HATCHES: Normally by Stevedores.

CERTIFICATES: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.

CARGO GEAR: Ships gear used, also for containers ex-feeder ships and heavy lifts in major ports.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

HOLIDAYS: See "Sandakan".

POLICE/AMBULANCE/FIRE: *(a)* Police/Fire, Tel. 089-73111; Ambulance/Hospital, Tel. 089-73533.

(b) Accidents: Hoist a two-flag signal and give a blast of the whistle to call attention of signal station. Police and the hospital should be informed immediately of any untoward incident.

IDENTIFICATION CARDS: Not required.

REGULATIONS: *(a)* Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs Officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals:

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International code Signal "2 5"	Two green lights, 6 ft. apart hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green light over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

TELEPHONES: Available.

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

DELAYS: Due to weather conditions only.

GENERAL: *(a) Surveyors:* Harrisons & Crosfield (Sabah) Ltd., as Lloyd's sub-Agents, may appoint a Surveyor if a survey is requested.

(b) Fumigation: No facilities.

(c) Ship Chandlers: Fresh vegetables obtainable in limited quantities early every morning from vegetable market.

(d) Priority: Vessels are berthed on a "First come first served" basis. Vessels with 75% inward palletised cargo get priority.

(e) Watchmen: These can be supplied if required.

AUTHORITY: Sabah Ports Authority, Peti Surat 335, 91007 Tawau, Sabah, Malaysia. *Tel:* (089) 773700, 772852. *Telex:* MA 83127. *FAX:* (089) 761808. *Contact:* Thomas Soon Min On, Port Manager.

NOTES

CURRENCY: Maldivian Rufiyaa (MLD.RF.). U.S.$ 1.00 = MLD.RF. 11.79 (16.7.94).

GENERAL:

Admiralty Pilot: No. 8.

Chart: No. 3323.

Provisions: Basic foodstuffs available in the local market.

DEVELOPMENTS: Construction of an alongside berth for vessels of upto 6,000 d.w.t. is planned. Completion expected at end of 1995.

NOTICE: Issued by Maldive Customs.

Notice to Ships Calling at the Port of Male

1. All ships are required to submit a Port Clearance, Cargo Manifest, Passenger and Crew List and where available any other relevant documents.
2. Departure time should be notified and a Port Clearance obtained.
3. All visitors, officers and crew and passengers of ships are requested to use the Customs Jetty when arriving or leaving Male.
4. All articles are subject to inspection by the Customs.
5. All ships anchored at Male Harbour should exhibit on board the under mentioned lights between sunset and sunrise.
   (a) White anchor light of all round visibility.
   (b) White stern light with 135° illuminated sector.
   (c) Mast light with all round visibility.

The Law On Prohibited Imports into Maldives

1. *Prohibited Items of Import Except for the Use of the State:*
   (a) Any type of gun powder.
   (b) Weapons of war.
   (c) Opium, ganja, cocaine and any other item which could be used as an intoxicant.

Articles carried by foreign distinguished personnel signifying their ranks, titles or honours and articles carried in connection with such ranks, titles or honours by those who accompany such distinguished guests shall be exception to this Article.

2. *Prohibited Items of Import Without a Permit from the Ministry of Home Affairs Except for the Use of the State:*
   (a) All forms of poisons and sulphuric acid.
   (b) Nitrates.
   (c) Dangerous animals.
3. *Totally Prohibited Items of Imports Into Maldives:*
   (a) Pornographic literature and posters.
4. *Prohibited Items of Import Without a Permit from the Ministry of External Affairs Except for the Use of the State:*
   (a) Alcoholic drinks.
   (b) Dogs.
   (c) Pigs or pork.
   (d) Statues (used for worship).

In addition to items stipulated in this Bill, the Principal Collector of Customs shall withhold such items, the import of which is in his opinion shall be prohibited and bring the matter to the notice of the Department of Finance. The final settlement will be in accordance with the decision of that Department.

SHIPMASTER'S REPORT: May 1982 (Updated 1986).

Approaches: Except in very heavy rain during the S.W. monsoon, the visibility is good and landfall can be made easily. The T.V. Tower, South of Male in position: Lat. 04° 10.2′ N., Long. 73° 30.9′ E. is visible at a distance of 30 miles. The dome of the Islamic Centre in position: Lat. 04° 10.7′ N., Long. 73° 30.85′ E. and the minaret of Grand Mosque (Islamic Centre) in position: Lat. 04° 10.69′ N., Long. 73° 30.83′ E. are also visible for approaching vessels.

Recommended entrance to Male is via East Male Passage. As many small fishing, passenger/pleasure vessels are crossing the passage, approaching vessels should be very careful and proceed at slow speed if necessary. Beacons mentioned below are still non-existent, therefore night approach should be avoided.

As there are a number of fishing vessels and other small vessels anchored at Male anchorage, Masters of vessels anchoring should give special care while approaching the anchorage.

The Northern route via Kaduoigiri Passage as described in the Sailing Directions was taken. Apart from a very strong Westerly set near the reef N.W. of Kaduoigiri Island no particulars were observed.

Beacons in the following positions non-existent:
A. Lat. 04° 11.75′ N., Long. 73° 31.05′ E. (West of Dunidu Island).
B. Lat. 04° 12.37′ N., Long. 73° 30.43′ E.
(Reef between Dunidu & Ferdo).
C. Lat. 04° 13.45′ N., Long. 73° 31.54′ E. (Vehamanafushi).

Mooring Buoy (private) in position: 04° 11.45′ N., 73° 30.97′ E. non-existent.

Navigation Warning: Unmanned/unlighted fishing vessel (approximately 60 tons gross) anchored in position: 04° 11.2′ N., 73° 30.55′ E.

Documents: Papers Required: Security: 1 Crew List (search party, search all cabins for weapons/pornographic material).

Doctor: Port Health Form (Male Issue), Vaccination List (Cholera Vaccinations).

Immigration: 2 Crew Lists (all passports checked).

Customs: Last Port Clearance, 1 Crew List, Cargo Manifests, Store List from Head of Catering. Customs will also check whether the vessel is carrying valid Safety Certificates on board, i.e. Safety Construction Certificate, Safety Equipment Certificate, Loadline and Safety Radio Telephony Certificate. Importing of alcohol without prior permission is prohibited. Whatever is on board may be sealed in the ship's bond. Import of Narcotic Drugs is totally prohibited into the Republic of Maldives. Whatever found on board will be confiscated, penalties levied and the Owner/Master and crew will be prosecuted. Customs also gave the ship a "Notice to Ships Calling at the Port of Male". See "Notice".

Agents: 1 Crew List. All passports taken ashore to be returned upon departure with Customs Clearance.

Cargo Handling: (Chief Officer's Report):

Arrived 20th May, 1982. Sailed 24th May, 1982. Port hours: 94 hours 11 minutes.

Three gangs are available in Male to work on board ships, of which 2 were supplied on 20th, 21st and 22nd May. One gang on 23rd May.

The gangs arrived diligently between 0750 hrs. and 0800 hrs. in the morning and worked till about 2220 hrs. except on the Thursday, when they worked till 1730 hrs. and on the 21st when work was interrupted from 1000 hrs. till 1415 hrs. being a Muslim religious festival.

No forklift trucks are available for work on board ships in Male and cargo stacked on pallets had to be dragged from the sides of the holds under the hook. This was the cause of damaged bags of flour and cartons of provisions.

There are 6 lighters available. Empty lighters were regularly supplied, except after rainy periods, when discharging of lighters alongside the wharf is interrupted.

Shore tally staff seemed to be very dedicated in their duties and were accompanied by a Customs Officer/Clerk.

Nett tonnages per hour:
Hatch No. 1: 12.1 t.p.h. (182 tons discharged).
Hatch No. 2: 12.2 t.p.h. (216 tons discharged).
Hatch No. 6: 16.8 t.p.h. (411 tons discharged).

A boat schedule was arranged upon arrival but a regular boat service was never carried out. The Agency appeared not to be in possession of any documentation (manifests, stowage plans, etc.) of the cargo to be discharged.

Developments: 1986: A new quay to bring lighters alongside, with Customs House and warehouses is under construction at N.W. end of Male, to be completed in 1986. On completion of the project the cargo handling will increase.

AUTHORITY: Maldives Port Authority, Boduthakurufaanu, 20-01 Male, Republic of Maldives. *Tel:* 325240, 3275681, 327102, 327228, 325237, 314881. *Contact:* Mr. Ali Abdullah, Managing Director. Ahmed Mujthaba, Assistant Director. Mr. Mohamed Haneef, Assistant General Manager.

Malta

MARSAXLOKK: 35.49 N. 14.33 E. (See Plan)

SHIPMASTER'S REPORT: October 1991.

DOCUMENTS:
3 copies Crew List.
1 copy Crew Declaration (personal effects).
1 copy Stores List.
The agent will supply the following forms:
1 copy Customs Declaration.
1 copy Malta – Pratique Deposition.
1 copy Fourth Schedule (Regulation 10).

The Cargo Gear Book is inspected by officials.

PILOTAGE: Pilotage is compulsory. Pilot comes from Valletta. The pilot will board close to the breakwater from a small, blue coloured launch. Vessels coming from the N.E. can also take the pilot near the Fairway Buoy at Valletta.

ANCHORAGE: Except during strong S.E'ly or S'ly winds, Marsaxlokk affords a safe anchorage with good holding ground. Anchorage position is about 2 nautical miles S.E. of the entrance. Smaller vessels usually anchor close to the East shore.

APPROACHES: Marsaxlokk is easy to enter. The port is approached between Delimara Point and Benghisa Point. The entrance is 8 cables wide and has a depth of 20 m. – 27 m. in the mid channel (which is not marked).

British Admiralty Chart No. 36 was used.

RADIO/VHF: ETA messages to be sent to agent as soon as possible, at least 24 hours prior to arrival, or 48 hours, if vessel carries dangerous goods.

Signal Station should be contacted on VHF (Channels 16 and 12), 2 hours in advance and again when 5 nautical miles off the breakwater. The calls will be answered by "Valletta Port Control", who normally advise the vessel to wait 2 nautical miles off the breakwater until the pilot gives information by walkie-talkie.

BERTHING:

Quay	*Length* (m.)	*Dredged Depth* (m.)
Terminal 1 – South	200	8.00
Terminal 1 – West	168	9.75
Terminal 1 – North	640	13.75
Terminal 2 – West	460	16.50
Terminal 2 – North	500	17.00
Terminal 2 – East	435	12.75
Oil Terminal	640	17.00

A container terminal with 100,000 sq.m. storage area follows a breakwater of 1,000 m. in length. The breakwater has facilities for bulk carriers up to 80,000 d.w.t.

Freeport Terminal: The main quay has a length of 548 m., dredged to 13.75 m., and is in process of expansion to about 640 m. length.

The Freeport is a customs free area.

Equipment:
1 RMG Peiner (13 across – 1 over 4 high stacking).
2 Paceco Transtainers (6 across – 1 over 3 high stacking).
3 Kalmar 42 ton FLTs.
1 Kalmar 36 ton FLT (Ro/Ro).
2 Kalmar 16 ton FLTs.
2 Bendini FLTs.
4 Terberg tractors (4 wheel drive) (Ro/Ro).
8 Terberg tractors (2 wheel drive).
4 Lansing 5 ton G.P. FLTs.
4 Lansing 2 ton FLTs (full free lift).
14 Skeletal trailers.
6 Low loader 50 ton trailers (Ro/Ro).
2 40 ft. side lift spreaders.
2 20 ft. side lift spreaders.
4 Goosenecks.
1 Demag quay crane.
1 Paceco quay crane.
3 Post – Panamax quay cranes.
2 Rubber tyred gantry cranes.

MEDICAL: Treatment available at local hospital.
REPAIRS: See "Valletta".
HOLIDAYS: See "Valletta".

REGULATIONS: The Port Authority is very strict about air and sea pollution.

DEVELOPMENTS: At the Marsaxlokk Freeport Terminal, it is expected that infrastructure works on the first phase of the oil terminal and the warehouses will be completed by the end of 1992. Works will continue on the Terminal I Container Yard extension, quay walls and dredging for the new berths of Terminal II.

AUTHORITY: See "Valletta".

Operator: Malta Freeport Corporation, Freeport Centre, Port of Marsaxlokk, Kalafrana, Malta. *Tel:* 684812/3. *FAX:* 684814.

VALLETTA: 35.54 N. 14.31 E. (See Plan)

DOCUMENTS: On arrival the Master has to fill the Pratique Deposition, the Stores List, the Crew Declaration, and the Crew List (two copies). The forms for the Pratique Deposition and for the Store List are supplied by the Customs Boarding Officer.

Arrival Notice: In accordance with the Port's Regulations Master or Agent of a vessel should give the ETA to the Ports Directorate on a form prescribed by the regulations as early as possible prior to arrival and 48 hours in the case of vessels carrying petroleum or other hazardous cargoes.

PILOTAGE: Pilotage is compulsory for vessels above 500 g.r.t. Pilots for Valletta and Marsaxlokk board vessels at Fairway Buoy, weather permitting. Pilots available round the clock all the year round. In bad weather Pilots board vessels inside entrance, subject to size of vessels, Master's knowledge of the port and Master's willingness to bring vessel up to Bighi Bay.

Vessels are expected to communicate their ETA at the boarding station at least 2 hours before arrival, and to re-confirm their ETA when they are 5 miles off the Fairway Buoy. The pilot boat is called when vessels are 2 miles off the Fairway Buoy.

The pilot boat is equipped with VHF Channels 12, 14 and 16.

ANCHORAGES: Anchorage in territorial waters and in other harbours is prohibited unless expressly authorised by the Ports Directorate.

RESTRICTIONS: Minimum depth at entrance is 16 m. Nature of bottom in entrance channel, rock and mud. Harbour channels – mud.

Harbour entrance and approaches affected by current. With North-Westerly winds there is a set of up to 0.5 knots from N.W. to N.E.

Port is subject to closure in gregale (N.E. gale) conditions – Winter months occasionally, not more than 4 times a year.

MAX. SIZE: Discharging Berths:

Deep Water Quay – 500 m. long, depth 10 m. The quay handles conventional cargo and is furnished with 3 sheds, totalling about 8,500 sq.m.

Berths No. 1, 2 and 3 have maximum depth alongside of 9.75 m. Maximum displacement tonnage of 15,000 tons.

Berth No. 4 has the same depth of water and can take maximum displacement of 25,000 tons.

Pinto Wharves 1 and 2: 264 m. long, depth 10 m.
Pinto Wharves 4 and 5: 250 m. long, depth 11 m.

These wharves are used mainly for cruise liners, naval vessels and ferries.

Flagstone Wharf: 217 m. long, depth 13.7 m. Can handle bulk coal carriers and tankers.

Magazine Wharf: Combined with Laboratory Wharf has total length of 440 m. Depth 12.2 m. – 15.0 m. The Kordin Grain Terminal is equipped to handle bulk grain carriers up to 70,000 d.w.t. Capacity of silos 86,000 tons. Maximum discharge rate 1,100 t.p.h. Maximum loading rate 1,250 t.p.h.

Laboratory Wharf has a length of 220 m. with a depth of 12 m. Two other small berths adjacent to the main wharf are used for Ro/Ro and direct deliveries.

Fuel Wharf has a length of 145 m. with a depth of 9.0 m. and handles direct deliveries.

Gun Wharf has a length of 90 m. with a depth of 7.5 m. and is used for ferry services.

There are other berths at Coal Wharf (length 110 m., depth 7.0 m.) used mainly for direct deliveries.

Anchorage areas within Valletta Port are at Bighi Bay and Barriera Wharf.

HEALTH: Port Medical Officer grants Pratique after boarding vessels on arrival. Accelerated Pratique may be granted through Agent provided crew are all in good health and ship has not called at any infected port during previous 15 days and is coming from a European port.

RADIO: Call sign 9HD. Radio telephone working frequency 2625 kHz. Listening watch 2182 kHz.

RADAR/VHF: The Palace Tower Signal Station may be contacted on VHF Channels 11, 12, 14 and 16 on call sign "Valletta Port Control".

Also see "Pilotage".

TUGS: Tug Malta Limited, which operates a fleet of 6 tugs, provides all tug assistance in the harbours and territorial limits of Malta on a 24 hour basis, 7 days a week. Lines are given at the discretion of the ship's Master under the advice of a Pilot.

BERTHING: Berthing conference held at the Ports Directorate daily at 1100 hrs. between Monday and Saturday when berths are allocated for expected ships. No specific requirements necessary. Once berth has been allocated by Ports Directorate vessels can berth at any time at the allocated berth (container and Ro/Ro berths are available).

Also see "Plan".

EQUIPMENT:
(a) One mobile crane maximum lifting capacity 250 tons.
(b) 2 mobile cranes with maximum lifting capacity of 75 tons.
(c) 6 electrical trucks.
(d) 2 diesel operated forklift trucks.
(e) 26 medium sized trailers.
(f) 10 cab tractors.
(g) Various other smaller forklift trucks and cranes.

STEVEDORES: Port workers for stevedoring are ordered by Shipping Agents and labour is allocated from a pool operated by the Manager of port workers.

Working Hours: Agents may order work according to one of the following three options:
(A) On a day's basis, commencing at 0800 hrs. up to 1700 hrs., with a one hour break from noon to 1300 hrs.;
(B) On a 14 hour shift basis: From 0800 hrs. to 1500 hrs. (day shift) and from 1500 hrs. to 2200 hrs. (evening shift);
(C) On a 24 hour shift basis: From 0800 hrs. to 1600 hrs. (day shift), from 1600 hrs. to 2400 hrs. (evening shift) and from 2400 hrs. to 0800 hrs. (night shift).

An extra allowance of LM 5.00 per head is payable to port workers engaged on night shift duties, and LM 10.00 per head for duties on Sundays and Public Holidays.

MEDICAL: Notice must be given to Agents as early as possible. Hospital facilities available. Crew must be in possession of inoculation/vaccination certificates.

TANKERS: Vessels for Valletta Port must be gas-free, except for the tank cleaning berth. Vessels carrying dangerous petroleum may enter Marsaxlokk Harbour to discharge or load petroleum products (See "Marsaxlokk").

FRESH WATER: Limited amount ex-barge subject to permission from Water Authority. Notice, as long as possible required.

FUEL: Mediterranean Offshore Bunkering Company Limited; Oiltanking (Malta) Limited; San Lucian Oil Company Limited. Grades handled include gas oil, fuel oil, thin fuel oil 30 cST up to 380 cST.

Bunkering may be carried out by barge or at Flagstone Wharf. Bunkers may also be supplied at any of the 5 anchorage areas available off the coast of Malta.

FIRE PRECAUTIONS: Precautions as laid down in Ports Regulations for cargo ships and as in Petroleum Ships Regulations for tankers. Civil tugs partly equipped with fire fighting equipment.

CONSULS:

Embassies in Malta for following countries:

Australia	338201/5	Korea (D.P.R.)	800003
People's Republic of China	334695	Kuwait	337131
Czech Rep.	511330	Socialist People Libyan Arab Jamaharija	334947

Mexico	245802	Tunisia	407000

Vice Consuls in Malta for following countries:

Austria	239182	Spain	238180

REPAIRS: Malta Dry Docks has the capability to carry out normal and specialised engine, hull and machinery repairs such as:

Engine, (diesel, steam, turbine)
Auxiliaries (turbine and diesel)
Turbine re-blading
Propeller servicing, repairs including re-tipping (tips cast in yard) and balancing
Dynamic balancing of rotors
Boiler and heat exchanger chemical cleaning
Rudder and tailshaft alignment and repairs
Gritblasting (internal/external) to all standards
Hull cleaning by high pressure water jet
Refrigeration system repairs
Replacement of lignum vitae stern tube bearings
Installation of Deutsche Werft Simplex stern tube sealings
Internal/external cathodic protection
Combustion control system repairs
Re-tubing of boilers, brickwork and lagging
Renewal of heating coils, cargo and stripping lines
Hull repairs (welded and rivetted)
Jumboizing.

Travelling Repair Parties:

Malta Dry Docks Travelling Repair Parties are available to carry out repairs at sea both as an emergency repair, or as a means of reducing lay-up time during normal voyage repairs or classification surveys.

It is possible to shorten the time of refits by employing a travelling repair party to commence work before entering or complete after leaving the Dry Docks, non-critical items being completed on passage.

Malta allows the maximum use to be made of Travelling Repair Parties, situated as it is in the centre of the Mediterranean, midway between Gibraltar and Port Said. It is ideally placed on the shipping lanes between the East and West and connected by daily air services to Europe and North Africa.

Malta Dry Docks Travelling Repair Parties are equipped to carry out the following work:

1. Repairs to main and auxiliary boilers, including re-tubing, renewal of brickwork and insulation and fitting of new furnaces in Scotch type boilers.
2. Overhauling and repairing deck and engine room auxiliary steam and diesel plant, cargo systems and valves.
3. Repairs or replacement of cargo tank heating and stripping line systems, in cast iron, steel or aluminium/brass.
4. "Metalock" cold repairs to castings by trained specialists.
5. Gas or electric welding to Classification Society requirements for steelwork repairs and reinforcements.
6. Repair or renewal of electrical wires and cables.
7. Overhaul or installation of any electrical machinery.
8. Repair or installation of all navigational aids, i.e., radar, radio, auto-pilots, gyros by qualified personnel.

Any enquiry will receive immediate attention by radio, telex or telephone.

SURVEYORS: Lloyd's Register of Shipping; The London Salvage Association; American Bureau; U.S. Salvage Association; Det Norske Veritas; Registro Navale Italiano; Bureau Veritas; Germanischer Lloyd; Panama Bureau of Shipping; Nippon Kaiji Kyokai.

DRY DOCKS: Malta Dry Docks.

Docking Facilities:

Dock Number	*Length (m.)*	*Inside Beam (m.)*	*Depth (m.)*	*Cranes Capacity (tons)*	*Other Facilities**
1	153.92	21.64	5.57	1×50 1×5	A–S–FW–SW

*A – Compressed Air FW – Fresh Water O – Oxygen
S – Steam SW – Salt Water P – Propane

Capacity of No. 6 Dock 300,000 d.w.t.

GANGWAY/DECK WATCHMEN: Gangway recommended. Deck compulsory.

OPENING/CLOSING HATCHES: By ship's crew or shore labour.

CERTIFICATES: Ship's Register; Load Line Certificate; Derat Certificate; Factory Act Book.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member, plus one bottle spirits (officers only).

CARGO GEAR: Certificates of cargo handling gear have to be valid before cargo work can commence. Factory Act Book to be endorsed quadriennially and annually.

REPATRIATION: Facilities exist for crew changes and repatriation by air.

AIRPORT: Luqa Airport is 4 miles from port, served by Air Malta and other airlines. Daily flights to London and Rome. Also other flights to other countries.

TIME: GMT plus 1 hour in Winter. Summer time kept from last Sunday in March until last Sunday in September.

HOLIDAYS: New Year (1st January – no work); St. Paul's Shipwreck (10th February); St. Joseph's Day (19th March); Freedom Day (31st March); Good Friday (no work performed at all on this holiday and in the afternoon of Tuesday Carnival); St. Joseph the Worker (1st May); Sette Giugno (7th June); St. Peter and St. Paul (29th June); Assumption of B.V. Mary (15th August); Victory Day (8th September); Independence Day (21st September); Immaculate Conception (8th December); 13th December (Republic Day); Christmas Day (25th December); (no work performed at all).

TELEPHONES: Can be arranged at the Dry Dock Berths, and on buoys.

SERVICES: Tank cleaning and underwater hull cleaning undertaken by Malta Dry Docks.

Ricasoli Tanker Cleaning Installation:

The tanker cleaning installation at Ricasoli accepts cleaning for dry docking, repairs and survey for upgrading tankers.

The jetty area consists of a 100 m. jetty, situated immediately inside the Grand Harbour, and capable of berthing tankers up to 100,000 d.w.t. at a maximum draft of 8.5 m. in 10 m. of water.

Tankers are assured of immediate attention on arrival from a trained crew of tank-cleaning personnel. Work is continuous 24 hours per day from the time of arrival of the vessel, together with a 24-hour security watch.

1. Washing: The installation supplies hot wash water at a temperature of 60°C and a pressure of 14 kg./sq.cm. to operate 4 washing machines simultaneously, with a delivery rate of 30 – 34 t.p.h. The discharge of slops and/or ballast is at a maximum of 1,200 t.p.h. Chemical cleaning is also undertaken and Malta Dry Docks holds stocks of well-known chemicals.
2. Gas-freeing: The installation operates 3 compressors and 6 Meco ventilators, together with trunking, are available for gas-freeing.
3. Steam Supply: This is available at the jetty when required. All associated tank-cleaning equipment is available for ship's use.

Full fire-fighting facilities are available at the jetty.

The installation also makes distilled water for sale to ships and a separate line is available at the jetty for the discharge of this product.

The reception and treatment area incorporates reception tanks, treatment tanks and an observation tank with separating baffles and oil sump. In addition there is an oil storage tank and a distilled water storage tank.

The boiler house accommodates 3 Scotch boilers with all associated auxiliary equipment. The steam supply is extensively used in the plant area for heating and treatment purposes. An evaporator-distiller is incorporated in the Boiler House for the production of distilled water.

The whole area has been designed to be perfectly safe and is to the standards laid down by the Institute of Petroleum Safety Codes for Installations storing Class A Petroleum. Strict safety regulations are applicable to the whole plant and the tank-cleaning crew has been thoroughly trained in these matters.

Mediterranean Oilfield Services Co. Ltd.:

Address: Manoel Island, Malta. Tel: 336408, 336409, 339656, 331411, 338195. Telex: MW1273, MW1485. Cables: Medserv, Malta. 24 hour service, 7 days a week.

Devoted solely to the oil industry. 800 ft. deep water quay frontage. 1,722 sq.ft. bonded warehouse. 40,000 sq.ft. covered storage. 20 acres open storage. Office space. Catering services.

One operation for loading mud, cement, water, pipes, fuel and other supplies. Labour contractors.

POLICE/AMBULANCE/FIRE: Police 191; Ambulance 196; Shore Fire Brigade 199.

BANKS: Bank of Valletta, Central Bank of Malta, Lombard Bank (Malta) Ltd., Mid-Med Bank Ltd., Melita Bank International Ltd.

SHORE LEAVE: There are no restrictions for crews to proceed ashore.

IDENTIFICATION CARDS: A personal identification card not required. Passports or seamen's books will suffice.

GARBAGE DISPOSAL: Garbage collection services are provided by private companies 24 hours per day.

WASTE OIL DISPOSAL: Tank cleaning is carried out at the Ricasoli Tank Cleaning Installation which is capable of berthing tankers up to 100,000 d.w.t. Tel: 828089.

SEAMAN'S CLUBS: None.

CURRENCY: One Maltese Pound = U.S.$ 2.5475 (27.2.94).

GENERAL: Important that tankers are gas-free before entering, and that vessels do not carry explosives.

DEVELOPMENTS: The Sea Passenger Terminal at Gun Wharf has been extensively refurbished during the past year (1993), with the aim of providing passengers with enhanced facilities.

During the coming year (1994), projected infrastructural developments will include a further extension to Pinto Wharf, the construction of a fourth quay along with an administration building at the Port of Mgarr, Gozo, and the construction of a fuelling jetty at Ta'Xbiex. Works will also be taken in hand for the construction of a Security Gate Complex at the Deep Water Quay.

NOTES

Please also advise Shipping Guides Ltd.

Marshall Islands

MAJURO: 07.07 N. 171.10 E.

SHIPMASTER'S REPORT: December 1990.

The vessel departed Guam on December 12th 1990, bound for Majuro. Typhoon Russ hampered the vessel's progress and we did not arrive until 0800 hrs. on December 19th. Contact with the agent was not confirmed throughout the voyage. Although the agent's answerback was received and messages were transmitted, they did not illicit replies. Shell Singapore assisted by contacting the agent and confirmed the receipt of vessel's ETA's. Direct contact was made by VHF on Channel 16.

Marshall Atoll was detected on the radar at a range of 20 miles. A pilot boarded one mile from the entrance to the lagoon. The channel is marked by 6 pillar beacons, at the time of our visit the first beacon on the port side was missing. Coral heads were visible on the starboard side, the reefs on the port side were not. On both sides, the dangers extend beyond the marker beacons, therefore the vessel had to be lined up with the channel well before entering it. A strong N.W.'ly set was experienced off the entrance, which tended towards the coral heads. Once inside the lagoon the passage to the berth was virtually unobstructed. Distance from pilot to berth was 14 nautical miles.

The berth is owned by the Marshall Island Armed Forces and operated by the Marshall Islands Power Company. It is a continuous concrete wharf, with horizontal wooden fenders and vertical rubber fenders along its length. The depth of water was reported to be 43 ft. alongside, and the wharf was reported to be 320 ft. long. Prevailing winds are from the South and the jetty has been constructed on a line 084°/264°.

The wharf is used for general cargo imports, in addition to the importing of gasoil for the power plant. No other vessel is, however, allowed alongside when a tanker is using the wharf. The gasoil is received via a flexible hose to a caged manifold connected to the storage tanks. Size of reducer required is 8 in. The hose was positioned using a fork lift truck and the ship's crane.

There are no tugs and no evidence of repair facilities. No dirty ballast or slop facilities are provided. Mobil have a tank farm terminal and seem to be the main supplier of Mogas to the Island's garages. The Power Company sell some of the imported gasoil for bunkers to fishing vessels and local boat owners. There is a jet runway and seaplane service. Most flights are by the runway, the seaplane being little used. It was reported that there are frequent flights.

The vessel was boarded by Customs, Immigration and Health Officials on arrival at the berth.

The following documents were required:
5 copies Crew List.
1 copy Passenger List.
1 copy Vaccination List.
1 copy Previous Ports List (last four ports).
1 copy Crew Declaration.
1 copy Stores List.
1 copy Declaration of Health.
Clearance from last port.

There were no problems with the formalities and the ship's clearance was arranged in advance. The port has just established a double clearance procedure were the vessel must have both port and customs clearance before departure. Although the clearance was arranged in advance there was a delay whilst the agent brought the documents to the ship.

The Marshall Islands are part of a group known as Micronesia, however they use U.S. Dollars as the standard currency. There was little commercial activity in the port and on the Atoll. Robert Reimers Enterprises run the main hotel, bank, supermarket and most commercial activities on the Island.

SHIPMASTER'S REPORT: June 1992.

Although classed as a U.S. Trust Territory, the Marshall Islands are, in fact, independant and have their own flag.

Papers required for Port Officials are:
4 copies Crew List (Not U.S.).
Customs Declaration Form.
Stores List.
Derat/Exemption Certificate.

Considerable difficulty experienced in contacting Agents, Robert Reimers Enterprises, by telex. Although the List of Agents showed the Telex No: 7300930, vessel could only make contact using 7650930 and 7657300930, both giving "answerback" as "Comwriter Senior". After arrival, the Agent confirmed that the "answerback' was the Agency, but stated that only one message was received from the ship, this being the 24 hours ETA. Our telex machine confirmed receipt of all messages sent to Agent's number with "answerback", both before and after transmission. Having had no reply to questions raised in the first telex sent, a satellite telephone call was initiated and a successful connection made to Agents.

As Robert Reimers have several operations in Majuro, one has to request the shipping agency when telephone contact is made. Dialling the number direct gave a "no service" tone, and we evertually succeeded using the Australian Satcom. Operator. The telephone code used was 692 for Marshall Is., then 9 for Majuro, then the number. The first number in the List of Agents (3250) gave "no service", but the second number (3470) was successful.

Pilotage is daylight only and pilot boards at Calalin Channel. The pilot inwards was the Harbour Master and the Berthing Pilot. He also unberthed the ship and took us out through the channel.

In addition to information already supplied, the following is worth noting. There can be strong cross currents running across the channel from East to West, and it is recommended to ask the pilot to board outside the channel. Pilot boards using a small private motor boat. The current British Admiralty Chart is out of date, as the Calalin Channel Beacons are in different positions and the berth/cargo wharf is not shown. Most of the port hand beacons in the channel are missing, having been damaged in a previous typhoon. When going through the channel inbound, only Beacons No. 1, 3 and 5 are to starboard and No. 6 to port. Once inside, there are no major problems. The beacons shown on the chart are in position Lat. 07° 05.2′ N., Long. 171° 21.9′ E.

Vessel anchored overnight 2 miles WxN of the berth in 25 fathoms with a slightly sandy bottom. The berthing went smoothly, but without tugs, and the line boats were small motor boats, the same as the pilot used. Vessel berthed starboard side to and the bow overhung the end of the solid wharf by about 10.0 m. The port anchor was dropped approaching the berth and springs were run first. Anchor chain was slacked out as vessel moved in towards the berth, and then held on to bring the bow out and the stern in. Vessel ended up with 7 shackles out. Owing to the overhang, there was nowhere to lead proper headlines, except to the fishing wharf further up, and that would have required permission from the owners of the wharf and taken considerable time. As it was, the moorings were sent as breast lines and springs from the forecastle and headlines from the maindeck. The vessel was safely moored 2-2-2 in that manner.

Vessel discharged one grade, gas oil, through an 8 in. connection. Shore line was 16 in. to tanks close by. Overall discharge rate achieved was about 1,050 cu.m./hr.

Unmooring was conducted by letting go all moorings except one forward spring, with the anchor in gear. The vessel then steamed slowly forward against the spring, bowsing in the bow until the stern was well clear of the dock. The spring was then let go and with engine on dead slow astern, the anchor chain was then heaved in to pull the bow out and astern. In moving astern, the bow swung slowly to starboard with little or no weight on the chain. Once the anchor was aweigh and clear, the turn to starboard was continued, with the vessel still moving astern.

A point to watch here, is that there is a mooring buoy some 250 m. – 300 m. off the berth. This buoy, which is not on the chart, is used for unmooring in strong N.E. winds, when a mooring line is secured to it to heave the stern off the berth.

The turn to starboard was completed with engine changed to turning ahead and vessel proceeded seawards.

SHIPMASTER'S REPORT: December 1992.

General Information: Majuro Island is an atoll and is the main island of the Marshall Islands.

This vessel made the voyage to Majuro Island in the month of December 1992. In that period, a Northeasterly wind blows constantly with wind sometimes dying down unexpectedly, but also increasing to Force 8 during squalls.

Normal wind force in the month is 4-5, which makes unmooring rather difficult, and sometimes impossible, as the wind is then blowing on to the jetty.

Load port was Singapore, Guam first discharge port, Majuro second and Saipan third and last.

Arrival draft in Majuro was 8.50 m. even keel, and departure draft 4.65 m. forward and 6.90 m. aft.

Approach: Entering and leaving is only during daylight hours.

Anchoring outside not possible due to deep water.

Good radar echo at approximately 20 miles.

Calalin Channel is the approach channel, which is deep and wide.

Buoyage rather poor, but sufficient.

Coral reefs and shoals clearly visible and buoyed where necessary.

Charts used: B.A. 984 of no use, as scale is too small. U.S.C.G. 81782 is of large scale. This chart is not obtainable at Singapore, but when Guam is first port, then Guam Agent can obtain this chart, when requested, and is recommended.

Warning: On both charts buoys not charted correctly. Also shoals and reefs not as charted.

Calalin Channel and lagoon are free of dangers. If there is a shoal, it is buoyed, but not according to chart. This makes entering and leaving during daylight only, absolutely a must.

Strong cross currents experienced in Calalin Channel.

Pilots: Compulsory.

Pilot will board by a small motor speed boat.

When there is a heavy swell outside, which is often, Pilot cannot board outside, so will meet vessel in the lagoon.

Pilot will then talk ship in via VHF Channel 16.

Same will be done when outward bound.

Approach was made on course 175°, keeping the 3 green buoys on starboard side and the only red buoy on the port side. However, one cannot see the colour of the buoys at a distance, so Pilot will inform vessel.

It is essential to keep contact with the Pilot.

It may be possible that buoys will be changed at a later date, in order to meet the need for safe navigation, as shoals will change.

There are 2 Pilots, however one is mostly off the island, and the other one will then meet vessel.

Pilot to be ordered well in advance through Majuro Agent. Pilot is very competent, but he cannot board ship by pilot ladder, only by accommodation ladder.

One has to guess what side ship will berth, and consequently what side ladder has to be rigged.

During N.E.ly wind, berthing will be starboard side to.

Anchorage: Only possible in the lagoon, and according to Pilot not everywhere has good holding ground.

From the entrance channel to the jetty, vessel has sufficient time for accommodation ladder handling.

Jetty: The jetty is situated in the S.E. corner of the lagoon in position Lat. 07° 05.2′ N., Long. 171° 21.8′ E. Jetty direction is 080°.

Jetty is made of concrete, and has a horizontal top beam of wood, which is broken in some places, and heavy steel nails could cause some damage to hull.

NOTES

Please also advise Shipping Guides Ltd.

Vertical rubber fender strips are placed regularly alongside the jetty. Bollards are placed at sufficient and regular intervals. This is not ideal, as an uneventful landing could therefore be on the concrete. High winds (squals of Force 8) could easily cause this.

Jetty length was estimated at at least 400 m.

Jetty is used for the inter-insular cargo ships (coasters) and visiting fishing vessels.

Jetty is not charted on both charts.

Berthing: No tugs or line handling boats are available. Ship will berth at the East end of the jetty, where the hose connection is located. In our case, we berthed starboard side alongside, with 8 shackles in the water on the port anchor.

As the ship's bow is close to jetty end, the forward ropes/breast lines are rather short. Aft ropes/breast lines were sufficient in length. 4 head ropes/breast lines and 2 forward springs were used. 5 aft ropes/breast lines and 2 aft springs were used. Due to the strong N.E.ly wind, one extra forward spring, leading forward, was used.

Other ships can moor close to the ship's stern.

It was very hard to get the bow alongside the jetty, due to the strong wind (Force 8) during mooring, and even with Force 4-5, it was difficult.

Draft: Various sources all issue drafts, ranging from 10.7 m. (Sietco), 10.50 m. (London) and 10.0 m. (Pilot). U.S.C.G. Publication 126, Sailing Directions for the Pacific Islands (obtainable in Singapore) states: Contact Local Authorities as depth may change and vary.

It took nearly 2 weeks to get a proper answer on the draft question, due to very difficult communications with Majuro.

Unmooring: Impossible during N.E.ly winds. Turning on fore springs with slow ahead and hard starboard rudder caused aft ship to turn away from jetty unsufficiently to get safe distance from jetty.

Any ship moored astern has to vacate jetty in order to avoid any touching with own ship.

Unmooring had to be abandoned and postponed to next day. Strong wind can last for several days. In that case, vessel has to seek assistance from any other vessel capable of towing.

There is a large buoy moored for the purpose of pulling the stern away. However, this is not recommended, due to the fact that 3 ropes have to be lashed together to reach the buoy.

Sometimes Pilot can arrange a launch to assist in pulling, but this is not always the case.

In our case, a visiting fishing vessel sent his skiff on our request and made fast and pulled the stern away from the jetty.

Special Regulations: Proceeding to and from Majuro requires navigation through the Kwajalein Missile Testing Area. This is a 200 miles radius area from Kwajalein (See B.A. Chart 761 Notice, and Pilot No. 61 and U.S. Publication 126).

In case vessel is unable to call Kwajalein Control Radio Station (ABK) by radio, then Guam Agent is able to contact the Military on Kwajalein on behalf of the Master and ask permission. Contacting the Military directly from ship, other than by radio, is impossible. There is no telex, and the telephone system is the Military telephone system, which cannot be penetrated by civil craft.

Typhoons: Majuro is situated in the region where most of the N.W. Pacific typhoons are generated. The track Guam/Majuro/Saipan is the most common track for these typhoons.

On this voyage, 2 typhoons of 945 mb. and 900 mb. were encountered within one week, all on the track Guam/Majuro. Normal typhoon warnings through the various meteo stations. There is one station which gives updates every minute. If vessel tunes to 15,000 kHz, it will have on line Port Collins in Colorado, which give warnings in human voice and the UTC time signal. After the UTC beep, updated and useful information is given for this area regarding tropical depressions, tropical storms and typhoons.

Martinique

FORT DE FRANCE: 14.36 N. 61.04 W. (See Plan)

PORT LIMITS: The seaward limit of the port is the broken line joining the following points: Extremity of Pointe des Negres, South of Fort Saint Louis, Red Buoy No. 3, Black/Yellow Buoy S., Green Buoy No. 6L and Pointe Desgras.

DOCUMENTS:

Maritime Declaration of Health.
4 Crew Lists.
2 Provisions Lists.
2 Lists of Passengers in Transit.
5 Lists of Passengers Disembarking.
2 Lists of Crew Personal Effects.
2 Vessel's Particulars Declarations.
2 Cargo Manifests.

Tankers Only: Certificate of Insurance against Oil Pollution.

PILOTAGE: Call Pilot by International Code flag "G" or by sounding "G" on whistle. Pilot launches are painted black. The Pilot joins vessel on arrival at Pointe des Negres. If Pilot not available, vessel must anchor in the Baie des Flamands, East of Point des Negres to await Pilot.

ANCHORAGES: In Baie des Flamands in front of the town. Depths of 10 m. – 14 m.

MAX. SIZE: Length: 180 m. for vessels with one right hand propeller and without bow-thruster. 250 m. if vessel has two propellers and bow-thruster. See also "Tankers".

HEALTH: Request Free Pratique by radio or can be obtained on arrival when Master completes Health Declaration and presents Health Certificates.

RADIO: Fort de France Radio, call sign FFP. ETA message to Agent required 24 hours before arrival on working days or 48 hours on holidays. Message to include number of crew on board, flag, ship's name, tonnage, length, beam, max. draft on arrival, date and time of arrival.

VHF: Port Authority on Channel 16. Pilot on Channel 13.

RADAR: None.

TUGS: None available or required.

REPAIRS: Minor repairs possible.

DRY DOCK: 1×200 m. length, 21 m. wide. Equipment restricted.

SURVEYORS: *Lloyd's Agent:* Tel. 715566.

GANGWAY/DECK WATCHMEN: Recommended. Performed by crew members.

OPENING/CLOSING HATCHES: Can be performed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes per man. All alcohol to be declared.

REPATRIATION: Facilities for crew change and repatriation.

AIRPORT: 9.5 miles from the port, served by regular airlines.

HOLIDAYS: 1st January, Shrove Tuesday, Ash Wednesday, Easter Monday, 1st May, Ascension Day, Whit Monday, 14th July, 15th August, 1st November, 25th December.

POLICE/AMBULANCE/FIRE: Police, Tel: 17 or 71 00 24; Ambulance, Tel: 17 or 71 59 58 or 70 36 48 or 71 48 88. Fire, Tel: 18 or 71 22 64.

TIME: GMT minus 4 hours.

TELEPHONES: Available in cruise ship reception building at Quai des Tourelles.

SERVICES: No tank cleaning equipment, tank-washing, or compass adjusting.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Seaman's Book.

DEVELOPMENTS: A third container gantry of 45 tons is to be installed. Cruise ship terminal at Baie de Flamands available.

SHIPMASTER'S REPORT: December 1988.

Belle Fontaine: (See "Plans").

Vessel: LOA 150 m. Beam 21.0 m. Summer draft 9.05 m. 10,330 g.r.t. 5,584 n.r.t. 3 hatches.

After completion of cargo operations at Fort de France, the pilot boarded and vessel sailed for Belle Fontaine.

The Master takes command from Fort de France pilot station to about 1.5 miles before the berth at Belle Fontaine, when the pilot again assists. The regular pilot boat follows with additional crew from Fort de France and assists in taking the ropes to the dolphins and the jetty. Usually, and preferably, the pilot berths the vessel port side alongside against a slight current. The berthing is also done, preferably, in the early morning, due to absence of wind. The starboard anchor is dropped to 2 shackles on deck when the vessel is about 4 to 3 cables from the berth and is slacked away as required. The anchor is not of use for berthing but is for assisting unberthing. Under normal conditions the vessel makes fast with 2 long headlines and 2 stern lines to the dolphins and 2 springs each, forward and aft.

The berth is built of concrete on a solid foundation, the sea bottom is rock covered with boulders. The berth is very well fendered with 8 large tube-type rubber fenders of about 1.20 m. diameter and 1.50 m. length. Both corners of the berth are additionally protected with 4 smaller tube-type fenders on each side.

The berth is fitted with 2 modern loading arms for receiving fuel for the power station, to which the berth belongs. The berth is also used to receive equipment and spares for the power station, as well as shipping used parts. We loaded 150 tons of general, consisting mainly of oversized and heavy material, also some 40 ft. containers of up to 30 tons each. The space on the berth is limited and if the vessel has to work on a second hatch it has to shift. There is sufficient room to manoeuvre with 40 ft. trailers. The stevedores come from Fort de France.

If vessels are berthing at Belle Fontaine and come directly from overseas, the customs broker takes all documents to Fort de France to obtain Clearance. Usually the authorities do not come on board.

The pilot has to be ordered from Fort de France, and will await the vessel 1 mile Northwest of the berth. All regulations valid for Fort de France are valid for this berth. The official name of the berth is: Fort de France, berth Belle Fontaine.

If repairs or stores are requested it has to be organised through Fort de France companies. In an emergency small amounts of fresh water can be taken by a 1 in. pipeline.

The position of the berth taken by bearings and from official sources (B.A. Chart No. 371) differs slightly from the position taken from the satellite. The latitude shows no difference but the longitude obtained by satellite is 61° 10.47′ W., whereas the position on the chart shows 61° 08.7′ W.

600 m. inshore of the berth is a new power station with 2 conspicuous chimneys. They are illuminated at night by white lights and make a good landmark by day and night. The chimneys are in line 055°.

Capitainerie du Port, B.P. 625, 97261 Fort de France Cedex. *Tel:* 63.40.74, 70.20.73. *Telex:* 912854 Mr. *Contact:* M. Gibon, Port Captain.

Mauritania

NOUADHIBOU: (Port Etienne): (See Plan)
POINT CENTRAL: 20.49 N. 17.03 W.

DOCUMENTS:
3 Crew Lists.
2 Stores Lists.
2 Crew Declaration Lists.
2 Passenger Lists (even if "NIL").
2 Ports of Call Lists of the last 30 days.
1 Health Declaration.
1 Vaccination List.

Maritime Gendarmerie: Officers of the Maritime Gendarmerie of Nouadhibou may come on board. They mainly control if the Mauritanian flag (must be flown day and night) is hoisted and check very closely the concordance between the Ship's Articles, the Seaman's Books and the Crew List.

If any difference is found between these three documents a fine may be given to the ship.

Immigration/Police: Crew members are not allowed to go ashore without a safe conduct given by the police. The list of the men asking to go ashore has to be given to Agent on arrival.

Money: On principle, foreign money is not allowed in Mauritania, but Agent may change money into local currency.

No Mauritanian money (Ouguiya) may be kept on board and if the crew have not spent their local money they have to give it back to the Agency (10 Ouguiya about 1 French Franc).

PILOTAGE: Compulsory for vessels calling at Point Central.

An outer pilot station is situated in the vicinity of No. 2 Buoy, bearing 037° distance 4.4 miles from Fairway Buoy No. 0 (Lat. 20° 40′ N., Long. 17° 04′ 30″ W.). Also see "Shipmaster's Reports".

The inner pilot station is 1 mile from the Mineral Wharf bearing East.

ANCHORAGES: Ships waiting can anchor N.E. of No. 2 Buoy, distance 1 mile in 20 m. of water, good holding ground. Another anchorage on the roadstead, the wharf bearing N.W./N.N.W. distance 1 mile can be used by ships prior to berthing.

RESTRICTIONS: Minimum depth of water below chart datum is 17 m. in the buoyed channels and swinging area. Outer channel width is 400 m. but it varies from 250 m. to 400 m. for the inner channel; the radius of the swinging circle being 500 m.

MAX. SIZE: Not to exceed 310 m. in length and 47 m. in breadth, the extreme reach of the shiploader arm being 28.5 m. from ship's side. At the limit an extreme breadth of 48 m. could be accepted after advice from the DCFP. If possible drawing should be sent prior to acceptance for vessels of more than 100,000 d.w.t.

The recommended draft for large vessels in ballast, or partially loaded is 12 m. on arrival. Smaller ships should have on board a quantity of ballast equal to half their cargo capacity.

Maximum freeboard under shiploader arm is 14 m. With hatch covers opening crosswise (abreast) the maximum freeboard must be understood as the height from sea level to the upper part of hatch covers.

On departure a draft of 16.15 m. is usually admitted.

Essential: All vessels greater than 100,000 d.w.t., which have never visited the port before must have prior approval of the DCFP.

HEALTH: Free Pratique is usually granted after vessel has berthed. Yellow fever vaccination certificates required.

TUGS: None available.

BERTHING: SNIM Port:

Mineral Wharf: The ore loading terminal of "Societe Nationale Industrielle & Miniere de Mauritanie" (SNIM) is located at mid distance between Cap Blanc and Nouadhibou, geographical position: Lat. 20° 49′ N., Long. 17° 02′ W. It consists of a platform, 20 m. wide oriented North and South, resting on 8 dolphins, 13 m. in diameter each and 32 m. distant one from the other. The platform supports a conveyor belt and one single shiploader. The maximum travel of the shiploader from one end of the rails (railway) to the other is 165 m.; the virtual loading capacity would be 5,000 t.p.h. while the actual output varies from 2,000 to 4,000 t.p.h. according to ship's size and on condition there is only one quality and grade of ore to load.

To maintain a depth below LLWT (lowest low water astronomical tides) of 16 m. at the berth, ships are laid against 2 big outrigger pontoons leaning on the dolphins and protected on the ship's side by heavy but efficient rubber rollers acting as shock-absorbers.

Ships are generally made fast port side to the quay, coming alongside with the help of the anchors which should be kept at the ready.

Shipmaster's Report: March 1983.

Heavy lifts up to 24 tonnes were discharged alongside the berth with vessel's gear.

MEDICAL: There are hospital and medical facilities at the port.

TANKERS: Oil Wharf: It consists of a light platform placed on top of 3 dolphins of the same diameter as above but 64 m. apart, adjoining the mineral wharf to the Southward. A wooden decking supports the oil pipes which are connected abreast of dolphin No. 10 to the tanker lying port side to the quay, the stern is made fast to a mooring buoy.

DENSITY: Point Central 1026–1027.

FRESH WATER: *Shipmaster's Report:* March 1983. Fresh water available in limited quantities (approx. 100 tonnes) at a cost of U.S.$1.50 per tonne.

FUEL: Not available at the moment. An oil refinery has been built which will supply fuel from May 1994.

GANGWAY/DECK WATCHMEN: Recommended as stowaways try to board at night.

SURVEYORS: Bureau Veritas, Lloyd's, Salvage Association.

CUSTOMS: Regulations are very strict, and a careful declaration of all bonded stores must be made before berthing. Ships have been fined for quantities in excess or missing even when small.

GENERAL: (a) Radiotelegrams stating the date and ETA at pilot station and addressed to SNIM Nouadhibou should be transmitted 72 hrs. and 24 hours beforehand via Nouadhibou coast radio station (5 TA) working hours 0800 – 1800 or Dakar (6 VA), hours: Continuous.

Shipmaster's Report: 1977. Telegrams to Agents through Dakar Radio 6 VA only.

(b) It is of interest to Pilots when coming on board, to know whether the ship is powered by a steam-turbine or diesel engine whether the propeller is left or righthand and if it is a variable pitch propeller, how she behaves when the engine is running astern.

DEVELOPMENTS: Extensions to the Mineral Port are being studied.

SHIPMASTER'S REPORT: 1975. Vessel 169,000 d.w.t.

Iron Ore Marine Loading Terminal:—

Approach to Cap Blanc and Baie du Levrier: Approach was from the Southward. From Dakar the course was laid to cross the 100 fathom line at 20° 04′ N., 17° 41′ W., this being a precipitous shelf, when crossed with D.F. bearings from the Radio Beacon at Port Etienne gave a reasonable fix. Vessel then steamed across the main flow of North/South traffic at quite a broad angle heading for the landfall buoy 6 miles West by South of Cap Blanc. A dense concentration of fishing vessels extending Westwards from Banc Vilmorin offered little hindrance to our landfall. The light of Cap Blanc lighthouse was visually observed in the pre-dawn darkness at 26 miles and radar contact of Cap Blanc was established at 23 miles. The landfall buoy fitted with a radar reflector, gave radar contact at 15 miles.

Pilotage: A Pilot boards in the vicinity of No. 2 Fairway Buoy from a black-hulled, white superstructure, 40 ft. high-speed motor launch with "Pilote" written on the side. VHF contact is made on Channel 16, working frequency Channel 14. Call "Nouadhibou Pilot". The Pilot, a Frenchman, had a good understanding of English and proved to be very competent. The transit inwards and through the Passe du Levrier was at half speed but the last mile towards the berth only an occasional Dead Slow ahead movement was made to maintain steerage way.

Tide/Currents: Berthing for large vessels is on the ebb tide with a Southerly set of about 1 knot. South of the headland the set is to the Eastwards again about 1 knot i.e. directly across the channel. Unberthing is made on the flood tide setting Northerly along the jetty again about 1 knot. Rise and fall is in the region of 1.6 m.

Wind: Ranges from North by West to North by East (May). During darkness it abated to about Force 3 but from early morning through to sunset gusted up to Force 6 causing a short steep sea to run. The Pilot stated that in August and September Easterly winds often occurred hence the placing of 2 mooring buoys about 1 cable off the berth to assist vessels warping clear when leaving.

Tugs: None available.

Quay: Stout cylindrical rubber fenders are chained to the sides of 2 floating pontoons laying to the quay face. An adequate number of bollards are placed along the length of the quay. 3 dolphins, connected by a catwalk, extend the Southern length of the quayside for ship mooring purposes.

Moorings: When approaching and lying off the jetty 2 motorised mooring boats will run ashore 1 synthetic fibre rope (no wire ropes at this stage) from forward and 1 similar rope from the Poop. Vessel is then to warp alongside with these 2 lines aided by helm and small engine movements. Once alongside a spring from the after extremity of the Poop is to be sent away and a forward spring. Vessel secured to the berth with 1 headline to a mooring buoy North of the jetty, 3 forward breast lines, 1 forward spring, 2 stern lines, 2 after breast lines 1 spring from the Poop, and 1 spring from the normal position on the after deck.

Gangway: The accommodation ladder could not be used because of the space between the pontoons lying between ship's side and the quay. A pilot ladder was the means of access to the after pontoon from which access could be obtained to the quay.

Depths alongside: At the first low water soundings were taken around the ship and when reduced to chart datum — obtained from a monthly tide table loaned by the Pilot – a least depth of 16.2 m. was found on the inboard side with depths generally about 18/19 m. elsewhere.

Draft: Maximum permitted for berthing 12 m. Maximum permitted draft for sailing is 16.16 m. (53 ft.) at any state of the tide.

Airdraft: Maximum 14.5 m. In our case several thousand tonnes of hold ballast had to be taken once secure alongside, this delayed loading for 5 hours.

Shiploader: This is a single conveyor belt fed gantry having a range of travel of 165 m. along the quay but the loading arm has no facility to slew horizontally. It can only be luffed in the vertical plane. The maximum outreach was stated to be 23 m. which combined with the airdraft limitation of 14.5 m. made it extremely difficult to plumb the centre of the holds. For the majority of our loading period the ship had a port list (this was exaggerated by the free surface effect of the 4 ballasted holds). To keep the loading arm from fouling the ship's structure and assisting the arm to plumb centre all the port side side-rolling hatch lids were only partially opened.

Shifting: This had to be done on 2 occasions but was successfully achieved by hauling on the 2 spring wires aft and 1 headline to warp a distance of 6 m. forward and heaving on the forward spring and stern lines to warp 26 m. aft. The shifting was necessitated by the fact that the distance centre to centre of our extreme loading hatches was 191 m.

Agency: This was conducted by SNIM, Societe Nationale Industrielle & Miniers, their telegraphic address is "Snimport – Nouadhibou".

Documents: Required are:
4 Crew Lists.
2 Stores Lists.
2 Crew Declaration Manifests.
2 Vaccination Lists.
3 Passenger Lists.
3 Ports of Call of the Last Month Lists.
2 Ballast Manifests.

The latter 3 lists can be made on 1 sheet of paper (in triplicate). No Maritime Health Declaration was asked for. All these documents were passed to the Agent, no Customs, Port Health, Immigration or Police visited the ship. Although some crew members were without Yellow Fever vaccination certificates this posed no problem with the Agent, he declared no vaccinations can be done here. Nor can the Derat Exemption Certificate be renewed.

Port Restrictions: The Agent warned that crew members could not use pounds sterling, U.S. dollars, Dutch guilders or other foreign currency ashore for fear of confiscation by the "authorities". The local currency is the Ouguiya, 100 of which are on par with £1 (approx.).

Port Capacity: The Pilot stated previous largest ships had been:

(i) *"Atland"* OBO Swedish 84,229 g.r.t.
(ii)*"Thor"* Bulk German 79,270 g.r.t.
(iii) *"Lilyprima"* OBO Italian 72,68 g.r.t.

However, our claim to be the largest vessel to call being 169,080 d.w.t. is unsubstantiated. The Agent claims a shipment of 139,000 metric tonnes is the largest cargo exported from the port.

Loading Rate: The installation foreman claimed a rate of 4,000 t.p.h. Our rate, allowing for the frequent short stoppages, was 2,813 t.p.h.

Ore: The grade "Siliceous Iron Ore Fines XBF" was extremely dusty. About 10 grades of ore are available from 3 different mines.

Water Density: From our observations at low water 1024 ozs./cu. ft. and at high water 1025 ozs./cu. ft.

Cargo Figures: All tonnages quoted this port are metric tonnes. Ship's figure was about 1,300 tonnes less than the shore quantity, however, the ship's figure was accepted and the foreman stated the shore installations were usually 1% high of the ship figure. Ship was loaded to the maximum draft of 53 ft. but a great deal of difficulty was experienced reading the draft due to the seaway.

Unberthing: This was carried out on the flood tide. Single up to the 2 spring wires aft, using small astern movements and helm movements which aided by the anchor will cant the head from the quay. When the anchor is aweigh, slip the springs and steam ahead of the jetty then using full ahead power and starboard rudder followed by full astern power the vessel is swung well within the turning area to head seawards.

Depths in Channel: Except for the area of the channel abreast Cap Blanc lighthouse where less than 1 m. beneath the keel the remaining parts of the channel showed 3 m. – 4 m. underkeel clearance.

Conclusion: It would appear impractical to enter ships of a larger physical size than ourselves at this port because of airdraft/outreach limitations, draft restriction and manoeuvrability problems. Although we were fortunate in having a trouble–free berthing and unberthing procedure serious problems could be foreseen if a vessel had a main engine failure or a sudden deterioration of the weather occurred during these manoeuvres.

SHIPMASTER'S REPORT: June 1978. The following is a brief account of the port which is in addition to the information supplied in the "Guide", which may be read as being correct. The port, formerly Port Etienne, is in Mauritania, I found travellers are afforded every courtesy. There are two flights per week from Paris via Air Africa who are very good. The flights arriving here on Tuesday and Thursday. The plane returning from Dakar Wednesday and Friday. Spare parts can be landed here and taken out to the ship with minimum of Customs formalities though it would prove to be an expensive exercise. It must also be pointed out that it is not always possible for the plane to land here due to high cross winds and resultant sand storms at the runway, in which case the plane then proceeds to Dakar direct.

Custom Authorities are most interested in the amount of foreign currency brought in as there is a strict levy on this, care must be exercised in this respect. They are also most interested in the stores on board the ship and these must be strictly accounted for precisely.

The town itself of which I did not visit is a separate community from the mining town itself. The mining town itself is self-sufficient and both French and Mauritanians live here. There is a hotel, which is practical and clean with reasonable food. There is also a club with tennis courts, a post office, power station and cinema and a hospital where major surgery can be carried out. There is also an oil refinery which is uncompleted. Refined products are imported via a modern berth. Bunkers and fresh water are available here but in limited quantities and I would imagine costly.

There are no tugs. According to the Agent wireless telegraphy may be used alongside the berth although there is a Telex ashore. I found the Agent to be most helpful.

I was assured that seamen joining or leaving here do not require a visa only a passport and discharge book are required, which I personally was never asked to produce.

The iron ore mine is approximately 650 miles from the loading berth, all the ore coming by rail and attacks are frequent by bandits and guerillas. This can cause lengthy delays to the ship as very little ore is stockpiled.

Loading is carried out by one loading arm which pours approximately 4,000 tonnes per hour. Weights loaded can be measured ashore and have proved to be quite accurate, however it is normally the practice to accept the ship's figures.

SHIPMASTER'S REPORT: September 1986.

Vessel: Ore carrier – 117,600 d.w.t.

Telegrams: Telegrams to our Agents (SNIM) were sent through St. Lys Radio in France, and were received without delay at the Agency.

Water: Requirement should be stated in the 72 hour notice of ETA cable.

Navigation: 2 Pilots working this port now.

Still no tugs available.

All buoys in the Approach Channel are unlit.

Buoys No. 1 and 3, (B.A. Chart No. 1699, 1983 edition), are missing.

Cape Blanc Lighthouse unreliable as extinguished at times.

Stowaways: The possibility of stowaways still exists. Local guards have been placed on the quay to stop unauthorised people from getting aboard, but it is recommended to have ship's crew as watchmen as well.

SHIPMASTER'S REPORT: August 1987.

Vessel: 24,750 d.w.t. 170 m. length.

Location of Oil Terminal: 20° 49.8' N., 17° 01.75' W.

Documents:

6 copies Crew List.
3 copies Crew Personal Effects List.
2 copies Stores List.
1 copy Health Declaration.

Ship's documents not required. Vaccinations not possible. It is not possible to renew the Derat Certificate.

Pilotage: Not compulsory. Pilot may be contacted on VHF Channel 16.

Anchorage: Location clearly shown on chart.

Approaches: Vessels should only approach the Pilot station and fairway buoy in daylight hours.

The buoys are in the positions shown on the chart but are incorrectly numbered and are not lit at night. The lighthouse at Cape Blanco was not working. However, the African Pilot Volume No. 1 and the chart provided sufficient information for safe approach.

Approaching without an efficient radar is not safe as the visibility is normally very poor and many fishing vessels may be in the area.

The Channel from the Pilot Station to the oil pier is dredged to 15.5 m.

Restrictions: Berthing and unberthing during daylight hours only.

Max. Size: Max. draft 15.0 m.

Tugs: Vessel berthed without tugs as none available.

Berthing: Dolphin type berth with 7 Chicksan arms connected direct to the shore.

Dirty ballast can be discharged ashore.

Fresh Water: Not available.

Fuel: Not available.

Delays: Strong winds may delay tankers berthing.

SHIPMASTER'S REPORT: September 1987.

Documents:

4 copies Crew List.
3 copies Stores List.
3 copies Crew Declaration.
3 copies Passenger List.
2 copies Ammunition List.
2 copies Stowaway List.
3 copies Ports of Call List for the last 30 days.
2 copies Health Declaration.
3 copies Vaccination List.
2 copies Currency Declaration List.

The above documents, especially Crew Personal Effects List, Bonded Stores and Steward's Stores and Provisions List should be correctly declared, otherwise vessel will be fined by the Customs and other authorities.

Pilotage: Pilotage is compulsory for vessels calling at Nouadhibou. Vessel should anchor one mile South East of Buoy No. 2 if she has to wait for berth. Constant communication with the Pilot is necessary in order to determine time for berthing. Agent could not be contacted by VHF.

Approaches: If approaching Nouadhibou during the night a vessel must be very careful as there are scattered fishing vessels in the vicinity. The fishing vessels of various nationalities are found up to 30 miles from the shore and their nets are obstructions to navigation. Navigational aids in this port are very poor, Cape Blanco lighthouse and the (7) channel buoys are not lit. Buoy "A" or the Sea Buoy has moved 1.5 cables N.W. of the charted position, the others are in their charted position. The top mark of Buoy No. 2 is broken and was difficult to identify at a distance greater than 3 miles. All the buoys in the channel are unlit. Master was informed by the Pilot that there would be no movements during the night and pilotage service will be rendered only during day time. It is recommended by the Pilot that vessels arrive at Nouadhibou during daylight.

Restrictions: Depth of water in the buoyed channel is 16.0 m.. This was monitored by our fathometer during the passage. On the Oil Berth the Pilot usually docks the vessel on slack tide, and normally port side to, using the starboard anchor with two shackles in the water. Services of the Pilot are good and satisfactory.

Communications: When the vessel is at anchor and waiting for berth communication with the agent and the terminal is difficult. If you call them on the VHF they never answer, the language barrier is the problem. The service of the Agent was poor, he did not meet the vessel even when it was berthed. At The time of our departure we waited over an hour for our Departure Clearance.

Health: Free Pratique is usually granted when the vessel is on the berth. Cholera and Yellow Fever Vaccination Certificates are required.

Tugs: Not available. Vessels with bow thrusters have no problems.

Tanker Berth: The tanker berth is constructed of light materials and cement, the floor of the platform is wood, the length of the berth is about 165 m. It has 6 loading arms of 8 in. diameter. The fenders on the pier are hard rubber supported with springs. Two mooring boats will assist with the mooring lines of the vessel being berthed. A five man mooring gang will receive the lines. Slops or dirty ballast can be received ashore at the refinery facilities. Only the Loading Master could speak a little English, so language is the main problem with the operations.

Fresh Water: Not available.

Customs: Only 2 Customs Officers boarded the vessel, they scrutinize every paper or document presented to them, especially Bonded Stores List, Steward's Stores List, and Personal Effects Lists. If a mistake is found they will start to talk about fines to the vessel. It is therefore advisable to itemise the Declaration of the Bonded Store, Steward's Stores and Provision, and Crew Personal Effects Lists in order to avoid fine or any other problems. During our stay in port the Customs Officers boarded three times.

Gangway: The vessel has to provide her own gangway as there is no shore or terminal gangway provided. Ship's personnel should keep a constant watch on the gangway during the change of tide as the current is very strong and the range of tide is about 5 ft.

SHIPMASTER'S REPORT: June/August 1989 (Updated 1994).

Vessel's ETA to be sent through Dakar Radio. Contact with Dakar Radio was extremely difficult.

Land was picked up 18.8 miles away. An almost Easterly approach was made. Navigational aids are poor.

Cap Blanc Lighthouse (5fl. 5s. 23M) is inoperative. Most of the channel buoys were unlit without top marks and rusty.

Contacting Nouadhibou Pilots on VHF is difficult. We were asked to anchor off Buoy No. 2 and we did so in position Lat. 20° 44.7′ N., Long. 17° 00.8′ W. After a day, we were taken to the inner anchorage, with Point Central bearing 347° × 1.7 miles, and awaited berthing on completion of vessel loading alongside Point Central. After spending 2 days at the inner anchorage, we were taken alongside.

Vessels should have *sufficient quantity of fresh water* as a long wait can be expected. The ship prior to us was at the anchorage for 15 days.

Berthing: Berthing is carried out during daylight, during ebb tide and is port side alongside.

There is one African Pilot and one Asian Pilot. The latter, who is the Chief Pilot, boarded our vessel. He was not very sure of himself and gave unnecessary helm and engine orders.

No tugs are available.

A mooring boat takes 2 head lines (nylon) forward and a breast line/spring aft. These are placed on bitts and vessel has to heave alongside. The starboard anchor is also used.

Final moorings: Forward: 4 head lines, 2 breast lines and 2 springs.
Aft: 2 stern lines, 2 breast lines and 2 springs.

On berthing, the Customs Officer boarded the vessel. He did not seal the bonded store and was not particularly interested in looking at any papers. The Agent boarded the vessel the next day, possibly because a curfew was imposed from 2000 hrs. to 0800 hrs. Loading commenced 20 hours after berthing.

The loader is 2 years old and is in good condition (1994). The loader can take an air draft of 14.5 m. and remains high above the hold. As the cargo is very dusty, it flies all over the place. By the time we left, the decks were concealed with this cargo.

Machinery breakdowns are very frequent and of long duration. It took us almost 3.5 days to load 75,000 tonnes. The ship's figures are always accepted. There is no cargo survey, but at the discharge port a cargo surveyor on behalf of the shipper boarded the vessel.

A sharp watch for stowaways was always maintained.

Fresh water (hard) is available alongside in small quantities (50/60 tonnes).

A pilot ladder is used to get on the wharf. A terminal bus is available every hour to go to the nearby town of Nouadhibou, which is free of charge. Taxis charge 200 Ouguiya. (U.S.$1.00 = 70 Ougiya). Only change money in the bank. Never have any transactions with the terminal people as this is viewed very seriously by the Authorities.

Further observations made during vessel's visit to Point Central (Mineral Berth) in August 1989:

Contact with Nouadhibou Pilot was extremely difficult as the VHF set in the Pilot's office is also shared with the Agent (SNIM). The radio is only switched on when the Pilot is in the office or wants to make contact with a ship.

Visibility is reduced to less than 2 miles most of the time due to the haze caused by the particles of the light ore being carried all over, by breeze, when loading is in progress.

We remained at anchorage for 11 days and alongside the berth for 4 days.

Although the loading rate of the ore is about 3,500 metric tonnes per hour, the machinery breakdowns delayed the loading.

Shore Leave: It is advisable to get the local currency as cash advance from the Agent, it can then be returned if unused. In order to change foreign currencies at the local banks, the Customs' approval must be given.

Shopkeepers and cabs quote high rates to foreigners, so bargaining is necessary.

Knowledge of French is quite useful.

SHIPMASTER'S REPORT: July 1990. Also see "Shipmaster's Report" dated July 1994.

Documents:
2 Crew Lists.
2 Vaccination Lists.
2 Personal Effects Declarations.
2 Currency Declarations.
2 Ship's Stores Lists.
2 Provisions Lists.
2 Bonded Stores Lists.
2 Arms and Ammunition Lists.
2 Narcotics Lists.
2 Cargo Manifests.
2 Passenger Lists.
1 Health Declaration.

Approaches: A large number of fishing vessels were encountered off Cabo Corveiro and Cabo Dubouchage, but they generally kept clear. The coastline is easily identifiable on radar.

Buoyage/Nav. Aids: B.A. Chart No. 1699.

No. 0 Buoy was missing. No. 2 Buoy was out of position. It was seen in approximate position 20° 42.75′ N., 17° 01.93′ W. The topmark was broken and missing. No. 1 Buoy was out of position, approximately 0.2 nautical miles S.E. of charted position. No. 3 Buoy was about 0.1 nautical miles off charted position. No. 4 Buoy was found in charted position. No. 8 Buoy was missing.

None of the lights for the buoys were working.

Cap Blanc Lighthouse light was not working.

Anchorage: About 1.5 nautical miles N.E. of charted position of No. 2 Buoy, around position marked on B.A. Chart No. 1699. Holding ground is good.

Winds: At anchorage and alongside berth, mainly Northerly winds Force 4/5 were experienced, tending to increase during late evening.

Pilotage: Compulsory. Pilot boards and disembarks between No. 1 and No. 2 Buoys. Pilot boat has a black hull and white superstructure, and has "PILOTE" written on the hull. Only 2 pilots are employed in the port.

Health: Free Pratique is granted on berthing. Quarantine officials did not board the vessel.

Customs: Bond locker was not sealed. Customs officer carried out a check of the bond locker and provisions stores.

Radio: All messages to agents had to be sent via St.Lys Radio (FFL), as Nouadhibou Radio could not be contacted at all. Agents advised that Dakar Radio was not reliable, and vessel to use only St.Lys Radio.

VHF: Pilots available on VHF only when working on ships, in daylight hours. Port Control answers only during early hours of the morning (0700 hrs. – 0900 hrs. approx.). Message can be left with pilots, requesting agents to call back on VHF.

Tugs: No tugs available.

Berthing: Vessels usually berth on ebb tide and sail on flood tide. Although the pilots do carry out these operations at other times, to avoid loader being idle. Usually pilotage is not done after nightfall. In case a vessel has to be berthed at night, the loaded vessel is removed from the berth, and anchored just off the berth, in inner anchorage.

Generally vessels are berthed port side alongside.

Starboard anchor is dropped, about one shackle in water, to assist in hauling off.

Mooring: Two mooring boats in attendance for berthing. Two head lines are sent first, followed by 2 back springs from aft. Total lines used were 4 head lines, 2 breast lines and 2 springs from forward; 2 stern lines, 2 breast lines and 2 springs from aft.

Restrictions: Maximum draft allowed for berthing is 12.0 m. Maximum sailing draft allowed is 16.15 m. Maximum air draft permissible for loader to top of hatch coaming is 14.0 m., although we found about 1.0 m. clearance at an air draft of 14.1 m.

Stevedores: Stevedores work around the clock.

Density: 1025 – 1026.

Fresh Water: Usually no fresh water available. We received a small quantity by fire tender. Fire tender capacity was 6 tonnes, and the water was very expensive.

Fuel: Usually none available. Agents advised that 50 tonnes – 60 tonnes of gas oil can be supplied by trucks in an emergency.

Watchmen: Compulsory. No stowaway problems due to presence of watchmen, according to agents.

Telephone/Fax: Telephone lines were not clear. Fax available, but messages were received garbled by Hong Kong office.

Surveyors: No surveyors available for cargo quantity surveys. Ship's figures accepted for Bill of Lading.

SHIPMASTER'S REPORT: July 1994.

Vessel: This vessel is a 148,000 tonnes d.w.t. bulk carrier (LOA 264.8 m., beam 46.03 m.) with 8 holds and hatches.

Information was obtained from Pilot, Agent and stevedores and is updating July 1990 Report.

Documents: Same, additionally "Nil" Stowaways (Currency Declaration not produced).

Customs: Speak little English but do speak French and Spanish.

They appear to read all papers produced to them carefully, then go to check bond and provision stores. Interested in food stuff and cigarettes. Bond not sealed.

Navigation Aids and Approaches: B.A. Chart No. 1699.

Cape Blanc Light is working, but weak, 3 – 4 miles. Most buoy lights not working and topmarks missing. Most buoys are bad radar targets due to swell and sea. Recommended track up to Buoy No. 2 should be followed and daylight approach is easier, due to numerous unlit small craft, fishing traffic and gear.

Sea buoy missing. Found one red buoy in position Lat. 20° 40.1′ N., Long. 17° 04.6′ W., no marks or light.

Buoy No. 1 in position but unlit, no marks.

Buoy No. 2 in position, unlit.

Buoy No. 3 missing, and a very small unlit buoy about 100 m. West in position.

Buoy No. 4 in position, but unlit.

Buoy No. 6 unlit, and about 250 m. West of charted position.

Buoy "M1" in position.

Buoy "M2" now in line East of "M1", but unlit.

Buoy "M5" in position, but unlit.

On loaded passage outward following the route, lowest sounding on echo sounder obtained off Buoy No. 3 was 1.5 m. on draft 16.15 m. with tide of 1.9 m. (speed 6 knots).

Anchorage: We were asked by Pilot to anchor 1 mile East of Buoy No. 2. Later "Cape Size" vessels anchored all round us, good holding ground.

Pilots: Board off Buoy No. 2 or anchorage when they take you straight to Buoy No. 1. Combination ladder 1.5 m. above water, lee side is normally port side. 3 local Pilots available. They speak sufficient English, are confident and do a good job in difficult conditions. They are helpful and take it easy on engines. They draw and explain mooring order of ropes and anchor. They suggest less than 12.0 m. draft for berthing. Keep watch on VHF Channel 16. They can normally be contacted on VHF between 0830 hrs. – 1200 hrs. or when ship movements are taking place. They do try and give sufficient berthing notice and contact Agent for you on VHF. Pilots depart between Buoys No. 1 and No. 2.

Berthing: Procedure same as previous Report (July 1990), though we berthed starboard side alongside to flood which is rare, early morning so no wind. If wind picks up, vessel is to abort mooring and re-anchor.

First set of 2 lines (forward and aft) must be long, on drums and synthetic for boats. Later mooring arrangement to bollards to make it easier for shifting vessel during cargo operations.

After unmooring, vessels normally do short starboard turn with engines and anchor N.E. of berth as Turning Basin only 1,000 m. Vessels are taken to inner anchorage, off Buoy "M1". If other vessels sailing, it is touch and go for tide, otherwise direct to berth. Berthing rotation changes suddenly, depending on grades you are to load, and availability. Thus a long anchorage can be expected, up to a month, though normally 10 – 15 days. A vessel who came 4 days after us berthed on arrival.

Tugs: None available.

Tide and Currents: Tide calculations and times as per B.A. Tide Tables sufficiently correct, though Pilot's local calculations as per experience was about 15 cm. less on H.W. Current as given in sailing directions was similar in direction and velocity.

Berth Information: Agent's information:

Depth LLW 16.15 m.
Tidal range 2.0 m.
Max. arrival draft 12.0 m.
Sailing draft 16.15 m.
Max. LOA 300 m.
Beam 46 m. (claimed to have loaded 50 m.).
Loader upgraded 1991.
Travel distance 165 m., max. reach measured on board 25.5 m.
Distance jetty to fender measured 9.7 m.
Throw up to about 5.0 m. (sufficient to load us properly).
Loading rate max. 3,500 tonnes/hr. (experienced 3,200 tonnes/hr. maximum, but normally many breakdowns).
Airdraft 14.00 m.
Sufficient bollards and fenders.
Boarding on vessel done off fenders on pilot ladder or gangway, if in position.
Stevedores board via the loader on the hatch cover.

Fresh Water: By trucks (up to 150 tonnes). Cost about U.S.$ 4.00 – 3.60 per 100 tonnes – 150 tonnes respectively.

Provisions: None. Provisions/stores come from Las Palmas by Ro-Ro.

Local fish and sea food can be arranged in small quantities.

Crew Changes/Spares: Agents advice – preferred via Las Palmas, as direct and less paper work and no visa required on Passport. Via Nouakchott need visa or CDC, and for spares someone from Agency has to go, with red tape and considerable delay and costs.

Vaccination: Possible at 7 days notice as vaccine to be flown in, so is costly.

Notice of Readiness: Time of arrival at Buoy No. 2 accepted, whether vessel able or unable to contact Pilot or Agent on VHF. To be sent on telex or via cable.

Bill of Lading and Draft Survey: No survey. Ship to do own and same figure accepted for Bill of Lading. Shore scale is said to be about 0.5% less. We got 1.7% less. With wind, swell and a current, especially at night, draft reading becomes difficult.

Stowaways: A problem exists. Watchmen on pier are strict (ships pay by pool). Agent and pilot information is that they come from sea side, up anchor or lines or ladders left overside and some times by grapnel. So normal watch and precautions to be taken at end of loading. Chief watchman comes aboard to search vessel with ship's staff and takes away a form and signs for "Nil Stowaways" and no liability.

Communications: Agent (SNIM Nouadhibou) received my messages on telex via Inmarsat, but never replied. He said to get action and reply better via SNIM Paris office (Agent: Telex: 974-4426. Fax: 2222-45237).

Stevedores keep watch on VHF Channel 6, and in port, call you on your working channel or vice versa.

AUTHORITY: Societe Nationale Industrielle et Miniere (SNIM), B.P. 42, Nouadhibou, Mauritania. *Tel:* 100, 114. *Telex:* 459 Snim Ndb, Snim 426 MTN. *FAX:* 45396/49027/49013. *Contact:* Mohamed Ould Boilil, Harbour Master/Chief Pilot.

NOUADHIBOU HARBOUR: 20.54 N. 17.03 W.

LOCATION: Position of Trading Port 20° 53′ 48″ N., 17° 03′ 10″ W.

DOCUMENTS:

3 Crew Lists.
2 Stores Lists.
2 List of Personal Effects.
2 Lists of Ports of Call.
Cargo Manifest, even if nil.
Manifest of Passengers Disembarking or in Transit, even if nil.
1 List of Foreign Currency held by ship and crew.

PILOTAGE: Not compulsory but recommended, effected by SNIM/Cominor. Pilotage not available at night.

RESTRICTIONS: Depth of buoyed Channel 24 ft. Anchorage strictly prohibited in the Channel.

RADIO: Nouadhibou Radio – Call sign 5TA. Hours 0800 – 1800 daily.

It is recommended that vessels advise their Agent of ETA 72 hours prior to arrival.

VHF: Request Pilot through Port Captain on VHF Channel 16.

TUGS: One tug, 150 h.p.

BERTHING: Pier of 125 m. length connected to shore by a 150 m. long bridge.

Outside general berth for ships with a 24 ft. draft and a 160 m. max. length. According to certain vessel's accommodations, the extreme hatches cannot be discharged through quayside.

Inside berth for ships with a 15 ft. max. draft and a 80 m. max. length.

The maximum payload authorised on the bridge connecting the pier to the warehouses and the storage areas being limited to 10 tons, all heavy lifts over 10 tons are to be compulsorily discharged on lighters.

Lighterage Piers: Southern Quay = length 80 m; depth 10 ft.
Western Quay = 180 m.; depth 10 ft.

The Southern Quay is connected to SNIM/Cominor railroad network, allowing the loading of heavy lifts on railcars.

2 covered sheds: total 3,500 sq.m.

1 area with macadamised roads offering 30,000 sq.m. of storage connected to SNIM/Cominor railroad system.

Lighterage: Compulsory for any ship whose characteristics do not allow a safe berth. Compulsory for any loading or unloading of heavy lift over 10 tons.

Not compulsory in case berths are occupied and if manpower and equipment are still available.

CARGO HANDLING EQUIPMENT: 1 lighter × 150 tons, 2 flat top lighters × 200 tons.

14 cranes × 4 tonnes.
2 cranes × 15 tonnes.
4 stacker trucks × 3 tonnes.
1 stacker truck × 8 tonnes.
6 tractors.
16 trailers.
1 rail mounted crane × 70 tonnes (SNIM Property).
1 mobile crane × 50 tonnes, available on request for heavy lifts.
2 cranes on rails for containers.

STEVEDORES:

Working Hours. Normal hours: from 0800 to 1200 and 1400 to 1800 from Saturday to Wednesday.

Overtime: Saturday to Wednesday: 1200 – 1400 hrs. 1800 – 2000 hrs. Thursday: 0800 – 2000 hrs. Fridays and holidays: 0800 – 2000 hrs.

Nightwork possible after 2000 hrs. in order to finish.

During the time of Ramadan work finishes at 1800 hrs.

There is no work on the following holidays: New Year's Day (Jan. 1); Tabaski (El Aid) (variable date); Day of Reunification, (Feb. 26); El Mouloud (variable date); Labour Day (May 1); Africa Liberation Day (May 25); Korite (El Fatar) (variable date); Independence Day (Nov. 28); Christmas (Dec. 25); 1st Moharam (variable date).

The holidays corresponding to the Islamic Religious holidays are calculated from Arabic calendar.

FRESH WATER: Available in small quantities.

FUEL: Available in small quantities.

SURVEYORS: Bureau Veritas, Lloyd's and Salvage Association.

CARGO GEAR: Ship's gear used.

GENERAL: *Winds:* Mainly N./N.E. in the morning, N./N.W. in the evening. Wind force: variable from August to January, rather strong from February to July. Tidal current running North during Flood, and South during Ebb (1.5 to 2.5 knots).

Swell: 0.80 m. max. Strong surge alongside all berths.

Rise and Fall: HW 2.35 m. LW 0.35 m. difference = 2 m.

AUTHORITY: Port Autonome de Nouadhibou, B.P. 236, Nouadhibou. *Tel:* 21-34, 22-35, 22-76. *Telex:* 441 Mtn.

NOUAKCHOTT: 18.02 N. 16.02 W. **(See Plan)**

NOTE: All information below, except the Shipmaster's Reports dated October 1987 and March 1988, is for the old port.

LOCATION: Nouakchott Wharf (old port) is situated in position Lat. 18° 02′ 08″ N., Long. 16° 01′ 43″ W., being about 7 km. S.S.W. of Nouakchott.

Vessels anchor off the port and movement of cargo is undertaken by barges and lighters.

WIND: The direction of the wind varies from N.N.W. to N.E. The predominant winds affecting navigation are from the N.N.W.

The rapid onset of bad weather should be noted. When conditions are bad vessels should weigh anchor and proceed seaward as the coast offers no natural shelter.

CURRENTS: There is an almost permanent North-South current running at about 0.5 knots; it reverses South-North on a few days during the year.

SWELL: 2 kinds of swell have been observed: Local swell due to the coastal winds, varying from North to N.W. in dry weather, and turning between N.W. and S.W. during the wet season.

ANCHORING ROADS CONDITIONS: The periods during which climatic conditions are liable to upset work are as follows: Strong swell, January/March; rain, July/August/September.

This virtually allows the port to be used during 200 days in the year.

WORKING CONDITIONS: Vessels must locate themselves as closely as possible, where they can anchor without risk, to the wharf, within the limits of their drafts (generally between 0.5 and 0.25 miles), in line. At the lighterage quay there is a depth of water of 7 m. – 8.5 m. It is preferable for a ring of lines to be placed in advance around the sides of the vessel to which barges may tie up.

Experience shows that the tonnage unloaded currently by the wharf is 400 to 500 t.p.d. where goods in sacks are concerned. It is possible to work 2 vessels at once, but each will only work half of this tonnage.

Work is currently carried out on board by private companies, and on land, in the launches and lighters by the Wharf Organisation personnel.

As far as wharf personnel are concerned, during working days, the normal working hours are from 0800 to 1600 hrs.

Overtime day hours are from 1600 to 1900 hrs.

Night time working is considered to apply between the hours of 1900 and 0600 hrs. (currently impossible).

It should be noted that there is an overtime hour at the beginning and end of work, which is the time required to launch or bring barges on to the landing-stage.

RECOMMENDATIONS TO MASTERS OF VESSELS: Vessels must be at all times capable of gaining the open sea rapidly, since bad weather comes up very quickly, and the coast affords no natural protection.

WHARF: The working platform is 86 m.×21 m. and lies in a N.W.-S.E. direction; it is connected to the shore by a gangway 246.5 m. length and 7 m. wide.

The wharf is designed to take a load of 2 lorries of 25 tons (2 axles of 10 tons and 1 axle of 5 tons) or an overload of 1 ton/sq.m.

The Wharf Manager's office together with Police, Customs and radio office are located on the shore.

FLOATING EQUIPMENT: 1 launch of 50 h.p., 2 launches of 100 h.p., 10 steel barges, internal dimensions 10 m.×3 m.×1.25 m. with capacity for 20 tons cargo. 1 steel barge, internal dimensions 13 m.×4 m.×1.35 m. with capacity for 30 tons cargo.
WHARF EQUIPMENT: 3 cranes with capacities of 20 tons, 8 tons and 5 tons respectively.
LAND EQUIPMENT: Goods are transported from the wharf to the storage area by 18 trailers each with a capacity of 8 tons. The port is also equipped with 2 tractors of 80 h.p. and 5 fork-lift trucks with capacity of 3.5 tons.
TANKERS: Dakar oil companies are presently building a hydrocarbon oil depot about 400 m. North of the wharf.

The depot will be fed from tankers by means of 2 sea-lines of 900 m. length.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Mauritanian Ouguiya (OM).

SHIPMASTER'S REPORT: August 1978 (Old Port).
The following is to be read in conjunction with the information above.
Currents: Reversal of current is unpredictable and may last for several days on each occasion.
Anchoring Roads Conditions: While in the main the holding ground is good, there appears to be patches of hard sand where the anchor cannot take hold.
Working Conditions: It is practical to work 4 vessels at once plus one of up to 5,000 d.w.t. at the new extension to the pier.

Present (August 1978) hours for ships at anchor are 0800 to 1600 hrs. (Ramadan) but Sunday overtime can be worked if vessel gives authority. It seems that this is very expensive as so many are involved.

At the pier extension work has been observed from 0800 to 2400 hrs. and a mobile crane is available there to assist ship's gear.
Wharf Equipment: There are 7 cranes with various capacities, two being used for lifting out barges for repairs and to house the tug launches at night. The mobile crane is backed up by some 8 small fixed jib carriers.
Tankers: The sea berth North of the pier is in operation.
Documentation: See "Nouadhibou".
Customs Control: The officer will not board until the Agent has entered the vessel with the necessary documents, hence there will always be a time interval between arrival and being boarded for inspection. So financial loss must be expected accordingly.
General Observations: Due to the lack of any VHF or similar communication system, it is difficult to assess the true performance of this port. It is most uncomfortable for any vessel of more than 7,500 d.w.t. unless the barges are prepared to come out to 7 or more cables from the pier. In the recommended anchorage the effect of swell and surf is such that the vessel frequently swings through a wide arc and the chances of breaking out the anchor are very real. The erratic current direction may also swing the ship towards the pier hence the above opinion. Other vessels may also anchor so as to swing across one's own cable and anchor.

SHIPMASTER'S REPORT: October 1979 (Old Port).
Anchorage: Vessel anchored in position Lat. 18° 02.2′ N., Long. 16° 02.7′ W.
(with the lighthouse tower on the jetty bearing 101° distance 3.3 cables).
General: City of Nouakchott (the capital) is in position Lat. 18° 05′ N., Long. 15° 58′ W. The port jetty is in position Lat. 18° 02.1′ N., Long. 16° 01.55′ W. being about 7 km. S.S.W. of the city. The official languages are Arabic and French. There are asphalt roads, one which leads to Dakar. There is an airport (close South of the city) with connections to Dakar and Casablanca. Scheduled flights being published in the daily newspapers.
Time: GMT.
Authorities: No authorities come on board on arrival, however, after a few days an agent's clerk comes on board and takes all port forms and documents ashore. No store rooms are sealed but stores list is to be filled in properly.
Documents: Two copies of each of the following are required:

(a) Crew List.
(b) Health Declaration.
(c) Vaccination List.
(d) List of Ports of Call.
(e) List of Arms and Ammunition.
(f) Ship's Register and Tonnage Certificate.
(g) Ship's Stores List.
(h) Crew's Personal Effects Declaration.
(i) Notice of Readiness/Manifest & Stowage Plans.

With regard to Notice of Readiness it is advisable to send cable via Dakar Radio. It is also advisable to ask the clerk for his identification card and ask him to sign a receipt for the above.
Shore Leave: Passports are needed for going ashore, only method of going ashore is by ship's own lifeboat or during working hours by the motor launches used for transporting barges.
Consuls: Germany, China and U.K.
Medical: All services can be arranged by Agent.
Stores: Limited amounts of vegetables, cereals, coffee (instant) and milk (condensed) can be arranged by agent (all items are imported). There is no ship chandler.
Repairs: No facilities.
Fresh Water: There is no possibility of supplying fresh water to vessels, therefore rationing of water is recommended on arrival due to the fact that turn of 30 – 40 days is normal for general cargo, bulk cargoes and bagged cargoes. Priority being given to vessels with cement cargo as construction of a new port is taking place 1.5 miles to the South. At most times there are 15 – 20 vessels at the anchorage.
Repatriation: Can be arranged by Agent via Dakar.
Weather: See "African Pilot", Volume 1 and supplements. During the time the vessel was at the port (mid-September to mid-October) there was hardly any rain. Temperatures ranged from 20°C to 42°C depending on the direction of the wind. The barometric pressure was 1008 mb. (min.) to 1012 mb. (max.). Winds normally from the North to N.W., being influenced by anticyclones in the Dakar and Casablanca areas. Occasionally winds were from the West, S.W., South, S.E. and East. The wind was from Force 3-5/6 for short periods which quickly caused deep swell and surf.

Easterly winds caused sand storms and visibility becomes poor.

The swell is reported to reach high levels in the first and last quarter of the year and vessels are advised to leave the anchorage when the rapid increase in wind appears. These winds come from two directions, namely, Northerly and Northwesterly.
Approaching/Pilotage: No Pilot available. Charts B.A. 3247 and B.A. 2078 Plan (1976/correction 1978). Vessels should approach the coast heading 090° from the 20 fathom line 9 miles to the West of the charted lighthouse (Chart B.A. 3247). The jetty is a good radar target at 37 – 40 miles and the radio beacon at Nouakchott "KC" on 297 kHz in position Lat. 18° 04.3′ N., Long. 15° 58′ W., is an excellent aid. The depths on this track are between 20 fathoms and a minimum of 30 ft., close to the shore line (0.25 miles offshore). There are no dangers or difficulties encountered approaching.
Navigational Aids: B.A. Chart 2078 Plan (1976/correction 1978) most charted buoys are not in correct position. The unlit wreck buoy in position Lat. 18° 01′ 32.2″ N., Long. 16° 02′ 48.8″ W., marks a wreck to the S.E., the wreck is not visible and the position is doubtful. For further information see the plan of the port made by the ship's officers.
Anchoring/Berthing: Anchorage is recommended in the area to the North of the green wreck buoy and between 0.25 and 0.5 nautical miles from the shore. A close anchorage is required during discharge to avoid long distances for the lighters and tugs. The jetty berth (N.W. end) could be used by vessels during calm weather and low swell. The berth is 52 m. in length and the jetty which runs in a N.W./S.E. direction is 86 m. long with a width of 21.17 m. If berthed alongside, good fenders must be available at all times and crew must stand by the mooring ropes.

Remarks: Receivers sometimes require a vessel to berth at the jetty but care should be taken, as if vessel causes any damage during the difficult approach or by swell, the authorities may sue the Master/Owners with high penalties and detain the vessel until payment is made. There has been an instance where a Master has been placed under "hotel arrest" and all papers and documents for the vessel kept ashore, resulting in a delay to the vessel of 40 days.
Stevedoring/Port Equipment: The stevedore company is So Ge Co Nouakchott, Societe Generale de Consignation.

The jetty wharf is connected to the shore by a 246.5 m. long bridge with two lanes each of 7 m. width. There is an old pipeline in the centre of the bridge between the two lanes. The bridge runs in a 104° direction to the shore. At the Southern side of the jetty-platform there are 7 cranes (one damaged) with lifting capacities of 12.5 to 25 tonnes.

There are 5 motor launches (50 – 100 h.p.) for towing lighters to and from the vessels. There are also 10 steel barges (lighters) with a capacity from 20 – 70 tonnes. At night the launches are lifted onto the jetty and the lighters are either moored alongside the jetty or at buoys.

In addition to the 7 cranes there are available on the jetty and wharf area 10 mobile cranes and 5 forklift trucks (3.5 tonnes) and 2 tractors for transporting goods on trailers (total 18), capacity of the trailers being from 8 – 20 tonnes.

Cargo is discharged into the barges and transported to the shore. Net slings mostly being used for bagged cargo and general cargo. There are stacking areas of 70,000 sq.m. and 45,000 sq.m. near the wharf. So Ge Co have 2 cold rooms (6 m. × 3 m.). There are 4 sheds, storage area 2,000 – 4,000 sq.m. capacity.

Signals: When loaded barges alongside the vessel are to be collected by the launches, vessel is to sound 2 long blasts on the ship's whistle.

Average discharge rate: Bulk cargo 7.5 tonnes per gang hour and bagged cargoes 15 tonnes per gang hour, however, this is dependent upon barges and launches. The average tonnage discharged per day/gang is for general cargo 15 – 35 tonnes and bagged cargoes 35 – 86 tonnes.

Working hours: Monday to Friday 0800 – 1600 hrs. Saturday 0800 – 1200 hrs. Sundays and local holidays are on overtime.
Note: It is compulsory that 1 hour prior to and 1 hour after working hours is counted as overtime for shore gear preparation.
Agency: Care should be taken when appointing Agents as agency fees, handling fees and port expenses can vary enormously.

SHIPMASTER'S REPORT: October 1987 (New Port).
Port: Port de L'Amitie.
Location: 3 miles South of Nouakchott Wharf.
Pilotage: Pilot (Chinese) boards between the first buoy and the wharf.
Anchorage: Vessel anchored 1.5 miles West of berth in a depth of 12.5 m.
Restrictions: No berthing on Friday.
Max. Size: Depth alongside 10.0 m. Vessel entered and sailed with a draft of 8.6 m. To the West of the port entrance there is a depth of 11.0 m.
Radio: ETA messages sent via St. Lys. It is not possible to telephone Nouakchott direct or through Nouadhibou Radio.
VHF: The Port Captain (Chinese) located at Nouakchott Wharf, 3 miles to the North, is on Channel 16 from 0800 hrs. – 1400 hrs. (except Friday). They will advise pilot and tugs of vessel's ETA.

The Agent (Compagnie Mauritanienne de Navigation) is on Channel 16 from 0730 hrs. – 1530 hrs. (except Friday).

Pilot and tugs on VHF when working.
Tugs: 2 tugs available.

Berthing: The approach jetty runs East–West and is 700 m. in length. The wharf at the western end is 585 m. long and 100 m. wide and lies in a NE'ly–SW'ly direction (060° – 240° T). The depth alongside is 10.0 m. The jetty head (length 100 m.) is protected from swell from the West.

Two buoys mark the land-side of the port limits. The wharf has an open storage shed of 50 m. length.

Stevedores: Fairly good at handling containers.

As there is a heavy swell it is preferable to use steel wire slings. Ship's derricks used as no shore facilities. Containers loaded direct on to lorries at Nouakchott Wharf (6 km.), by forklift trucks and transported to the berth.

Stevedores work from 0800 hrs. to 1700 hrs. with the possibility of overtime. No work on Friday.

Documents: Usual Declarations required plus a Foreign Currency Declaration. The Agent takes all documents ashore.

Customs: Customs make an inspection but do not seal any of the stores.

Port Captain: The Chinese Port Captain checks all Safety Certificates.

General: The port presents difficulties when there are strong trade winds as the vessel is poorly protected.

Because of the swell, the sea can come over the open storage area. Mooring should be frequently checked.

SHIPMASTER'S REPORT: March 1988 (New Port).

Please Note: The following Report translated from French.

Approaches: Coming from the North, landfall at 18° 02.5′ N., 16° 28′ W., then steer 100° to come to the South of the new port.

At 20 miles from the coast weak echoes from the town and a few buildings close to the pylon in position 18° 08.5′ N., 16° 00.5′ W. observed on the radar.

At 15 miles echoes from the new port and the old wharf appear. The coast only appears at 9 miles on the radar as the coast is dunes and swamps.

In the event of electricity power failure in the town, only the light at the end of the new port operates. This light was observed at 5 miles. This small lighthouse is a white pylon of concrete, about 10 m. high, and with a white light on top (2 secs. on, 3 secs. off).

The new port is 2.6 miles to the South of the old wharf (See "Plan" – "radar picture at 6 miles"). On land to the N.E. of the access to the port is a modern lighthouse with white and black stripes (see "Plan"). The light is Iso. white (5 secs. on, 5 secs. off). Height 37.1 m., range 16 miles (information obtained from authorities).

It is possible to distinguish an approach alignment (085°) formed by two iron pylons on top of which is a white and red diamond formation, and carrying lights (see "Plan" — "radar picture at 1.5 miles"). On this alignment and at 1.8 miles from the jetty, was a landing buoy (disappeared). The alignment brings the vessel close to the jetty.

Pilotage/Tugs: Pilot and Port Captaincy contacted on Channel 16. If entering, the Pilot requests vessels to anchor between 0.5 – 1 miles from the jetty(s). It is preferable to remain to the S.W. of the jetty at 0.8 miles. Depth of water from 9.0 m. – 10.0 m., and this for short duration of anchoring. The Pilot comes onboard when anchoring, and comes with a tug. The tug ties up near to the pilot ladder.

Do not lower the anchor until the pilot is on board (fairly long operation).

The port has 2 tugs of 980 h.p. (theoretical power), but they barely make 500 h.p. A single tug operates, and has a mixed Chinese-Mauritanian crew. There is one Chinese pilot and 2 Mauritanian trainee pilots.

NOTE: In the event of anchoring for a long time, remain in depths of 12 m. – 15 m., towards the old landfall buoy, at the North axis of the channel. No entry or sailing at night.

Port: A long arm of 750 m. is aligned East-West, followed by a 580 m. mole with 3 berths. This mole is equipped with red coloured cranes, of 10 tons lifting power. The mole runs at 240°. An 80 m. long breakwater orientated at 190° and formed by concrete blocks extends from this mole. Near to the end of this breakwater is the little white lighthouse (2 secs., 3 secs).

On land near to the access to the arm are 4 large light green sheds and a container park.

Two yellow-black and yellow-black-yellow buoys indicate the sand bank in the port. The marks are respectively N. and W. The indicator of the North buoy is partly broken away. Buoys are not lit.

Fairly strong undertow is experienced in the port, and vessel rolls almost continuously whilst at the quay. There are good fenders along the quay.

SHIPMASTER'S REPORT: August 1989 (New Port).

The new port, named "Port of Friendship", has been in operation since November 1987. The centre of the jetty is located in position Lat. 17° 59.35′ N., Long. 16° 02.1′ W., 15 km. S.S.W. from the capital city Nouakchott. The jetty is 585 m. in length and is 45 m. wide and lies in a 240°/060° direction and is connected to the shore by a 750 m. × 13 m. long bridge which lies in a 270°/090° direction.

There are 3 berths on the jetty:

No. 1: 149 m.	Min. depth	9.8 m.
No. 2: 168 m.	Min. depth	10.0 m.
No. 3: 190 m.	Min. depth	10.3 m.

The port is designed to import and export 500,000 tons per year.

The jetty is equipped with 2 gantry cranes of 10 tons' capacity each, but handling of cargo is normally by ship's gear.

There is a breakwater from the N.W. corner of the jetty, extending about 200 m. in direction 200° (See "Plan"). A light beacon has been established at its S.W. extremity.

Two yellow buoys mark the East and South extremity.

One mooring buoy lies between the Naval Berth and extreme East buoy.

There is a pair of leading lights with diamond top marks in line 080°.

Several buildings, warehouses and 42,682 sq.m. of open storage area are located about 1 km. East of the jetty wharf.

The Port Office lies close South of the port gate.

The Pilot Station is on the N.E. corner of the jetty, near Berth No. 1. Two tugboats of 900 b.h.p. each berth alongside Berth No. 1.

A naval berth is under construction on the South side of the middle of the jetty bridge.

The main lighthouse, a white round tower with black bands, about 35 m. high, lies 200 m. N.N.E. of the extreme East of the bridge (approximate position Lat. 17° 59.5′ N., Long. 16° 01.5′ W.).

Anchoring is recommended in the area 1 mile West of the breakwater in approximate position Lat. 17° 59.3′ N., Long. 16° 03.2′ W. with depth 12 m., a sandy bottom and good holding ground. The current runs at less than 0.5 knots, ship's heading is nearly always against the wind. There are no dangers or difficulties encountered when approaching the anchorage. Occasionally, there are one or two vessels waiting to berth.

Normally, one tug assists vessel to berth or unberth, but in daytime only and in good weather. During bad weather with wind from S.E. – S.W. at Force 6 or more, the vessel may have to stay on the berth, even if cargo work has been completed.

The predominant swell is Northwesterly. It always affects the berths and causes vessels to range continuously. It is therefore important that double springs are used fore and aft and that spare lines are ready when bad weather is forecast. The records show that in the Winter of 1987, a vessel broke 21 ropes during strong Northwesterly winds, after which she left the berth to anchorage for safety.

Easterly winds cause sand storms and visibility becomes poor, sometimes as low as 20 m.

Handling rate: Average discharge rate for bagged sugar, wheat or cement is 20 – 25 tons per gang/hour, tea in cases 10 – 15 tons per gang hour and other general cargo averages 10 – 20 tons per gang/hour, however this is dependent upon the trucks and gangs.

Cargo is discharged from the ship and reloaded into the trucks at the same time, thence directly to the city. These trucks have a capacity of between 10 tons – 30 tons.

Net slings are mainly used for bagged cargo and general cargo.

Work is in 2 shifts per day: Day shift from 0800 hrs. – 1800 hrs., with 1500 hrs. – 1800 hrs. on overtime. Night shifting is 1800 hrs – 0530 hrs., all on overtime which is arranged and approved by the ship.

Friday is a holiday, but work is possible at overtime rates if vessel gives approval. Saturday and Sunday are normal working days.

Documents: See "Nouadhibou".

Customs control: For Chinese vessels the Port Officers do not board on arrival. They may board later to see the vessel but do not seal the bond. The Agent boards the ship to bring back the necessary documents after berthing. For other foreign vessels they will board ship after berthing and seal the bonded store as usual. They may take away some ship's certificates for checking and return them to the ship before sailing.

There is no stealing among the stevedores, even when discharging general cargo and there are no shore watchman here.

VHF: Port Control on Channel 16, working 24 hours a day. Pilot Station on Channel 6, working when berthing and unberthing only.

Berthing sometimes delayed when not ready in time.

There are 2 Chinese Pilots and 3 local apprentices.

Supplies: No ship chandler available. Limited provisions can be supplied through Agent. Fresh water can be supplied by water tank through Agent. Each tank has 13 tons capacity, average rate 10 t.p.h. (daytime only). Good quality but expensive, U.S.$12.00 per ton.

Repatriation: Can be arranged by Agent. Regular airlines to Dakar and Casablanca.

Medical: Can be arranged by Agent.

Shore Leave: Permitted. Passport or Seaman's Book required.

Fishing: Plentiful fish in the port and anchorage. Fishing is allowed on board only.

AUTHORITY: Monsieur le Directeur du Port de Nouakchott, Ministere de l'Equipement, Nouakchott, Mauritania.

Societe Nationale Industrielle et Miniere, P.O.Box 1260, Nouakchott. *Tel:* 522-74, 523-29. *Telex:* 551 Snim Nkc.

AGENT: Societe Mauritanienne de Peche et de Navigation (S.M.P.N.), Route de l'Aeroport, B.P. 40254, Nouakchott, Mauritania. Tel: 253638, 253703. Telex: 5847 MTN SMPN. Fax: 253787.

Mauritius

PORT LOUIS: 20.09 S. 57.30 E. (See Plan)

PORT LIMITS: The commercial area of the port is the area inside the port bounded by the Entrance Buoys and the shore line of the Inner Harbour. Vessels at the Outside Anchorage lie within the limits of the port defined by an imaginary line joining Pointe Aux Sables and Pointe Aux Piments. In this area commercial activities are restricted to bunkering, ship repair and the landing of passengers or personnel.

PILOTAGE: Compulsory for vessels over 100 n.r.t. Vessels are piloted inwards and outwards at any time of the day or night if circumstances permit. Inward bound vessels are met about 1 mile (1.6 km.) seaward of the Entrance Buoys though they may, in some circumstances have to be boarded at a greater distance offshore.

Both anchors should be ready for use and ships' lines prepared.

Anchors are often used to assist in turning vessels.

ANCHORAGES: Open roadstead with anchorages for vessels of any draft. Admiralty Chart No. 713 refers.

RESTRICTIONS: Vessels carrying highly inflammable products are only berthed during daylight hours.

MAX. SIZE: Harbour Entrance depths from 12.8 m. to 36.3 m. Channel dredged to 12.1 m. Also see "Berthing".

HEALTH:

1. Free Pratique by Radio.
2. Applications should be submitted to Port Health Inspector 48 hours prior to arrival of vessel by Agent.

Following Information Required:

I Name of ship.
II Expected time and date of arrival.
III First port of loading, i.e. port of departure.
IV Last port of call.
V Has any case of contagious disease, or of sickness suspected to be of a contagious nature, occurred on board during the last 15 days?
Indicate the number of cases of contagious disease(s) occurring.
VI Has any case of death from sickness due to contagious disease(s) or otherwise occurred on board during the voyage? Indicate the number of deaths from sickness due to contagious disease(s) or otherwise occurring on board during the voyage.
VII Does the ship have a ship's surgeon on board?
VIII Number of crew (including Master) and number of passengers.
IX Indicate the number of crew members or passengers disembarking.
X Does the ship have in its possession a Derat Certificate or a Derat Exemption Certificate, also mention the date of expiry.

RADIO: The Port Master requires to be notified of the date of the vessel's arrival, the length and draft and purpose of call, by radio as soon as it is possible for Master to communicate with Harbour either:

1. By CW transmission through the Government Radio Station (3 BA) at Vacoas on 500 kHz.
2. By R/T transmission through Port Louis Harbour Radio Station (3 BB 3) on 2182 kHz.

VHF: Port Louis Harbour Radio Station is equipped with VHF and maintains 24 hour watch on Channel 16.

TUGS:

(i) 2,670 h.p. for deep sea towage and salvage. Fitted with fire fighting equipment, SSB and VHF.
(ii) 2,620 h.p. for deep sea towage and salvage. Fitted with fire fighting equipment, SSB and VHF.
(iii) 3 smaller tugs of 320 h.p. available for harbour work and fitted with VHF.

BERTHING:

Quay No.1: Length 122 m., maximum draft 11 m. at any state of tide, vessels up to 183 m. overall length can be accommodated. This berth is designed mainly for discharging petroleum products, ammonia, bulk fertiliser and coal. General cargo vessels and passenger ships are occasionally berthed at the Quay. Maximum water displacement limited to 33,000 tons.

Ships approaching the berth from seaward in daytime are swung to port with the aid of tugs and berth starboard side to the quay. At night the berthing is always port side-to. The ship will be turned in daytime when leaving the port.

As winds are often fresh, and passing traffic can cause surging. Moorings should be carefully tended.

There is little or no resilience in the fendering rubber rollers so heavy landing must be avoided.

Quays No. 2-3: Aligned quays having a total length of 366 m.; maximum draft 11.0 m.; vessels up to 195 m. overall length can be accommodated. Berth No. 2 is used for general cargo operations whereas Berth No. 3 will be restricted as far as possible to container operations.

Quay No. 4: (Container Terminal): Length 183 m., can accommodate vessels up to 220 m. LOA, maximum draft 11.0 m. This berth is used exclusively for container operations. A Park of 6.6 hectares is available for stacking of containers.

Equipment:

3 × 35 tons Hyster (4 high).
3 × 35 tons Lancer Boss (4 high).
3 × 35 tons Lancer Boss (3 high).
3 × 32 tons Hyster (3 high).
2 × 26 tons Hyster (2 high).
1 × 18 tons Hyster.
2 × 10 tons Hyster. } Empty
2 × 7 tons Hyster. } Containers.
1 Ferranti 2K90 – 40 Tons.

Vertical operations carried out by ship's gear. Horizontal transfer carried out by tractor/trailer system.

Quay D: This is a multi-purpose berth. Length 149 m., maximum draft 9.4 m. can take a vessel up to 183 m. overall length. This berth is used mainly for discharging of petroleum products, edible oil, bulk wheat and loading of molasses.

Passenger vessels are also berthed alongside the quay.

Wire moorings will be accepted, but for the ease of handling, fibre/synthetic tails are preferred.

Cautionary Advice:

(a) The quay is of concrete construction protected with modern rubber fendering. The fendering is not resilient and heavy landings must be avoided.
(b) The berth is little affected by passing traffic but fresh offshore winds may be experienced, especially during the afternoon.

Quay C: Length 121 m., maximum draft 5 m. Berth can take a vessel of up to 92 m. length berthed port side to. This berth is used mainly for the inter-island trade and discharge of cattle.

Sugar Terminal: Vessels up to 198 m. overall length can be accommodated at the terminal. Maximum draft for vessels loading sugar is 11 m. Two sheds capable of storing 175,000 tons of sugar each have been constructed. The Bulk Sugar Terminal is operated by the Mauritius Sugar Corporation. Maximum loading rate 1,400 t.p.h.

Facilities are also available on this quay for fuel oil discharge, which is connected by pipeline to storage tanks for the power station.

Ships approaching the berth from seaward are swung to starboard with the aid of tugs and berth head out.

Winds are often fresh and passing traffic can cause surging so moorings and anchors, if used, should be carefully tended.

Cement Dolphin: A bulk cement discharge point lies between Quay Nos. 1 and 2. Cement vessels up to 135 m. are regularly accommodated at this berth. Vessels up to 183 m. may be occasionally accommodated subject to adjacent berths being vacant.

Buoy Berths: 1 berth – LOA 195 m., draft 11.0 m.
1 berth – LOA 150 m., draft 11.0 m.

Vessels are berthed/unberthed at any state of tide. Tidal range is about 0.8 m. maximum.

Fishing Quay: Length 162 m., maximum draft 5.0 m. Berth can take vessels of up to 70 m. length. New Fish Quay – Length 185 m., draft 5.5 m. Vessels of up to 90 m. length can be accommodated.

SPECIALISED CARGO HANDLING FACILITIES: The following types of bulk cargo are provided with specialised handling facilities:

(i) Petroleum Products.
(ii) Fertiliser.
(iii) Sugar.
(iv) Bitumen.
(v) Tallow/Caustic Soda.
(vi) Maize.
(vii) Cement.
(viii) LPG.
(ix) Liquid Ammonia/Tallow/Caustic Soda.
(x) Soya Bean.
(xi) Coal.
(xii) Molasses.

The Container Terminal provides for a fully fledged container service with the exception of quay cranes. However, private shipping companies are allowed to use quay cranes if available.

STEVEDORES: Undertaken by the Cargo Handling Corporation Ltd. (CHC Ltd.).

Working hours: Monday to Fridays from 0700 to 1500 hrs., Saturdays from 0700 to 1300 hrs. Sundays and public holidays from 0700 – 1100 hrs. Overtime work is carried out during weekdays as well as on Sundays and Public Holidays if necessary. However, a double-shift system has been introduced at Berth No. 4 with the following working hours:

Mondays to Fridays:	1st shift – 0700 hrs. to 1500 hrs. 2nd shift – 1500 hrs. to 2300 hrs.
Saturdays:	No shift – 0700 hrs. to 1800 hrs.
Sundays:	No shift – 0700 hrs. to 1100 hrs.

Operates extended hours if and when required up to 2100 hrs.

TANKERS: There are no deballasting or slop facilities.

Bulk Sugar Terminal: Fuel oil is discharged through a single 8 in. hose with ASA bolted flange which forms the link between ship's manifold and the jetty. Ships' derrick should be plumbed mid-manifold for lifting the hose. Weight approximately 2 tons. Bunkers are supplied through the same line.

Quay D: 2×12 in. pipelines run under the quay, one for fuel oil which goes to Shell Depot only, and one for all other products. One or two 16 in. hoses can be used to link each line to the ships' manifold (ASA bolted flange).

There is also an LPG line to the Shell Depot, Elf Antagaz and Esso from near the end of the quay, but this is only used for very small ships. LPG vessels carry up to 1,300 tons.

Quay No. 1: Cargo transfer facilities are not permanently installed on the jetty. 8 in. hoses are carried to the quay when required and connected to the single pipeline which is buried in the quay. No water flush of the line is required between the products. Max. rate for gas oil is 700 t.p.h. Max. rail pressure 100 p.s.i. Max. rate for Mogas 600 t.p.h. at the same pressure as gasoil.

Also see "Berthing".

MEDICAL: Arrangements for medical attendance should be made through ship's Agent. Private clinics available.

FRESH WATER: Fresh water supplied by barges at any berth between 0700 hrs. and 1600 hrs. Arrangements can be made for supply before 0700 hrs. and after 1600 hrs. on payment of overtime. The loading rate is about 25 – 30 t.p.h. 4 barges of 50, 75, 85 and 110 tons respectively are available.

REPAIRS: Almost any type of repair can be undertaken in Port Louis.

DRY DOCK: Stevenson Dry Dock. Largest vessel that can be docked: 100 m. × 15 m., with a max. draft of 9.0 m.; vessels of up to 109 m. × 15.3 m. can also be docked, but at least 15 days' notice should be given.

FUEL: Gas oil, marine diesel and furnace oil obtainable. (Arrangements must be made in advance between Owners and Shell or Caltex). The pumping capacity of the installations at Port Louis for furnace oil is between 150 t.p.h. and 200 t.p.h., and for marine diesel oil and gas oil 50 t.p.h. Marine diesel oil and furnace oil (35 secs. to 1,000 secs.) is supplied at Quay D. Gasoil – Quays C, D, 2, 3, 4 and Trou Fanfaron Fishing Port. Marine diesel – Quays 2,3,4 and D. Furnace oil – Quays 2,3,4 and D.

A 400 ton bunkering barge is available to supply vessels in harbour and outside anchorage.

CONSULS: *Consulates:* Australian, Austrian, Belgian, Canadian, Danish, Dutch, Finnish, German, Norwegian, Portuguese, Spanish and Swedish.

Embassies: Egyptian, French, Malagasy, Pakistan, Peoples' Republic of China, Russia and U.S.A.

High Commissions: British and Indian.

TIME: Local time GMT plus 4 hours.

HOLIDAYS: Public Holidays for 1994:

New Year	Saturday	1st January
New Year	Sunday	2nd January
Thaipoosam Cavadee	Thursday	27th January
Chinese Spring Festival	Thursday	10th February
Maha Shivaratree	Thursday	10th March
National Day	Saturday	12th March
Id-El-Fitr	Monday	14th March
Ougadi	Monday	11th April
Labour Day	Sunday	1st May
Ganesh Chaturthi	Saturday	10th September
All Saints Day	Tuesday	1st November
Divali	Thursday	3rd November
Christmas	Sunday	25th December

POLICE/FIRE: Police Tel: 999. Fire Tel: 240-3741.

GARBAGE DISPOSAL: Collection service is available. Drums or skips are not provided on board or alongside. Tel: Port Louis Harbour Sanitary Services 2126710.

Charges: Garbage up to 6 cu.m. on normal days: Rs2,000, on Sundays: Rs4,000.

Collection time: Normally between 0700 hrs. and 1100 hrs.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Merchant Navy Mariners Club, Joseph Riviere Street, Port Louis. Tel: 2422617. Facilities available: Postage facilities, all currencies exchanged, football matches arranged, paperback books exchanged, Honorary Chaplain appointed by Flying Angels Mission to Seamen available at the Club, a fully stocked bar with bar snacks available from 0900 hrs. to 2300 hrs. everyday. Attractive outdoor lounges with badminton, table tennis, darts and usual club games available.

CURRENCY: Mauritian Rupee (M.Rs.). U.S.$ 1.00 = M.Rs.17.00 (14.7.94).

DEVELOPMENTS:

(1) Rice Handling Complex.
(2) Extension of Quays A and D to accommodate vessels up to 40,000 d.w.t.
(3) Construction of liquid cargo/cement berth at Mer Rouge.
(4) Construction of a 3,000 sq.m. building (6 floors) for the Marine Department.
(5) Construction of a new Container Terminal.

SHIPMASTER'S REPORT: June 1982. (Updated 1990).

Off Limits Call for Stores, Mail and Crew Changes:

Documents: (All local forms – IMO standard documents in use(FAL conv. 1965)).

1 Parcels List, 1 Shipmaster's Report Inwards, 1 Ship's Record, 1 P.F. 102 – Certificate Finder Act No. 20 of 1973 for Immigration, 1 Maritime Declaration of Health, 1 Crew Declaration, 4 Crew Lists.

Anchorage: Possible but not necessary for the 2 hour stop.

Max. Size: No limit.

Health: Vessel is boarded by 2 Quarantine Officials who grant Free Pratique.

Radio: An amended ETA had not been received 6.5 hours after transmission.

VHF: Port Louis Harbour Radio very helpful and will pass messages. We were not able to contact them until about 30 miles to the West.

General: Vessel is also boarded by, 1 Customs Official, 1 Immigration Official and the Agent. After entry formalities are completed the ship-chandler boards together with any new crew. Despite cabled request our stores were not pre-slung and had to use ship's net slings. Require derrick amidships for stores and good lee, usually port side. Stores' boat is separate from Officials' boat.

SHIPMASTER'S REPORT: July 1982 (Updated 1990).

Port Limits: The commercial area of the port is the area inside the port bounded by the Entrance Buoys and the shore line of the Inner Harbour. Vessels at the outside anchorage also lie within the limits of the port defined by a line joining Pte. Aux Sables and Pte. Aux Piments. In this area commercial activities are restricted to bunkering, ship repair and the landing of passengers and personnel.

Documents: Immigration: 2 Crew Lists, 2 Passenger Lists, 1 Certificate under Act No. 20 of 1973 (Form PF102).

Health: 1 Declaration of Health, 1 Vaccination List.

Customs: 1 Customs Form (Form F24), 1 Parcel List (Form F17), 1 Ship's Report – Inward, 1 Narcotics List, 1 Arms and Ammunition List.

Agent: 2 Crew Lists, 2 Passenger Lists, 1 Ship's Record – Port of Port Louis.

Note: Declare ship's cameras, VHF's, TV's, etc. in bonded section of F17. If space allocated on F17 for crew "other items" is insufficient, use of a supplementary list is acceptable.

Clearance: Health, Customs and Immigration board on entrance. Clearance may be obtained at the Outer Anchorage but is subject to availability of personnel and may be limited to the purposes of anchoring listed in "Port Limits" above.

Approaches: Approach directions are well covered in the Sailing Directions and Chart No. 61592. The Citadel is easily recognised from considerable distance during the day. Closer in, the middle and upper ranges are visible, but the separation is not sufficient for good accuracy. The lower range is an orange daymark, located on the red roof of the Port Office, both faded to a rust colour. It is very difficult to locate and can be confused with the daymark on the light located on "B" Berth. The Northern red can buoy is large and makes a good radar target. The Southern BW is of skeleton construction and is subsequently harder to pick up visually or with radar. There is a tidal current that sets across the channel and at right angles to it.

Pilotage: Compulsory for vessels over 100 g.r.t. Vessels are piloted inwards and outwards at any time of day or night if circumstances permit. Inward bound vessels are met about 1 mile seaward of the Entrance Buoys. The pilot boat is a white launch with a deck height of approximately 4 ft. There are only 4 Pilots, so movements may be delayed by congestion and night entrance curtailed.

Anchorage: Open roadstead with anchorages for vessels of any draft. Consult Chart No. 61592.

Radio: Government Radio Station 3BA at Vacoas is on 500 kHz. and also has high frequency Channels. Port Louis Harbour Radio Station has 2182 kHz. and VHF Channel 16. They do not have regular traffic lists but are easily reached, particularly around weather reporting times.

The Port Master requires to be notified of the date of vessel's arrival, length, draft and purpose of call, by radio, as soon as practical with the above stations.

Tugs: 2 tugs of 830 h.p. and 3 smaller units of 320 h.p. for inner harbour work, and one new multi-purpose high powered tug of 2,670 h.p.

Berthing: There are numerous speciality docks and berths for smaller vessels. The main deep-draft berth has 2 sheds for unitised and general cargo with one open container section. This new dock has excellent fenders but the older docks have virtually nothing. Bagged goods are generally worked into lighters at mooring buoys.

When berthing to buoys, the vessel is berthed head-out on 2 anchors with additional headlines to a buoy. The stern is secured to the buoy by 4 ship's lines and a heavy shore wire. A messenger is necessary for taking the wire, and lashing straps to tie the eyes to the mooring rings must be supplied by the ship. The wire is taken through the centre stern chock, and one set of bitts must be kept free for it. Chafing gear on stern lines is advisable. Vessels berthed at the container berth may be required to send 4 lines to a buoy about 100 ft. off the corner of the dock.

Medical: Medical and dental facilities are available with arrangements to be made through the Agent. Repatriation can be arranged. Radio Pratique is not available. Cholera and yellow fever vaccinations are required for arrivals from infected areas.

Consuls: The U.S. Embassy is located about 200 yards outside the main harbour gates and is easily recognised. The office is on the 4th floor of Rogers House. Working hours are 0900 – 1200, Monday – Friday.

Watchmen: 3 shifts: 0700 – 1500 hrs., 1500 – 2000 hrs. and 2000 – 0700 hrs. Number is at discretion of ship, but heavy pressure is applied to the Chief Officer to employ extra, claiming these are "normal" or "routine". If cargo is *free out,* watchmen are hired and paid by receivers, with vessel only providing meals. Quality is poor to fair. If vessel is at Outer Anchorage, no watchmen are available. There have been frequent incidents of thefts by bum-boats, so an adequate crew watch is recommended.

Customs Allowance: On arrival, officers and crew may have in their possession, an 8 day allowance of tobacco products and 4 day allowance of spirits per daily schedule of: Master: 1 oz. tobacco, 0.25 pint of spirits, 1 quart of wine, 1 quart of beer: Other Officers: 0.75 oz. tobacco, spirits same; Crew: 0.5 oz. tobacco, spirits same. (200 cigarettes for the 8 days is accepted as within amounts listed). 2 Customs Officers will be assigned to vessel, usually just during working hours, with vessel expected to provide a suitable room and meals.

Supplies: General supplies are available through Agents and private ship chandlers, though prices can be expected to be high for consumable stores and equipment. Repairs can be performed, but the shipyard dry dock is too small for larger vessels. Foodstuffs are not recommended. Fresh water is about $2/ton via barge. Fuel is expensive, about $45/bbl. for Bunker C. Numerous ship chandlers will solicit the vessel, many falsely claiming to be sent or approved by the agency.

Time: GMT plus 4 hours.

Holidays: There are 13 official holidays, and numerous others are observed in various degrees due to the mixed Chinese, French and Indian heritages.

SHIPMASTER'S REPORT: October 1983 (Updated 1990).

Off Limits Call for Mail, Stores and Crew changes:

Documents: Documents required may be:

1 Shipmaster's Report Inwards – for Customs.
1 Parcels List Customs F.17.
1 Customs F.16 – Crew Declaration although they *may* accept ship's own form.
2 copies Master's Report for Mercantile Marine Office, also an addendum in duplicate, and these forms are taken ashore by the Agent.
1 P.F. 102 – Certificate Finder Act No. 20 of 1973 for Immigration.
3 Crew Lists on arrival.
2 Crew Lists on departure – to show newly joined personnel.

Immigration require international embarkation and disembarkation cards for all joining and departing personnel.

Port Health require Marine Declaration of Health.

All these papers are required, even though the vessel is only there between 1 and 2 hours.

Ship's Spares: Any package for the vessel arriving from abroad should preferably be at the airport at least 2 days prior to the vessel's arrival as it takes time to clear such packages through Customs.
General: The Mauritius Sailors Home Society will exchange paperbacks – arranged through Agents.

AUTHORITY: Mauritius Marine Authority, P.O.Box 379, Port Administration Building, Mer Rouge, Port Louis, Mauritius. *Tel:* (230) 240-0415. *Telex:* 4238 Mauport IW. *FAX:* (230) 240-0856. *Contact:* Director General.

NOTES

Please also advise Shipping Guides Ltd.

Mexico

GENERAL:

DOCUMENTS: New Customs House Regulations are in effect, which stipulate that the following cargo and ship's documents must be submitted in a new Mexican format:

1. Crew List. *
2. Passenger List. *
3. Stores List.
4. Crew's Personal Effects Declaration.
5. Cargo Manifest. *

* Must also be visaed by the Mexican Consulate or Embassy.

Failure to comply with this new regulation can result in fines of up to U.S.$ 350.00 per document.

ACAPULCO: 16.50 N. 99.54 W.

DOCUMENTS:

Health Clearance from previous port.
Health Pratique.
4 Stores Lists.
4 Lists of Crew's Personal Effects.
12 Crew Lists.*
2 Passenger Lists.*
12 Manifests of cargo for the port.*
*One copy to be visaed by Mexican Consul.

PILOTAGE: Pilot is ordered by Agent on the basis of Master's ETA, which should be given accurately at least 24 hours before arrival. Pilot boards at the port limits, approx. 1 mile from the entrance. Pilot station on VHF Channel 16 when vessel expected.

ANCHORAGES: Vessels may anchor in the middle of the bay as indicated by the Pilot. Depths up to 150 ft.

RESTRICTIONS: The Bay of Acapulco is a natural harbour surrounded by mountains, approx. 4 miles across at its widest part and 2.5 miles across at its narrowest. There are 2 entrances, 1 called Boca Grande and the other called Boca Chica.

Boca Grande is between Punta Siclata on Isla de la Roqueta and Punta Bruja. The channel is 3,000 m. wide with a depth of 31 fathoms in mid-channel.

Boca Chica Channel, between Isla de la Roqueta and the Peninsula of Las Playas is 300 m. wide with a depth of 14 fathoms in mid-channel.

MAX. SIZE: For berthing alongside max. draft 28 ft. 6 in.

HEALTH: When vessel arrives at the port the following Authorities will board: Port Health Authority, Customs and Immigration, accompanied by the ship's Agent.

RADIO: Coastal station of Acapulco receiving on 8374 kHz in daytime and on 4180 kHz at night. Transmitting on 8514 kHz in daytime and 4250 kHz at night. Radiotelephone receiving and transmitting on 2715 kHz during the day and on 2182 kHz from 2000 – 0600 hrs. local time.

VHF: Service available from 0630 hrs. to 2300 hrs.

TUGS: *Shipmaster's Report:* December 1984.
There are no tugs at Acapulco. Berthing and unberthing are unproblematic because of the use of anchor and aft buoy line and furthermore the help of mostly weak prevailing winds which blow parallel to the pier.

BERTHING:

	Length (m.)	*Depth* (m.)
Fiscal Quay	198	8.0
Coastal Quay	150	4.0
Passenger Quay	206	10.0
Fishing Quay	173	4.0
Yacht Quay	340	3.0

Storage Area: Warehouses 7,725 sq.m. Container Yards 10,414 sq.m. Cars 550.

Equipment: 18 forklifts, 2 cranes × 40,000 lb., 1 crane 25 tons, 1 forklift 70,000 lb. for containers, 3 tractor trucks for containers.

Cargo Rates: General cargo 47 t.p.h., unitised general cargo 100 t.p.h., containers 16 boxes per hour per vessel.

MEDICAL: Agent should be advised by radio in advance if any medical assistance required. Hospital facilities available.

TANKERS: Tanker moorings operated by Petroleos Mexicanos situated on the Eastern side of the bay. It is strictly prohibited to discharge oily residues in the bay or within 40 miles of the port.

FRESH WATER: Can be supplied from the quays using ship's hoses, rate about 15 t.p.h.

FUEL: Available.

CONSULS:

Denmark	Tel: 2.11.11	Norway	Tel: 2.19.56
France	Tel: 2.43.83	United Kingdom	Tel: 2.29.21
Italy	Tel: 2.25.10		

REPAIRS: Minor engine repairs can be effected. No dry docks, only a slipway for vessels up to 100 tons.

Vessels may carry out own repairs only after permission obtained.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Crew members are only allowed to retain cigarettes, tobacco and liquor sufficient for their own consumption while vessel is in port.

REPATRIATION: Can be arranged.

AIRPORT: International Airport situated 22 km. from the port, daily flights to all parts of the world.

TIME: GMT minus 6 hours all through the year.

HOLIDAYS: The following holidays can only be worked in case of emergency: 1st January; 5th February; 21st March; 1st May; 5th May; 16th September; 12th October; 25th December; and in addition 23rd May, Anniversary of the Stevedores' Union.

POLICE/FIRE/AMBULANCE: Police Tel: 2.00.40; Fire Tel: 2.00.42; Ambulance (Red Cross) Tel: 2.02.41 and/or 2.00.88.

TELEPHONES: Cannot be connected on board the ship but Master may make calls from the quay.

SHORE LEAVE: Allowed. Crew List to be left with gate.

IDENTIFICATION CARDS: Not required.

AUTHORITY: Capitania de Puerto, Costera Miguel Aleman 306, 2 Piso, Edificio S.C.T., C.P. 39300, Acapulco, Mexico. *Tel:* 82-31-75. *FAX:* 82-20-67. *Contact:* Captain Idelfonso Carrillo Mora, Port Captain.

CAYO ARCAS: 20.11 N. 91.59 W. (See Plan)

SHIPMASTER'S REPORT: January 1982.

DOCUMENTS: *Agents, Customs and Immigration:* The Charterer's Agent dealing with the paperwork when loading at Cayo Arcas are Benjamin Negroe Pawling, Consignatario de Buques, Calle 31 No. 1, Ciudad del Carmen, Campeche, Mexico. They only deal with the entry and clearance of the ship and preparation of the cargo papers. They also prepare and obtain a visaed Crew List irrespective of the fact that one might have been prepared and visaed at the previous discharge port.

The Customs and Immigration come by helicopter to the storage tanker and clear the ship when alongside. However, they will also clear the ship in the anchorage coming out on one of the tugs.

Papers Required: 6 Visaed Crew Lists (or plain Crew Lists with a letter from the Agent at the previous port stating that there was no Consul available).
2 Visaed Manifests for cargo on board.
2 Vaccination Lists.
4 Crew Declarations of Personal Effects.
2 Copies of Stores Lists.

During the 3 loadings at Cayo Arcas and the time spent at anchor off Coatzacoalcos no mention was ever made to the Work Permits which it was understood had to be obtained when working on the Pemex Charter. Perhaps these will be issued when the vessel loads at a port on the coast.

ANCHORAGES: 4 to 8 miles to the East of the flare in 25 fathoms, bottom sand, mud and shell. Good holding ground using 9 shackles of cable.

RESTRICTIONS: See "Loading".

RADIO: Radio communication via XFF2 . . . . Pemex Pajaritos, traffic list even hour GMT plus 30 minutes . . . . sometimes 5 to 10 minutes delay. No charges are made for any cables to Pemex.

Transmits:	Receives:
4346	4191
6442.5	6286.5
8690 (8690.5 Off Tune)	8382
12790 (12790.5 Off Tune)	12573
17075.5	16764

Always on 8 MHz, transmits on 12 MHz, receives 16 MHz.

During the course of the voyage, in addition to the arrival and departure cables, Pemex require the vessel's noon position each day, the ETA at the next port and any requirements such as bunkers and water. No acknowledgement is ever received and very few cables are sent to the ship by Pemex. Telex orders and instructions are routed via the Agent in the discharging port.

On approaching Cayo Arcas and the storage tanker, due to language problems (the Pemex operatives only speaking Spanish) all VHF calls are made through the English speaking officers on the tugs 'Eliska Theriot' and 'Martha Theriot' whose calling and working frequency is Channel 9. One of these English speaking officers also accompanies the Mexican Pilot-Berthing Loading Master and Pemex Representative to act as an interpreter when required and also when communication problems arise during cargo operations.

When at anchor off Cayo Arcas, information is usually obtainable via the 'Theriot' tugs.

BERTHING: Vessel moors port side to, alongside the storage tanker. This requires 8 parts of rope both forward and aft, 6 ship's lines and 2 from the storage tanker. All wires have to be fitted with rope pennants. Great care must be taken when going alongside to ensure that the ship's lines do not foul underneath the Yokohama fenders. Two tugs are in attendance, one forward and one aft using the tugs' lines. These are very heavy and require a messenger to heave them on board.

LOADING: Three lines are connected; these being 16 in. flexible rubber hoses with 12 in. reducers to the ship's manifold. They are connected by Pemex personnel but it is essential to have ship's staff operating the winch and the derrick gear. The API of the Maya Crude Oil is about 22.6 and the average loading temperature about 108°F. The maximum loading rate is 30,000 bbls./hr., however if the ship is receiving direct from the field, the rate drops to 15,000 bbls./hr.

It is advisable to leave the loading plan flexible as Pemex are likely to cease loading without prior warning and sail the vessel with deadfreight. The reasons for this can be due to the onset of bad weather or to ensure the ship leaves the storage tanker in sufficient time to enable the next ship to berth before dark. Unberthing is possible during the hours of darkness but the Pilots do not berth ships alongside the storage tanker between the hours of sunset and sunrise. The terminal requires 2 hours' notice prior to completion of loading and 10 minutes to stop operations. Communications between the ship and storage tanker is by a manifold watchman with a radio. These persons have a casual approach to their responsibilities and must be watched closely to make sure they are at the manifold when required.

Charles Martin (Surveyors) attend the vessel before and after cargo operations and insist on a visual inspection and manual dipping of the tanks. But they do not require water dips of the ship's tanks, a percentage allowance being noted on the Bills of Lading for these impurities.

Hydrogen Sulphide Content of Mexican Crude Oils: The H_2S content of the Maya Crude Oil is extremely high and all necessary safety precautions must be followed and adhered to.

FRESH WATER/FUEL: Fresh water, fuel oil and diesel oil are all available and are delivered to the ship by small coastal tanker or oil-rig supply tenders. They have to be ordered via Pemex preferably on the departure cable after leaving the discharge port. Whilst Pemex prefer to deliver bunkers when the ship is at the loading port, these commodities can be obtained in Curacao where Pemex have rented bunker storage facilities. Ships can avail themselves of this service when bunkers were not delivered in Mexico due to bad weather or some other cause.

DEVELOPMENTS: At the moment the only buoy in operation is No. 1 to which the storage tanker is moored. 'Boya Fija No. 3' and 'Boya No. 2' are in position as is the base for the hotel block 'HB CA1' and the degassing plant 'PBE-CA1'. It is understood the present completion date for these new installations is late March 1982 and production commencing some time after.

SHIPMASTER'S REPORT: May 1982.

DOCUMENTS:

Last Port Clearance.
5 Copies Crew List.
2 Copies Stores List.

PILOTAGE: Compulsory. Pemex Pilot boards 2 miles East of the berth.

ANCHORAGES: Depth 45 m. – 50 m. Bottom is sand.

RESTRICTIONS: Berthing daylight hours only. Unberthing at anytime.

MAX. SIZE: 350,000 d.w.t.

HEALTH: Pratique available day and night.

RADIO: Lantana Radio (WOE).

VHF: Terminal on Channel 11 only.

TUGS: 2 × 8,500 h.p. Both tugs required for docking and undocking.

BERTHING: Vessel berthed at No. 1 berth. Max. size permissible 110,000 d.w.t. Depth of water 42 m. Bottom is sand. Hoses connected on port side. No. 1 berth is alongside the storage tanker. However, after June 1st, 1982 the vessel will berth direct to the SBM.

Loading is through 3×12 in. hoses. Cargo is Maya Crude (API 22) which comes directly from oil production wells, through a gas separator. H_2S content is very high and dangerous.

The storage vessel is equipped with Yokohama fenders and also passes over 3 ropes forward and 1 rope aft.

Berth No. 2 (SBM): Max. size 250,000 d.w.t., hoses connected on port side.

Berth No. 3 (SBM): Max. size 350,000 d.w.t., hoses connected on port side.

No facilities for dirty ballast.

MEDICAL: Services available.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not possible.

SHIPMASTER'S REPORT: May 1984.

LOCATION: Lat. 20° 12.5′ N., Long. 91° 57.5′ W.

The port of Cayo Arcas Terminal is an open sea terminal located in the Campeche Bank, some 85 miles almost West of Campeche and 90 miles North of Puerto del Carmen. The Middle Cay is the biggest with a lighthouse (round concrete tower) elevation 75 ft., Fl. (2) 14 s. 14 M.

The terminal is formed by:

1. One platform gas stabiliser (called "Cabezal de Valvulas" on Chart 28260) located in position 20° 09.6′ N., 91° 57.8′ W., with a gas burning flare (conspicuous) visible at 30 miles equipped with Racon "C" (–·–·).
2. One old gas burning structure located 1 mile S.W. of the above platform.
3. SBM No. 1 in position 20° 10.0′ N., 91° 59.0′ W.
4. SBM No. 2 in position 20° 08.8′ N., 91° 59.0′ W.
5. One fixed structure in 20° 11.4′ N., 91° 59.5′ W. to which is permanently moored the storage tanker "Venture Europe", capacity over 2 million barrels.

The platform and both storage tankers are very good radar targets at 24 miles.

DOCUMENTS: 6 Crew Lists visaed by the Mexican Consul of the last foreign port or 6 Crew Lists and a statement from the Agent at the last foreign port that no Consul in the area. 3 Ship's Stores Declarations and 4 Crew Declarations.

CLEARANCE/OUTWARD DOCUMENTS: The Agent will prepare on board after loading, all required documents already signed and stamped by the due Authority. The Agent will also prepare the Bill of Lading and Cargo Manifest with the quantities given by cargo and Pemex Inspectors.

PILOTAGE: Compulsory for berthing/unberthing. Pilot boards 2 miles S.W. of the platform and he remains on board during all operations. Accommodation and meals must be provided.

ANCHORAGES: Outside Prohibited Zone about 8 miles East of the platform or 4.5 miles S.S.E. of the platform in approximately 50 m. of water. Good holding with 9 shackles in winds up to 35 knots.

COMMUNICATIONS: ETA for Cayos Arcas Terminal: Send ETA to Pemex (Petroleos Mexicanos) Pajaritos via Pajaritos Radio Station, XFF2, working frequencies:

Transmits	*Receives*
4346	4191
6442	6286.5
8690	8382
12790	12573
17075	16764

Of the above frequencies only checked on 8 MHz.

Traffic list on even hours plus 30 minutes although some 5 to 10 minutes delay can be expected. Only listening to this station when South of Florida.

ETA to Pemex Pajaritos can also be sent via Lantana Radio Station, WOE when far from Cayo Arcas.

When close to Cayos Arcas communication with Port Control (stationed aboard "Venture Europe") via VHF on Channel 9.

ETA to Agent can first be sent via telex to Tampa Office relay Ciudad del Carmen and then by cable via Veracruz Radio Station, XFU.

BERTHING: When mooring at any of the SBMs have ready the port crane or boom to pick up gear. In the forecastle 1 mooring rope (not wire) with a tail of 3 fathoms length and 2.5 in. circumference to lash the shore rope. One gang of 10 men board the vessel with the Pilot to assist in mooring/unmooring and connection/disconnection of hoses. These 10 men remain on board throughout during vessel's stay and accommodation and meals must be provided.

2 Cargo Inspectors and 1 Pemex Inspector, and sometimes the Agent board the vessel with the Pilot. Accommodation and meals must be provided.

When mooring alongside the storage tankers, only 3 or 4 people remain aboard.

Mooring to Storage Tankers: Both storage tankers have Yokohama fenders on starboard side. Mooring port side alongside using 3 head ropes, 2 breast and 2 spring ropes fore and aft plus 2 breast ropes from the storage tanker forward. 2×12 in. hoses used.

Mooring to SBM Nos. 1 and 2: One tug is used (tug's wire) on starboard bow to assist in the mooring. One shore polypropylene rope 9 in. circumference to which a chain is attached must be heaved on deck. Minimum opening of the bracket or stopper 15 in. × 7 in., otherwise 2 shackles with a thick wire must be attached to the chain and passed around the bitt. 2×16 in. hoses used.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not possible.

REPATRIATION: Embarking crew have to get permission from Immigration at Ciudad del Carmen before joining the vessel.

Disembarking crew cannot disembark, even if the Agent makes a request, until Immigration has cleared the vessel.

GENERAL:

Authorities: By helicopter from Ciudad del Carmen to "Venture Europe" and then by tug. Accommodation ladder requested.

Agent: Consignaciones de Buques, Canega Inc., with offices in Tampa, Florida. Telex: 803757 Canega B and Ciudad del Carmen, Campeche. Cable Address: Negroe, Ciudad del Carmen.

Charts: U.S.N.O. 28031, 28260.

SHIPMASTER'S REPORT: March 1987 (Updated Sept. 1987).

VESSEL: 117,000 d.w.t.

DOCUMENTS:

5 Crew Lists.
3 Ship's Stores Lists (including Bond).
3 Personal Manifests.
Last Port Clearance.
Ship's Register.

Personnel: 1 Agent, 1 Immigration Officer, 3 Cargo Surveyors, 1 Loading Master and 10 Mooring/Pipe-line personnel join with Pilot. 1 Pilot, 1 Loading Master, 3 Cargo Surveyors and 1 Agent remain on board and require meals. Accommodation required only if night loading.

Departure Documentation: This takes up to 4 hours but the vessel must be ready to leave the mooring on completion of ullaging and sampling, drifting clear of the area whilst the cargo calculations are completed.

September 1987: Documentation took about 3 hours, but the vessel can start to unberth 2 hours after disconnecting.

PILOTAGE: Pilot boards from a supply boat about 2.5 miles S.W. of the platform.

APPROACHES: Normal direction of approach to berths is from the S.W. When proceeding to an SBM, the supply vessel lands all pipeline equipment on board (port side), approximate weight 500 kg.

Navigational lights marked on chart are extinguished. Flare marked on chart is also extinguished.

Racon on the oil platform S.S.E. of island showed well at 16 miles.

Approaching from the West, there were no problems when keeping well to the South of the 'Area to be avoided'.

September 1987: There is a radar watch on the platform, using a Norcontrol System. All headings and distances to reach the anchorage are given through "Marine Control". Anchorage this time 4 miles to the East of platform. Depth 47 m., mud bottom.

Chart: B.A. 2626.

TUGS: 5 tugs of varying sizes, 2 supply vessels also used as tugs and several work boats. All equipped with VHF.

BERTHS: There are 3 loading berths.

(a) Storage vessel "Texaco Veraguas" moored to SPM – Maya Crude.
(b) SBM No. 1 – Maya Crude.
(c) SBM No. 2 – Maya Crude.

Storage vessel ((a) above) has fenders in place on the starboard side and loading vessels berth port side to, using 1 tug on the starboard bow and 1 tug on the starboard quarter.

Moorings depend on the size of the vessel.

Maximum size vessel: 100,000 d.w.t.

Hoses: 2×12 in.

Loading rate: 5,800 t.p.h.

September 1987: Berth used this time: VLCC "Texaco Veraguas", port side to, 4 floating fenders and 1 bow/quarter fender. Connections 2×12 in., only used VLCC's boom.

Loading vessels berth bow on to SBM ((b) and (c) above) using 1 tug on the starboard bow. Vessel picks up 1×80 mm. diameter messenger which is attached to a mooring chain for use with a Smit Bracket/AKD stopper.

Maximum size vessel: 216,000 d.w.t.

Hoses: 2×16 in. on port side.

Loading rate: 3,300 t.p.h. direct from the oil well.

Loading temperature: Up to 45°C.

Berthing is done in daylight hours only, unberthing day or night.

Tugs/supply vessels use their own lines when making fast for mooring.

In calm weather 1 tug makes fast aft to hold vessel off the SBM.

The 10 man mooring/pipeline squad stand-by forward and by the manifold whilst the vessel is at the SBM.

Ship's personnel are required only to work the winches when mooring/unmooring, connecting and disconnecting the hoses.

RADIO: All ETA messages sent to ship's Agents.

Prior to arrival call 'Marine Control' on VHF Channel 16. Working Channels are 9 and 11, they were clearly heard at 20 miles. Vessel was instructed to anchor 5 miles East of platform, this was between the 'Area to be avoided' and the marked anchorage in approximately 42 m., mud bottom.

Information required by VHF: Nationality, draft, quantity of ballast and de-ballasting time.

After anchoring call 'Marine Control' with arrival time, anchoring time, quantity of bunkers and fresh water on arrival.

CARGO: *Caution.* Maya Crude has an extremely high Hydrogen Sulphide content.

MEDICAL: A doctor is available on the platform but facilities are limited.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities available.

GANGWAY: Accommodation ladder is required on the port side at SBM.

CUSTOMS: Customs allowance seems to be a 'reasonable amount'. There was no query over 200 cigarettes and 1 bottle of spirits per person.

The bond is not sealed but the Immigration Officer checked two or three items against the Ship's Stores List.

REPATRIATION: Personnel are taken by helicopter from Cayo Arcas to Ciudad del Carmen, 90 miles to the South, and then by plane to Mexico City where there is an International Airport. There is no limit on the number of personnel travelling.

TIME: GMT minus 6 hours all year round.

SHORE LEAVE: Not permitted.

GENERAL *Stores:* None available, but fresh prawns can be obtained from supply vessels/tugs.

Mail: Takes approximately 15 days to U.K./Europe but a courier service via the Agents is available taking only 5 days.

COATZACOALCOS: 18.08 N. 94.25 W. (See Plan)

PORT LIMITS: From the centre of the channel at the bar with a radius of 0.5 miles to seaward.

DOCUMENTS:

Customs:

Cargo Manifest, original and 4 copies visaed by Mexican Consul at place of origin. If no cargo carried for this port a certificate and 2 copies stating the fact.

Stores List, original and 1 copy.

Personal Effects List, original and copy if vessel is arriving from another Mexican port. Customs release from that port must be produced.

Port Captain:

Clearance from Last Port.

2 copies Crew List.

3 copies Manifest of cargo for this port.

Immigration:

Crew List, original and 1 copy, bearing consular visa.

Passenger List, original and copy, visaed by consul.

All Crew Passports or I.D. Cards.

Health:

2 copies Crew List.

2 copies Passenger List.

Crew Vaccination Certificates.

Derat Certificate.

When vessels are anchored beyond the breakwater authorities board from the pilot launch.

The following must be made available for inspection.

- Registration Certificate of Vessel.
- Certificate of Inspection of Deck Machinery.
- Certificate of Inspection of Machinery.
- Freeboard Certificate.
- Tonnage Certificate.
- Radio Certificate.
- Radio-telephony Certificate.
- Emergency Procedure in the Case of Abandoning Ship.
- Emergency Procedure in the Event of Fire.
- Vessel Insurance Policy.
- Copy of the Charter Party (where applicable).

Shipmaster's Report: November 1992.

Vessel berthed at Pajaritos, and Crew List, Stores List and Crew Declaration were required in Spanish language.

PILOTAGE: Compulsory. Pilot meets vessel off the jetties at Coatzacoalcos Estuary. Master should give Agent information not less than 24 hours prior arrival stating vessel's name, flag, and ETA as well as draft.

Pilot boat black hull, white housing and red deck. 2 launches, *Alcion* and *Vencedora.* The sound signal for calling the Pilot is 2 long blasts and 1 short blast. The light signal is a blue Bengal light.

There is a new cutter *Siriux.* The pilots' office has a VHF radio station, listening out on Channel 16.

ANCHORAGES: Ample anchorage grounds available outside the Bar of the Coatzacoalcos River.

Two anchorage areas have been established and are bounded by lines joining the following positions:

West Area:	A.	Lat. 18° 12′ 30″ N.	Long. 94° 26′ 57″ W.
	B.	Lat. 18° 12′ 30″ N.	Long. 94° 25′ 54″ W.
	C.	Lat. 18° 10′ 54″ N.	Long. 94° 26′ 57″ W.
	D.	Lat. 18° 10′ 54″ N.	Long. 94° 25′ 15″ W.
East Area:	A.	Lat. 18° 12′ 32″ N.	Long. 94° 25′ 22″ W.
	B.	Lat. 18° 12′ 32″ N.	Long. 94° 23′ 46″ W.
	C.	Lat. 18° 10′ 54″ N.	Long. 94° 24′ 51″ W.
	D.	Lat. 18° 10′ 54″ N.	Long. 94° 23′ 22″ W.

Anchorage exposed during Northerly winds when it is advisable to weigh anchor and proceed to sea.

RESTRICTIONS: *Access Channel:*

To Fiscal Zone: Length 800 m. Depth 11.0 m.

To Pajaritos Terminal: Length 2,500 m. Depth 13.1 m.

Main Navigation Channel:

Length 1,800 m. Depth 12.7 m.

Turning Basin:

Fiscal Zone: Length 250 m. Depth 11.0 m.

Pajaritos Terminal: Length 300 m. Depth 13.10 m.

MAX. SIZE: *Fiscal Zone:* 27,000 d.w.t. Max. length 185 m. Max. draft. 9.20 m.

Pajaritos: 59,000 d.w.t. Max. length 250 m. Max. draft 12.0 m.

HEALTH: Pratique never given by radio. Vessels granted Free Pratique when berthed alongside if no contagious illnesses aboard.

RADIO/VHF: Telegraphic transmitter type TH 600-M with an open sea range of 500 miles radius, frequencies of 512, 500, 432, and 419.5 kHz. Telephonic transmitter type TSB-500-Be with approx. range of 500 km., frequencies of 2182, 2270, 2542 and 2665 kHz. RDF transmitter type TT-1017-B with approx. range of 300 miles, frequency 312 kHz. Transmitter/Receiver for radiotelephony VHF type VFD-50PT/PR, with approx. range of 50 miles, frequencies in Simplex operation: Channel 12-156.6 MHz and Channel 16 International call-up 156.8 MHz. Duplex operation: Channel 26: Transmission 161.9 MHz, reception 157.30 MHz. Channel 27: Transmission 161.95 MHz and receiving channel 157.35 MHz. At the moment, there is a point to point link-up with national and coastal telegraphs, as well as teleprinters for national and international service No. 078-835 (the latter is said already to be installed and will shortly be operating normally).

Tankers: In addition local requirements are that ETA messages should be sent to Pajaritos PEMEX Terminal, Call Sign XFF2 as soon as possible after departure from the previous port and updated at least 72, 48 and 24 hours prior arrival, using following frequencies: 4191 kHz, 6286.5 kHz, 8382 kHz, 12573 kHz, 16764 kHz, 22253 kHz or 25094 kHz.

TUGS: The Free Zone has the "Servicios Portuarios del Istmo de Tehuantepec S.A de C.V.", who own the tugs *Quetzalcoatl* 2,400 h.p., *Olmeca* 1,600 h.p. and *P.L.M.8* with 600 h.p. for operations in the Free Zone and the Pajaritos Terminal, the first being able to undertake salvaging work due to extensive range of action.

A tug is obligatory for mooring, unmooring or changing position in the port. 1 tug for vessels of 2,500 g.r.t. and 2 tugs for vessels larger than 4,000 g.r.t. The signal for calling up tugs is 2 long and 2 short blasts on the vessel's siren. The signal for the tug to withdraw is 1 short, 1 long and 3 short. The tug will repeat the signal to indicate that it has been heard. Tugs are fitted with VHF radio listening out on Channel 16 and during working, on the channel which the tug captain is ordered to use.

BERTHING: 1,943 m. of quay for ocean-going vessels, 120 m. for coastal vessels.

Restrictions: Night service is suspended during times of strong currents in the Coatzacoalcos river.

CRANES: 300 ton crane for handling containers.

STEVEDORES: No ETA advice necessary. Free Port: Straight working hours: from 0800 to 1200 hrs. and from 1400 to 1800 hrs. Overtime 100% overcharged according Tariffs. Latest times to order gangs: 0730, 1330 and 1730 hrs. Straight time above hours Monday through Saturday. Sunday and holidays allowed to work except "Legal Holidays". Loading and discharging rates: 25 tons gang/hour using ship's derricks. No shore cranes available. Loading sulphur by conveyor belts at 500 t.p.h., working around the clock.

Private FFM Berth: Loading or discharging operations performed by their own personnel working 24 hours per day. Rate of loading by conveyor belt: 500 t.p.h. Rate of discharging 1,100 tons per day with ship's gear.

MEDICAL: Hospital facilities available. Inform Agent in advance if treatment required.

TANKERS: Tankers regularly moor in the Pajaritos Roads. There are 4 large quays for mooring 7 vessels up to 233 m., with max. depth at the quay of 33 ft.

The Provisional Quay has 2 lines of operation of 24 in. with 3×8 in. for crude oil.

Bunkers and Lubricants: Not available.

Fresh Water: Available at jetties but should *not* be used for drinking water.

Stores and Laundry Facilities: Available, but no bonded stores.

Limited dirty ballast facilities available. Vessels sould arrive with clean ballast. Failing to do so can result in excessive delays.

All tanks lids must be closed when entering or leaving the port.

It is strictly prohibited to emit excessive amounts of smoke from the funnel.

Shore leave is normally permitted by the local Immigration Authorities, however the shore passes are only valid inside the city limit. Severe penalties will be imposed for crew members found outside City Limits. Pajaritos crude oil contains hydrogen sulphide – H_2S.

During rainy season (May/June and November/December) currents of up to 6 knots can be experienced in the river.

Also see "Shipmaster's Reports", "Berthing" and "Rabon Grande".

DENSITY: Average 1012.

FRESH WATER: Available at berths in Free Port area, delivered by 1.5 in. hose. Loading rate about 8 t.p.h.

FUEL: Fuel can be supplied at Coatzacoalcos port by tank-trucks when vessels need small quantities. Petroleos Mexicanos (PEMEX) has, at Nanchital, a loading terminal which is about 3 miles up-river from Coatzacoalcos (max. draft 27 ft. 6 in.) where Bunker C fuel available.

Diesel oil only available at Minatitlan, about 17.5 miles up-river from Coatzacoalcos (max. draft 21 ft.). If vessel bunkers at Nanchital or Minatitlan there will be at least 1 day delay and heavy extra expenses.

Gas freeing equipment for Gas tanker at Nanchital.

CONSULS: Norway and Netherlands.

REPAIRS: Minor repairs may be effected. Electronic repairs possible.

DRY DOCK: No dry dock available.

CUSTOMS ALLOWANCES: No restriction for free use on board.

AIRPORT: At Minatitlan, about 40 minutes car drive away. 2 regular flights to Mexico City.

TIME: GMT minus 6 hours.

HOLIDAYS: No work performed on following legal holidays: January 1st; March 21st; May 1st; May 5th; September 16th; October 12th; November 20th; December 25th; and December 1st every six years when Federal Government changes President.

POLICE/AMBULANCE/HOSPITAL: Police Tel: 2 01 22, Red Cross Tel: 2 02 85; Hospital Tel: 2 00 30.

TELEPHONES: No facilities for placing telephones on ships.

SHORE LEAVE: Possible. Crew must have I.D. cards or passports. Passengers must have passports.

DEVELOPMENTS: The entrance channel up to Pajaritos roads has been dredged up to 42 ft. The quays in the Free Zone have been completely reinforced, vessels up to 31 ft. draft being able to come alongside. The warehouses for general cargo at quays 2 and 3 have been completed, with a covered area of 4,000 m. and normal loading capacity of 10,000 cu. m. There are sufficient open areas for positioning heavy loads or machinery. Apart from the lighthouse on the Gavilan Hill, in the Allende area (left bank), the port has light towers indicating the main entrance channel, another 2 to indicate the channel leading to Pajaritos roads. All 4 have flashing lights. The branch leading onwards to the Free Zone is indicated by a small tower with flashing white light. The lights of the promontories of the 2 headlands;— the East light is green, and the West light is red. The channel is marked with black coloured buoys with odd numbers, on the port side entering, and red with even numbers on the starboard side. Both sets of lights are of the flashing type. When continuing upstream towards Nanchital or Minatitlan, the bridge has to be passed under. Its characteristics are: Length 1,375 m. vertical clearance with the bridge up 35 m., with the bridge down 8.84 m. Horizontal clearance which can be used: 60 m. To have the bridge raised, vessels must give 3 long and 2 short blasts on the siren.

SHIPMASTER'S REPORT: October 1985 – LPG Carrier 35,800 cu.m.
Approaches: Present charts are not appropriately scaled, coming off Bay of Campeche chart to Chart 373 which is only a port plan, and does not extend out to the SBMs. This was partly overcome by a 'home-made' extension to Chart 373, which of course lacked soundings, but was only slightly in error by using the given Latitudes and Longitudes for marking the SBMs. The 4 fathoms rock indicated in sailing directions is said to be much closer to shore (by local knowledge) and is not close West of the new anchorage area for gas carriers. We anchored 4 miles due North of breakwaters in 28 m. of water, and soundings in the approach appeared uniform. This was just at the North limit of the dirty water from the river outflow, so vessels with a long waiting time needing to make fresh water would need to be about 6 miles off. Current was running to the East, fairly strong inside 5 miles off, at least 3 knots at times (despite freshening winds in squalls from the North, the vessel secured at No. 1 SBM was seen to be on a constant Westerly heading – a tug secured to the stern appears to be standard practice at the SBM, so it is possible the current changes at certain times). Radar targets were visible from 20 miles off, and the breakwaters were discernable on radar from 10 miles off, thus a good fix is obtainable well in the offing.
Anchorage: There were many ships at the anchorage, most of whom had taken up a position between 3 miles and 6 miles off in the N.E./N.W. vector. Holding appears to be good in this area.
Inward Transit: Pilot calls on VHF and asks vessel to meet him at the boarding ground. Pilot will accept hoist or combination ladder. Vessel is about 1 mile from breakwaters by the time Pilot reaches the bridge, so only a little time for discussion of berthing plan. Full ahead is needed to overcome outflow between breakwaters, where rate can reach 8 knots, (4.5 knots on this occasion). Good steering is essential at all points and ability to 'feel' sheer developing, but Pilots are steady and well experienced and know exactly when bow and then stern will be affected when crossing from river into Pajaritos Channel. Tugs meet vessel just after this crossing point and tie-up shoulder and quarter. Speed is reduced in the Cut to enter the basin at about 3 knots. As can be seen from chart, very little lining-up is needed for Pier 3. The same Pilot berths the vessel. This is a straight forward manoeuvre, springs first to final position, then tugs push vessel to maintain position.
Moorings: The dolphins are well placed/spaced and have good swivel slip-hooks, however there are no capstans available. The mooring gang appeared to be about 30 persons, and they eventually carried the aft back spring along the catwalk to the corner of the main platform. The mooring boat towed the messengers for the remainder of the after wires across the dolphins, while forward we used a running messenger and pulled the wires out to the hook.
Gangway: There are no shore gangways. Landing area for ships is very limited. Situation was made as safe as possible throughout, but far from comfortable.
Terminal: Pajaritos Terminal is situated within Laguna de Pajaritos which is entered via a cut-off channel from Rio Coatzacoalcos about 1.25 miles inside the breakwaters. The plan is to dredge it out to a uniform depth and face all four sides of the laguna, and build further finger piers. At present only the Western half (approx.) is in use.
Depths: It was reported that there is now a uniform depth of 42 ft. within the Western side of the laguna to a line joining the root of Jetty No. 9 with the E.N.E end of the fertiliser jetty, and outwards in the channel and river and on the leading lines outwards to the pilot boarding position, thence to seaward there are no lesser depths. This sets the controlling maximum draft for all tankers and gas carriers at 39 ft.
Berths: There are currently 10 berths in use for tankers, these being 1W, 1E, 3W, 3E, 4W, 4E, 5, 6, 7W and 7E. No. 2 has been destroyed and not yet re-built. No. 8 has not yet been built. No 9 has been built and all fendering is in position, but no pipelines yet connected, it is currently in use as a lay-by berth. All berths have modern hydraulic type fendering, adequate mooring sliphooks (but no capstans), and Chicksans of varying number and dimensions. Nos. 1, 3 and 4 are for products, with No. 3 currently temporary fitted up for LPG via hose. Nos. 5 and 6 have larger Chicksans for black products and crude blends etc., while No. 7 is currently for virgin crudes.

Berth Nos. 5 and 6 are at the Southern end of a continuous concrete jetty which extends the whole length of the Western side of the laguna from abreast the lower leading light to the S.W. corner, and the Northern part of this jetty is used for materials/pipes/service craft, etc. (The recessed berth shown on Admiralty Chart 373 is not now correct).

Vessels berth head-in, that is heading South on all berths with the exception of Nos. 7 and 9 where it is head North (thus nomination for 3E means starboard side to).
Tugs: There are 4 tugs currently on charter to Pemex, and it is normal to take 2 tugs in and out. Tugs are strapped up alongside 'American style' and are well fendered. 3 tugs were seen handling a 70,000 ton loaded tanker with comfort.
Pilots: Pilots come under the Harbour Master of Coatzacoalcos, but all movements to and from the Oil jetties are under the control of the Pemex Port Captain, who allocates berths. Night movement of LPG carriers is not permitted.
Customs/Immigration: Vessels are boarded on arrival alongside, Pratique being granted before any operations may commence. Pajaritos Oil Terminal is *not* part of the free port area. Vessels without Visaed Clearance/Crew Lists should produce a copy of diversionary telex. Shore leave without a pass system is normal, and boats are arranged by Agents from the stern dolphin of each pier to the town ferry landing.
Fuel: There is one header on each jetty for Fuel and Gas oil. However delays or shifting ships are possible if other vessels loading these grades.
LPG Cooldown: This is possible using slow loading method, not known whether there is a by-pass system at the pumphouse to control rate, there is no by-pass system on the jetty headers.
LPG Loading: Temporarily at Jetty No. 3 only, using 150 mm. flexible hose from base of jetty abaft the chicksans. No vapour return. Loading rate 450 cu.m/hr.
Standard Time: Nautical Almanac states Vera Cruz Province keeps a Summer Time. This is not so. Time here all year is 6 hours behind GMT.

SHIPMASTER'S REPORT: November 1985.

This report from sister ship confirms and updates report above dated October 1985.

Vessel was directed to proceed to Pajaritos to load a cargo of Butane and LPG Mix. The vessel arrived at Pajaritos anchorage and in keeping with the received instructions anchored well off the port to await orders. The anchorage chosen was in a position with Pajaritos breakwaters bearing 171°×13.6 miles, in 36 m. of water. 6 shackles were used and even though the wind freshened considerably during the time at anchor, no dragging occurred. That the wind did indeed freshen is made apparent by the fact that the port was closed for 3 days. When the port reopened, we were instructed by local Agents to proceed to the pilot station to take on a Pilot for berthing. This was duly done.
Approaches: As in the case of our sister ship a "home-made extension" was made for Chart No. 373, which chart is totally inadequate for approach to the port. I can confirm that a strong East-going current was encountered inside 5 miles off on the approach to the Pilot, but radar targets are good, especially the breakwaters which show up well. On this vessel's approach the port had, as noted, been closed, with a consequent build-up in ships awaiting Pilots.
Inward Approach: Once Pilot was safely on board vessel proceeded inwards. The approaches through breakwaters and into outer harbour are clearly marked with leading line beacons. Vessel had to enter between breakwaters at full ahead due to the strong outfall, estimated on this visit at about 5 knots. The Pilots however, are capable and very experienced, and inward passage to berth was similar to that of our sister ship. We entered the Laguna at about 3 knots, slowly reducing speed and with tugs in attendance forward and aft, on shoulder and quarter. The tugs are of ample power and well handled.

Vessel moved straight onto berth, in this case Berth No. 3 E, with no difficulties whatsoever being encountered. Berth was starboard side to and vessel moved into position immediately. Problems now arose however, due to the inability of shore mooring gang to handle the heavy mooring wires of the vessel's mooring complement. On this occasion no mooring boat was available and shore gang amounted to about 10 men, split fore and aft. As a result vessel resorted to running messengers to heave the wires ashore and onto the sliphooks. The jetty appears to be well constructed but alas no capstans are fitted to heave moorings to shore.

Gangway: Still no shore gangway available at this berth so ship's gangway used to the small area available, in a not wholly satisfactory position.

Cargo: Shore require vessel to present 1×10 in. (150 ASA) connection. No vapour return to shore available. 1×6 in. flexible cargo hose available, therefore only one grade at a time can be worked. For grade changes shore drain flexible hose to the sea via a small drain line on jetty, then disconnect shore end of hose and move on the jetty to the new grade shore manifold. This involves several men plus the use of ship's crane and takes from 2 hours – 4 hours.

There is no recirculation system on the shore line system, so when initially loading any grade the temperature can be anything up to 20° above normal loading temperature, resulting in a very high boil off. This can cause problems if trying to cool down a tank to load LPG Mix at −34°C, when tank had previously held Butane at −2°C. An estimated line clearance of 80-100 tonnes is received on board before liquid temperatures drop to normal, and certainly ships maximum reliquifying capacity is required during the initial loading phase, even at very low rates.

Once the bulk loading stage is reached, an average of 240 tonnes/p.h. was achieved on both Butane and LPG Mix parcels. The rate is controlled by shore pump house, working on shore line back pressure.

The vessel is required to fill in a shore document every 6 hours, giving amount of cargo received, rate, quantity remaining to load and estimated time of completion.

Loading can, and was, stopped if a Pemex priority ship berths on the adjacent jetty (No. 3W), as shore can only load one ship, one grade at a time. Shore will also stop loading when other ship connecting loading line. This vessel suffered stoppages amounting to 44 hours due to this reason, plus a change of grade to LPG Mix during the loading of the Butane parcel.

On this occasion the cargo surveyors employed by Charterers were Redwood, employing local staff. They had a reasonable command of English. These surveyors make the initial and final calculations and the Bills of Lading are based on these figures. No shore metering or tank gauging is possible as the two shore tanks are being filled continuously as the ship loads. Surveyors require 4-5 hours to calculate figures for arrival/departure.

As shore tanks are in use at all times, no shore tank densities are available. Redwood surveyors and Pemex chemists take samples from ships tanks loaded or loading at 50% to determine density of cargo loaded and for cargo analysis.

The surveyors are available throughout the loading on VHF Channel 16 and proved very helpful when communications with shore installation became difficult.

On completion, Redwood supply vessel with copies of ullage reports, density sheets and analysis reports.

On this occasion densities as follows:

LPG Mix: 0.5365 at 60°F in vacuum, loaded at −34°C

Butane: 0.576 at 60°F in vacuum, loaded at −6°C.

Communications: Initial contact with Agent is made via telex. However, whilst the Agent can receive telex messages, they are unable to send via telex to ships at sea. As an alternative, they send messages via Mobile Radio or Alabama Radio, call sign WLO, which station vessels should monitor until within VHF range of Pajaritos Agent. As Tomas Ruiz are also Pemex Agents ETA's etc., can also be sent to them. Agency monitors VHF Channel 16 and works on Channel 72.

There is no Health Clearance via radio for Pajaritos. Port officials board at berth, but no difficulties experienced.

Length/Draft: Informed by Agent that the following ship lengths/safe drafts apply:

Ship length	*Minimum safe draft* Forward	Aft
150 m. – 175 m.	12 ft.	22 ft.
175 m. – 200 m.	14 ft.	24 ft.
200 m. – 225 m.	16 ft.	26 ft.
225 m. – 250 m.	18 ft.	28 ft.

250 m. is the maximum length that can be handled.

Radio – Loading: Communications during cargo operations caused some problems and a Letter of Protest on this subject was issued to the shore installation. All stops/starts information etc. is given to ship and ship to shore via VHF radio on Channel 16 and working Channels 9 or 11, call sign Pemex Operations. Their operators have a reasonable command of English, but can be very hard to raise at times. Also vessel was supposedly able to communicate with loading supervisor and pump house directly on Channel 9, but this proved impossible as no English was spoken or understood by these operatives, hence the Letter of Protest. After this was sent to shore Pemex operations communicated directly with the ship instead of the loading supervisor and standards were markedly improved. Even so, on 2 occasions vessel observed that loading had been suspended without any information being given to ship.

For the completion of each grade an English speaking supervisor boarded vessel to assist should any language problems arise. However, when "stop loading" was given, the pump house reaction was immediate. Paperwork for cargo, safety etc., as per normal.

Once the language problems and frequent changes to loading programme were overcome, the loading operation ran very smoothly.

A further Letter of Protest was also issued due to the shore stopping loading before the requested quantity was received on board, there being no way they would restart loading to complete.

Outward Transit: No difficulties experienced leaving jetty. Vessel moved off stern first, assisted by a tug fore and aft, then swung in the laguna. The unberthing Pilot however took some time to become accustomed to the rapid swinging of the vessel. This was especially evident in the passage through the Outer Harbour and breakwaters, being accentuated by again a strong outfall of approximately 4 knots – 5 knots. After clearing entrance vessel was swung to the West to clear passage for incoming vessels and Pilot departed when West of breakwaters.

Points of Interest: At the time of our visit to Pajaritos there was an abnormal amount of plant and vegetable material both floating and in suspension in the water, from the Outer Harbour to the berths. This material resulted in frequent cleaning of sea intake filters, some of them on a daily basis. It is not known if this condition applies on a year round basis, but certainly it was a problem in November.

SHIPMASTER'S REPORT: Pajaritos. October 1987.

Pilotage: Pilot boards from a small open, orange painted launch that is of the same design as local fishing boats.

Restrictions: Agent advised that there is no berthing or unberthing between 1800 hrs. and 0600 hrs.

Shore Leave: There is a frequent ferry service from the oil terminal to the town which takes 30 minutes and is free.

Draft: The following letter was received from the terminal:

Quote:

Master. . . . . Date. . . . .

In Port . . . . Pier Number. . . . .

The Harbour Master has instructed us that the following minimum draft will be required for manoeuvring into and out of this port (including Pajaritos Lagoon):

Vessel's Length (m.)	*Minimum Draft* Fwd (ft.)	Aft (ft.)
50 – 100	4	14
100 – 125	8	18
125 – 150	10	20
150 – 175	12	22
175 – 200	14	24
200 – 225	16	26
225 – 250	18	28

Please comply with the above instructions, in any other condition Pilots will not manoeuvre your ship.

On behalf of Petroleos Mexicanos

. . . .

Unquote.

SHIPMASTER'S REPORT: August 1990.

Berth: Pajaritos.

Charts: B.A. Charts No. 373 and 1225.

Approach: Do not confuse point in position 18° 20′ N., 94° 31′ W. for Pta. San Juan.

Breakwaters at Coatzacoalcos show up well on radar.

Anchorage: About 2.5 miles N.W. of breakwaters. Very exposed in Northerly winds. In strong winds, vessels invariably drag anchors. A short steep swell can develop. Wind force increase can be sudden and dramatic. Designated anchorage areas not enforced, probably due to light traffic.

Pilots: Both port closed from 1700 hrs. to 0600 hrs. Ships observed shifting inside Pajaritos Basin up to sunset.

Pilot boards in good weather, 2 miles North of breakwater from orange steel hulled cutter (fairly slow), and leaves outside breakwater. In poor weather, pilot often boards and leaves just inside breakwater. Gangway/ladder combination compulsory for boarding in ballast condition. Pilots fairly competent.

VHF: Pilots: Channels 16 and 10, difficult to make contact at night. 'Pemex': Channels 16, 17 and 9 (0900 hrs. – 0000 hrs.). Agent (Ruiz): Channels 16 and 72.

Channel: Official entry draft for tankers/gas carriers in ballast is minimum 14 ft. forward and 24 ft. aft, but is not enforced.

Full speed is used passing through the breakwater heads, due to the swell and strong West to East cross current.

Beware of small fishing boats around the entrance. Leading lights, which operate 24 hours, are very conspicuous. Once inside the breakwaters, speed is reduced, but beware of the Rio Coatzacoalcos outgoing current, which in autumn can be up to 7 knots. Due to the river current, which causes erosion, the buoyage is not to be relied upon, buoys also drift off station, due to weed and logs striking them. In summer and autumn, a lot of weed is encountered in channel and Pajaritos Basin, engine intakes should be monitored.

Pilots report many ships 'blacking out' in channel. Channel to Pajaritos about 100 m. wide and dredged to 45 ft. Dredging constantly in progress by large dredger (Hang Jun 6002), which has very conspicuous spoil boom on top.

The minimum depth found was 14.3 m., just seaward of the breakwater heads, generally greater than 15.0 m.

Tugs: 7 tugs, which also serve Coatzacoalcos, are available. 5 'Pemex' tugs (4×2,000 h.p. tractor tugs, 1×4,500 h.p. supply type tug) and 2 British 'Cory' tugs on hire to 'Pemex' ('Yewgarth' and 'Strongbow', both 4,200 h.p.). Tugs lines used throughout. Tugs berth near 'Pemex' Control Tower.

Rescue/fire fighting ship 'Pemex 652' also on stand-by near Control Tower. Believe built for SBM moorings and offshore oil fields.

Berths: Pajaritos Basin consists of 4 piers (No. 1 – No. 4) with 8 berths, and depths of about 40 ft. for handling LPG, Ammonia and certain products. Berth No. 1 handles Ethylene and VCM.

Two berths (No. 5 and No. 6) handle crude and products, and have a depth of 45 ft., size up to approx. 100,000 d.w.t.

Berth No. 7 handles crude only, depth 45 ft.

Berth No. 8, marked on B.A. Chart No. 373 never constructed.

Berth No. 9 built to handle crude, but only used as a lay-by berth.

One fertiliser berth of 40 ft. depth. One fertiliser pier (2 berths), East and West 39 ft. depth with loading gantries.

Pier No. 2 is being reconstructed, due to heavy damage as a result of LPG ship fire.

Coatzacoalcos is for general cargo, except a chemical tanker berth with tankage positioned at the South end near the Naval Base. Berth position 18° 07.55′ N., 94° 25.05′ W.

Moorings: Always head in at all berths. Vessels generally moor with 3-2-2 at each end.

Difficulty experienced handling mooring wires. After back spring gets caught up on fenders, especially at Berths No. 3 and No. 4. We had to obtain diver to free wire. Mooring gang both ends.

Gangway: Difficult to land. At Berth No. 1, we used conventional gangway with plank from bottom platform to mooring dolphin. At Berth No. 3, B.O.T. type gangway from manifold to Chicksan platform.

Cargo: Ammonia through Anaconda hoses at Berths No. 1 – No. 4 (8 in. 150 ASA). VRL available at Berth No. 3 East and West. No VRL at Berth No. 1. Ammonia cold −32°C.

Rate generally 800 t.p.h., but possible up to 1,200 t.p.h. with 3 shore pumps. Little control on rate apart from stopping and starting pumps. Chicksans for LPG, reported to be 10 in. ASA 150. Ammonia 'First Foots' stop 2 hours – 2.5 hours.

Fresh Water: Available at all berths. Apply through agent. Reported to be of poor quality.

Agent: Tomas Ruiz most generally used, and from reports the most attentive. We found them to be helpful and obtainable on VHF. Arranged diver within one hour. Tomas Ruiz S.A., Tel: 921 2 01 17, 921 2 01 30, 921 2 95 42. Telex: 78820. Fax: 921 2 65 78.

General: In Winter months, port often closed for days, due to strong Northerly winds.

Diesel fuel available at all berths, except No. 7 and No. 9, and fertiliser berths.

Fuel oil only by barge. Order fuel several days in advance.

Boat service can be arranged at about U.S.$ 3.00 per person from piers to Coatzacoalcos.

Most services can be obtained.

A number of chandlers board on arrival. Fresh salad and vegetables reported to be good.

No security at piers, boats come and go at will. Security/stowaway search advisable on departure.

Nearest airport at Minatitlan, about 20 km. away, local service to Mexico City.

Formalities: All officials board with agent on arrival. No particular difficulties. Sometimes passports are checked, and if no U.S. visa, passport will be held for duration of ship's stay.

Shore leave possible, no passes required.
Negative Visaed Crew List now required.
Clearance last port.
1 Maritime Health Declaration.
4 Stores Lists – U.S. forms acceptable.
4 Bond Lists – U.S. forms acceptable.
6 Crew Lists.
2 Vaccination Lists.
Ship's Register and Derat Certificate sighted.
Customs Officer and officials do not remain onboard. Bond not sealed.

On departure, Immigration and agent board with pilot, and issue vessel with final Clearance.

SHIPMASTER'S REPORT: May 1992.

Vessel: 5,000 d.w.t. chemical tanker, calling at Coatzacoalcos to discharge chemicals.

We came from a Northerly direction (Houston), and on the radar at 24 miles range, the coast near Coatzacoalcos is well recognisable, especially Punta Zapotitlan, which is approximately 30 miles N.W. of the port.

Contact was established on VHF Channels 16 and 10 with Marine Control Coatzacoalcos, who keeps the pilot informed of vessel's progress towards the pilot station.

We experienced an Easterly set when approaching the coast, but this may vary with prevailing winds.

The pilot boarded 1.5 miles from the breakwater, from a launch with a red hull. Pilot's launch not able to do more than vessel's dead slow speed, which is 3 knots.

A tide rip between the outflowing water of the Rio Coatzacoalcos, and the sea was encountered just before entering the breakwaters.

Continuous dredging operations are carried out in the roads and the port, by a dredger with a conspicuous sludge boom.

Pilots speak reasonable English. We berthed starboard side to on Berth No. 5, one of the (former) general cargo berths.

As vessel has a bow thruster, no tugs were used for berthing or unberthing.

When sailing, vessel swung easily off the berth with bow thruster, engine and rudder. Also the outgoing current in the river assisted in this manoeuvre. Larger vessels however would require 2 tugs for swinging. Also during increased wind, the use of one tug might be advisable for smaller vessels.

Tugs are available at Coatzacoalcos.

We had to discharge two parcels of chemicals. Two 6 in. hoses were provided from shore for simultaneous discharge of both parcels.

The hoses were connected to pipeline connections in a well in the quay. Underground pipelines run from there to the tank farm of Cia. Mexicana de Terminales S.A. (Mexterminals), about 1 km. away.

Attention has to be paid to nearby open air sulphur storage, as well as frequent cement handling on the quays.

With prevailing winds, dust of either commodities might be blown across the vessel, which could result in deposits or dust in cargo tanks being ventilated after tank cleaning or prior to loading.

Vessel was boarded by the Agent and Officials immediately after berthing. The party was made up of 4 Officials (Customs, Port Health, Immigration and Sanitary Inspection). They requested the following:

1 copy Maritime Declaration of Health.
1 copy Vaccination List.
4 copies Personal Effects List.
5 copies Stores List.
8 copies Crew List.
1 copy "Nil" Passenger List.
Clearance from Last Port.

All crew members, except the European Senior Officers, had to present themselves to Immigration, and all Passports were inspected.

Customs sighted three crew members cabins.

The Sanitary Inspector inspected vessel's provision store rooms.

On departure, the Agent and Immigration Officer boarded, and the crew were again summoned for outward inspection. All Passports again sighted.

Papers received on departure:
1 copy Sailing Permission from Harbour Master.
1 copy Sailing Permission from Immigration.
3 copies Visaed Outward Crew List.
1 copy Outward Customs Clearance.

Fresh water can be ordered, and will be delivered by truck (capacity 16 tons), which is filled from a filling stand behind the sheds. Filling and discharging time is about 45 minutes each.

Some fresh provisions were taken at Coatzacoalcos, which were of good quality.

The quay walls on all (former) general cargo berths are heavily fendered by cylindrical rubber fenders, which are placed with their axis at a 90° angle with the quay wall. Vessel's mooring lines, especially springs, easily get caught under them.

On arrival and departure, our Agent requested the time or passage of breakwaters to be passed on to him via VHF Channels 16/67. Outward, he also required the bunkers and fresh water on departure, in the same way. Also "Coatzacoalcos Marine Control" requests to be informed about bunkers and fresh water on departure, as well as port of destination and ETA; to be passed on by VHF Channel 10, when outside of the breakwaters.

Outward Pilot left inside of the breakwaters by red-hulled outboard motor launch, which was able to match up to vessel's half speed ahead (about 10 knots).

AUTHORITY: Empresa de Servicios Portuarios, Interior Recinto Fiscal Autorizada, Coatzacoalcos, Ver. Mexico. *Tel:* (921) 454-99, 451-30. *FAX:* (921) 467-58.

Coordinacion de la Unidad de Puertos y Marina Mercante (Mexican National Port Authority), Municipio Libre 377-12 B, C.P. 03310, Col. Sta Cruz Atoyac, 03310 Mexico D.F. *Tel:* (525) 604-4249, 604-3829. *FAX:* (525) 688-9368.

DOS BOCAS: 18.37 N. 93.10 W.

LOCATION: SBM No. 1, Lat. 18° 37′ 33″ N., Long. 93° 09′ 37″ W.
SBM No. 2, Lat. 18° 37′ 36″ N., Long. 93° 11′ 00″ W.

PILOTAGE: Compulsory. Pilot boards 2 miles N.W. or North of the SBMs. Accommodation ladder to be rigged 15 ft. above the water.

ANCHORAGES: North of SBMs in 20 fathoms.

The anchors should be secured with stoppers during loading and whilst manoeuvring.

MAX. SIZE: 250,000 d.w.t. Max. LOA 345 m.

VHF: Pemex on Channels 9 and 16.

TUGS: 1 tug available to make fast aft in an emergency. Tug keeps watch 24 hours on VHF Channels 16 or 9.

Mooring boats are only available for assisting with mooring, connecting, disconnecting the hoses and unmooring, no boat service available.

BERTHING: The terminal of Dos Bocas, Tabasco, Mexico, is equipped with 2 SBMs capable of loading vessels from 150,000 – 250,000 d.w.t.

The maximum LOA permitted is 345 m. (1,131 ft.) The maximum distance from bow to the ship's manifold is 183 m. (600 ft.) and the minimum distance is 149 m. (490 ft.).

SBM No. 1: Ships must have at the manifold 3 cargo connections each of 16 in. diameter (150 lbs.) with 1.4375 in. flange thickness (ANSI specifications) and should be able to receive Camlock connections.

SBM No. 2: Ships must have at the manifold 3 cargo connections each of 16 in. diameter (150 lbs.) with 1.4375 in. flange thickness (ANSI specifications) and should be able to receive Camlock connections.

The distance between centres of cargo connections must be at least 2,500 mm., and from cargo line to fuel line must be 2,000 mm. the min. distance from cargo manifold to the ship's side should be 4,600 mm.

The height from the centre of the cargo line to drip tray must be 900 mm., and to the deck 2,100 mm. maximum.

The height from deck to manifold will not be less than the height from deck to hose rail.

The cargo lines at the manifold must have one pressure gauge and drain valve.

The drip tray must be fitted with rounded edges to protect the hoses and must have Irving screen or similar.

The minimum S.W.L. of the booms should be 15 tons. The distance from deck to the top of the boom, not be less than 10 m. (33 ft.) in the working position.

The runner wire must have appropriate cargo hook.

Before vessel moors to the SBM, the boom has to be ready to work on the port side to lift the mooring equipment. The hoses will be connected on the same side.

The vessel must have 2 Panama Leads forward with a minimum clearance of 600 mm. by 450 mm. with a distance between centres of 2.0 m. – 3.0 m. The vessel should preferably have AKD chain stoppers.

The minimum distance, from the Panama Lead to the forward bitts should be not less than 2.7 m. (9 ft.) and not more than 8 m. (25 ft.).

The vessel has to supply a winch operator when vessel is mooring or connecting the hoses. In the event of mooring line damage the vessel has to provide lines as necessary.

Vessel will supply one messenger rope.

The terminal requests that vessel arrives with clean or segregated ballast.

The terminal requests that vessel arrives with clean or segregated ballast.

Cargo and deballasting operations, must be planned in such a way that the vessel will be as close as possible to a safe draft for manoeuvring of the buoys in case of an emergency.

Vessels are requested to arrive with a trim not greater than 10 ft. by the stern.

The Loading Master and assistants have a portable walkie-talkie (VHF), to communicate with shore, however the vessels VHF set must also be available.

One of the riggers will be required to watch the deck from the wheelhouse for early warning of leaking or spillage and maintain communications with the shore terminal.

In the event of bad weather conditions, the Pilot may take the decision to stop the loading operations and take the vessel off the SBM. However, the Ship Master's responsibility will not cease.

Pilots, Loading Master and Mooring Personnel: When vessel moors, the Pilot, Pemex Loading Master and 10 riggers will board the vessel.

The vessel has to provide meals and cabins of officers standard for the Pilot and Pemex Loading Master. The riggers will have meals of crew standard. All will remain on board the vessel during all the loading operations.

The Loading Master is a Pemex representative and coordinates operations between shore and vessel and he has control of the operations. He will deliver to the Master or Chief Officer the cargo orders, the General Safety Regulations and the notice to avoid pressure surges. When Owners or Charterers and Pemex instructions disagree, agreement must be made prior to mooring.

On completion of loading operations the vessel will be disconnected from the buoy. Cargo calculations and clearance will be carried out whilst drifting or at anchor.

Tanks: 10 tanks for crude oil, each 500,000 barrels capacity.

DEVELOPMENTS: Project included supply port to service drilling rigs, petroleum port with 3 piers which will be able to load 12 vessels up to 60,000 d.w.t. simultaneously with liquid gas and petroleum products, 3 piers for loading crude carriers up to 100,000 d.w.t. and a container terminal.

SHIPMASTER'S REPORT: December 1984.

Shore Location: Lat. 18° 26.5′ N., Long. 93° 11′ W.

Sea Terminal: There are 2 SBMs 11 miles to the North.

SBM 1: 2 lines on port side of the ship, diameter 16 in.

SBM 2: 3 lines on port side, 16 in. diameter.

Documents: Customs Officer comes onboard with the Agent before mooring. Documents required:

Last Port Clearance.
6 Crew Lists with vaccination dates.
2 Passenger Lists.
2 Arms Lists.
3 Stores Lists.
3 Crew Personnel Effects Declarations.

Anchorage: See British Admiralty Chart No. 2626. Located between 5 miles and 10 miles to the North of the SBM. As it is not very good holding ground, pilots usually recommend a position to the N.W. 4 miles or 5 miles from the SBM, as less threatening in case of ship dragging (in Winter there may be Northerly gales).

Pilotage/Berthing: Before arrival call on VHF Channel 16 or 9 for Pemex Operations. Pilot boards at 1.5 miles West or N.W. of SBM with a tug bringing out mooring equipment and shore crew. The tug assists with mooring, then goes aft and passes a line to the poop. No berthing at night time.

Crude oil: Same as Rabon Grande. Loading rate 15,000 – 45,000 bbls.p.h.

Persons on board: During vessel's stay:

1 Pilot.
1 Loading Master.
1-2 Pemex representatives.
1 Inspector (Redwood, etc.).

9 or 10 crew required for mooring, connecting and loading watches (One man permanently on the forecastle deck and one on the bridge).

Repatriation: Crew changes may be arranged.

Shore Leave: It is not possible to have regular connection with the shore.

Ship Chandler: Available via pilot boat, but food very expensive.

SHIPMASTER'S REPORT: September 1985.

Location: The Pemex Oil Terminal at Dos Bocas consists of two SPMs.

Anchorage: Anchorage for vessels awaiting berth is centred on position Lat. 18° 45.25′ N., Long. 93° 10.5′ W., 7 miles North of the SPMs.

Documents:

5 copies Crew List.
Last Port Clearance.
2 copies Stores List.
2 copies Personal Effects Declaration.
1 copy Vaccination List.

Health: Radio Pratique is obtainable by forwarding the following information to the Agent at least 24 hours prior to arrival.

(a) Vessel's name and nationality.
(b) Master's name.
(c) Total number of crew onboard.
(d) Last port.
(e) Port and date of issue of Derat Certificate.
(f) ETA local time (GMT – 6 hours).

Radio: Vessel is required to send its ETA and cargo requirements to the Agent and Petroleos Mexicanos at least 72 hours in advance and thereafter the ETA is to be updated 48 hours and 24 hours in advance of arrival.

Loading: The standard hose connections are 16 in. SPM No. 1 has 2 hoses and SPM No. 2 has 3 hoses. The average loading rate is 40,000 bbls.p.h. There are no facilities for receiving dirty ballast ashore and vessels must arrive with clean ballast.

Completion of documents: On completion of loading a further delay of about 2 hours is expected before cargo papers are finalised. The vessel may either anchor or drift in the vicinity until these documents are completed.

Accommodation: The Mooring Master, Loading Master, two Cargo Surveyors and 10 crew for handling hoses. They expect accommodation and meals to be provided.

SHIPMASTER'S REPORT: July 1987.

Anchorage Area:

1.	18° 42′ 30″ N.	93° 08′ 00″ W.
2.	18° 47′ 30″ N.	93° 08′ 00″ W.
3.	18° 47′ 30″ N.	93° 13′ 15″ W.
4.	18° 42′ 30″ N.	93° 13′ 15″ W.

Location of Buoys:

Buoy No. 1: Lat. 18° 37′ 35.2″ N., Long. 93° 09′ 57.29″ W.
Buoy No. 2: Lat. 18° 37′ 35.5″ N., Long. 93° 10′ 59.84″ W.

Arrival Draft: Vessel size 135,900 d.w.t. Initially required 20 ft. forward and 34 ft. aft. This was later changed to 18 ft. forward and 30 ft. aft and was finally changed to 16 ft. forward and 30 ft. aft.

Radio: Vessel used radio stations WLO and WDP. ETA advices to be sent to the Agent and PEMEX, 72 hours, 48 hours and 24 hours prior to arrival. Any changes in ETA should be notified to Agent and PEMEX immediately. PEMEX (Exports) Telex No. 1773171/1773671, PEMEX (Maritime Transportation) Telex No. 1773986.

Pre-Arrival Information: The following must be advised with the vessel's ETA:

1. Name of Master.
2. Number of crew and nationality.
3. Gross and nett tonnage.
4. Arrival draft, fore and aft.
5. Approximate departure draft, fore and aft.
6. Type and amount of ballast on board and time required for deballasting.
7. Derat or Exemption Certificate, together with date and port of issue.
8. To whom Notice of Readiness to be tendered (for Agent).
9. Type of cargo and amount required.
10. Last port of call.
11. Discharge port for present voyage.

All of the above information is required in order that vessel may obtain berthing date and export licence from PEMEX.

VHF: Initial communications with PEMEX prior to arrival was made on VHF Channel 16. When at the terminal, communications are made on Channel 9 (calling) and Channel 8 (working Channel).

Berthing: Mooring of the vessel is supervised by a Government pilot and a shore gang of 8 persons. The shore gang connect and disconnect hoses and are assisted by the ship's crew. Whilst the vessel is loading the personnel maintain a watch on the forecastle, manifold and bridge.

Accommodation is required for one pilot, one PEMEX representative, one inspector and 8 crew. Mooring is carried out with the assistance of one tug which remains with the vessel at all times while cargo operations are under way. One rope is required aft for the tug.

Cargo Information: Grades available: Isthmus Crude and Maya Crude. Vessel loaded Isthmus Crude API 34.4, temperature on board 32.5° C. and Maya Crude API 22.0, temperature on board 44° C.

3×16 in. hoses were connected and the loading rate was 50,000-55,000 barrels per hour.

The Bill of Lading figures were established on board when the vessel was clear of the SBM. The ship's ullages were used to obtain the figures. Taking of ullages and paperwork takes approximately 5 hours and is prepared jointly by PEMEX inspectors, independent inspectors and ship's personnel.

General: Documents required on arrival are those required at other Mexican ports. If vessel has no Mexican forms on board they will be filled in by Agent from the ship's documents.

Repairs: Immobilisation of the engine not permitted while vessel is at the SBM.

Stores: A small amount of stores are available.

SHIPMASTER'S REPORT: November 1992.

Berthing: Pemex allow 20 minutes for berthing at the SBM's. This is from the time the messenger is taken onboard until the vessel is all fast. An additional charge of U.S.$ 1,000.00 is levied, if vessel is under 140,000 d.w.t. and U.S.$ 2,000.00 if vessel is over 140,000 d.w.t., if time taken is more than 20 minutes.

ENSENADA: 31.51 N. 116.38 W.

RESTRICTIONS: *Access Channel:* Length 900 m. Depth 9.7 m. – 10.0 m.

Turning Basin: Diameter 200 m. Depth 8.5 m. – 10.0 m.

MAX. SIZE: LOA 240 m., draft 9.8 m.

VHF: Port Authority on VHF Channel 16.

TUGS: 1×1,000 h.p.

BERTHING:

	Length (m.)	*Depth* (m.)
Coastal vessel quay	483.0	4.0 – 9.5
Deep sea quay	725.0	10.5

Storage: Warehouses 14,970 sq.m. Open areas 28,260 sq.m. Covered areas 30,789 sq.m.

Equipment: Cranes: 1×36 tons, 2×20 tons, 1×15 tons, 1×14 tons, 1×12 tons; 7 tractor-trucks; 12×500 lb. tractors; 4 chutes; 2 front-end haulers; 4 clams. Forklifts: 2×30,000 lb., 2×85,000 lb., 5×10,000 lb. – 20,000 lb. and 23×4,000 lb – 10,000 lb.

BULK HANDLING FACILITIES: Conveyor belt for handling limestone. Suction units for handling bulk cargoes at high capacity. Mechanical means for discharging tuna and anchovies.
MEDICAL: Hospital services available.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Mechanical, electrical and electronic repairs possible.
DRY DOCK: Floating dock for vessels up to 1,400 tons displacement.
AIRPORT: International airport at Tijuana.
SERVICES: Electricity, tenders, stores, laundry, garbage disposal, warehousing, fumigation, rental of equipment.
AUTHORITY: Empresa de Servicios Portuarios, Blvd. Teniente Jose Azueta 224, Zona Franca del Recinto Portuario, C.P. 22800, Ensenada B.C., Mexico. *Tel:* (617) 817-20, 828-60. *FAX:* (617) 817-20. *Contact:* Fernando Castillo Menendez.

Coordinacion de la Unidad de Puertos y Marina Mercante (Mexican National Port Authority), Municipio Libre 377-12 B, C.P. 03310, Col. Sta Cruz Atoyac, 03310 Mexico, D.F. *Tel:* (525) 604-4249, 604-3829. *FAX:* (525) 688-9368.

GUAYMAS: 27.54 N. 110.52 W. (See Plan)

DOCUMENTS:
5 Crew Lists.
6 Passenger Lists.
5 Stowaway Lists.
1 Personal Effects Lists.
2 Stores Lists.
2 Provisions Lists.
2 Arms and Ammunition Lists (1 copy visaed).
4 Cargo in Transit Lists.
Ship's Official Documents.
Ballast Certificate.
Clearance from last port.
International Health Declaration.
Derat Certificate.
Manifest of Cargo for Discharge, visaed by Mexican Consul (original and 5 copies).

PILOTAGE: Compulsory. Pilot available throughout 24 hours. Pilot meets vessel at Fairway Buoy.
ANCHORAGES: Good anchorage in the vicinity of the Fairway Buoy. Depth 14.5 m. Bottom mud.
RESTRICTIONS: *Entry Channel:* Length 1,500 m., depth 12.0 m.
Turning Basin: Length 250 m., depth 11.0 m.
MAX. SIZE: 40,000 d.w.t., LOA 250 m., draft 12.0 m.
HEALTH: Free Pratique available by radio on arrival.
RADIO: Guaymas Coast Radio, "XFY". Receives on 425, 454, 468 and 480 kHz. Transmits on 429 and 489 kHz.
VHF: Pilot and Port Authority on VHF, but communications not reliable.
TUGS: 1×2,000 h.p.
BERTHING:

	Length (m.)	*Depth* (m.)
East Quay	577	10.5
South Quay	352	11.0

Storage: Sheds: 8,614 sq.m. Warehouses: 13,236 sq.m. Storage Yards: 181,000 sq.m. Tanks and Silos: 154,000 tons.
Equipment: 1×25 ton crane. Forklifts: 1×50,000 lb. – 92,000 lb., 1×20,000 lb. – 30,000 lb., 7×10,000 lb. – 20,000 lb. and 16×4,000 lb. – 10,000 lb. 3 tractor trucks; 18 tractors; 1 railway tractor; 35 clams; 22 chutes; 11 front-end haulers.
BULK HANDLING FACILITIES: The port has a specialised installation for the handling of dry bulk cargo, provided and operated by Almacenes Nacionales de Deposito S.A.

Characteristics: Warehousing capacity 68,000 tonnes. 36 silos arranged in 2 batteries. Conveyor belts permitting simultaneous filling of 4 holds of the vessel, with an absolute maximum rate of loading of 900 tonnes/p.h. Truck tipper. Hydraulic ramp for discharging road transport.

CARGO HANDLING FACILITIES: Loading and discharge of vessels is at the following rates:
General cargo – 25 tons/hr./hook.
Palletised cargo – 40 tons/hr./hook.
Dry bulk cargo – 80 tons/hr./hook (average).
Bales of cotton – average handling rate 100 bales/hr./hook.
Railroad and road transport up to alongside ship.

Vehicle ferries of Caminos y Puentes Federales de Ingresos, connect this port with La Paz and Santa Rosalia.

The port has equipment for handling all types of goods.

The Free Zone permits a more rapid transit of goods through the port, and a very great saving in Customs procedures.

Fumigation is provided for cargo, vessels, road and rail transport vehicles.

Lighting for night work permits work throughout 24 hours.

STEVEDORES: Working hours: 0800 – 0700 hrs.
MEDICAL: Doctors and hospital available.
TANKERS: Pemex Jetty – depth 10.0 m.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Mechanical, electrical and electronic repairs possible.
DRY DOCK: Slipway for vessels of less than 800 tons displacement (1,250 d.w.t.). Also see "General".
AIRPORT: International Airport in Guaymas, 10 km. from town.
SERVICES: Provisions, laundry, garbage disposal, communications, fumigation, equipment rental.
GENERAL: *Shipyards:* This is an important industry in the port with five shipyards handling the construction of fishing vessels for tuna, sardines and shrimps, with technology of international prestige. There is a slipway for repair of vessels drawing up to 15 ft., with a 135 m. long underwater ramp.

The Rodolfo Sanchez Taboada industrial zone managed by the National Fund for Port Development was created to activate industrial development in the port, and started with promoting industries allied to fishing, there being currently two fishmeal processing plants, a fishing vessel shipyard, and it is planned to install 25 more industries and a shipyard for construction of deep draft vessels covering an area of 173 ha. This complex has asphalted roads, electricity and drinking water supplies.

AUTHORITY: Delegacion de Puertos Mexicanos en Guaymas, Muelle Patio, Recinto Portuario, Zona Franca, C.P. 85430, Guaymas, Sonora, Mexico. *Tel:* (622) 253-60, 222-50. *FAX:* (622) 434-44.

LAZARO CARDENAS: 17.55 N. 102.10 W. (See Plan)

PORT LIMITS: Area within limits of anchoring described below. For "Arrived Ship", pilotage limits 1 mile to seaward from breakwaters.
DOCUMENTS:
7 Crew Lists.
2 Vaccination Lists.
1 Sanitary Health Declaration.
3 Stores Lists.
2 Personal Effects Lists.
Clearance From Last Port.
Voyage Memorandum, showing also Ship's Registry.
Derat Certificate and Cargo Gear Certificate regarding cargo.
5 Cargo Manifests.
5 Bills of Lading.

PILOTAGE: 24 hours advance notice through coastal station, addressed to "Puerto" Lazaro Cardenas, Mich. A VHF watch on Channel 16 is maintained Monday to Friday, 0800 to 1900 hrs. and at any time previously requested by ship's Agent. VHF range 45 miles. Pilot will board normally either at Sea Buoy (17° 53.1′ N., 102° 09.6′ W.) or at the anchorage, and at Master's request further out if required. In the event of heavy sea, vessel will be instructed accordingly via VHF.
ANCHORAGES: One mile West of Sea Buoy. Very good holding ground, care should be taken not to anchor on, or near leading line (304°) due to a submarine canyon with over 100 fathoms depths at 1 mile off the breakwater.
RESTRICTIONS: Vessels up to 200 m. LOA and up to 35 ft. salt water draft may enter or leave the port 24 hours a day, larger vessels or those with deeper draft only with daylight. Vessels with over 42 ft. salt water draft must wait for tide.
Access Channel: Length 1,500 m., depth 14.0 m.
Industrial Turning Basin: Length 500 m., depth 14 m.
Turning Basin: 700 m. diameter and 14 m. depth.
MAX. SIZE: 80,000 d.w.t. LOA 259 m., draft 13.2 m.
HEALTH: Pratique can be granted by VHF radio. Automatic Pratique is granted when coming from another Mexican port.
RADIO: Radio Maritima Manzanillo "XFM" and Radio Maritima Mazatlan "XMA" are recommended coastal stations through which to route ETAs. Initial contact on 2182 kHz.
VHF: At port, 25 watt 45 mile range. Channels 6, 16, 26, 11, 12, 13 and 69. Initial contact to be made on Channel 16, manoeuvring on Channel 6, port operations on Channels 11, 12 and 13.
RADAR: No radar service available.
TUGS: 1×1,000 h.p. and 1×4,000 h.p.
BERTHING:

	Length (m.)	*Depth* (m.)
Metal and Mineral Quay	650	14
Container Quay	284	12
General Cargo Quay	504	9.7 – 9.4

Shore cranes and sometimes ship's gear used for steel products. Significant cargoes are steel structure, coke-breeze, pig iron and finished steel products, also grain and sugar.
Equipment: 3 wharf cranes, 1×100 ton crane, 5×5-25 ton cranes and 7 cranes of various capacities; 31 tractor trucks; 12 tractors; 2 railway tractors; 10 chasis; 5 vacuums; 10 clams; 5 hydraulic clams; 10 chutes; 19 front-end haulers. Forklifts: 6×50,000 – 92,000 lb., 2×30,000 – 50,000 lb., 27×10,000 – 20,000 lb. and 25×4,000 – 10,000 lb.
Storage: Warehouses 33,974 sq.m. Yards 286,400 sq.m.
BULK CARGO FACILITIES: There is a shore crane clam-bucket type 250 t.p.h. capacity capable of loading and unloading. Clearance from boom to MLLW 35 m. Conveyor belt system in operation.

Also see "Developments".

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 1 can handle containers and heavy lifts up to 40 tons. Berth No. 2 can handle bulk and ores.
BRIDGES: No bridges.

STEVEDORES: Agents will arrange for stevedores with Lazaro Cardenas Port Services Co.
MEDICAL: Advance notice required by Agents when medical assistance required, emergencies can be routed via VHF at pilot station (Channel 16). 2 hospitals and 2 clinics with a total of 40 beds available plus a new hospital with 50 bed capacity will accept seamen. Yellow fever and cholera vaccination desirable.
TANKERS: Mineral Wharf has 10 in. diameter lines to discharge fuel oil.
DENSITY: Highly variable, can range from 1024 in dry season to 1012 in rainy season.
FRESH WATER: Available. 3 in. pipe on Mineral Wharf (American standard thread), but is recommended to boil it for drinking purposes.
FUEL: Available.
FIRE PRECAUTIONS: Tankers should fit a good ground connection to quay and have 2 lines hanging fore and aft ready for emergency towing.
CONSULS: No consuls available at present.
REPAIRS: Small and medium size repairs can be done at the workshop of the steel works if previous advice sent to Agent and Port Services Company.
DRY DOCKS: No dry docks available.
SURVEYORS: Two independent surveyors available for draft surveys, on/off hire and damage, can be contacted through Agents.
GANGWAY/DECK WATCHMEN: Not necessary or recommended.
HATCHES: Normally done by crew members, or by stevedores at ship's request.
CUSTOMS ALLOWANCES: There are no regulations. It is according to the Master's judgement for his needs for the stay in the port.
CARGO GEAR: Normally done with ship's gear but shore cranes are available upon request. Heavy lift cranes up to 40 tons.
REPATRIATION: All facilities for crew changes.
AIRPORT: Zihuatanejo Airport, nearest 135 km. 5 daily flights to Mexico City with connections to all parts of the world.
TIME: GMT minus 6 hours.
HOLIDAYS: 1st January, 1st February, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, 1st December every 6 years when there is change of President
POLICE/AMBULANCE/FIRE: Police Tel: 2-0154. Ambulance Tel: 2-05-75. Fire Tel: 2-03-33 ext. 1020 and 1000
TELEPHONE: No shore connection available.
SERVICES: Only ship chandler and laundry.
SHORE LEAVE: Crew members allowed shore leave without any special permit.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
REGULATIONS: No special regulations.
DELAYS: No delays expected.
SERVICES: Provisions, fumigations, garbage disposal, laundry.
GENERAL: Salinity in basin and docks always changing and subject to tides and river flow, recommend taking at least 5 samples from keel to surface to get an adequate average of salinity.
DEVELOPMENTS: Fertimex Berth: Phosphate rock, length 509 m., depth from 12 m. to 14 m. 1 screw unloader with capacity of 600 t.p.h. for rock and sulphur and 500 t.p.h. for salt. The facilities were damaged by an earthquake in September 1985 and repairs underway.

Grain Berth: 250 m., depth from 12 m. to 15 m.; "L" shaped berth, outside 250 m., inside 210 m. with depth 11 m. Silo with capacity 80,000 tons. Capacity of unloader 600 t.p.h.
AUTHORITY: Administracion Portuaria Integral de Lazaro Cardenas S.S. de C.V., Rio Tepalcatepel No. 29, Lazaro Cardenas, Mich. Mexico. *Tel:* (753) 220-65, 217-23. *Telex:* 01772873 Cplcme. *FAX:* (753) 221-30, 227-86.

Coordinacion de la Unidad de Puertos y Marina Mercante (Mexican National Port Authority), Municipio Libre 377-12B, C.P. 03310, Col. Sta Cruz Atoyac, 03310 Mexico D.F. *Tel:* (525) 604-4249, 604-3829. *FAX:* (525) 688-9368.

MANZANILLO: 19.03 N. 104.20 W. (See Plan)

DOCUMENTS:
14 Crew Lists.
20 Passenger Lists.
Derat Certificate.
Vaccination Certificate for each crew member.
Cargo Manifest and one copy to be visaed.
8 additional copies of Cargo Manifest, unvisaed.
10 Bills of Lading, one copy to be attached to each cargo manifest.

PILOTAGE: Pilot station on VHF Channel 16, only keeps watch when vessel expected. Pilots are ordered by Agents basis Master's ETA.

Pilot boat is black with white wheel-house on which is painted letter "H". International Code signals used. Pilot normally boards vessel about 1 or 2 miles from breakwater but if requested in advance the pilot boat will come out to 5 or 6 miles. Pilot cannot board in rough weather. Vessels waiting for Pilot may anchor about 2 – 3 miles N.W. of breakwater in depths of 12-15 fathoms.
ANCHORAGES: Vessels may anchor in the whole North part of the Bay where depths are 12-15 fathoms at a distance of 1 – 2 miles from the coast.
RESTRICTIONS: Vessels may enter at any time day or night.
Access Channel: Length 450 m. Depth 12.0 m.
MAX. SIZE: No limitation for anchoring in the bay. For mooring: Fiscal Quay, max. length 200 m., max. draft 32 ft. Interior port, length no limit, max. draft 46 ft. Container Terminal, max. length 250 m., max. draft 46 ft.

Also see "Tankers".
HEALTH: Port Health Officer and Immigration Officers board vessel at anchorage. Passengers and crew may be required for inspection.
RADIO: Coastal station Manzanillo Radio, call sign XFM, operating 0600 – 1800 hrs. local time.
VHF: See "Pilotage".
TUGS: 1 tug available, compulsory to use tug when mooring alongside. Tug will join vessel as ordered by the Pilot.
BERTHING: Old Port:

Name	*Length* (m.)	*Depth* (ft.)
Muelle Fiscal Quay		
East Side	230	36 (Outer end)
		16 (Inner end)
West Side	220	36 (Outer end)
		20 (Inner end)
Coastal Quay	305	13 – 20
Naval Quay	165	13 – 37

Interior Port: Length 1,700 m., depth 40 ft. – 46 ft.
Container Terminal: Length 250 m., depth 46 ft. 2 Panamax cranes available.

Access channel and turnig basin have a depth of 46 ft.
STEVEDORES: Advise Agent in advance number of gangs required. Discharge rate approximately 20 t.p.h. – 25 t.p.h. per gang.
MEDICAL: Agent should be advised in advance if medical attendance required on board. Hospital facilities available.
TANKERS: 2 berths available, max. length 650 ft. No restriction on beam. Max. draft: N.E. side 31 ft. (Forward) and 38 ft. (Aft). S.E. side 33 ft. (Forward) and 38 ft. (Aft).
New Pemex Jetty: Located on the inner side of the west breakwater. "T" shaped berth with length of Approx. 110 m. on outer side. Depth alongside 52 ft. (inner) and 64 ft. (seaward end). 8 cargo arms available.
FRESH WATER: Should be ordered in advance. Rate of 10 t.p.h. Vessels must furnish own hose for pumping, 2 in. coupling. No barges available for delivery at anchorage.
FUEL: Should be ordered in advance. All grades available. May be expensive due Customs fees.
CONSULS: Nearest are at Colima and Guadalajara.
REPAIRS: Only repairs to auxiliary machinery can be effected with permission. At Guadalajara hull repairs may be effected provided dry dock not required.
GANGWAY/DECK WATCHMEN: No shore service available.
OPENING/CLOSING HATCHES: Normally performed by crew members.
CUSTOMS ALLOWANCES: Each crew member may retain 1 carton of cigarettes, and 1 bottle wine/spirits for his own use. No alcohol may be taken ashore.
REPATRIATION: Can be arranged.
AIRPORT: Local airport only for internal traffic.
TIME: GMT minus 6 hours all the year round.
HOLIDAYS: The following holidays can only be worked in case of emergency: 1st January; 5th February; 21st March; 1st May; 5th May; 16th September; 12th October; 25th December; and in addition 23rd May, Anniversary of the Stevedores' Union.
POLICE/FIRE/AMBULANCE: Police Tel: 4; Fire Tel: 23; Ambulance Tel: 96.
TELEPHONES: Cannot be connected on board ships.
SHORE LEAVE: Permitted, except for crews of Russian, Cuban and Communist Chinese vessels.

Crew members left behind by vessel must be covered by 10,000 Pesos bond to guarantee repatriation expenses.
IDENTIFICATION CARDS: Not required. A Crew List should be left at the gate for checking crew.
DEVELOPMENTS: Improvements are in progress to accommodate vessels up to 30,000 tons with a draft of 40 ft.
Shipmaster's Report: December 1984. A new port is under construction in Laguna de San Pedrito close East of the Old Port. There are already piers to accommodate 4 medium size vessels, and cement poles are being rammed all around the Lagoon, also dredgers are dredging the Lagoon to an expected depth of about 14 m.

SHIPMASTER'S REPORT: May 1994.
Cargo: Loading of molasses.
Charts: B.A. Charts No. 516 and 1053.
Sailing Directions: NP 8-5.69 et seq. Guide to Port Entry 1993/94 Edition (P.1318).
Approaches: No difficulties. Manzanillo is conspicuous at night with the loom of the port lights showing up well. Pta.Campo Light is conspicuous, but is almost unnecessary as the power station complex just to the East is well lit.

In daylight, the power station chimneys (3 tall concrete structures, which appear to be about 400 ft. high, 2 thin ones serving one boiler house, and a thick one serving another. The third, apparently older, unit is served by short steel chimneys) and boiler houses are highly visible, not only because of their size, but also because combustion control seems to be very poor and the cloud of white-grey smoke is a constant mark. While the ship was alongside, smoke could be seen drifting over the town and the decks were quickly soiled with ash and soot. Power lines leading to the interior show clearly on the radar from the South.

As we were expected, communications with the Pilot on VHF Channel 16 were no problem, but on a previous passage when we stopped to aid a local fishing boat, it proved impossible to raise anyone.

The bay is wide and free from obstructions. The anchorage N.W. of the breakwater head is good.

Extensive tourist development is underway on the peninsula between the two bays and along the beach of Bahia de Manzanillo. A new marina is situated at the N.W. end of the beach. Bahia de Santiago has a small amount of tourist development at the North end.
Pilotage: Pilot boards about 1 mile from the breakwater head by boat or from a tug. Pilot boat is a fairly new launch capable of a reasonable speed and has a black hull with white cabin.

Tugs are modern and of adequate power and are well handled. One tug was used forward.

We berthed on the West side of Muelle Fiscale, a concrete deck on steel piles with a concrete warehouse (See plan in "Guide").

Depths are as noted in the "Guide".

Approach to berth was taken slowly and was without any difficulties. Berth is adequately supplied with bollards and truck tyre fenders.

Only one mooring buoy exists off the pier and this is to the East.

Cargo: 11,000 tonnes of molasses loaded using 2×8 in. hoses at an average rate of 220 cu.m./hr. Lines are under the deck of the pier and the connection is under a steel plate close to the edge of the dock at the manifold area.

Officials: Dealt with quickly. On our first visit, we had come from El Salvador and were boarded by a rummage squad from the Mexican DEA who carried out a thorough drugs search (supervised by a large Alsatian). On our second visit, we had come from U.S.A., and while the same squad boarded, they left without searching.

No matter how many copies of documents you have to hand, two more are required.

Routine items seem to require a lot of paperwork. A consignment of urgent main engine parts had to be delivered from Europe via Mexico City, but to get to us quickly, they had to be accompanied from Mexico City to Guadalajara by a member of the Agency staff at an additional cost of $800.

It was said that any personnel repatriated would have to be accompanied by Agency staff as far as Mexico City, but I cannot vouch for the accuracy of this.

Stores: Fresh provisions and bond items are available. Quality appears good, but prices quoted are very high compared with U.S.A.

Chandlers seem to start with a high quote and then come down, but still do not get down low enough for any significant orders.

AUTHORITY: Administracion Portuaria Integral de Manzanillo S.A. de C.V., Ave. Teniente Azueta No. 9, Fracc. Playa Azul, A.P. 235, C.P. 28200, Manzanillo, Mexico. *Tel:* (333) 230-61. 230-54. *FAX:* (333) 208-15.

Coordinacion de la Unidad de Puertos y Marina Mercante (Mexican National Port Authority), Municipio Libre 377-12B, Col. Sta Cruz Atoyac, 03310 Mexico, D.F. *Tel:* (525) 604-4249, 604-3829. *FAX:* (525) 688-9368.

MAZATLAN: 23.11 N. 106.26 W. (See Plan)

LOCATION: The port is located on the Pacific Ocean, at Lat. 23° 11′ N., Long. 106° 26′ 30″ W., on Northwest point of Quevedo's Peninsula.

PORT LIMITS: Dockage charges commence when vessel is made fast to wharf.

DOCUMENTS: Basic Customs documents for entry:

2 copies Form for Formal Entrance at Customs House.
2 copies Master's Oath.
2 copies General Declaration.
2 copies Arrival Crew List.
2 copies Manifest of Cargo for Discharge.
2 copies Passenger List.
1 copy Clearance from Last Foreign Port (if applicable).
2 copies Crew's Effects Declaration.
1 copy Manifest of all Foreign Cargo onboard.
1 copy Dangerous Cargo Manifest.

(All to be stamped by Mexican Consul or a representative of a friendly country).

Valid Original Vessel documents.

(Note: For more information please refer to Mexican Navigation Laws).

On arrival the following officials * will board:

Port Health Authority.
Customs.
Agricultural Department Authority for checking ship's provisions, mainly vegetables.
Doctor for checking "meat" in the fridge room.
Immigration.
Ship's Agent.
Port Authority representative.

* They may also require documents.

APPROACHES: *Channel Entrance:* 1,500 m. in length; 11.0 m. in depth and 100 m. in width in the access channel. 350 m. length and 12.0 m. depth in Harbour Dock.

Secondary Channel to fishing port: Length 1,060 m., depth 7.0 m. and width 50 m.

PILOTAGE: Compulsory. Provided by Pilot's National Union, Av.Miguel Aleman No. 616-A14, Mazatlan, Sinaloa, C.P. 82000. Tel: (69) 816101. Fax: (69) 823396. Pilots communicate with vessel through VHF Channel 16. If no answer, ask Mazatlan Port Control to call Pilots on land line. Tel: (69) 833510. Notice of ETA and request for Pilot must be made to the Pilots Union at least 24 hours in advance.

ANCHORAGE: Anchorage is designated by the Bar Pilots, which in most instances is at sea. Recommended position is with Cerro del Creston Lighthouse bearing 310°, 2 miles in approximately 10 fathoms. The approach is clear with no obstructions, except Piedra Negra Rock, which is just 7 ft. above the water.

RESTRICTIONS: No movements of large vessels permitted at night or during strong tidal streams.

MAX. SIZE: Cargo vessels: LOA 190 m., draft 27 ft. or LOA 180 m., draft 30 ft. Cruise vessels: LOA 240 m., draft 30 ft. (if fitted with bow thruster and vessel has 2 engines and uses 2 tugs).

HEALTH: Depending on the specific problem, inoculations and vaccinations must be applied to the whole crew. After which, actions will be taken to determine the possible application of the pratique.

RADIO: Mazatlan has a Coastal Radio Station (functioning 24 hours a day), which can be reached on 500, 512, 451, 455, 461 or 479 kHz on medium frequency, 4250, 6484.5, 8470, 12,703, 17,151.5 kHz on high frequency, VHF Channel 16. Lighthouse Radio on 30,009 kHz.

VHF: All facilities in operation on the Port Channel 16. To make communication, just call the name of the party you wish to contact. Once contact has been made, vessel can agree another channel to continue the communication, leaving Channel 16 free.

RADAR: No port radar service. The Military Marine Zone has radar for its own use.

TUGS: Two tugs available to assist with berthing, 2,500 h.p. and 3,600 h.p. Service is provided 24 hours a day. Tugs normally join the vessel at the Access Channel. The charge for use of tugs is minimum one hour, New Pesos $ 2,187.90 per hour for 2,500 h.p., and New Pesos $ 3,500.64 per hour for 3,600 h.p.

BERTHING: The port has 2 sections: Public Use and Exclusive Use.

Wharves	*Length* (m.)	*Depth* (m.)	*Use*
1	260	8.80	Load/discharge
2	185	7.60	Load/discharge
3	174	8.90	Load/discharge/cruises
4	168	10.00	Load/discharge/cruises
5	351	9.80	Load/discharge/cruises
Cruise	140	10.00	Cruises
Industrial Park	1,060	7.50	Tuna/fishing ships
Molasses	265	11.00	Vessels
Ro-Ro Berths	2 berths	10.00	Ferries
Pemex	22	9.00	Petroleum tankers

Supplementing the berths are 28,000 sq.m. of transit shed storage space. Approximately 60,000 sq.m. of open storage; 14,800 sq.m. of closed area; 3,500 tons of freight storage; 33,400 sq.m. of a container area; 30 electric points for freight fridge containers and 4,000 tons in tanks for blackstrap molasses.

All vessels, their Owners and Agents, desiring a berth at wharves, shall as far in advance of date of docking as possible, make application to port specifying date of docking, sailing, nature and quantity of cargo to be handled, cruise passenger lists and name of the vessel.

CRANES: Not available. Vessels are required to use their own gear. On land, the port owns forklifts of 30,000 – 80,000 lb. and less capacities.

BULK CARGO FACILITIES: See "Berthing". Quay length 1,125 m., depth 10.0 m. – 12.0 m. Maximum permissible draft 30 ft.

SPECIALISED CARGO HANDLING FACILITIES: Equipment for handling containers and blackstrap molasses available.

BRIDGES: No bridges in port.

STEVEDORES: The rates will depend on the cargoes. Recognised working hours (24 hours daily) from Monday to Saturday. There is a surcharge of 40% on Sundays and holidays.

MEDICAL: Full hospital facilities available without prior notice. Dentists available during normal working hours.

TANKERS: Only 10 in. diameter discharge lines available. No residue discharge facilities. One berth with 9.0 m. depth. Maximum permitted draft 30 ft. Shore gangways available. Facilities available to combat oil spills using containing fenders for prevention. No space for transfer facilities from ship to ship.

DENSITY: Average 1022.

FRESH WATER: Fresh water delivered to vessels at wharves or docks per tariff charge of $ 2.71 New Mexican Pesos per cu.m.

FUEL: Private firms with trucks or barges available by prior arrangement through vessel's Agent.

FIRE PRECAUTIONS: Smoking is strictly prohibited in transit sheds, warehouses, or on apron of wharves and on vessels handling dangerous, hazardous or inflammable cargo. Smoking is also prohibited in any areas where gasoline or like materials are being handled.

Explosives and hazardous or highly inflammable commodities or materials may be handled over, or received on the wharves or other facilities of Port of Mazatlan by special arrangements with and at the option of the Port Director, and the receiving, handling or storage of such commodities shall be subject to Federal and State Laws, rules and regulations.

In all cases where explosives and hazardous or highly inflammable commodities or materials are to be handled, prior consent by the Mexican Port Authority must be received, and a copy of the consent filed with the Port Director. Responsibility for safe guarding of life and property will be the duty of the shipper. Proof of sufficient liability insurance must be presented to Port Director prior to arrival of such materials.

CONSULS:

Belgium. Tel: (69) 851466.
Brazil. Tel: (69) 813209. Fax: (69) 854053.
Canada. Tel: (69) 137220 or 134455.
Denmark. Tel: (69) 850578.
Finland. Tel: (69) 813907 or 817560.
France. Tel: (69) 828552 or 826048.
Germany. Tel: (69) 135100.
Italy. Tel: (69) 851478 or 814855.
Netherlands. Tel: (69) 135155.
Paraguay. Tel: 812877.
U.S.A. Tel: (69) 852205 or 852207.

REPAIRS: Workshop for mechanical repairs. Electrical and electronic repairs possible. Repairs of very large fishing fleet or small freighters, afloat. No docking.

DRY DOCK: Shipyard and slipway for small vessels.

SURVEYORS: Lloyd's Register: Ing. Gustavo Abaroa Galvez, Alamo 268, Fracc. Alameda, Mazatlan, Sinaloa C.P. 82120. Tel: (69) 838551 (same number for Fax).

A.B.S.: Ing. Alfredo S.Troncoso Martinez, Rio Presidio 975 esp. Rio San Lorenzo, Mazatlan, Sinaloa, C.P. 82010. Tel: (69) 823320 or 813533. Fax: (69) 828442.

GANGWAY/DECK WATCHMEN: No requirement for watchmen, except for special vessel conditions or security reasons as determined by Port Director.

HATCHES: Normally opened and closed by ship's crew.
CUSTOMS ALLOWANCES: Mexican Customs Regulations apply.
CARGO GEAR: The following are available: 1×80,000, 1×30,000, 1×20,000, 1×18,000, 14×8,000, 4×6,000 and 4×4,000 lb. capacity forklifts; 14×1.5 cu.yard capacity payloaders; 22×5,000, 5×15,000 lb. capacity tractors; 1×80,000 lb. and 1×20,000 lb. capacity cranes.
REPATRIATION: Can be arranged via Mazatlan Airport or Mexico City. Several flights daily from local airport direct to Southern and Western U.S.A. airports.
AIRPORT: 12.5 miles from the port.
TIME: GMT minus 7 hours throughout the year.
HOLIDAYS: January 1st; February 5th; March 21st; May 1st; September 16th; October 12th; November 20th; December 25th; December 1st every 6 years (Presidential election year).
POLICE/AMBULANCE/FIRE: Police Tel: (69) 844499. Red Cross Ambulance Tel: (69) 851451 or 813690. Fire Department Tel: (69) 812769 or 813600.
EMERGENCY CO-ORDINATION CENTRE: Centracom Tel: 06 and Mazatlan's Fire Department Tel: (69) 812769 or 813600, radio frequency 461.950 MHz. Fire engine VHF Channel 16. Address: Av. Gabriel Leyva 1935, Mazatlan, Sinaloa, CP 82000.
TELEPHONES: Arrangements exist for placing telephones on board. A letter, detailing data regarding the telephone number in Mazatlan to which the charges will be referred, is required.
SERVICES: Fresh provisions. Salvage surveyor. Laundry service, groceries and meats, frozen vegetables, etc.
BANKS: Banks with foreign departments:

Banco Nacional de Mexico, Av. Benito Juarez esq. Angel Flores, Mazatlan, Sinaloa, CP 82000. Tel: (69) 827754. Fax: (69) 827434.

Bancomer, Av. Benito Juarez esq. 21 de Marzo, Mazatlan, Sinaloa, CP 82000. Tel: (69) 826732. Fax: (69) 817838.

STORING: Vessels can be stored by trucks or wagons.
Trucks and wagons can proceed alongside the berths.
The distance from the vessel can be as close or as far as needed.
Forklift trucks can be used on the jetty to handle stores.
Mexican Customs Regulations must be fulfilled regarding storing.
Local riggers can be employed to assist with storing.
IDENTIFICATION CARDS: Seamen's Books and a Crew List are sufficient.
GARBAGE DISPOSAL: Collection service is available and provided alongside. Arrangements must be made through the Agent.
SEAMEN'S CLUBS: None.
CURRENCY: Mexican Pesos and U.S.Dollars are accepted.
DELAYS: In mid-August, there could be delays due to weather, once the rain season starts.
GENERAL: Mazatlan is one of the largest ports in Mexico. There is a large resort with excellent hotels and large numbers of tourists. It is also the largest fishing port on the West Coast of Mexico. It has the second largest Natural Marina in the world.
DEVELOPMENTS: 100 hectares available for industry and another 365 hectares available for tourist development. Rail Road connects to Nogales, Mexicali and Mexico City. Pacific Ports Co. is building a tourist cruise terminal close to the main quay.
AUTHORITY: Servicios Portuarios de Mazatlan, S.A. de C.V., Interior Recinto Fiscal, Apdo. Postal 814, CP 82000, Mazatlan, Sinaloa, Mexico. *Tel:* (69) 823611, 823811. *Telex:* 66806. *FAX:* (69) 821822. *Contact:* Lic. Cesar Madrazo Lozano, Port Director. MINATITLAN: 17.54 N. 94.35 W.

DOCUMENTS: See "Coatzacoalcos".
PILOTAGE: See "Coatzacoalcos – Pilotage". Port about 17.5 milesup-river from Coatzacoalcos. Vessels are piloted either up-river or down-river to and from Minatitlan.
ANCHORAGES: Only at Coatzacoalcos. At Minatitlan, river is narrow and anchorage not permitted.
RESTRICTIONS: Vessels may enter harbour only in daylight. Latest time for entry and sailing to and from Minatitlan is 1500 hours.
Access Channel: Width 70 m. Depth 7 m.
Manoeuvring Basin: 850 m. × 190 m. Depth 7 m. – 11 m.
MAX. SIZE: Max. LOA at Pemex berths: 475 ft. Max. LOA at Fiscal berth: 440 ft. No breadth restrictions at both. Max. draft permitted: 21 ft. in fresh water.
HEALTH: Pratique never given by radio. Vessels granted Pratique at anchor at Coatzacoalcos. Vessels must prepare accommodation ladder, to be boarded by port authorities.
TUGS: 1 tug required to accompany vessels past the Coatzacoalcos Bridge. Tugs rejoin vessels in the river on arrival at berth. Tug's lines used. For vessels over 2,000 g.r.t. 1 tug required; over 3,000 g.r.t. 2 tugs required.
BERTHING: Normally vessels dock starboard side to. Petroleos Mexicanos (Pemex) has 8 berths for tankers, where they can load crude, fuel oil, gasoline, benzene, xylene, metaparaxylene, toluene and other petroleum derivates. Fiscal berth has a length of 73 m. depth alongside of 7.5 m. Actually only used to discharge harmless bulk fertilisers. Discharge performed by elevator at a rate of 800 tons per 24 hours, also by ship's gear using buckets at a rate of 200 tons per day per hatch.
BRIDGES: See "Coatzacoalcos – Developments".
STEVEDORES: No ETA advice necessary. Agent of Receivers of cargo order gangs to discharge. Straight working hours from 0700 to 1500 Mondays through Saturdays. Latest time to order gangs 0645 and 1445 hrs.
TANKERS: No ballast to be discharged in the river. All ballast to be discharged to shore tanks through 2×6 in. pipelines.

PEMEX No. 1 Marginal Berth:
Location 78 m. downstream from the South Face of the Lazaro Cardenas Refinery.
Arrangement: Marginal.
Length: 34 m.
Width: 12.4 m.
Useful Berthing Length: 34 m.
Height Above Average Low Tide: 3.43 m.
Depth: 3.5 m. at Average Low Tide.

PEMEX No. 2 Marginal Berth:
Location: Immediately after Berth No. 1.
Arrangement: Marginal.
Length: 103 m.
Width: 9 m.
Useful Berthing Length: 103 m.
Height Above Average Low Tide: 3.43 m.
Depth: 3.5 m. at Average Low Tide.

PEMEX Quay No. 3:
Location: 507 m. downstream from the South Face.
Arrangement: T Shaped.
Length: 12.5 m.
Width: 4.6 m.
Useful Berthing Length: 12.5 m.
Height Above Average Low Tide: 3.6 m.
Depth: 8.5 m. at Average Low Tide.
Services: Drinking water, 13 product loading and discharge lines.

PEMEX Quay No. 4:
Location: 667 m. from the South Face.
Arrangement: Pier.
Length: 17.9 m.
Width: 14.8 m.
Useful Berthing Length: 37.8 m. with the aid of 2 Dukes of Alba.
Height Above Average Low Tide: 4 m.
Depth: 9.4 m. at Average Low Tide.

PEMEX Quay No. 5:
Location: 824 m. downstream from the South Face.
Arrangement: Pier.
Length: 21.5 m.
Width: 15.6 m.
Useful Berthing Length: 31.6 m. with the aid of 2 Dukes of Alba.
Height Above Average Low Tide: 3.7 m.
Depth: 3.6 m. at Average Low Tide.

PEMEX Quay No. 8:
Location: 1,063 m. downstream from the South Face.
Arrangement: Marginal.
Length: 91.7 m.
Width: 6.1 m.
Useful Berthing Length: 91.7 m.
Height Above Average Low Tide: 3.9 m.
Depth: 1.5 m. at Average Low Tide.

PEMEX Quay No. 9:
Location: 1,178 m. downstream from the South Face.
Arrangement: Marginal.
Length: 240 m.
Width: 29.1 m.
Height Above Average Low Tide: 3.73 m.
Depth: 3.1 m. at Average Low Tide.
Services: Track for mobile crane, bitts, lighting and water (fresh), gas feed points.

Tanks: Tanks which PEMEX has within the General Lazaro Cardenas Refinery.

No. of Tanks	*Content*	*Capacity Millions of Litres*
10	Wax Crude	108.3
1	Non-wax Crude	5.3
10	Petrol	93.2
11	Diesel	94.7
7	Primary Paraffin	32.3
7	Turbosine	12.8
9	Fuel Oil	90.2
5	FR-3 Asphalt	20.3
11	Hexane Aromatics	8.8
2	Heptane Aromatics	0.9
1	Betolime	0.7
20	E. Benzine	13.1
7	Toluene	8.3
9	Xylene	6.8
2	Aromine	1.5
4	F.C.C. Catalytic	19.4
2	Heavy Aromatic	2.3
1	Reformed Naphtha	6.5
2	Formed Wood Spirit	11.6
1	Poli Gasoline	1.7
1	Refined	7.3
1	Primary G.	7.3
4	Absorption Liquid	7.6
3	Recuperated Oil	21.8
8	Neutral Lubricants	5.2
17	Finished Lubricants and those in preparation	2.2
9	Finished Lubricants and those in preparation.	1.5
11	Balance Tanks	81.0

MEDICAL: Hospital facilities available.
DENSITY: Averages 1006.
FRESH WATER: Available at all berths, but is not recommended.
FUEL: Marine diesel oil and Bunker "C" obtainable at Pemex berths. Bunker "C" also obtainable by barge, and diesel oil only by tank truck.
REPAIRS: No dry docks available, but small repairs can be done in shore repair shops.
CUSTOMS ALLOWANCES: No restrictions. Free use on board. 2 Customs guards remain on vessel while alongside.
AIRPORT: About 15 minutes' car drive away. Regular flights to Mexico City.
TIME: GMT minus 6 hours.
TELEPHONES: No facilities for placing telephones on ships.
DEVELOPMENTS: Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.
AUTHORITY: Coordinacion de la Unidad de Puertos y Marina Mercante (Mexican National Port Authority), Municipio Libre 377-12B, C.P. 03310, Col.Sta Cruz Atoyac, 03310 Mexico, D.F. *Tel:* (525) 604-4249, 604-3829. *FAX:* (525) 688-9368.

MORRO REDONDO, Cedros Island: 28.03 N. 115.11 W. (See Plan)

LOCATION: Morro Redondo: Bulk Salt Terminal-Lat. 28° 10′ N., Long. 115° 11′ W.
DOCUMENTS:
3 Crew Lists in Spanish, visaed by Mexican Consulate in previous port.
12 Ordinary Crew Lists.
3 Stores and Provisions Lists.
3 Lists of Crew Effects.
1 List of Crew Vaccinations.
Clearance from Last Port.
Certificate of Registry.
The Authorities such as Port Health, Customs and Immigration together with the Agent will board after the vessel has berthed. Only in exceptional circumstances will the Authorities board at anchor or off the berth.
PILOTAGE: Pilotage available day and night. Pilot arranged by Agent on the basis of ship's ETA. Pilot boards when ship is within 1 to 3 miles of the berth, from a small MFV type pilot launch, painted black with white cabin.
ANCHORAGES: Good holding ground is found 1 – 3 miles North of the berth in 20 to 35 fathoms with the ship loading tower in line with the Morro Redondo Lighthouse.
RESTRICTIONS: None. Vessels enter and clear 24 hours a day on a first come first served basis. Height of chute above MLLW is 48 ft.
MAX. SIZE: Minimum depth alongside 17 m. Largest ship to date 160,000 d.w.t.
HEALTH: Pratique granted by Port Health Doctor who boards on arrival. Requires Crew Vaccination Certificates and Master's Declaration of Health.
RADIO: Vessels can transmit and receive through KFS San Francisco Radio or KOK Los Angeles Radio.
VHF: Loading installation calls VHF Channel 16 when ship is expected and gives any information at this time. VHF is normally manned on Channel 12 so further communication is available.
RADAR: None.
TUGS: 5 tugs are available ranging from 2,500 h.p. to 3,200 h.p. each. 2 tugs are normally used for berthing, 1 tug for unberthing. Tugs' lines at no extra charge.
BERTHING: 1 berth only, 710 ft. in length consisting of steel dolphins and wood facings, also large mooring buoys, 1 ahead and 1 astern, each about 600 ft. distance from berth. 2 mooring ropes must be bent together to reach buoys.
The large stockpile of salt at the root of the pier is conspicuous.
CRANES: None.
BULK CARGO FACILITIES: Port is solely for the purpose of loading solar salt in bulk. Loader is belt and spout type and is fixed in position. Vessel must be shifted from hatch to hatch by ship's crew.
STEVEDORES: No special requirements. Average loading rate 2,000 t.p.h.
MEDICAL: No advance notice required, doctor will attend on board at dock. Limited hospital facilities available.
DENSITY: 1026.
FRESH WATER: Not available.
FUEL: Not available.
FIRE PRECAUTIONS: No smoking allowed on dock.
CONSULS: None.
REPAIRS: No repairs possible.
GANGWAY/DECK WATCHMEN: Shore gangway only, electrically operated and tended by stevedores. Deck watchmen required.
HATCHES: Opened and closed by ship's crew.
CARGO GEAR: One fixed loader only, controlled by stevedores.
REPATRIATION: Possible, with advance notice to Agent.
AIRPORT: Close to berth. Average 3 flights per week to mainland.
TIME: Standard time GMT minus 8 hours. Daylight saving time GMT minus 7 hours from last Sunday in April to last Sunday in October.
HOLIDAYS: Cargo is worked every day of the week including Sundays and holidays (except Labour Day – 1st May).
TELEPHONES: No telephone contact with mainland.
TELEGRAPH: Government public telegraph services available in village about 11 km. from port.
SHORE LEAVE: Allowed. No special shore passes required.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Mexican Pesos (MEP). U.S.$ 1.00 = 3.30 MEP (July '94).
AUTHORITY: Exportadora de Sal, S.A. de C.V., Postal Address: P.O. Box 439054, San Ysido. NANCHITAL: 18.00 N. 94.27 W.

DOCUMENTS: See "Coatzacoalcos".
PILOTAGE: See "Coatzacoalcos Pilotage". Port about 3 miles up-river from Coatzacoalcos.
ANCHORAGE: See "Coatzacoalcos Anchorage".
RESTRICTIONS: Vessels may enter Coatzacoalcos only with daylight. Navigation from Coatzacoalcos to Nanchital remains closed from1630 hrs. to 0700 hrs.
HEALTH: See "Coatzacoalcos".
TUGS: When vessels proceed to Nanchital, 1 tug accompanies vessel to pass the Coatzacoalcos bridge, according to Port Regulations. Tugs again join vessels when arriving at Nanchital berths. Tug's lines used. For vessels over 4,000 g.r.t. 2 tugs used.
MAX. SIZE: Max. LOA 580 ft. No breadth restrictions. Max. draft permitted 27 ft. 06 in.
BERTHING: Normally vessels dock port side alongside. When current and circumstances permit vessel is turned around and docked starboard side to. There are 2 docks at Nanchital, called Old Pier and New Pier. Both to load crude oil, No. 6 fuel oil by pipeline of 6 in. and up to 10 in. Mooring, unmooring, connecting and disconnecting hoses performed by Pemex own labourers.
Old Pemex Quay:
Location: Right bank of Rio Coatzacoalcos 10.5 km. from the mouth of the port.
Built: 1950.
Arrangement: T-shaped.
Length: 88.3 m.
Width: 12.4 m.
Useful Berthing Length: 95 m. including Dukes of Alba.
Height Above Average Low Tide: 1.8 m.
Useful Depth: 8 m. at average low tide.
Services: Fresh water, lighting, bollards, fuel supply points.
New Pemex Quay:
Location: Facing the Pemex installations at Nanchital.
Built: 1969.
Arrangement: T-shaped.
Length of Platform: 32.4 m.
Width of Platform: 13 m.
Useful Berthing Length: 86.7 m. using 2 Dukes of Alba.
Height Above Average Low Tide: 2.71 m.
Depth: 9 m. at average low tide.
Services: Fresh water, lighting, fuel supply points, loading hoses.
Marginal Quay:
Location: On right bank of Rio Coatzacoalcos 11 km. upstream from port entrance.
Built: 1959.
Arrangement: Marginal.
Length: 239 m.
Width: 30 m.
Useful Berthing Length: 239 m.
Height Above Average Low Tide: 2.05 m.
Depth: 8 m. at average low tide.
Use: By Pemex.
Tanks: Used by Pemex:
3 for crude oil (8.2 million litres).
1 for fuel oil (15.2 million litres).
Located within inhabited area:
2 for diesel (1.59 and 8.7 million litres).
1 for fresh water (10.3 million litres).
MEDICAL: Hospital facilities available only at Coatzacoalcos.
TANKERS: See "Berthing".
BALLAST: Special regulation for tankers that no ballast water to be discharged in the river. Deballasting performed by 2 pipelines of 6 in. diameter to shore tanks.
DENSITY: Average 1006.
FRESH WATER: Available at both berths but is not recommended for drinking.
FUEL: Available only at the Pemex Oil Terminal at any time.
CONSULS: None.
REPAIRS/DRY DOCKS: No dry docks available, but small repairs can be done in shore repair shops.
CUSTOMS ALLOWANCES: No restrictions. Free use on board. 2 Customs guards stay on board. Vessel to provide them boarding and lodging.
AIRPORT: At Minatitlan, about 1 hour car drive away. 2 regular flights to Mexico City.
TIME: GMT minus 6 hours.
TELEPHONES: No facilities for placing telephones on ships.
DEVELOPMENTS: Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.
AUTHORITY: Coordinacion de la Unidad de Puertos y Marina Mercante (Mexican National Port Authority), Municipio Libre 377-12B, C.P. 03310, Col.Sta Cruz Atoyac, 03310 Mexico, D.F. *Tel:* (525) 604-4249, 604-3829. *FAX:* (525) 688-9368.

PROGRESO: 21.17 N. 89.39 W. (See Plan)

PORT LIMITS: For port fees and freight contracts, port limits are considered as a zone within the area bounded by the meridian crossing Chicxulub port in the East, the meridian crossing Chelem port to the West, and the meridian passing through the Entrance Buoy (cylindrical beacon, painted with red and white stripes) situated in Latitude 21° 21′ 03″ N., Longitude 89° 41′ 09″ W.

DOCUMENTS:
7 copies of Crew List, visaed by Mexican Consulate.
6 copies of Ship's Stores List.
6 copies of Personal Effects Declaration.
6 copies of Bills of Lading.
Clearance from last Port.
Derat Certificate.
Tonnage Certificate.
Safety Certificates.
Loading Plan.
Stability Calculations.

PILOTAGE: Compulsory. The Pilot boards at the Entrance Buoy, his launch is identified by the international signal code day or night. Approximate arrival time must be notified by the consignee at least 24 hours before arrival, and confirmed 2 hours prior to arrival. Pilots monitor VHF Channel 16, and Telephone No. (993)-5-00-09, during office hours (0800 hrs. – 1800 hrs.)

ANCHORAGES: 1.5 miles N.W. of the Entrance Buoy in 30 ft. depth for vessels with over 20 ft. draft, and 2.5 miles N.W. of Pier No. 2, for vessels of 16 ft. draft or less, in 21 ft. depth.

RESTRICTIONS: There are no night time restrictions, except for vessels of over 16 ft. draft at Piers No. 1 and No. 2, and over 23 ft. draft at Piers No. 3 and No. 4.

MAX. SIZE: No restrictions, except for vessels over 23 ft. draft.

HEALTH: A representative of the Health Department checks the vessel on arrival.

RADIO: Progreso Coastal Radio Station (XFN) listens from 0600 hrs. to 1900 hrs. local time on 2182 kHz, Channel 16 VHF and 500 kHz. Arrival advice may be sent through the station 24 hours beforehand.

TUGS: Compulsory for vessels over 500 g.r.t. The port has 4 tugs, 2×800 h.p., 1×1,350 h.p. and 1×2,350 h.p.

BERTHING: The facilities are located 2 km. offshore in position 21° 18.25′ N., 89° 40.3′ W., and 6.5 km. offshore in position 21° 20.75′ N., 89° 40.7′ W.

Pier	*No.*	*Length* (m.)	*Official Draft* (ft.)	*Use*
Fiscal	1	204	16	General/Containers
Fiscal	2	204	16	General/Containers
Fiscal	3	240	23	General/Containers/Grain
Fiscal	4	140	23	General/Containers/Grain
Fiscal	5	140	23	General/Containers/Grain
Mooring Berth	1	170	16	Gasoline
Mooring Berth	2	170	18	Diesel (Pemex)

CARGO HANDLING EQUIPMENT:

	Capacity
2 Cranes	25 tons.
2 Cranes	18 tons.
1 Crane	120 tons.
12 Forklift trucks for stacking and unstacking	8,000 lbs.
4 Forklift trucks for stacking and unstacking	4,000 lbs.
9 Suction devices	50 tons/hour.
7 Suction devices	70 tons/hour.
6 Truck tractors	50 tons.
8 Flats for containers	40 tons.
1 Elevator	346 cu.m./hr.
3 Chutes	20 tons.
1 Forklift for container handling	80,000 lbs.
3 Conveyors for grain	250 t.p.h.
2 Buses	40 Passengers.
2 Forklift tractors	1 ton.
3 Forklift trucks	6,000 lbs.
5 Suction devices	120 t.p.h.

STEVEDORES: Service to be requested 24 hours in advance through consignee.

MEDICAL: Medical attention available at the port. There are hospitals in the city of Merida, 32 km. away.

TANKERS: There are 2 moorings or buoys, for unloading products with 8 in. and 12 in. lines.

DENSITY: 1015.

FRESH WATER: Safe drinking water available on piers through 2.5 in. pipes, or by tank trucks.

FUEL: Diesel can be supplied by truck, as well as grease and lube oil in drums. They should be requested 24 hours in advance by the consignee. Heavy fuel cannot be supplied.

WATCHMEN: These services are usually undertaken by vessel's personnel.

OPENING/CLOSING HATCHES: Usually performed by vessel's crew.

CERTIFICATES: See "Documents".

CUSTOMS ALLOWANCES: A carton of cigarettes and 2 bottles of whisky per week.

IDENTIFICATION CARDS: Not required.

CONSULS: Located at Merida, 30 minutes by road.

Cuba	Tel: 91-99-21.26.77
Germany	21.21.77
France	21.60.13
Lebanon	21.77.76
Switzerland	91-99-21.75.00
U.K.	21.67.99
U.S.A.	21.60.30

REPAIRS: Specialised shops can undertake repairs.

SURVEYORS: Lloyd's Register Agent: Manuel Mier y Teran. Tel: 91-993-5-00-29, 5-00-42 and 5-01-36. Fax: 50966. Telex: 753834 Reimme.

DRY DOCKS: Three docks (Astimex, Zena and Bonanza).

REPATRIATION: Possible.

AIRPORT: 37 km. from port, about 30 minutes driving time. Daily flights to Houston, Miami and New Orleans, also flights to Central America, Cuba, Jamaica, Germany, and connections via Can-Cun and Mexico City.

TIME: Central Standard Time (local time) GMT minus 6 hours.

POLICE/AMBULANCE/FIRE: Port Police, Tel: 5-00-48 and 5-00-90.
Ambulance, Tel: 5-04-94 (Navy Hospital).
Firemen and Municipal Police, Tel: 5-00-26.

EMERGENCY CO-ORDINATION CENTRE: Ninth Naval Zone (Yukalpeten Port) monitors VHF Channel 70, 2182 kHz and 500 kHz. Tel: 5-02-85.

SERVICES: Repairs to radar, Loran, echo sounders, gyros (any electronic device), inspections and underwater repairs.

HOLIDAYS: January 1st, February 5th, March 21st, May 1st and 5th, June 1st, September 16th, November 1st and 20th, December 1st (every 6 years), December 25th. It is possible to hire labour at 100% increase on these days.

SHORE LEAVE: No restrictions.

GARBAGE DISPOSAL: A garbage collection service is available. Waste bags and collector are provided. Tel: (91-993) 5-10-90, 5-27-10, 5-26-09. Collection time: 0800 hrs. to 1800 hrs., Monday to Saturday. Cost: About $ 8.19 (depending on currency rates) per drum or equivalent up to 200 kg.

WASTE OIL DISPOSAL: Available on all wharves. If incineration is required by any Health Authority, this will cost about $ 0.22 (depending on currency rates) per kg.

DEVELOPMENTS: The remote terminal is planned to be extended 4.5 km. Northwards with an area of 7,000 sq.m. and a 1,000 m. of lineal wharf.

AUTHORITY: Direccion General de Puertos Y Marina Mercante, P.O.Box 21, Calle 78 No. 146, 97320 Progreso, Yuc., Mexico. *Tel:* 5-00-90 and 5-12-55. Residence 40-39. *FAX:* 5-26-29. *Contact:* Captain Gilberto Andrade Castro, Captain of the Port.

Administracion Portuaria Integral de Progreso, S.A. de C.V., Calle 32, Entrada Muele Fiscal Lado Poniente, C.P. 97320, Progreso, Yuc., Mexico. *Tel:* (993) 521-74, 505-84. *FAX:* (993) 521-74.

PUERTO MADERO: 14.44 N. 92.25 W. (See Plan)

PORT LIMITS: A vessel is considered an "arrived ship" when it is alongside the berth.

DOCUMENTS:
10 Crew Lists (Spanish language), 3 stamped.
10 Passenger Lists (Spanish language) 3 stamped.
10 Stores Lists (Spanish language).
10 Cargo Manifest (Spanish language), 3 stamped.
3 Arrival Reports.
10 Bills of Lading.
3 Crew Customs Manifests.
1 W.H.O. Form.

All papers must be correct, Immigration Officer checks Crew List against all Passports/Seaman's Books.

Vessels are boarded on arrival by 7 officials.

PILOTAGE: Compulsory. Pilot will board vessel 1 mile S.E. of Fairway Buoy, depth approximately 8 fathoms.

Vessel must send ETA 24 hours in advance of arrival. Ship's Agent to request services of Port Pilot in advance. Pilot will reply by giving instructions to be followed on arrival.

ANCHORAGES: Call the Pilot on VHF Channel 16 and agree on the position of anchorage and the side where the gangway will be positioned.

As a secondary area, vessels may anchor about 2 miles to the S.W. of the Port Entrance in 10 fathoms of water.

The bottom is muddy at the anchorage and throughout the port.

RESTRICTIONS:
Channel between Breakwaters: Length 1,167 m. Width 80 m. Depth 9.7 m.
Manoeuvring Basin: Length 450 m. Width 80 m. Depth 9.5 m.
Channel to Main Dock: Length 350 m. Width 80 m. Depth 9.15 m.
Access Channel to Fish Dock and Navy Dock: Length 650 m. Width 60 m. Depth 7.0 m.

MAX. SIZE: Max. LOA 165 m. Max. beam 25 m. Max. draft 8 m.

Measurements are in accordance with the manoeuvring area and the depth of water throughout the port.

Tankers are not received in the port as there are no discharge lines, and the manoeuvring area does not permit it.

HEALTH: Request Free Pratique 48 hours and 24 hours in advance of arrival via Salina Cruz.

Report any suspicious illness to Agent prior to arrival in order that vessel may be directed to Quarantine Anchorage.

Health Officials require:
Health Declaration.
Derat or Exemption Certificate.
Crew Vaccination Certificates.
Crew List.

RADIO: Via Manzanillo or Salina Cruz, ETA 48 hours and 24 hours prior to arrival.

All vessels approaching the port to berth, and when effecting manoeuvres within the area of the port or when leaving the port, must effect all communications by VHF Channel 16.

Additional communication or for safety provided by the Naval (Coast Guard) on 500 kHz. International Call Sign for Aid to Fishing Vessels 2182 kHz on R/T or Channel 16 VHF.

VHF: Salina Cruz and Puerto Madero on VHF Channel 16.

RADAR: There is a radar system but it is only used by the Naval "Coast Guard", and no contact with this system is possible, although all vessels approaching this port are detected by this radar.

TUGS: There is a service tug (750 h.p.) which comes alongside the vessel at the port entrance, working with vessel until she is berthed alongside a quay. The services of the tug are compulsory for all shipping.

BERTHING: There are 2 reaches, an expansion basin, a turning basin and a general cargo berth 150 m. length, the depth is 9.2 m. at LW (salt water).

Vessels usually moor port side alongside and drop the starboard anchor with 3 or 4 shackles. The cargo handling is by means of ship's own gear and there are four conveyor belts for the handling of boxed bananas.

CRANES: The port has no cranes, discharge and loading has to be with the ship's derricks.

BULK CARGO FACILITIES: In the port is a single general cargo berth. Bulk cargo is handled directly from the hold to the lorry or railway trucks using hoppers and scoops and loaded into the hold and raised by the ship's derrick.

At present the port handles bananas and coffee outwards and bulk fertilisers (and in sacks) inwards. Also bagged cement and heavy machinery for hydro-electric stations.

SPECIALISED CARGO HANDLING FACILITIES: There is no equipment for handling container vessels.

BRIDGES: The entry of vessels is free, there being no bridges over the channel.

STEVEDORES: Masters of vessels must request the requisite number of gangs 24 hours in advance via the ship's Agent.

General cargo – 18 to 20 tonnes/p.h./hook.

Bananas – 3,000 cases per hour by the side-port system.

MEDICAL: 24 hours notice for requesting medical assistance.

A sick person can be hospitalised if the Master so requests by radio.

International Health requires certificates of vaccination and where necessary personnel can be vaccinated if required.

TANKERS: No facilities.

DENSITY: Average 1025.

FRESH WATER: The port quay has drinking water hydrants controlled by Administracion Portuaria Integral de Puerto Madero S.A. de C.V.

FUEL: It is possible to provide bunkers in small quantities via pipes, average supply 15,000 litres.

In cases of emergency, bunkers can be requested by radio from the ship's Agent.

FIRE PRECAUTIONS: Those normal for a cargo vessel.

CONSULS: There are no Consulates in the port. There is one in the town of Tapachula, Chiapas, 28 km. from the port.

Consul of Guatemala: 2a Calle Oriente No. 33, 30700 Tapachula, Chiapas. Tel: 6-12-52.

REPAIRS: It is possible to have repairs made to engines of small vessels in the town of Tapachula.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: It is necessary to post a watchman of the Immigration Service on the gangway when the vessel is berthed in the port.

HATCHES: Opening and closing of hatches by the crew or stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or their equivalent; 1 litre of spirits.

CARGO GEAR: Loading/discharging is carried out by means of the ship's derricks.

REPATRIATION: Possible.

AIRPORT: 12 km. from the port is the new International Airport of Tapachula.

Regular Flights:

Mexico/Tapachula:

Airline	Departure	Arrival
Aeromexico	1100 hrs.	1230 hrs.
	2015 hrs	2145 hrs.
	0700 hrs.	0835 hrs.
Taesa	1950 hrs.	2120 hrs.
Aviacsa	1545 hrs.	1815 hrs.
Tapachula/Mexico:		
Taesa	0700 hrs.	0830 hrs.
Aeromexico	0702 hrs.	0837 hrs.
Aviacsa	0715 hrs.	0950 hrs.

Executive Air Services: To any part of the country and Central America.

TIME: Local time is GMT minus 6 hours throughout the year.

HOLIDAYS: 1st January, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, 1st December every 6 years when the Executive Power is transferred.

Loading and discharge services can be provided on these days, but it is considered as overtime.

POLICE/AMBULANCE/FIRE: Police Headquarters Tel: 6-10-93, Tapachula, Chiapas.

Mexican Red Cross Tel: 6-19-49, Tapachula, Chiapas.

Fire Brigade Tel: 5-20-65, Tapachula, Chiapas.

EMERGENCY CO-ORDINATION CENTRE: Headquarters of the 22nd Military Naval Area on 500 kHz. Also see "Radio".

TELEPHONES: There is no telephone service available in the port.

SERVICES: No tank cleaning or dirty ballast facilities.

BANKS: Bancomer, S.N.C., Central Poniente y 4a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6-12-20. Telex: Bcchme – 77715, Bcchme – 77716.

Banamex, S.N.C., 4a Av. Central Norte No. 5, 30700 – Tapachula, Chiapas. Tel: 6-29-24. Telex: Bntpme – 77714.

Banca Serfin, S.N.C., 6a Avenida Norte No. 8, 30700 – Tapachula, Chiapas. Tel: 6-1/-70. Telex: Serfme – 77735.

Multibanco Comermex, S.N.C., 6a Avenida Norte y 5a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 6-15-22.

Banco de Credito Rural del Istmo, S.N.C., 6a Avenida Norte y 1a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 6-14-20.

Banco Mexicano Somex, S.N.C., Central Poniente y 2a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6-27-60. Telex: Bmsome – 77731.

Banco Nacional Pesquero y Portuario, S.N.C., Central Oriente No. 42, 30700 – Tapachula, Chiapas. Tel: 5-03-52.

Banobras, S.N.C., 6a Avenida Norte No. 4, 30700 – Tapachula, Chiapas. Tel: 5-15-58.

Banco Internacional, S.N.C., 1A Poniente y 2a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6-28-00. Telex: Bichme – 77733.

Banpais, S.N.C., 4a Avenida Norte y 1a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 5-00-31.

Banco del Atlantico, S.N.C., Central Norte No. 18, 30700 – Tapachula, Chiapas. Tel: 5-12-90.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: A Seaman's Book is sufficient for going as far as the town of Tapachula, Chiapas.

DELAYS: There are no delays, on arrival a Pilot proceeds to bring the vessel into port, and the work gangs are already on the quay, commencing work as soon as the vessel is secured.

GENERAL: The port is relatively new, it lacks port infrastructure for loading/discharge of goods. But in order to handle any type of cargo, equipment can be brought from the nearest port if the ship's Agent requests it 48 hours in advance and at the same time presents the list of cargo so as to ascertain the type of equipment required. With regard to the labour force, the gangs can alternate to provide 24 hour working.

DEVELOPMENTS: It is planned to extend the breakwaters.

AUTHORITY: *Port Captain:* Captain Mauro Hector R. Martinez Hernandez, Operations Office, 30830 Puerto Madero, Chiapas, Mexico.

Apartado Postal No. 117, 30700 Tapachula, Chiapas, Mexico.

Fruit Agent: Jose Leyba, P.O. Box 311, Tapachula, Chiapas (Province), Mexico. Tel: 615-31.

RABON GRANDE: 18.14 N. 94.23 W.

SHIPMASTER'S REPORT: September & October 1982.

LOCATION:

SBM No. 1 Lat. 18° 13′ 34″ N., Long. 94° 23′ 07″ W. Light "S".

SBM No. 2 Lat. 18° 13′ 34″ N., Long. 94° 20′ 29″ W. Light "O".

PILOTAGE: Pilot boards in a position midway between the two buoys. Tug rendezvous in same position with mooring equipment which is loaded on the port side.

ANCHORAGES: Anchorage position as advised by the Pilot is to the N.W. of a line joining the 2 SBMs and about 2 miles distant. A point of note is that there were at least 20 vessels anchored to the North and West of the port entrance, mostly oil tankers awaiting berth in the inner harbour. A U.S. Government chart covers the port area and SBM berths but was not available through the local Agency.

While the vessel was lying off in the rendezvous position waiting for Pilot and mooring equipment a very strong set to the S.E. was experienced, the wind being Northerly, Force 6 throughout the afternoon. Also during the vessel's stay it was noted that the wind increased to Force 5 – 6 every afternoon and gusting to Force 6 – 7 during the night time squalls.

Shipmaster's Report: January, 1982. Not same vessel.

Anchorage 2 to 8 miles Northwards from the breakwater. Poor holding ground anywhere in the area due to the river discharge giving a muddy ooze bottom. Even with over 9 shackles out in 18 fathoms of water, ships drag anchor when subject to the gales which blow from the Northern quadrants.

The onset of these gales are sudden and fierce, blowing towards the shore. Apart from the very accurate weather reports advising that a front is approaching, it was noted that an appreciable rise in barometric pressure preceeded the gale. The normal practice in the event of a gale being forecast was to have the engines on 10 minutes' notice and if the vessel began to drag, the anchor was weighed and the vessel cruised off the area until the storm abated.

RESTRICTIONS: Mooring to SBM in daylight hours only but unmooring allowed at anytime. Both operations depending on prevailing weather conditions.

Recommended arrival drafts are as follows:

Length O.A. (m.)	*Draft Forward* (ft.)	*Draft Aft* (ft.)
175 – 200	14	24
200 – 225	16	26
225 – 250	18	28
over 300	20	32

RADIO: Communication between ship and shore is by vessel's VHF set and constantly monitored by shore personnel.

Radio Pratique is obtainable by forwarding the following information to the Agent at least 24 hours before arrival:

(a) Vessel's name and Nationality
(b) Master's name
(c) Total crew on board
(d) Last port.
(e) Derat Certificate – Port and date of issue
(f) ETA local time (GMT minus 6 hours.)

It is also advisable to establish as soon as possible which grade the installation require to load first.

Communications with the Agency was by Telex via Portishead and/or Mobile, Ala., the latter preferred by the Agency until within range of the local station.

Pajaritos Radio Station: Call sign XFF2: Station operated by Pemex.

Traffic lists are broadcast on the even hour plus 30 minutes. Weather forecast at 0830, 1430, 2030 hrs. local time. Local time is GMT minus 6 hours.

Ship (Tx.) kHz	*Shore (Tx.)* kHz	*Times*
4191.0	3700.0	Night only
6286.5	6442.5	Day and night
12573.0	12790.0	Day and night
8382.0	8690.0	Day and night
16764.0	17075.0	

It is advisable to pass cargo information, grades, quantities and order of loading through this station as sometimes the Agencies fail to pass on information received from vessels to Pemex, the operating oil company.

On this visit (October 1982) all radio traffic was passed through Mobile Radio Station Alabama, and was received within a reasonable time at Coatzacoalcos.

BERTHING/LOADING: The 2 SBMs are fitted with 2×16 in. hoses with connection to port side of vessel.

Two grades are available, Isthmus Crude and Maya Crude and the line clearing amount is 34,000 barrels.

Loading rates vary from 17,000 to 35,000 U.S. bbls./p.h. depending on stocks and number of vessels loading. During heavy squalls and/or electrical storms loading is suspended. While secured to the buoy engines required on immediate/minimum notice.

During loading operations and while secured to the buoy the Pilot, Loading Master, 2 Petroleum Inspectors and 8 Hose Crew remain on board and have to be fed and housed. The Hose Crew change every morning and the Loading Master every third day or thereabouts.

October 1982: Once again loading on the SBM. 2 grades of oil, Maya and Isthmus Crude oils. The rate of loading varied from 12,000 to 25,000 bbls./p.h.

SHIPMASTER'S REPORT: July 1984.

Vessel (140,000 d.w.t.) anchored 320° (T) 2.1 nautical miles from No. 2 SBM which flashes 'U' every 15 seconds. Bottom was glutenous mud. Accommodation required for 1 Pilot, 1 Loading Master, 2 Cargo Surveyors and 8 hosemen. The 8 hosemen work in shifts so only require 4 beds.

Agent receives all Immigration, Customs and Health Papers. Documents required were 4 Crew Lists (1 visaed), Personnal Effects Lists and Stores Lists.

Launch service to shore available at times agreed with Agent.

In the event of squalls/thunderstorms tug will tow from the stern.

Stores are available and from the quality of items seen ashore – mangoes, avocadoes and fresh fish appear to be of good quality.

SHIPMASTER'S REPORT: September 1985.

DOCUMENTS:

5 copies Crew List.
2 copies Stores List.
2 copies Personal Effects List.
1 copy Vaccination List.

FRESH WATER: Fresh water can be arranged through Pemex or vessel's agent.

ROSARITO: 32.22 N. 117.06 W. (See Plan)

PILOT'S REPORT: April 1993.

LOCATION: The PEMEX Rosarito Terminal facility is an open, unsheltered roadstead, located 7.5 miles West of South Coronado Island, and 20 miles S.S.E. of Point Loma (8 miles South of the international border).

The Terminal Sea Buoys are located approximately 1,600 ft. due West of Conventional Berth No. 1 and Conventional Berth No. 2. There are no continuous lights and no good references at night.

Rosarito is an uninhabited port, due to difficulty of transportation of personnel of the Mexican Government (Authorities). The nearest inhabited port is located approximately 55 miles South of Rosarito, and is called Ensenada. All ships agencies are located in Ensenada, except the PEMEX Ship Agency for attending their own ships, who are in Rosarito.

There are no local charts or any other publication with the approaches to Rosarito, but it is possible to use the conventional American or British charts.

Rosarito Pilots recommend all arriving ships to keep South of Coronado Island for fixing position.

Conventional Berth No. 1:
Lat. 32° 21′ 43″ N., Long. 117° 05′ 49″ W.
Conventional Berth No. 2:
Lat. 32° 22′ 14″ N., Long. 117° 05′ 05″ W.
SBM: Lat. 32° 20′ 51.7″ N., Long. 117° 06′ 13.5″ W.

DOCUMENTS: As for other Mexican ports, with correct number of copies. All documents must be sent to the Agency on shore, normally they will attend onboard ship. This is explained by the fact that due to heavy swell it is difficult and sometimes dangerous to clear the breakwaters with boats.

Clearance and ship's papers are returned to the ship about 5 hours before departure.

PILOTAGE: Pilot boards one mile N.W. of SBM, for mooring at the conventional berths or at the SBM. The Pilot will remain on board during all operations and in the anchorage awaiting good weather conditions for mooring (if PEMEX requests).

The pilot boat has a black hull with white superstructure, and is equipped with VHF, standing by on Channels 9 and 16.

The Pilot boards together with the Loading Master and Cargo Inspector (Caleb Brett or Saybolt). Both will remain on board during all operations. The Loading Master is the PEMEX representative, and is the contact with shore cargo receivers.

Pilot, Loading Master, pilot boat, mooring boats and tugs are at hand all the times.

ANCHORAGE: The best place for ships awaiting berth to anchor is 1.5 miles N.W. of the SBM, in approximately 15 fathoms. The bottom is sand/shells and mud, and is very good holding ground.

The location of the SBM is Lat. 32° 20′ 51.7″ N., Long. 117° 06′ 13.5″ W. The SBM is 1.5 miles from the nearest point on shore.

RESTRICTIONS: The Authorities cannot permit disembarkation of any crew member, except in cases of serious medical condition.

Mooring and unmooring is only permitted in daylight.

The above restrictions are for the safety of crew members, PEMEX staff on board, Pilot and ships during transfer operations.

Also see "Max. Size".

MAX. SIZE: *Conventional Berth No. 1:* Max. LOA 210 m., max. g.r.t. 26,500 tonnes, max. draft 34 ft.

During cargo operations, if wind exceeds 20 knots or swell exceeds 12 ft., hoses will be disconnected and vessel may go to the anchorage, if the Pilot recommends such action.

Conventional Berth No. 2: Max. LOA 171 m., max. g.r.t. 17,000 tonnes, max. draft 28 ft.

During cargo operations, if wind exceeds 15 knots or swell exceeds 8 ft., hoses will be disconnected and vessel may go to the anchorage, if the Pilot recommends such action.

SBM: Max. LOA 215 m., max. g.r.t. 35,000 tonnes, max. draft 50 ft.

During cargo operations, if wind exceeds 30 knots or swell exceeds 12 ft., hoses will be disconnected and vessel may go to the anchorage, if the Pilot recommends such action.

BERTHING: *Conventional Berth No. 1:* A 5 point mooring (See "Plan"), used for the transfer of light oils (diesel and jet oil) and fuel oil. It is located 1,535 m. offshore, 950 m. South of Conventional Berth No. 2 and 2,675 m. N.N.E. of the SBM.

There are 2 unlit spar buoys and two can buoys. The seaward can buoys mark the end of the submarine hoses.

Light Oil Hose: 9×30 ft. lengths × 12 in. diameter hoses and 12 in. connection.

The submarine pipeline is 16 in. diameter. The maximum pressure for transfer operations is 4 kg./sq.cm.

Fuel Oil Hose: 10×30 ft. × 12 in. diameter hoses with 12 in. connection.

The submarine pipeline is 20 in. diameter. The maximum pressure for transfer operations is 6 kg./sq.cm.

Conventional Berth No. 2: A 5 point mooring (See "Plan"), used for transfer of LPG only. It is located 1,315 m. offshore and 950 m. North of the Conventional Berth No. 1.

There is one unlit spar buoy and one can buoy. The seaward can buoy marks the end of the submarine hoses.

LPG Hose: 8×35 ft. × 8 in. diameter hoses with 12 in. connection.

The submarine pipeline is 10 in. diameter.

SBM: The SBM is located 3,100 m. offshore and 2,675 m. S.S.W. of Conventional Berth No. 1. It is used for the transfer of light oil (gasolines). There are two hoses.

Leaded Gas Hose: 19×30 ft. × 16 in. diameter hoses with 12 in. connection.

Unleaded Gas Hose: 20×30 ft. × 16 in. diameter hoses with 12 in. connection.

Samsom Ropes: There are 2 Samsom ropes of 100 m. length and 6 in. diameter.

CARGO OPERATIONS: *Hose Connection:* The connection/disconnection of the cargo hoses is handled by ship's crew with advice and assistance of the Loading Master.

Cargo Inspector: The Cargo Inspector remains on board during all transfer operations. He takes samples of the parcels to discharge and undertakes ullaging together with the Chief Officer.

Submarine Hose and PLEM Inspection: After heavy storm activity, the terminal will arrange for a diver to inspect the submarine hose and PLEM for damage, or see if hoses are covered by mud/sand.

MEDICAL: Only available in an emergency. Contact U.S.C.G. on usual frequencies, and they will send helicopter.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Agent:* It is possible to contact ships agencies in Ensenada through San Diego Marine Operator via VHF.

If the ship's Master requests, the Agent will come to Rosarito every day and will contact the ship.

Supplies: Provisions can be obtained in small quantities, but only during good weather.

WEATHER: *Winds:* From April to October prevailing light N.W. wind sometimes turn to the North or West, but the dominant directions are from the N.W. During the period of April/October good weather normally prevails. Swell is predominantly from the West with height above 3 ft. to 5 ft. It is the best period for mooring in the berths.

From October to April, special attention should be paid to weather forecasts, because it is considered the bad weather season in Rosarito. The winds are variable and sometimes very, very strong. When the storms come from South or S.W., it is impossible to keep the ship in position in the Conventional Berths and sometimes also at the SBM, because when the wind comes from the Southern quadrant, the swell increases up to 12 ft. During this period of bad weather in Rosarito called "The Santa Condition", strong winds coming from the N.W. with velocities up to 68 knots have been registered.

All winds from South or West or N.W. normally come with the Pacific storms during that period, and increase of the swells is dependent on the storm.

Current: Very light from South or S.W. during period April to October.

SALINA CRUZ: 16.10 N. 95.12 W. (See Plan)

RESTRICTIONS: *Access Channel:* Length 500 m., depth 13.0 m.
Turning Basin: Diameter 185 m., depth 10.0 m.

MAX. SIZE: 32,000 d.w.t., LOA 180 m. and max. draft 10.0 m.

TUGS: 4 tugs up to 9,450 h.p. available.

BERTHING: 759 m. for ocean-going vessels, 759 m. for coastal vessels, 210 m. for fishing vessels, 221 m. for naval vessels and 382 m. for shipbuilders, and depths up to 31 ft.

1 container berth with length 274 m. and depth 39.4 ft. One Panamax Portico crane available.

Equipment: Cranes: 1×18 tons, 2×20 tons, 1×300 tons and 4 cranes with various capacities (unknown); forklifts: 11×5,000 lb., 2×6,000 lb. and 17×8,000 lb.; 15 tractor trucks; 1 railway tractor; 6 chutes; 3 front-end loaders; 6 clams.

Storage: 11,529 sq.m. of warehouse space and 73,440 sq.m. of container storage yards.

MEDICAL: Hospital available.

TANKERS: Tankers of 250,000 d.w.t. berth at the Offshore Terminal.
Sea buoy: Lat. 16° 05′ N., Long. 95° 11′ W. Make the arrival to this location about 5 miles S.S.E. of breakwaters.

Charts: For approach H.O. No. 21441; for arrival and entry H.O. No. 21442; regular traders should have Mexican Chart SM No. 667 on board.

General: Salina Cruz is located on the West coast of Mexico, at the head of Gulf of Tehuantepec.

Note: North winds blow strongly from the Isthmus into the Salina Cruz coastal lowland, particularly during the winter. However, these Northern gales are not forecasted. The hurricane season is from June to October, the most common hurricane path is Westward, parallel to the coast, offshore.

South winds can be very strong in May and June, ships may have to leave the anchorage and the loading buoys.

The currents are unpredictable, in the Gulf of Tehuantepec and close inshore the set is either East or West.

Tanker Terminals: There are 2 tanker loading/discharging berths in the Inner Harbour, at Shed No. 4 and No. 5. There are 3 single point mooring buoys Southwestward of Salina Cruz: SPM No. 1 and No. 2 are used to load product tankers for domestic distribution up the coast. SPM No. 3 is used to export crude oils.

Communications: Standard communications procedures, through the local coast station at Salina Cruz.

Voice communications are via the Petroleos Mexicanos Marine Operations Office – Pemex Operations VHF, calling on Channel 16 or 9, the office is manned throughout 24 hours.

Caution: Internal communications within Mexico are occasionally delayed, therefore, ETA notices and other messages must be sent at the earliest possible time.

Pilotage: The Pilot boards from Pemex workboat either at the anchorage, or 1 mile South of the breakwaters, or 1 to 2 miles to the S.E. of the SPM location.

Anchorage: Tankers should anchor East of the entrance range line 346°, not closer than 0.5 miles. The holding ground is only fair. Anchorage is prohibited in the pipeline area within 0.75 miles of the SPMs and North to the coastline.

Tugs: 2 harbour tugs of about 2,400 h.p. each are kept at this port by Pemex. The tugs are used regularly to assist tankers berthing at Nos. 4 or 5 and at the SPMs. 2 workboats are available and are normally used when berthing at the SPMs. Tugs and launches are equipped with VHF.

Entering and Berthing: The short West Breakwater by the Outer Harbour Entrance was lengthened about 0.3 miles to the South; 2 new breakwaters, 0.4 to 0.2 miles long were built off the beach about 0.8 and 1.1 miles West of the Outer Harbour Entrance. Work in progress is not shown on available nautical charts.

Tankers berthing at the Inner Harbour Berth No. 4 (No. 5 used mainly by smaller ships) proceed on the leading range 346° with a tug aft. The tug should have a rope through the centerline fairlead proceed at minimum steering speed and drag the port anchor on a short scope of chain. As soon as the stern clears the entrance, the ship is turned to the E.N.E. with the assistance of the tugs, and the engine run astern to stop the ship. When the ship is stopped in the basin, she is then backed to her berth with the tugs working alongside, her bow close to the tip of the West pier. Tankers are normally moored with 5 ropes forward and 5 ropes aft. The dock fendering is of old tyres so it is imperative to berth the ship very softly.

Note: The opening between the East and West pier is 50 m., the stone and concrete tips of these piers are fendered with rotating tyre-like rubber fenders; however, precise positioning and control of the vessel, turning and stopping quickly once inside the basin is most important.

The basin is silted up along the North Quay face, sufficient depth for a tanker drawing 30 ft. may extend only 250 m. N.E. of the entrance. The basin is dredged to maintain depth and turning basin size, it is necessary to obtain up-to-date information from the Pilot, also to plan and agree on the manoeuvre, before entering.

Work in progress: (a) wharf building on the East side of other basin and on the N.E. corner of the Outer Harbour, (b) dredging at different locations, (c) construction of a new LPG berth in the N.W. side of the Outer Harbour. The Master should verify with the Pilot that works in progress do not interfere with ship's operations.

Restrictions: Entering and sailing during daylight hours only.

Hoses/Cargo: Normally gasolines, DO, FO, are loaded on tankers, through 8 in. hoses, for distribution along the coast. Isthmus crude can be loaded at No. 4 and 5 for export. Products and chemicals are occasionally received.

Note: Ships sailing from Berth No. 5 are frequently turned on the tip of the pier. This operation is undesirable; moreover it is not necessary as tugs are being used. The Master should discuss the unberthing/turning operation with the Pilot, making sure the ship will not be damaged.

Berthing at the SPMs: The 2 smaller SPMs No. 1 and No. 2 have been in use several years. Tankers in coastwise traffic only are berthed during daylight hours with the assistance of Pilot and one or two tugs and workboat. Cargo is normally gasoline, diesel oil and fuel oil.

The larger SPM No. 3 became operational in 1982, to load crude oils for export on large ships (from 100,000 to 250,00 d.w.t.) Tankers pull up 2 floating nylon hawsers (18 in. diameter and 50 m. long) with chafing chain. The use of mooring brackets is preferred, however, the ship's officer must supervise the seamen sent by Pemex to ensure the proper lead of messenger ropes and the proper use of brackets.

Note: The responsibility, for satisfactory moorings and proper use of the mooring brackets, rests completely with the ship's Master. Pemex provides a group of seamen, usually lead by a bosun and/or a young tanker's officer, to help and assist the tanker's crew in mooring, to handle equipment straps and shackles which may be shore supplied for mooring, and for the hose connections.

Combination accommodation ladder/pilot ladder should always be rigged ready when operating at the SPMs.

Hoses and Cargo: 3 floating hoses respectively of 910 ft., 945 ft., 980 ft. total length, carry flashing red marker lights. The connections are standard 16 in. quick coupling with valve. There is one crude oil pipeline 48 in. and 1×30 in. pipeline, length 15,000 ft. to the beach. Either crude, Isthmus or Maya, is loaded and the rate is from 40,000 bbls./hr. – 60,000 bbls./hr. Pemex expects that all large tankers shall be gas inerted and are able to load/deballast simultaneously.

Note: The 3 SPMs are fitted with flashing light and diaphone, however, reliance should not be placed on these navigation aids; this is valid for the other navaids as well, which do on occasion fail without being reported.

It is recommended to obtain from the local radio station the status of navaids, and also check the status with Pemex Operations on VHF.

SPM 1 – Flashing white, diaphone, letter R, 16° 8.5′ N., 95° 12.9 W.
SPM 2 – Flashing white, diaphone, letter M, 16° 8.5′ N., 95° 13.7 W.
SPM 3 – Flashing white, diaphone, letter U, 16° 6.9′ N., 95° 13.3 W.

The approach to Salina Cruz should not be attempted during periods of heavy rain. The breakwaters, the port area and the hills behind the port give a good radar picture at greater than 10 miles distance.

Ballast: The SPM 30 in. pipeline is designated for ballast, however, it may well be used for cargo instead. Tankers should always arrive with clean ballast only. Tankers in ballast must adhere to usual requirements; i.e., draft and trim satisfactory for safe manoeuvring, taking into consideration the ever present strong wind.

Pollution Control: The Mexican rules against pollution are strictly enforced, however, very little equipment is available locally for prevention and clean-up. No oil dispersant in stock, nor are the tugs or workboats equipped for spraying. The Master must obtain, from the Agent and the Pemex representative a copy of local regulations relating to pollution prevention, and advice as to how to handle and report pollution.

Firefighting: The town fire brigade and the Navy are able to fight fires on ships berthed in the Inner Harbour. Ships at the SPM have to rely on their equipment only, with possible minor assistance from the tugs.

Services: Bunkers available at the Inner Harbour Berths, also at SPM Nos. 1 and 2. Fresh water is piped to Berth Nos. 4 and 5, but it is recommended that drinking water be taken only in emergency. Shore leave. Crew changes, delivery of spare parts, should not be scheduled at Salina Cruz. Small amounts of provisions and stores can be obtained. Minor repairs can be arranged with workshops. Surveyor, Divers, Mexican nautical publications must be requested before arrival.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Workshops for mechanical, electronic and electrical repairs.

DRY DOCKS: Drydock for vessels up to 21,000 tons displacement (25 ft. draft) and syncro-lift for vessels up to 8,000 tons displacement. Slipway for small craft.

SERVICES: Stores, laundry, fumigation.

DEVELOPMENTS: Breakwater under construction.

SHIPMASTER'S REPORT: May 1982.
Berth: New container terminal in Outer Harbour. Length 240 m., depth alongside by sounding 8.8 m. – 12.0 m.
Pilotage: Pilot boards 1 mile South of harbour entrance.
Wharf: Concrete structure on concrete piles, protected by rubber fenders.
Chart: B.A. Chart No. 659.
Tugs: 2 tugs available.

Berthing: To prevent damage to vessel and gantry crane it should be ascertained that the gantry crane has been moved to the North end of the wharf before berthing.

SHIPMASTER'S REPORT: October 1983.

Documents:

Last Port Clearance.
12 Crew Lists.
3 Vaccination Lists.
6 Ship's Stores Lists.
6 Crew Manifest Declarations.

The local Authorities will board vessel on arrival.

Approaches: The Lighthouse of Salina Cruz and the Pemex tanks are easily seen when Bahia de Bamba is abeam to port at a distance of 7 miles.

Pilotage: Pilot will board vessel at position Lat. 16° 08.15′ N., Long. 95° 11.4′ W., if berthing on arrival.

Anchorages: A good holding anchorage at position: 1 mile E.N.E. of Buoy No. 3.

Radio: All telegrams via Mazatlan Radio/XFM or MW Salina Cruz/XFQ.

VHF: VHF Channel 9 is for Pilots/Pemex Operations. VHF Channel 13 is working channel and Channel 16 is for the Agent.

Tugs: Two tugs are used for mooring. One of 4,500 h.p. and the second of 2,600 h.p.

On completion of mooring, the second tug will make fast astern in order to hold vessel away from SBM at all times. It is wise to have engines stand-by on 10 minutes' notice in case of sudden Southern winds and to prevent any damage to the SBM.

Berthing: There are 3 SBMs (Monobuoys). No. 1 has 12 fathoms, No. 2 has 15 fathoms and No. 3 has 20 fathoms depth.

Loading: Two lines of 16 in. each which are connected with the main line of 36 in. to the shore.

Though "Pemex" (suppliers) tanks are placed high above sea level in the mountains, Pemex use 6 loading pumps with a rate of about 12,000 bbls./hr. each.

Cargo is Mexican Blend Crude Oil. API 33.5, temperature 90°F (approx.).

Ballast: There are no facilities for discharging dirty ballast to shore tanks or pits. Vessels must arrive with clean ballast.

Medical: Local Hospital and a Navy Doctor from Pemex available.

Density: 1025.

Fresh Water: Available by barge.

Fuel: Can be obtained via Pemex.

Consuls: None.

Repairs: Available for vessels up to 13,000 gross tons.

Surveyors: Lloyd's Surveyor can be reached via the local Agency.

Repatriation: Repatriation can be arranged. One must take the bus to the "Capital" of the State (2 hours' ride). Thence to Mexico City by plane.

Time: GMT minus 6 hours (Standard Time).

Shore Leave: Pemex has a launch which will serve the vessel at certain hours. Agent to be notified of vessel's requirements. No shore-pass requested.

Developments: Port of Salina Cruz is now under construction. Calculated to be completed in three years' time.

General: N.N.E. winds are standard at Salina Cruz, rising up to 40 knots in Summer. Other seasons up to Force 5-6 (Beaufort).

Fresh provisions available at a very fair price.

The language is Castellanos (Spanish). Only "Pemex" representatives speak reasonable English.

REPORT: April 1985.

Tankers: 3 SBMs located in position Lat. 16° 06′ 54.5″ N., Long. 95° 13′ 15.7″ W. about 5 km. S.W. of Salina Cruz Inner Harbour Entrance. Max. depth at single point type mooring is 98 ft. Max. allowed d.w.t. 250,000. Maximum/minimum LOA allowed 338 m. – 320 m. No shore ballast facilities so vessel must have clean/segregated ballast. Manifold to be fitted with 16 in. (150 p.s.i.) reducers. Port side derrick/boom to have 15 tons capacity. Bow fairlead to have minimum diameter of 18 in. distance bow fairlead to forward bollard to be between 2.7 m. – 8.0 m. Average pumping rate 60,000 – 70,000 bbls./p.h.

Note: Buoy Nos. 1 and 2 are for handling domestic traffic (gasoline, diesel oil, heavy oil, etc.) up to 60,000 d.w.t.

SHIPMASTER'S REPORT: August 1993.

Charts: B.A. 659 and 1050.

Pilot Books: N.P. 8, (5.13)

Approaches: From S.W., port is very conspicuous from a great distance as loom of lights at the Refinery, which is situated a few miles to the East of the port, can be seen.

As both radars were out of action, I cannot comment on radar echoes, but the approach was no problem, taken with caution. The leading lights were as bright as the Morro de Salinas main light, being visible at more than 10 miles.

The 3 SBMs to the West of the port are visible at a useful distance.

Communications: On this charter, all ETA messages were sent to Mexico City. No replies to particular questions regarding berthing were answered. Salina Cruz Port Control was contacted on VHF Channel 16 at about 35 miles and gave the required information. We were directed to anchor to the East of the leads in 20 m. of water in company with 3 other tankers. Port Control assigns particular positions for anchoring.

On closer approach, Pemex (operations) contacted the ship and confirmed berthing information.

Once contacted, Port Control works on VHF Channel 6 and Pemex on Channel 9.

Berthing: Berthing is carried out in the harbour between 0600 hrs. and 1800 hrs. only.

Pilot boarded from black-hulled, white cabined fast launch.

Entrance to outer harbour is narrow and was made with great care. Tugs were in attendance as soon as we passed the breakwater entrance and were on hand to help line up for the 50 m. wide passage into the inner harbour.

Room is at a premium as soon as the gap is passed. The ship has to be stopped within a few metres and tugs do not waste time making fast.

Ship was swung to starboard and put alongside Berth No. 4 and backed to position at Berth No. 5. Berths are very well fendered with solid rubber fenders and large roller fenders.

Ships always berth starboard side to at Berths No. 4 and 5. Berths are clean and tidy and well supplied with fire fighting equipment. Lines are provided for a range of lighter fuel products and ballast. Fresh water is available.

Loading: Ship loaded 100,000 bbls. of gasoil. 1×10 in. and 1×8 in. hoses were provided.

Loading was by gravity from one tank on the hills above the port. Maximum rate was said to be 10,000 bbls./hr.

Inspection and loading operations were efficient and carried out with a minimum of fuss. Bunker survey was insisted upon.

Clearance: Port Control request arrival times and quantities. These are not passed on, so Pemex then ask for the same information, in the middle of berthing, and then the Agent wants the whole lot again. As we had been cleared "from San Francisco to Panama for orders", I had to produce telexes with new cargo orders and Log Books (Deck and Engine Book) for scrutiny by the Harbour Master.

On departure all papers were completed before departing the dock, except for the Harbour Master's Clearance and a visaed Crew List which local rules insist upon. These items were brought out to the ship an hour later.

Unberthing: With limited clearance in the inner harbour, the preferred routine is to walk the ship along the dock and use 2 headlines onto the last shore bollard to hold the bow while one tug eases the stern out until lined up for passage through the gap. This was accomplished without any difficulty or danger.

Services: As the port seems to be a major base for repair and storing for Pemex ships, it may be a good port for routine stores. The large shed on the dock were well stocked with a wide variety of engineering items for Pemex ships, so that people ashore may be used to dealing with more unusual engineering items.

The small dockyard was busy with small naval vessels. It has a moderate sized synchrolift and a small dry dock. A 20,000 tonne Pemex ship was alongside for some repairs.

At Berth No. 5, there is a rigging loft for wire and rope items needed at the SBMs, and it looked able to cope with most jobs.

Shipchandler boarded. No stores were bought as we had just stored in U.S.A., but he disposed of 1,500 litres plastic garbage for U.S.$100.00, which is better than San Francisco, where the quote was U.S.$600.00 minimum.

Developments: The new Eastern breakwater noted on the chart as being under construction (1986) seems complete, and 2 new jetty berths for large tankers are under construction about 2 cables to the West of this. A moderate Southerly swell was causing a heavy surf on the beach under Morro de Salinas, and whether this will affect the new berths, only time will tell.

Limits: Inner harbour: Length 180 m., beam 28 m.

Berth No. 4: Max. draft 31 ft.
Berth No. 5: Max. draft 28 ft.

A new berth is sited on the Western side of the outer harbour, equipped with 4 loading arms. Max. LOA 220 m., max. beam 32 m. Draft unknown.

AUTHORITY: Delegacion Coordinadora, Av. Tampico No. 39-B Altos. *Tel:* 4-04-36, 4-04-46.

Empresa de Servicios Portuarios, Recinto Portuario. *Tel:* 4-01-01 and 4-00-44.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553-87-11.

SAN CARLOS: 24.47 N. 112.08 W. (See Plan)

PORT LIMITS: The limit of the port is up to parallel 24° 39′ 41.5″ N. which passes through the position of the East Buoy of the channel entrance on Mexican Chart F.H.614.

DOCUMENTS:

Port Captaincy:

Clearance from Last Port.
Crew List.
List of Passengers.
Voyage memorandum including dates and ports visited during the previous 3 months.

Port Operations:

Stowage Plan.
Certificate of cargo handling equipment on board.
List of peculiarities of the vessel.

Health:

List of Vaccination Certificates of the crew.
List of Vaccination Certificates of passengers for the port.
Derat or Exemption Certificate.

Immigration:

Visaed Crew List.
List of Passengers for the port, also visaed.

Maritime Customs: Vessels without cargo, and arriving from abroad:

Declaration of arrival in Ballast.

Vessels coming from abroad with cargo for the port:

General Manifest for the port.

List of Passengers for the port.
List of Explosives, Corrosives, Flammables for the port, visaed.
Vessels coming from a Mexican port to load:
Customs Clearance.
Vessels coming from a Mexican port to unload:
Customs Clearance.
Cargo Manifest, visaed.
List of Passengers for the port.
List of Explosives, Corrosives, Flammables for the port.
Inspection of Animal Health:
List of Meats (tinned or fresh or refrigerated or in deep freeze).
Vessels bringing animals to the port:
Veterinary Health Certificate.
Transport Permit.
List of Meats (See above).
Inspection of Vegetable Health:
When products are not brought for discharge:
Derat Certificate or Exemption.
When products brought for discharge:
Derat Certificate or Exemption.
Vegetable Health Certificate.
Importation Permit from the Secretariat of Agriculture and Cattle Breeding of Mexico.

PILOTAGE: The Port Captaincy has VHF Channel 16 for receiving ETAs. The Pilot comes on board vessels by motor launch from San Carlos within Magdalena Bay.

There is a Landfall Buoy in position Lat. 24° 38.6′ N., Long. 112° 05.4′ W., one mile from the entrance to the buoyed channel.

ANCHORAGES: Any location between meridians 112° 05.0′ W. and 112° 03′ W. and parallels 24° 38.5′ N. and 24° 37.5′ N. Depths approximately 105 ft., sandy bottom.

RESTRICTIONS: With 26 ft. draft, vessels may navigate the Channel between Buoys "9" and "10" to "11" and "12". With a tidal rise of 4 ft., vessels enter and leave with a draft of 30 ft. at high tide.

MAX. SIZE: LOA 600 ft., beam 100 ft. and draft 30 ft.

HEALTH: When coming from abroad, hoist the yellow flag. Inspection is effected when the vessel is berthed or at the Inner Anchorage. If the vessel is coming from another Mexican port, the Health Authority's visit is not necessary.

RADIO: La Paz Coastal Radio: Call sign "XFK".

VHF: Port Captaincy on VHF Channel 16, operates between 0800 hrs. and 1800 hrs.

RADAR: This service does not exist.

TUGS: None available.

BERTHING: The "L" shaped quay is made of concrete and has 102 m. of berthing length. There are two "Dukes of Alba" making up a length with the quay for berthing of 204 m. Also there are 2 mooring buoys, one at each end of the berth. The minimum depth at LW is 37 ft. in the berthing area. Loading and discharging is effected using the vessel's own gear. It is possible to work in 2 or 4 gangs, according to the type of vessel and cargo.

CRANES: None.

BULK CARGO FACILITIES: On the quay there are installations of "CONASUPO" with a tower for shipment of grain, located in the angle of the "L". The grain generally shipped is wheat at the rate of 200 t.p.h.The height of the end of the grain output tube above sea level at full tide is 12 m.

SPECIALISED CARGO HANDLING FACILITIES: Vessels berth at the same quay as above with ammonia, unloading by means of installations located in the angle of the "L". These installations are owned by Fertimex.

BRIDGES: None.

STEVEDORES: Vessel's Agent submits a request 24 hours in advance for stevedoring services through the delegate of Puertos Mexicanos. Four products are mainly handled in the port: Cotton at a rate of 90 bales per gang/hr. Bulk wheat at a rate of 200 t.p.h.; bagged at the rate of 25 t.p.h.; Fertilisers in bags at a rate of 25 t.p.h.; and fish (tuna) at an average of 25 t.p.h. Since the mechanical equipment on shore is sufficient for 2 gangs in the case of cotton, stevedores are requested for this number of gangs. As far as wheat is concerned, the loading rate drops to 80 t.p.h. when the warehouse has little wheat in it.

Stevedores work from 0800 hrs. to 0200 hrs. of the following day, i.e. they work 18 hours in 24 hours.

MEDICAL: There is a civil hospital in Ciudad Constitucion 45 minutes away from San Carlos. There is a telephone service available for calling ambulances. There are 6 doctors in the port.

TANKERS: There is a concrete quay with length 280 m. and depth 35 ft., owned by the Federal Commission of Electricity.

DENSITY: 1023.

FRESH WATER: This is supplied when the vessel is berthed. There are various 2 in. hydrants. The rate of supply is 10 t.p.h., and the approximate cost is 13,000 Mexican Pesos per ton.

FUEL: Moderate quantities of diesel oil can be supplied, and it is brought by road tanker from La Paz, the vehicles themselves pumping supplies to the vessel.

CONSULS: There are no consuls in the port.

REPAIRS: There are workshops at Ciudad Constitucion 45 minutes away by road.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: This service does not exist.

HATCHES: Hatches are opened and closed by the stevedores.

SURVEYORS: None.

CUSTOMS ALLOWANCES: Tobacco, wine and spirits are placed under seal.

CARGO GEAR: For loading and discharge, ships' gear is used. There are no cranes in the port.

REPATRIATION: There are Immigration Authorities in the port. There are 3 hotels in the city and several in Ciudad Constitucion and in La Paz. La Paz, is the capital of the State of Southern Lower California, and is approx. 3 hours away by road.

AIRPORT: None in the port. Airport at La Paz where there is an international airport called General Marquez de Leon.

TIME: GMT minus 7 hours. There are no seasonal time changes.

HOLIDAYS: 1st January, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, and 1st December (every 6 years). These dates are all obligatory.

POLICE/AMBULANCE/FIRE: In the port there are Municipal and Prison Police (Tel: 25) and ambulance. Fire fighting services come from Ciudad Constitucion.

TELEPHONES: No service for installing phones on board vessels, but in the port there is a telephone service for communications with any part of the world.

SERVICES: None available.

SHORE LEAVE: No restrictions.

IDENTIFICATION: Seaman's Book is sufficient.

REGULATIONS: No naked lights when there is cotton in the port or ammonia is being discharged.

DELAYS: As there is only one berth, there are times when the berth is occupied, but this does not occur often. Berthing is done in shifts.

GENERAL: *Post Office:* There is a Post Office in San Carlos.
Telegraph Office: There is a telegraph office but the service is not for maritime traffic. For such purpose, vessels must send their ETA via La Paz Coastal Radio Station.

DEVELOPMENTS: At the moment, there is no programme.

AUTHORITY: Capitania de Puerto de San Carlos, Apartado Postal No. 5, Puerto San Carlos, B.C.S., Mexico. *Contact:* Captain Felix Armas Ortiz, Port Captain.

Coordinacion de la Unidad de Puertos y Marina Mercante (Mexican National Port Authority), Municipio Libre 377-12B, C.P. 03310, Col.Sta Cruz Atoyac, 03310 Mexico, D.F. *Tel:* (525) 604-4249, 604-3829. *FAX:* (525) 688-9368.

SAN JUAN DE LA COSTA: 24.24 N. 110.40 W.

(See Plan)

SHIPMASTER'S REPORT: April 1985.

LOCATION: 4.1 miles South of Pta. Coyote in position: Lat. 24° 23.5′ N., Long. 110° 40.4′ W.

PILOTAGE: Compulsory. Pilot boards 1 mile to 2 miles East of berth.

ANCHORAGE: Vessels have to wait at anchor if wind exceeds Force 2 on the Beaufort Scale. Berthing only carried out in calm weather.

TUGS: Not available.

BERTHING: Open berth exposed to Easterly winds. Depth alongside 32 ft. Vessels berth port side alongside only.

There are 2 mooring buoys located about 140 m. from each end of the berth to the seaward side, used to make fast 2 slack ropes (1 forward and 1 aft) in order to assist vessel to sail, sailing mostly without Pilot.

Approach to berth is free of dangers.

On average 3 vessels a month load at the berth.

LOADING: Fixed loading installation (conveyor belt) with loading capability of about 600 – 700 t.p.h. Cargo loaded was rocky phosphate in bulk.

Vessel has to shift for loading each hold. During shifting special care should be taken as shifting is considered extremely dangerous, especially for loading extreme holds on account of short length of berth (for vessels above 180 m. in length) in combination with the prevailing winds.

FRESH WATER: Not available.

REPATRIATION: Can be arranged from the nearest port (La Paz).

GENERAL: *Provisions:* Fresh provisions not available.

AUTHORITY: Coordinacion de la Unidad de Puertos y Marina Mercante (Mexican National Port Authority), Municipio Libre 377-12B, C.P. 03310, Col.Sta Cruz Atoyac, 03310 Mexico, D.F. *Tel:* (525) 604-4249, 604-3829. *FAX:* (525) 688-9368.

TAMPICO (Including Altamira): 22.16 N. 97.47 W.

(See Plan)

PORT LIMITS: Vessels in Mexican ports are considered to be arrived vessels as soon as permission to moor has been granted by the Port Authorities.

DOCUMENTS:
7 simple copies of Crew List.
5 simple copies of Cargo Manifest.
1 Visaed Passenger List or visaed Statement to the effect of no passengers, and 5 simple copies.
7 copies of Stores List.
7 copies of Personal Effects List.
Derat Exemption Certificate.
Passports or Seaman's Books of all crew.
Clearance from Last Port of Call.
3 copies of lists of packages containing explosives, flammable or corrosive materials.

PILOTAGE: Pilot ordered by Agent who requires 24 hours' notice of vessel's arrival. Pilots board vessels 2 miles off the breakwater. Vessels may anchor about 2 miles off the breakwater waiting for Pilot. Pilots on VHF Channel 14.

ANCHORAGES: About 2 miles East of breakwater in 40-60 fathoms of water.

RESTRICTIONS: There are no restrictions for movements at night. The drafts of the vessels will be governed by the mooring zones in which they are working.

The depths at these berths are as follows:

*Free Zone Quay	30 ft.
Minera Autlan Quay	28 ft.
Petroleos Mexicanos Quay	32 ft.
Termimar Quay	28 ft.
Metals and Minerals Quay	30 ft.
Anahuac Cement Quay	28 ft.
Grain Terminal	28 ft.

The navigation channel to the Mexican Petroleum Maritime Terminal has a depth of 38 ft. and that to the Free Zone 33 ft.

*This depth is subject to constant dredger maintenance, the draft being reported weekly to the Ship Agents.

MAX. SIZE: The max. length is 656 ft. There are no restrictions for beam. The drafts will be those admissible in the corresponding berth used.

HEALTH: No Radio Pratique. Pratique granted after docking and presentation of documents to Port Authorities. In case of disease or fever on board, Master to give notice to Agent before arrival.

RADIO: Tampico has a coastal station with frequency 2182 kHz., as have the Port Captain, the Pilots' Office and Puertos Mexicanos Office. All have the same frequency and VHF Channel 16.

VHF:

Port Captain	: Channel 12.
Puertos Mexicanos	: Channel 68.
Pilot's Office	: Channel 14.
Coastal Radio Station	: Channel 12, 16, 26 and 27.

TUGS: 4 tugs are available, intended solely for port manoeuvres, comprising "R.D.29" 1,700 h.p.; "SPTA-1" 4,352 h.p.; "SPTA-2" 3,200 h.p. and "SPTA-3" 4,352 h.p. Also Petroleos Mexicanos have tugs whose power varies between 4,200 h.p. and 5,600 h.p.

BERTHING:

1 berth at the Tergosa Quay where bulk grain like corn, wheat, sorghum and others are moved with conveyor belt system, at the rate of 400 t.p.h.

1 berth at the Minera Autlan Quay where manganese is moved by moving belt at the rate of 1,200 t.p.h.

5 berths at the Pemex Quay, where oil and its derivates are moved at the rate of 600-800 t.p.h., by means of 4 in., 6 in., 8 in. and 10 in. pipes. Petroquimicos also have a quay.

1 berth at Termimar Quay where calcium sulphate and magnesium oxide are moved by moving belt at the rate of 500 t.p.h.

2 berths at the Metals and Minerals Quay, where bulk minerals are moved by 2 moving belts at the rate of 200 t.p.h. per belt.

2 berths at the Anahuac Cement Quay, where bulk cement is moved by means of 10 in. pipes at one berth and by 2×16 in. ducts at another berth at a rate of 250 t.p.h. per pipe.

Fiscal Pier No. 9 moves mineral exports with 2 conveyor belts, at a rate of 200 t.p.h. per belt.

9 berths at the Tampico Free Zone, where general cargo is moved at the rate of 20 t.p.h. per gang.

Berth	*Length*	*Berth*	*Length*
1	215 m.	5	145 m.
2	145 m.	6	145 m.
3	145 m.	7	180 m.
4	145 m.	8	185 m.
		9	185 m.

Depth alongside 10.5 m. Official fresh water draft 9.14 m.

All quays have lighting for night operation and telephone facilities.

Altamira: Approximate position: Lat. 22° 29′ 32″ N., Long. 97° 51′ 45″ W. It has 4 berths with a total length of 750 m. (Tepeal – 2 berths, Negromex – 1 berth and Tom – 1 berth, all for tankers) and depth up to 13 m. The navigation channel has a depth of 12.0 m. The port also has areas for storage and facilities for containers and Roll-on/Roll-off.

Pilot compulsory. Pilot boards 2 miles off the entrance.

Fresh water and fuel available from Tampico.

A dock side container crane of 30.5 tons is in operation, 3 gantry cranes with 40 ton capacity (and 2 cranes under construction) and 6 yard cranes are available, other miscellaneous equipment is available.

CRANES: Heavy lift crane, capacity 150 tons.

STEVEDORES: No ETA advice necessary if Stowage Plans received in advance by Agent, otherwise ETA advice for gangs appreciated 48 hours prior to arrival. Stevedores' general cargo discharging and loading rate about 20 t.p.h. per gang. Mineral loading at Metals Pier about 125 t.p.h. per belt (2 conveyor belts available to service both berths).

MEDICAL: Hospital facilities available. No advance notice required.

TANKERS: See "Berthing". Dirty ballast is received ashore.

DENSITY: Average 1006.

FRESH WATER: Available on written request from ship's Agent. Drinking water delivered by pump at the rate of 12 cu.m. per hour.

FUEL: Available at Terminal Maritime Madero.

CONSULS: Brazil, Denmark, Finland, Germany, Honduras, Italy, Lebanon, Norway, Spain, Sweden, U.K. and U.S.A.

REPAIRS: Hull repairs can be effected, as can work on steering system, machinery, marine auxiliaries and other equipment of less importance.

There are specialist workshops attached to the dock.

DRY DOCKS: Length 250 m., depth 9.5 m., width 37 m. Max. size 55,000 d.w.t. Only for tankers owned by Pemex.

CUSTOMS ALLOWANCES: No allowances to be taken ashore, but reasonable amounts of tobacco and spirits are allowed to be taken out of bond, but to be kept on board for use of crew and passengers only.

REPATRIATION: In the port there is an office of the Administrative Secretariat, where the repatriation of any crew member can be negotiated. This negotiation will be for the account of the ship's Agent, who is required to deposit a bond of Mexican $23,000 per person in case of certain nationalities.

GANGWAY/DECK WATCHMEN: No watchmen necessary. Customs guard keeps watch at gangway while vessel alongside.

AIRPORT: At a distance of 10 km. from the port. There are regular flights to Monterrey and Mexico City with connections in any direction.

TIME: GMT minus 6 hours.

HOLIDAYS: January 1st; February 5th; March 21st; May 1st; September 16th; November 20th; December 25th; December 1st (every 6 years).

FIRE/AMBULANCE/POLICE: Fire Department Tel. 2-12-22; Red Cross Tel. 2-13-33; Police Tel. 2-11-57 and 12-10-32.

DEVELOPMENTS: Constant programming for more space at wharves, sheds, warehouses, continuous dredging and increasing capacity of operational equipment.

AUTHORITY: Puertos Mexicanos Delegacion Tampico-Altamira, Edificio Puertos Mexicanos, 1er. Piso Recinto Fiscal Autorizado, C.P. 89000, Tampico, Tam., Mexico. *Tel:* 12-45-50, 12-45-61, 12-78-71. *FAX:* 12-57-44. *Telex:* 14887 Cpdtme.

Puertos Mexicanos, Av. Municipio Libre No. 377, Col. Santa Cruz Atoyac, C.P. 03310 Mexico, D.F. *Tel:* 688-22-66, 688-77-56. *FAX:* 688-38-95.

TOPOLOBAMPO (Punta Mapam): 25.36 N. 109.03 W.

(See Plan)

SHIPMASTER'S REPORT: January 1986 (Updated 1994).

PORT LIMITS: Precise limits could not be established, however any reasonable distance from the Fairway Buoy is acceptable. See anchorage positions below.

DOCUMENTS:

3 copies Crew Lists.
3 copies Crew Personal Declaration.
3 copies Bonded/Slop Chest Stores List.
3 copies Steward's Stores List.
3 copies Vaccination List.

Manifests not always necessary for Pemex purposes.

Bills of Lading, necessary, these included with Clearance from last port and from loading port. Clearance very important.

Ship's certificates, not asked for, except ship must have licence to trade coastwise, issued by the Mexican Authorities.

PILOTAGE: Compulsory. Daylight only. Pilot on VHF Channel 16. Pilot boat is a small yellow dinghy with an outboard motor. In rough weather Pilot boards from tug 'Pemex 45' or 'Lobo'.

Pilot boards in vicinity of Fairway Buoy.

ANCHORAGE: Not defined, but in vicinity of Fairway Buoy. A good anchorage has been found in position 25° 29.3′ N., 109° 10.8′ W. in 17.6 m. of water, with the Fairway Buoy bearing 032° by 0.87 miles. On another occasion vessel anchored in position 25° 28.99′ N., 109° 12.05′ W., with Fairway Buoy bearing 057° by 1.75 miles. Positions by Satellite Navigator.

RESTRICTIONS: *Access Channel:* Length 22,224 m., depth 12.0 m. *Turning Basin:* Diameter 400 m., depth 12.0 m.

MAX. SIZE: 50,000 d.w.t., LOA 240 m. and max. draft 11.0 m.

RADIO: In our case Charterer's private radio station was used. For commercial purposes Guaymas Radio is probably best.

VHF: Pilot on VHF Channel 16.

TUGS: 2 tugs available, 2,320 h.p. and 4,352 h.p., both owned by Pemex.

BERTHING: One berth of length 790 ft. and 39.4 ft. depth, for handling containers (15 units per hour).

One berth of length 328 ft. and 32.8 ft. depth, for handling general cargo.

Storage: Warehousing: 3,869 sq.m. Yards: 144,800 sq.m. Sheds: 2,250 sq.m.

Equipment: Cranes: 1×16 tons and 2×7 tons. Forklifts: 6×8,000 lb., 1×30,000 lb. and 1×88,000 lb.; 5 tractors; 2 tractor trucks; 4 front-end loaders; 5×130 t.p.h. vacuums; 2 chutes (24 tons) and 10 chutes (12 tons); 20 clams.

TANKERS: Pemex Berth at Punta Mapam:

The berth is located 0.5 miles East of the derelict Pemex Berth in Topolobampo. The jetty is approximately 250 m. in length and aligned 087° – 267° with a depth of 14.0 m. on the South side.

Berthing at the Pemex Jetty:

North Berth: Port side to, head out to sea. Starboard anchor is let go off the berth.

South Berth: Port side to, Head in.

Unberthing from Pemex Jetty:

North Berth: Starboard anchor used to assist moving vessel off berth. HW not necessary but consider depths over the bar.

South Berth: Best just before HW when flood used to advantage to help move vessel off berth.

Currents at the Berth: Tidal stream currents set heavily across the berth so that on the flood, a vessel on the North Berth is pushed towards the berth and a vessel on the South Berth is pushed off the berth. When the tide is ebbing a vessel on the North Berth is pushed off and a vessel on the South Berth is pushed on to the berth.

Cargo Handling: Chicksan type cargo arms with 10 in. diameter for diesel oil and gasoline, sizes for other grades not checked but thought to be the same. In the case of our vessel (LOA 170 m.) the diesel arm was aligned with the manifold, but the gasoline arm was too far off forward of the manifold on the South Berth (and too far aft on the North Berth) and therefore a length of flexible 8 in. hose was used between the manifold and the cargo arm. Shore tanks were said to be 2 km. away and 42 m. above sea level.

FRESH WATER: Available, using international shore connection and ship's hoses from fire tower on jetty. Sailing directions recommend boiling before use.
FUEL: Available.
SURVEYOR: Can be arranged through Lloyd's in Mexico City.
CUSTOMS ALLOWANCES: Usual allowances for Mexico.
REPATRIATION: Possible via Los Mochis, 12 miles inland.
AIRPORT: At Los Mochis, 12 miles away. Los Mochis can be reached by bus or taxi.
TIME: GMT minus 7 hours throughout the year.
SHORE LEAVE: No restrictions, identification cards not necessary.
DELAYS: Departure from tanker berth dependant upon state of tide and in daylight only. Other berths unknown.
SHIP'S OFFICERS REPORT: Small scale B.A. Chart No. 2323 used for approach. Large scale B.A. chart for Topolobampo not available, therefore Mexican Chart S.M. 337 used.

When approaching from the vicinity of Cabo Corrientes, the best course has been found to be 327° to approximate position 25° 18.3′ N., 109° 18.0′ W. when Farallon de San Ignacio will be dead ahead by 10 miles. Course is then altered to 030° for 13 miles for the Fairway Buoy. On this course the Fairway Buoy should be in line with an identifiable hill (see "Plan"). The Fairway Buoy has been fixed using Satellite Navigator derived positions at anchor and visual bearings together with radar ranges and found to be in 25° 29.93′ N., 109° 10.44′ W.

In rough or rainy weather the buoy may be difficult to see. With radar the channel buoys present slightly better echoes and may be recognised by comparison with the channel shape from the chart.
SERVICES: Stores, garbage disposal, repairs, fumigation, warehousing.
GENERAL: *Agent:* Agencia de Buques Zamorano, Domicilio Conocido, Topolobampo, Sinaloa. Tel: 2-00-11.
AUTHORITY: Delegacion de Puertos Mexicanos, Acceso Muelle Ind. Pesquero, Topolobampo, Sinaloa, Mexico. *Tel:* (686) 200-37, 201-27. *FAX:* (686) 204-94.

Coordinacion de la Unidad de Puertos y Marina Mercante (Mexican National Port Authority), Municipio Libre 377-12B, C.P. 03310, Col. Sta Cruz Atoyac, 03310 Mexico D.F. *Tel:* (525) 604-4249, 604-3829. *FAX:* (525) 688-9368.

TUXPAN: 20.57 N. 97.24 W. **(See Plan)**

SHIPMASTER'S REPORT: January 1982 (Updated 1994).

LOCATION: Tuxpan is situated on the North bank of the Rio Tuxpan. On the opposite side (the South bank) is situated part of Tuxpan called Santiago de la Pena.

The entrance of the Rio Tuxpan is situated at Lat. 20° 58.2′ N., Long. 97° 18.1′ W. Breakwaters on both sides of the river mouth. Approximately 100 m. and 120 m. seaward of the mole heads is a bar with quick changing depth over it. The bottom of the bar is sand, covered with a thin layer of mud. After a strong North wind the depth on the bar is one foot less than the day before. The permissible entering draft is 18 ft. – 20 ft. at HW and calm sea with nearly no swell. Occasionally vessels with 21 ft. draft can enter. Normally there is a low swell from the East all the year. After a strong North wind (Norte) you can expect a Northerly swell of 2 ft. – 4 ft. for 1 to 2 days. A dredger is working in the river entrance most of the time.
PORT LIMITS: One mile off all port installations and structures, including SBM and breakwaters.
DOCUMENTS:
1 original and 4 copies B/L's of all Tuxpan cargo.
12 Cargo Manifests.
1 Health Declaration.
8 Crew Lists.
8 Passenger Lists (even when none/nil – lists).
4 Stores Lists.
2 Personal Effects Lists.
(No special forms required/IMO-Forms are sufficient).
Documents which have to be shown to Port Authorities:
Tonnage Certificate.
Ship's Register.
Derat Certificate.
Seaman's Books or Passports.
PILOTAGE: Pilotage is compulsory. Pilot boards vessel approximately 2 miles to 2.5 miles East of entrance. Pilot boat: A white 20 ft. boat with white cabin and blue/white deck.

Equipped with VHF Channel 16. Pilot Office open from sunrise to sunset and listening on VHF Channel 16. Call: "Tuxpan Pilot".

The Pilot has to be ordered by Agent 24 hours in advance.
ANCHORAGES: East of breakwaters from 2 miles – 4 miles on a breadth of 1 mile North and 1 mile South of this line.

Caution: Many submerged gas and oil-pipes in the vicinity of entrance to Rio Tuxpan.

Best anchorage: North mole head bearing 270° (T) and 2.8 miles off. Ground: Muddy sand, good holding.
RESTRICTIONS: Entering port and river only in daytime. Departing vessels have to pass the bar at river entrance before sunset.
Access Channel: Length 7.0 km., depth 10.0 m.
Turning Basin: Diameter 240 m., depth 10.0 m.
MAX. SIZE: Length of ships handled is 190 m., always in accordance with the draft.
HEALTH: There is a hospital at Tuxpan. Surgeons and Dentists are available. No vaccinations can be done.

Meat and vegetable rooms are sealed and opened once a day to take provisions. Garbage has to be kept on board in watertight and covered containers.
RADIO: No radio station at Tuxpan. Closest Tampico or Vera Cruz. Good communication between Tuxpan and these radio stations.

There is no repair of radars, VHF or other electric and electronic equipment possible. If required, technicians and spare parts have to be ordered from Tampico.
VHF:

Port Authorities	Channel 16
Pilot	Channel 16
Pemex	Channel 16
Tecomar (Agency)	Channel 68

RIVER: Ground: Mud. Density of water: Approximately 1005.

The current in the river is nearly always outwards and is from 0.5 knots in the dry season up to 6.5 knots in rainy season.

At Tuxpan there is a stationary bridge, which can only be passed by very small ships.
TUGS: 1×4,000 h.p.
BERTHING:

Ocean-Going	460 m.
Fisheries	138 m.
Navy	22 m.
Pemex	480 m.
CFE	80 m.
Transunisa	228 m.

Storage: Yards: 90,000 sq.m. Warehouses and Silos: 24,300 sq.m. Tanks: 12,000 cu.m.
Equipment: Private equipment includes 1 crane, 12 tractors, 31 forklifts (4,000 lb. – 96,000 lb.), 3 front-end loaders, 4 clams.
STEVEDORES: Agent has to order gangs from Port Operations 24 hours in advance. Approximately 120 men available.
Working Hours: 0800 – 1600 hrs. = 1st shift
1600 – 2400 hrs. = 2nd shift
0000 – 0800 hrs. = 3rd shift

Saturday and Sunday also, but all at overtime rates.
TANKERS: Tankers up to 6,000 tons gross can be taken inside the river to the oil companies' small jetties.

Offshore there are 2 SBMs in position:
No. 2 = Lat. 21° 02.58′ N., Long. 97° 17.43′ W. and
No. 1 = 135° – 1.9 miles from No. 2 SBM.

Tankers with 55 ft. draft acceptable. These SBMs are mainly used by Pemex. 2 additional buoys are to be installed.

Also see Shipmaster's Report dated October 1992.
FRESH WATER: Drinking water available.
FUEL: Small quantities of clean diesel oil can be delivered by trucks. No marine diesel oil or heavy fuel oil available.
DRY DOCKS: None.
SHIPYARD: For fishing boats, some slipways available.
REPAIRS: Minor repairs can be done by the fishing boat shipyards.
REPATRIATION: Repatriation is possible via Tajin Airport to Mexico City. Tajin Airport is approximately 30 miles from Tuxpan and can be reached by a good road.

At Tuxpan on the left (North) riverbank is a small Airport (Fausto Vega Santander) only for VFR flights. Runway 1,600 m. No commercial flights.
HOLIDAYS: 1st January, 1st May, 5th May, 16th September, 25th December.
TIME: GMT minus 6 hours throughout the year.
TELEPHONE: No telephone connections at the piers.

Useful telephone numbers: Police, 40252; Port Captain, 40020; Pilot Office, 40043; Custom's Office, 40055.
Office Hours: Monday – Friday 0800 – 1500 hrs.

Some offices are also open on Saturday from 0800 – 1300 hrs.
SHORE LEAVE: Allowed without restrictions. No special identification cards required.
SERVICES: Stores, electricity, laundry, fumigation.

SHIPMASTER'S REPORT: July 1990.

Intensive dredging is under way. The offshore bar near the entrance can now be passed, on leading lights line 238° with 26 ft. 06 in. at all tides (dredged to 9.5 m.).

Pilotage available day and night.

The breakwaters are being lengthened.

3 miles up-river on the South bank of Rio Tuxpan, a well operated Container Terminal can accommodate 2 vessels at a time, each 160 m. in length. Berthing is port side to, or after turning (which is advisable) starboard side to head seawards.

In good weather conditions, no use of anchor required.

One tug and one mooring boat available. Sufficient fenders are in place.

Container handling: With ship's gear only for ship-to-shore, then handled with special hydraulic mobile lifters (40 ft./20 ft. containers) on to trucks, or direct to stacking area.

Stevedores available 24 hours.

SHIPMASTER'S REPORT: October 1992.

BERTH: No. 2 SBM.
CHARTS: B.A. 373 – 1/40,000. Limited coverage.
B.A. 376 – 1/500,000 scale too small to show detail.
DMA 28320 – 1/250,000.
DMA 28321 – Tampico 1/20,000.
Tuxpan 1/25,000.
Isla de Lobos 1/20,000.
APPROACHES: From the East, approach is very simple. Offshore oil rigs show clearly, even in very poor weather, and Racon on Bajo de Tuxpan shows well. Chart 376 notes that this lies 1.1 miles N.E. of charted position, and this is confirmed by radar distances from anchorage position midway between breakwater entrance and Bajo de Tuxpan. Distance from shore to Bajo de Tuxpan notes as 7.1 miles, which is different to charted distance, but chart scale is such as to make this almost meaningless. DMA charts are reputed to give better coverage, but we have not yet received them.

DETAILS: When we arrived, there was a Westerly gale blowing, which was augmented by a very heavy N.E. swell, generated by bad weather further out in the Gulf. With so little detail showing on the B.A. charts, I decided to remain outside cruising until the weather moderated, which it did some 12 hours later. The swell remained, and a ship on the Buoy No. 1 was noted to be rolling very heavily, and in fact had to suspend cargo operations and leave the buoy when the port was closed by the Port Captain.

An anchorage position is marked on the chart (B.A. 373) about 2 miles off the entrance. We anchored about 3.2 miles off on the leading lights and found good holding ground, although we were exposed to the swell. The dominant influence on the ship was the current which is constant, and sets down the coast (about 165° T) at a rate of 1 knot to 2 knots. This put us beam-on to the swell which was inconvenient.

The pilot later advised that a good anchorage can be found 1.2 miles S.W. of Bajo de Tuxpan, which is sheltered from the swell, and is used for ship-to-ship transfers.

Once the port was opened, we were advised of pilot boarding time and requested to heave up 30 minutes beforehand. As soon as we had made a lee, a Pemex launch came alongside, and the 12 man shore gang boarded with their equipment for connecting the hose.

The pilot then boarded together with Agent, Immigration, Port Health and Customs. The ship was cleared inwards on the way to the buoy, and all officials were happy to be left with the Radio Officer. Bond was sealed. Officials departed when finished.

Approach to the buoy was made on course of 345° at dead slow speed. Four strings of buoyant hoses (2 for crude, 2 for gasoline and products) extend about 200 m. from the buoy, which is a large structure, about 10 m. in diameter with a Qk. Fl. (W) light.

2×150 mm. diameter nylon braidlines are used for mooring, these have lighter messengers attached.

On approach, the mooring boat took one of our 52 mm. Karat ropes and the messenger was picked up with this. Slack was picked up as the ship approached, and the 150 mm. rope eventually came on board and the eye was placed over a set of bitts. The second line was made fast in the same way, and the ship settled down 50 m. from the buoy.

One hose was used. Although the hose is 12 in., the buoyancy provided makes it very bulky, and there was just enough clearance to rest it on the inboard pipe-rail and connect to our manifold.

Pilot advised that lift does not exceed 3 tonnes, and this seemed to be confirmed by the behaviour of the rig.

All mooring and connection was done by Pemex shore gang who remained on board throughout discharge. They were regularly relieved. One member of shore gang remained on bridge to keep VHF watch. Pilot remained on board throughout.

All were efficient and no trouble.

12,400 tonnes of MTBE were discharged in approximately 20 hours. Maximum back pressure 100 p.s.i.

GENERAL: Agents were contacted when about 30 miles from port, and were scrupulous in providing regular and accurate information.

On sailing from load port, Agents required faxes of Certificate of Measurement, Manifest, Crew List, Crew Effects Declaration, so that they have time to translate them into Spanish before arrival.

DEVELOPMENTS: SBM No. 3 being installed to the Northwest of SBM No. 2.

AUTHORITY: Coordinacion de la Unidad de Puertos y Marina Mercante (Mexican National Port Authority), Municipio Libre 377-12B, C.P. 03310, Col. Sta Cruz Atoyac, 03310 Mexico D.F. *Tel:* (525) 604-4249, 604-3829. *FAX:* (525) 688-9368.

VERA CRUZ: 19.12 N. 96.08 W. (See Plan)

PORT LIMITS: Area bounded by the reef lighthouses outside the breakwater.

DOCUMENTS: See "Coatzacoalcos".

PILOTAGE: Compulsory, advise Agent 24 hours before arrival giving name, flag, ETA and draft.

The Port Captain is to be given a minimum of 2 hours' notice by the Agent. This to be done between 0800 – 1800 hrs. (Pilot office hours). Orders for Pilots between 1800 – 0800 hrs. to be made between 0800 – 1800 hrs.

The Pilot normally boards 3 miles N.E. of harbour entrance, but if his services are requested outside such limits the Pilot will proceed to the location, i.e. the anchorage.

The pilot launch leaves from a "T" shaped pier when expected vessel is sighted. The launch has a black hull with white superstructure and false funnel painted black.

ANCHORAGES: In good weather, vessels may anchor in the outer area off the port, in the case of bad weather, to the South of the Isle of Sacrifices (Isla de Sacrificios). If the vessel prefers to anchor within the port limits, it must request the services of the Pilot and on anchoring for its own account within this sector must pay the fees due to the pilotage service.

RESTRICTIONS: In normal weather conditions there are no restrictions on entry and departure, the sole consideration being the draft of the vessel, since if this exceeds 29 ft. the time of the tide must be taken into consideration, and also after a strong North wind, a vessel drawing more than 24 ft. must wait for the tide. Depth in access channel 10 m. – 12 m.

MAX. SIZE: Length 200 m., at Berth Nos. 4 and 6 or the oil terminal.

HEALTH: The International Health Office gives a 24-hour service for the arrival and departure of vessels. To obtain Free Pratique on arrival of vessels there is a medical inspection, with submission of the Maritime Health Declaration, signed by the Master, and examination of documents of Derat Certificate, certificates of vaccination of the crew and passengers; cholera, yellow fever, (dependent upon the location from which the ship has come); examination of crew members or passengers who might be declared as suffering from contagious illnesses. With these formalities fulfilled, Free Pratique is granted. Free Pratique can be granted by radio, provided it is considered that the vessel's arrival will not give rise to the introduction or propagation of illnesses covered by the regulations, and that also the following requirements are fulfilled:

1. Exercise of greater epidemiological vigilance in respect of illnesses covered by International Health Regulations.

2. The Master's radiogram must be presented to the International Health Delegation 8 hours in advance and must invariably fulfil all the stipulations as set out in the attached form.

3. Without prejudice to the foregoing, the Health Doctor or whomsoever he may designate, and where it is considered appropriate, shall go on board for the purpose of receiving the Maritime Health Declaration so that enquiries and verifications as may be considered necessary may be carried out.

Once the vessel has called at a national port, in subsequent national ports the requirements for obtaining Free Pratique will not be required, provided there does not exist on board any alteration in the health conditions as established in the Maritime Health Declaration.

Medical service to crew members and passengers on board foreign flag vessels is provided by doctors and private hospital institutions, through the intermediary of the consignee ship's Agent.

For possible handling of disease covered by the Health Regulations (cholera, yellow fever, bubonic plague), there are isolation wards in the Official Hospitals "Aquiles Serdan" and "Regional de Veracruz".

The Office of International Health has immunisation services required for the diseases covered by the Regulation, which are certified on special international forms, with any cost, to crew members and passengers.

RADIO: Radio station Vera Cruz Radio, call sign XFU. Transmits on 420 and 451 kHz and listens on 425, 454, 463 and 480 kHz. Also VHF Channels 12, 16, 26 and 27.

VHF: Pilot on Channels 16, 12 and 20 throughout 24 hours.

TUGS: 4 tugs available, 3×1,300 h.p. and 1×2,250 h.p.; tugs' lines used at no extra charge. Tugs join vessels inside breakwater.

BERTHING:

Berth	*Capacity*	*Length (m.)*	*Depth (m.)*
No. 1	2 vessels	384.50	10
No. 2	2 vessels	431.00	9 – 10
No. 4	5 vessels	795.20	9 – 10
No. 6	5 vessels	725.00	9 – 11
No. 7	5 vessels	548.00	6 – 8
Marginal (Minerals)	–	407	10
Grain Quay	1 vessel	250.00	9 to 10
Container Quay	1 vessel	170.00	10
Pemex	2 vessels	958.00	10

BULK HANDLING FACILITIES: Handling of grain at a mechanised plant, with storage capacity of 25,000 tons and an average discharge rate of 250 t.p.h. and loading rate of 400 t.p.h.

Handling of bulk sugar by mechanised installations, with storage capacity of 40,000 tons and an average loading rate of 800 t.p.h.

Handling of aluminium, coal brickettes, cement, latex, crystallised honey, chemical products, vegetable oils and crude oil.

STEVEDORES: *Handling rates:* General cargo, 12 tons/per hook hour. Bulk cargo, 30 tons/per hook hour.

TANKERS: Petroleos Mexicanos berth located in Northern part of port. Max. draft 28 ft. Berthing for 2 vessels of 170 m. LOA. Berth provides 5×8 in. lines for discharge of refined product and 2×12 in. lines for fuel oil.

DENSITY: 1025.

FRESH WATER/FUEL: Available.

U.S.A.

MEDICAL: Doctors, dentists and hospital facilities available (See "Health").

REPAIRS: Hull and machinery repairs can be effected by "Astilleros de Veracruz" (Vera Cruz Shipyard Company).

DRY DOCKS: "Astilleros de Veracruz S.A." has 4 docks, 3 floating and 2 dry docks. The largest of them is Floating Dock No. 4 with the following characteristics:

Length on stocks	169.210 m.
Internal useful beam	30.400 m.
Height of keel stocks	1.400 m.
Max. draft on keel stocks	8.200 m.
Lifting capacity	30,000 d.w.t.

Dock No. 2: With capacity for vessels up to 10,000 tons

Useful length	154.000 m.
Useful beam	19.400 m.
Draft	5.180 m.

Served by a 45 ton capacity crane

Floating Dock No. 3: With 3,000 ton capacity lifting capacity

Useful length	25.900 m.
Useful beam	13.550 m.
Draft	5.800 m.

Served by 2 cranes of 10 ton capacity each.

Dry Dock No. 1

Length	45.720 m.
Useful beam	7.920 m.
Draft	2.130 m.

New Floating Dock: Length 220 m., width 32.6 m. Capacity 28,000 tonnes.

SURVEYORS: Lloyd's, Norske Veritas and Germanischer Lloyd.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Mechanical hatches usually opened by crew, otherwise by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man and will attend as necessary for further issues.

CARGO GEAR: Piers 1 and 2, 4×20 tons, 6×10 ton, 3×5 ton and 10×4 ton mobile cranes. Various cranes at piers 4 and 6. 2 floating cranes available max. lift 46 tons.

REPATRIATION: Possible, arranged by Agent.

AIRPORT: 8 km. from Vera Cruz, flights daily to Mexico City.

TIME: GMT minus 6 hours all year round.

HOLIDAYS: During the year the following holidays are observed: 1st January, 5th February, 21st March, 1st May, 5th May, 16th September, 12th October, 20th November and 25th December.

POLICE/FIRE/AMBULANCE: Police – 2.28.23, Fire Brigade – 2.25.00, Red Cross – 2.01.40.

TELEPHONES: Available on most piers but not on vessels.

SERVICES: Provisions, laundries, and dunnage available. Garbage must be removed every 48 hours.

SHORE LEAVE: Possible.

GENERAL:

Government Secretariat – Local Administration Office

In accordance with the stipulations of Article 75 of the General Local Administration Law, vigilance of foreign crew members in vessels of any nationality tied up in national ports, together with visits or stays by the said crew members will be subject to the following requirements:

I. Heads of Local Government will designate accordingly personnel who will carry out vigilance of the vessel, in accordance with the provisions of Section II of Article 29.

II. Crew members may visit ports during the stay of the vessel, provided they deposit at the Local Administration Office their identity documents which for such purpose may be issued to them and their passports and other documents, all of which will be returned to them on re-embarkation.

III. Shipping companies, their Agents or consignee firms, for all legal purposes shall be responsible for the complete embarkation of crew members and for the costs involved in repatriating any who may remain behind after the vessel sails. When a crew member wishes to stay in the country, he must obtain documentation in compliance with one of the categories as set out in the appropriate Law and Regulations.

DEVELOPMENTS: A new petroleum quay is to be constructed to take 2 tankers of 40,000 tons.

A transtainer, portainer crane and other equipment will be acquired in the near future.

SHIPMASTER'S REPORT:

Documents:

1 Visaed and 9 Plain Spanish Crew Lists.
1 Visaed and 5 Plain Passenger Lists.
1 Visaed and 2 Plain Spanish Stores Lists.
2 Crew Customs Declarations.
5 Cargo Manifests.
1 Arrival form.

The Customs require a complete list of all shop goods priced in U.S. Dollars, failure to produce this will cause confiscation and $10,000 fine. The Customs thoroughly check bond and beer locker and seal same. All storerooms are also checked.

The Agricultural Inspector insists that all dry stores are fumigated and kept under seal for 24 hours. All refrigerated stores – except U.S.A. meat is sealed up.

Pilotage: Pilot boards 1 mile W.N.W. of Angeguda de Adentro Light beacon from black boat flying pilot flag.

Tugs: 2 tugs available for berthing.

Restrictions: Port open day and night. Prevailing Northerly winds are sometimes too strong to allow ship's movement in harbour.

Health: Health authorities board after berthing.

Radio: ETA to be sent 48 hours in advance via XFB Cuidad de Carmen. Agent orders Pilot.

Fuel: Bunker C and Diesel are available. A mixing machine is being installed to supply intermediate. Bunkers are supplied from most quays and are expensive for foreign ships.

Consul: There is a British Consul.

Repairs: There are 3 drydocks and all repairs can be done.

Airport: The airport is 6 km. from Vera Cruz with twice daily flights to Mexico City.

SHIPMASTER'S REPORT: October 1991.

Chart: B.A. Chart No. 374.

Pilotage: Pilot available throughout 24 hours for berthing and unberthing but port is often closed when Northerly winds reach 11 m./sec. (Force 6).

Pilot should be ordered through the agent with a minimum of 2 hours notice. For night time movements (between 1800 hrs. and 0600 hrs.) orders should be placed before 1800 hrs.

The pilot boards from a slow black hulled launch with white and orange upper works.

The pilot works on VHF Channel 13 only and it is difficult to contact them unless a vessel is expected. The pilot office is not manned overnight or on Sundays.

If the vessel has arrived from sea the pilot boards off Arrecife Blanquilla in position Lat. 19° 13′ N., Long. 96° 05.3′ W. If the vessel is coming from the anchorage the pilot will board in position Lat. 19° 11.6′ N., Long. 96° 04.2′ W.

Approaches: Sacrificios Lt. (LL4278) is a powerful light and is visible at 25 miles. The Racon on the lighthouse was operating and the light shows up well against the backdrop of the city lights.

Arrecife Santiaquillo Lt. (LL4318) was visible at 20 miles but Racon was not operating.

The lights on the various reefs surrounding Vera Cruz Harbour were all operating and were conspicuous.

Vera Cruz Harbour and the city show up well on the radar at 48 miles.

The powerful and conspicuous red light on top of a radio mast near Pta. Mocambo shows up well against the city lights. The light is located in position Lat. 19° 08.5′ N., Long. 96° 06.5′ W.

Anchorage: We anchored with Isla Sacrificios Lighthouse bearing 270° × 3.5 miles, but this was not a very good anchorage as it was windy and there was a swell running. If possible vessels should anchor closer to the shore. A local vessel anchored with Isla Sacrificios bearing 270° × 1.5 miles.

Pilot advised that vessels should anchor under the lee of Isla Verde (320° × 1.5 miles) when Northerly winds are blowing.

Anchoring between the reefs is not advisable.

When awaiting tugs we anchored for a short time with Arrecife Blanquilla South Lighthouse bearing 360° × 0.17 miles (position Lat. 19° 12.7′ N., Long. 96° 05.8′ W.).

Radio: Ships are advised to monitor Vera Cruz Radio (XFU) on WT/HF before arriving and MF/VHF whilst at anchor. The agent usually uses the radio station to send berthing instructions to vessels.

Tugs: At present there are 2 tugs (2,000 h.p.) available and both are generally used. Tug's lines are used.

The pilot advised that an additional tug of 3,500 h.p. will be available in December 1991.

Pemex have their own tugs for vessels berthing at their piers.

Port: Vera Cruz is the largest port in Mexico and Mexico's second city.

The Pemex berth near the N.E. Breakwater is in continuous use.

The shipyard appears to be in a state of disrepair and the floating dock is no longer in use and will be scrapped, according to the pilot.

There are 2 floating docks capable of handling ships up to 30,000 d.w.t. (Eastern dock) and 10,000 d.w.t. (Western dock).

The coastline adjacent to the dockyard has been infilled and developed.

We found the depths by echo sounder and hand lead to be slightly greater than those charted.

Depths:

Pemex	31 ft. 06 in.
Fluids	31 ft. 00 in.
Others	29 ft. 00 in. to 30 ft. 00 in.

A minimum depth of 10.0 m. was found from the breakwater entrance to the Fluids berth.

Berthing: Fluids Berth (See "Plan") is located at the Eastern end of the container quay. The minimum depth of 28 ft. 02 in. was found approximately 100 m. N.W. along the quay. In general the depth alongside was 31 ft. 02 in. The tidal range is between 1.0 ft. and 1.5 ft.

The quay is of concrete construction and has good rubber fenders.

Vessels discharging liquids (vegetable oils, tallow, molasses and latex) generally have their sterns over hanging by at least 20 m., so all stern lines are springs.

Vessels normally berth starboard side alongside, head in.

The tanks for the various commodities are adjacent to the facility.

It was just possible to land the ship's aft accommodation ladder on to the corner of the quay.

There are 2 large container cranes at the N.W. end of the quay.

Cargo: Vegetable oils are pumped through 1×6 in. flexi-hose to adjacent shore tanks at a rate of approximately 250 tonnes/hr. and a maximum back pressure of 5 kgs. Airblow is required on completion.

There is a watchman in a hut on the quay. The surveyors, Caleb Brett, took great care with sampling and gauging and Tank Dry Certificate on completion.

Vegetable oils are also handled at the aluminium berth on the N.W. corner of the harbour, into rail tank cars with discharge rate reported to be very slow.

Density: 1024.

Fresh Water: Available by barge but very expensive.

Telephones: There is a telephone in the receiver's office behind the shore tanks.

General: There are many hotels in the town. Frequent flights available to Mexico City.

A stowaway search is well advised before departure, after which gangway should be watched closely, as numerous "visitors" find their way on board.

Officials: Many officials boarded the vessel. We had Mexican Visaed Crew Lists and Crew Manifests with which they found fault, so extra "presents" were required. Immigration officials were very formal and required all passports on arrival. On departure all Philippino crew members were lined up with their passports for checking off.

Regulations:

1. Bonded stores are sealed by Customs inspector. Heavy fine for breaking seal. Contact agent if an issue is required.
2. Crew are not allowed to sell cigarettes, liquor or souvenirs. If upon inspection, Crew Personal Effects List is different from that declared heavy fines will be imposed.
3. A Port Health garbage boat will visit the vessel every 48 hours.
4. Rat guards are to be placed on lines as soon as vessel is secure.
5. No ballast or waste of any kind is to be pumped overboard.
6. No "visitors" of any kind allowed onboard without passes.
7. Vessels are not obliged to supply food or accommodation to ANY personnel (authorities, gangway watchmen, cargo watchmen, stevedores, etc.). Custom's guards onboard receive cash compensation in lieu of food and accommodation.

Weather: Between November and April strong Northerly winds are prevalent and are accompanied by heavy swell. At this time the port may be closed for a few days and vessels may find it difficult to anchor.

Federated States of Micronesia

TOMIL HARBOUR, Yap: 09.31 N. 138.10 E. **(See Plan)**

PORT LIMITS: Vessel is considered an "Arrived Ship" when abeam of Buoy No. 1. Laytime commences at this time.

DOCUMENTS: All necessary documents required by the Clearance Department shall be prepared before arrival. (e.g. Crew Lists, Passenger Lists, Customs, Health Documents, Manifests, Bills of Lading, Ship's Papers, Ship's Certificates, etc.)

PILOTAGE: All pilotage services must be requested by the Master or his Agent on their behalf 24 hours prior to vessel's arrival.

ETA messages for Pilotage are best routed through Port Control.
VHF: Channel 16. Tel: (691) 350-2229.
Fax: (691) 350-2267. Radio: 7876.5 kHz or 7978.5 kHz SSB.

ANCHORAGES: Inside Tomil Harbour, depth is 84 ft. MLW. Distance from dock, 3,000 ft.

RESTRICTIONS: Channel marked by lights and leading lights. Vessels can enter and leave, day and night, with approval of the Port Manager.

MAX. SIZE: The length of the channel is 9,600 ft., breadth is 300 ft. Max. size for any vessel entering the port is 10,000 d.w.t. Depth in the channel 78 ft.

HEALTH: Master of vessel or designated Agent should advise Port Authority 24 hours in advance of her arrival of any communicable diseases, sickness or injury found among its crew even if the vessel's last port of call was in the Federated States of Micronesia.

RADIO: Vessel should route her ETA via Yap Port Radio.

See "Pilotage".

VHF: Port Control Radio – Channels 16 and 22A.

RADAR: No port radar.

TUGS: None.

BERTHING: Dock is 820 ft. long, depth is 78 ft. MLW, max. size permissible at LW (salt water) is 10,000 d.w.t.

CRANES: None. Discharge is by ship's gear.

BRIDGES: None.

STEVEDORES: ETA advices required 24 hours before arrival in order to arrange Terminal personnel.

Terminal Operator: Waab Trans Co. Inc., P.O.Box 177, Yap, Western Caroline Islands 96943. Tel: 2301/2302.

MEDICAL: Advise Agent prior to arrival if medical assistance required.

TANKERS: Load/discharge lines are 6 in. diameter.

DENSITY: Average 95% salt water, 5% fresh water.

FRESH WATER: Available on pier apron using fire hose connected to fire hydrant for drawing fresh water.

FUEL: Advance notice required through Agencies' Offices in order to arrange fueling with Mobil Oil Inc. Plant. Fuel line available at the dock.

CONSULS: No consuls available.

REPAIRS: Facilities available.

DRY DOCKS: Slipway, capacity 75 tons.

SURVEYORS: Available.

HATCHES: Normally opened/closed by combination of crew and stevedores.

CUSTOMS ALLOWANCES: Each crew member is permitted to hold out of bond a maximum of 2 bottles of wine, 2 cartons of cigarettes, 12 cans of beer, etc.

CARGO GEAR: Discharge is by ship's own gear. Other relevant gear such as forklifts and trucks provided by the Terminal Operator (See "Stevedores").

REPATRIATION: Effecting of crew changes will be arranged by the proper Agency Office.

AIRPORT: Distance from Sea Port to Airport is 2.5 miles, served by regular airline with 3 flights per week on Wednesday, Friday and Sunday.

TIME: GMT plus 10 hours. No alterations made throughout year.

HOLIDAYS: Cargo work can be arranged on holidays, except Christmas Day and Yap Day.

POLICE/AMBULANCE/FIRE: Police, Tel: 350-3333; Ambulance, Tel: 3446; Fire Department, Tel: 350-3333.

TELEPHONES: None available.

SERVICES: Tank cleaning equipment, discharge of slops, compass adjustment, etc., are not available in this port.

BANKS: Bank of Federated States of Micronesia and Bank of Hawaii.

STORING: See "Prelims".

(1) No.
(2) No barges for storing.
(3) —
(4) No.
(5) None.
(6) Yes.

SHORE LEAVE: Crew members are allowed ashore if no communicable disease found onboard.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

GARBAGE DISPOSAL: Drums provided by requests on telephone (691) 350-2403 at the rate of $2.00 per drum.

WASTE OIL DISPOSAL: Available.

SEAMAN'S CLUBS: None.

CURRENCY: U.S. Dollar is the local currency.

DELAYS: Usually depends on the quantity of cargo, especially bulk cargo.

AUTHORITY: Sea Transportation Office, P.O.Box 290, Colonia, Yap State, Federated States of Micronesia 96943. *Tel:* (691) 350-2403. *Cables:* Sto Yap. *FAX:* (691) 350-2267. *Contact:* Captain Serphen H. Single, Harbour Master.

NOTES

Monaco

MONACO: 43.44 N. 07.26 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port commence by the 2 breakwaters at the Eastern entrance.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists – 3 Landing Passenger Lists.
2 Stores Lists.
1 Manifest (cargo).
1 Bill of Health.
Ship's Register.

PILOTAGE: ETA via Monaco Radio – Channels 16, 12, within range. Pilot boat is a small white boat with a black "Pilote" painted on the side of the cabin. Pilot boards vessels 0.3 miles East of the harbour entrance.

Pilotage available: 1st May – 30th September (0800 hrs. – 2300 hrs.).
1st October – 30th April (0800 hrs. – 2000 hrs.).

Pilotage compulsory for all vessels over 30 m. LOA.

ANCHORAGE: One half mile East of the Southern breakwater lighthouse. Depth at the anchorage 68 m.

MAX. SIZE: Max. length 130 m. Stern to the pier on the West side or alongside the North quay, only from October to March and with 8 days' notice. Max. draft allowed: West Pier 8 m; North Quay, 7 m.

HEALTH: Health Declaration must be handed to the Customs. If coming from neighbouring countries (France, Italy, Spain) not requested.

RADIO: Monaco Radio (Tel. 93.30.13.13). VHF Channel 16. Port Operations Channel 12. Public telephone calls Channels 20, 22, 28 and 86.

RADAR: No port radar service.

TUGS: Pilot boats (2×158 h.p.) available without notice. 1 tug boat 200 h.p. with notice.

BERTHING: All 3 quays plus inner sides of the breakwaters and Western "T" pier are available for mooring yachts stern to. The port may be congested during the Summer season. The possibility remains of anchoring off the dock.

CRANES: 1×10 tonne mobile crane.

MEDICAL: There is a state hospital fully equipped for surgery, etc.

FRESH WATER: Can be supplied at all berths alongside the quay. If vessel on Roads, water may be provided by barge up to 500 tons per day, with one week notice. Tel. Cannes 93.39.36.12.

FUEL: There is a fuel berth in S.W. area of port for ships up to 80 ft. LOA. Bunkers are available on the quay by truck but no heavy fuel available.

CONSULS: Most countries are represented in Monaco.

CUSTOMS ALLOWANCES: Same as in French ports.

REPAIRS: Only for yachts.

DRY DOCKS: 1 slipway × 100 tons, 1 slipway × 40 tons, 1 crane × 10 tons.

REPATRIATION: Good railway connections.

AIRPORT: Nice – Cote d'Azur. Distance 25 km.

TIME: GMT plus 1 hour. May to September GMT plus 2 hours.

HOLIDAYS: New Year; National Holiday, (Jan. 27th); Easter Monday, (May 1st); All Saints' Day; His Serene Highness' birthday, Nov. 19th. Harbour services work on Sundays and Holidays.

POLICE/FIRE/AMBULANCE: Maritime Police, Quai Antonie 1st Tel. 93.30.22.39; Ambulance/Police Secours Tel. 17; Fire brigade Tel. 18.

TELEPHONE: Available at all berths.

SERVICES: Engine repairs. Electronics. Maintenance for yachts. 220 volts available at all berths. TV aerial sockets at all berths free of charge.

SHORE LEAVE: Crew members allowed ashore.

REGULATIONS: *Recommendations to Ship-Owners, Masters and Crew Members:*

Ship-owners, Masters and Crew members are strongly requested not to dispose of hydrocarbon, household refuse and other rubbish into the Monaco harbour (i.e. cartons and mainly plastic containers).

Used motor oils and other petroleum residues must be transferred into tanks exclusively provided for this purpose at the beginning of the North and South jetties and on the landing stages facing the Rainier III swimming pool.

These tanks are signposted with panels bearing the words "Huiles Usees" (used oil) in red letters on a white background.

Household refuse and other rubbish is to be put into garbage containers located around the harbour throughout the year. Furthermore, during the Summer, special individual bags are made available free of charge to all in-coming vessels.

Those responsible for ships equipped with used water tanks or bilges are requested to empty these containers off the coasts of the Principality at a minimal distance of 6 miles.

Those whose ships are not equipped with these used water tanks are requested not to dispose of their used water during their stay in the Monaco harbour, and to use the sanitary installations and facilities made available to them within the harbour.

Offenders infringing the above provisions will be penalised in accordance with the stipulations of Law No. 954, dated April 19th, 1974, dealing with the fight against water and air pollution.

AUTHORITY: Directeur du Port et du Service de la Marine, 7 Avenue du President J.F.Kennedy, B.P.468, 98012 Monaco Cedex. *Tel:* 93.15.37.15. *Telex:* 489035 MC. *FAX:* 93.15.37.15. *Contact:* Captain Philippe Haquette, Harbour Master. Jean-Paul Darcis, Port Director.

Morocco

AGADIR: 30.25 N. 09.38 W. (See Plan)

DOCUMENTS:

Health Declaration.
4 Cargo Manifests.
6 Stores Lists.
6 Crew Lists.
6 Passenger Lists.

PILOTAGE: Compulsory. Pilot boards at port entrance. International code signals used. Pilot on VHF Channel 16, day and night.

ANCHORAGE: Good anchorage in open roadstead.

MAX. SIZE: Up to 29 ft. draft. Max. LOA 160 m., however vessel with LOA 190 m. has been accepted.

HEALTH: Pratique given immediately after berthing when port doctor boards.

RADIO: Agadir Radio operates 24 hours a day.

TUGS: 3 tugs available, 1×350 h.p., 1×1,275 h.p., 1×1,500 h.p.

BERTHING:

No. of Berths	*Length (m.)*	*Depth (m.)*	*Remarks*
4	150	9.0	—
1	110	7.0	Ro/Ro.
3	100	6.0	Oil tankers and butane carriers.
1	—	6.0	Used by Moroccan tankers only.
1	120	5.0	Equipped with fish pumps.

CRANES: One Titan crane of 40 tons capacity.

STEVEDORES:

Working Hours: 0700 – 1200 hrs., 1400 – 1800 hrs. , 2000 – 0600 hrs. (With 24 hours' notice of ETA).

New times to be introduced but date not fixed: 0700 – 1500 hrs. and 1500 – 2300 hrs.

MEDICAL: Doctor and hospital facilities available.

FRESH WATER: Available from pipeline at berths.

FUEL: Fuel and gas oil available from pipelines at berths.

CONSULS:

	Tel.		*Tel.*
Belgium	217 00	Norway	238 40
France	228 29	Spain	221 26
Italy	226 66	U.K.	209 05 (Casablanca)

REPAIRS: Small machinery (up to 500 h.p.) and electronic repairs can be effected.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Crew allowed normal daily consumption of tobacco, wine and spirits.

POLICE/FIRE/AMBULANCE:

	Tel.		*Tel.*
Police	19	Hospital	224 77
Fire/Ambulance	15	Port Police	223 49

TIME: GMT. No changes.

HOLIDAYS: Fete du Trone, (Throne holiday); 3rd March; Fete du Travail (Labour Day); 1st May; Al Massira Al Khadra, 6th November; Fete de l'Independance (Independence Day) 18th November; Aid El-Fitr, (1st and 2nd Chaoual); 1st January; Aid Adha (10 et 11 Hija); Le Premier Moharrem (The first Moharrem) and Aid Maouloud Annabaoui (12 et 13 Rebia I).

Note: Chaoual, Hija and Rebia are months in the Muslim calendar.

The following days are movable feasts governed by the Arabian Calendar – 1/2 Choual, 10/11 Diahijja, 1 Moharram, 1/13 Rabia I.

Work may be arranged on all holidays.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

DEVELOPMENTS: New port of Anza under construction in position Lat. 30° 26′ N., Long. 09° 35′ W. Facilities will include 3,500 m. of quays, a Ro/Ro terminal and ship repair facilities. Depths alongside 10.5 m. – 15.0 m.

SHIPMASTER'S REPORT: November 1979.

Documents:

3 Copies Crew's Personal Effects.
6 Crew Lists.
3 Stores Lists.
3 Vaccination Lists.

Anchorage: Vessel anchored 0.5 miles South of breakwater.

Pilotage: Compulsory. Pilot boards 0.5 miles S.W. of the outer buoy. 1 hour's notice required.

Restrictions: Vessel can enter and sail during hours of darkness and at any stage of the tide.

Max. Size: Max. LOA 600 ft. (approx.) and max. draft. 26 ft. (approx.). Size of vessel limited by the swinging room.

Radio: Agadir Radio.

VHF: Pilot and Port Authority on Channel 16.

Tugs: Two available.

Berthing: Vessel berthed at No. 8 berth on the South mole which is about 7 cables from the harbour entrance. Max. LOA approximately 600 ft. and max. draft approximately 26 ft. Least depth of water in channel from sea to berth is approximately 30 ft. The bottom at the berth is sand and mud and the density is 1025.

There are no special bulk handling facilities. There are 10 cranes with safe working load of 10 tonnes. Ro/Ro facilities available, no floating cranes. There is ample equipment for handling palletised cargoes also storage space for palletised and break bulk cargoes. Containers are handled by ship's gear and storage space for containers is limited.

Facilities: The following are available: Fresh water (poor quality), fresh provisions, small repairs, there is a small machine shop, airport, Lloyd's Surveyor and laundry service.

AUTHORITY: Ministry of Equipment, Agadir Port Directorate, Agadir, Morocco. *Contact:* M. Abdelali, Port Director.

CASABLANCA: 33.36 N. 07.37 W. (See Plan)

PORT LIMITS: Vessels considered as "arrived" when passing Buoy CA 5 in position Lat. 33° 37′ 05″ N., Long. 7° 35′ 02″ W.

DOCUMENTS:

Certificate of Registration.
Cargo Manifests.
Stores List.
Crew Lists.
Passenger Lists.
Customs Declaration.
Bill of Health.
Ship's Entry Declaration.
International Tonnage Certificate.

All Stores Lists must be completed prior to arrival. If any errors found, vessel is heavily fined.

PILOTAGE: Compulsory for all merchant vessels of 100 tons and over, in the area between the meridians 7° 37′ 10″ W. (the foot of Jetee Moulay Youssef) and 7° 33′ 50″ W. (Table d'Oukacha) and South of the parallel 33° 37′ 4″ N. Pilotage is available day and night. The Pilot meets vessel at the CA5 buoy.

A red flag displayed at the signal station by day indicates that the Pilot cannot come out, on account of the sea, but vessels may enter the port at their own risk, and the Pilot will await them under the shelter of Jetee Moulay Youssef. Should bad weather prevent the Pilot from coming out, a vessel should not attempt to enter the harbour at night. The Master may contact the Pilot station for port radar service by VHF Channel 12.

ANCHORAGES: The anchorage outside Casablanca Harbour is partially protected from winds between South and West but a Westerly swell finds its way into the bay. With a heavy Westerly or Northwesterly swell the anchorage becomes dangerous.

The holding ground in most places outside the harbour is poor, but a berth with good holding ground may be obtained in a depth of 13 fathoms North of Jetee Moulay Youssef. There are numerous anchorage berths in the harbour, some at mooring buoys, in depths up to 12.8 m. (42 ft.).

MAX. SIZE: Max. length permissible, about 884 ft.; max. breadth permissible, about 105 ft.; max. draft permissible, about 32 ft.; but normally 30 ft. for berthing alongside. Tankers: Up to 37 ft. draft.

Report: A vessel's agent has reported that for tankers discharging crude oil at the Crude Oil Berth the Max. draft is 35 ft. and Max. LOA 250 m.

HEALTH: Masters must fill in the Declaration of Health and display the "Q" flag, to obtain Pratique. In the event of any suspected disease or fever on board, Masters have to warn their Agent before the ship's arrival.

TUGS: There are 9 tugs of 800 – 1,500 h.p. 3 of them are sea-going tugs fitted with modern salvage apparatus. Normally tugs join the vessel at port entrance. To call them, 4 long blasts and 1 short for 1 tug, 4 long blasts and 2 short for 2 tugs, etc. Ship's lines are mostly used.

BERTHING: To arrange berth, ETA message should be given 24 hours before the ship's arrival.

Mooring: When making fast to the jetty by the stern, the anchor should be let go at a sufficient distance from the jetty to allow for a good scope of hawsers.

Vessels are recommended to secure with special 10 in. coir hawser tailed with wire. It is recommended to moor head to the swell, but in bad weather a vessel should be ready to leave at short notice.

Pier/Jetty	*Berth No.*	*Total Length (m.)*	*Depth (m.)*	*Use*
Moulay Youssef Jetty	P3	120	10.00	Crude oil, Petroleum Products.

	64 – 66	510	9.00-12.00	Ore, Coal, Phosphates
	T7	125	9.00-12.00	Phosphates

CARGO HANDLING EQUIPMENT:

Dock Cranes:	62×5 – 10 tons 3×12 – 15 tons 2×25 tons
Mobile Cranes:	17×6 tons 1×36 tons 1×72 tons
Mounted Cranes:	3×6 tons 5×10 tons
Gantry Cranes:	1×19 tons 1×12.5 tons
Floating Crane:	1×50 tons, with 120 tons load capacity.
Forklifts:	241×1 – 32 tons
Grabs	32×2 – 5 tons 13×6 tons
Straddle Carriers:	12×30 tons

RADIO: The name of radio station for ETA cables to Agents, receivers, etc., is Casablanca Radio.

VHF:
Pilot: Channels 12 and 26.
Port: Channels 16, 12 and 14.
Harbour Manager: Channel 12.
Tugs: Channels 12 and 16.

SPECIALISED CARGO HANDLING FACILITIES:
Container Terminal: The container terminal was built in 1972 and is situated on the Tarik Pier in the West side of the port.
Total area: 18 hectares divided into 8 zones.
Total quay length 790 m.
5 berths are reserved for the container traffic.
Depth 7.0 m. – 9.0 m.
Storage capacity: The storage area covers 85,000 sq.m. This allows a minimum storage capacity of 5,000 T.E.U.'s at two high.
Equipment:
2 mobile cranes on rails of 25 tons each.
2 rubber tyred travelling cranes of 36 tons each, and 1 mobile crane of 100 tons.
12 straddle carriers.
4 fork-lift trucks.
20 trailers.
7 tractors.

Grain Terminal: The Grain Terminal is located on the West side of the Commerical Pier. The terminal has a quay length of 250 m. and a depth of 9.5 m.
Capacity:
2 vertical silos of 30,000 tons storage capacity.
1 flat storage of 10,000 tons capacity.
Equipment:
3 gantries of 200 t.p.h. capacity each, reserved for import cargo.
2 gantries of 200 t.p.h. capacity each, reserved for export cargo.

Ro-Ro Terminal: The Ro-Ro facilities are located in the area of Berth A1 and A3 with 140 m. quay and depth 8.0 m.
2 Floating pontoons of 100 tons capacity.
2 Floating pontoons for Ro-Ro cargo with a maximum load of 35 tonnes.
1 freight station covering 6,000 sq.m.
Stuffing and unstuffing sheds and a parking area for TiR trailers.

Cold Storage: Two refrigerated warehouses on the Citrus Pier of 8,500 sq.m.
First warehouse is reserved for fruits, vegetables and any perishable produce, area 3,000 sq.m.
Second warehouse is intended for citrus and early vegetables, area 5,500 sq.m.

BULK HANDLING FACILITIES: *Phosphate Terminal:* 4 berths (64-65-66 and T7) located at the transversal jetty with a quay length of over 630 m.
Handling equipment:
2 conveyors of 2,500 t.p.h. for discharging railway wagons.
2 conveyors of 1,250 t.p.h. connecting the stockpile to the quays.
4 conveyors of 1,250 t.p.h. for loading purposes.
2 gantry cranes of 650 t.p.h. at Berth T7.
The storage capacity is 420,000 tons.

Iron Ore and Coal Terminal: 4 berths (60 to 63) with a quay length of 540 m.
Handling equipment:
1 gantry 12.5 tons.
1 new gantry of 600 t.p.h.
Storage area of 20,000 sq.m.

STEVEDORES: There are 13 stevedoring companies. Normal working days are in two shifts (from 0700 to 1500 hrs. and 1500 to 2300 hrs.). Ship's Agents arrange gangs in connection with stevedores. Two daily orders (at 1100 hrs. and 1600 hrs.) are made to fix the number of gangs.

MEDICAL: It is necessary for Agent to receive advance notice of required medical attention. Hospital facilities available.

TANKERS: There are 4 tanker berths, *(a)* Berth P3 for Import and Export of white products, max. permitted draft 37 ft. and 60,000 d.w.t. *(b)* Three berths for Import and Export of black products. These berths (No. 60, 61 and 62) are situated inside the harbour, vessel's draft should not exceed 30 ft. Security tug necessary when handling certain petroleum products.
Report: December 1982: Vessel with LOA 237 m. (77,000 d.w.t.) berthed at No. P 3 and parted 11 mooring lines. For this reason owners believe the berth is unsafe for a vessel of this size with a swell running.

FRESH WATER: Numerous feeders along berths. Also delivery by barges is possible.

FUEL: All grades available. Ex-wharf or by barge.

FIRE PRECAUTIONS: Two firemen remain on board tankers while vessel berthed alongside. One fireman is required for other vessels carrying dangerous cargo.

CONSULS: The following countries are represented by consuls in Casablanca:
Algeria
Argentina
Austria
Belgium
Brazil
Denmark
Finland
France
Germany
Greece
Haiti
Italy
Netherlands
Norway
Panama
Poland
Portugal
Spain
Sweden
U.K.
U.S.A.
Yugoslavia

REPAIRS: Only small repairs and dry docking works are carried out.

DRY DOCKS: One large dry dock, 152 m. long and 22 m. wide (lifting power 10,000 tons). Three slips for ships up to 700 tons.

GANGWAY/DECK WATCHMEN: It is necessary to have watchmen on board. They are hired by the ship's Agent.

OPENING/CLOSING HATCHES: This work is normally carried out by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes are permitted for each crew member to be held out of bond.

REPATRIATION: Facilities exist for effecting crew change and arranging any necessary repatriation.

AIRPORT: Distance from airport, 25 miles. International connections.

TIME: GMT. No changes.

POLICE/AMBULANCE/FIRE: Police, 2210-74 or 19; Ambulance, 15; Fire, 15.

TELEPHONES: Only arrangements for placing telephones on board passenger ships are possible.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Needed.

DEVELOPMENTS: A new container terminal is to be built to the East of the phosphate jetty.

AUTHORITY: Direction d' Exploitation du Port de Casablanca (D.E.P.C.) 2 Bd. des Almohades, Casablanca, Morocco. *Tel:* 031.61.11, 031.89.51. *Telex:* 220.62, 226.90. *FAX:* 031.57.21. *Contact:* M. Bellouchi, Director.

EL JADIDA (Mazagan): 33.15 N. 08.31 W. (See Plan)

DOCUMENTS: As for "Casablanca".

PILOTAGE: Arranged by Agent, basis vessel's ETA given in advance. Pilot boards about 2 miles from the port entrance.

ANCHORAGES: About half a mile from head of North jetty in depths of 13 m. to 14 m. Hard rock bottom covered in sand. Holding ground is fair only.

RESTRICTIONS: The port comprises an entrance channel 50 m. wide and an outer harbour area 7 hectares, partially dredged to 3 m. depth to make a waiting basin. In the Southern part of the outer harbour is a quay, called the barge quay, 120 m. long, dredged to 6 m. depth.

MAX. SIZE: No limitations for vessels anchoring. For entering harbour, max. length 80 m., draft 5 m., entering at high water.

RADIO: No local radio station. Use Casablanca Radio for messages to Agent.

TUGS: Available. Normally join vessel 2 miles from port entrance.

CRANES: 2 electric cranes and 2 diesel cranes available.

MEDICAL: Hospital facilities available. Vaccinations can be arranged.

FRESH WATER: Available at the quay.

FUEL: Can be supplied subject to 24 hours' notice.

CONSULS: The only consular representatives are those of France and Portugal.

REPAIRS: Small repairs can be done on board, or parts sent to Casablanca. One small dry dock reserved for Port Authority vessels and fishing boats.

WATCHMEN: Recommended to employ watchmen.

OPENING/CLOSING HATCHES: Work performed by ship's crew.

REPATRIATION: Can be arranged via Casablanca.

AIRPORT: Nearest commercial airport is at Casablanca.

TIME: GMT. No changes.

HOLIDAYS: Sundays and holidays, except for National holidays, can be worked on payment of overtime.

POLICE/AMBULANCE/FIRE: Police, Tel: 19; Ambulance, Tel: 15; Fire, Tel: 15.

TELEPHONES: Cannot be connected to vessel, but telephone situated on the quay.

AUTHORITY: Arrondissement de L'Equipment et de la Promotion Nationale.

JORF LASFAR: 33.08 N. 08.38 W. (See Plan)

PILOTAGE: Pilot station at Jorf Lasfar Port. Pilotage compulsory at all times except for vessels under 100 g.r.t. Pilots are available day and night. There is no special arrangements. Pilot works under orders from the Port Authority. Tel: (03) 34-50-13. VHF: Channels 12 and 16.

APPROACHES: Safe depths in approaches. The 50 m. line is situated 3 nautical miles from breakwater and the depth in the entrance is 20.0 m.

ANCHORAGES: Safe anchorage 1.0 nautical miles North of jetty head. Max. permissible draft varies from 14.00 m. to 16.00 m.

RESTRICTIONS: There are no restrictions relating to movements. All ships can enter and leave port day and night, except ships carrying dangerous cargo.

RADIO/VHF: Jorf Lasfar Port Control is under the control of the Port Authority. VHF Channels are 12, 14 and 16.
Vessels are to send ETA 24 hours prior to arrival, directly to Harbour Master at Port Office. Telex: 78996M. Tel: (03) 34-54-20.

TUGS: Four tugs are always available at Jorf Lasfar, ready for manoeuvering at any time (24 hours).
"Aziz" 3,000 h.p. (Voigt Schneider).
"Said" 2,800 h.p.
"Amir" 1,800 h.p.
"Merzouk" 1,600 h.p.
The tug companies are SCRA (Societe Cherifienne de Remorqueurs). Tel: (02) 31-77-59. Contact Mr. Lachheb Aziz.
Offshore Maroc. Tel: (02) 27-21-77. Contact Mr. Rami Larbi.

BERTHING:

Berth No.	*Depth* (m.)	*Length* (m.)	*LOA permissible* (m.)
1	15.60	300	300
2	12.50	180	225
3	12.50	180	225
4	12.00	180	225
5	11.50	180	225
6	11.50	45	225
7	11.50	45	225
8	15.60	60	250
9	12.70	60	235
Q.C (10)	9.00	200	200
Q.T (13)	5.25	120	120
Ro/Ro	6.75	150	190
Q.S (11)	4.00	215	215

Berth No. 1: Berth for loading of phosphate and fertiliser. Two or three vessels, depending on length, can berth at this terminal.

Two chutes of 3,000 t.p.h. loaded directly from conveyor, which runs to stockpile 2 km. away.

Berth No. 2: Reserved for handling fertiliser in bags. In the future the berth will be extended by 300 m. Southward.

Berth No. 3: Reserved for handling coal. In the future the berth will be extended by 300 m. Southward.

Berth No. 4: This quay is reserved for discharging sulphur by 2 grabs, maximum rate 750 t.p.h. There is a conveyor running to stockpile of 4,000,000 tons.

Berth No. 5: See Berth No. 4.

Berth No. 6: Used for loading phosphoric acid and discharging ammoniac by 3 pipelines (1 for ammoniac and 2 for phosphoric acid). Loading capacity 1,800 t.p.h.

Berth No. 7: Used for loading phosphoric acid. Joined by 3 pipelines to the factory. Loading capacity 1,800 t.p.h.

Berth No. 8: Special berth for tankers but not presently equipped. At present, berth is used for the transhipment of grain from the mother ship to daughter. This operation started in 1986 and is only permitted in Summer time.

Berth No. 9: Used for discharging butane by pipeline to Somepi, whose tanks are situated about 6 km. from the berth.

Q.S. – Service Quay: This quay is reserved for tugs, pilot boats and dredgers.

Q.C. – Berth No. 10: Used for handling general cargo. There is one Ro/Ro berth with length 150 m. and depth 6.75 m.

Q.T. – Berth No. 13: Used for discharging (cement). Reserved for national lines traffic from Agadir to Jorf Lasfar, equipped with pipeline to the cement-silo of Simasfi. Stockyard capacity 250,000 tonnes.

CARGO HANDLING EQUIPMENT:

9	mobile cranes, capacity 6 tons at 25 m.
10	mobile cranes, capacity 4 tons.
2	chutes for discharging grain, rate 200 t.p.h.
11	tractors.
100	trailers.
2	travelling cranes for sulphur, 1,500 t.p.h.
2	travelling cranes for phosphate 3,000 t.p.h.
6	pipelines for phosphoric acid, 1,800 t.p.h.
1	pipeline for discharging butane, 100 t.p.h.
2	bagging machines for fertiliser.

STEVEDORES: There are 2 stevedoring companies.

ODEP is permitted to handle general cargo, grain, coal and butane. OCP is the operator for the terminals reserved for handling phosphate, sulphur, ammoniac, phosphoric acid and fertiliser.

Working Hours: Monday to Saturday 0700 hrs. – 1500 hrs. and 1500 hrs. – 2300 hrs. (2 shifts per day).

During Ramadan, there are special shifts from 0500 hrs. – 1200 hrs. and 1200 hrs. – 1800 hrs.

On Sundays and holidays, 2 shifts are available from 0700 hrs. – 1500 hrs. and 1500 hrs. – 2300 hrs. at overtime rates, or compulsory overtime, depending on port situation.

For bulk handling by OCP (Office Cherifien du Phosphate), 3 shifts work per day all the week including Sundays and general holidays.

MEDICAL: There are 4 private clinics and 3 hospitals for the general public at El Jadida, about 20 km. from Jorf Lasfar.

FRESH WATER: Available in all the quays. Cost: U.S.$ 1.5/ton.

FUEL: Fuel and gas oil available with 48 hours notice to Mory-Shell, Total or Mobil.

REPAIRS: No facilities available at the port.

If repairs are required, companies from Casablanca or Safi undertake the work. They will require 24 hours notice from the ship's Agent.

Two small docks are envisaged for repairing vessels up to 75 m. LOA.

SURVEYORS: Available through the Port Office or Pilot Station. All pilots are surveyors.

AIRPORT: Mohamed V Airport at Casablanca, distance 120 km.

POLICE/AMBULANCE/FIRE: Police, Tel: 34-54-71. If ambulance or fire service are required, call Port Control on VHF or Tel: (03) 34-54-20.

TELEPHONES: Public telephone box available near Port Office.

GARBAGE DISPOSAL: The garbage collection service is compulsory. Drums are provided on board and received alongside. Collection time is 1000 hrs. daily. Contact Port Office, Tel: (03) 34-54-20.

WASTE OIL DISPOSAL: Not available as yet.

SEAMAN'S CLUBS: None.

CURRENCY: Moroccan Dirhams (DHS).

GENERAL: *Provisions:* Fresh provisions are available.

Weather: Winds: S.W. and N.W. (Winter) November to March, but it is rare for work to be suspended.

Tide: Rise and fall of tide in the harbour 2.15 m. – 3.80 m.

SHIPMASTER'S REPORT: May 1984.

Location: The Port of Jorf Lasfar is situated approximately 62 nautical miles by sea, and 120 km. by a good tar sealed surfaced road from the town of Casablanca, in Morocco. The natural deep water bay along the coast has afforded the development of an industrial complex, designed for the export of phosphates and minerals, also phosphoric acid and sulphuric acid.

The principal breakwater, (Outer Breakwater) extends in a direction N.W. from the shore, 1.75 miles S.S.E. of Cap Blanc du Nord, on which is erected a "Yellow" square tower 31 m. in height with a black top, the position of which is Lat. 33° 09.8′ N., Long. 08° 37.6′ W. The light exhibited from tower is occulting white and red 6 secs., eclipse 1.5 secs. White visibility 9 miles 018° – 190° (172°), red visibility 6 miles, 190° – 018° (188°). The breakwater then turns S.W. and S.S.W. for a total length of 3,100 m. The Contre Digue or Lee Breakwater extends 1,250 m. N.W. from the shore 1 mile S.S.W. of the root of the Outer Breakwater.

Light structures stand each side of the entrance, on the Outer Breakwater about 500 m. N.N.E. of its head, and on the head of the Lee Breakwater (Contre Digue).

Approaching: Noon, day before arrival: Position Lat. 33° 00′ N., Long. 12° 59′ W. Course 088°(T) allowed 2° set Gyro course 086°. Day of Arrival: 0139 hrs. Sat. Nav. fix Lat. 33° 04′ N., Long. 09° 39′ W., disallowed set.

Radar observation of the coastline was made when 43 miles off (radar JMA 159B/3 cm.) but no positive fix. Vessel running in on Sat. Nav. D/R position.

0443 hrs. Radar fix obtained of Cap Blanc du Nord, 25 miles.

As vessel had no port information or charts ETA given as 0700 hrs. (Sunrise 0612 hrs. GMT).

Called Casablanca Port Control on Channel 16 from 0530 hrs. Reception was poor and distorted.

Called Jorf Lasfar Pilot on Channel 12 . . . No reply.

About 7 miles off, the Principal Breakwater was clearly outlined on radar screen, and observed 1 small coaster at anchor off the port.

Weather was cloudy, visibility clear, a light Easterly wind was blowing, slight sea with low, heavy, Westerly swell.

When about 4 miles off, contact was made with the Pilot. Due to the berthing of the coaster, we were delayed, and vessel was turned around on reciprocal course. At 0745 hrs. turned vessel around and made approach to embark Pilot, on his advice.

Embarking of Pilot: Under normal circumstances a pilot launch is available. Unfortunately for us, the launch was under repair and Pilot came out to embark on a rather large tug. Not a very suitable proposition at the best of times.

No positive position for Pilot Boarding has yet been established and no Sea Buoy to indicate any approach.

Ladder was rigged on starboard side. The tug had great difficulty to manoeuvre to come alongside, but after several attempts and much helm and engine movements, further hampered by the heavy swell running for both vessel and tug, the Pilot (French) boarded without any incident.

I am of the opinion, that the Pilot should board approximately 1.0 to 1.5 miles off the Principal Breakwater Head, by pilot launch, with vessel's speed about 5 knots, to afford a good lee and counteract the swell. The tugs should be secured before the ship enters the port as there is about a 90° to 120° port turn to line up with the entrance, with very little room for error. Both anchors to be ready for letting go. Once the turn into the entrance is made, the way must be taken off the vessel quickly and stopped, to effect a port swing again of 90° to back into the berth, for starboard side alongside berthing at Quay No. 2 where vessel berthed.

The 2 tugs attending, "El Hafid" and "Casablanca", 2,000 h.p. and 1,600 h.p. respectively, were adequate under the prevailing conditions. Both tugs used ship's lines. Vessel was secured with 5 head and 5 stern lines also 2 springs forward and aft.

Whilst alongside with a heavy swell outside the harbour area, surge was experienced alongside. Rope springs are suggested for use, or wire springs with rope tails.

The foregoing was a deeply laden vessel, length 224.5 m., draft 38 ft. (salt water) even keel.

Port Limits: The seaward boundaries of the port have not yet been defined. There are no designated anchorages off the port for vessels carrying the various categories of cargo.

There is no designated Pilot Boarding Ground.

There is no Sea Buoy, or Channel Marker Buoys to indicate a safe Fairway.

Charterer's particular requirements to vessel's Agents to be sent through Casablanca Radio, CNP (8 MHz).

We were able to contact Casablanca Radio, 5 days prior to arrival (1,600 miles).

Preliminary "Notice of Readiness" was tendered to Agents and receivers of cargo by radio on arrival (0700 hrs.).

I prepared 5 copies of my own "Notice of Readiness" which was handed to the Agent on berthing. He signed in acknowledgement, for transmission to the receivers.

"Notice of Readiness" was accepted at 0830 hrs., which was office opening hours on our arrival day.

Documents:

Crew List, 6 copies.
Passenger List, 6 copies.
Customs Crew Personal Effects Declaration, 1 copy and 1 copy for Agent.
Ship's Stores List, 1 copy and 1 copy for Agent.
Ship's Manifests. If on board for delivery to Agent.
Bills of Lading. If on board for delivery to Agent.
Ship's Particulars, 1 copy for Agent's use.

Pilotage: Give ETA to Agent at Casablanca. He arranges Pilot and tugs. Pilot comes by road from Casablanca.

Apparently 1 tug is always stationed at Jorf Lasfar port, but is not manned. A second tug comes from Casablanca. (Ordered by Agent, who arranges time). Two tugs seemed adequate for this vessel under the prevailing conditions. Advise Agent accordingly if you require more. Pilots consider 2 tugs are adequate.

Minimum 24 hours' notice is required for Pilot and tugs.

Pilot Launch: Approximately 7 m. in length, black hull, white topsides, with the word "Pilote" painted in white bold lettering on each side. (Also see "Approaching".)

Anchorages: See "Port Limits".

Pilots recommended 2 miles off breakwater, keep entrance to harbour clear. Holding ground good. Obstructions not charted.

Keep well clear of Cap Blanc du Nord. I have seen heavy breakers 0.5 miles to 0.75 miles off this point in strong Westerly winds and heavy swell/sea.

Depth lines showing a 1 m. difference in soundings have been charted on locally produced chart.

Tugs: Tugs do not have their own lines, ship's lines are used.

Also see "Approaching" and "Pilotage".

Restrictions: Movements, entry and departure are restricted to daylight hours only. From observations (personal) tidal range at spring tides is approximately 8 ft. No tidal predictions are as yet available.

We entered with a draft of 38 ft. (11.58 m.) salt water even keel. No adverse effect, or ground effect noticeable. Be careful of lift and fall in heavy swell, and rolling which will increase draft. As previously stated, apart from the light on Cap Blanc du Nord, no other lights are as yet available as an aid to navigation.

Depths: Entrance Channel 17 m. No. 1 Berth 13.5 m. (phosphate).

Max. Size: Nothing yet stipulated by Port Authority.

Our vessel: Overall length 224.50 m. Moulded breadth 32.20 m. Max. Summer draft 12.956 m. Max. d.w.t. (Summer) 64,931. G.r.t. 35,417, N.r.t. 21,296. Panamax bulk carrier.

Also see "Restrictions" and "Cargo Gear".

Health: Pratique free from one Moroccan port to next Moroccan port.

Master to send cable 24 hours prior to arrival to Agent. Cable to include following information: Number of crew (including Master) on board, certify vessel free of infectious disease, all crew healthy, and in possession of valid health and travel documents (passports) and last port or ports of call (21 days prior) arrival, and request Agent to supply for Radio Pratique and Immigration Clearance.

Prepare Health Declaration Papers if on board, otherwise Agent will prepare on arrival at berth, for signature.

Vaccination Lists, 2 copies.

VHF: Use Casablanca. Call CNP2. Frequency Channels 16, 12 and 14. When you know from the Agent that the Pilot will board on arrival at Jorf Lasfar, then call "Jorf Lasfar Pilot" on Channel 12.

Also see "Approaching".

Radar: Not available.

Radio: "Casablanca Radio". Call sign CNP on 8 MHz.

We made contact 5 days (approximately 1,600 miles from Casablanca) prior to arrival.

Berthing:

Berth No.	Depth Alongside (m.)	Length of Wharf (m.)	Width of Wharf (m.)	Surface Area (sq.m.)
1	15.60	300	82.28	24,684
2 – 3	12.50	180	75.00	13,500
4 – 5	12.80 – 11.50	180	30.00	5,400
6 – 7	11.50	45	30.00	1,350
8 (Oil Berth)	15.60	45	15.00	675
9 (Oil Berth)	12.70	45	15.00	675
Q.C./10	5.25 – 6.75 – 9.00	360	20.00	7,200
Q.S.	3.50 – 4.00 – 5.00	215	20.00	4,200

Note: The above information has been obtained from the Port and Harbour Authority. The maximum permissible draft for our vessel at Berth No. 10 was declared as 26 ft. This information was given by the Pilot who shifted the vessel from Berth No. 2 to Berth No. 10 and agreed to by the Port and Harbour Authority. I requested this in writing before shifting the vessel.

From the above legend for the Quai de Commerce (Berth No. 10) the shallowest part is at the Eastern end near the Ro/Ro adjustable run-off. Berth No. 10 Surface unsealed, and consists of loose metal/ sand/ stones, many potholes, dry grass, and totally unsuitable for discharge of grain.

Note of Protest and Indemnification of Liability served on the receivers by the vessel's command through the Agents. Receivers accepted it without question.

I am led to understand that the port is to be divided into 2 sections. Berth Nos. 1 to 7 will be privately operated, and the remainder of the port will be operated by the government.

On some plans, a grain silo is shown on the Southern side of "Quai de Commerce", adjacent to the Ro/Ro terminal. This I believe will now not be developed, and Jorf Lasfar will not be used as a grain port. At times vessels use Jorf Lasfar to lighten ship to 30 ft. and then proceed to Casablanca for further discharge.

Berth use (on completion of port):

No. 1	Phosphates	Nos. 8 & 9	Petroleum
No. 1 Bis	Coal	Nos. 10 & 10 Bis	General
No. 2	Phosphates	No. 11	Service
No. 2 Bis	Coal	No. 12	Fish
No. 3	Phosphates	No. 3	Ro/Ro
No. 3 Bis	Minerals	No. 14	Cereals
Nos. 4 & 5	Sulphur	No. 15	Containers
Nos. 6 & 7	Acid		

Cranes: There are no permanent cranes to speak of at any of the berths.

6 mobile cranes were made available for the discharge of our vessel. Type: Gottwald/Dusseldorf, luffing and slewing, diesel/motors.

Capacity: 6 tons × 8 m., 6 tons × 25 m.

Outreach: With base spreaders out, and tyres afloat, and in position the cranes could not plumb further than the centreline of the ship. (Beam 32.2 m. max., fenders alongside wharf).

No heavy lift cranes ashore or afloat available.

While in port 3 vessels were seen discharging heavy lifts for the industrial complex with their own gear.

One vessel discharged machinery and general cargo with ship's cranes.

Note: 1. Gearless ships would be serviced by the above mentioned mobile shore cranes.

2. Vessels with their own gear would have no difficulty to discharge cargoes such as grain/ores/coal/fertilisers/sulphurs/copra, etc.

Specialised Cargo Handling Facilities: A container terminal is envisaged but at time of writing is non-existent, (wharf or cranes).

Berth is available for Ro/Ro vessels with adjustable ramp, (power facilities and terminal non-existent).

Berth for tankers (Berths No. 8 and 9), available but as yet no pipelines to storage tanks, behind the ridge of hills in the background of the port, have been laid on.

Berths available for liquid chemicals, (see plan), but no pipelines or facilities as yet available.

No facilities for LPG/LNG.

Bulk Cargo Facilities: Refer to legend of berths, cranes, and additional notes.

Bridges: None.

Stevedores: Agent will organise gangs with receivers.

Port Working Hours: Monday to Saturday inclusive 0700 – 2300 hrs. over 2 consecutive shifts 0700 – 1500 hrs. and 1500 – 2300 hrs. Overtime, Sundays and holidays when available and/or compulsory. A third shift overtime also possible when ordered by receivers and agreed by Port Authority (2300 – 0700 hrs.).

There appeared to be no "meal breaks" or "smokos".

There is a language barrier unless you speak French and/or Arabic.

Medical: See "Documents".

There is a private clinic, and 3 hospitals for the general public, available at a town called El Jadida, about 25 km. from Jorf Lasfar.

Notify Agents who will make the necessary arrangements. Preferably 24 hours' notice is required due to the fact that there is no communication available from the ship or wharves (telephone). There is a telephone available at the Port Authority Office some 1.5 miles distant from the wharf area, but the office is not open day and night, also the Agent lives at Casablanca some 120 km. distant. My crew were cautioned to exercise care in their work habits to avoid accidents. Shore labourers will request first aid from the ship for minor cuts and bruises.

Dental treatment is also available at El Jadida.

It is advisable to have Cholera/Yellow Fever inoculations. Some charterers include this as a must in their charter parties. There is a Port Health Officer stationed at El Jadida, who clears the vessel on arrival.

Tankers: Two berths. No pipelines laid at present.

Density: During vessel's stay, when cargo discharged, calculations and final draft survey by ship was necessary. The average salinity (density) corrected for temperature was 1027.5/1028. Temperature varies between 16°C – 25°C.

Fresh Water: No fresh water available at Jorf Lasfar, nor are there any facilities yet laid on the wharf for this purpose.

Vessel maintained consumption, average 12 tons per day (which included domestic, culinary, toilet flushing purposes and laundry) from the water made by evaporator at sea on passage and prior to arrival.

Agents advise me that in very urgent circumstances, fresh water is available by tug, approximately 40 tons maximum, from Casablanca, but very expensive. (Not less than U.S.$2,500 per 40 ton delivery.)

Fuel: Not available.

Fire Precautions: Normal ship safety fire precautions. No equipment available from wharf. Nearest available fire brigade is from El Jadida.

Consuls: None available at Jorf Lasfar, or El Jadida, nearest is Casablanca. British Consul will act for certain Marine matters for British registered vessels.

I was able to have an extension to the vessel's "Safety Equipment Certificate" done in 30 minutes.

Take your passport to the British Embassy to gain entry. This will be checked after you have filled in a small form to indicate the purpose of your call.

Repairs: There are no facilities available for ship repairs, deck or engine.

The nearest repair yards and facilities are available at Casablanca. From the port plan, it would appear that there is to be 2 small docks or slipways, with workshop attached.

Dry Docks: None.

Surveyors: 1. Cargo Surveyors/Inspectors not available at Jorf Lasfar.

2. Ship's Surveyors (Lloyds/ABS/BV) not available at Jorf Lasfar.

Agents will arrange for Surveyors from Casablanca to attend. I was able to get the Lloyd's Surveyor at Casablanca to extend vessel's "Safety Construction Certificate" It took 7 days.

Gangway/Deck Watchmen: Compulsory. Two per vessel, one for ship and one on the wharf. It was noticed that they do a 24 hour shift. It is not essential to victual them, but as there is food available, it would seem the best idea to feed them and get good co-operation and service. The watchmen are ex-seamen and understand English. Agent will sign the victualling voucher.

Hatches: Opening and closing by ship's crew.

Certificates: To produce Ship's Register, Safety Equipment, Ship Construction, Safety Radio, Tonnage Certificate, Derat Exemption.

Customs Allowances: 200 cigarettes and 750 ml spirits per man/per week. They will open the bond stores for further issue weekly. Cost of obtaining Customs Officials per week 600 Dirhams which is about U.S.$75.

Beer is not sealed.

If vessel's stay is to be an extended one, obtain permission and take out the required amount for the stay, on *arrival.* This will save you the charge each time the bond store is opened. The Agent only advised me of this after the first request for additional allowance.

Customs Officials will examine personnel and their baggage on leaving ship and returning from shore.

Cargo Gear: Discharge was effected by shore gear, as our vessel is a gearless vessel.

Grabs were used, of which there were 8. They leak like sieves. ("Note of Protest" for loss of weight/quantity was served on receivers). The grabs are not the automatic open release type. They were landed on the hopper steel framework to effect release. The crane hooks were not moused, thus several times the grab wires came unsecured.

6 hoppers, the sides were not high enough, hence constant spillage.

A corkscrew type shaft, with an 8 in. tubular outer casing powered with a small electric motor at its head, driven by portable mobile electric generator, is used as a mini-elevator to load the grain which is dumped on the wharf into trucks and transported to the various consignees is one of the methods employed.

Cargo is also bagged from this stockpile on the wharf and carried and stacked on flat top trucks (240 bags per truck average) for delivery to consignees.

Canvas tarpaulins are used to cover the grain, in the event of rain.

We experienced 2 heavy downpours lasting about 3 to 5 hours, when pools and deep puddles of water developed (Berth No. 10), and 2 to 3 light rain periods lasting about 1 hour.

Include in your protest on arrival "Ship not responsible for damage due to discharge in wet or inclement weather, or for contamination and deterioration". This will be accepted by the receivers without question.

Direct loading from grab to hopper to trucks is also carried on. There is no weighbridge for weight checking.

Also see "Port Nador" – "Report, January 1984".

Repatriation: Crew members are able to join vessels or be repatriated.

Visas are required for certain citizens, whose country of domicile do not have diplomatic reciprocal consulates. Therefore please check before effecting any crew replacement.

On arriving at "Mohammed V" Airport at Casablanca, Immigration Authorities will endorse your passport with an entry permit. Cable or advise Agent the flight number and request Agent to assist in Immigration entry facilities.

You will have a baggage check at the airport.

When cleared you have to proceed to El Jadida where the Immigration will again endorse your passport. You will possibly have another baggage check at Customs in El Jadida and then proceed to Jorf Lasfar. This is because Jorf Lasfar is outside the jurisdiction of Casablanca.

Airport: "Mohammed V" Airport is situated approximately 35 km. from Casablanca, allow 45 minutes driving time from the heart of the city. The airport is serviced by a great many airlines, to name but a few, Royale Air Maroc, Iberia, Air France, Sabena, K.L.M., Swiss Air, Aeroflot, Lufthansa, British Airways, Iraqi Airways, Kuwait Airways, Libyan Arab Airlines.

Internal domestic flights are available to Agadir (on the coast), Marakesh and Ouarzazate (inland), Rabat the capital city of Morocco and Tangier.

There is no airport at Jorf Lasfar.

Time: GMT. No changes.

Holidays: There are 5 official governmental holidays.

There are 3 religious holidays (movable dates).

New Year's Day (English calendar).

On the above days "No Work is performed". This is questionable as we did work and sail on May 1st (Labour Day), which is one of the supposedly official holidays.

Police/Ambulance/Fire: As yet there are no facilities available at the wharf in Jorf Lasfar. There are facilities at El Jadida 25 km. away.

No assistance will be afforded the Master if he wishes security escort or Immigration facility for discharging crew members who are being dismissed for offences aboard ship, and have to be lodged in hotels prior to repatriation. They will only assist if there has been criminal assault on board.

Emergency Co-Ordination Centre: None available at Jorf Lasfar. The Agent is your co-ordinator.

Telephones: None at all available on ship, or wharf, at time of visit.

Also see "Medical".

Overseas calls are possible from the Post Office at El Jadida or some of the 4 or 5 star hotels at Casablanca. There are no direct dialling facilities. Connections are made through Paris.

I had difficulty contacting my Owners at Singapore, so had to use the telex from the hotel and request them to call me, which did not take long.

Services: None available at Jorf Lasfar. Casablanca is the nearest town to offer facilities for radio and radar repairs, through the Agents.

Banks: None available at Jorf Lasfar. "Banque Credite Maroc" operates in El Jadida. Casablanca is the nearest city to offer any facilities for transactions.

Storing: Vessels can be stored by truck.

No barges available. No launches available, only the pilot launch. In due course when the port becomes fully operational storing from barge on the offside will be possible with ship's gear.

No regulations in force regarding storing at present.

Trucks can proceed alongside ship at the berths.

Fork lift trucks (2 available – 3 ton) belonging to the port. 1 front end loader rubber tyre was available.

Customs Regulations: Ship's machinery, spare parts, deck stores, goods shipped from overseas, are subject to Customs clearance.

VERY IMPORTANT: Declarations/invoices *must* be in the French language, proper, clear and precise nomenclature for *every item,* with the cost per individual item.

e.g. It took 9 days to clear a container (LCL) containing equipment for the installation of "Halon 1301" after the container was landed at Casablanca to be delivered to ship's side.

Shore Leave: Shore leave is permitted for ship's Officers and crew. Passes are issued by the Immigration Authorities, after the vessel has berthed.

You must be in possession of your Pass when ashore.

If intending to stay at an hotel in El Jadida or Casablanca take your passport to check in at the hotel, as without it, you might not gain entry. Your passport will be held at the reception desk until account settled prior to checking out.

There is no way to obtain a taxi *from* the port.

Cargo transport trucks, initially offered crew transportation to El Jadida or Casablanca. Transport is available (taxis) from Casablanca or El Jadida, to the ship. Cost varies (day or night). Normal fare: El Jadida to ship 50 Dirhams (U.S.$6). Casablanca to ship 350 Dirhams (U.S.$42). Small mini-taxis are available for short distance transport in Casablanca. They do not have meters, 10 Dirhams seem to be the normal fare, for reasonably short distances.

"Siesta Time" is from 1330 to 1500 hrs. Business Houses (offices) close from 1300 to 1430 hrs. Working hours from 0830 to 1300 hrs. and 1430 to 1830 hrs.

Hotels: Casablanca: Several from 3 star to 5 star and prices range from 135 – 300 Dirhams for a single. Hyatt, 500 – 600 Dirhams. Consult tourist guide for information.

El Jadida: 2 hotels, the "Salam" and "Dounia", on the beach front. The former is more modern.

Sunbathing and swimming permitted in and around the hotel swimming pools. Tennis courts, volley ball, archery, horse riding, indoor dance and disco.

Identity Cards: See "Shore Leave".

Regulations: No regulations as yet promulgated by the Port Authority. A Harbour Master was appointed 1 week before we sailed.

As mentioned earlier Pilots are ordered by the Agent and come from Casablanca. The Harbour Master will not be doing pilotage.

Delays: We had none, having berthed on arrival. However, I would expect some delay if the wharf area has not been cleared from the previous vessel's cargo.

Weather: April: During the vessel's stay in port, strong winds Beaufort Force 7 were logged, coming from a West to W.N.W. direction. Winds backed to South and East, Beaufort Force 5. Heavy rain showers accompanied the winds. Temperatures ranged from 15°C at night to a maximum of 25° – 27°C during the day. Heavy dew after sunset.

Agent: The Charterers and Owners both used the services of the same Agency.

Lasry Maroc, 30 Avenue de l'Armee Royale, Casablanca. Telex: 21949, 21092. Tel: 31.38.75, 31.19.54. Cables: Jolasry.

The above Agent has an office equipped with telex and telephone facilities at El Jadida.

Lasry Maroc, 2 Rue William Redman, El Jadida. Telex: Jolasry 78990 M. Tel: 3276, 3370. Cables: Jolasry, El Jadida.

Note: 1. The telex number at Casablanca we used was Sagnav 24646 M.

2. The telephone numbers at Casablanca shown above are those printed on Agent's visiting cards.

SHIPMASTER'S REPORT: April 1988.

We were contacted by the pilot from the pilot station at El Jadida. Pilot boarded the vessel one mile off breakwater. Due to heavy swell, a good lee has to be provided for the pilot vessel. Breakwater lights were found to be working, but the light (Occ.W.R.10, 6M.) was not functioning. 2 – 3 tugs are available for assistance. There are 2 mobile cranes fitted with grabs at Berth No. 4. Each grab discharges about 8,000 tonnes per day. Heavy surging of the vessel takes place alongside and continuous attendance to moorings and gangway is required. Gangway has to be rested on uneven surface of the wharf. Fresh water is available alongside at a cost of U.S.$1.00 per ton. Nearest place for provisions, medical assistance, etc., is El Jadida, which is about 25 minutes drive by taxi and costs U.S.$30.00.

AUTHORITY: Capitainerie du Port de Jorf Lasfar, c/o Direction Provinciale des Travaux Publics, El Jadida, Morocco. *Tel:* 03-34-54-20. *Telex:* 78982. *Contact:* Captain Med Rabaz, Harbour Master. Mr.Rochi, Port Director (ODEP). Mr.Trami Med, Port Director (T.P.). Farid Warrak, Governor of El Jadida.

KENITRA: 34.17 N. 06.30 W.

Situated on the left bank of the Oued Sebou, 17 km. from the Atlantic.

PILOTAGE: Pilotage is compulsory for entering and leaving port. Vessels must wait outside the port entrance for the tide. It is possible to enter from 2 hours before until 1 hour after HW during the night, and from 3 hours before until 2 hours after HW during the day. The Pilot boards vessels at river mouth. The Pilot will be on station 2 hours before HW.

On arrival at the Roads or after 0830 hrs., call the Pilotage Department and advise arrival time at the Roads and draft. Pilotage Department on VHF Channel 16 and 2182.

RESTRICTIONS: From the mouth of the river up to the port is a dredged channel. Depths are 4.20 m. during neap tides and 5.40 m. during spring tides. Height of tide during neap tide is 2.60 m. Height of tide during spring tide is 3.80 m. The constant is 1.60 m.

During the Winter it is recommended to stay outside the port in strong squalls. Ships are advised by Kenitra Port Radio of the possibilities for entering port.

Between November and April there is a total of 6 or 7 individual days when the port is closed to navigation, due to weather conditions.

Vessels are berthed and unberthed in daytime only at present time.

RADIO: Messages to ship's Agent should be sent through Casablanca Radio. In the ETA message to Agent, also advise vessel's draft. There is a radio station at Kenitra for port use only. Watch-keeping hours are only during HW, on 2182 kHz.

TUGS: Two tugs of 250 h.p. and one of 130 h.p.

BERTHING: The outer port used only by trawlers, and a mooring quay of 360 m. length belonging to the Royal Moroccan Navy. The length of main quay is 870 m. and includes 10 berths. In addition to the above there is a jetty for wine vessels, and a jetty for oil tankers.

FRESH WATER: Supplied alongside the quays.

FUEL: There are supplies of diesel oil, gas oil and petrol in the port. These products supplied by tanker lorry along the quay.

CONSULS: The Consular representatives at Kenitra are those of Belgium, France and Portugal.
REPAIRS: There are workshops for small running repairs in the port. There is a slipway for ships up to 400 tons.
AIRPORT: The nearest commercial airport is that of Rabat-Sale and there is a small airfield at Kenitra.
TIME: GMT. No changes.
AUTHORITY: Port of Kenitra, B.P.23, Kenitra, Morocco. *Telex:* 91952. *Contact:* O. Ajebli, Port Director.

LAAYOUNE (El Aaiun): 27.04 N. 13.28 W.

LOCATION: Lighthouse at phosphate terminal in Lat. 27° 03′ 55″ N., Long. 13° 27′ 45″ W.
DOCUMENTS: See "Casablanca".
APPROACHES: There is a light located at the end of the bulk phosphate terminal in position Lat. 27° 03′ 09″ N., Long. 13° 27′ 07″ W. at the top of mineral silos, at a height of 180 ft. 1 flash every 5 seconds, range 10 miles.

There is also a fixed green light located at the Northern part of the terminal, range 10 miles, and a fixed red light at the Southern part of the terminal, range 10 miles.

The phosphate terminal installations give a good radar target at a distance of 25 miles. Vessels approaching from the North should keep 10 miles off the coast until the pier is bearing 090° and then steer towards the pier.

At night the installation lights are always visible and with a clear atmosphere can be seen from 25 miles off the coast.
PILOTAGE: Compulsory. Pilot boards about 0.50 miles off the pier head.
ANCHORAGES: Good anchorages can be found in 10 fathoms of water. When waiting for the Pilot it is recommended to anchor 0.50 miles Westward of the pier. No shelter in strong winds. Service of powerful auxiliary boats is available when lying at anchor.
MAX. SIZE: Depth 17.0 m. at LWL at the phosphate terminal berth.

General cargo is handled at a berth 2 miles North of the Phosphate Pier. The berth is managed by "Odep Laayoune".
HEALTH: Valid Yellow Fever and Cholera Certificates are required. Otherwise, usual clearance.
RADIO: There is no coast radio station in Laayoune. VHF radio communication is being placed at the phosphate terminal to work on Channel 12.

Ships calling at the terminal are required to send ETA cables or telegraph 72, 48 and 24 hours prior arrival to "Phosboucraa Laayoune".
TUGS: 2 tugs, each 960 h.p., are available to assist vessels.
BERTHING: Laayoune Mineral Terminal located approx. 6.5 miles South of Laayoune City.

The terminal head is in a North-South direction. Vessels are moored alongside dolphins that cover the two loading stations for 40,000 and 20,000 d.w.t. ships. The loading pier has a height above water of 50 ft. and the dolphins approx. 20 ft.

Facilities consist of modern equipment available for handling phosphate in bulk at a loading rate of 4,000 t.p.h. in two of the stations, and 2,000 t.p.h. at the third. The phosphate is loaded by means of movable loading machines with telescopic spouts to permit perfect trimming.

No gangway to be rigged at this terminal. Communication from ship-to-shore is by means of elevator from the loading machines.
REPAIRS: No repairs can be effected at this port.
AIRPORT: Laayoune (30 km. from harbour).
TIME: GMT. No changes.
FUEL: No bunkers available.
PROVISIONS: Provisions may be obtained.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: No seaman's clubs, but two first class hotels with usual facilities.
CURRENCY: Moroccan Dirham (DHS).

SHIPMASTER'S REPORT: November 1990.
Phosboucraa Ocean Terminal for Phosphate Loading: Chart: B.A. No. 863.

On a recent call to the above phosphate loading facility, the following observations were made:

The pier is about half a mile long, running North to South, with 3 berths, N.W., S.W., S.E. The N.W. Berth has been seriously damaged in a storm from the Southwest. The berth is closed and will not be repaired.

The Southernmost dolphin is isolated because the catwalk has fallen into the sea. Thus both the North and South light beacons are extinguished.

The vessel anchored 1.5 miles S.W. of the pier, and waited 24 hours for the swell to reduce to an acceptable level. The vessel was then placed at the S.W. Berth, using the port anchor with 7 shackles on deck, and picking up a heavy buoyant sea-line on the port side aft. The Pilot asked for 4 head lines to the Northerly dolphin, and three to the dolphin aft, no back springs required. The largest vessel to berth was 233 m. long, with a beam of 33 m., i.e. about 70,000 d.w.t.

The position of final mooring was with the vessel some 6 ft. to 15 ft. clear of the four steel breasting dolphins. Of these only the third from North had wooden cladding on it, the others were bare steel. The bearing area is pivoted and bears against a small section of rubber buffer. These dolphins are the last ditch defence of the concrete pilings on which the quay stands.

The berth has 2 telescopic extending booms, pivoted from the inboard end. The forward end is carried on a carriage around an arc, giving a wide range of movement. The booms are currently capable of 1,200 tons per hour. However, the vessel was not positioned correctly, and Holds No. 1 and 4 could not be properly centralised.

The Loading Foreman took station in the centre window of the wheelhouse, with walkie-talkie communications to the boom drivers and the shore plant. There were 3 foremen initially, and the Loading Foreman asked for a cabin for their use. They were given use of the Pilot Cabin as they were working nearby in the wheelhouse. They were fed on board.

Access was by means of a "two man cage" lowered from the loading boom onto the deck. Thus for a shift change, the 'new' foreman lowered the cage for the 'old' foreman and hoisted him up. Then the 'old' foreman lowered the cage for the 'new' foreman onto the deck, before stowing it at the boom position. Thus little chance of casual boarders visiting the ship. The pier has a permanent garrison of troops bivouaced on it. No shore leave is normally allowed, in special circumstances, visas have to be obtained from the local military commander.

The inspection party comprised Charterer's Agent, Owner's protecting Agents and 5 officials (Customs, Health, etc.). 7 Crew Lists were required, otherwise as per Casablanca. On departure, there were 3 officials for the papers. No Port Clearance is issued, but an Export Manifest is issued. The American Immigration Crew Lists were sent to the Embassy in Casablanca for processing.

The prevailing current sets across the wharf by 20° – 30°, which puts a heavy strain on the sea-line. The rapid changes of trim, and equally rapid changes in direction and height of swell can 'upset' the balance of the moorings in only a few minutes.

The vessel was moving in a constant "cork screwing motion" throughout the time on the berth, rising and falling 3 ft. – 8 ft. against the loading boom, and rolling 5° – 10°.

Several times the ship set down onto the 4th dolphin from North, and rubbed steel to steel. Damage was suffered when the dolphin got under the main deck multi-roller fairlead, breaking the welding and buckling the brackets.

While trying to heave in the sea-line, yet one more time, the deck eyebolt pulled out when holding 2 stoppers. One seaman was caught across the hand by the sea-line as it jumped, he subsequently fainted from shock. Possibly 30 ft. of sea-line was hove in during the loading. *This was in good weather with winds of Force 3 or less from the N.W.*

Ship's engines must be at short notice to leave the berth, if the wind or the swell become dangerous. The berth is very dangerous with wind and swell from the S.W. There are two dangerous wrecks reported to lie 2 miles West and Northwest of the main pier.

The vessel was unable to obtain a British, Spanish, French or American chart of the port of Laayoune in Spain or Casablanca.

A request was sent by radio for a 'Draft Survey' to be conducted on Owner's Account. The advice was that no such independant service was available, and the cargo was sold on 'sellers measurement'.

At the draft check it was found that the shore scale had apparently underread by nearly 1,000 tons or 2%. A run of 800 tons was asked for, but in fact the ship may have received 1,060 tonnes. This effectively removed any safety factor for the restricted draft at the discharge berth. Density was found to be 1028 – 1029.

The Loading Foreman, Chief Officer and Duty Officer made independant readings of draft at 6 points, with wave heights of 4 ft. across the figures as the ship continued to corkscrew actively.

The Bill of Lading was made out for the cargo tonnage shown by the draft check, with 'Quantity and Quality unknown', as endorsement.

Disbursement Account and Demurrage Statement was endorsed "Subject to Owner's Approval".

On sailing it was intended to take up the slack of anchor chain, put the sea-line on the bitts, and then single up to one line each end. Unfortunately the forward dolphin let all lines go at once.

The ship was hove forward and outward by the windlass, and holding onto the sea-line. However, the sea-line became so tight that it was dangerous to approach, and a "Dead Slow Astern" was needed to take the weight off it. It is a remarkably long line. Altogether the sailing was a tense period. A tug stood by on arrival and on sailing.

Fuel and water are not available. Any provisions or spare gear would need to be delivered by boat on the offside, due to the movement of the ship.

It was 60 hours from "finish with engines" until "stand-by main engines", with some 5 hours for electrical power failure (when the ship could not have sailed with booms extended over the ship), for 47,000 tons.

The concrete piers are showing signs of wear and stress from the heavy battering from the S.W. gales each Winter. I understand that in the future a new port will be built, and this terminal abandoned. The conventional wisdom is that in Summer months it is not an unreasonable berth, but in Winter there is much waiting for sea and swell to subside.

AUTHORITY: Phosboucraa – Laayoune, B.P. 76, Laayoune, Morocco. *Tel:* 9-36-28, 9-36-29, 9-36-30. *Telex:* Phostel 26614, Fosayoun 26769. *Contact:* Port Manager.

MOHAMMEDIA: 33.45 N. 07.22 W. (See Plan)

DOCUMENTS:
- Bill of Health.
- Derat Certificate.
- 8 Crew Lists.
- 3 Passenger Lists.
- 3 Provisions Lists.
- Ship's Certificates.
- Personal Effects Lists.
- Cargo Documents.
- Dangerous Cargo List.
- Clearance from Last Port.

PILOTAGE: Compulsory for vessels entering or leaving the harbour or shifting berth. Pilot may be contacted on VHF Channels 16 and 11. Pilot Station. Tel: (03) 32-47-91.

ANCHORAGES: For vessels entering the basin, 3 good anchorages in depths of 11 to 6.5 fathoms about one mile N.E. of the entrance.

RESTRICTIONS: Vessels with a draft over 15 ft. wishing to berth in the basin are obliged to wait for tide. No berthing at night time. Vessels may leave day and night, except gas tankers. All movements in the basin to be effected when conditions are favourable.

MAX. SIZE: *Basin:* Max. LOA 120 m. Max. draft 6.7 m. (22 ft.).

New Terminal: Berth A: Tankers up to 100,000 d.w.t. Max. draft 16.0 m.

Berth B: Tankers up to 150,000 d.w.t. Max. draft 17.0 m.

Sealine: Mooring buoy removed. Berths not in use.

Berth No. 1: Tankers up to 100,000 d.w.t.

Berth No. 2: Tankers up to 120,000 d.w.t.

HEALTH: Port Sanitary Control Officer boards immediately after arrival for Pratique delivery. In the event of any suspected disease or fever on board, it is necessary to advise by radio to Agent 24 hours before arrival. Pratique is automatic after calling at another port of Morocco.

RADIO: Casablanca Radio Station.

TUGS: 3×2,600 h.p. and 1×700 h.p. available day and night. Additional tugs, if necessary, can be ordered from Casablanca which is 16 miles away.

BERTHING: Vessels up to 120 m. in length and drawing up to 6.7 m. (22 ft.) at Spring tides and 5.4 m. (18 ft.) at Neaps.

Quay No. 1 has a length of 70 m. with a depth of 7.0 m. (23 ft.).

Quay No. 2 has a length of 170 m. with a depth of 6.20 m. Max. LOA 120 m. Max. draft 6.0 m.

Quay No. 6 has a length of 60 m. with a depth of 6.10 m. Max. LOA 90 m. and max. draft 6.0 m.

MEDICAL: There is the hospital and clinic in Mohammedia. Vaccinations can be arranged.

TANKERS: New terminal in position Lat. 33° 43′ 45″ N., Long. 07° 23′ 24″ E. for crude oil, LPG and naphtha.

Diameter to swinging area 1,000 m. Vessels may be berthed in day time only but can sail at night. Mooring is effected with 20 nylon ropes (8 head/stern lines, 4 breast lines and 8 spring lines). Wires may also be used but must have nylon tails, length of each wire to be 200 m.

Connections: Berth A: Length of berth 260 m. Minimum LOA 180 m. Three discharging arms of 12 in. diameter (maximum pressure 15 Bar), one loading arm of 8 in. diameter and one deballasting arm of 8 in. diameter.

Berth B: Length of berth 260 m. Minimum LOA 190 m. Maximum LOA 290 m. Three discharging arms of 16 in. diameter for crude oil and 2 discharging arms of 12 in. diameter for LPG.

Also see "Shipmaster's Report" and "Chief Officer's Report".

DENSITY: 1025.

FRESH WATER: Water can be supplied at any time in the basin and at the new oil terminal.

FUEL: Available from Casablanca at 48 hours' notice.

FIRE PRECAUTIONS: All tankers are confined by gates and watched over by special firemen.

CONSULS: There is no consul in Mohammedia. All are in Casablanca.

GANGWAY/DECK WATCHMEN: Watchmen are recommended.

OPENING/CLOSING HATCHES: This work is normally carried out by crew. When carried out by stevedores the cost is charged.

AIRPORT: The nearest airport for international flights is Mohamed V (Casablanca).

TIME: GMT. No changes.

HOLIDAYS: 1st January; 1st May; 3rd March; 23rd May; 9th July; 14th August; 6th and 18th November; and any other religious holidays which are not at regular dates.

POLICE/AMBULANCE/FIRE: Police, 44.66; Ambulance/Fire, 15.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Passport and Police Permit required for leaving the harbour.

GARBAGE DISPOSAL: Available.

WASTE OIL DISPOSAL: Available. Contact Port Authority. Tank capacity: 3×5,000 cu.m. – 15,000 cu.m.

SEAMAN'S CLUBS: None.

CHIEF OFFICER'S REPORT: (L.P.G.) May 1987.

Charts: BA. Charts No. 3257 and 806.

Anchorage: The anchorage used was that indicated on B.A. Chart No. 806. This anchorage being 1 mile off the outer leading lights and in 10 fathoms of water. There are unlit mooring buoys off the outer mole.

Pilotage: The Pilot boards from a black hulled launch off the inner harbour. Communications with the Pilot are on VHF Channel 11.

Berthing: Vessel berthed at the first berth inside the harbour on the starboard side. One tug is used to push the bow around to enable vessel to berth port side to with the bow out. The pilot boat runs the head lines to buoys. Vessel secures with 2 lines and 2 springs. The maximum draft at the berth is 20 ft. and the clearance is about 2 ft.

Berthing and unberthing is carried out at high water and in daylight hours only.

Ship's gangway used.

Cargo: A small arm 4 in., 300 ASA, is connected and disconnected by shore personnel.

Ethylene discharge at the berth (temperature −102.5°C). 3 pumps used with air back pressure of 3 Bar. Average rate of discharge 170 tonnes per hour.

Difficulties can be found when starting due to auto valve in shore line which closes in when the shore tank pressure is high. Pumps then trip out on low amps.

Ideally, vessel should start with 1 pump for 30 minutes so that shore can ascertain pressures.

Shore tank capacity 3,000 tonnes. The dewpoint was checked but no samples were taken.

There are 2 reliquefaction plants at the terminal.

Customs: The bond is sealed.

General: It is about 15 minutes walk to the town. There are a few small shops outside the gate which sell fresh vegetables and fruit, etc.

The fresh water supply on the quay is metered.

SHIPMASTER'S REPORT: (L.P.G.) April 1988.

Chart: B.A. Chart No. 860 and 861.

Port: Mohammedia. In some publications the port is known as Port Fedala.

Pilotage: The pilot boards from a black hulled launch off the inner harbour (Jetty Nord).

Pilot can be contacted on VHF Channel 11.

Anchorage: The anchorage is that indicated on B.A. Chart No. 861. Vessel anchored one mile NW of Point Sidi in a depth of 19.0 m. This anchorage was exposed.

The inner anchorage is about 0.5 miles N.E. of Jetty Nord but is very restricted.

Tugs: 3 tugs available. 1×3,000 h.p., 1×2,500 h.p. and 1 small pusher tug of 500 h.p.

Berthing: Vessel berthed at Berth No. 6 to discharge ethylene. Maximum draft over the bar is 6.6 m. at HW. Berth No. 6 accepts vessels up to 90.0 m. length. Depth at the berth is 7.0 m. at LW.

One tug used for berthing, ship's line. The tug pulls the vessel's bow round to starboard off the berth and vessel berths port side to, head out. The pilot boat runs the headlines to the buoy. Moorings forward consisted of 2 headlines and 3 springs. Similar moorings required aft.

Berthing is carried out during daylight hours only and at or near to high water, depending on draft. Berthing is carried out with a wind force up to Force 5.

Departure depends on draft but usually 3 hours either side of high water.

Ship's gangway used.

Berth No. 1, which is just West of Berth No. 6, handles vessels up to 125.0 m. LOA with a maximum draft inward of 6.6 m. The depth alongside the berth is 8.0 m. at low water. Berth No. 1 is used for chemical handling.

Cargo: Ethylene is discharged through 1×4 in. 300 ASA arm. Shore personnel connect and disconnect arm. The best discharge temperature is −102.5° C. The pumping rate varies with the temperature and ranges from 170 t.p.h. to 60 t.p.h. if the discharge temperature is high. The auto valve ashore closes if the temperature rises. The ethylene storage tank is a short distance from the berth and holds 2,800 tonnes. The tank is cooled to −103° C by vapour boil – off pumped by two Sulzer compressors to VCM production tank some distance away.

The discharge pressure again varies as temperature, but at full rate, back pressure was about 3 Bar.

When discharging, it is advisable to use one pump for about 30 minutes so that the shore can ascertain pressures. Trouble can be found when starting, due to the auto valve in the shore line, which closes when shore tank pressure is high, pumps then trip out at low amps.

About 1,500 tonnes of ethylene is imported each month.

Customs: The bond is sealed.

Shore Leave: Shore passes are issued, these are to be returned prior to departure. There is a guard on the gate.

General: It is about 15 minutes walk to the town.

The exchange rate for the Pound Sterling on our visit was 14 Dirhams to the Pound Sterling.

There are a few shops outside the gate which sell fresh vegetables, fruit, etc.

Fresh water available on the quay and is metered.

All services are available from Casablanca which is about 15 miles to the South.

Doctor available locally.

Developments: There is a new jetty for tankers inside the new outer breakwater. There are 2 berths for handling of LPG, chemicals, Naphtha and crude oil through Chicksan arms. Vessels berth head out.

SHIPMASTER'S REPORT: December 1988 (Updated 1992).

The following is an update of the Shipmaster's Report, dated April 1988.

Tugs: An additional tug of 2,500 h.p. is available.

Large tankers berthing at the Outer Harbour may require the assistance of an additional tug from Casablanca.

Berthing: Additional spring lines required if there is a large swell.

Daylight berthing only for LPG carriers. Product carriers berth between 0500 hrs. and 2000 hrs. Time depends on draft, but usually at or near HW.

Vessels at Berth No. 6 can sail at any time, depending on draft, but generally 3 hours either side of HW.

Pilot often unavailable between 2200 hrs. and 0600 hrs. (in December 1988 we sailed at 0100 hrs.).

Berth No. 1 used for chemicals and refined products.

Berth No. 2, inside of Berth No. 1, is used for refined products and loading salt. Depth about 7.0 m.

Cargo: Chicksan cooled with ship's condensate.
Watchman: Onboard throughout vessel's stay.
Officials: No Clearance at anchorage. In rare cases, crew changes are permitted at the anchorage.
Time: Summertime, GMT plus 1 hour, from June to September.
Airport: About 30 minutes by motorway to airport which is S.E. of Casablanca. West Europeans need "Negative Visas".

SHIPMASTER'S REPORT: October 1989 (Updated 1992).
Documents Required:
5 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration List.
Cargo Manifest and Cargo Documents.
Pilotage: Pilotage is compulsory for tankers entering or leaving. Pilot boards about 2 miles N.W. of the breakwater in a pilot boat with "Pilote" written on the sides. Pilots keep watch on VHF Channel 11.
Anchorage: It is advisable to drift West or Northwest of the breakwater while vessel is awaiting berthing instructions as the holding ground is poor. Many ships have lost both anchors as the anchorage area is exposed to weather.
Restrictions: Berthing of tankers is carried out in daylight hours only. Vessels can sail anytime.

Vessels do not berth when the swell height is more than 3.0 m.
Tugs: Normally, 5 tugs are employed for berthing. The 3 small tugs belong to the Harbour Authorities (ODEP) and 2 tugs (one each tied up forward and aft with tug's line) of 2,500 b.h.p. each belonging to "Offshore Maroc". Tugs join vessel Eastward of the breakwater. Sufficent Notice of Arrival must be given to the Agent as these 2 tugs come from Casablanca.

During the months of December, January and February, a considerable amount of surging of the vessel is experienced while alongside due to an enormous amount of swell that builds up inside the breakwater. During this period, it may be necessary to employ at least 2 tugs to keep vessel alongside, otherwise the mooring ropes part.
Breakwater: The breakwater extends about 2,800 m. into the sea. (See "Plan").
Berthing: At present, 2 jetties are in operation:
Jetty "A": For tankers from 15,000 d.w.t. to 100,000 d.w.t.
Max. length of tanker 260 m. (Minimum 180 m.).
Max. draft 16 m.
3 3 12 in. Chicksans for discharging oil products.
1 3 8 in. Chicksan for loading naphtha.
1 3 8 in. Chicksan for receiving dirty ballast.
Jetty "B": For tankers from 25,000 d.w.t. to 150,000 d.w.t.
Max. length of tanker 290 m. (Minimum 190 m.).
Max. draft 17 m.
3 3 16 in. Chicksans for discharging crude oil.
2 3 10 in. Chicksans for discharging oil products.

There are plans to build 3 more jetties with a total wharfage of 470 m.
The ship's head is 044° when secured to the jetty.
The dirty ballast receiving facility can receive 15,000 cu.m. of dirty ballast.

There are 10 dolphins for securing vessel at each berth and vessel is moored with 4 head lines and 4 stern lines, 2 breast lines and 4 back springs forward and aft.
Fresh Water: Connection available on the jetties and there is no restriction on the amount of water that can be taken.
Gangway/Deck Watchmen: 3 deck watchmen belonging to a private company are necessary.
Identification Cards: I.D. cards are issued by the Immigration Authorities and are required for seamen going ashore. It is advisable to send the Crew List in advance to the Agent.
Shore Leave: Crew members wishing to go ashore have to walk about 2.5 km. to the main gate. There is no transport provided by the terminal up to the main gate. From the main gate, taxis and buses are available to go either to Mohammedia town or to Casablanca.

AUTHORITY: Office d'Exploitation des Ports, Direction d'Exploitation du Port de Mohammedia, B.P. 98, Mohammedia, Morocco. *Tel:* 32.47.92, 32.40.76, 32.40.77, 32.40.78. *Telex:* 22969 M. *FAX:* 32.40.75. *Contact:* Commandant de Port.

PORT NADOR (Beni Enzar): 35.17 N. 02.56 W.

SHIPMASTER'S REPORT: November 1979.

DOCUMENTS:
6 Crew Lists.
3 Stores Lists.
Vaccination List.
PILOTAGE: Compulsory. Pilot boards off the breakwater and requires 1 hour's notice.
ANCHORAGE: About 0.5 miles N.E. of the breakwater.
RESTRICTIONS: Vessel is able to enter and leave at any stage of the tide, day or night.
MAX. SIZE: LOA 500 ft. (approx.). Max. draft 8.5 m. (approx.). Size of vessel limited by swinging room. Underkeel clearance of 1.5 m. required.
RADIO: Nador Radio.
VHF: Port Authority and Pilot on Channel 16.
TUGS: One tug of 600 h.p. An additional tug of 1,500 h.p. may be available.
BERTHING: *Berth No. 1:* The berth is close to the entrance and the max. size permissible is approximately 400 ft. LOA and approximately 8.5 m. draft. The least depth in the channel from sea to the berth is 13 m. The nature of the bottom at the berth is sand and mud and the density is 1025.
Cargo Facilities: There is 1 ore loader for small vessels. There are 4 mobile cranes with safe working load of 6 tonnes. No Ro/Ro facilities. There is ample mechanised equipment for handling palletised cargoes. There is storage space for break-bulk cargoes and storage for palletised cargoes, however, there is little covered space. There is no equipment for handling containers and there is no storage space for containers as there is no hard ground.
FACILITIES: The following are available: fresh water, fresh provisions, small repairs, small machine shop, airport (at Oudja 140 km.), Lloyd's Surveyor, Salvage Surveyor, laundry service, doctor and hospital, groceries and meats.
CONSULS: Spanish Consul located in the port. British and French Consuls at Oudja.
TIME: GMT. No changes.
GENERAL: Port Nador is situated next to Melilla, and the same entrance between the breakwaters is used for entering, although both ports are run entirely separately, Melilla being Spanish and Port Nador being Moroccan.

The port under construction is to have 14 berths, at the moment there are only 2 berths working, both of which are only partially completed. The only shed constructed is used for palletising and storing fruit.

Maximum intended draft when all is completed will be 13 m.
DEVELOPMENTS: Port construction is taking place at the present time and eventually 14 berths will be available. There will be 1 oil/mineral berth with depth of 12.5 m., 2 berths with 8.5 m., 1 berth with 6.5 m. and 1 berth with 5 m. in the initial stages.

REPORT: September 1980.

This port is still under construction but for the last 2 years has been open for trade of iron ore, lead and citrus fruit (seasonal). There are 3 piers now in use as follows:
Mole No. 1 (S.W. side) for the shipping of iron ore.
Mole No. 2 (N.E. side) for lead and general cargo.
Mole No. 2 (S.W. side) for citrus fruit.

The N.E. side of Mole No. 1 will also be for minerals but is still under construction.

REPORT: January 1984.

Ships have discharged on voyage charter at Nador on two occasions with similar experiences in the discharge of grain. Ships berthed at an open quay and the cargo was 'dumped' by portable cranes of light construction which are fitted with anemometers, in an area too far from the side of the ship to allow the use of ship's cranes. When the wind reaches Force 4 it is considered too dangerous to continue discharge and work ceases.

Charterers claim that work is stopped by the Port Authorities and that such time lost does not count as laytime, claiming it is a non weather working day.

This method of discharge is used because of a shortage of lorries, which, if they were available, could be loaded using ship's gear alongside the ship during such stoppages for wind.

Whilst no delays have been experienced at the port of Jorf Lasfar, the Master informed us that the same method of discharge was used at that port.

Owners should endeavour to protect themselves when fixing business which is likely to include discharge at this port as the wind seems to reach Force 4 on many days and a lot of time is lost resulting in costly delays.

SHIPMASTER'S REPORT: December 1989.

On arrival at Port Nador all Passports for non-Moroccan crew were taken ashore by a representative from the Immigration Authorities. A non-Moroccan crew member wanted to go across the border to Melilla (the Spanish part of the harbour) and therefore wanted his Passport back, he was told by the Agent that the Passports would not be released until time of departure, in exchange for the shore passes issued on arrival.

When the Master spoke to the Agent to try to find out what the problem was, he was told that if we wanted to go to Melilla, we should have informed the Agent/Authorities on arrival, in order to have our Passports processed.

No laundry service available in the Port of Nador.

SHIPMASTER'S REPORT: April 1993.

DOCUMENTS:
8 copies Crew List.
1 copy Maritime Declaration.
2 copies Arms and Ammunition List.
1 copy Passenger List.
2 copies Cargo Manifest.
1 copy Ship's Stores List.
1 copy Crew Personal Effects List.
PILOTAGE: Compulsory. Pilot boards about 1-1.5 miles N.E. of breakwater.

Pilot is available between 0630 hrs. – 2200 hrs., and tug is available between 0630 hrs. – 2000 hrs. only.
APPROACHES: It is recommended that vessels approach at a minimum speed of about 2-3 knots when about 2 miles off breakwater and head for breakwater of Melilla (Spain).

BERTHING: There is only one berth of 400 m., where large vessels can be berthed with max. draft of about 8.5 m. Our vessel (Panamax) is the longest in port in last two years. There is only one small tug of about 1,800 h.p. available, so it is very difficult to berth if wind is stronger than 10 knots, and especially if it is Westerly. It is advisable to berth with at least 4 lines, 2 breast lines and 2 springs, fore and aft.
STEVEDORES: The port is run by ODEP Stevedores Co., which is government-owned. Berth No. 1/2 has 4 mobile cranes. The cranes are very high and have good plumbing reach. The drivers are professional and can discharge up to 1,000 tonnes of wheat per 2 shifts. Normal shifts are 0700 hrs. – 1500 hrs. and 1500 hrs. – 2300 hrs. Sunday is a holiday, but overtime can be arranged. Cargo is either dumped directly on jetty or at times into trucks, which in turn dump a few feet away on jetty. Cargo lies in open space most of the time.
MEDICAL: All facilities are available at nearest town Nador, which is about 15 km. away. Taxis are available at main road, which is about 2.5 km. – 3 km. from jetty.
FRESH WATER: Available by shore connection. Cost is U.S.$1.0/ton. The loading rate is about 25 t.p.h.
AIRPORT: Nearest airport in Morocco is Oujda, about 140 km. from port. The other airport which can be used is Melilla (Spanish territory). Visas may be required by persons belonging to certain countries, if they wish to go ashore.
WEATHER: In April, winds mostly from West or E.S.E. In December and January, it is very difficult to keep vessel alongside as strong gusty Westerlies blow and push vessel off berth. Many vessels had experience of mooring ropes being parted.
WATCHMEN: Compulsory by Harbour Master's order. Watchman normally expects food to be provided by vessel.
PROVISIONS: Available, but need very careful checking of prices as all ship chandlers hike their prices to double normal price. One may need to go ashore with Agent to confirm prices of certain items, prior to getting reductions in their quoted rates.
GENERAL: As winds normally reach about 20 knots – 25 knots, crane drivers refuse to work if over 30 knots, depending on situation as to whether they are just dumping on jetty or have to align in funnels.
AUTHORITY: R.A.P.C.

SAFI: 32.19 N. 09.12 W.

DOCUMENTS: Clearance procedure is very simple. 3 Crew Lists, 1 Personal Effects Lists, 3 Passenger Lists and 1 Stores Lists only are required. Other documents are presented on berthing.
PILOTAGE: Arranged by vessel's Agent, to whom a correct ETA should be given. There is VHF radio contact with the pilot station and Harbour Master's Office. The pilot boat is located inside the harbour and the Pilot boards in position Lat. 32° 19′ N., Long. 9° 16.1′ W. Pilot ladder only is required.
ANCHORAGE: Recommended anchorage is S.W. of harbour entrance. Safe holding ground for 25,000 d.w.t. vessels. Vessels should keep port entrance clear.
MAX. SIZE: Vessels with a draft of more than 28 ft. and up to a max. of 30 ft. enter and sail at high water.
Also see "Shipmaster's Report".
HEALTH: Health Officer boards shortly after berthing but Agent must be advised before arrival if suspected disease or fever on board. Health clearance in one Moroccan port holds good for the next.
RADIO: Casablanca Radio for normal traffic or Safi Radio for local R/T traffic. Harbour Radio VHF Channel 16.
TUGS: Tugs stand by vessel inside breakwater and, usually, ship's lines are used.
BERTHING: Vessels berth in order of arrival. Port used for export of manganese and barytes. No night entry after 1900 hrs.
STEVEDORES: Gangs are arranged by vessel's Agent. Night work is possible from 1800 to 2200 hrs. and, very exceptionally, until 2400 hrs.
MEDICAL: Advance notice of required medical attendance is advisable but not essential. Modern hospital and clinic are available. Vaccination is only necessary when vessels have called at cholera and yellow fever ports.
TANKERS: Only small tankers used in this port. White products and gas oil imported; no export. Ammonia tanker berth max. draft HW 30 ft.
DENSITY: Density varies between 1024 and 1026.
FRESH WATER: Availability not limited; by hoses from quay.
FUEL: Limited supplies gas oil; diesel available but must be stemmed. Fuel oil and large quantities diesel, gas oil can be delivered by tanking lorry from Casablanca.
CONSULS:

Denmark	Tel: 30.39	France	Tel: 27.97
El Salvador	Tel: 28.76	Portugal	Tel: 23.58
Finland	Tel: 31.40	Sweden	Tel: 29.06

REPAIRS: Major repairs not possible; small workshops only for repairing fishing boats.
GANGWAY/DECK WATCHMEN: Watchmen necessary. One watchman day and night.
OPENING/CLOSING HATCHES: Normally done by crew but can be arranged by stevedores with advance notice.
CUSTOMS ALLOWANCES: 200 cigarettes, and one open bottle of spirit allowed each man. Bond is sealed and heavy fines are imposed by Customs for smuggling.
REPATRIATION: Repatriation by air or sea through Casablanca, 150 miles away.
AIRPORT: Nearest at Casablanca, served by principal European airlines.
TIME: GMT. No changes.
HOLIDAYS: On the following holidays no work is possible: 1st January (New Year's Day); 3rd March (Coronation Day); 1st May (Labour Day); 18th November (Independence Day). Other Moslem and Christian holidays are subject to last minute decisions as far as tariff is concerned, but work can be arranged.
TELEPHONES: No telephones can be placed on board. Public telephone available on the quay during working hours only.
SHORE LEAVE: Police permits are required by crew and are delivered by Immigration Authorities.
IDENTIFICATION CARDS: These are needed.
GENERAL: Masters are strongly advised to take local currency from their Agent. Landing of foreign currency encourages black market transactions and incurs confiscation and heavy fines as well as delays by the Customs Authorities.

SHIPMASTER'S REPORT: January 1983.
Max. Size: Max. draft on entry was said to be 35 ft. (10.67 m.) on HW.
At Phosphate Wharf vessels loading to more than 8.8 m. must – due to berth/draft restrictions – work for completion on HW. Max. LW draft at inner end was given as 9.3 m. minus 0.5 m. for surge effect.
Air draft problems affect large vessels in ballast and it is advisable to keep tank ballast in until alongside.
Conveyor outreach limits can cause problems for wide beam twin hatch vessels.
Berthing: Restriction on night entry on longer vessels applicable. (This vessel sailed at 2300 hrs. on HW with a draft of 10.54 m. Pilot transferred to another large deep draft vessel which was to move into our berth after we cleared).
Stevedores: At Phosphate Wharf, 24 hour working to suit tides, via 2 conveyors each of capacity 750 t.p.h., weights found to be accurate.
General: Small amounts of foreign currency may be taken/used ashore; occasionally gate officials enter amount on back of landing permit.
Phosphate company generally require all final ships' paperwork to be signed in their office ashore.

AUTHORITY: Capitainerie de Port.

TANGIER: 35.47 N. 05.48 W. (See Plan)

PORT LIMITS: To the South by the coast and port installations and to the North by a line joining Pointe de Malabata and the Mouth of L'Oued Elyhoud.
DOCUMENTS: Required on arrival:
Health Declaration.
2 Crew Lists.
7 Cargo Manifests.
5 Lists of Passengers Disembarking.
4 Lists of Passengers in Transit.
Required on departure:
5 Cargo Manifests.
5 Manifests of Passengers Embarking.
PILOTAGE: Pilotage is compulsory for ships of more than 50 g.r.t. for entering, leaving and shifting in harbour. Departure possible throughout 24 hours. Pilot on VHF Channel 16/12 throughout 24 hours. Vessels should advise arrival 6 hours and 1 hour in advance.
Pilot boards 0.5 miles North of head of breakwater.
ANCHORAGES: There are good anchorages to the East and Southeast of the breakwater head in depths of 10 m.–16 m.
RESTRICTIONS: The harbour area between the breakwater and the extremity of the main pier has a minimum depth of 9 m.
Wreck Buoy: It is very important that vessels keep the wreck buoy (35° 47.27′ N., 05° 47.05′ W.) on their port side when entering the port.
HEALTH: Apart from the international laws which must be obeyed, vessels coming from an infected area must send in advance (12 hours) a telegram to "Saniport Tangiers" describing the state of the vessel and persons on board.
Vessels having a sick person on board to be landed at the port must send a telegram as soon as possible to "Saniport Tangiers" with all details concerning the case to be brought ashore and await the corresponding reply.
Evacuation of sick persons is effected by ambulance, either municipal or private, after having advised the Port Health authorities.
RADIO: Tangiers Radio listens on 2182 kHz and VHF Channel 16. Weather forecast at 0915 hrs. and 1630 hrs. GMT on 1911 kHz.
TUGS: The port owns 1 tug of 1,500 h.p.

BERTHING: Mole de Commerce:

CRANES:

2 rail mounted cranes with capacity of 10 tons.
4 rail mounted cranes with capacity of 6 tons.
2 mobile cranes, lifting capacity 6 tons.
1 mobile crane, lifting capcity 3 tons.
1 container crane with capacity of 45 tons.
1 crane, lifting capacity 30 tons.
1 autocrane for heavy goods with capacity of 30 tons.

STEVEDORES: Working hours: 0700 hrs. – 1500 hrs., 1500 hrs. – 2300 hrs.

MEDICAL: Hospital and clinics are available.

TANKERS: Length of berth 115 m. Butane gas carriers also handled.

FRESH WATER: Available.

FUEL: Only available to fishing vessels.

CONSULS:

Finland	932085	Spain	935625
France	932039	Sweden	935872
Italy	931064	Switzerland	934721
Netherlands	932145	United Kingdom	935895
Norway	937173	U.S.A.	935904
Portugal	931708		

REPAIRS: Slipway for fishing vessels.

GANGWAY/DECK WATCHMEN: Advisable, order through Agent.

AIRPORT: International airport 12 km. from port on the road to Rabat.

TIME: GMT. No changes.

TELEPHONE: Installation only possible at the jetty.

POLICE/AMBULANCE/FIRE: Police: Tel. 19; Town Ambulance: Tel. 932444, 934242 and 937683; Private Ambulance: Tel. 921089; Fire Brigade: Tel.15.

GENERAL: *Tides:* Height of Springs, 2.20 m. Height of neaps, 0.50 m.
Wind: (October – May) W. and S.W., (May – October) E.N.E. (sometimes Force 8).
Swell: From the N.W. in Winter which creates fairly rough seas in the port.
Currents: Insignificant.

AUTHORITY: Direction d'Exploitation du Port de Tanger, B.P.305, Tangier, Morocco. *Tel:* 936040/45. *Telex:* 33690. *FAX:* 931505. *Contact:* Port Director (Tel: 936040). Port Captain (Tel: 931882). Commercial Division (Tel: 936040).

TAN-TAN: 28.29 N. 11.01 W.

The following is a translation of French Notices to Mariners.

The new fishing port of Tan-Tan is situated close to and to the S.W. of Cape Nachtigal. The main breakwater is 1,698 m. long, running N.E. for about 900 m. and then to the East towards the coast. The counter-dyke (230 m.) is perpendicular to the main breakwater at about 100 m. from its end. In the extension of the counter-dyke, and starting from the coast, the cross dyke is 548 m. long.

The port entrance faces S.W., the passage is about 100 m. wide between the ends of the counter-dyke and the cross dyke.

The port has 2 berths with 6 m. and 4 m. depth, one berth on the cross dyke and the other on the main breakwater. It also has a slipway 100 m. long and 50 m. wide.

Inside the port care must be taken when the winds are from West to North which produce a fairly strong undertow.

In October 1979 there were no lights or buoys. Arrival by day is recommended. A characteristic gap in the cliff and buildings to the N.E. of the port, together with a mountainous summit to the South will be seen. To the North of the main breakwater, the sea breaks over a barrier reef. Near the port the current runs Southwards.

Anchoring is possible in 12 m. – 13 m. of water, with sandy bottom and very firm, 1.2 miles to the W.S.W. of the end of the main breakwater.A shallow of 6.4 m. is located 0.5 miles to the West of the end of this breakwater.

VILLA CISNEROS (Dakhla): 23.42 N. 15.55 W.

DOCUMENTS: *Foreign Vessels*

Crew List.
Health Pratique.
Passenger List.
Cargo Manifest.
Safety Equipment Certificate.
Radio Safety Certificate.
Seaworthiness Certificate.

PILOTAGE: Pilot is necessary to cross the bar and for river navigation. Pilot joins at anchorage. Pilotage compulsory for all vessels over 50 g.r.t. Contact Pilot by radio-telephone, via Port of Villa Cisneros Radio operating on 2182 and 2626 kHz from 0800 to 1300 hrs. and from 1500 to 2000 hrs. GMT.

ANCHORAGES: In depths of more than 10 m. about 0.6 miles East of the breakwater head. This situation is well protected from swell from the S.W. but open to winds from the N.E. which are frequently strong creating difficult conditions for very small vessels. There are no mooring buoys.

Vessels loading transhipment cargo anchor in position with Punta Galera Light bearing 030°T, 1.2 miles off. The prevailing winds blow mostly from the North up to Force 3 with a long low swell mostly from a Northwesterly direction.

MAX. SIZE: Length 100 m., beam 12 m., draft 5 m.

HEALTH: Masters are required to complete a health certificate for the Port Captaincy declaring that the vessel has not called at any infected ports.

TUGS: None available, only one small launch which may assist.

BERTHING: Breakwater of 750 m. length extends towards the S.E., berths alongside the last 200 m., 1 concrete pier for small vessels, 3 small jetties enclosing 2 docks, can be used by vessels of medium size.

STEVEDORES: Employed by Port Authority and engaged by ship's Agent.

MEDICAL: Hospital available for any kind of medical attention; doctors and ambulance service available.

TANKERS: Moor at Jetty No. 2. Pipe-lines 4 in. diameter.

FRESH WATER: On the quays are 3 hydrants, capacity 3 t.p.h. and 4 of 2 t.p.h.

FUEL: Atlas Company can supply fuel subject to advance notice.

CONSULS: No local representation.

REPAIRS: Only facilities for very minor repairs.

OPENING/CLOSING HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: Crew are allowed to take only sufficient tobacco ashore for their own consumption. It is not permitted to take alcohol ashore.

REPATRIATION: Can be arranged provided that documentation is in order.

AIRPORT: Situated 1 km. from the port. 5 flights per week.

TIME: GMT is used all year round.

HOLIDAYS: Mohammedan Holidays: Aid el Queber (2 days); Aid el Mulud (1 day); Aid el Seguer (2 days).

POLICE/FIRE/AMBULANCE: Police Station situated 100 m. from the quays. Fire, Tel: 18. Ambulance, Tel: 17.

SHORE LEAVE: Allowed without restriction.

IDENTIFICATION CARDS: Seamen going ashore must take an identity card or a shore pass, issued by the Master.

Mozambique

BEIRA: 19.46 S. 34.50 E. (See Plan)

PORT LIMITS: Vessels are considered to be "arrived ships" when they enter the pilotage area, i.e. when they enter within a radius of 5 miles from the "P" Buoy (Pilot Buoy). The custom of the port is that vessels are in "Free Pratique" only when they have entered port and have been cleared by the Immigration Authorities. Immigration will only clear vessels in port.

DOCUMENTS:

Customs Clearance from Last Port.
Declaration of Health (Form Modelo No. 101-s.s.).
2 Sets Vaccination Lists.
7 Crew Lists.
7 Passenger Lists (with Passport Nos.)
2 Stores Lists (Lista De Mantimentos).
2 Crew Declarations (Company Form).
3 In-Transit Cargo Lists (Tonnage and Main Items) Company Form/Letter.
3 Hazardous Cargo Manifests.
Register of Entrance (Form DSM-079) (To Pilot).

Note: Shore passes issued at gate in exchange for Seaman's ID Card/Book. Radio Pratique not available.

PILOTAGE: Compulsory for all ships other than naval vessels, fishing vessels, pleasure craft and Mozambican registered coasters. Coasters only to/from inner anchorage.

Ship's name, ETA and draft should be radioed via Beira Radio, call sign CRS, 24 hours in advance to Port Captain Beira and owner's Agent.

Buoy "P": Lat. 19° 52′ 47″ S., Long. 34° 57′ 21″ E.

VHF Channels 16, 12 and 10 (plus most intership channels). Report arrival to Pilot on VHF Channel 16 or 12.

Unless instructed to the contrary by the pilot boat, vessels with a draft under 25 ft. anchor by "P" Buoy, 19° 52′ 47.3″ S., 34° 57′ 21.1″ E., and vessels with draft over 25 ft. anchor between "P" and "A" Buoys, 19° 56′ 20.1″ S., 35° 02′ 44″ E.

Pilot service is suspended when there are Force 7 winds from S.W.

ANCHORAGES: At Bar, "P" and "A" Buoys as indicated above. There is anchorage for 4 – 6 ships, depending on size (with draft under 6.0 m.), in inner harbour off Cabedelo sandpit.

RESTRICTIONS: Ships with draft 16 ft. and under can enter at any time. Ships with draft over 16 ft. generally enter 2 hours either side of high water.

MAX. SIZE: Max. permissible length about 800 ft. Max. permissible drafts between 31 ft. – 34 ft. at springs, depending on depth alongside, about 27 ft. – 29 ft. at neap tides.

HEALTH: Vessel to radio "Sanidade Maritima", Beira, their ETA and "All Well". If "All Well", Health Certificate given by Pilot.

RADIO: Cape Town Radio.

VHF: Beira Pilots and Beira Port Control on VHF throughout 24 hours.

TUGS: Join incoming vessels at inner anchorage, about 1 mile distant from quays. Ship's lines used. 2 tugs available, up to 2,200 h.p.

BERTHING: No night berthing done unless with prior consent of Chief Pilot, otherwise no specific requirements.

Pungue Wharf:

Berth No.	*Depth* (ft.)	*Length of Berth* (ft.)	*Cranes* (Electric)
Fishing Wharf:			
1			3× 5 tons
Container Terminal:			
2, 3, 4, 5	34	2,115	2×50 tons gantries
General Cargo Terminal:			
6	29	540	4× 5 tons
7	29	540	1×10 tons 4× 5 tons
8	30	630	Coal conveyor
9	30	540	1×10 tons 4× 5 tons
10	30	550	1×20 tons 4× 5 tons
Oil Terminals:			
11	31	560	Oil Terminal
12	45	787	New Oil Terminal (To be operational April/May 1994)

Berth No. 1: Generally used by trawlers and coasters.

Berths No. 2, 3, 4, 5: Located at the Container Terminal and used mainly by container, Ro-Ro and general cargo vessels loading granite, copper and sawn timber.

Berths No. 6, 7, 9, 10: Used by general cargo vessels loading logs and cereals and discharging cement, cereals in bulk and general cargo.

Berth No. 8: Used by vessels loading cattle and discharging vegetable oil, tallow and molasses in bulk.

For loading of coal, there is a conveyor belt with one spout.

Range of Tides: 15 ft. – 21 ft. Maximum depth of water should only be taken as an approximate guide as actual depths are dependent on the port dredging programme. Maximum permissible draft for turning ships round at or off the wharves is 30 ft.

CARGO HANDLING FACILITIES: There is a mechanical appliance at No. 8 Berth Pungue Wharf, used for coal. This appliance is new and has never been used but it has been designed to achieve 700 t.p.h.It is also equipped with 1 spout.

Container Cranes: 3×40 tons capacity.

Mobile Cranes: 25 cranes with capacity 1-10 tons.

Electric Cranes: See "Berthing" – Pungue Wharf.

Molasses: Storage tanks, capacity 18,000 tons. Served via No. 8 Berth.

Vegetable Oils and Tallow: 5 tanks with total capacity 1,800 tons.

STEVEDORES: Ordered by Agent. Vessels should advise Agent their ETA at least 48 hours in advance.

Port Cargo Working Hours: (3 shifts throughout all days): 0700 – 1500 hrs., 1500 – 2300 hrs., 2300 – 0700 hrs.

From 1500 hrs. Saturday until 0700 hrs. Monday – all overtime.

MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid cholera and yellow fever certificates on international forms. Vaccination/ fever inoculations and certificates may be obtained ashore if required.

TANKERS: *Berth No. 11:* Discharge lines white and black oils, 2×10 in. lines feeding into 12 and 14 in. lines leading to storage tanks. Also a 22 in. discharge line for crude oil. No slop discharge facilities.

Berth No. 12: New oil terminal expected to be operational in April/May 1994.

Terminal equipped with 3×10 in. hydraulically operated loading arms, one hose derrick and various lengths of loading hose. Slop system available. Products handled: Diesel, petrol, fuel oil, jet fuel, av. gas, kerosine and solvents.

Note: The terminal is designed to accommodate tankers up to 50,000 d.w.t. However, the access channel has to be dredged first. As yet, there is no information as to when this will take place.

Also see "Shipmaster's Report" dated January 1994.

DENSITY: In harbour area allow 3 to 4 in.

FRESH WATER: Available at Berths No. 6, 7, 9 and 10. Rate depends on the city pressure.

FUEL: Fuel oil 1,000 Secs R. viscosity, marine diesel 43.1 Secs R., diesel 34.1 Secs R. 3 – 4 days' advance notice required. Bunkers delivered when alongside, no bunkering barge available.

CONSULS: Belgium, Netherlands, Portugal and Zimbabwe.

REPAIRS: Most types of deck and engine repairs are possible, but major repair jobs are not undertaken.

DRY DOCKS: 1 dry dock 115 m.×17 m.×8.5 m., suitable for ships up to 5,000 tons, LOA 377 ft. and max. beam 55 ft.

GANGWAY/DECK WATCHMEN: Compulsory to employ watchmen to prevent pilferage.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

CUSTOMS ALLOWANCES: There is no restriction on crew member holding in his cabin any amount of tobacco/wine, spirits.

CARGO GEAR: All gear supplied by stevedores except rain tents and special spreaders for heavy lifts.

REPATRIATION: Facilities exist and a valid passport is necessary as Immigration Authorities do not recognise a Seamen's Book as a valid travel document.

AIRPORT: Beira Airport situated 7 miles from port and is served daily by domestic airline which maintains flights to Nampula, Quielimane, Tete and Maputo, from where international flights are available.

International flights from Beira to Harare (Zimbabwe) only on Monday, Wednesday and Friday, preferably to be booked in advance.

TIME: Local time 2 hours ahead of GMT. No alterations made to clocks during year.

HOLIDAYS: January 1st (New Year's Day); February 3rd (Hero's Day); April 7th (Woman's Day); May 1st (Labour Day); June 25th (Independence Day) and September 25th (Army Day).

POLICE/AMBULANCE/FIRE: Port Police (Tel. 22920); Ambulance (Tel. 22442); Fire (Tel. 22222).

TELEPHONES: No telephones placed on vessels.

SERVICES: Services normally available for tank cleaning, compass adjusting, minor repairs to radar and radio.

SHORE LEAVE: Crew members and officers are allowed ashore, and shore passes are issued against Seaman's Book or Passport.

IDENTIFICATION CARDS: Required. Passport if possible, otherwise Seamen's Book.

DELAYS: Generally no delays, but sometimes 24 – 48 hours' delay following rain or bunching of arrivals.

GENERAL: Beira port works 24 hours per day, 7 days a week (except 25th December and 1st January). Overtime to be requested by vessel's Agent.

DEVELOPMENTS: A long term master plan is to be undertaken.

The plan includes a new coal terminal for vessels up to 125,000 d.w.t. and a new bulk terminal for sugar and cereals. The access channel will also be deepened in order to accommodate larger vessels.

SHIPMASTER'S REPORT: January 1994.

Approaches:

(1) New buoy Fl. 2 every 10 secs. (Racon "M") established in position Lat. 20° 08.98′ S., Long. 35° 20.03′ E.
This marks the shoal patches to Southwards.
(2) "A" Buoy operational (Racon "C").
(3) Following non-operational:
  Savane Lt.
  Macuti Lt.
  Macuti D/F Beacon and Aero D/F Beacon.

Anchorage: All vessels, apart from shallow draft coasters, anchor to Eastwards of "A" Buoy whilst awaiting Pilot. Ample water available.

Pilotage: Pilots meet vessels between "P" Buoy and Buoy No. 2.

Beira Pilot can be contacted on VHF Channel 12 and Port Control on Channel 16.

Port meetings are held at 1030 hrs. local time every day, and berthing information is available from 1100 hrs. onwards.

Shoal Patch: Immediately before the buoys marking the Western end of the Macuti Channel, a sand spit has encroached into the channel from the North. This is marked by a green buoy. On passing this buoy, we had a 2.0 m. underkeel clearance at high water (draft 8.72 m.).

Berth: Tankers berth at Quay No. 11, but a new terminal is under construction some 5 cables up-river of No. 11, and according to information will be operational by the end of February 1994.

When mooring starboard side to at Berth No. 11, ropes are sent out in following sequence:
(1) 2 springs fore and aft.
(2) 4 breast ropes forward to buoy.
4 stern lines aft.
(3) 2 headropes forward to head buoy – These ropes have to be long ones.

During spring tides, the port requires a tug to hold up for approximately 4 hours during the worst of each ebb. This is because the outgoing tide runs off the bank and pushes the vessel away from the berth.
Discharge: The rate is good and we averaged 1,000 t.p.h. whilst discharging two grades.
Water: Difficult to obtain at Berth No. 11, as no pipeline, and would have to be delivered by road tanker. Hoses to be supplied by ship. At present, Beira only has water turned on for 2 hours daily.

AUTHORITY: Direccao do Porto da Beira. *Tel:* 321236 (Pilot Station). *Contact:* Captain Jan Waterdrinker, Port Captain.

AGENT: King and Sons (Beira) Lta., P.O.Box 1485, Beira, Mozambique. Tel: (27) 258-3-328620. Telex: 7393. Cables: Baronet, Beira.

MAPUTO: 25.59 S. 32.34 E.

DOCUMENTS:
6 Crew Lists.
1 Stores List.
6 Passenger Lists.
Last Port Customs and Port Clearance.
1 List of Ports of Call.
1 Health Declaration (given by Pilots on arrival).
1 Entrance Report (given by Pilot on arrival).
1 Customs Entrance (given by Agent on arrival).
1 Railway Statistics Form (given by Agent on arrival).
Shipmaster's Report: March 1981.
Same as Beira Report except:
6 Crew Lists (1 to Pilot).
Stores List.
6 Passenger Lists.
1 Crew Declarations.
1 List Ports of Call.
In Transit and Hazardous Cargo List is required.

Notes: Immigration requires all-hands muster with I.D, Card/Book on entering and sailing.
Immigration Clearance: Inwards: 0600 – 1800 hrs. only inside harbour proper. Outwards: 0600 – 2400 hrs. except in special circumstances.

N.B. Vessels at the pilot station cannot obtain Pratique because this includes Immigration Clearance and can therefore be considered as not having arrived or not being in all respects ready to load.

PILOTAGE: Compulsory. Available during daylight hours only.

Pilot granted only if 16 hours' notice of ETA given.

On arrival vessels can contact Pilot on VHF Channel 16 (working on Channel 14).

The pilot ladder is used together with the accommodation ladder in order that the Pilot has a climb of 9 ft. on the pilot ladder.
Pilot Boarding Position: Pilot boards at Buoy No. 4 (South).

ANCHORAGES: Inside harbour: One each for vessels drawing 33 ft., 31 ft., 27 ft. and 26 ft. respectively. Six for vessels between 17 ft. and 19 ft. Vessels delayed in berthing are brought in from pilot station at port's convenience.

RESTRICTIONS: Berthing and Unberthing only during daylight hours.

MAX. SIZE: Maximum draft is 7.5 m. plus height of tide (Max. 3.8 m. HWST) = 11.3 m. Also see "Berthing".

The controlling factor is the depth in Polona Channel, which in August 1988 was 35 ft.

HEALTH: Pratique granted by Pilot unless disease prevalent on board when Masters should telegraph "Saude" Maputo.

RADIO: Advice of arrival 16 hours before to the Harbour Master or Chief Pilot and Port Health should be sent through the station C9C (Naval), operating 24 hours on 500 kHz, replying on 487 kHz, also 2000 to 0500 hrs. GMT on 8356 kHz to 8376 kHz (replying 8642 kHz) and 0800 to 2000 GMT on 12534 kHz and 12564 kHz (replying 12990 kHz). All other non-official messages through station CRL, operating 0200 – 1800 GMT on 8 MHz at even hours, 0400 to 1800 GMT on 4 MHz at even hours plus 30 minutes (answering on 4259 kHz). Continues watch 0200 – 0400 GMT on 4 MHz. Radio telephone through CRL on 2132 kHz at even hours plus 45 minutes 0600 – 1700 GMT answering on 4415 kHz.

VHF: Pilot boat and Port Radio operate on Channel 16 (calling) and Channels 12 and 14 (working) from 0530 to 1830 hours.

TUGS: 2 tugs available, 3,200 h.p. and 2,300 h.p.

BERTHING: *Main Wharf:* All facilities owned and operated by Caminhos de Ferro de Mocambique (CFM), including stevedoring.

Dimensions: Wharf is in an uninterrupted line running roughly N.E./S.W., accommodating 12 – 15 vessels. Length: 3,275 m. Depth 9.0 m.
Grain: For loading or discharging bulk grain there are 2 Buhler machines at a berth with 33 ft. depth of water LWOST. About 120 t.p.h. A recent vessel averaged 2,900 tons per day. Bagging plants handle 1,000 bags per hour.
Bulk Loading Terminal: Length 210 m., depth 10.0 m. (max. sailing draft 11.3 m. (HWST) and 10.0 m. (HWNT). Terminal equipped with 2 shiploaders, 2 discharge/reclaimers, 2 wagon tipplers and conveyor system.
Coal: The best loading rate, in theory, is about 12,000 tons per day, however, in practice, allowing for shunting trucks, warping ship, etc., average rate is about 4,000 – 4,500 tons per day. In mid-1988 a vessel achieved 18,000 tons in 24 hours.

The length of the chute is 181 m. and it operates between angles of 46° and 58° to the perpendicular. At 46° the tip of the chute is 4.80 m. above wharf level and 9.50 m. from the wharf edge. At 58° the tip of the chute is 7.60 m. above wharf level and 11.80 m. from the wharf edge. At lowest spring tide the water at the coaling berth is 5.90 m. below wharf level and at highest spring tide 2.15 m., the difference between max. extremities being 3.75 m.
Sugar Terminal: Terminal equipped with 2 shiploaders and conveyor system from storage sheds. Sugar discharged from railway wagons by overhead cranes and grabs into hoppers which feed conveyors to storage sheds. The daily intake capability of installation is 2,000 tonnes and it has storage facilities in three sheds with a capacity of 40,000 tonnes each. Daily discharge rate 10,000 tons. Length of berth 200 m. Depth alongside 9.7 m.

Also see "Shipmaster's Report" – July 1988.
Steel Terminal: Adjacent to the Container Terminal. Length 200 m., depth 9.7 m. Terminal equipped with 4×20 tonnes electric quayside cranes and 20 tonnes capacity forklift trucks. Storage area for approximately 20,000 tonnes.
Container Terminal: Length 300 m., depth 9.7 m. Terminal equipped with 2×35 tonnes ship to shore gantry cranes for 20 ft. – 40 ft. containers, 1×35 tonnes and 8×20 tonnes forklift trucks, 10 MAFI/tugs and trailers and 3×40 ton heads/trailers. Storage capacity of terminal approximately 1,300 teu's.
LPG Carriers: Berth at Matola Ore Berth.
Timber: Vessels berth at Matola, Post No. 1 (P.I.). Max. draft 32 ft. Max. LOA, 600 ft. Vessels over 550 ft. LOA and draft over 25 ft. berth and sail during daylight hours only.

STORAGE CAPACITIES:
Ore and Coal Dumps: Gorjao Wharf.

	Tons
Coal	200,000
Ores	20,000
Copper	40,000
Vermiculite	4,000
Steel, Beams and Billets	100,000
Vanadium	7,000
Containers	1,000 TEU

Oil: Storage capacity 200,000 tons.
Molasses: 4 tanks, capacities 6,000, 9,000, 11,000 and 7,000 tons.
Fruit: 7,500 tons (1.133 cu.m./ton) in 100 chambers.
Fish: 200 tons.
Ore: Via Ro-Con unit attached to container cranes, rate 5,000 tons per day.
Sugar: See "Berthing".

CRANES: *Electric Cranes:* 75 units with capacity 3 tons to 60 tons.
Mobile Cranes: 15 units with capacity 3 tons to 20 tons.

Heavy lift crane with capacity of between 60 tons – 80 tons.

STEVEDORES: *Working Hours Monday through Sunday:*
0700 – 1100 1300 – 1700
1900 – 2300 0000 – 0600

All above periods are considered normal time.

MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid yellow fever certificates (cholera certificate too if cholera area) on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required. Men for sick parade must first go through the port doctor whose hours are week-days 0800 – 1130 hrs. and 1400 – 1730 hrs.; Saturdays 1000 – 1130 hrs., but always available on an emergency call.

TANKERS: Matola Mineral Wharf, 35 ft. LWOST, max. length of vessel 200 m.

Tanker Terminal: "T" jetty, 60 m. in length with mooring dolphins. Depth alongside 10.0 m. Pipeline from jetty to oil storage farm.

DENSITY: Average 1022.

FRESH WATER: Available at all berths, not available ex-barge.

FUEL: Vessels can be supplied from pipelines whilst working at all berths, including the Matola Appliance and Tanker jetty, but excluding the new wharf extension, where pipes have been laid but the system is not yet ready for delivering bunkers. The rate of delivery varies between 300 t.p.h. and 500 t.p.h. depending on the type of vessel taking bunkers. At present, supplies of gas oil and marine diesel oil are not in very plentiful supply, recommended to stem as far in advance as possible.

REPAIRS: No dry dock except for small coasters. Facilities for most normal work, except underwater riveting, cutting and welding, and shaft balancing.

WATCHMEN: Strongly recommend employing services of a local watchman, who will also control visitors and labour passes.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Often done by crew.

CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

CUSTOMS ALLOWANCES: Bonded stores are usually not sealed.

REPATRIATION: Facilities exist for nationals of those countries maintaining diplomatic relations with Mozambique. A valid Passport and visa is necessary as Immigration Authorities do not recognise a Seaman's Book as being a valid travel document.
AIRPORT: Maputo International Airport 4 km. from port.
HOLIDAYS: No cargo work on 1st January, on other holidays, work continues normally in the port.
TIME: Local time GMT plus 2 hours. No alterations made to clocks during the year.
TELEPHONES: A telephone will be placed on board the vessel.
SHORE LEAVE: Crew are allowed ashore, from 0600 hrs. – 1700 hrs. excepting nationals of those countries not maintaining diplomatic relations with Mozambique.
IDENTIFICATION CARDS: Crew and passengers are issued with Immigration Boarding Permits and they must be carried at all times. (Such permits to be returned to Immigration Officer prior to sailing.)
GENERAL: Crew and passengers not to take photographs in the dock area. Permission through Agent required to lower any boats or gear overside into the water or on to the wharf.

Do not immobilise main engines or carry out engine trials at the wharf until permission has been obtained by the Agent as the Authorities require vessels to maintain sufficient steam for main engines to be used at 2 hours' notice.

Customs guards to be supplied with meals and accommodation whilst at Inner Anchorage and alongside the wharf otherwise cost per guard will have to be paid by Agent on Owner's behalf.
DEVELOPMENTS: New buoyage system being installed.

Dredging in progress.

SHIPMASTER'S REPORT: April 1987.

The following navigational problems were encountered when arriving from South:
Canal Do Sul: The Canal Do Sul is closed and the buoys indicated on BA. Chart No. 644 no longer exist. All ships have to proceed via Canal Do Norte.
Canal Do Norte: It is advisable to proceed in daylight only as most of the buoys are missing or out of position.

Pilot boarding position is at Buoy No. 4 (25° 56′ S., 32° 45′ E.). No pilot launch available during our visit so outbound and inbound ships sometimes exchange Pilot with their own lifeboats. If one of the tugs is in operation, pilot will embark with that tug.

Berthing and unberthing was made without tugs using one anchor.

Most of the cranes were non-operational.

Before departure a thorough search for stowaways is to be made.

Due to problems of pilot transportation, Masters are sometimes asked to proceed outbound without pilot through Canal da Polana, this means dropping Pilot at Buoy No. 15. This is not to be recommended as positions of buoys are doubtful and numerous small fishing craft cross the channel.

When a tug is available the Pilot disembarks at Buoy No. 10.

Special attention has to be paid to Xefina Bank which is extending southwards.

SHIPMASTER'S REPORT: July 1988.
Vessel: 20,900 d.w.t.
Cargo: Loaded 17,500 tonnes of bulk raw sugar at the Sugar Terminal. Vessel used 2 loaders alternately at 500 t.p.h.
Sailing Draft: Forward: 9.2 m. Aft: 9.3 m.
Approaches: North Channel: Navigation limited to daylight hours only as some channel buoys are missing and some are unlit. IALA system used, red to port and green/black to starboard.
B.A. Chart 644:

Lacerda lighthouse unlit.

Macomana lighthouse unlit.

Necessary care must be taken when approaching No. 2 N. Buoy for clearing Baixo Cutfield Shoals.

No. 2 N. Red buoy missing.
No. 4 N. Red buoy in position but unlit.
No. 1 N. Black buoy missing.
No. 3 N. Black buoy missing.
No. 6 N. Red buoy in position but unlit and rusted.
No. 3 Black buoy in position but unlit.
No. 3 A. Green buoy is a new buoy laid in position Lat. 25° 55.5′ S., Long. 32° 51.2′ E. (approximate).

After No. 3 Buoy, steer to pass close East of No. 3 A Green buoy and then with approximate course 268° to No. 4 Red buoy which is the Pilot's boarding position.
Pilotage: Pilots are experienced and cooperative. Pilot ladder required on the leeside, combination with accommodation ladder not needed.
Tugs: Two tugs available. One is used for mooring/unmooring and the other for pilot service at Buoy No. 4.
Watchman: Local watchman is compulsory. Special attention is required prior to sailing as stowaways may try to board.
Fresh Water: Plentiful supply, rate about 25 t.p.h.
Provisions: Fresh fruit and vegetables and good provisions available from local market.
General: Extreme caution must be taken when navigating in the North Channel when in a loaded condition, between Buoys No. 4N – No. 6N. In this area the echo sounder shows approximately 30 cm. under keel clearance.

Dredger was working in the Inner Channel, close to Maputo Port.

Passage close to Baixo Rebeiro Beacon not recommended, when in a loaded condition due to suspect depths and at times a strong current.

Most buoys of the Inner Channel was discoloured and rusted.

SHIPMASTER'S REPORT: March 1994.
Navigational: Approaching via Canal do Norte and leaving: Buoy No. 1 N was 3 cables to the North of the position on the Chart B.A. 644. The other small buoy, South of Buoy No. 1 N, was in position. Buoy No. 2 N and Buoy No. 3 N positions were correct, but Buoy No. 4 N was not in the position and was missing. Buoy No. 5 N was 3 cables N.N.E. from the position on the chart. Lacerda Lighthouse and Buoy No. 1 N were giving good Racons. All these positions checked out by GPS Navigator and fixing positions from Lacerda and Riberio Lighthouses.

Pilot embarked and disembarked just in the positions of the symbol on the chart.

After Pilot was dropped, outward bound vessel headed for Buoy No. 5 N and turned hard to port, keeping this buoy very close on the starboard side, then steered North by fixing position from Riberio Lighthouse. Very special attention to the Barra Norte, between Buoys No. 3 N and No. 4 N, as mud patches were seen in the wake, due to insufficient keel clearance. With a heavy swell, there is a danger of touching the bottom.
Berthing: The tugs were old and weak. One was under repair and the other not reliable or efficient. Ship came in to Matola to berth, dropped starboard anchor and turned in a narrow space with tug and propeller. It was a dangerous manoeuvre.
Loading: There was only one chute. The other had been blown into the sea during high winds several months ago. Average daily loading rate was 5,763 tonnes. Quantity calculated with draft survey. Shore scale was not reliable. Bill of Lading weight was fixed by survey calculations. The Matola Pier is also a tanker berth, and Port Authority gives priority to tankers for city supplies.
Density and Tide: Density changes rapidly, so needs to be read at the time of draft check. The cargo quantity to load depends on the tide. We completed the loading with a cargo of 23,052 tonnes, but if we had stayed one day more, we could have loaded another 1,000 tonnes (30 cm. of draft). The problem was Polana Channel's depth. The depth in channel was not reliable due to lack of surveying. The Port Authority required 1.0 m. underwater clearance through this channel.

AUTHORITY: National Directorate of Ports and Railways (DNPCF), P.O.Box 276, Maputo, Mozambique. *Tel:* 28790, 25152. *Telex:* 6-438, 6-208. *Contact:* Mr. F. Ferreira Mendes, National Director.

Maputo Port (CFM-S), P.O.Box 276, Maputo. *Tel:* 27173. *Telex:* 6-208. *Contact:* Dr.F.I. Diniz, Executive Director. Issufu D'Amarcy, Port Director.
AGENT: King and Sons (Maputo) Lta., P.O.Box 2902, Maputo, Mozambique. Tel: (27) 258-1-430021. Telex: 6-276. Cables: Baronet, Maputo.

MOZAMBIQUE: 14.58 S. 40.45 E.

DOCUMENTS:
Customs Clearance from last port.
Port Clearance.
Health Certificate.
6 Crew Lists.
6 Passenger Lists in Transit.
7 Passenger Lists Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in Transit (main items of cargo only).
6 copies of Manifest of Mozambique Cargo.
PILOTAGE: One Pilot available, 24 hours pilot boat is black and grey. Ships take Pilot near Buoy No. 2 (Red Buoy) placed off Goa Island. At night ships should send Morse signals with Aldis lamp to the middle of Mozambique Island (location of port office). ETA should be given as soon as possible to pilot station off Mozambique Island and/or to ship's Agent.
ANCHORAGES: When waiting for Pilot, or due to their draft (more than 30 ft.) ships may drop anchor off red Buoy No. 2 (0.5 miles seawards). Depths between 60 ft. and 90 ft. Bottom with sand and some broken coral; current from North to South, sometimes up to 4 knots.
MAX. SIZE: Only ships with drafts less than 30 ft. can cross the bar and enter the Port.
HEALTH: Quarantine flag should be flown, even after calling at other ports in this country. Health Certificate given by Pilot.
RADIO: Radio Mozambique, call sign CRQ. Also available Maputo or Beira Radio Stations.
TUGS: Tugs are not necessary in this port.
BERTHING: No quay berths. Vessels work cargo at anchor.
STEVEDORES: All requirements on this purpose must be sent to the Agent.
MEDICAL: Medical assistance can be given at any time, even to vessels unable to cross the bar because of draft. Hospital with adequate facilities, and emergency services available.
FRESH WATER: Always available in any quantity. Supplied by barge of 40 tons capacity.
FUEL: Small quantities available.
CONSULS: No local representatives.
REPAIRS: Light repairs can be effected.
OPENING/CLOSING HATCHES: By stevedores.
CARGO GEAR: Vessels anchor in bay and load and discharge by lighter and barges.
HOLIDAYS: 1st January; 2nd March; 1st and 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December. Cargo handling can be arranged on these days.
POLICE/AMBULANCE/FIRE: Maritime Police, Customs and Agents will always be on board during stay.
TELEPHONES: No telephones, but walkie-talkies are available; arrange with Agent.
IDENTIFICATION CARDS: Required.
AUTHORITY: Capitania do Porto de Mocambique.

NACALA: 14.32 S. 40.40 E. (See Plan)

PORT LIMITS: The line joining Ilha Goman to Cabo Columulomo Light at the entrance of Bay of Fernao Veloso.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
2 Supplies Lists.
2 Stores Lists.
4 Cargo Manifests.
3 Cargo Plans.
5 Ports of Call Lists.
2 Animal Lists.
2 Vaccination Lists.
1 Health Certificate.
1 Clearance from Last Port.

These documents are to be completed, and presented, at the time of report to local authorities.

PILOTAGE: Compulsory. Request for Nacala Pilots with VHF radio on Channel 16, and then change to Channel 12 or 11.

Advance notice of ETA and draft are required at least 24 hours before arrival, through the Agent, and then 4 hours before entering Fernao Veloso Bay, via VHF.

The normal area of boarding is usually 2 miles × 237° from the Nacala Lighthouse, except during the period of strong winds from N.E. to S.E., when Pilot will embark inside the Bay if Port Authority give permission. Usual requirements for ladders are in force, and Pilot boarding requires the ladder to be about 3 ft. to 4 ft. above waterline.

ANCHORAGE: After entering the narrow passage between Cape Fernao Veloso and Cape Sacamulo, in the outer anchorage Bay of Muananculo and the inner Bay of Bengo, away from the middle fairway to the harbour. Maximum size of the vessel permissible in the outer anchorage area is about 130,000 d.w.t., and 18.0 m. draft.

RESTRICTIONS: No night time restrictions. Berthing/unberthing might be possible 24 hours a day on request.

HEALTH: International health regulations are to be observed. Any vessel, which is suspect, should inform the Harbour Office.

RADIO: Pilot radio station works with VHF on Channels 16 and 12. Port Tel. No. 526549 and Fax. No. 526390 (Area Code 06).

All early reports, ETAs, draft, etc., should be sent through the Agent or Fax/VHF to the port.

RADAR: No radar installation in the port.

TUGS: 1×960 h.p. and 1×2,640 h.p.

BERTHING:

Quay	*Length* (m.)	*Depth* (m.)
Container Terminal	335	14.0
	37	12.0
General Cargo Terminal	190	9.7
	160	9.0
	225	7.7
	90	7.0

CONTAINER HANDLING FACILITIES: 1,119 ground slots and connection possibilities for 26 reefer units. There is 1×22 ton and 1×5 ton crane for handling containers, and 1×25 ton rail-mounted transtainer for loading and unloading wagons and lorries.

For container handling, there is 1×42 ton front loader with flexible spreader (20 ft. – 40 ft.), and 2×32 ton front loaders.

For long distance transport, there are 3 tractors and 9 trailers with different dimensions.

Also stripping and stuffing operations available, in a 1,480 sq.m. container freight station.

GENERAL CARGO HANDLING FACILITIES: Nacala Port has a covered storage area of 21,000 sq.m., and an open area of about 25,000 sq.m.

For ships' operations there are 1×20 ton, 1×10 ton and 7×5 ton quay cranes.

Forklifts available, equipped also with bale clamps.

BULK HANDLING FACILITIES: Possibilities of handling bulk cargoes, such as grain, fertilisers, etc., at the North Quay.

STEVEDORES: Particulars of cargoes for discharge to be sent, with the ETA message, for arranging the gangs. Normally, the port is working in 3 shifts, from 0700 hrs. to 1500 hrs., from 1500 hrs. to 2300 hrs., and from 2300 hrs. to 0700 hrs. After 1100 hrs. on Saturdays, Sundays and public holidays, the work is charged as overtime, and must be ordered at least 48 hours in advance.

MEDICAL: Nacala Hospital has 3 doctors, and the Military Hospital has one doctor. Dentist available.

TANKERS: Petrochemicals handled at the East end of the General Cargo Terminal (North Quay), with minimum depth of water 9.7 m., and a quay length of 190 m.

The pipeline diameter is 8 in. No slop discharge facilities available.

Maximum receiving rate of about 100 t.p.h. – 120 t.p.h.

DENSITY: 1025 inside the bay.

FRESH WATER: Available in limited quantities by hose from the quay.

FUEL: Marine diesel available, delivered by lorries.

Some delays are to be expected in bunkering operations, due to lack of lorries.

SURVEYORS: Cargo inspectors available.

WATCHMEN: Should be ordered through the Agent, either from the port or other sources. An Immigration Gangway Watchman is always stationed onboard the vessel.

OPENING/CLOSING HATCHES: By crew members.

CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

AIRPORT: In Nacala, there is a military air base, used by civil aeroplanes upon request. No regular service to the Nampula. The nearest commercial airport, about 190 km. from the port, with 5 weekly domestic flights to Maputo.

TIME: GMT plus 2 hours.

HOLIDAYS: January 1st (New Year's Day); February 3rd (National Heroes Day); April 7th (Mozambican Womens Day); May 1st (Labour Day); June 25th (Independence Day); September 7th (Victory Day, commemorating the Lusaka Agreements and the end of the war for independence); September 16th (Nacala Day); September 25th (Armed Forces Day and Revolution Day); December 25th (Family Day).

Vessels are requested to "Dress ship" on these days.

POLICE/AMBULANCE/FIRE: The port has its own Police Force and Fire Brigade. The local hospital has an ambulance.

TELEPHONES: No connections for ships alongside. Public telephones for local or international calls are located in the Post Office building, in the city centre, close to the port.

BANKS: There are branch offices of the following Banks: Bank of Mozambique, Commercial Bank of Mozambique, Standard Totta Bank and People's Development Bank.

SHORE LEAVE: Crew and passengers need an Immigration Shore Leave Permit when leaving the port area.

GARBAGE DISPOSAL: Not available as yet.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: There are no seaman's clubs operating in Nacala. However, there is a local delegation of Club Ferroviario (which belongs to the Mocambique Ports and Railways organisation) and soccer or basketball matches can be arranged if requests are made to the Port Direction. In Nacala city center, which is very close to the port area, there are also religious services available for catholic, protestant and muslim religions as well as postage facilities.

GENERAL: The port authority hopes that the Shipmaster will give any reports about the lighthouses nearby.

SHIPMASTER'S REPORT: June 1988 (Updated 1992).

Port Limits: Vessel considered arrived when at entrance off Pta. Narenque. Free Pratique only granted after boarding by Immigration authorities at inner anchorage (off Baiai De Bengo) or at berth.

Documents: Last Port Clearance, 8 copies Crew Lists, Stores List, Crew Personal Property List, Manifest, Vaccination List and Agent's Forms (given on arrival). Shore passes issued at gate in exchange for Passport, shore leave up to 2200 hrs. only.

Pilotage: Available off Fernao Veloso, with prior arrangement. If B.A. Chart No. 649 on board, then advisable to move in without pilot, as delays are quite normal. Similarly, if outbound it is at Master's discretion (Small coasters only) to drop pilot off the berth or retain his services until past Pta. Narenque.

Pilots can be called on VHF Channels 12 and 16.

Advisable to approach at daybreak as lighthouses are unlit. For the same reason berthing/unberthing carried out in daylight hours only. A small pilot boat is available and Pilot is accompanied by a trainee.

Draft: Very deep water exists. Vessels with drafts up to 14.0 m. can berth at New S.W. Container Terminal. N.W. Quay has depths up to 9.5 m. and Berth No. 4 at N.E. end of N.W. Quay, used for product tankers, has depths of 12.0 m., depending on tide.

ETA: Messages to be radioed via Maputo Agents, who then inform Nacala branch by radio. At least 24 hours to be allowed for this information to reach Nacala.

Tug: One tug available, using ship's lines.

Medical: Minor medical complaints can be attended to by doctor arranged via agent.

Tankers: Discharge through 1×8 in. connection leading to storage tanks about 2 km. away. BP Mocambique in charge of liason, etc. We discharged 3,000 tons of jet fuel in 36 hours.

Fresh Water: Available ex-jetty, but as jetty infested by rats and cockroaches it is not advisable to use same for drinking.

Fuel: Not available.

Watchmen: As per Port Regulations, one watchman is compulsory.

Customs Allowance: No particular restrictions.

Ship's Certificates: Not required to be taken ashore.

Consuls: None.

Repairs: No facilities.

Time: GMT plus 2 hours throughout the year.

Provisions: Minimum amounts of fresh vegetables available locally at market. Currency must be changed officially through agent only and excess returned.

AUTHORITY: Empresa Nacional dos Portos, Direccao do Porto de Nacala, Caixa Postal No. 70, Nacala, Mozambique. *FAX:* (06) 526390.

Contact: Boaventura M.Cherinda, Port Director. Captain Erkki Lantta, Harbour Master.

PEMBA: 13.00 S. 40.28 E.

DOCUMENTS:

6 Crew Lists.
6 Lists of Passengers Disembarking.
6 Lists of Passengers in Transit.
1 Master's Declaration.
1 Stores and Provisions List.
1 Health Declaration.
5 Sets of Cargo Manifests.
2 Sets of non-negotiable Bills of Lading.
Clearance Documents from last port.

PILOTAGE: It is necessary to order by radio request to Agent 14 hours before arrival.

ANCHORAGES: Vessels may anchor South of the dock about 300 m. off. Other suitable anchorages will be indicated by the Pilot.

RESTRICTIONS: Vessels may enter with Pilot at any hour day or night.
MAX. SIZE: Draft up to 27 ft. 6 in. for berthing.
HEALTH: In case of contagious disease on board, the Port Health Authorities must be advised in advance.
RADIO: Send messages through Beira radio.
TUGS: None available
BERTHING: One berth, length 182 m., depth alongside 28 ft.
STEVEDORES: In ETA message to Agent, indicate number of gangs required and advise quantity and description of cargo for discharge.
MEDICAL: In case of urgency advise Agent by radio before arrival. Hospital facilities available. Vaccinations can be performed.
FRESH WATER: Available.
FUEL: Available.
GANGWAY/DECK WATCHMEN: Not necessary as there is a permanent guard on board.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCES: Bond is not sealed and no restrictions made.
REPATRIATION: Can be arranged.
AIRPORT: Situated 7 km. away. Flights to Beira and Maputo daily.
TIME: GMT plus 2 hours. No alterations during the year.
HOLIDAYS: No work performed from 1700 hrs. Christmas Eve until 0600 hrs. 26th December; no work performed from 1700 hrs. New Year's Eve until 0600 hrs. on 2nd January. Work may be arranged on the following holidays: 1st January, 3rd February, 7th April, 1st May, 25th June and 25th September.
POLICE/FIRE/AMBULANCE: Police, Tel: 2828; Hospital, Tel: 2211.
SHORE LEAVE: Allowed. Except for nationals of countries not maintaining diplomatic relations with Mozambique.
IDENTIFICATION CARDS: Required by police.
AUTHORITY: Capitao do Porto de Pemba.

NOTES

Please also advise Shipping Guides Ltd.

Union of Myanmar (Burma)

YANGON (Rangoon): 16.47 N. 96.15 E. (See Plan)

DOCUMENTS:
Ship's Register.
Crew and Passenger List.
Dangerous Cargo List, if any.
Customs Declaration for Crew and Ship.
Lat Port Clearance.
Safety Radio Certificate.
Safety Construction Certificate.
Valid Cargo Gear Certificate.
International Load Line Certificate.

PILOTAGE: Compulsory. The services of Pilots are required to bring ships alongside.

Vessels bound for the port of Yangon should make for the *Dagon* Light Vessel (China Bakir) Lat. 15° 59.9′ N., Long. 96° 14.5′ E. and then proceed towards *Lanthaya* Light Vessel. Vessels of 26 ft. draft and over should anchor off *Dagon* Light Vessel due to insufficiency of depths at the pilot station at low water, and await instructions from the pilot vessel for embarking Pilot.

Vessels below 26 ft. draft may proceed direct to the pilot vessel for embarkation of Pilot.

The pilot vessel or its relief is normally cruising or anchored at Lat. 16° 11.0′ N., Long. 96° 19.6′ E., approximately 10 miles North of *Dagon* Light Vessel and approximately 2 miles East of Lanthaya Light Float and 42 miles from the Port of Yangon.

ANCHORAGES: Specific areas of the port are reserved for special anchorages as follows:
(a) *Petroleum Anchorage* at Liffey Reach just below Syriam, accommodating 2 vessels.
(b) *Explosives Anchorage* below Admiralty Jetty near Chokey Point.
(c) *Small Craft Anchorage* at King's Bank, accommodating 20 inland vessels and schooners, etc.

ETA: 48 hours advance notice of ETA required, confirmation to be made 24 hours later or one working day ahead of the ship's ETA to enable necessary arrangements to be made regarding Pilots. Information required in the advance notice are:
(a) ETA, *(b)* Fresh Water Draft, *(c)* Speed, *(d)* Gross tonnage, *(e)* LOA and LBP.

RESTRICTIONS: Generally on a flood tide between the time of LW to HW at the pilot station, depending on ship's actual draft and speed in order to obtain sufficient depths at the Outer Bar.

Navigation day and night during river passage, but entry into Inner Harbour is normally restricted to daylight hours.

The Master Attendant regularly issues Draft Forecasts to all vessels Agents advising them of the drafts to be obtained within the next month.

MAX. SIZE: The port is accessible to vessel of 548 ft. LOA, and draft up to 28 ft. at Spring tides. The draft of the vessel entering the river is controlled by the depth available at the Outer Bar, carrying 12 ft. depth at datum. Entry into the harbour is controlled by the Inner Bar off Monkey Point, carrying from 10 ft. to 12 ft. depth at datum. These depths are subject to seasonal variations and are least during the dry season from November to May.

HEALTH:
(a) Maritime Declaration of Health signed by the Master and also by a Ship's Surgeon if one is available.
(b) Valid Derat or Derat Exemption Certificate.
(c) Valid Vaccination Certificates against cholera for crew and passengers (if a certified list of date of expiry of these Certificates is available, the issue of Pratique will be expedited).
(d) Pratique is issued by the Medical Officer on duty, after examination of the crew and passengers of the ship. The Pratique is automatic if the vessel arrives after touching other ports in the country. NO RADIO PRATIQUE IS ISSUED.
(e) Quarantine Clearance on sailing is essential.

RADIO: International single operator watch period for Zone "C". Assigned frequencies are 425, 454, 468, 512, 500 kHz and 2.8, 4.26 MHz, call sign XYCZ.

In cases of inability to contact the pilot vessel by wireless, the Master should send cable to the Harbour Master "Portrust" via Yangon Radio Station, call sign XYR.

Within harbour limits contact can be made with Port Tower by light visual signalling. VHF contact can also be made with Port Tower, call sign XYU, Channel 16 (calling frequency). The working frequencies are Channels 14, 12 and 6 (Hague Convention).

TUGS: Generally not used for mooring and berthing purposes, but available in emergency.

BERTHING: There are 11 wharf berths and 2 pontoon berths for sea-going vessels:

Rice and Farm Produce Loading Berths:
(a) *Hteedan Coal Berth,* length 480 ft., accommodating a vessel of 485 ft. LWOST varies from 23 ft. to 27 ft. approx.
(b) *Hteedan No. 1,* length 456 ft. accommodating a vessel of 460 ft. LWOST varies from 26 ft. to 30 ft. approx.
(c) *Ahlone Wharf,* length 440 ft. accommodating a vessel of 440 ft. LWOST varies from 26 ft. to 28 ft. approx.

General Cargo Berths:
Sule Pagoda Wharf, Berths No. 1, 2, 3, 4, 5, 6 and 7 accommodating five vessels ranging from 450 ft. to 520 ft. LWOST varies from 24 ft. to 30 ft. approx.

Container Berths:
Bo Aung Gyaw Street Wharf: Berth Nos. 1 and 2, accommodating two vessels of 450 ft. each. LWOST varies from 26 ft. to 29 ft. approximate. 2×40 ton container cranes, 54 reefer points and storage for over 1,800 TEU.

Passenger Berth:
The Port Health Station. A Pontoon Jetty equipped with a large floating pontoon 500 ft. length and accommodating vessels of 520 ft. to 595 ft. LWOST varies from 25 ft. to 28 ft.

Moorings: The port is equipped with 13 swinging moorings and 2 sets of fixed moorings in the Inner Harbour; 3 swinging mooring buoys at Hastings, and 2 fixed moorings for oil tankers. In addition, a number of mooring buoys are provided for small sized seagoing vessels.

Mooring and Berthing Procedure:
While in port, ships lie alongside wharves or moorings. The procedure is as follows:
(a) *Single Buoy Mooring* – Vessels moored with ship's own cable which is led through hawse pipe and shackled on to buoy cable. The shackle is provided by the Myanma Port Authority.
(b) *Fixed Mooring* – Same procedure as above but the vessel is moored to 4 buoys.
(c) *Berthing* – Normal ship's ropes and wires are used for berthing at wharves. In addition, wharves' mooring chains are also provided for securing to ship's bollards.

CARGO HANDLING EQUIPMENT: The heaviest lifting capacity of the port is a 36 ton crane at the Bo Aung Gyaw Street Wharf.

Heavy packages may be landed or shipped by a vessel's own tackle at the wharves, subject to prior notice being given to the Deputy General Manager (Traffic).

STEVEDORES: In two shifts of 0800 hrs. to 1600 hrs., and 2000 hrs. to 0400 hrs. Overtime work is arranged on special request from Agents. Stevedoring undertaken by Port Authority. To enable ship's Agents to order labour gangs in time, it is important to obtain in advance the accurate ETA of vessels. Latest time to order gangs is 1100 hrs. for booking for that night and the next day.

FRESH WATER: Available either directly alongside the wharves or in midstream, delivered by water boats.

FUEL: Fuel, diesel and gas oil (HSD) from Myanma Petroleum Products Enterprise. Fuel oil provided by barges of 150 tons to 180 tons capacity alongside vessel during daylight hours. Coal supplied by Government No. 3 Mining Enterprise.

FIRE PRECAUTIONS: A special land-based Port Fire Brigade is maintained by the Port Authority, supplemented by fire-fighting vessels "Nat-Min" and "Hyine Gyi".

CONSULS: The following countries are represented by consulates or embassies at Yangon:
Afghanistan
Algeria
Australia
Austria
Bangladesh
Belgium
Bulgaria
Cambodia
China
Cuba
Czech Republic
Denmark
Egypt
Finland
France
Germany
Hungary
India
Indonesia
Israel
Japan
Republic of Korea
Laos
Malaysia
Mongolia
Nepal
Netherlands
Nigeria
Norway
Pakistan
Philippines
Poland
Russia
Singapore
Sri Lanka
Thailand
U.K.
U.S.A.
Vietnam
Yugoslavia

REPAIRS: Deep-sea repairs are undertaken by MPA's engineers. The "Setsan Dry Dock", a tidal dock owned by the MPA, can take vessels up to 1,000 tons and 250 ft. in length.

The Myanma Shipyards can take vessels up to 2,000 tons and 300 ft. in length.

GANGWAY/DECK WATCHMEN: Compulsory. Arranged by the Traffic Department of the Myanma Port Authority.

The working hours of a watchman are the same as the wharf working hours.

OPENING/CLOSING HATCHES: Undertaken by port labour for hatch boards and pontoon type covers only.

POLICE/AMBULANCE/FIRE: Port Police 74520; Ambulance 71111; Port Fire Brigade 78653.

HOLIDAYS: Ships may work on holidays on application to the Deputy General Manager (Traffic) and on payment of holiday fees.

GARBAGE DISPOSAL: For garbage disposal, suitable arrangements may be made with the Shipping Agency Department of Myanma Port Authority when called for. There is no fixed rate and transportation and labour charges are at cost and service fees will be added.

WASTE OIL DISPOSAL: Not available at present.

SEAMAN'S CLUBS: None.

CURRENCY: Myanma Kyats. U.S.$ 1.00 = 6.10 Kyats (27.5.94).

SHIPMASTER'S REPORT: July 1978 (Updated 1994).

Approaches: Approach was from the Malacca Strait, in generally overcast and rainy weather. The last reliable fix obtained prior to picking up the Dagon Light Ship at 1330 hrs. on 6/7/78 was at 0530 hrs. on 5/7/78. From 1330 hrs. on 5th, 2° were allowed for Easterly set, apart from a 2-hour period on the 6th, when only the Compass Error was allowed. This would seem to indicate that an Easterly set was experienced, but it is possible that what actually occurred was that the vessel was set to the Eastward by the tide, from about 0900 hrs. on the 6th until the Dagon Light Ship was picked up. We sighted the Dagon at about the time and on about the bearing we expected.

The tidal information provided on B.A. Chart 823, although depending on observations obtained during the dry season, was most helpful.

On clearing the Rangoon River, shortly after HW Elephant Point, there was a slight South-Westerly tidal set, as one would expect. The departure Pilot provided the following information, which we were not able to check:

B.A. Chart 823: "Thuriya" Light Buoy is in position Lat. 15° 19′ N., Long. 95° 01′ E., and not as charted. (Charted position: Lat. 15° 20′ N., Long. 95° 10.5′ E.).

The two dangerous wrecks about 38 and 40 miles South of Thante Light are no longer dangerous.

B.A. Chart 833: The dangerous wreck between Upper Western and Upper Middle Buoys is no longer dangerous. We passed between the buoys without any difficulty, drawing 19 ft. 03 in., fresh water. The following is from our own observations: Upper Spit Buoy is now in approximate position 290°(T) – 7 cables from its charted position. All buoys, from and including Upper Spit Buoy to the berth, with the sole exception of "C.M.B." Buoy, were unlit.

Naturally, vessels do not transit this portion of the river during the hours of darkness. With the exception of Upper Spit Buoy all buoys, light floats and the light ship appeared to be in their charted positions. When crossing the bars and during the river passage very close attention must be paid to the steering. With a top-class helmsman who is really concentrating, little difficulty would be experienced. In order to carry the tide up to Rangoon, it is important that a vessel should arrive at the pilot station not later than HW Elephant Point; we were in fact 10 minutes late, and would not have continued except that we were fortunate enough to have the most senior Pilot on board.

It was noticed on departure that an inbound vessel giving an ETA at the pilot station 30 minutes after HW Elephant Point, was directed to anchor.

Anchorages: Vessels may anchor in the vicinity of the pilot station shown on B.A. Chart 823 or in the petroleum or explosives anchorages shown on B.A. Chart 833.

Berthing: Vessel was originally placed at a buoy berth, the anchor cable down the hawsepipe and shackled on to the buoy.

As we have a short length of cable inboard of each anchor with a joining shackle, this operation presented little difficulty but took considerable time.

When we were placed at the buoy, it was dark by the time the operation was completed, but if we had gone straight alongside this could have been done under twilight conditions. Neither the Pilot nor I could understand why the vessel was not berthed on arrival, since our berth was then vacant. The explanation I received was that the shore lighting was poor and that, as a safety precaution, ships are only berthed in full daylight.

At 0625 hrs. the next morning, we commenced unshackling from the buoy and the vessel was secured alongside No. 1 Berth, Sule Pagoda Wharf at 0805 hrs. We berthed starboard side to, stemming the ebb tide and river outflow. The buoy anchor remained hung off until after berthing. When berthing, the offshore anchor is placed in a convenient position to assist in getting the vessel off again. When alongside and the cable slack, we had 4.5 shackles out on the port anchor. Moorings were as follows: Forward – 3 headlines, 1 ship's wire and a shore mooring chain, all leading ahead. No spring. The shore chain is brought on board and turned up on the ship's bitts. Aft – 1 breastrope, 2 sternlines and ship's wire leading aft. No spring.

Departure: The vessel leaves the berth on the last of the ebb and drops down the harbour stern first to a position North of the transit beacons on the South bank, where she anchors until there is sufficient water to cross the Inner Bar and proceed downstream.

Pilotage: Is compulsory. River Pilots take the vessel from the pilot station to the port or buoy and Docking Pilots do the berthing and unberthing, including dropping down to the temporary anchorage. The Docking Pilot remains on board while at anchor. River Pilots, when boarding and leaving, require pilot ladder, manropes and a boatrope. Ship comes under the stern, never ahead, of the cutter, with ladder rigged on the lee side. Docking Pilots board and leave by the gangway.

Communications: Rangoon Radio, call sign XYR, keeps regular watch schedules on 6 HF frequencies. However from departure Lae on 24th June to 2nd July, nothing was heard of this station.

Two-way contact was established on 3rd July, but after the station had instructed the Radio Officer to change frequency, it ceased working.

It was not until 0500 hrs. GMT on 4th July that traffic could be cleared. Later that day it became possible to work XYR on MF. All calls were then answered promptly and an efficient service provided.

An advice of bad propogation conditions from Portishead Radio was in effect during the period covered by the above remarks. This may have had some bearing on the difficulties experienced. The vessel arrived at the pilot station at 0830 hrs. GMT, 6th July, 1978.

VHF: The Pilot cutter, the Harbour Master's Office and the Agent's Office are fitted with VHF Channel 16. This is efficiently operated.

Telephone: I spent many hours in the Agent's office, attempting to contact London. We were unsuccessful. The hours, local time, during which one may attempt to call London, are: via Hong Kong – 0900 to 1430 hrs.; via India – 1630 to 1800 hrs. These hours are nominated by the Port and Telecommunication Corporation.

Telex: There are 2 telex machines in the Agent's office, and the Operator's normal hours of duty are 0930 to 1630 hrs. After office hours, the telex machines are open for auto-receiving of inward telexes, and special arrangements can be made for outward telexes on request.

Mail: Both to and from Europe and Australiasia, appeared to be reliable.

Agents: S.A.D. is a government corporation and handles every vessel that uses the port. All concerned are most charming, and very polite. All persons I came into contact with from S.A.D. spoke excellent English.

Documents: Required on arrival: 20 Crew Lists, 6 Crew Personal Effects Lists, 6 Ship's Declarations of Foreign Currency, 6 Crew Declarations of Foreign Currency, 1 International Health Declaration, 1 List of dates of Cholera Vaccinations.

Notes:

1. The Customs do an efficient rummage on arrival, and again on sailing. Their main concerns seem to be cigarettes, foreign currency, drugs and pornography.
2. It is most important that all paper money of any foreign country held either by the ship or by individuals is accurately declared and then placed in one or other of the ship's safes. The safes are then sealed and can only be opened with the approval of the resident Customs Officer. Time and trouble on arrival can be saved by collecting all foreign currency in advance. Some small amounts of foreign currency were found by rummagers, but a lenient attitude was taken and these sums were allowed to be placed under seal. The Penalties for attempting to evade the regulations with regard to foreign currency are severe.
3. All on board are required to be photographed, so that local shore passes may be issued. The passes are valid for 12 months from date of issue and cover subsequent calls at Rangoon or any other Burmese port. No shore leave is permitted until shore passes in quadruplicate have been processed. This happens quite swiftly and takes about 12 hours.
4. With the exception of the Health Declaration, there do not appear to be any pre-printed Burmese Forms, and the ship will have to make up her own.

Tugs: There are tugs in the port, but they are not powerful and are only used in an emergency.

Departure: At least 6 up-to-date Crew Lists are required. All shore passes must be collected prior to departure, they are stamped by Immigration and returned to the holders.

All 3 government departments involved with the vessel (Customs, Immigration and Quarantine) issue a clearance on departure. In addition, the Master is given a letter from the Burma Ports Corporation for the River Pilot, stating that all sailing documents have been produced and giving permission for the vessel to proceed to sea.

Register and supporting Certificates: (Load Line, Safety Equipment, etc.) are taken ashore by Agents on arrival, against a receipt, and returned immediately prior to departure.

Officials: Supervisors and Tally Clerks wear uniform with badges of rank. They must be provided with an office on board, and it is compulsory to provide these gentlemen with meals. Two Customs Officers live on board at all times and accompany vessel to anchorage or buoy berth. These Officers must be fed in the dining saloon and provided with accommodation. On arrival the Customs seal the bond and, if requested to do so, will also seal the dry stores, which is a wise precaution.

Beer is not put under seal. The Customs Officer will make an issue of bonded items daily if requested. The only thing to which restrictions are applied is cigarettes, where the daily issue is limited to 40 per man. Customs also exercise a tight control over all local currency drawn from the Agents and all must be accounted for prior to departure, even cash spent on Provisions.

Cargo Work: Two shifts of 8 hours are normally worked, that is, 0800 – 1600 hrs. and 2000 – 0400 hrs. Cargo can be worked at any time. Overtime hours being 1600 – 2000 hrs. and 0400 – 0800 hrs. Ship's gear was used for discharge. Two gangs were employed at each hatch, and rates of discharge were: No. 2 – 10.35 t.p.h. No. 3 – 14.46 t.p.h. The rate of discharge at No. 2 was remarkably good when one takes into consideration that No. 2 after crane, due to a winch breakdown, was not available after the first 1.5 days. Two gangs were employed throughout at this hatch. After the crane failure the after gang were employed in shifting cargo to where the forward crane could plumb it.

Weather permitting, discharge continued 24 hours a day. A total of 37 hours 40 minutes working time was lost due to rain. When one takes into consideration the many delays and the fact that the Watersiders were discharging a random stow, the rate of discharge was most creditable. Crane drivers and Watersiders were very satisfactory; Supervisors were helpful. Pilferage was nil, damage to cargo was slight and there was no damage to the ship.

Pratique: Granted on arrival. There are no facilities for Radio Pratique.

Provisions: Obtained through the Shipchandler. But very expensive. We purchased salad and bread at the local market at reasonable prices and of reasonable quality. This was done by the Purser/Catering Officer, going there with the Agent and paying cash. This is common practice and was condoned by our Customs Officer.

As we had no contact with the Official Shipchandler, we do not know what his prices were or what his product range is. Any future vessel calling at Rangoon should arrive with as much in the storerooms as possible.

Fresh Water: Obtainable either from water boats or the wharf. Give 2 days notice. It is expensive, 10 Kyats (about 79 pence) a ton. As a precaution, we treated what we took with chloride of lime.

Repairs: We employed some electricians from the machine shop of the Central Electric Service to assist in our investigations of the winch fault at No. 2 hatch. An Electrical Engineer and 3 Electricians were provided and appeared competent. Unfortunately, they did not trace the fault.

Currency: The unit of currency is the Kyat, worth approximately 12.69 to the Pound Sterling.

Weather: Hot and humid, with much rain, it being the season of the S.W. monsoon. Winds in the port were generally light. At the time of our stay, the river was just beginning to rise as a result of the monsoonal rains in the high country, but had not reached full flood. There was, however, a continuous outflow past the port at all states of the tide.

Health: Up to date Cholera Vaccination Certificates are required by the local Authorities and anti-malaria precautions should be taken. Mosquitoes and many other insects are numerous, especially in the wet weather.

General: Five watchmen were provided. When at anchor or at buoy berth, the ship must feed them. When alongside, they eat ashore. The security at the gate is very strict indeed and all local people leaving the port area are searched. No ship's gear or personal effects went missing. There is no garbage collection at Rangoon, so the ship must make her own arrangements for storing waste. Burmese people are unfailingly polite and courteous and naturally expect the same treatment in return. The vessel can work cargo on any day.

Repatriation: Possible but not recommended.

SHIPMASTER'S REPORT: August 1982.

Navigation: Dagon Light Vessel was showing Gp. Fl. (3) 20 sec. on the vessel's arrival, but was unlit on departure 10 days later. The Racon was not operating. The light vessel was in its charted position.

The pilot vessel "Thamada", call sign XYCZ, anchors around position Lat. 16° 13′ N., Long. 96° 18′ E. In August 1982 the pilot vessel's VHF was not operating, but they could be contacted by WT on 500 kHz and also by Aldis lamp. When picking up a Pilot the pilot vessel will be under way; boat rope, manropes and heaving line are required; the Pilot comes off by motor launch from the pilot vessel. If the anchorage is crowded extreme caution is advised while manoeuvring, due to very strong tides, estimated at 6 knots to 7 knots at Springs. Many collisions have taken place during embarkation of Pilots.

Lanthaya Light Float was observed to be 1.8′ N.N.E. of its charted position. It is small and inconspicuous. Northwards of Lanthaya, buoys and light floats are moved as conditions in the channel require, and their charted positions should not be relied upon.

There are no navigational aids available which are useful in approaching the pilot station; however, acceptable results were obtained by taking RDF bearings of the Burma Broadcasting Service broadcast station operating on 955 kHz with antennae in position Lat. 16° 52′ N., Long. 96° 10′ E. (position from World Radio & TV Handbook 1982).

There is a Port Radio station at Rangoon Port, operating on VHF Channel 16, call sign "Port Tower".

Tugs: No tugs are available for berthing, however Pilots are very experienced and all were found to be excellent shiphandlers.

Formalities: Immigration require 4 photographs of each crew member and will issue shore passes; Agents can arrange a photographer to attend on board on arrival.

Customs Regulations are extremely strict, particularly with regard to foreign currency. All foreign currency must be declared and will be put under seal during the vessel's port stay. It has been reported that violations of currency regulations have resulted in severe prison sentences recently. Firearms and narcotics will also be placed under Customs seal. Shore-going crew must undergo Customs inspection at the Main Gate.

Derat is available.

Cargo: The vessel loaded a full cargo of 2,982 hoppus tons of Burmese round logs of mixed varieties; logs were very heavy, averaging out at 1.23 tonnes/cu.m. Cargo was brought alongside by trucks and loaded ex-wharf by ship's gear. Stevedores were inexperienced; stowage was poor and loading rate slow. Cargo was also found to be rat infested. Shippers originaly requested 600 (repeat six hundred) original B/L's, and when this request was dismissed they eventually agreed to 60, issued through Agents, covering 41 parcels of cargo.

Shippers also presented a proforma copy of "Burma Ports Corporation B/L Form" which they requested be issued instead of Owners' forms, stating that this was a standard Burmese B/L form. After studying the clauses contained in this B/L form it was rejected as being poorly written, badly printed, containing many misprints and having no provision for the inclusion of the "Clause Paramount". Masters are therefore advised to exercise caution in accepting a B/L for signature in this form, in order to safeguard Owners' interests.

General: There is a Philippine Embassy in Rangoon, where Filippino crew may renew or be issued with Passports conveniently. Call Embassy for appointment. Fresh water is available alongside or by barge. Bunkers are not available. Minor repairs can be undertaken, but are very expensive. Good medical facilities are available. Fresh provisions may be obtained at the local markets at very reasonable prices. The British Embassy is next door to the main post office. The Strand Hotel, near the British Embassy, provides good meals and adequate facilities at reasonable prices.

SHIPMASTER'S REPORT: August 1992 (Updated 1994).
Documents/Formalities:

Procedure for clearing the ship in the Port of Yangon (Rangoon).

(A) Official parties which come aboard for arrival formalities:

Quarantine (Health) Party	(2 – 4 persons)
Immigration Party	(4 – 6 persons)
Special Intelligence Party	(4 – 6 persons)
Naval Intelligence Party	(3 – 5 persons)
River Police Party	(3 – 5 persons)
Customs Boarding Officer	(1 person)
Customs Inspection Party	(2 – 5 persons)

Customs Search Party (Officers 4 – 5, ratings 10 – 15, but, as a rule, it is not less than 10 – 15 persons total).

Agent (Manager and 3 – 5 Assistants, including Superintendent, Operations Officer, etc.).

(B) Time and trouble on arrival can be saved by preparation in advance of all documents and forms which are required, also by collecting all foreign currency, ship's walkie-talkie, bonded stores (if any) in order that they may all be sealed.

With the exception of the Health Declaration, there does not appear to be any pre-printed Burmese forms, and the ship will have to make up her own.

Following papers should be duly prepared prior to the ship's arrival in the port:

1. For Quarantine Officers:

Maritime Declaration of Health	1 copy
Crew List	3 copies

Free Pratique granted on arrival. No Radio Pratique is issued. Quarantine clearance on sailing is essential.

2. For Immigration:

Declaration for Arrival/Departure Form	2 copies
Crew List	3 copies

All crew members photographs are required, in order that local Shore Passes may be issued. The Agent usually arranges this by photocopying the Seamen's Passports.

3. For Special Intelligence:

Certified Arrival Form	2 copies
Crew List	3 copies
Arms, Ammunition and Explosives List	2 copies

4. For Naval Intelligence:

Certificate of Arrival Form	2 copies
Crew List	2 copies
Arms, Ammunition and Explosives List	2 copies

5. For River Police:

River Police Department's Form	2 copies
Crew List	2 copies
Arms, Ammunition and Explosives List	2 copies

6. For Customs Boarding Officer:

History of the Vessel Form	1 copy
Crew List	1 copy
Declaration of Walkie-Talkie List	1 copy
Arms, Ammunition and Explosives List	1 copy
Bonded Stores List	1 copy
Private Property List	1 copy
Foreign Currency List	1 copy

Boarding Officer should be provided with these papers by Agent, but it is advisable to keep copies for Boarding Office separately, to avoid unwanted request of Boarding Officer during arrival formalities procedure, as sometimes the Agent is last to come on board (due to regulations).

Customs Boarding Officer lives on board at all times, and accompanies vessel to anchorage or buoy berth. This Officer must be fed in the messroom and provided with accommodation.

On arrival, the Customs Boarding Officer seals the bond, currency, ship's walkie-talkie, explosives (ship's pyrotechnics), and if required to do so, will also seal the dry stores, which is a wise precaution. Beer is not put under seal.

The Customs Boarding Officer will make an issue of bonded items daily, if requested.

7. For Customs Inspection:

Master's confirmation regarding ship's cargo, passengers and mail on board.

8. For Customs Search Party:

History of Vessel (in/out) Form	2 copies
Crew List	5 copies
Declaration of Walkie-Talkie List	2 copies
Arms, Ammunition and Explosives List	2 copies

The Customs Search Party do an efficient rummage on arrival, and again on sailing. Their main concerns seem to be drugs, cigarettes, foreign currency and pornography.

9. For Agent (of M.P.A. – Shipping Agency Department):

Myanma Port Authority Form of Import Manifest of Stores – Yangon	3 copies
Bonded Stores List	3 copies
Provision Stores List	3 copies
Deck Stores List	3 copies
Engine Stores List	3 copies
Arms, Ammunition and Explosives List	1 copy
Crew List	3 copies
Private Property List	3 copies
Foreign Currency List	3 copies
Ship's Particulars	1 copy

Ship's documents, which are given to the Agent for arrangements of clearance of the ship in and out:

Ship's Register.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Telegraphy Certificate.
Load Line Certificate.
Port Clearance from Last Port of Call.

These documents are taken ashore by Agent on arrival, against a receipt, and returned immediately prior to departure.

3 Government Departments are involved with the vessel (Customs, Immigration and Quarantine), and issue Clearance on departure.

General:

1. Entertainment is extremely desirable. This is part and parcel of shipping life in Yangon.
2. Burmese people are unfailingly polite and courteous, and naturally expect the same treatment in return.
3. There are tugs in the port, but they were not used for berthing whilst our vessel in port. Pilots are very experienced, and all were found to be excellent ship handlers.
4. There is no garbage collection at Yangon, so the ship must make her own arrangements for storing waste.
5. Mosquitoes and many other insects are numerous, especially in the wet weather.
6. Navigation: Dagon Light Vessel was showing Gr. Fl. (3) 20 sec., but is sometimes not lit. The Racon is not operating.
7. Pilot vessel "Thamada" (call sign "XYCZ") anchors around position Lat. 16° 13′ N., Long. 96° 20′ E. It is equipped with VHF, and keeps watch permanently on Channel 16. To call on VHF, say "Pilot Vessel".

   When picking-up a pilot, the pilot vessel will be underway, when the sea condition is rough.

   Boat rope, manropes and heaving line are required. The pilot comes off by motor launch from pilot vessel.

   If the anchorage is crowded, extreme caution is advised while manoeuvring, due to very strong tides, estimated at 6 knots to 7 knots at Springs.
8. Yangon Port Information, which is shown in "Guide to Port Entry", is correct.

SHIPMASTER'S REPORT: September 1992 (Updated 1994).

1. Time: GMT plus 6.5 hours. No alterations during the year.
2. Communications: Communication between vessel and harbour and Harbour Authority was carried out by Telex No. 21208, and Agency Department of Myanma Port Authority by Telex No. 21208 and 21447 via Inmarsat. Yangon Radio (call sign "XYR") does not keep watch schedules on HF (high frequency). All attempts to establish contact had negative results. The day before arrival at pilot station, contact was established with Yangon Radio (XYR) and pilot vessel (XYCZ) on MF. Yangon Radio keeps watch on MF according to schedule of Admiralty List of Radio Signals. The pilot vessel keeps a poor watch on 500 kHz. Pilot vessel keeps watch on VHF Channel 16 for calling another vessel, if it has any information from Harbour Master only, and does not answer other vessel's calls. Within harbour limits, contact can be made with Port Tower, call sign "XYU" on VHF Channel 16 (calling frequency).
3. ETA: Information required in advance of arrival: Exact ETA in local time, fresh water draft, speed, g.r.t., LOA, LBP, d.w.t., how many anchors on board, what is condition of radar. 48 hours advance notice of ETA required, confirmation to be made 24 hours later, or one working day ahead of ship's ETA.
4. Anchorages: At 0715 hrs., 31st August, vessel was anchored 3.5 miles S.E. of Lanthaya Light Float. At 1208 hrs., 15th September, vessel was unberthed during ebb flood, and anchored 1 mile from berth, and awaited tide up to Yangon, then proceeded via Inner Bar (near Monkey Point), and anchored at 1710 hrs. same day in New Explosives Anchorage to await daytime. Distance from coal berth to N.E. Anchorage – 14 miles. Distance from N.E. Anchorage to pilot station – 33 miles. Outer Bar located in the Western Channel (near Elephant Point).
5. Pilotage: Compulsory. River Pilots (3 men) took the vessel from pilot vessel (pilot station) to the Buoy No. 3, and Docking Pilots do the berthing and unberthing.

   River Pilots, when boarding and leaving, require pilot ladder, manropes and boatrope. Ladder rigged on the lee side.

   Docking Pilots board and leave by the gangway. Pilots are experienced.
6. Berthing: At 1045 hrs. on 2nd September, vessel was placed at Mooring Buoy No. 3 to obtain Pratique.

   Anchor cable down the hawsepipe and shackled on the buoy.

   At 1140 hrs. on 4th September, the vessel was secured alongside Sule Pagoda Wharf – Berth No. 4.

   We berthed starboard side to, stemming the ebb tide and river outflow. Tugs are not used during berthing.

   Sule Pagoda Wharf – Berth No. 4, is a berth for general cargo, and storage of cargo situated about 5 miles from ship.

   At 1820 hrs. on 9th September, vessel was shifted to Hteedan Coal Berth.
7. Formalities: Required on arrival.

   26 Crew Lists.
   5 Crew Personal Effects Lists.
   5 Ship's and Crew Declarations of Foreign Currency.
   3 Deck Stores Lists.
   3 Engine Stores Lists.
   5 Bonded Stores Lists.
   5 Stewards Provisions Lists.
   5 Arms and Ammunition Lists.
   10 Walkie-Talkie Lists.
   5 History of Vessel Lists.
   3 River Police Department Declarations.
   3 Naval Intelligence Unit Declarations.
   3 Special Intelligence Declarations.
   1 International Health Declaration.
   3 Ship's Particulars.
   3 Mail Lists.
   Ship's Register.
   Safety Construction Certificate.
   Safety Equipment Certificate.
   Safety Radiotelegraphy Certificate.
   Load Line Certificate.
   Register of Ship's Cargo Gear and Lifting Appliances.
   Last Port Clearance.
   List of Dates of Cholera Vaccinations.

   It is most important that all paper money of any foreign currency is accurately declared, and then placed in Master's safe under seal during the vessel's port stay.

   Immigration require 3 photographs of each crew member and will issue Shore Passes.

   Customs seal the bond, firearms (rockets), foreign currency and walkie-talkies.

   One cabin required for Customs Boarding Officer, who lives and eats on board before sailing.

   On arrival at Mooring Buoy No. 3, to obtain Pratique, the following Port Authority personnel came on board:

   1. Quarantine Officals – 4 men.
   2. Police Officers Special Intelligence, Naval Intelligence – 5 men.
   3. Immigration Officials – 9 men.
   4. Customs Inspection – 4 men.
   5. Customs Search Gang – 25 men.

   Time and trouble on arrival can be saved by collecting all foreign currency in advance, readiness of all papers, cigarettes, spirits, beer, soft drinks and food are required for entertainment (very important).

   Required on departure:
   20 copies Crew List.
   2 copies History of the Vessel.

   One cabin required for 2 policemen, who live and eat on board when the vessel awaits high tide at anchorage.
8. Pratique: There are no facilities for Radio Pratique. Pratique granted on arrival at the harbour port limits.
9. Agency Department of Myanma Port Authority. Telex: 21208 and 21447. Cables: "Transagent Yangon". VHF: Channel 16 through Port Tower. Agency is Government company. Mr. Kyi Tha, the Agent, is experienced.
10. Cargo: The vessel loaded a full cargo of 5,901.55 tonnes of copper concentrate from 1450 hrs. on 4th September to 0100 hrs. on 15th September. Cargo was brought alongside by 8 – 11 trucks and loaded ex-wharf by ship's cranes. Each truck has 3 buckets with total capacity of 4.5 tonnes.

    Loading rate is very slow as a lot of time was lost due to the following:

    1. Rain – 49.3 hours lost, on average 4.7 hours per loading day.
    2. No stevedores – 38.25 hours lost, on average 3.6 hours per loading day.
    3. Very old technology for loading – on average loading rate was 565.8 tonnes per loading day.

    All attempts to improve loading process (to use payloaders, to save time during changes of gangs, to use special hook for loading 2 buckets at one time, to use buckets of larger capacity) failed, as local regulations (Customs, Immigration, Port Authority, etc.) are extremely strict, and each problem/question requires a lot of time and efforts for agreement between different departments, and very difficult to reach positive results. Local Government is military, and all Departments are under military control.
11. General: Watchmen are compulsory. 4 or 5 watchmen were provided, when the vessel was alongside the wharf, they eat ashore.

    There is no garbage collection at Yangon.

    Fresh water is available by the barge, but expensive, 56 Kyats (U.S.$ 9.51) per ton, and from Wharf 12 Kyats per ton. Minimum quantity of fresh water supplied is 50 tons.

    Medical facilities are available, but are very expensive.

    Fresh provisions may be obtained at the local markets at reasonable prices.

AUTHORITY: Myanma Port Authority, P.O.Box No. 1, Yangon, Union of Myanmar. *Tel:* 83122. *Telex:* BM 21208, BM 21449. *Cables:* Portrust Yangon. *Contact:* The Managing Director.

NOTES

Please also advise Shipping Guides Ltd.

Namibia

LUDERITZ: 26.39 S. 15.09 E. (See Plan)

PORT LIMITS: East of the line from Angra Pt. to a point 1,097 m. due North thereof, thence by a line from the latter point to the South shore extremity of N.E. Point.

DOCUMENTS:
1 copy Arrival Form T958 for Agent.
2 copies Crew List.
2 copies Passenger List.
Certificate of Ship's Registry.
Ship's Articles.
Manifests.
Charter Party.
Bills of Lading.
Official Log Book.
List of Dutiable Stores.
Ship's Radio Station Licence.
Safety Certificate.

PILOTAGE: ETA at least 72 hours in advance if possible; unless in an emergency. Cables addressed to Port Captain Luderitz.

All pilotage inside port limits is compulsory.

Pilot Boarding Positions: 1 mile North of Angra Point. Contact Pilot on VHF Channels 16 and 12.

Pilot Vessels: "Fisant": Black hull, white wheelhouse and yellow roof. "Pelican": Grey overall.

Specific Requirements:
2 manropes at ladder.
Lifebuoy at ladder.
Ship's officer in attendance when Pilot embarking or disembarking. At night, the ladder is to be lit without blinding Pilot. No broken or slippery ladder rungs.

ANCHORAGES: Outside port limits: Shearwater Bay: Between Diaz Pt. and Angra Pt. Good holding ground. Depth up to 20 m.

Inside port limits: Luderitz Harbour: Between Angra Pt. and Shark Island. Good holding ground. Depth up to 16 m.

Robert Harbour: Between Shark and Penguin Islands. Good holding ground. Depth up to 9 m. Confined anchorage.

RESTRICTIONS: Docking and undocking may take place between 0600 hrs. and 2200 hrs. or at any other time in an emergency.

MAX. SIZE: Shearwater Bay: No restrictions. Luderitz Harbour: No length restrictions, draft 15 m. Robert Harbour: Length approx. 140 m., draft 7.5 m. Alongside main jetty: Length up to 105 m., draft 6.0 m. (In an emergency 6.1 m.)

HEALTH: Arrange for Pratique via Agent.

RADIO: Radio-telephone calls, cables etc. to Agents, Shippers, etc, through Walvis Bay Radio; call sign ZSV. Frequencies as per International Telecommunication Union list of Coast Stations.

VHF: VHF contact with Port Control on Channels 16 and 12. Working Channels: 6, 8, 9, 10, 11, 13, 14, 17, 67, 68, 69, 70, 71, 72, 73 and 74. Same VHF channels apply to Pilot and Tugs.

Diaz Point Lighthouse maintains a 24 hour watch on VHF Channel 16; with working channels as for Port Control. If no reply from port control, contact Diaz Point Lighthouse.

RADAR: No port radar service.

TUGS: Two small tugs are stationed at the Port: "Pelican", 12.5 tons bollard pull, length 26 m. and "Fisant" (diesel) of 220 h.p. length 14 m.

Tugs usually join vessel at head of the channel in Robert Harbour. Tugs lines' are used; at no extra charge.

Tugs are equipped with fire fighting hoses and salvage pumps.

BERTHING: Entrance Channel: Length 708 m., width 60.9 m., depth 6.1 m.

Turning Basin: 236 m. by 198 m., depth 6.1 m.
Main Jetty: Length 242 m. Two berths of 92 m. length, depth 6.1 m.
New Jetty: See "Plan".
Wooden Jetty: Length 168 m., depth 3.5 m.

One berth is available on each side of the main jetty for vessels up to 150 m. in length. A draft restriction of 6 m. at low tide exists. Sea bottom alongside berths and entire channel is soft mud and silt.

The wooden jetty is used mainly for the local fishing fleet of small wooden boats.

No specialised berths exist at Luderitz, at present.

CRANES: 2×4 ton cranes able to work over either side of jetty but unable to work in tandem. Any heavier lifts by ship's gear only.

STEVEDORES: 72 hours' notice is required in order to arrange gangs. Average rates: Frozen fish 18 t.p.h. General cargo 32 t.p.h. Timber 45 t.p.h.

MEDICAL: 2 doctors, one hospital (36 beds), one hospital (160 beds), notice of 4 hours required, except emergencies.

TANKERS: 5×4 in. lines.

DENSITY: 1025.

FRESH WATER: Available on jetty by pipeline through meter at approximately 25 t.p.h.

FUEL: Gas oil connections to 8×3 in. pipelines from shore tanks.

Gas oil bunkers points on the main jetty supply at approximately 25 t.p.h. 1,200,000 litres of gas oil are available.

Small quantities of gas oil by 6,819 litre capacity road tanker are also available at immediate notice.

CONSULS: None.

REPAIRS: Light engineering facilities exist. Underwater inspections and working divers available.

DRY DOCKS: One slipway of 400 tons capacity and 1×150 ton capacity. Used mainly by local fishing boats.

SURVEYORS: Department of Transport surveyor is available at Walvis Bay. Cargo surveys, underwater surveys and other independent surveys are available by Master Mariner (foreign-going).

GANGWAY/DECK WATCHMEN: Not necessary but available if required.

HATCHES: Opened and closed by crew.

CARGO GEAR: Alongside jetty by shore cranes (4 ton capacity) by ship's gear at anchor when using lighters. Eight lighters, 26 m. long, 150 ton capacity are stationed at the port.

REPATRIATION: Handled by Agent.

AIRPORT: 12 km. from harbour. 2 flights a week to and from Windhoek and Cape Town. Charter flights may be arranged.

TIME: GMT plus 2 hours.

HOLIDAYS: Cargo can be worked on any day.

POLICE/AMBULANCE/FIRE: Police: 10111, Ambulance: 2266, Fire: 2607.

SERVICES: Compass adjusting, diving and cargo surveys.

SHIP SUPPLY SERVICE: An Off-Shore Ship Supply Service is operated by the Namibian Transport Services (Harbours) by means of a small tug and (occasionally) by means of a launch.

If the vessel does not have an Agent at the port, a deposit is required before the service will be rendered. The service is provided on a 24 hour basis, provided (except in an emergency) the necessary arrangements are made during normal office hours.

The normal rendezvous position is approximately 3 miles N.E. of Diaz Point Lighthouse (Position of lighthouse: Lat. 26° 38.2′ S., Long. 15° 05.6′ E.) but the tug, by special arrangement, will proceed further to seaward if required. The depth of water at the normal rendezvous position is 22 m.

SHORE LEAVE: 24 hours at anchorage, launch available. No restrictions when alongside.

IDENTIFICATION CARDS: Seaman's Book.

GARBAGE DISPOSAL: Drums are available. Collection on request through ship's Agent or Port Control. Tel: 06331-2337.

WASTE OIL DISPOSAL: Drums are available. A 1 cu.m. mobile tank for use on wooden jetty is available. Contact Port Control, Tel: 06331-2337. Slop barge of 12.0 cu.m. also available.

SEAMAN'S CLUBS: None.

CURRENCY: Namibian Dollar.

DELAYS: No delays normally, except due to weather.

GENERAL: Fresh provisions, supplies and services available by arrangement with Agent.

Basic weather conditions: Summer – South to S.W. wind up to 35 knots frequently experienced. Winter – winds variable but mainly North up to 20 knots. Fog is frequently experienced West of Angra Pt.

Charts: BA. 3861 and 3863; South African Naval Charts: 1002 and 1003.

SHIP'S OFFICER'S REPORT: December 1983.

Medical: No facilities for blood tests; these can only be done when there is a direct flight to Cape Town.

Surveyors: Port Captain acted as Cargo Surveyor.

Customs: Very strict regarding magazines. These should be sealed in bonded store, otherwise fines payable.

Shore Leave: Possible from anchorage using tug.

Stores: Fresh vegetables available, but at very high prices.

AUTHORITY: Transnamib Harbours, P.O.Box 88, Luderitz, Namibia. *Tel:* 06331-2337. *FAX:* 06331-21228. *Contact:* Port Captain.

WALVIS BAY 22.57 S. 14.30 E. (See Plan)

PORT LIMITS: The area bounded on the West by a line drawn from Pelican Point Lighthouse to a point North (true) for a distance of 4 km; on the North by a line from this point drawn East (true) to the mainland; together with the foreshore therein and the jetties, harbour works and harbour lands vested in the Government. For the purposes of calculating port charges a vessel is regarded as an "arrived ship" when it enters the dredged channel in Walvis Bay Harbour or when the vessel anchors in the port limits.

DOCUMENTS:
5 copies Crew List.
8 copies Passenger List.
2 copies Report Inwards/Outwards.
2 Certificates of Clearance DA3.
2 copies Transire DA4 for each port of call.
Manifest of Cargo in duplicate.
3 copies Manifest of Stores DA5.
1 Portnet Clearance.
Shipping Master's Certificate.
Immigration Certificate.
Post Office Certificate.
Income Tax Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.

PILOTAGE: Pilotage is compulsory. The vessel's Master must radio his ETA to his local Agent, who completes Form T.958 for submission to the Port Authority.

Channel 16 on VHF radio can be used to call the Port Control Office, working Channel 12.

The Pilot boards at a point approximately 0.5 miles North of the Fairway Buoy (Entrance Channel Buoy) in the direction of the Bell Buoy (Pelican Point Spit Buoy).

The pilot boarding ladder and manropes are required mainly on the port side for docking and on the starboard side for sailing.

ANCHORAGES: Varying in depth from 13 m. – 14 m. at LWOST 1.0 miles North of Fairway Buoy. Bottom – sand and silt. (Also see "Africa Pilot" Vol. II).

RESTRICTIONS: The movement of Oil Tankers and vessels carrying explosives or dangerous goods are restricted to daytime hours (berthing 0600 hrs. – 2000 hrs., unberthing up to 2145 hrs). The maximum permissible draft is 10.0 m.
MAX. SIZE: Max. LOA 224 m., max. draft 10.4 m.
HEALTH: Master to contact Port Health via Walvis Bay Radio to request Pratique. Same procedure applicable if disease reported.
RADIO: Call sign Z5V. VHF radio in Port Captain's Office.
VHF: Port Control equipped with VHF Channels 16 – 12. Port working Channels 9 – 11.
RADAR: Radar is fitted to the harbour tugs and pilot boats. Master to contact Port Control for radar service.
TUGS: Two first-class tugs equipped with radar, wireless telegraph and telephone, direction-finding apparatus and salvage and fire-fighting appliances; 1 pilot boat and 2 launches.

Tugs normally join a vessel on Pilot's request in the entrance channel and are secured by means of the tugs' wires.
BERTHING: 8 berths available excluding tanker berth. Quay length 1,374 m., max. permissible draft alongside 10.0 m. (salt water). Load/discharge by shore cranes unless cargo of such nature that it is essential to use ship's derricks. Berths No. 1 – 6 general cargo, No. 7 container berth and No. 8 berth allocated to bulk loaders, also utilised as repair berth.
CRANES: 12 cranes available, 10×4 tons, 2×15 tons.
BULK CARGO FACILITIES: Berths No. 1 – 6 utilised if necessary. Berths No. 1 – 7 served by shore cranes. Max. draft 10.0 m. (salt water). Bulk cargoes at Walvis Bay consist of salt/petalite/coal/fluorspar.
SPECIALISED CARGO HANDLING FACILITIES: Berth No. 7 utilised as container berth. Ro/Ro vessels berthed at No. 6, liquid chemicals at Berth No. 5. Container stacking area and 2 container stacking cranes available. Ship's gear will still be required for loading and unloading containers. Liquid chemicals are handled in tank containers.
STEVEDORES: Stevedoring is undertaken by private enterprise and stevedores are appointed by Ships' Agents.

Stevedores require minimum notice 72 hours prior arrival. Main export salt in bags rate 18/25 t.p.h. depending on method of delivery to ship's side (rail/road).

Working Hours: Normal working hours (weekdays): 0700 hrs. – 1200 hrs. and 1300 hrs. – 1700 hrs.

Overtime until 2000 hrs.

Saturday and Sunday on request.
MEDICAL: Hospitals are available but prior arrangements have to be made with Agents for medical assistance.
TANKERS: Only one berth available. Max. length of vessel accommodated 192 m. Diameter of load/discharge lines 10 in. and 12 in. Discharge rate 10 in. – 240 t.p.h. and 12 in. – 350 t.p.h. Max. draft 9.9 m.
DENSITY: 1025.
FRESH WATER: Available and delivered by hose ex-wharfside – hydrant at 15 t.p.h.
FUEL: Gas oil only available, 12 hours' notice required. Delivery by pipeline at Berths No. 1 – 5, and by road tanker at Berths No. 6 – 8.
FIRE PRECAUTIONS: When berthed alongside a wharf or jetty, a ship having explosives or any other goods of a dangerous nature, the Master shall, if the Port Captain so directs, have a fireman in attendance, the cost whereof shall be borne by the Owner of the ship and the Master of any such ship shall also, at the expense of the Owner of the ship, adopt such other or further precautionary measures as the Port Captain may consider reasonably necessary for ensuring the safety of the harbour, the ship or the cargo.
CONSULS: France.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCK: There are no dry-docks available at this port. A syncrolift with a lifting capacity of 2,000 tons, maximum permissible length of 72 m., max. beam 13 m., and a depth of 10 m. is operated by Namibian Ports Authority.
SURVEYORS: Lloyd's and N.V. represented.
GANGWAY/DECK WATCHMEN: Arrangements have to be made with vessel's Agents to secure services of gangway/deck watchmen.
HATCHES: Opened by crew.
CUSTOMS ALLOWANCES: Officers: 200 cigarettes, wine 3 litres, spirits 1 litre, beer 2 litres.

Crew: 3 litres wine, 200 cigarettes.

Allowances are based on 4 day issues.
CARGO GEAR: Loading/discharging of cargo is effected by means of shore cranes. 30 ton mobile crane available in case of emergency (Private).
REPATRIATION: All facilities available.
AIRPORT: Situated 14 km. from Walvis Bay. Served by Air Namibia, 3 flights per week, Tuesday/Friday/Sunday.
TIME: GMT plus 1 hour (Winter). GMT plus 2 hours (Summer).
HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; Ascension Day; Day of Covenant (16th December); Christmas Day; Boxing Day (26th December).

Cargo worked on all holidays except Christmas.
POLICE/AMBULANCE/FIRE: Police Tel. 10111; Ambulance Tel. 3441; Fire Department; Municipal: Tel. 3117.
TELEPHONES: Arrangements have to be made with Post Office to have a telephone connected.
SERVICES: 24 hour launch service available, divers inspect fouling, underwater photography, tank cleaning, hold cleaning, compass adjusting, radar repairs, hull cleaning.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Seaman's Book sufficient.
GARBAGE DISPOSAL: Collection service is available by means of 2×10 tonne high side trailers on a daily basis or when required. 18 purposely designed skips per berth are on the quays. Charge for garbage disposal R24.20 per cu.m. or part thereof.
WASTE OIL DISPOSAL: Road transport service available at N$50 per hour. Capacity: 27,000 litres.
SEAMAN'S CLUBS: Mission to Seaman, 13th Road, Walvis Bay. Tel: 2594. Facilities include shop, telephone, church services, bus collection.
CURRENCY: Namibian Dollar (N$). U.S.$ 1.00 = N$ 3.83 (7.94).
REGULATIONS: A copy of the Regulations are supplied gratis to Masters on arrival.
DELAYS: If any delays, caused by fog.
AUTHORITY: Namibian Ports Authority, P.O.Box 361, Walvis Bay 9190, Namibia. *Tel:* (0642) 8390. *FAX:* (0642) 8390. *Contact:* Captain J-D von der Fecht, Chief Executive Officer.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 529 (174 3rd. Street East), Walvis Bay 9190. Tel: (0642) 2771. Telex: 530092. Fax: (0642) 3994.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Nauru

NAURU: 00.32 S. 166.56 E. (See Plan)

PORT LIMITS: Vessels to arrive approximately 4 miles to the West of the island and establish contact with Nauru Port Control on VHF Channel 16 to obtain further instructions. Vessels are advised not to approach closer than 0.5 miles off the island, due to very strong and variable currents.

DOCUMENTS:

International Declaration of Health, 1 copy.
Clearance from Last Port.
Crew Lists, 2 copies.
Passenger Lists, 2 copies.
Manifest, 1 copy.

PILOTAGE: Pilotage is compulsory. The pilot station is 0.25 miles bearing 315° (T) from the Northern-most buoy ('A1') of the Northern (No. 2) cantilever, on the West side of the Island, which is approximately 0.5 miles offshore.

Masters should inform the Harbour Master on departure from last port, 72 hours and 24 hours before arrival. ETA messages should be sent through Radio Nauru (C2N) or through Sydney Radio to telegraphic address "Nauruphos Nauru" or telex No. ZV 33082 Nruphos for attention of the Harbour Master. On receipt of the second ETA message, Nauruphos will advise the Master through Nauru Radio or Sydney Radio of any messages for the vessel.

The Harbour office is open from 0700 hrs. daily, 0730 hrs. Sundays, and the Harbour Master will contact vessels on VHF Channel 16 or 2182 kHz regarding berthing instructions.

Vessels should fly the Nauru National flag when approaching the island.

A safe, clean pilot ladder with 2 manropes should be rigged on the port side of the vessel with the bottom rung 0.7 m. above the water. Vessels should approach the pilot station from the North on a heading of about 220° (T).

The pilot normally remains on board throughout the period that the vessel is made fast to the mooring system. The weather is extremely unpredictable and the vessel may be required to slip and sail at very short notice.

ANCHORAGES: No sea anchorage is available at Nauru due to extreme depths of water all around the island. Vessels unable to moor due to adverse weather, late arrival or berth occupancy drift off the port and return by daylight next morning, or when required to do so by the Harbour Master.

There are no known shoals offshore.

RESTRICTIONS: There are no restrictions on draft or tide. Onshore winds (Westerly) generate an onshore set which may make ship handling unsafe when the Harbour Master will declare a non-weather working day. Vessels are only brought in to the moorings during daylight hours.

MAX. SIZE:

No. 1 (Southern) Cantilever: Condemned as beyond repair.

No. 2 (Northern) Cantilver:

Maximum arrival deadweight	18,000 tonnes.
Maximum sailing displacement	42,000 tonnes.
Maximum length	192.02 m.
Maximum beam	28.34 m.
Maximum airdraft	12.73 m.

HEALTH: Masters of vessels approaching Nauru are required to send a telegram or telex directly to the Quarantine Officer, Nauru, not more than 24 hours and less than 12 hours before arrival either through Nauru Radio or Sydney Radio. The quarantine message should state the name of the last port, the date of departure from the last port, the number of crew and passengers, and the presence of any infectious disease. If no reply is received from the Quarantine Officer, the vessel should call Nauru Radio on VHF Channel 16 and obtain pratique, after arrival off the island. The telex number of the Quarantine Officer is ZV 33086 NRUMIC.

RADIO: Nauru Radio. Call Sign: C2N.

Hours of operation: 0800 – 1300 (local time) 2000 – 2330 (UTC)
1300 – 1630 (local time) 0100 – 0430 (UTC)

For frequencies and schedules see 'Admiralty List of Radio Signals'. If difficulty is experienced in raising Nauru Radio, messages can be passed through Sydney Radio or any convenient Coastal Radio Station. Messages may also be sent to Nauru Radio on telex No. ZV 33086 NRUIMC or ZV 33081 GOVNRU.

There is a short wave radio in the Harbour Office and contact can be made on 2182 kHz. Other frequencies are 6215.5 kHz, 6221.6 kHz and 16590.2 kHz.

VHF: The Harbour Office (Nauru Port Control) has a VHF set with a range of 20 miles to the West of the island. Difficulty is experienced communicating by VHF with vessels to the East of the West side of the island.

Calling: Channel 16 – Working: Channel 14.

Nauru Radio Station is situated on the South side of the island. Some difficulty is experienced communicating by VHF with vessels to the North of the island. Nauru Radio operates on Channels 16, 11, 26 and 68.

RADAR: A radar set is installed in the Harbour Office for the purpose of monitoring rain squalls.

TUGS: No tugs available.

BERTHING: There are 2 sets of mooring buoys for the phosphate loading cantilevers. The mooring gear for making fast to the mooring system for vessels coming to load phosphate or discharge oil is supplied from ashore. Mooring gangs board the vessel at the pilot station to carry out the mooring operation under the direction of the duty Harbour Master (Pilot). All Harbour Master's are qualified Master Mariners. Ship's anchor cables are not used. The ship's forward and after cranes/derricks must be rigged on the port side for lifting the mooring gear on board.

A vessel is moored initially to the outer buoys which are anchored in approximately 600 m. of water and are then hove to an inner mooring system. In the loading position the vessel lies in about 30 m. of water and about 18 m. – 24 m. from the reef edge.

Loading of phosphate is from 2 cantilevers with a combined pour rate of 3,000 tonnes per hour.

Vessels handling containers or general cargo tie up to the outer buoys and use ship's lines. Lighters are brought alongside for the handling of cargo.

STEVEDORES: Supplied by Nauruphos, no advice required. When shore mooring ropes are used, the stevedore supervisors are in charge of the mooring gangs fore and aft. Cargo operations are normally conducted during daylight hours only. Occasionally vessels may be sailed after dark if it is possible to complete phosphate loading by 2200 hrs. General cargo is not handled after dark.

MEDICAL: Medical treatment can be given at short notice. There are 2 hospitals on Nauru and emergency surgery can be carried out. Cholera vaccinations are required if the vessel has come from an infected area.

If vessels are calling at the island solely for the purpose of obtaining medical assistance, the request for medical assistance should be sent directly to the Principal Immigration Officer, Nauru, on telex No. ZV 33086 NRUIMC or ZV 33081 GOVNRU.

TANKERS: Length and beam as for phosphate vessels. 8 in. discharge line, to storage tanks, capable of 60 p.s.i. discharge pressure.

Small tankers (less than 150 m.) usually use ship's lines for head and stern lines, but inner and outer breast lines are supplied from shore as for phosphate vessels.

DENSITY: The entire mooring system is in the open sea. Normal salt water at all states of tide and season.

FRESH WATER: A new desalination plant was built in 1993, and fresh water supply is now plentiful on the island. However, there are no water barges available, and ships can only get water in small quantities, and only in case of emergency.

FUEL: Island stocks are imported for use in the phosphate industry. Bunkers are not normally supplied. Limited quantities may only be made available in cases of extreme emergency.

CONSULS: Australian and Republic of China (Taiwan).

REPAIRS: Small repairs such as welding, brazing and lathe work may be carried out when such repairs are essential to allow the vessel to proceed on its voyage. Electronics technicians employed by the phosphate corporation may be able to effect repairs to electronic navigational aids providing that circuit diagrams are available.

Main engines may not be immobilised while the vessel is made fast to mooring system.

SURVEYORS: Nauru Phosphate Corporation is the appointed agent of Lloyd's of London. The Harbour Master performs the surveys. Draft surveys are the responsibility of the vessel.

GANGWAY/DECK WATCHMEN: The inshore gangway is usually used for labour to gain access to the vessel. The alighting platform of the gangway should be suspended about 2.0 m. above the water. A member of the crew should be available to raise or lower it as necessary.

OPENING/CLOSING HATCHES: Carried out by ship's crew.

CUSTOMS ALLOWANCES: No restrictions on crew consumption apply. Trading between ship and shore is prohibited.

CARGO GEAR: Cargo gear should be up to the standard demanded in Australian ports. Derricks and/or cranes must be topped and made ready for operation by the ship's crew who should instruct the winch/crane operators in their use. The handling of containers and general cargo is by ship's gear only.

REPATRIATION: Repatriation can be arranged. No facilities are provided for crew changes.

AIRPORT: Airport is 1 km. from the Harbour Office. Air Nauru operates regular flights to Australia, New Zealand, S.E. Asia and major locations in the Pacific.

TIME: GMT plus 12 hours. No alterations during the year.

HOLIDAYS: Christmas Day, New Year's Day, Good Friday and Easter Sunday are normally closed holidays. Other National holidays occur during the year but work normally continues on these days.

POLICE/AMBULANCE/FIRE: All emergencies are handled by the Harbour Masters.

TELEPHONES: Nauru International dialling code: 674.

No telephones are placed on board. The duty Harbour Master and Stevedore Supervisors carry radios for communication with the Harbour Office, wharf supervisors and plant operators. No radiotelephone facilities exist.

SERVICES: No special services are available.

BANKS: The Bank of Nauru is the only bank on the island. There are 2 branches of the bank, both within 0.5 km. of the Harbour Office. The main office is located in the Civic Centre. The currency of Nauru is the Australian dollar. Money transfers can be arranged directly with the bank, or through the Westpac Bank of Australia. Bank of Nauru, P.O.Box 289, Republic of Nauru, Central Pacific. Telex No. ZV 33085 BANKNRU. Telephone 5239 and 5240.

STORING: No facilities exist for revictualing or the provision of stores.

SHIP SUPPLY SERVICE: The Marine Department can provide a barge to ferry personnel to and from the ship in emergency cases. At all other times, use of the barges is subject to availability. A charge of A$50.00 is levied for the service.

SHORE LEAVE: This may be granted by the Master in consultation with the Harbour Master on board.

IDENTIFICATION CARDS: Some form of identification, Passport, Discharge Book, or I.D. card, should be carried by crew members.

REGULATIONS:

1. Unless otherwise advised, derricks and/or cranes must be rigged for discharging to or from lighters alongside the vessel.
2. The rigging and adjusting of derricks and cranes prior to, or during cargo operations is the ship's responsibility.
3. Shore crane drivers are supplied solely for the loading and discharge of cargo.
4. The opening and closing of hatches is the ship's responsibility.

5. Shore labour does not apply or release cargo lashings, except in the case of twistlocks within a container stow.
6. Hatch cleaning is not performed by shore labour as part of cargo operations.
7. The handling of ship's moorings is the responsibility of the ship's crew. Shore labour will handle the moorings when the vessel ties up alongside the phosphate loading cantilvers.
8. Normal hours are 0700 – 1900. Any variation is at the Harbour Master's discretion.
9. The pilot is to be provided with access to the wheelhouse at all times in order to operate the radar to detect rain squalls.
10. Mooring winches to be available at all times.
11. The engines are not to be immobilised, but are to be ready at 10 minutes notice. When notice is given, it is expected that the mooring winches will be immediately available.
12. The weather is extremely unpredictable. If the weather deteriorates, the vessel will be slipped from the moorings and put to sea *WHETHER OR NOT THE MASTER AND CREW ARE ON BOARD*. For this reason, it is imperative that the vessel is adequately manned at all times.
13. Barges may be provided to ferry crew ashore, subject to their availability. All requests should be referred to the pilot or Stevedore Supervisor.
14. Vessels must not approach the port unless requested to do so.
15. Trimming of bulk phosphate is not performed by shore labour.

DELAYS: Normally no delays should be expected. Vessels arriving in the afternoon usually berth the following day. One or two days delay may be experienced due to port congestion, but this is rare. Phosphate vessels usually take preference over other vessels which will be berthed after the phosphate vessels have tied up.

Delays can occur due to adverse weather, the duration of which is unpredictable.

GENERAL: The mooring system is in the open sea with no protection from the wind or waves from the West. Waves under the cantilevers are shorter and steeper than outside as a result of the shoaling effect of the coral reef. Vessels are continually rolling and heaving while under the cantilevers This makes it extremely dangerous for the ship's crew to open and close hatches with pontoons.

Vessels with derricks cause delays because it is usually not possible to swing the cantilevers between hatches for the various pours without heaving the vessel out on the moorings and back in again after shifting the cantilever.

Easterly trades predominate for most of the year when the mooring system is in the lee of the island. However, Westerly monsoons blow during the wet season from November to March. Westerly winds blow up to 45 knots and rain squalls are frequently experienced. Strong onshore currents remain for several days after the winds have eased. For this reason it is extremely dangerous to approach the buoyage system after Westerly winds.

During the monsoon season vessels should have sufficient fuel, fresh water and provisions for at least 30 days over and above the normal duration of the voyage.

Strong mooring winches are essential since no tugs are available and the vessel has to heave out on the mooring ropes before sailing.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Australian Dollar (A$).

NOTES

Please also advise Shipping Guides Ltd.

Netherlands

GENERAL:

CUSTOMS: *Shipmaster's Report:* June 1993.

The Customs gangs who search vessels on arrival will confiscate protected animals, corals and products made out of materials from protected animals.

AMSTERDAM: 52.22 N. 04.54 E. (See Plan)

PORT LIMITS: Notice of Readiness will only be accepted (subject to C/P terms) if vessel has actually arrived at Amsterdam, which means that vessels have to enter from sea and pass the locks at Ymuiden, proceeding through the North Sea Canal to Amsterdam. There are various buoys and quays available where vessels can be moored waiting for final discharging berth.

DOCUMENTS:

Health Certificate. Forms obtainable from sea Pilot.

Crew List in triplicate.

2 copies of Crew Manifest for cigarettes, cigars, spirits, etc., belonging to crew.

Passenger List in triplicate.

1 copy of Manifest.

1 copy of Bills of Lading.

Dangerous Cargo List.

Ship's Register.

1 copy Stores List.

Also see "Rotterdam".

PILOTAGE: *Ordering a Pilot:* In order to avoid possible delay in obtaining a Pilot, all ships bound for the North Sea Canal range should send a standard message at least 6 hours in advance when inward bound, and 4 hours in advance when outward bound to:

Pilot VTS Ijmuiden, Traffic Centre, 19 Seinpostweg, 1976 BT Ijmuiden. Telex: 71169 PI.VTS. Fax: 02550-32535. Tel: 02550-64500. Day and night service VHF Channel 12.

Messages regarding deep draft ships (more than 45 ft. in salt water) are expected 24 hours in advance, and are to be confirmed at least 8 hours before arriving in position Lat. 52° 30′ N., Long. 03° 50′ E.

Messages regarding licensed ships (draft range from 43 ft. to 45 ft., particular transports, etc.) at least 7 days before arrival at above mentioned position.

Vessels carrying dangerous goods at least 24 hours before entering Dutch territorial waters.

Delays of one hour or more have to be corrected.

The Master shall transmit his vessel's ETA via Scheveningen Radio (PCH), or any other suitable means of communication.

Communications: All arriving ships are requested to maintain continuous watch on VHF Channel 12 as soon as within VHF range, for Pilot messages and berthing orders, as well as for the locking process and other information. At the special request of Traffic Centre Ymuiden, ships should change to Channel 9.

Pilot Service Information:

1. Pilot Coordinator: Information about the boarding of the Pilot, pilot helicopter services, advice to deep draft vessels, etc., can be obtained 24 hours a day from the Pilot Coordinator at Traffic Centre Ijmuiden on VHF Channels 12 and 9, or by Tel: 02550-64503.

2. Pilots Corporation (Regionale Loodsencorporatie Amsterdam – Ijmond): Messages concerning the organisation of the pilot service, complaints, etc., should be sent to: The President of the 'Regionale Loodsencorporatie Amsterdam – Ijmond', 242 Kanaaldijk, 1975 AJ Ijmuiden, or during office hours by Tel: 02550-64501.

Operations:

1. Piloting of Ships with Draft up to 45 ft.:

Boarding generally takes place in an area around the Racon Buoy (Racon --.-) varying from one mile North to one mile South of the leading line 100°, depending on the tide and from 2 miles East to 3 miles West of that buoy, depending on type and size of the ship.

Pilot launches operate between the harbour and the vessels to be piloted. The hull of these ships is yellow, the superstructure white and the word 'Pilot' painted in black on sides. Vessels are equipped with radar and VHF. In order to perform a smooth piloting procedure, it is advisable to contact the launch on Channel 9.

2. Piloting of Ships over 45 ft.:

Ships exceeding this draft are boarded in the approach of the IJ-Channel (52° 30′ 00″ N., 03° 50′ 00″ E.) by helicopters. Outward bound debarkation takes place after passing Buoy 'Y 1'. The vessels concerned must be equipped in conformity with the safety standards of the International Civil Aeronautical Organisation (ICAO) as published in the 'Guide to Helicopter/Ship Operations' by the International Chamber of Shipping (ICS).

In view of the narrowness of the IJ-Channel, vessels which have to be restricted thereto are urged to use Government Pilots. To promote the safety of shipping, the Pilots work with a Decca electronic position finding system in combination with a Norcontrol computerised surveillance radar ashore.

3. Piloting suspended with Launches:

Boarding by launch is suspended when wind force is 7 or 8 Beaufort Scale (wave height exceeding 2.70 m.).

As a substitute, Pilots of the local Pilot Corporation Amsterdam-IJmond may embark by helicopter.

1. Ships with Helicopter Facilities:

Ships, due to arrive at the North Sea Canal area, should pay special attention to the weather situation, as piloting with launches is stopped when wind force increases to 7/8 Beaufort Scale. Helicopting is available on demand against a fixed tariff, but is a matter to be deliberated between Agents and the coordinating Pilot. Early consultation with Agents is desirable.

If helicopter pilotage is not possible, Pilots may embark in other ports under the following conditions:

2. By means of public transportation: At Rotterdam (4 hours), Antwerp and Flushing (5 hours) previous notice. Pilot can also board at other places.

3. Shore-based Pilotage (Remote Pilotage):

Pilot's information and advice for ships with a length overall up to 125 m. can also be obtained by means of shore based radar, when launches are not working outside the breakwater.

Shipping is notified of the fact that the existing radar equipment does not entirely meet the operational requirements for remote pilotage.

For this reason, it is mandatory that the Master explicitly states that he wishes to enter the harbour using RRP, and that there is no objection to do this under the terms of the conducted access policy.

Procedure:

(a) Traffic Centre IJmuiden (Channel 9) requests the ship to switch over to Channel 19.

(b) The ship has to proceed to a position 100° about 4 miles West from the breakwater prior to entering.

The following are to apply:

Reasonable contact ship-shore and vice versa.

Two good working VHF units.

Some manoeuvring data needs to be known ashore.

The Master of the ship is obliged to board the Pilot as soon as the ship is inside the breakwaters.

1. Pilot Launches:

Pilot launches engaged on their station on pilotage duty shall fly, exhibit, display, hoist or sound.

(a) By day: The pilot flag, a blue flag with white letter 'L' displayed from the foremast.

(b) At night: The lights as prescribed by Regulation 29 of the Regulations for Preventing Collisions at Sea.

(c) During fog, mist, snow, heavy rainstorms or any other weather conditions which in like manner cause visibility to deteriorate, the sound signal as prescribed by Regulation 35(a), (b), (f) and (i).

2. Pilot ladder:

Pilot ladders should be rigged on starboard or port side, depending on the weather situation, at a height of about 2.0 m. (6 ft. – 7 ft.) above sea level.

In cases of freeboard more than 9.0 m. (29 ft. 06 in.), the ladder should be made ready in combination with the accommodation ladder.

3. Hoist landings: (ICS Guide character 'D').

Hoist landings must meet the following conditions: Manoeuvring zone 27.5 m. (90 ft.) diameter. Broken white circle need not to be painted. Clear zone (solid yellow circle, with same centre point) not less than 4.6 m. (25 ft.) diameter. Maximum height of obstacle within manoeuvring zone 3.05 m. (10 ft.). Minimum height the helicopter will hover – about 10 ft. above the highest obstacle in manoeuvring zone.

All other deck markings as shown in the ICS Guide under 'A', 'D' and 'C' may also be used for hoist landings.

In order to prevent useless spending, Agents should be aware of the fact that ships without deck markings, as well as those which fail to comply with the operating recommendations, may be refused by the boarding Pilot.

Limitations:

Wind of more than 10 Beaufort Scale (55 km./hr.).

Visibility less than 800 m. at 150 ft.

Severe air turbulence, icing and extreme rolling and pitching of the ship.

Container ships:

Container carriers, which intend to request a Pilot by helicopter, shall provide, in advance to the helicopter company, drawings (preferably on an original deckplan), showing arrangements as outlined under "Operations" No. 2 and "Procedure" No. 2.

Maritime Traffic Act: Pilotage is mandatory for vessels over 65 m. LOA, and all vessels equipped for bulk transport which are not gas-free or are carrying dangerous cargo in bulk, regardless of the length.

1. Exemptions:

All sea-going vessels over 40 m. have to pay pilotage dues. The following vessels with a length of less than 65 m. are exempted from pilotage/pilotage dues.

(a) Tugs.
(b) Salvage vessels.
(c) Dredgers and vessels for conveyance of sand, mud and gravel.
(d) Fishing craft.
(e) Lifeboats.
(f) Pilot vessels.

Unless they are used for other purposes than specified above. When a vessel has failed to engage a commissioned Pilot, full dues are charged, unless it can be proved that a Pilot was not available.

Note: Revised legislation will come into force in the course of early 1993.

2. Owners and Master are requested to note that neither the Pilotage Corporation or the Pilot can be sued for damage sustained or done to any other vessel or object by a ship carrying a commissioned Pilot.

Pilotage in all estuaries, seaports, rivers, navigable waterways and canals within the Netherlands is exclusively carried out by the commissioned Pilots of the local Pilots Corporations (Regionale Loodsencorporatie).

3. Pilotage dues are based on the draft of the vessel measured in decimetres. Fractions up to 0.5 are rounded off and fractions above 0.5 are counted as full in assessing pilotage dues. For rendering pilotage

service outside the limits of any pilotage district, retaining fees and travelling expenses are charged in addition to dues as specified in the tariff (other instances when retaining fees or travelling expenses become due are specified in the Addenda to the Traffic of dues).

Dues and other charges for both inward and outward pilotage services shall be paid before sailing outward, but in no case later than one month after the service was rendered. Custom-house officers shall refuse clearance of a vessel without a certificate of payment or of a lawful document authorising exemption from pilotage. Claims for readjustment of payment for pilotage services must be made within 12 months.

Also see "Ymuiden".

ANCHORAGE: Anchoring in Ymuiden outer harbour, North Sea Canal and in harbour of Amsterdam is prohibited.

RESTRICTIONS: Entry possible at night.

MAX. SIZE: Vessels proceeding to Amsterdam have to pass locks at Ymuiden. Dimensions of Northern lock (largest): 400 m. long, 50 m. width and 15.00 m. deep at N.A.P. (N.A.P. is 1.13 m. above LLWS.) Max. LOA 325 m. Max. width 42 m., and with special permission up to 45 m.

At max. width 45 m. the max. draft is 40 ft. salt water. Between 45 m. width and 42 m. width the draft increases gradually from 40 ft. till 45 ft. salt water. All these ships have to pass the locks with special permission.

The official max. draft to enter Ymuiden is 54 ft. salt water. Vessels with a draft of 43 ft. to 45 ft. salt water may enter Ymuiden and proceed to Amsterdam.

RADIO: Cable Agents giving ETA, draft, cash and other requirements via Scheveningen Radio/PCH.

Floating derricks	10 – 300 tons	12

CARGO HANDLING FACILITIES: Grain:

I.G.M.A. (Internationale Graanoverslag Mij. Amsterdam B.V.): The grain terminal, Situated in Vlothaven, is specially designed for the fast discharge and transhipment of grain and derivatives.

Depth alongside 49 ft. 3 in.

A fast conveying installation transports grain into the silos or to receiving ships. Capacity of the silos: 52,700 tonnes. Also soyabeans are transhipped to the soya oil extraction plant next to the I.G.M.A. silo.

Equipment: The installation has a main jetty of 1,200 ft. length to accommodate 2 vessels up to 100,000 d.w.t. The ships are unloaded by 2 mobile pneumatic suckers, with a capacity of 400 t.p.h., 2 screw grain dischargers with a capacity of 800 t.p.h. each and 1 floating elevator with a capacity of 200 t.p.h. for heavy grain. Two crane/weigh tower combinations with a capacity of about 400 tons heavy grain each. A floating crane, capacity 15 tonnes is available for handling stores, spare parts, etc.

Despatch: With the modern equipment and the efficient way of handling, a good despatch can be realised. If two or three discharge units are available, a bulk carrier with 30,000 tons will be completed within 2 days. Daily discharge capacity in total is about 40,000 metric tons.

Supplies: Water obtainable from ashore, stores must be transhipped on barge at the quay as jetty is not accessible to trucks; bunkers by barge.

Pier C: Alongside this berth bulk carriers and tankers can be accommodated to load directly ex-silo. Max. draft 30 ft., max. airdraft 30 ft. Loading capacity 2,000 t.p.d.

Cargill B.V.: Located adjacent to the IGMA Grain Terminal.

Importing vessels are berthed alongside the IGMA pier and the plant receives the soyabeans directly by conveyor belt.

The finished products are loaded into coasters which moor alongside the jetty of the plant along the Mercurius Harbour. Loading capacity: About 200 t.p.h.

Ore, Coal, Agricultural Products, Derivates, etc.:

B.V. Overslagbedrijf "Amsterdam": This stevedoring company for the transhipment and storage of all kinds of dry bulk cargoes is situated in the West Dock, only 10 miles from Ymuiden. Along the quay with a length of 2,600 ft., large bulk carriers with a draft up to 49 ft. 03 in. fresh water can be accommodated. Vessels up to 54 ft. can be lightened at Ymuiden to a maximum draft of 45 ft. salt water.

There are no restrictions as to the length, height or beam of the ships. Maximum outreach of loading/discharging gear over water: 164 ft.; maximum height of loading/discharging gear above water level: 80 ft. 5 in.

Equipment: 4 high speed gantry cranes, gross lifting capacity 3×30 tons (20 tons net) and 1×50 tons (30 – 33 tons net) with built-in electronic weighing system. The 3×30 tons gantries have a maximum outreach over water of 131 ft., allowing a maximum air draft of 50 ft. whereas for the 50 tons gantry the maximum outreach over water is 164 ft., allowing a maximum airdraft of 80 ft.

Double independent conveyor belt-system (length 5 km.) for simultaneous stockpiling/reclaiming into barges and/or railcars with separate cranes for that purpose.

Loading machines for (push) barges and sea-going vessels up to 18,000 d.w.t.

Discharging equipment for railcars. Double track rail connection with Dutch Railway System with automatic weighing equipment. Storage capacity up to 3 million tons.

Capacity: Total discharging rate of gear: For ore up to 100,000 tons per 24 hours; for coal up to 60,000 tons; for derivatives up to 25,000 tons. Loading rate of gear into seagoing vessels from stockpile: up to 2,000 t.p.h. Ex barges: depending on size of barges.

Supplies: Water, stores and bunkers can be delivered by truck and/or barge.

Havenbedrijf de Stuwer B.V.: Handles coal, minerals, ore, derivatives and fertilisers in the Western port area.

Equipment: 3 floating cranes with a capacity up to 16 tons;

Excellent rail connections and weighing bridge;

Screening installations for coal and coke;

Storage capacity up to 200,000 tons;

Vast paved storage areas.

Very reasonable dispatch. Capacity about 15,000 tons per running day; with combined working of gantries and floating cranes even more. Quays with length of 4,800 ft. can accommodate large bulk carriers with a draft of 35 ft. With the floating cranes, vessels drawing up to 45 ft. can be handled at any place in the Port of Amsterdam.

Supplies: Stores, bunkers can be delivered by truck, and/or barge.

Phosphate: *Amfert B.V.*

At the fertiliser works, rock phosphate is discharged and after manufacture the ready product (fertiliser) shipped in bulk.

Equipment and berth: The main jetty has a depth alongside of 35 ft. and 2 vessels of up to about 25,000 tons can be accommodated. With the 2 grab cranes a daily out turn of 5,000 tons phosphate is reached.

Container and Ro-Ro/Ferry Terminals:

Combined Terminals Amsterdam V.O.F. (C.T.A.): Combined Terminals Amsterdam V.O.F. offer a complete container terminal service on the West Terminal which is located in the Westhaven.

Container Freight Station and Intercontainer Railway Terminal incorporated on the terminal site.

Roll-on/Roll-off ramp especially constructed for heavy axle loads. Car terminal facilities for handling large quantities of factory automobiles/trucks.

Berths:

Berth No. 1: Length 250 m. Depth alongside 13 m. (42 ft.)
No. 2: Length 215 m. Depth alongside 11.5 m. (37 ft.)
No. 3: Length 140 m. (Ro/Ro) Depth alongside 11.0 m.(35 ft.)
No. 4: Length 290 m. Depth alongside 11.0 m. (35 ft.)

Equipment: 3 Portainers, with lifting capacity 50 tons each, outreach 36 m. (116 ft.), rail width 20 m. (65 ft.) and backreach 24 m. (80 ft.) with 20 ft., 30 ft., 40 ft. and adjustable spreaders, also to lift two 20 ft. containers simultaneously.

Four multi-purpose-rail mounted dock cranes with lifting capacity of 30 tons on 20 m. (66 ft.) and 12 tons on 40 m. (131 ft.) outreach.

Two rail mounted transtainers, capacity 35 tons and 45 tons with 28 m. (90 ft.) and 40 m. (129 ft.) span rotating and adjustable spreader serving 3 railway tracks.

Eight van carriers, terminal tractors and chassis and heavy lift trucks equipped for containers, steel coils and pulp.

Facilities: Container storage yard 165,000 sq.m.

Car park 140,000 sq.m. (28 acres).

Container freight station 3,000 sq.m. (33,000 sq.ft.) 46 doors.

Two transit sheds 16,000 sq.m. (172,000 sq.ft.).

Workshop for the maintenance and repair of containers and road chassis.

40 reefer receptacles at the required voltages.

Depot of lease containers and road chassis. Container railway terminal.

Working Hours: Usually around the clock, 7 days per week.

Supplies: Fresh water obtainable from the quay, bunkers by barge.

Verenigd Cargadoorskantoor: VCK operates 2 modern stevedoring terminals of which one is equipped for Ro/Ro and passenger traffic: the Scandia Terminal. Regular ferry services sail from there to Norway (Summer passenger service) and Finland (cargo service).

Scandia Terminal: Scandia Terminal in the Suezhaven and Beringhaven, 10.5 nautical miles from the sea-locks in Ymuiden. Total area 105,080 sq.m., marshalling area 84,785 sq.m., quay length 771 m., 3 Ro/Ro ramps, one in Suezhaven and two in Beringhaven, shed space 20,295 sq.m., modern passenger building.

Westport Terminal: 1 mobile container crane of 45 tons. 16 breakbulk cranes of 5 tons – 25 tons. Total area: 5,600 sq.m., quay length: 570 m., shed space: 13,700 sq.m. Marshalling area: 42,340 sq.m.

Also available on both terminals: side loaders (20 tons), tugmasters, slave trailers, flats, containers and forklift trucks.

P. Ter Haak & Zn. B.V.: Double berth Ro/Ro Terminal – Draft 39 ft. Regular Ro-Ro Service to East Coast of Sweden.

Molasses: Cargill – 2 jetties, max. draft 11.30 m. receiving capacity 1,000 t.p.h. Max. d.w.t. 65,000 tons (approx.). Connections 8 in.

Minerals: Eggerding & Co. B.V. Length of quay 400 m. Depth alongside 33 ft. Discharge is carried out by floating cranes.

STEVEDORES: In order to enable Agents to order gangs in time it is recommended to keep Agents duly informed about ETA. No ETA to stevedores necessary.

MEDICAL: If immediate medical assistance will be required in the locks at Ymuiden, Agents must receive advance notice.

TANKERS: *Oiltanking B.V.:* 1 jetty for 2 vessels of 100,000 tons. Max. LOA 310 m., max. draft 15.0 m., 2 jetties for 2 vessels of 3,500 tons, 1 jetty (used in case of fire). One jetty for 1 ship up to 45,000 d.w.t. Pipeline connection 6 in. and 8 in. Receiving rate 2,000 t.p.h. LPG loading rate 2,000 t.p.h. depending on grade and condition. Fresh water available from jetty, fuel by barge. Stores by barge or trucks. (Jetty not accessible to trucks). Dirty ballast by barge.

Mobil: 2 jetties, 1 for vessel of 30,000 tons and another for vessel of 80,000 tons. Max. LOA 255 m., max. draft 13.7 m. Pipeline connections 10 in. and 12 in.

The receiving rate for crude oil is 4,000 cu.m./hr. The loading rate varies from 400–1,900 cu.m/hr. depending on grade.

Fresh water available from jetty. Fuel available, pipeline 8 in. Facilities available for dirty ballast if vessel to load at berth. Max. capacity 10,000 tons. Stores by barge or truck (Jetty not accessible to trucks).

Van Ommeren: 2 jetties, max. LOA 250 m., max. draft 10.5 m. Pipeline connections 6 in. – 12 in.

Receiving rate, up to 2,000 t.p.h. depending on grade and back pressure, if any. The loading rate is about 1,000 t.p.h. depending on grade.

Fresh water available by barge. Fuel available by barge. Stores mainly by truck (Jetties not accessible to trucks).

Comos: Two jetties, max. LOA 300 m., max. draft 12.5 m. Pipeline connections 8 in. and 12 in. Four jetties available for seagoing vessels and barges up to a max. draft 14 ft. 9 in.

The receiving capacity is about 2,000 t.p.h. and loading rate up to about 1,000 t.p.h.

Fresh water available by barge. Fuel available by barge or pipeline. Stores by truck. There are no facilities for dirty ballast.

Smid & Hollander: 2 berths for receiving crude oil, max. LOA 245 m., max. draft 12.5 m. Fuel available at berth. Fresh water available by barge. Stores by truck (Jetty not accessible to trucks). There are no dirty ballast facilities.

Noord Europees Wijnopslagbedrijf B.V.: One jetty, max. draft 41 ft. For wines, fruit juice and alcohol. Fresh water and fuel available by barge. Stores by truck.

TTS: Located in Petroleumhaven. Max. LOA 170 m., max. draft 10 m. Fresh water and fuel available by barge. No dirty ballast facilities.

De Humber: Located in Petroleumhaven. Max LOA 150 m., max. draft 10.0 m. Fresh water and fuel available by barge. No dirty ballast facilities.

G.E.Plastics: Located in Hornhaven. Max. LOA 100 m., max. draft 5.50 m. Fresh water and fuel available by barge. No dirty ballast facilities.

Schuurman: Located in Usselincxhaven. Max. LOA 180 m., max. draft 11.30 m. Receives molasses at up to 1,000 t.p.h. Fresh water and fuel available by barge. No dirty ballast facilities.

TCA (Tank Cleaning Amsterdam): Located at Petroleumhaven. 2 berths available for 100,000 d.w.t. and 30,000 d.w.t. vessels (See "Services").

DENSITY: Amsterdam is not a tidal port. The water is brackish to fresh.

FRESH WATER: Drinking and boiler water can be supplied by barge, or if connection available, from shore. Price depends on quantity ordered.

FUEL: All grades of fuel are available and delivered mainly by barge. Advance notice 48 hours.

FIRE PRECAUTIONS: No repair work to be carried out to tankers without permission of Harbour Authorities. Usual non-smoking precautions, etc.

CONSULS: In Amsterdam only. Many countries represented in The Hague and Rotterdam.

C = Consul. C.G. = Consul-General.

Consulates and Embassies: Argentina (C.G.), Austria (C.G.), Bangladesh (C.), Belgium (C.), Benin (C.), Bolivia (C.), Brazil (C.), Central African Republic (C.), Chile (C.G.), Colombia (C.G.), Cyprus(C.), Czech Republic (C.), Denmark (C.G.), Ecuador (C.G.), Finland (C.G.), France (C.G.), Germany (C.G.), Ghana (C.G.), Great Britain (C.G.), Greece (C.), Haiti (C.), Iceland (C.G.), Italy (C.G.), Ivory Coast (C.), Jamaica (C.), Japan (C.G.), Luxembourg (C.), Malawi (C.), Mauritius (C.), Mexico (C.), Monaco (C.G.), Morocco (C.G.), Nepal (C.), Norway (C.G.), Panama (C.G.), Peru (C.G.), Philippines (C.G.), Senegal (C.), Spain (C.G.), Surinam (C.G.), Sweden (C.), Switzerland (C.G.), Thailand (C.), Togo (C.), Uganda (C.), U.S.A. (C.G.).

GANGWAY/DECK WATCHMEN: Not required. Dependent on commodity of cargo.

OPENING/CLOSING HATCHES: Liner vessels by crew or by stevedores, payable per man per hour. Tramp vessels as per Charter Party.

CERTIFICATES:

Ship's Register.

Usual Cargo Certificate.

Safety Radio.

Safety Equipment Certificate.

Crew Roll.

All usual certificates required for navigation.

REPAIRS: All types of deck and engine repairs are possible including gas-freeing and tank-cleaning.

DRY DOCKS: Ship and engine repairs. Maintenance, survey, damage repairs, lengthenings, conversions, voyage repairs to vessels lying at berths from Amsterdam to Ymuiden. Repair, maintenance and construction of offshore equipment.

At the site of Shipdock Amsterdam B.V. dry docks are available capable of taking vessels up to 70,000 d.w.t.

Maximum sizes of vessels to be dry docked.

Graving docks	Length×Breadth×Depth (in feet)	Dock capacity in D.W.
No. 1	439× 63 ×16.1	10,000
No. 2	518× 69.5×19.0	18,000
No. 3	639× 86 ×26.6	32,000
No. 4	803×117 ×24.3	85,000

Total quay length 5,500 ft.

Equipped with 9 cranes up to 60 tons. Floating crane up to 300 tons available.

Oranjewerf B.V.:

Floating Docks	*Length* (ft.)	*Breadth* (ft.)	*Depth on sill* (ft.)	*Lifting capacity* (tons)
1 floating dock	426	88	18	4,000
1 Transverse slipway	328	115	11	3,000

SURVEYORS: Many Classification Societies and cargo surveyors available.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per man or equivalent of tobacco or cigars. Wine and/or Spirits: 5 litres of wine per man. Spirits: total 5 litres for the whole ship.

CARGO GEAR: Usual cargo certificate.

REPATRIATION: Facilities for repatriation of crew to any destination are available.

AIRPORT: Distance to Schiphol Airport (served by regular airlines) 15 km.

TIME: GMT plus 1 hour. Summer time GMT plus 2 hours.

HOLIDAYS: New Year's Day; Good Friday; Easter Sunday; Easter Monday; Queen's Birthday (April 30th); Ascension Day; National Liberation Day (May 5th); Whit Sunday; Whit Monday; Christmas Day and Boxing Day.

Cargo can be worked during these days subject to labour being available at premium rates.

POLICE/AMBULANCE/FIRE: Police 222222; Ambulance 555555; Fire 212121.

SERVICES: Compass adjusting/direction finder calibration, representatives of all leading radio installations, radar and other nautical instruments available.

Tanker Cleaning Amsterdam B.V.: The largest jetty can accommodate vessels up to 270 m. in length, 11.0 m. draft, and has a depth of 33 ft. alongside the berth to hydraulically test cargo tanks.

2 jetties are available for smaller tankers up to 260 ft. and 600 ft. in length, and have a water depth alongside of 16 ft. and 18 ft. respectively.

Cold work may be carried out in the engine room during gas freeing operations in the cargo tanks subject to prior consultation and approval of the management and local authorities.

Tank storage capacity of 27,000 tons.

Barges are available for taking slops or contaminated oil.

Specialised equipment for alongside can be supplied for taking oil-spillages.

TELEPHONES: Telephone connections on board are only possible on certain quays (passenger ships). It is possible to rent portable mobile phones.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Not needed.

GARBAGE DISPOSAL: Can be arranged through ship's agent.

WASTE OIL DISPOSAL: A waste oil facility, operated by TCA Milieutechniek, Tanker Cleaning Amsterdam BV, 48 Petroleumhavenweg, 1041 AC Amsterdam. Tel: 020-130225/115773. Fax: 020-118723. The facility is situated on the South bank of the Noordzeekanaal, near Amsterdam. The company offers a vast range of services, details of which can be obtained direct from them.

SEAMAN'S CLUBS: Seamen's Welfare of Amsterdam is located at 14 Coenhavenweg, Havens West in Amsterdam. Tel: 020-6880574.

The Seaman's Club works in close cooperation with the Apostleship of the Sea and Deutsches Seemannsheim. Seamen's Welfare offers table tennis, billiards, a shop, television, telephone service, a bar and information about Amsterdam. It also organises excursions, football matches and other entertainment.

The German Seaman's Home (Deutsches Seemannsheim) is located at 733 Keizersgracht. Tel: 020-6220842.

It is possible to stay overnight at this club which also offers a wide range of services and information for the seaman, including arrival times and berthing places of ships, various magazines and newspapers, information about transportation and cultural and tourist attractions.

Churches: The Apostleship of the Sea works in close cooperation with the Seamen's Welfare Center. For assistance, conversation or religious services, Loodskotterhof 3. Tel: 020-6333537. Mass can be celebrated onboard.

The Church of England is located at 42 Groenburgwal, services every Sunday at 1130 hrs. and 1830 hrs. Tel: 020-6248877.

The English Reformed Church is located at 48 Begijnhof, services every Sunday at 1030 hrs. Tel: 020-6249665.

Deutsche Evangelische Gemeinde is located at 44 J.J.Viottastraat, services every Sunday at 1030 hrs. Tel: 020-6732522.

Roman Catholic Services are held at the Catholic Center for foreigners, 35 Begijnhof, in English every Sunday at 1200 hrs. and in French on Tuesday at 1100 hrs. For information about other languages and nationalities call Tel: 020-6258853.

CURRENCY: Dutch Guilder (Fl).

DELAYS: Usually no congestion.

AUTHORITY: Gemeentelijk Havenbedrijf Amsterdam. (Port Management of Amsterdam), De Ruyterkade, 7, 1013 AA Amsterdam. *Tel:* 20-5238600. *FAX:* 20-6209821. *Contact:* G.C.G. van den Heuvel, Executive Director. Captain C. Oudendijk, Harbour Master (Tel: 20-6221515).

DELFZIJL: 53.20 N. 06.56 E. **(See Plan)**

LOCATION: On the estuary of the River Ems, opposite Emden.

DOCUMENTS: See "Rotterdam".

PILOTAGE: Pilot boats normally cruise at Wester-Ems Buoy. During bad weather they withdraw into estuary, but never further than Borkum Roads. Pilot boats listen on Channel 6 and 16 and Pilot Office on Channel 14 VHF; distance from pilot station to Delfzijl 36 miles. Pilot service compulsory for all vessels with a length over 60 m. Foreign vessels may call Pilot on 2182 kHz. Traffic between the cutter and the vessel will be held on 1657 kHz. Tel: 05960-14988. Telex: 53785.

Approaching vessels from sea should inform the Pilot Commissioner of their ETA in M.E.T. with a notice at least 12 hours in advance via a coastal radio station; the pilot cutter may be informed via VHF at least 4 hours in advance.

The ETA message should contain the following details: *(a)* ETA Pilot Westereems (time in M.E.T. in a group of 4 figures); *(b)* Draft; *(c)* Port of destination; *(d)* Name, Call Sign and Gross Tonnage.

Departing vessels should apply for a Pilot at least 1 hour before ETD; the request should be made to the Office of the Inspector of Pilotage.

Pilotage from Delfzijl to Emden is compulsory.

Boatman Service: Seagoing vessels with a length overall over 40 m. are required to use boatmen for mooring or unmooring operations, unless they use their own crew. Assistance of boatmen has to be applied for by the Master and/or Pilot at least one hour before arrival or departure at the berth via Delfzijl Port Control on VHF Channel 14.

ANCHORAGE: Vessels up to 4,000 tons d.w.t., which for some reason have to anchor outside the piers can do this East of the harbour entrance near Oterdum. Anchorage is situated within the following area: a line connecting the Buoys 53/PS-55-57 and PS2-BW28. Larger vessels should seek an anchorage in the Doekegat. There is no anchorage inside the harbour.

ENTRANCE: The harbour entrance lies opposite the former village of Oterdum. The entrance extends to reach the deep water of the Bocht van Watum, and lies opposite the dredged channel between the Bocht van Watum and the Oostfriese Gaatje near Paapsand Sud.

The harbour entrance has an initial depth of N.A.P. −10 m., and a bottom width of 208 m. The harbour channel has the same depth, and a width of 100 m.

Depths: All depths are indicated in relation to N.A.P. LLWS at Delfzijl lies 2.03 m. below N.A.P. (Normal Amsterdam Level).

Tides: The range at Springs is 3.26 m. and at Neaps 2.59 m. Tidal movement is diurnal with an average range of 2.99 m.

MAX. SIZE: The harbour entrance has a depth of 8 m. at LLWS. Vessels drawing up to 9.0 m. can enter under normal HW circumstances; a keel clearance of 10% of the draft will be maintained. Masters of vessels with large draft are recommended to contact the Port Authority in good time with regard to the water level to be expected near Paapsand-Sud and in the Zeehavenkanaal. In the harbour "always afloat" can be guaranteed along the entire length of the Handelskade West for vessels with a draft up to 8.7 m. See "Depths" above.

TUGS: 4 tugs up to 32 tons bollard pull available. Additional tugs can arrive within 3 hours from Emden.

RADIO: Cable to Agents via Radio Scheveningen (PCH) on VHF Channel 27.

VHF: The Pilot Office at Delfzijl and Eemshaven is equipped with VHF Channel 14. The station is constantly manned 24 hours a day.

The Port Office is working on Channel 14 for general information and Channel 66 for vessels sailing in the VTS area. All movements should be reported to the VTS Operator.

The Eemskanaal – Lockmaster's Office is equipped with a VHF installation, Channel 11, which is constantly manned from Monday 0000 hrs. till Saturday 2400 hrs.

For bridge passage of "Weiwerderbrug", call "Sea Locks Delfzijl" on VHF Channel 11.

"Heemskesbrug": For bridge passage call Port Office Delfzijl, Channel 14 (1 hour's notice).

RADAR: An integrated German/Dutch radar chain has been installed along the River Eems. The chain comprises the radar stations "Borkum" (German), "Oudeschip" (Dutch), "Emden" (German) and "Wybelsum" (German). The coordination of the stations has been centralised at Emden.

In the ports of Delfzijl and Eemshaven, radar assistance can be given from the Harbour Co-Ordination Centre "Eemsmanding" and stations "Delfzijl Radar" and "Eemshaven Radar".

Radar assistance can be given when visibility decreases to a distance less than 2,000 m. The radar stations are working on a regular basis. Guidance and assistance can be given according to the table.

Station	*Area*	*VHF Channel*
"Borkum Radar"	River Eems from Westereems Buoys 1/2 or Huibertgat Buoys H1/H2 to Buoy 33	18
"Knock Radar"	River Eems from Buoy 33 to entrance Port of Delfzijl Buoys 56/57	20
"Delfzijl Radar"	Port entrance to quays or locks.	66
"Wybelsum Radar"	River Eems from Buoys 56/57 to entrance Port of Emden	21
"Eemshaven Radar"	Port entrance to quays (only position information).	19

BRIDGES: Bridge to the Damsterhaven may always be worked. The Weiwerderbrug to the Oosterhornhaven will be handled from Monday to Saturday. On Sunday bridge may be opened on special request at the Sea Locks Office.

BERTHING: The Outer Harbour is divided into 3 communicating basins: Handelshaven, Balkenhaven and Zeehavenkanaal.

Handelshaven, in the Western part of the Outer Harbour, has a deepwater quay, 570 m. long, with a depth of 11 m. alongside; A floating jetty of 320 m. length in a depth of 11 m. also jetties 110 m. and 130 m. in length, with a depth of 5.0 m. alongside.

In the Balkenhaven, East of Handelshaven, a new quay is under construction. Until it is ready, no traffic is allowed in the area.

Zeehavenkanaal is the Eastern part of the Outer Harbour and is being developed as a deep-sea harbour; it has a depth of 10.0 m. – 10.5 m. There are several private mooring facilities in the Zeehavenkanaal, from West to East:

a. Private quay of Wagenborg Terminal B.V. Length of quay 110 m. 1×35 ton crane. Depth 7.0 m.;

b. Private jetty of the Nedalco Factory. Tankers up to 25,000 d.w.t., LOA 200 m. and draft 9.0 m. can be accommodated. Loading capacity 250 t.p.h.; discharging capacity 350 t.p.h.;

c. Private jetty of N.A.M. Tankers up to 6,000 d.w.t. loading condensate can be handled. Vessels berth starboard side alongside. Depth alongside 9.5 m.;

d. Private jetty of AKZO is equipped with a loading station with a loading capacity of 1,200 tons salt/hour. Ships up to 35,000 d.w.t. can be accommodated here; depth alongside 11 m.; vessels berth starboard side alongside.

e. Private jetty of the Methanol Chemie Nederland (M.C.N.) equipped with a loading station with a loading capacity of 500 tons of methanol per hour. Tankers up to 200 m. LOA accepted. Vessels berth starboard side alongside. Depth 10.0 m.;

f. Private jetty of Aluminium Factory equipped with 1 crane and is able to accommodate ships up to 30,000 d.w.t., LOA 200 m. and draft 9.0 m. Discharging capacity 300 t.p.h.

The Oosterhornhaven behind the dyke is a basin with a total length of 3,100 m. and a width of 60 m.

Navigating Oosterhornhaven is prohibited for vessels having a LOA exceeding 75 m. and/or having a maximum beam exceeding 12.50 m. and or having a draft exceeding 4.50 m. or having a height of over 8.0 m., unless a special permission is obtained from the Sea Locks, subject to certain conditions.

Amongst others there are mooring facilities located in this canal alongside the yard of Azko, Methanol Chemie, Dow Benelux, Norgips and ESD, equipped with loading installation and a tanker jetty of North Refining.

The Eemskanaal:

Several private mooring facilities are located here. These are the following:

Name	*Type*	*Suitable for*
Jonker's Terminal	Potatoflour, bulk term	Coasters
Aceco	Grain elevator	Inland vessels/Coasters
Terminal Delfzijl	Timber Terminal	Coasters
North Sea Petroleum	Oil storage	Inland vessels
O.M.D.	Oil storage	Inland vessels/Coasters
Eemsmond	Cement factory	Inland vessels/Coasters
Mulder/Marne	Grain elevator	Coasters
Cebo Holland	Mud/Cement Storage	Inland vessels/Coasters
Betoncentrale Eemsmond b.v.	Concrete mortar plant	Inland vessels/Coasters

The Sea Locks:

The link between the Outer Harbour and the Eemskanaal and also the Oosterhornhaven of the port area is formed by the provincial sea locks. Sea-going vessels up to 6,000 tons d.w.t. with a beam of 16 m., a length of 120 m., and a draft of up to 5 m. can use these locks. As this will generally apply to vessels in ballast, the locks for this size of vessel are only of importance for the Groningen Shipyards.

For loaded vessels, the limit lies between 2,000 and 2,200 d.w.t. In the Outer Harbour of the locks sufficient berths have been provided for vessels waiting to pass through the locks.

Dimensions of Locks:

The Western (small) Lock has a length of 123 m. at falling tide and 81 m. at rising tide, a width of 7 m., a depth of sill outside 4.2 m. inside 2.4 m.; across each lock head lies a bascule bridge. The Eastern (large) Lock has a length of 120 m., a width of 16 m., depth of sill 5.4 m.; across each lock head lies a drawbridge. The opening times of the locks are continuous on weekdays.

Sheds and Warehouses:

There are several sheds and warehouses (total capacity: 3,250 sq.m.); also open storage. Grain silo with a storage capacity of 2,000 tons loose and 500 tons in bags. Also several private sheds, warehouses and grain silos.

CRANES: There are 6 shore cranes at Handelskade West with capacities up to 30 tons for handling general cargoes and bulk commodities, a floating 60 ton crane and mobile cranes.

STEVEDORES: *Normal Working Hours:*

Morning shift	0800 – 1200
Afternoon Shift	1230 – 1600
Evening Shift	1630 – 2030
Night Shift	2100 – 0030

Work on Saturdays and Sundays: Work on Saturdays and Sundays can be arranged in the same manner as this is done in the ports of Rotterdam and Amsterdam, *viz.* in consultation with the stevedores.

DENSITY: Ranging between 1012 and 1018, depending on the tide and the season.

FRESH WATER: Water obtainable alongside the quays or can be delivered by a motor tanker, capacity 20 t.p.h.

FUEL: Fuels in limited quantities for coasters are always available. For bunkering of larger vessels, arrangements should be made in advance.

CONSULS:

At Delfzijl		*At Groningen*	
Denmark	Tel: 05960-15820	Belgium	Tel: 050-141555
Finland	Tel: 05960-16016	France	Tel: 050-345322
Norway	Tel: 05960-15820		

REPAIRS: Most engine and deck repairs can be carried out by a local shipyard.

DRY DOCKS: At the Eemskanaal at the inner side of the locks a dockyard for ships up to 3,000 tonnes d.w.t. and a draft not exceeding 32 dm. is available.

In the Southern part of the Handelshaven there are 2 floating docks. Ships with max. sizes of length 125.0 m.; breadth 19.0 m. and draft 7.2 m. can be accommodated in the dock on the East side. Lifting capacity of the dock is 5,000 tonnes.

The dock on the West side can accommodate ships of 162 m. LOA, 21.0 m. beam and 8.0 m. draft. Lifting capacity 6,000 tonnes.

For larger vessels, dry-docking facilities exist in the nearby Port of Emden (Germany).

GANGWAY/DECK WATCHMEN: According to Port Regulations, Master has to keep watchmen on board.

AIRPORT: Eelde (Groningen).

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES: The International Tonnage Certificate should be shown to Harbour Master on first call every year.

HEALTH, MEDICAL ATTENDANCE, HOLIDAYS, LOCAL TIME, CUSTOMS ALLOWANCES: See "Rotterdam".

GARBAGE DISPOSAL: A special collection service is not available. Garbage containers are situated on the quay, free of charge.

WASTE OIL DISPOSAL: In the Netherlands, port authorities are responsible for the provision of reception facilities in their ports.

The Port Authority of Delfzijl/Eemshaven has appointed "Eems Milieutechniek BV" (EMT) as the port reception facility for Delfzijl and Eemshaven. EMT, in which Tanker Cleaning Amsterdam BV, Niestern Sander BV (Delfzijl) and North Sea Petroleum (Groningen) participate, collects and processes oily residues delivered to the bilge boat and/or vacuum lorry.

For further information please contact: Eems Milieutechniek BV, Visserijweg 10, 9936 HB Farmsum, Tel: 05960 – 18803, Fax: 05960 – 18796.

SEAMAN'S CLUBS: None.
CURRENCY: Dutch Guilder (Fl).
REGULATIONS: *Regulations for Arrival and Departure of Sea-Going Vessels:*

1. The arrival of a sea-going vessel, other than vessels passing through the port, must be reported in writing by the Master, or his local representative at the Harbour Master's Office 24 hours prior to arrival;
2. The declaration of arrival must contain:
   - a. name, call sign and flag of vessel;
   - b. nature and amount of the cargo to be discharged and/or loaded;
   - c. dangerous goods, according to the IMO Code;
   - d. last port of call;
   - e. ETA and next port of call;
   - f. Maximum draft.
3. Declaration of Arrival must be made on the special forms to Fax No. 05960-30424 or by teleprinter (53299 Hsddz);
4. At least 3 hours before departure the Master, the shipping company or its local Agent must notify the Harbour Master's Office of the intended departure, stating the estimated time of departure and the destination of the vessel.

AUTHORITY: Port of Delfzijl/Eemshaven Authority, Noordersingel 1, 9934 AK Delfzijl or P.O.Box 20004, 9930 PA Delfzijl. *Tel:* 05960 – 40400. *Telex:* 53299 Hsddz. *FAX:* 05960-30424. *Contact:* A.J. Monster, Port Director. Captain R.K. Mast, Harbour Master. Captain J. Stokroos, Deputy Harbour Master.

DEN HELDER: 52.58 N. 04.47 E. (See Plan)

PILOTAGE: Not compulsory but advisable for Molengat and Schulpengat fairways.

Pilotage is compulsory East of Long. 04° 44′ E. for most classes of vessels.

ETA Reports: In order to obtain a Pilot, a request signal should be broadcast at least 6 hours before arrival at the Schulpengat/Molengat Fairway Buoy. When in range VHF Channel 12, can be used for reporting.

RESTRICTIONS: Permission for entry must be granted by the harbour office from the Naval Base Control (Tel: (02230) 56822/52770).

MAX. SIZE: Max. draft 9.5 m. The largest vessel to visit the port was 300 m. LOA with draft 7.0 m.

RADIO/VHF: Pilot service on VHF Channel 12.

Naval Base Harbour Control and Municipal Port Control on VHF Channel 14.

V.A. Moorman Bridge on VHF Channel 18.

The locks are on VHF Channel 22.

VTS: Den Helder VTS Station on VHF Channel 12, call sign "Den Helder Traffic Centre".

Vessels are obliged to report on VHF Channel 12 when:

(a) Entering or leaving the VTS area.
(b) Mooring or unmooring.
(c) Dropping or raising anchor.
(d) Passing the Moormanbrug.

TUGS: 9 private tugs available, up to 95 tonnes bollard pull.

BERTHING: The port is a supply centre for North Sea oil and gas platforms. The port also has a naval base and fishing harbour.

Industrial Harbour: For ships up to 70 m. LOA, beam 14.0 m. and draft 4.65 m.

Berths No. 39, 40, 41 and 42: Fish auction area. Accepts fishing vessels up to 50 m. LOA, beam 9.0 m. and draft 5.2 m.

Berths No. 43 – 55: Accepts vessels up to 70 m. LOA, beam 14.0 m. and draft 5.2 m.

Berths No. 36 – 38: Accepts vessels up to 120 m. LOA, beam 18.0 m. and draft 7.0 m.

Berths No. 31, 32, 34 and 35: Accepts vessels up to 100 m. LOA, beam 18.0 m. and draft 7.0 m.

CRANES: Cranes from 40 tonnes to 110 tonnes available. Larger cranes up to 300 tonnes capacity are available on request. There is also a floating crane with capacity of 100 tonnes at 10 m. and 45 tonnes at 18 m.

STEVEDORES: *Working Hours:* Port works throughout 24 hours.
MEDICAL: Hospital available nearby.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Available by barge.
CONSULS: Norway.
REPAIRS: Facilities available.
DRY DOCKS: There are 2 graving docks and 3 floating docks operated by the Navy. Diving services available.
REPATRIATION: Facilities available.
AIRPORT: Schiphol Airport is 90 km. from the port.
TIME: G.M.T. plus 1 hour in Winter and G.M.T. plus 2 hours in Summer.
SERVICES: The following services are available: Radio and compass repairs, fumigation, dirty ballast facilities, garbage collection, provisions and launch service.
AUTHORITY: Gemeente Den Helder, Dienst Economische Zaken, Postbus 36, 1780 AA Den Helder, Netherlands. *Tel:* 02230-71476. *FAX:* 02230-71475. *Contact:* F. Romeijn.

Note: Area Code changes from 02230 to 2236 in October 1995.

DORDRECHT: 51.49 N. 04.40 E. (See Plan)

LOCATION: At the junction of four important rivers, the "Merwede", which is the lower end of the Rhine and main route of all inland water traffic to Germany, France and Switzerland; the "Noord" leading to Rotterdam; the "Dordtse Kil" leading to Belgium and the "Oude Maas" giving Dordrecht its own open connection with the North Sea. Vessels up to 31 ft. can be accommodated.

Entrance: The main entrance is via Maasmond (See "Rotterdam"), Rotterdam Waterweg and Oude Maas, a distance of 26 miles above Hook of Holland, with a least depth of 32 ft. below NAP.

DOCUMENTS:

2 copies Cargo List.
2 copies Passenger List.
2 copies Stowaway List.
3 copies Crew List.
Health Certificate.
Also see "Rotterdam".

PILOTAGE: Compulsory. Vessels have to enter New Waterway at Hook of Holland and proceed to Dordrecht via this New Waterway and the River Oude Maas. Masters of vessels bound for Dordrecht should state destination in ETA message as Pilots for Dordrecht embark from pilot cutter at roads. Deep-drafted vessels may have to exchange Pilots just inside breakwaters at Hook of Holland. (See Rotterdam "Ordering a Pilot").

ANCHORAGE: At sea off Hook of Holland (See "Rotterdam"). No anchorage between entrance to New Waterway and Dordrecht.

RESTRICTIONS/MAX. SIZE: Maximum L.B.P.P. 175 m., beam 25 m., draft 31 ft. (MHW). Vessels exceeding maximum length or beam could be allowed to navigate the Oude Maas under certain conditions.

For dangerous cargoes, see "Rotterdam".

The Pilot will decide the number of tugs required for passage on the Oude Maas, usually a minimum of 3 – 4 tugs.

Vessels exceeding 135 m. LOA or 17.5 m. beam must give notice to the Harbour Co-ordination Centre (H.C.C.) before navigating the Oude Maas. (H.C.C. Tel: 010-4764855, Fax: 010-4773489, Telex: 27370 Drhcc NL.)

Notice should contain: Ship's name, call sign, nationality, g.r.t., length, beam and draft, first port of call and berth (port and berth in case of ships leaving or shifting berth), ETA in Oude Maas or time of departure if leaving/shifting berth, Agent's name.

Tides and Currents; The tides are diurnal, with a daily rise and fall of 0.80 m. The current turns about half an hour after HW and LW.

RADAR: Radar service provided by V.T.S. and Dordrecht Radar Post.

RADIO/VHF: Dordrecht on VHF Channels 4 and 19. Also see "Rotterdam".

TUGS: Tugs ordered by Pilot when entering New Waterway. Tugs normally meet vessels at Dordrecht.

BERTHING: *Harbours:* There are 6 basins for sea-going vessels.

Wilhelmina Harbour: Has a water area of 52 acres, can accommodate ocean-going vessels with a draft of about 31 ft. A 300 ft. wide pier with railway connections, a spacious transit shed and an open storage site of 200,000 sq.ft. for bulk cargo has been constructed. Furthermore, at a distance of 80 ft. from this pier, there is a jetty 900 ft. long and 31 ft. wide with a depth alongside of about 31 ft. below NAP. Rivercraft can moor either directly alongside the large vessels or in the basin between pier and jetty. The basin has a depth varying between 13 ft. and 20 ft. below NAP. There are 9 mooring buoys.

Juliana Harbour: This harbour with its 3 basins has a water area of 67.5 acres and a depth of about 29 ft. below NAP.

Basin No. 1 has a depth up to 27 ft. below NAP and is used for handling chemicals and mineral oils. Gebr. Broere b.v. has a large tank storage installation with a capacity of 250,000 cu.m. The terminal has 7 jetties of which 6 are used for fast service to ocean-going tankers or river tankers and 1 jetty is used for river tankers only. The location is excellent for their distribution via river, rail and road to inland destinations.

Basin No. 2 has a depth up to 29 ft. In this basin there are 3 smaller companies handling gasoline, petrol and lubricating oil. Silo Dordrecht, also situated in this basin, is a company which mainly handles agricultural products and sometimes general cargo for which they have 2 sheds with a capacity of 30,000 sq.ft. A company called Trans Terminal Dordrecht, specialising in handling fertilisers, has an open storage area of 110,000 sq.ft. and two sheds with a capacity of 35,000 sq.ft. are also located here.

Basin No. 3 has a depth up to 17 ft., this will be 26 ft. in the near future. There are 2 sand/gravel jetties in this basin and one for blasting grit. The company which handles this blasting grit is called Nietim.

The Mallegat: The Mallegat has 2 dock basins, and is enclosed by 2 dams. This has added about 40 acres to the dock area in Dordrecht.

The Northern Basin of the Mallegat has been developed as an extension of the Wilhelmina Dock, and has a 900 ft. long pier and an open storage area of 50,000 sq.ft. The depth of this basin is now 26 ft. below Normal Amsterdam Level.

The Southern Basin of the Mallegat has been under development on the Western side since the release of the Krabbepolder. A number of companies have now located here, including Guis Funderingstechniek B.V., Chem Care and Volker Stevin Materieel (VSM).

Principal Riverside Quays:	*Length*	*Depth – NAP*
Buitenkalkhaven	1,000 ft.	12 ft.
Hooikade	250 ft.	11 ft.
Groothoofd		
Passenger Landing Pier	290 ft.	15 ft.
Merwekade	1,000 ft.	16 ft.
Handelskade	450 ft.	16 ft.

Coasters can be accommodated at the Handelskade, Buitenkalkhaven and 2nd and 3rd Merwedehaven. For clearance of inward and outward bound coasters, the lower part of the Handelskade has been reconstructed. Mooring free of harbour dues is restricted to the time needed for clearance only.

Principal Harbours – Inland Vessels and Coasters:

	Length	*Width*	*Depth – NAP*
Binnenkalkhaven	800 ft.	230 ft.	11 ft.
Bomhaven	265 ft.	165 ft.	10 ft.
Wolwevershaven	1,000 ft.	165 ft.	8 ft.
Riedijkshaven	650 ft.	120 ft.	10 ft.
1st Merwedehaven	2,000 ft.	400 ft.	10 ft.
2nd Merwedehaven	2,000 ft.	600 ft.	16.5 ft.
3rd Merwedehaven	2,000 ft.	600 ft.	15 ft.

CRANES: 2 Transporting bridges 15 tons each, 2 Portal cranes 12.5 tons each, 1 Portal crane 7 tons, 1 cargo crane 5 tons capacity.

BRIDGES: Bridges across the River Oude Maas are opened day and night. Sea traffic has preference over shore traffic.

Immediately above its confluence into Nieuwe Maas, the Oude Maas is spanned by 2 lifting bridges:

1. The Botlek Bridge with a free width of 53.80 m.
2. The Spijkenisse Bridge with a free width of 80.00 m.

TANKERS: Oil installation of Gebr. Broere N.V. has 7 tanker berths. Max. draft 9.0 m. There are other tanker berths for small tankers. No slop (residue) storage facilities.

DENSITY: Fresh water.

REPAIRS: B.V. Scheepswerf en Machinefabriek "De Biesbosch" Maasstraat 24, 3313 CR Dordrecht, Tel: 078-14 70 77, Telex: 29494 Biesb. NL.

Machinefabriek L. Straatman B.V. Kuipershaven 61, 3311 AM Dordrecht. Tel: 078-14 24 22.

B.V. Scheepswerf Hoebee, Merwedestraat 56, 3313 CS Dordrecht. Tel: 078-13 00 88.

Machinefabriek C.P. Bolier B.V., Grevelingenstraat 21, 3313 LB Dordrecht. Tel: 078-16 41 11, Telex: 29329 Bomak. N.L.

DRY DOCKS: Small dry dock available.

STEVEDORES: Working hours: 0730 hrs. on Monday until 1900 hrs. on Saturday.

FRESH WATER: At oil installations fresh water can be supplied from shore or supply by waterboat. Fresh water can be ordered from the Harbour Master's Office.

FUEL: Available by barge, capacity 100 tons – 1,400 tons.

CONSULS: Denmark Tel: 132177, Norway Tel: 132177. Other consulates at Rotterdam at 20 km. distance.

POLICE/AMBULANCE/FIRE: Tel. Police 339911; Ambulance and Fire 133333. General Emergency 06-11.

AIRPORT: Rotterdam and Amsterdam airports at a distance of 25 km. and 90 km. respectively served by regular airlines.

PILOT CUTTERS, HEALTH, MEDICAL ATTENDANCE, BUNKERS, CUSTOMS ALLOWANCES: See "Rotterdam".

HOLIDAYS: New Year's Day, Easter Day, H.M. Birthday (30th April), Ascension Day, Whit Sunday, Christmas Day.

TIME: GMT plus 1 hour. Summer plus 2 hours.

GARBAGE DISPOSAL: General Information: Dutch port authorities are responsible for the provision of reception facilities in their ports. They publish who have been designated to receive waste from ships in their port. It is forbidden to deliver waste to persons who have no official designation as a port reception facility.

Fees: The costs incurred as a result of the delivery and further processing of waste are to be paid by the ship to the receiving company.

Advance notice requirements: In Dutch ports, the ship's need for reception facilities must be reported 24 hours in advance.

Contact Port Authority for details.

WASTE OIL DISPOSAL: See "Garbage Disposal".

SEAMAN'S CLUBS: See "Rotterdam".

CURRENCY: Dutch Guilders.

AUTHORITY: Havendienst Dordrecht, Merdekade 56, 3311 TH Dordrecht, Netherlands. *Tel:* 078-134211. *Telex:* 29492 Haven nl. *FAX:* 078-312141. *Contact:* J. Maat, Harbour Master.

EEMSHAVEN: 53.27 N. 06.50 E. (See Plan)

LOCATION: On the Western shore of the River Eems, about 15 km. N.W. of Delfzijl.

DOCUMENTS: See "Rotterdam".

PILOTAGE: See "Delfzijl".

ANCHORAGE: Near the Western Mole of the Eemshaven is an anchorage with a depth of about 16 m.

RESTRICTIONS: The entrance channel Doekegatkanaal has a depth of 11.5 m. thus enabling ships with draft up to about 10.5 m. to enter at HW.

Tides: The range at Springs is 2.78 m. and at Neaps 2.13 m. Tidal movement is diurnal with an average range of 2.49 m. (all approx.).

Depths: All depths are indicated in relation to N.A.P. LLWS at Eemshaven lies 1.84 m. below N.A.P. (Normal Amsterdam Level).

RADIO/TUGS/RADAR: See "Delfzijl".

VHF: Channel 19: "Eemshaven Radar" – A VTS is operational in the Eemshaven. All ship movements should be reported to the VTS-Operator.

Channel 14: Information channel and for ordering tugs, linesmen and pilot and weather information, etc.

BERTHING: The harbour is divided into 4 communicating basins:

Doekegatkanaal: Has a width at the entrance of 325 m. and a bottom width of 200 m. over the rest of the channel. At the end of the Doekegatkanaal is a turning basin with a diameter of 500 m. and a depth of 11.0 m.

Wilhelminahaven: East of the turning basin is a special basin for tankers with a depth of up to 15 m. and a bottom width of 200 m. This basin has a length of 600 m. There are 5 mooring bollards and 4 mooring buoys with SWL up to 300 tons for several berthing possibilities.

Julianahaven: Located West of the turning basin. This basin has a length of 1,200 m. and a width of 250 m. to 300 m. ultimately. The depth of this basin varies between 12.0 m. and 14.0 m.

To the South of this basin a quay has been constructed with a length of 1,150 m. and a width of 300 m. This private quay is operated by three stevedoring firms:

1. Transit Centre Eemshaven: Quay length 469 m. 6 electrical cranes up to 20 tons lifting capacity; storage area 100,000 sq.m.; 35,000 sq.m. shed space. Handling general cargo and containers. The Eemshaven Sugar Terminal is located on the premises of and is managed by Transit Centre Eemshaven. A bulk sugar silo of 136 m. × 65 m. × 33 m., with storage capacity of 100,000 tons. Reception possible by bulk rail wagon, bulk road truck and bulk barge.

Loading into sea-going vessels is via 2 spiral shiploaders (120 t.p.h.) or by a bulk-loader (750 t.p.h.).

2. Terminal Eemshaven: Quay length 554 m.; 3 electrical spiralveyors; 2 electrical cranes of 5 ton lifting capacity; several mobile cranes up to 200 tons lifting capacity. Handling general cargo, containers and Ro/Ro traffic. The Ro/Ro ramp has a capacity of 92 tons and a ramp width of 7.0 m.

General cargo shed of 6,500 sq.m.; air-conditioned cold store, divided into 12 boxes with a total capacity of 13,500 pallets. Each box can be cooled down to temperatures from −2° C. to 14° C. for all kinds of fruit.

3. Sealane Coldstorage B.V.: Quay length: 110 m. A multi-temperature public bonded cold store, ranging from +14°C to −30°C, with 6 different rooms and a total capacity of 75,000 cu.m., is owned and operated by Sealane Coldstorage B.V. The cold storage is classed with Lloyd's Register: Lloyd's RSC 10/80 URSI. The cold store is located on the quay, with direct access to the vessel's side.

There is a temperature controlled airlock of 15,000 cu.m. with dock shelters for loading trucks and access to a railway loading station inside the store.

On the N.E. side of this basin, a new bulk terminal operated by the Port Authority has been built. Length 200 m., depth 15.0 m. N.A.P.

Emmahaven: Has been constructed South of the quay and West of the swinging basin. This basin with a length of 600 m. and a width of 130 m. has been dredged to 10 m.

In the N.W. corner a Ro/Ro facility is operated by A. G. Ems-Nederland b.v., serving the island of Borkum and can also be used for International Ro/Ro traffic. For trailers and cars, a fenced parking area is available.

A floating jetty for inland ships with a length of 225 m. has been constructed on the S.E. side, and is operated by the Port Authority.

On the S.W. corner, a floating pontoon has been established for sectional building of vessels.

STEVEDORES: See "Delfzijl".

DENSITY: Between 1018 and 1021, depending on tide.

FRESH WATER: Water can be delivered by private companies on the quays. It is also available at the floating jetty.

FUEL: Supply should be arranged in advance.

AIRPORT: Eelde (Groningen).

GANGWAY/CERTIFICATES: See "Delfzijl".

SUPPLIES: Fuel oil and provisions should be arranged in advance.

REGULATIONS: See "Delfzijl".

GARBAGE DISPOSAL: A special collection service is not available. Garbage containers are provided on the quay.

WASTE OIL DISPOSAL: In the Netherlands, port authorities are responsible for the provision of reception facilities in their ports.

The Port Authority of Delfzijl/Eemshaven has appointed "Eems Milieutechniek BV" (EMT) as the sole port reception facility for Delfzijl and Eemshaven. EMT, in which Tanker Cleaning Amsterdam BV, Niestern Sander BV (Delfzijl) and North Sea Petroleum (Groningen) participate, collects and processes oily residues delivered to the bilge boat and/or vacuum lorry.

For further information please contact: Eems Milieutechniek BV, Visserijweg 10, 9936 HB Farmsum. Tel: 05960 – 18803. Fax: 05960 – 18796.

SEAMAN'S CLUBS: None.

CURRENCY: Dutch Guilders (Fl).

AUTHORITY: Port of Delfzijl/Eemshaven Authority, Noordersingel 1, 9934 AK Delfzijl or P.O.Box 20004, 9930 PA Delfzijl. *Tel:* 05960-40400. *Telex:* 53299 Hsddz. *FAX:* 05960-30424. *Contact:* A.J. Monster, Port Director. Captain R.K. Mast, Harbour Master. Captain J. Stokroos, Deputy Harbour Master.

FLUSHING (Vlissingen): 51.27 N. 03.35 E. (See Plan)

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Store List.
1 Personal Effect List.
Ship's Register.
1 Manifest or Bill of Lading.
Also see "Rotterdam".

APPROACHES: Approaches to the Scheldt Estuary:

	MLWS (m.)	*Rise Spring* (m.)	*Rise Neap* (m.)
South Channel:			
Wielingen	8.0	4.7	3.8
Scheur	13.9	4.7	3.8
North Channel:			
Oostgat	8.0	3.9	3.0

PILOTAGE: Position of pilot cutters in the Scheldt Estuary: Pilotage is compulsory.

Wielingen (Southern Approach) or via Scheur: Vessels approaching the Scheldt Estuary from the English Channel pass the light vessels Sandettie Banks and West Hinder. The Belgian pilot cutter *Wandelaar* is stationed near Buoy A1 at Lat. 51° 22′ N., Long. 02° 53′ E. This cutter has a black hull with a white number on her bow, a yellow funnel with black top and flies a red flag with the letter "P" in white.

A vessel bound for Flushing to discharge, bunker, load, to embark or disembark passengers or for repairs will be provided with a Dutch Pilot, who will take the vessel into harbour. Other vessels for Flushing (sheltering, awaiting orders, unplanned repairs, etc.) will be provided with a Belgian Pilot to Flushing Roads, where a Dutch Pilot comes on board to take the ship into harbour.

Oostgat (Northern Approach): Vessels approaching the Scheldt Estuary from the North can take a Pilot in the vicinity of the S.B.Z. Lightbuoy (Lat. 51° 42.3′ N., Long. 03° 14.3′ E.) where a Dutch pilot cutter is stationed, flying a blue flag with the letter "L" in white. As a rule vessels bound for Flushing are provided with a Dutch Pilot.

ETA Messages: Masters' telegrams via Scheveningen Radio, call-sign PCH, are passed on to Agents 24 hours a day, week-ends inclusive.

For this reason it is advisable that Masters communicate with Agents via Scheveningen Radio, via which station Agents also route their messages to vessels.

Vessels bound for the River Scheldt shall contact pilot stations below 6 hours prior to arrival (always advise changes of 2 hours or more) and advise the following information:

Inbound via Steenbank to Belgium port: "Pilot VTS Steenbank" via Scheveningen Radio (PCH) or Tel: 31-(0) 1184-89600. Fax: 31 (0) 1184-12321. Telex and Satcom: 37811.

Inbound via Wandelaar (A1) to Belgium port: "Pilot VTS Wandelaar" via Oostende Radio (OST) or Tel: 32- (0) 50-550801. Fax: 32- (0) 50-547400. Telex or Satcom: 81417.

Inbound to port in the Netherlands: "Pilotage Flushing" via Scheveningen Radio (PCH) or Tel: 31-(0) 1184-89600. Fax: 31-(0) 1184-12321. Telex or Satcom: 37811.

Information requested:
A Name, call sign, flag.
I Port of destination.
J ETA pilot station in UTC and name of pilot station.
O Draft in metres and centimetres.
P Cargo and IMO class.
T Agent.
U Dimensions (gross tonnage, LOA, beam).
X Miscellaneous.

Pilot cutters may be contacted on VHF Channel 64 (Steenbank) and Channel 65 (Wandelaar).

During bad weather both pilot cutters shift to Flushing Roads.

ANCHORAGE: The Roads of Flushing offer a safe and spacious anchorage with a sandy bottom. Vessels anchoring in the Roads are recommended to do so Southward of the Koopmanshaven (the Western harbour of Flushing) at not less than 0.75 miles from the Northern Coast. In this part of the Roads depths vary from 10 m. (33 ft.) to 26 m. (85 ft.).

The greatest depths and the strongest tides are encountered on the Southern part of the Roads. When lying there vessels are less exposed to the risk of collision in foggy weather etc. and are well away from vessels proceeding up and down the river, manoeuvring for the purpose of landing and/or embarking Pilots, and from ferry boats crossing between Flushing and Breskens.

At the Northern part of the Roads the tidal stream slackens gradually until HW is reached and under normal conditions of tide and wind the ebb stream is already felt along the shore from half an hour after HW until 1 hour after LW. From 1 hour after LW the flood tide sets in again and is felt until shortly after HW.

At the South side of the Roads the tidal stream is running until slightly over an hour after HW when the stream slackens and turns. 2 hours after HW the stream is running in N.W. direction gradually veering West.

A new anchorage Wielingen Noord, North of the line of the lightbuoys W6 and W10, is marked by yellow conical buoys. It is strongly recommended that vessels carrying dangerous cargoes anchor there, exceptional circumstances excepted and weather permitting.

MAX. SIZE: *Flushing East Harbour:* Entrance 12.5 m. at MLLWS. A depth of 11.3 m. (length 550 m.) and 13.3 m. (length 350 m.) alongside the quay.

Max. draft at Buoys 12.5 m. (2 berths).

Outer Harbour: West side, max. draft 9.5 m.

Inner Docks: Max. depth 7.3 m.

Total: Max. length 280 m., max. draft 15 m. (S.W.), max. d.w.t., 100,000 tons. However, draft is controlled by the depth in the approach channels.

HEALTH: No certficates required. In event of any disease or fever contact Agents.

RADIO: All messages to Agents via Scheveningen Radio.

Flushing Radio can be reached by VHF Channel 14.

VHF: Harbour tugs Channel 6. Also see "Pilotage".

TUGS: Join vessels in Flushing Roads. Vessel's lines usually used. Extra for tug lines. For contract holders 5% reduction.

BERTHING: *Outer Harbour:* West side, quay of 350 m. long, depth of water 11.5 m.. MLLWS. Quay height above sea level 2 m. at high tide and 7 m. at low tide. Opposite the West Side Quay is an oil jetty with depth of 9.5 m. alongside (LLWS). The jetty is owned by the Oil Terminal Flushing. In Northern part of Outer Harbour a landing stage with length of 360 ft. Depth at low tide 6.0 m. Depth at HW 8.8 m.

Flushing East Harbour: The Sloeharbour has a quay length of 530 m., depth 11.3 m. LWOST and 350 m., depth 13.3 m.

The Bijleveld Harbour, situated in the North West part of Flushing East Harbour has a public quay with a length of 800 m. and depth 9.0 m. LLWS on the West side and a quay with a length of 800 m. and depth 10.5 m. LLWS on the East side. The quay will be used for the transhipment of refrigerated products and steel.

The Kaloothaven Terminal, situated in the South part of Flushing East Harbour, has a quay with length of 650 m. and has a depth at LLWS alongside over 250 m. of 10.5 m. and over 400 m. of 5.0 m., and a depth of 16.5 m. with floating cranes and pontoon placed between vessel and quay. The terminal is a coal transhipment facility and can handle vessels of 150,000 d.w.t. Coal is handled by floating cranes of 25 tons capacity. The stockyard has a capacity for 600,000 tons.

Inner Docks: A double lock and sluice give access from Outer Harbour to inner docks and canal through Walcheren. Largest lock length 140 m., width 22 m., depth on still LWOST of 5.4 m.. The other lock is 65 m. long, 7.8 m. wide, and 3.0 m. deep.

STEVEDORES: Provided by N.V. Haven Van Vlissingen (Port of Flushing Limited). Tel: 01184-26000. Telex: 37837 A.

Stevedore Company – Westerschelde. Tel: 01184-60020. Telex: 37798.

Flushing Stevedoring. Tel: 72800.

MECHANISED CARGO HANDLING: Quay length 920 m. equipped with 2 portainers (65 tons capacity), suitable for handling 20 ft. up to 40 ft. containers. Straddle carriers capacity 32 tons and forklifts capacity 32 tons available.

Roll-on/Roll-off service between Flushing and Sheerness. Service twice a day. Vessels berth in the Outer Harbour at the Olau Line Terminal. At Flushing-East, Ro/Ro facilities for deep sea vessels, as well as Ro/Ro facilities for short sea Ro/Ro traffic.

LPG HANDLING FACILITIES:

Eurogas Terminal, Flushing East: The Eurogas Terminal is dedicated solely to storage and throughput of Liquefied Petroleum Gases and Chemical Gases.

Documents: Eurogas has been authorised by the Dutch Customs Authorities to prepare and complete all necessary Customs and transportation documents, which reduces waiting time to an absolute minimum.

Pilotage: In close co-operation with Eurogas, the shipping Agent and the Pilot, the Harbour Authorities control the arrival and subsequent mooring in the Quarles Harbour.

Max. Size:

				Facilities	
Vessel Size	*Length* (m.)	*Beam* (m.)	*Draft* (m.)	*Refr.*	*Press.*
Jetty 1	213	38	9.5	×	×
Jetty 2	295	44	13.5	×	×
Jetty 3	110	12	5.0	–	×
Jetty 4	110	12	5.0	–	×

The harbour has a depth of 16 m. NAP (13.50 m. LLWS) and is therefore accessible to all existing fully loaded LPG-carriers. Maximum drafts may also be dependent on the prevailing least depth in 'Het Scheur' and the near approaches to the jetties and are conditional on the agreed procedures and Port Authority requirements for the safe movement of LPG-carriers. For safety reasons loading/unloading can be stopped due to high wind forces depending on wind direction.

Berthing: Jetty 1: At which inland barges and ocean-going vessels with a max. draft of 9.5 m., overall length of max. 213 m., a max. bow to manifold distance of 115 m., a max. stern to manifold distance of 108 m. and a max. beam of 38 m. can safely reach and leave and at which such vessels can always lie safely afloat.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm can accommodate:
- max. height +14.0 m. NAP (Normaal Amsterdams Peil) which is comparable with approx. 11.5 m. above water-level at HW.
- minimum height −1.5 m. NAP which is comparable with approx. 1 m. above water-level at LW.
- range out of centre loading arm parallel to berthing line approx. 5 m.
- range out of – and perpendicular on berthing line approx. 7 m.

Jetty 2: At which inland barges and ocean going vessels with a draft of max. 13.5 m., overall length of max. 295 m., a max. bow to manifold distance of 150 m., and a max. stern to manifold distance of 150 m. and a max. beam of 44 m. can safely reach and leave and at which vessels can always lie safely afloat.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm shall be able to accommodate:
- max. height +28 m. NAP which is comparable with approx. 25.5 m. above water-level at HW.
- minimum height −1.5 m. NAP which is comparable with approx. 1 m. above water-level at LW.
- range out of centre loading arm parallel to berthing line approx. 7 m.
- range out of – and perpendicular on berthing line approx. 12 m.

Jetty 3/4: At which inland barges and coastal vessels with a draft of max. 5 m., overall length of max. 110 m., a max. bow to manifold distance of 40 m. (Jetty 3), and 55 m. (Jetty 4), a max. stern to manifold distance of 50 m. and a max. beam of 12 m. can safely reach and leave and at which vessels can always lie safely afloat.

Jetty 4 is also suitable for small coastal vessels (max. deadweight approx. 1,500 tonnes), ship size depending on manifold allocation.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm shall be able to accommodate:
- max. height +14.0 m. NAP.
- minimum height −1.5 m. NAP.
- range out of centre loading arm parallel to berthing line approx. 5 m.
- range out of – and perpendicular on berthing line approx. 6.0 m.

Discharging: Eurogas operate 24 hours a day, 7 days a week.

Eurogas and the independent surveyor check the facilities of the vessel and the quantity of the cargo before discharge commences.

Receiving Capacities at Various Jetties (all in cu.m./hr.)

	Into refrigerated tanks	*Into pressure tanks or to other jetties*
Jetty 1	1,000 (per tank)	500
Jetty 2	3,200 (per tank)	500
Jetty 3		500
Jetty 4		500

In order to minimise laytime on jetties, refrigerated propane and butane can be discharged simultaneously at Jetty 1 and 2.

Additionally, all pipelines on shore can be cooled down before the arrival of a vessel by means of separate cool-down lines. All jetties are equipped with vapour return facilities including a blower-system at Jetty 2.

Board/board transfers between all the jetties can be realised with or without the use of 2 heaters. These heaters have a capacity of 500 cu.m./hr. each, with a temperature differential of up to 47°C underall weather conditions.

Loading: 4 vessels/barges, 3 railcars and 4 road trucks can be loaded simultaneously with capacities as described below.

Railcars and road trucks are each loaded on a weighbridge. The consecutive loading of 2 products into 1 railcar/road truck can take place without disconnecting and reconnecting of loading arms and necessary shunting/shifting to another loading point.

Loading Capacities in cu.m./hr.	*Product.* *Refrig.*	*Press.*
1. From the refrigerated tanks:		
To Jetty 1 or 2 (per tank)	600	–
To Jetty 3 or 4	–	–
Via heater to pressure tank	–	500
Via heater to Jetty 1, 2, 3 and 4	–	500
2. From the pressure tanks:		
To Jetty 1, 2, 3 or 4	–	350
To each railcar loading point	–	120
To each roadtruck loading point	–	80

Storage: The terminal consists of 6 pressure tanks with a gross capacity of 3,369 cu.m. each, and 2 refrigerated tanks of 55,000 cu.m. each. Total capacity is therefore 130,000 cu.m.

The refrigerated tanks are constructed with double integrity steel inner tanks and a concrete outer wall capable of holding refrigerated product.

In the pressure tanks, chemical gases can also be stored.

Product List:

1. Refrigerated tanks: propane, butane and/or mixtures.
2. Pressure tanks: butane, isobutane, butadiene, butylene, isobutylene, cyclopropane, propane, propylene-oxide, propylene.

Products for the pressurised storage are:

Spheres 1, 2, 3, 4, 5 and 6. Butane, isobutane, butadiene, butylene, isobutylene, cyclopropane, propane, propylene-oxide. Spheres 4 and 5 also propylene.

A. Pressure tanks: Product stored in tanks 1, 2, 3 and 6 shall have a vapour pressure of less than 13.5 bar gauge at 30°C.

B. Pressure tanks: Product stored in tanks 4 and 5 shall have a vapour pressure of less than 16.5 bar gauge at 30°C.

C. Refrigerated tanks: 2% mol. max. ethane content in propane was the design basis for the refrigerated system. The tolerances on the compressors and the cooling system are the technical limitations on storage of products with higher ethane contents.

Safety: E.S.D. systems (Emergency Shut Down systems)

Activated by:

(a) Gas detection system.
(b) Loading arms limit switches.
(c) Ship's E.S.D. system.
(d) Control-room.
(e) Local push buttons.
(f) General E.S.D. pressure storage fill system.
(g) Fill shut down (overflow).
(h) Shut down sendout system.

Gas Detection System.

Sensors located at:

(a) Annular space tanks.
(b) Fan intake.
(c) Roof tanks.
(d) Relief valves' exhaustline.
(e) Area general.
(f) Process area.
(g) Boiler house.
(h) Office heating air intake.
(i) Jetties.
(j) Existing pressure storage.
(k) Generators' area.
(l) Expansion-tank water/glycol system.

Firefighting: The terminal site has been equipped with all sorts of fire-fighting apparatus like:

– 45 water guns, which can spray 1,600 litres per minute each over a distance of 70 m;

– sprinkler installations at all vital points;

– 2 separated pumping systems, to be sure of water supply under all circumstances; 1 at the harbour with 2 diesel-powered pumps with a total capacity of 2,000,000 litres water per hour, the other 65,000,000 litres at the pond which is constructed on the site.

– Eurogas has its own fire brigade, with a special fire-fighting truck which can also travel on rails. In this way every part of the terminal site and its perimeter can be reached with the greatest possible speed.

Operator: Eurogas Terminals C.V.

Office: Frankrijkweg 4, 4455 TR Nieuwdorp. Tel: 01196-12820. Telex: 55684. Fax: 01196-13444.

MEDICAL: Two hospitals available.

TANKERS: Vessels carrying over 4,400 gallons of combustible liquids with a flash point up to 21°C, or over 22,000 gallons with flash point up to 55°C require Harbour Master's permission for entry.

2 discharging berths alongside the quay. Discharge lines 3×8 in. diameter with capacity of about 2,000 t.p.h.

Total: See "Max. Size".

One jetty for tankers up to 100,000 d.w.t. and 3 jetties for barges and coasters with depth of 20 ft. and 30 ft.

Cautionary Advice: Due to adverse tidal conditions, vessels may tend to drift away from jetty during period before high tide. It is, therefore, very important that ships pay particular attention to moorings.

Connections:

Commodity	Loading arms
Fuel oil	2×12 in.
Clean products	2×10 in.
Bunkers (fuel oil only)	1× 8 in.

The two fuel oil loading arms can also be used for the discharge of crude oil. The loading arms are hydraulically operated.

Deballasting: One 12 in. and one 10 in. loading arm can also be used for the discharge of dirty ballast water in unlimited quantities at the rate of about 1,000 t.p.h.

Capacities: Discharging rate of crude oil 3,000 t.p.h. and the loading rate of fuel oil about 2,700 t.p.h.

Supplies: Water obtainable from jetty. Bunkers by barge. Stores by small vehicles max. axle load 12 tons.

DENSITY: About 1024.

FRESH WATER: Can be supplied either alongside the quay or by water boat. Possible to supply fresh water in Flushing Roads weather permitting.

FUEL: All grades obtainable from major oil companies and supplied by barge only.

Economical bunkering arrangements can be made at the sheltered anchorage Schaar van Everingen, a few miles up river from Flushing. No harbour dues. Max. draft HW Neaps 42 ft. Springs 45 ft.(S.W.).

CONSULS:

Belgium	Tel: 78892	France	Tel: 63590
Denmark	Tel: 12711	Germany	Tel: 01185-2618

REPAIRS: All repairs possible.

DRY DOCKS: Largest (Graving) Length 229 m., width 36.1 m., draft 8.5 m. (HW), 90,000 d.w.t. and 2 smaller docks.

A dry dock with 300,000 metric d.w.t. capacity is planned.

GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.

OPENING/CLOSING HATCHES: On liners by crew or stevedores, ship's option.

CERTIFICATES: On arrival, ship's register only.

CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and total on board out of bond 5 litres spirits and 100 litres wine.

CARGO GEAR: The port is equipped with modern mobile cranes, which can be used both in the outer harbour and in the inner docks, with the following capacities:

2 cranes – 30 tons
2 cranes – 25 tons
3 cranes – 12 tons
2 cranes – 10 tons
1 crane – 8 tons

Floating cranes are available with capacities of 225, 75, 40 and 8 tons.

REPATRIATION: All facilities available for crew changes; good railway connections.

AIRPORT: Rotterdam (Zestienhoven) 120 km.; Brussels (Melsbroek) 140 km.; Amsterdam (Schiphol) 180 km.

TIME: GMT plus 1 hour. Summertime, GMT plus 2 hours.

HOLIDAYS: New Year's Day (January 1st); Easter Monday; Queen's Birthday (April 30th); Ascension Day; Whit Monday; Christmas Day (December 25th); Boxing Day (December 26th).

Work can be arranged on above days, however dependent upon permission of the Docker's Inspection.

POLICE/AMBULANCE/FIRE: Police, Ambulance and Fire 06-11.

TELEPHONES: Possible to place telephones on board and for vessels berthing at the shipyard "De Schelde".

SERVICES: Compass Adjuster; Radio/radar services also calibration of the Direction Finder, Seamen's Home (Mission to Seamen); Lloyd's Sub-agents; Ship's Laundries.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Garbage container placed alongside on request by Wielemaker B.V. (Tel: 01185-2440). Charge depends on quantity.

WASTE OIL DISPOSAL: The shore reception facility is located at the ship repair yard owned by Martens B.V. (Tel: 01105-1775).

SEAMAN'S CLUBS: Missions to Seamen (The Flying Angel). Tel: 01184-67063.

AUTHORITY: Flushing Ports Authority, Engelandweg, Haven 1199, Vlissingen-Oost, P.O.Box 1056, 4388 ZH Oost-Souburg, Netherlands. *Tel:* 01184-68080. *Telex:* 37865 Haven Nl. *FAX:* 01184-67020. *Contact:* Captain J. Verkiel, Harbour Master. Captain E.A.v.d.Berg, Deputy Harbour Master.

GRONINGEN: 53.15 N. 06.34 E. (See Plan)

The port is connected with the Ems Estuary via the Eemskanaal and the lock at Delfzijl.

DOCUMENTS: See "Rotterdam".

Clearing is done at Delfzijl.

PILOTAGE: For the approach of the lock see "Delfzijl".

The length of the lock is 120 m. and the width 16 m. Depth over sill at LW 3.9 m. and at canal level 6.07 m.

On the locks Canal-Pilots are available but pilotage on the canal is not compulsory. The length of the canal is 14 miles and it has a least depth of 5.2 m. There are 4 bridges all 16 m. wide.

MAX. SIZE: Maximum size for ships passing lock and navigating canal; beam 13 m. and draft 4.5 m. (Vessels with greater beam and draft possible with permission of the Canal Authority.)

TUGS: Available at Delfzijl and Groningen.

BERTHING: *Hunzehaven:* South side 300 m. quayage, railway connected, max. draft 4.5 m., 3 grab cranes 3.5 tons.

Deense Haven: 3 mooring buoys, max. draft 4.5 m. One private grab crane on wharf, capacity 8 tons.

Eemskanaal: Private silo. Max. beam 12 m., max. draft 3.6 m., private timber yard max. beam 12 m., max. draft 3.6 m.

Van Starkenborghkanaal: Private silo. Max. beam 9.6 m., max. draft 2.9 m., private timber yard max. beam 9.6 m., max. draft 2.9 m.

CRANES: Floating sheerlegs up to 250 tons.

STEVEDORES: Available.

MECHANICAL CARGO HANDLING: Silos with equipment for bulk-handling of grain on Eemskanaal and Van Starkenborghkanaal.

MEDICAL: 3 hospitals available.

FRESH WATER: Available.

FUEL: By barge only.

CONSULS: Belgium, Tel: 138222; Norway, Tel: 189444; Spain, Tel: 137879.

REPAIRS: All repairs possible at Delfzijl.

DRY DOCKS: Transverse slipway at Delfzijl.

CERTIFICATES: On arrival, Ship's Register only.

AIRPORT: Eelde, 10 km. from Groningen, daily services to Schiphol.

HOLIDAYS: New Year's Day, Easter Monday, Queen's Birthday (30th April), Ascension Day, Whit Monday, Christmas Day, Boxing Day.

POLICE/AMBULANCE/FIRE: Police Tel: 121212; Ambulance Tel: 123456; Fire Brigade Tel: 123456.

TELEPHONES: Can be placed on board alongside Hunzehaven Quay.

AUTHORITY: Gemeentelijk Havendienst Groningen, Oosterkade 14, 9711 RS Groningen, Netherlands. *Tel:* 050-673742, 050-673743. *FAX:* 050-143534. *Contact:* J. Legters, Harbour Master. Tel: 050-144962 (Private).

MOERDIJK: 51.42 N. 04.38 E. (See Plan)

PORT LIMITS/LOCATION: Moerdijk is a large-scale industrial estate located in the Province of Noord-Brabant, between the main ports of Rotterdam and Antwerp, on the Hollands Diep, offering major docking facilities to both sea-going and inland vessels.

With direct access to the open sea, vessels coming from the Hook of Holland navigate the Nieuwe Waterweg, Oude Maas, Dordtse Kil, crossing the Hollands Diep to arrive at the Moerdijk dock area.

The dock area is located between the Rijkshaven Moerdijk (Moerdijk State Port Facilities) and the Noordschans Marina, bounded to the North by the Sassenplaat. Navigation into and from the dock area is allowed only through the East side of the Zuid-Hollandsch Diep.

When entering the dock area, over the port bow the Harbour Basin Roodevaart, the Central Harbour Basin and the Western Harbour Basin are observed in succession.

In the ports of the Moerdijk Authority for Industry and Ports, berthing fees are charged at a rate based on tonnage, class, vessel, duration and cargo.

DOCUMENTS: *Customs:*

2 copies Crew List.

2 copies Crew Declaration.

2 copies Manifest.

1 copy Health Declaration.

2 copies Crew Manifest.

Also see "Rotterdam".

PILOTAGE: With respect to pilotage services and regulations, etc. – See "Rotterdam".

ANCHORAGE: Inside the Moerdijk port limits, anchorage is prohibited without the consent of the Harbour Service. Lay-by berths are available at 2 dolphins located in the Zuid-Hollandsch Diep.

RESTRICTIONS/MAX. SIZE: *General Remarks (for Moerdijk):*

It is inadvisable, in poor visibility, to pass the bridges going with the current.

Draft signals Oude Maas exceeding 70 dm., Dordtsche Kil exceeding 55 dm. Length signal exceeding 135 m.

Delays may arise due to the presence of 6-barge push-towing and other substantial objects.

Max. clearance in relation to high voltage transmission cables 41 m. plus NAP if destined for Moerdijk.

Criteria for Navigability of the Oude Maas and Dordtsche Kil:

	Oude Maas	Dortsche Kil
Ship's length	175 m.	175 m.
Ship's beam	25 m.	25 m.

Deviation from above criteria may be permitted after consultation with the Waterway Controller and the Pilotage Service.

Particulars for Sea-Going Vessels destined for Ports of the Moerdijk Authority for Industry and Ports:

Obligation to register arrival and departure of vessels with Harbour Master I.H.M. (Moerdijk Authority for Industry and Ports Authority), being in conformity with port regulations. Moerdijk Authority for Industry and Ports. Tel: 01683-2601 and Fax: 01683-2697.

Obligation to register to be addressed to the H.C.C. (Fax: 010-47-71800).

(a) Registration 24 hours in advance for dimensions exceeding 135 m. length and 17.50 m. beam.

(b) Ships with a draft exceeding 70 dm. for the Oude Maas and 55 dm. for the Dordtsche Kil must show in daytime one cylinder, and at night-time 3 red lights in vertical line.

Permits and Tide Arrangements:

For vessels up to certain dimensions, these can be obtained from H.C.C. on behalf of Head Traffic Service (Telephone number for tide arrangements: 010-42-51400, for normal orders: 010-42-51433).

R.V.C. Dordrecht (Tel: 078-13-24421).

Exemptions: By the H.I.D. of the RSW/H.C.C.

Dortsche Kil – Crossing Hollands Diep/Zuid-Hollandsch Diep:

Policy regarding access for sea-going vessels to IHM
(Moerdijk Authority for Industry and Ports).

The RWS Chief Engineer – Director for the Directorate Zuid-Holland in Rotterdam, and the Managing Director of the Moerdijk Authority for Industry and Ports in Klundert

Announce

1. That the maximum draft for ships with destination Moerdijk Authority for Industry and Ports (IHM), or as the case may be, departing from IHM, shall be 7.40 m. at a water level equal to NAP. Above mentioned draft may be increased, or as the case may be, to be decreased, proportional to the Moerdijk water level being above or below NAP.
2. That the maximum allowed draft shall basically not exceed 8.40 m.
3. That vessels are, at all times, to navigate intended waters with a keel clearance of 10%, that it is however permitted to reduce this keel clearance to 5% for the stretch Willemsdorp – IHM, and vice versa, provided the conditions set by the Pilot on duty are complied with regarding tug assistance to ensure the vessel's navigability.
4. That in the course of 1994, depending on the dredging works to be performed, the maximum draft will be extended to 8.00 m. at NAP, increased/decreased by the Moerdijk water level, but will basically not exceed 8.40 m. This extension of the draft will be announced in due course.
5. Incoming sea-going vessels with destination IHM, or as the case may be, outgoing sea-going vessels coming from IHM, shall be piloted in accordance with the guidelines set for that purpose (See Annex 1).
6. That sea-going vessels with a length exceeding 135 m., or sea-going vessels with a draft exceeding 5.50 m. showing the additional day signal, or the additional lights as intended in Article 10.03 of the Regulations Inland Waterways Police, shall enjoy a special right of way by virtue of Article 10.08 of the above described regulations.

Harbour Basin Roode Vaart: Length 1,100 m., width 240 m. and depth 35 dm. – 90 dm.

Central Harbour Basin: Length 1,850 m., width 240 m. and depth 85 dm.

After 900 m., there is a branch with length 900 m., width 154 m. and depth 90 dm.

Western Harbour Basin: Length 1,900 m., width 240 m. and depth 90 dm.

Annex 1: *Navigational Guidelines from and to the Moerdijk Authority for Industry and Ports:* The schedules given below have been computed in consultation with the Rijnmond Waterway Controller and Pilotage Service and are based on averaged tidal data and target depths maintained under the responsibility of the Controller of the navigation lanes.

Drafts are calculated in sweet water. (L = Length overall). Schedules and guidelines given below are for information purposes and under revision. To obtain accurate data regarding tidal windows, drafts, piloting time and such, you are to contact the H.C.C. (010-42-51400) and the Pilot Service Supervisor (010-42-51530).

Arriving at Moerdijk: (Note: HvH = Hook of Holland).

(1) Vessels with length under 150 m. and draft under 75 dm. – No limitation regarding piloting time.

(2) Vessels with length under 150 m. and draft between 75 dm. and 84 dm.: Pilot onboard from H.W. (HvH) −3.5 hours until H.W. (HvH) +1 hour.

Transfer time Dordtse Kil / Zuid-Hollandsch Diep: H.W. (HvH) +1 hour until +5.5 hours.

Please note: Negotiating Botlek Bridge under head current conditions.

(3) Vessels with length over 150 m. and draft under 75 dm.: Pilot on board from H.W. (HvH) +2 hours until H.W. (HvH) −1.5 hours.

Transfer time Dordtse Kil / Zuid-Hollandsch Diep: H.W. (HvH) −6.5 hours until H.W. (HvH) +3 hours.

(4) Vessels with length over 150 m. and draft between 75 dm. and 84 dm.: Pilot on board from H.W. (HvH) −3.5 hours until −1.5 hours.

Transfer time Dordtse Kil / Zuid-Hollandsch Diep: H.W. (HvH) +1 hour until +4 hours.

Leaving Moerdijk:

(1) Vessels with length under 135 m. and draft under 75 dm.: No limitations regarding piloting time.

(2) Vessels with length under 135 m. and draft between 75 dm. and 84 dm.: Pilot on board from H.W. (HvH) +30 minutes.

(3) Vessels with length between 135 m. and 150 m. and draft under 75 dm.: Pilot on board form H.W. (HvH) +5 hours until H.W. (HvH) −1 hour.

(4) Vessels with length over 150 m. and draft under 75 dm.: Pilot on board from H.W. (HvH) −3 hours until H.W. (HvH) −1 hour.

(5) Vessels with length over 135 m. and draft over 75 dm.: No access under normal tidal conditions.

Navigation to Moerdijk, in particular, is dependant on the river upper reaches drain-off volume and the Haringvliet Locks discharge programme. With reference to the daily RWS (Department of Public Works) tidal projections, maximum draft tolerances can be computed.

No night-time limitations are applicable.

TUGS: No tugs are stationed in the Moerdijk dock area.

Compulsory Use: Sea-going vessels with a length over 80 m., and in case they are not fitted with a properly functioning bow propeller, are obliged, when mooring, casting-off and warping at Shell Moerdijk No. 3, 4 and 6 manifolds positions, to make use of at least one tug, capable of delivering a minimum of 400 h.p.

On departure, should the vessel's bow be pointing in the departure direction, then the need for tug assistance is decided in consultation with the Pilot.

BERTHING: All harbour basins have banks with a rock-fill surface.

Various piers and quay walls are available, which are owned by established companies. Depths at the piers vary for each pier.

Information can be obtained from the operator in question.

Harbour Zuid-Hollands Diep is 6.0 km. in length, 550 m. wide, and has a lane for sea-going vessels indicated by buoys, being at the approach to the Zuid-Hollands Diep, 140 m. minimum width and 78 dm. – 100 dm. in depth.

TANKERS: See "Shipmaster's Report".

SPECIALISED CARGO HANDLING FACILITIES: Bulk goods, general cargo, containers, liquids, minerals and chemical solids.

MEDICAL: Doctors and dentists are available.

FRESH WATER: Drinking water is supplied from Dordrecht by barge.

FUEL: Orders can be placed for the delivery of lubricants and fuels by bunkering ship.

FIRE PRECAUTIONS: Smoking and naked fires are prohibited in a certain number of locations.

GARBAGE/WASTE DISPOSAL: List of Port Receiving Installations (HOI):

This annex lists the designated companies offering port receiving facilities in the dock area of the Authority for Industry and Ports.

Company offering port receiving facilities, acceptance and processing of liquids containing oil and chemicals and ship cleaning locations (Marpol Annex I and II):

Waste Materials Terminal Moerdijk, Vlasweg 12, 4782 PW Moerdijk. Tel: 01680-32200. Fax: 01680-23197. Designation valid through 1st June 1994.

Company offering port receiving facilities for the collection of, exclusively, oil residues and oil-containing mixtures (Marpol Annex I):

Afvaloliehandel (Waste Oil Trading) J.C.Jongen B.V., Uilenvliet 10, 3333 BT Zwijndrecht. Tel: 078-123648. Carphone: 06-52738498. Designation valid through 1st January 1995.

Company offering receiving facilities for the collection of garbage from vessels (Marpol Annex V):

Van Gansewinkel, Rijksweg Zuid 11, 4735 TZ Zegge. Tel: 01650-52288. After office hours Tel: 01650-62374, or 076-414850. Fax: 01650-69011. Designation valid through 1st January 1995.

SHIPMASTER'S REPORT: June 1987.

Documents:

6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
3 copies Crew Manifest.

Pilotage: Pilot normally boards at the Maas Centre Buoy, except when there is very poor weather when small vessels that know the area (with hydrocarbons) can proceed inside the Hook of Holland breakwaters and embark the Pilot there.

There is a special Pilot for Dordrecht and Moerdijk.

The average pilotage time to Moerdijk, depending on the state of the tide, is 4 hours.

River Passage: Pilots sometimes take small vessels up river on automatic pilot. On reaching the Oude Maas bridges, about 10 minutes after Botlek, the Pilot requires a man forward and changes to manual steering.

Anchorage: Vessels use anchorages in the Hook of Holland area.

Tugs: Sea-going vessels are obliged to use a tug when berthing, leaving or warping at Berths No. 3, 4 and 6, unless the LOA is less than 80 m. and the vessel is equipped with a bow-thruster. When the vessel is leaving Berths No. 3, 4 and 6 with the bow in the direction of departure, a tug is in most cases not necessary. Also see "Berthing".

Berthing: Vessel berth at Shell Moerdijk at Jetty "T" where there are 5 berths for small vessels. The largest vessel handled is about 20,000 d.w.t. The maximum draft is 7.8 m. (there is a tunnel under the Oude Maas near Dordrecht).

Vessels with a draft of 6.5 m. can navigate at any state of the tide, there is a shoal patch near Moerdijk.

Larger vessels are berthed against flat face of the "T". Ethylene is handled at Berth No.2 on the "T". Normally vessels berth head in – port side to, without the use of tugs. However, should the vessel have to berth starboard side to, a tug is required.

Mooring consisted of 2 head/stern lines and 2 springs. A mooring boat is provided and the fenders are good. Shore gangway provided.

When entering and leaving, the pilot has to be very careful that the bow overhang does not hit the Chicksans on Berth No. 3.

Cargo: Vessels discharge ethylene. However vessels are also able to load at this berth.

If 2 vessels are carrying the same product, only 1 vessel is allowed to discharge at one time.

There is one Chicksan (8 in. 150 ASA) for discharge at both Berths No. 2 and 3. Rate of discharge 80 t.p.h.

Samples are taken about 3 hours after commencement of discharge.

Fresh Water: Fresh water is available on both berths from a hydrant and is metered. The charge is DFL 2.75 per ton.

General: All services are provided from Rotterdam. A telephone is placed on board but there is no meter. The meter indicating the total charges is at the gate office. Cost of call to U.K. is DFL 1.20 per minute and to Rotterdam DFL 0.25 per minute.

Vessel used Dirkzwager message agency at Maasluis (telex 26751 dirknl) for all communications with Pilot and Harbour Authority prior to arrival. This service can also be used for after hours messages to the agent, etc.

There is a lay-by berth available at Shell Moerdijk for small vessels.

Should the vessel be taking on stores, the truck is only allowed as far as the car park which is about 150 m. from the vessel.

The best way to Dordrecht from Rotterdam is by train from Lage Zwaluwe Station. Taxi from the car park to the station costs DFL 32.50.

Chart: B.A. Chart 137

SHIPMASTER'S REPORT: December 1988.

The following is an update on Shipmaster's Report, dated June 1987.

Berthing: Vessels with a draft of 7.5 m. (not 6.5 m.) can navigate at any state of the tide.

Normally vessels berth starboard side to at Berth No. 2 and port side to at Berth No. 3 without use of tug. Vessels can berth starboard side to at Berth No. 3 if a tug is used.

Cargo: Rate of discharge for ethylene is 110 t.p.h.

Generally, there is no surveyor. The terminal will not sign ullage sheet.

Make sure that the Loading Master signs the Statement of Fact on completion.

Time between completion and sailing is over 3 hours.

General: Lay-by Berth at Shell is suitable for vessels 100 m. LOA and 8.0 m. draft.

Developments: Loading/discharging facilities to be upgraded in 1989 with extra ethylene lines for faster turnarounds.

AUTHORITY: Industrie en Havenschap Moerdijk, Zuidelijke Randweg 2, 4782 PS Moerdijk, Netherlands. *Tel:* 01680-30055. *Fax:* 01680-30044. *Contact:* G.C.A. Rodewyk, Harbour Master.

ROTTERDAM: 51.55 N. 04.24 E. (See Plan)

DOCUMENTS: The following documents have to be handed over to Customs and Immigration Authorities:

3 copies General Declaration.
3 copies Crew List on arrival, 2 copies on departure.
2 copies Passenger List.
2 copies Crew Personal Effects List.

In addition to the above, the following documents have to be available on board for inspection by Customs, Immigration Authorities and Netherlands Shipping Inspectorate:

Ship's Register or Certificate of Registry.
Cargo List, manifest or certificate.
Bill of Lading.
Log Book.
Crew List.
Stores List.
International Health Certificate or Declaration of Health.
Tonnage Certificate.
*Tanker Check List (to be handed over to the pilot).
*Tovalop Certificate.
*Dangerous Cargo List.
*Gas Free Certificate.
Safety Equipment Certificate.
Certificate of Depth.

* If appropriate, depending on the type of vessel.

Oil Pollution Damage Certificate: In Dutch ports, tankers carrying over 2,000 tons of oil or oil products in bulk have to produce a Certificate of Insurance in respect of civil liability for oil pollution damage (TOVALOP certificate). Fines will be imposed if vessels do not comply with these international regulations. Authorities will not allow such vessels to leave port.

Inspection of international statutory certificates: Surveyors of the Netherlands Shipping Inspectorate (NSI) will check certificates at random in accordance with the Memorandum of understanding on Port State Control (MOU).

If the required certificates are not on board or not valid, or if there are clear grounds for believing that the ship does not substantially meet the requirements of the relevant conventions, a more detailed inspection will be carried out.

On all tankships entering or leaving the port area of Rotterdam, the E.E.C. Tanker Check List has to be filled out and handed over to the pilot.

Pilots may report deficiencies to the NSI.

Shipmaster's Report: November 1988.

River Police: 2 copies Crew List on arrival and 2 copies Crew List on departure.

Agent	1 copy Stores List.
	1 copy Personal Effects List.
Customs	1 copy Personal Effects List.

PILOTAGE: Pilotage is compulsory for the following:

(i) Vessels with a length over 40 m. (without disciplinary measures).
(ii) Vessels sailing for or from berths along the Nieuwe Waterweg and the Nieuwe Maas with a length over 60 m. (with disciplinary measures).
(iii) Vessels sailing for or from berths along the Beerkanaal and Calandkanaal with a length over 70 m. (with disciplinary measures).
(iv) Vessels carrying dangerous goods.

Pilot cutters: Pilot cutters cruise continuously, day and night, off entrance to the New Rotterdam Waterway, one cruises North of line North Mole/Maasbuoy and the other near Maas Centre Buoy.

Characteristic signals:

1. The distinguishing mark of the pilot cutter is the word "PILOT" on each side of the vessel.
2. By day: Pilot flag, being a blue flag with the letter 'L', displayed from the main top mast.
3. At night: Lights as prescribed by the Regulations for Preventing Collisions at Sea.
4. During bad visibility: The fog signal prescribed by Rule 35 of these Regulations.

Pilotage Authority: The Pilotage Authority for the Rotterdam Rijnmond region is the Regional Pilots Corporation Rotterdam-Rijnmond. The Pilots are supported by their company "Loodswezen Nederland B.V." which is responsible for equipment, etc.

Ordering a Pilot – ETA: Vessels with a draft less than 17.37 m. bound for the New Waterway must send an ETA 6 hours before arrival at Maas Centre.

ETA to be send to: 'PILOTVTS ROTTERDAM', via (in order of preference):

TOR or Satellite No. 26751 (dirknl)
Telegram Scheveningen Radio (PCH)
Sector Maas Approach by VHF Channel 1, 3 hours before arrival at the Pilot Station.

Contents of ETA Message:

(a) Ship's name and call sign.
(b) Date and time group transmission of ETA (first two digits: date; last four digits: time. State if local time or UTC).
(c) Date and time group (see above) expected at boarding position and the words "Maas Centre".
(d) Request pilot.
(e) Deepest draft in metres and centimetres (4 digits).
(f) LOA and GT or GRT.
(g) Destination.

Consult Notice to Shipping No. 58/1988.

ETA-messages through your local agent *are not considered* to be a message according to these regulations.

Non-compliance with these regulations might cause delay to your vessel.

On arrival at the pilot station, vessels requiring a Pilot are to display the following signals, seperately or together:

1. *By day:* International code signal 'G', Pilot flag, vis., vessel's National Flag with white border from foremast.
2. *By night:* Morse signal 'G' by flash light. Blue lights at intervals of 15 minutes. A bright white light shown just above bulwark for 1 minute at short intervals.
3. *During bad visibility:* At least 3 seconds after the normal fog signal the international code signal 'G'. Pilot vessel will answer: the normal fog signals, followed after at least 3 seconds by international code signal 'H' (I have a Pilot on board).
4. Radio central VHF Channel 2 "Pilot Maas".

Pilotage for Deep Draft Vessels and Helicopter Service: Vessels drawing over 57 ft. (SW) must use the "Euro-channel" between the "Euro Buoy" and the "Maas Centre Buoy". Pilots board by helicopter in position Lat. 52° 00′ N., Long. 03° 00′ E. Helicopter may ask vessel to work on VHF Channel 9 or 16.

Radio communication (according P.J.M.O. recommendation):

1. HF frequency 5645 kHz: Ships will be informed by telegram of the time of departure from base and ETA of the Helicopter over the ship, which must be acknowledged. Listening watch should be maintained by the vessel on HF frequency 5645 kHz as from the advised departure time of the helicopter. Urgent messages for the vessel may be sent on this frequency by the helicopter and/or KLM helicopters home-base. The ship may close down listening watch on this HF frequency only after VHF contact with the helicopter has been established.

2. VHF frequency 156.30 MHz (Channel 9): The helicopter will contact the vessel on the VHF-FM voice frequency VHF Channel 9 or Channel 16, when within range (usually between 20 and 40 nautical miles distance from the ship). The helicopter may request the ship to change to another VHF Channel if radio traffic requires this. All instructions from the helicopter pilot to the vessel and vice versa will be on this VHF frequency. The call-sign of the helicopter is the word "helicopter" followed by the group of registration letters, of which the ship is informed in the departure telegram.

3. Operational information: As soon as VHF contact is established (normally initiated by the helicopter), the vessel shall advise the helicopter pilot of its position, courses, speed (when under way), the actual wind direction and speed over the deck, pitch, roll and condition of deck (e.g. dry, spray, wet, etc.). The helicopter pilot will confirm the acceptability of those conditions, or ask for a possible change in heading and/or speed.

Restrictions:

1. Min. visibility 800 m. at 150 ft. above sea level.
2. Max. wind Force 10 (55 knots).
3. Severe turbulence and icing conditions at or below 150 ft.

Pilot Ladders: Vessels with a freeboard over 9 m. must provide an accommodation ladder in addition to the pilot ladder. If boarding equipment does not strictly comply with the SOLAS provisions, Pilots must be embarked/disembarked by helicopter. Generally Pilots refuse to use the mechanical pilot hoists or other constructions which do not comply with the recommendations of the "International Maritime Pilots Association" (I.M.P.A.).

DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg".

SHORE BASED PILOTAGE: In order to promote the safety and the smooth handling of maritime traffic, it is possible to provide "Shore Based Pilotage". This means that the Pilot, insofar as he is unable to board the vessel to be piloted, can also perform his task from another vessel or from the shore.

There are a number of conditions attached to "Shore Based Pilotage" of which the most important are stated below.

1. *Informative shore-based radar assistance:*
As a result of extension of the shore-based radar coverage outside, and an increase of range of the VHF Channels concerned in seaward direction.
The Shore-Based Radar Sectors, as seen from the sea are:
Maas Approach
Pilot Maas
Maas Entrance

1.1 *Maas Approach Radar:*
Communication VHF Channel 1.
The radar working area involves the sea area, including the anchorages within the sector with a radius of 23 nautical miles, calculated from the position of the light-platform Goeree (approx. position 51° 55′ N., 03° 40′ E.), with the exception of the working area of "Pilot Maas" situated within this sector.

"Maas Approach" gives general nautical information and renders (informative) shore-based radar assistance, up to the following shore-based radar sector "Pilot Maas", where the pilot cruising ground is, or up to the anchorages. In order to make early identification, c.q. information possible "Maas Approach" is to be contacted, if possible, 3 hours prior to arrival at the pilot cruising ground "Maas Centre", but in any case for traffic coming from the Southwest near the "M.W.1 Buoy" and for traffic coming from the North, near the platform "PD 15".

These rules do not alter the instructions for obtaining a Pilot in the Rijnmond District, as stated in the Notice to Shipping.

1.2 *Pilot Maas Radar:*
Communication VHF Channel 2.
The radar working area involves that part of the legally determined pilot-water in the sea area just off the Hook of Holland within which the pilot cruising grounds are located.

In the Pilot Maas-sector (advisory) shore-based radar assistance is rendered with respect to embarkation/disembarkation of the Pilot.

1.3 *Maas Entrance Radar:*
Communication VHF Channel 3.
The radar working area involves that part of the legally determined pilot-water in the sea area off the Hook of Holland, East of the Sector Pilot Maas, Maas Entrance up to the Calandcanal and the Rotterdam Waterway up to kilometerpole 1031 (TCH traffic station).

Maas Entrance Radar provides the informative shore-based radar assistance.

2. *Shore Based Pilotage in the Rijnmond District:*
As a rule a pilot will embark a vessel in order to perform his task but, during periods in which pilot boats cannot be operational at sea on account of weather circumstances, it frequently happens that seagoing vessels enter or leave the Hook of Holland estuary without a Pilot.

Other vessels have to anchor in one of the anchorages, or will be kept outside, due to the impossibility of taking a Pilot on board.

In order to promote the safe and smooth handling of these vessels and other maritime traffic, the estuary of Hook of Holland has been provided with the so-called "Shore Based Pilotage".

This takes place according to the following principles:

2.1 During the periods from the moment that the Pilot Boat Service outside – on account of weather circumstances – will be suspended for "small vessels", until the time pilot service will be resumed.

Furthermore, "Shore Based Pilotage" can be used occasionally during normal weather conditions, in case the construction of certain vessels make it impossible to embark/disembark the pilot outside.

2.2 "Shore Based Pilotage" is carried out from the pilot cruising area outside to the Maas Entrance near TCH, and vice-versa.

2.3 The Pilots perform their tasks from the traffic stations Pilot Maas (VHF Channel 2) and Maas Entrance (VHF Channel 3).

2.4 In case the Master of a vessel with compulsory pilotage indicates that he wants to enter Maas Entrance during the period as described under 2.1, he will be informed by Traffic station Maas Approach that "Shore Based Pilotage" can be provided, taking into account all relevant factors of the admission policy for such a vessel.

The Master should explicitly accept this proposal, since the present Pilot Act does not yet provide a formal basis for this kind of pilotage.

The Master of a vessel with Non-Compulsory Pilotage can, at his request, also ask for "Shore Based Pilotage".

2.5 In view of the entire admission policy, it will be considered, with regard to each vessel, whether it is acceptable in view of the circumstances and taking into account all relevant legislation, rules and regulations in connection with the safety of shipping and surroundings – that the vessel concerned enters or leaves Maas Entrance without a Pilot, whether or not using "Shore Based Pilotage".

2.6 —

2.6.1 Sea-going vessels with Compulsory Pilotage should stay outside if they do not want to make use of the possibility to enter by means of "Shore Based Pilotage".

2.6.2 Sea-going vessels with Compulsory Pilotage on account of their cargo should in principle remain outside if they do not want to use "Shore Based Pilotage" for entering.

2.7 With respect to the vessels mentioned under 2.6.2. that should have a Pilot on board, it will be considered whether these vessels, dependent on among other things their size and the Master's knowledge of the area, can be allowed to enter Maas Entrance with "Shore Based Pilotage", all in view of the admission policy.

2.8 Large sea-going vessels can only navigate in Euro Channel, Maas Channel and Maas Entrance if a qualified and – for this purpose – trained Pilot is *on board* as stated in the Government Harbour Master's Notice to Shipping.

2.9

2.9.1 In principle, outbound sea-going vessels with Compulsory pilotage, in particular those with dangerous cargo, as mentioned under 2.6.2. should, also in view of 2.4 and 2.5, actually have a Pilot on board until the pilot cruising area.

2.9.2 In view of 2.4, 2.6.1. and 2.6.2., vessels with "Compulsory" pilotage should on no account disembark at the Berghaven.

2.10 Vessels or coupled vessels which, in view of among others The Inland Navigation Police Regulations art. 1.06 and 1.21 and the Special Rules and Regulations Rotterdam Waterway, are judged by the Government Harbour Master to be "Special Transport", should have a qualified Pilot on board.

2.11 Requests for "Shore Based Pilotage" should be made to:
Inward bound: Maas Approach Radar,
Outward bound: (before departure) Harbour Co-ordination Centre Rotterdam, Central Traffic Controller Rotterdam, (VHF Channel 11).

ANCHORAGES: The following 5 anchorages are available:

1. Long term anchorage for deep draft vessels (17.37 m. or more) North of North Hinder Junction.
2. Short term anchorage for deep draft vessels (17.37 m. or more).
3. "Maas Outer". Recommended max. draft 17.37 m.
4. "Maas West". Recommended max. draft 12.20 m. (North), 9.10 m. (South).
5. "Maas Noord". Recommended max. draft 13.70 m.

RESTRICTIONS:

Restrictions for entering:

Entry times: Depend on prevailing circumstances.

Europoort:

Tankers: Up to 74 ft. (SW) draft; some berth's have tide restrictions.

Vessels with a draft of 57 ft. (SW) or more and/or a length of 250 m. or more must comply with the "Shipping Rules for Large Vessels".

On entering Europoort, tugs are made fast just inside the breakwaters. At all times tug's hawsers must be used. The time at which deeply loaded vessels destined for Europoort enter the New Waterway depends on the prevailing circumstances and is always subject to agreements made between the Pilot Service and the Harbour Master.

Botlek and 3rd Petroleumharbour:

Max. draft 44 ft. (SW), exceptionally 45 ft. (SW), under certain conditions. Vessels exceeding 200 m. and/or drafts over 33 ft. are tidebound.

To obtain permission one should apply to the Harbour Master at Harbour Co-ordination Centre (H.C.C.).

Waalhaven:

Vessels with a draft of 36 ft. (SW), or a length of 200 m. or more should arrive at the entrance of the Waalhaven at slack water Rotterdam.

Basins at the right bank of the river Maas,Maashaven,Rijnhaven:

Vessels with a draft of 28 ft. or more and a length of 180 m. or more are generally tidebound. All harbours in Rotterdam can be entered at any time during day and night.

Shipping Rules for Large vessels:

Vessels drawing 17.4 m. (57 ft.) up to 22.52 m. (74 ft.):

These vessels must use the approach channels "Eurogeul" and "Maasgeul". Such vessels must report at least 8 hours prior to their arrival at the Pilot "rendezvous" position (52° N., 03° E.) by radio telegram to Harbour Co-ordination Centre (HCC) Rotterdam via Scheveningen Radio (PCH) or to Dirkzwager Maassluis (Telex No. 26751) if vessels equipped with "Telex Over Radio" and/or Inmarsat the following information:

(a) Name and call sign of the vessel.
(b) Tonnage in GT/GRT and deepest draft in salt water.
(c) ETA at rendezvous position.
(d) Confirmation of correct functioning of:
  1. Gyro compass-equipment.
  2. Radar.
  3. VHF, operational on Channels 1, 2, 3, 6, 11 and 13.
  4. Decca Navigator Mark XII or Mark XXI provided with a connection for the so-called Brown Pattern Indicator. (Brown Box Connection).

Vessels with a length of 250 m. or more but with a draft of less than 57 ft. (SW) (not bound to use the approach channels) must report, at least 6 hours prior to their arrival at the Maasbuoy, the information mentioned under (a), (b), (c), and (d) 1, 2 and 3.

The intention to leave Europoort must be reported by the Master or the Agents at least 3 hours prior to the departure to Harbour Co-ordination Centre, Rotterdam, giving the information mentioned under (a), (b), (c), and (d) 1, 2 and 3.

The 6 hours' report prior to arrival will also be considered the 6 hours' ETA message for obtaining a Pilot.

Vessels equipped with a "T.O.R." or Maritex installation can send their messages to Harbour Co-ordination Centre Rotterdam via Dirkzwager's message relay and ship's reporting station (Telex No. 26751 "dirk nl").

Outward bound vessels drawing 57 ft. (S.W.) or more, having to make use of the "Maasgeul" and "Eurogeul" must give 12 hours Notice of Departure to the Harbour Co-ordination Centre through their Agent.

Vessels drawing 20.7 m. (68 ft.) up to 22.52 m. (74 ft.):

These vessels, which must use the selected route via "The Straits of Dover" and the Southern North Sea to the "Eurogeul" are urgently recommended:

1. To act in accordance with the instructions of the manual "Deep Draft Planning Guide", Greenwich Buoy to Europoort.
2. Preferable to make use of the services of a certified North Sea Pilot as from Greenwich Buoy.
3. To report 24 hours prior to arrival at the rendezvous area near Cherbourg, by telegram to Harbour Co-ordination Centre, Rotterdam via Scheveningen Radio (PCH) or to Dirkzwager Maassluis (Telex No. 26751).

The telegram should contain:

(a) Name and call sign of the vessel;
(b) Tonnage in GRT and deepest draft in salt water;
(c) ETA Pilot-location near Cherbourg, at about 13 miles North of Cap de la Hague.
(d) The order for a chartered pilot for the "Eurogeul" to be embarked by helicopter near Cherbourg;
(e) Confirmation of correct functioning of:
  1. Gyro compass equipment.
  2. Radar.
  3. VHF, operational on Channels 1, 2, 3, 6, 11 and 13.
  4. Decca Navigator Mark XII or Mark XXI provided with a connection for the so-called Brown Pattern Indicator (Brown Box Connection).
(f) If necessary required expert assistance for equipment mentioned under (e).

4. To confirm or amend via Scheveningen Radio the telegram mentioned under 3, 12 hours before arrival "rendezvous" location Cherbourg or by T.O.R. and or Inmarsat via Dirkzwager Maassluis (Telex No. 26751).
5. To make use of Dutch sea charts issued by the Hydrographic Service:
   No. 1971 – Sandettie to North Hinder.
   No. 1972 – North Hinder to Europoort.

Shifting: Vessels which have lightened at Europoort/Maasvlakte terminals should arrive at Botlek entrance at about 30 minutes after high water at Rotterdam.

Shifting rules Europoort - Botlek:

Length overall:	Max.draft allowed:
up to 270 m. (885 ft.)	44 ft. S.W.
270 m. – 300 m. (885 ft. – 916 ft.)	42 ft. S.W.

Verolme maximum draft allowed: 27 ft. (3 ft. trim).

Dangerous Goods: Regulations are based on several Governmental laws and Municipal bye-laws.

The "Dangerous Goods Department" of the Municipal Port Management is the centre where all information on dangerous goods on board vessels is collected, administrated and distributed to those concerned.

Inspection on board vessels berthed in the Port of Rotterdam will be carried out mainly by inspectors of the Municipal Dangerous Goods Department, although in certain cases (e.g. explosives), Governmental Dangerous Goods Inspectors are in charge as well.

For detailed information the following Regulation should be consulted: Rotterdam Port Bye Laws (Havenverordening Rotterdam).

From these regulations the following significant obligations have been extracted:

1. *Signals:* Vessels carrying:
In Packages:
(a) More than 100 kg. gross of IMO class 1 hazard division 1.1 and 1.5
(b) More than 1,000 kg. gross of IMO class 1 hazard division 1.2, 1.3 and 1.4 or IMO class 5.2 in packages with an explosive label.
(c) More than 1,000 kg. gross of IMO class 2 with a poison label.
In Bulk:
(d) Any dangerous substances in any quantity. Also empty tanks which are not certified as being clean by an acknowledged expert, should hoist the following signals before entering Rotterdam Waterway area:
I. *by day* the international signal flag "B";
II. *by night* 1 red light.

2. *Prior Notification:* Masters of vessels carrying:
(a) Dangerous goods of IMO class 1 and 5.2 in packages.
(b) More than 1,000 kg. gross weight per substance of the other IMO classes in packages.
(c) Dangerous substances in bulk: Report these commodities to the Dangerous Goods Dept. of the Municipal Harbour Master 24 hours before arrival.

3. *Explosives:*
There is a restriction on the carriage of explosives by ships, dependent on kind, quantity and stowage of the explosives.

Permission to deliver explosives is given by the Minister of Transport.

Masters of vessels are advised to make sure whether such a permission has been granted.

4. *Dangerous Cargo List:*
Apart from these obligations the Rotterdam Port Bye-Laws prescribe that a vessel having any dangerous cargo on board is prohibited from being in the harbour unless there is a list on board and an identical list has been submitted to the Harbour Master (See "Port Authority"), stating the correct technical names, IMO class, gross quantities and the stowage of these materials.

5. *Operational Notice:*
Masters of vessels showing the signals as mentioned above ("B" flag or 1 red light) shall give notice to "Maas Approach" on VHF Channel 1 on arrival.

This notice shall be given at least half an hour but not more than 1 hour before the ship enters the Rotterdam Waterway area. Upon departure: on Channel 13 to "Regional Traffic Centre".

This notice shall contain: Ship's name, position, destination and expected time needed for passage in the port area.

When visibility is less than 500 m., ships are prohibited from navigating the Rotterdam Waterway, unless permission has been obtained from "Regional Traffic Centre" on VHF Channel 13. Navigation on the Rotterdam Waterway might be prohibited if circumstances make it necessary.

Combination Carriers (OBO's): Combination carriers must, as per Rotterdam Port Bye-laws, comply with the following regulations when calling to load and discharge dry cargo:

(a) The dry cargo holds may not contain combustible or remnant liquids.

(b) The spaces adjacent to the dry cargo holds:
may not contain combustible or remnant liquids; or
must be gas free; or
must contain an inert gas under positive pressure.

(c) Slops or previously carried oil cargoes may not be stowed adjacent to a dry cargo hold and must contain an inert gas.

At least 24 hours prior to arrival the following information must be cabled:

1. The nature of the dry cargo;
2. Nature of operation (loading or discharging);
3. Where loading and discharging will take place;
4. The chemical or technical name of the last liquid cargo;
5. The date of discharging of the last liquid cargo;
6. The stowage of the cargo residues of combustible liquids;
7. Description of the atmosphere above the cargo residues referred to in 6;
8. Description of the atmosphere of all other spaces.

In case of repairs, tank cleaning or delivery of slops, a combination carrier is considered to be a tank vessel and should comply with the regulations applicable to this kind of ship.

Tidal Information.

* = N.A.P. (Normal Amsterdam Level)

HEALTH: The Master has to fill in and sign a Maritime Declaration of Health, which is handed to him by the Pilot. Vessels subject to medical inspection have to hoist flag signal according to Pilot's orders. In case of quarantine problems, the pilot will contact the head of the department of Infectious Diseases of the Municipal Health Service (GGD). Telephone (10) 4339419.

RADIO: *ETA messages and T.O.R./Maritex:* Masters' telegrams via Scheveningen Radio, call-sign PCH, are passed to Agents 24 hours a day, weekends inclusive. For this reason it is advisable that Masters communicate with agent via Scheveningen Radio, via which station they also route messages to vessels. Vessels equipped with "Telex Over Radio" may, outside office hours channel their messages to Agent via Dirkzwager's message relay and ships' reporting station at Maassluis, telex No. 26751, Answerback "dirk nl". Such messages are passed on to Agent immediately, also during weekends.

RADAR/VHF: A chain of 29 shore-based radar stations permits navigation during all weather conditions. Radio and radar station Maas Approach at Hook of Holland, communicates via VHF Channel 1 (Port Operations).

Masters are requested to call this station, especially during bad visibility, well in advance of arrival at pilot station. Maas Approach provides nautical information for vessels within range and acts as a link with pilot cutters.

Radio-Radar Station: The radio station "Traffic Centre Hook (TCH)" in Hook of Holland acts as a Communication Centre and as a Traffic Regulation Station near the entrance and on the New Waterway. The station provides weather forecasts on request by VHF Channel 13. Radar assistance is provided on VHF Channel 66 from "CA2-NW1" Separation Buoy into Europoort and vice versa.

Information on berths, Harbour Pilots, tugs and linesmen in Europoort can be obtained on VHF Channel 11.

VESSEL TRAFFIC MANAGEMENT SYSTEM: With the completion of the VTS system and the related Data Handling System, the Port Management now has one of the world's most advanced safety systems for the control of shipping. However, it is always open to improvement.

The Vessel Traffic Management System (VTMS) is in operation for the approaches to Europoort and the New Waterway; It covers an area from 45 miles West of Noorderhoofd up to 2 miles East of the van Brienenoord Bridge and 4 miles East of the Spijkenisse Bridge in the Oude Maas river, including all adjacent harbour basins.

The area is divided into three regions, each having its own Traffic Centre to communicate with the shipping (VHF Channel 13). The three regions are sub-divided into 12 sectors, each having a traffic attendant and a seperate VHF-channel.

Traffic Centre Hook of Holland:	
Maas Approach	VHF 1
Pilot Maas	VHF 2
Maas Entrance	VHF 3
Waterweg	VHF 65
Europoort	VHF 66
Traffic Centre Botlek:	
Maassluis	VHF 80
Botlek	VHF 61
Oude Maas	VHF 62
Traffic Centre City:	
Eemhaven	VHF 63
Waalhaven	VHF 60
Maasbruggen	VHF 81
Brienenoord	VHF 21

TUGS: Tugs normally join vessels on river when nearing the basin where vessels will be accommodated. The towing lines used are always from the tug.

BRIDGES: The New Waterway connects the Port of Rotterdam with the North Sea, without any locks or bridges. Only to reach some shipyards, situated East of Rotterdam, vessels have to pass the "Koninginnebrug" (Koningshaven).

The railway bridge remains open since the construction works of the tunnel are completed.

The "Koninginnebrug" is opened day and night on request (VHF Channel 18).

Barrage time during weekdays: 0730 hrs. – 0900 hrs. and 1630 hrs. – 1800 hrs.

To reach berths in Brittaniehaven, vessels have to pass the Calandbridge. To reach berths in Seinehaven and Neckarhaven, vessels have to pass the Rozenburg locks (between the Calandcanal and the Hartelcanal).

GENERAL CARGO/MULTI-PURPOSE FACILITIES:

C. Steinweg (Handelsveem) BV: Parmentierplein 1, 3088 GN Rotterdam. (P.O.Box 1068, 3000 BB Rotterdam). Tel:(10) 4879555. Fax: (10) 4879200. Telex: 22227. Management: E. de Werk (President), P.A. Govers (Director).

Quays in Operation: Rijnhaven, Waalhaven Pier 1, Beatrixhaven, Botlek, Beneluxhaven (Europoort).

Berth and Cranage: Total length 5,000 m., max. draft 12.50 m., max. lifting capacity 45 tons.

Nederlands Transport Bureau B.V.: Willemskade 17, 3016 DL Rotterdam. (P.O.Box 23068, 3001 KB Rotterdam). Tel: (10) 4145611. Fax: (10) 4129569. Telex: 22139. Board of Directors: L.L. Kolisch (Chairman of the Board), Tel: (10) 4138752. Ir.N.J.B. Edelhauser (Director), Tel: (10) 4224648. W. Laurs (Director), Tel: (1807) 21733. P.A. Moons (Director), Tel: (71) 618069.

Waalhaven North side: Container/general cargo handling, fertiliser in bulk.

Berth and Cranage: 1 berth – length 200 m., depth 12.0 m.; 1 berth – length 1,200 m., depth 10.0 m.; 1 berth – length 150 m., depth 9.0 m.

Terminal Facilities: 12 cranes, 3 transtainers.

Computer Systems: EDI.

Rail Facilities: 1,500 m. rail track.

Lehnkering Montan Nederland B.V.: Zweth 24, 2991 LH Barendrecht. (P.O.Box 350, 2990 AJ Barendrecht). Tel: (1806) 46400. Fax: (1806) 22212. Telex: 22175 NL.

Seinehaven (Europoort, East side):

Berths and Cranage: Total quay length 250 m., depth 6.5 m., served by 2 fixed cranes and 3 mobile cranes.

Terminal Facilities: Total area 9 ha., 1 transtainer and 2 sheds.

CONTAINER HANDLING FACILITIES:

Container Handling Statistics Rotterdam:

1991	3,782,595
1992	4,122,782
1993	3,955,000

ECT Terminals:

Terminal operating company: Europe Combined Terminals (ECT), Postbus 7400, NL-3000 HK Rotterdam. Contact: W. den Dulk, Chairman.

Delta Container Division, Europaweg 875, P.O.Box 7400, NL-3000 HK Rotterdam. Tel: 010-4916911. Telex: 28056 ECT NL. Contact: Ir.J.C.Rijsenbrij, Director – Delta Container Division.

Container Handling Statistics ECT:

1990	1,435,712
1991	1,478,000
1992	1,600,000
1993	1,700,000

Delta Terminal (Europahaven):

Berths and Cranage: Total quay length 1,550 m., depth 13.6 m., served by Nelcon container gantry cranes (55 tons – 67 tons), of which 2 are shared with Delta/Sealand Terminal (Europahaven).

Hartelhaven: One container barge berth, length 260 m., served by 2×50 tons/55 tons Nelcon container gantry cranes.

Direct Call Liner Services: ACL, CGM, CMB, Cosco, ECL, H-L, Hanjin, K-Line, Maersk, MISC, NL, NOL, Norasia, Nosco, OOCL, OPDR, P&OCL, Portlink, Rheintainer, S-L, Unifeeder, WCL.

Terminal Facilities: Total area 100 ha.; 366 electric reefer points; 29 Nelcon (35 tons) straddle carriers; 8 Kalmar/LMV 16/1200 (16 tons) front handlers; 36 DAF floor yard tractors; 75 floor yard chassis; 60 Buiscar trailer trains.

Computer Systems: Hardware Unisys A6/A12, DEC Vax; software in-house; functions multi-user container control system, ship planning, training, finance and systems development.

Rail Facilities: 4×600 m. rail tracks served by 2×50 tons/55 tons Nelcon rail mounted road/rail transfer gantries.

Future Plans: Development of the second and third phases will provide for a further 290 ha. with quay length of 2,390 m. available.

Delta/Sealand Terminal (Europahaven):

Berths and Cranage: Total quay length 970 m., served by 8 Nelcon container gantry cranes, of which 2 are shared with Delta Terminal Europahaven.

Direct Call Liner Services: NL, Norasia, OOCL, P&OCL, S-L.

Terminal Facilities: Total area 56 ha. Equipment: 576 electric reefer points; 25 yard gantries; 5 Nelcon straddle carriers; 5 Kalmar LMV 12-1200 front handlers; 10 DAF yard tractors; 30 yard chassis.

The terminal is also equipped with 50 Gottwald automatic guided vehicles and 25 Gottwald automated stacking cranes.

Computer Systems: Hardware DEC, Digital VAX 6000-610; software RDB 4GL:Ingres.

Europe Combined Terminals BV: Home Container Division, Seattleweg 7, P.O.Box 7400, NL-3000 HK Rotterdam. Tel: (10) 4916911. Telex: 28301 ECT NL. Contact: A. Stolk – Joint Director – Home Container Division.

Alexander Terminal (Prins Willem Alexander Haven/Prinses Margriethaven):

Berths and Cranage: Quay length 3,100 m. (Prins Willem Alexanderhaven 1,300 m., Prinses Margriethaven 1,800 m.), minimum depth 10.6 m. – 13.0 m., equipped with 2 Demag (53 tons/39 tons), 1 Peiner (42 tons), 8 Paceco (2×43 tons, 6×41 tons), 2 Nelcon (50 tons), 3 Conrad Stork (50 tons) and 1 Nelcon (45 tons) container barge cranes. Ro-Ro ramp on the North West side.

Direct Call Liner Services: ANZECS, B&I, Bugsier, Capricorn, CGN, CMB, Comar, Contemaris, Contship, CSC, CY, DSR, ECL, Evergreen, Feederlink, GNSL, Hapag-Lloyd, MDV, NOL, NYK, OPDR, P&OCL, Portlink, Red Sea Express, Rheintainer, SAECS, Sealand, Senator, Star Shipping, Unifeeder, WEC, WCL, YMTC.

Terminal Facilities: Prins Willem Alexanderhaven/Prinses Margriethaen: Total area 87 ha. (Alexander Terminal 81.5 ha.; Margriet Terminal 5.5 ha.). Equipment: 598 electric reefer points; 48 liquid nitrogen reefer points; 37 Nelcon straddle carriers; 20 Kalmar LMV (16 tons) front handlers; 70 DAF yard tractors; 535 DAF yard chassis; 6 Buiscar trailer trains.

Computer Systems: Hardware 2 Unisys A10/A12; software in-house; functions Sealand Terminal Container control system; finance and training.

Rail Facilities: 3×550 m. rail tracks on the Terminal, served by 2×41 tons Demag and 1×45 tons Nelcon rail mounted road/rail transfer gantries. ECT Venlo inland rail terminal (175 km. from Rotterdam). Total area 6.5 ha. Daily shuttle services with 42 wagons (84 TEU) to/from ECT Alexander and ECT Delta Terminals.

Botlek Terminal (1st Werkhaven):

Berths and Cranage: Total quay length 802 m., depth 11.6 m. Container and Ro-Ro facilities, served by 2 Nelcon 40 tons container gantry cranes.

Direct Call Liner Services: BCSL, Koala, Kersten, NMB, Samskip, Stork, Wilhelmsen.

Terminal Facilities: Total area 24.8 ha.; storage 3,000 TEU (3 high); reefer points on Terminal, front handlers various; 10 yard tractors DAF/SISU; 20 yard chassis.

Rail Facilities: Rail link available.

Margriet Terminal (Prinses Margriethaven/Prinses Beatrixhaven):

Berths and Cranage: Total quay length 2,700 m., depth 10.65 m., served by 4×30 tons level luffing portal cranes, 3×25 tons cranes, 4×17.5 tons cranes and 2×67 tons mobile cranes.

Direct Call Liner Services: A.C.S., Alianca, ALL, Bank, Black Star, Bore, Capricorn, CATM, CAVN, Euro-Caribe, Eurosal, FMG, G&C Line, GNSL, H-L, H-S, Hoegh, India SS, MSC, NMB, Red Sea Express, SAECS, SITM, SNTM, Star Shipping, Transinsular.

Terminal Facilities: Storage 2,000 TEU (5 high); 1 rail mounted Nelcon (45 tons) yard gantry; various front handlers (to 42 tons). Consolidation: CFS on Terminal. Covered area 5,700 sq.m.

Unitcentre Terminals: Terminal operating Company: Unitcentre B.V., Zaltbommelstraat 10, P.O.Box 5048, 3008 AA Rotterdam. Tel: (10) 4237911. Fax: (10) 4950806. Telex: 28325 Uccom nl. Contact: A.J. Kleijn, Commercial Director.

Unitcentre Container Handling Statistics:

1991	409,242	
1992	457,832	
1993	403,000	(estimated)

Waalhaven – Pier 7:

Berths and Cranage: 800 m. quay length, maximum depth 12.2 m., equipped with 4×35 tons Krupp container gantry cranes.

Direct Call Liner Services: See "Waalhaven – Pier 6".

Terminal Facilities: Total area 22 ha. Storage 10,000 TEU. Equipment: 160 electric reefer points; 80 Conair reefer points; 6 rail mounted Conrad Stork (35 tons) yard gantries; 15 yard tractors; 20 yard chassis; front handlers see "Waalhaven – Pier 6".

Consolidation: See "Waalhaven – Pier 6".

Computer System: See "Waalhaven – Pier 6".

Rail Facilities: See "Waalhaven – Pier 6".

Waalhaven – Pier 6:

Berths and Cranage: 750 m. quay length, maximum depth 13.5 m. equipped with 3×50 tons Nelcon container gantry cranes.

Direct Call Liner Services: (All Terminals) Ahlers, Alpina, Bishcoff, BSC, CCS, CFNR, CMA, Comar, Cosco, DSR, Dubbelman, ESC, Eurobarge, H-L, Iscont, JCS, KNSM, Latvian, LB, LP, MDV, MOL, MTA, Murmansk, NSC, NYK, POL, Portlink, Rhine Container, UASC, Unifeeder, ZIM.

Terminal Facilities: Total area 17.9 ha. Storage 8,000 TEU. Equipment: 160 electric reefer points; 2 rail mounted Liebherr (40 tons) yard gantries; 1 rail mounted Conrad Stork (35 tons) yard gantry; 8 Kalmar (7×42 tons and 1×12 tons) front handlers; 3 Hyco (45 tons) front handlers; 15 Terberg yard tractors; 20 yard chassis.

Consolidation: CFS 2 km. distant. Total area 2 ha., covered area 6,000 sq.m.

Computer Systems: Hardware Tandem VLX; software in-house; functions container control, invoicing, EDI.

Rail Facilities: 4 rail tracks over total length of Waalhaven Terminals, equipped with road/rail transfer gantry crane.

Future plans: Optional 4th Nelcon container gantry crane.

Multi-Terminals: Terminal operating Company: Multi-Terminals Waalhaven B.V., Pannerdenstraat 50, Postbus 5242, NL-3008 AE Rotterdam. Tel: (10) 4002922. Fax: (10) 4280263. Telex: 28023 Store NL. Contact: R. van der Sluijs, Commercial Manager.

Quay number: 2200.

Multi-Terminals Container Handling Statistics:

1991	21,302
1992	36,018

Pier 2 Terminal:

Berths and Cranage: Multi-purpose Terminal with 1,500 m. of quays, providing 2 container/Ro-Ro berths. Quay cranes include 1 Takraf (60 tons), 9 Figee (2×36 tons, 2×16 tons, 4×8 tons, 1×5 tons), 3 Hensen (1×20 tons, 2×10 tons) and 2 Conrad Stork (17.5 tons).

Direct Call Liner Services: BSC, Cosco, Latvian, Navrom, Rickmers, van Aden.

Terminal Facilities: Total area 31.3 ha. (6,000 sq.m. stacking, 3.5 ha. covered). Equipment: 36 electric reefer points; 1 rail mounted Conrad Stork (35 tons) yard gantry; 1 Kalmar 42-1200 (42 tons) front handler; 1 Kalmar 32-1200 (32 tons) front handler; 1 Kalmar 25-1200 Ro-Ro (25 tons) front handler; 2 Kalmar 16-1200 (16 tons) front handlers; 28 various (6×8 tons, 7×5 tons, 4×4 tons, 11×3 tons) front handlers; 2 DAF 1301 DF yard tractors; 4 Terberg 200.4 yard tractors; 14 Mafi (40 ft. flatbed) yard chassis.

Consolidation: No CFS on Terminal.

Computer Systems: Hardware GEAC, IBM; software GEAC, Pakhoed/IBM; functions invoicing, management reports, equipment planning and reporting, administration, EDI.

Seaport Combi Terminal: Terminal operating Company: Seaport Terminals B.V., Merseyweg 70, NL-3197 KG Rotterdam (Botlek), P.O.Box 1197, 3180 AD Rozenburg. Tel: (1819) 44911. Fax: (1819) 12015. Telex: 29783 Brico NL. Contact: J.J. Erkamp, Deputy Director – Operations.

Seaport Combi Terminal Container Handling Statistics:

1991	140,196
1992	150,409
1993	152,500

Brittanie Terminal:
Berths and Cranage: Quay length 1,240 m., depth 12.6 m., providing 1 Kocks (70 tons), 2 Conrad Stork (38.5 tons) and 2 Bailey (25 tons) container gantry cranes and 1 Gottwald (50 tons) mobile crane.
Direct Call Liner Services: CGM, Eimskip, ELMA, Finncarriers, H-L, Olsen, OTAL, Star Shipping, TMM, Transroll, Wilhelmsen.
Terminal Facilities: Total area 32.5 ha. Storage 10,555 TEU. Equipment: 100 electric reefer points; 27 Conair reefer points; 3 Kalmar (14 tons) front handlers; 3 Lancer Boss (42 tons) front handlers; 6 PPM (40 tons) front handlers; 12 Svetruck (12 tons) front handlers; 3 various (28 tons) front handlers; 6 Sisu TR160 yard tractors; 9 Terberg R200 yard tractors; 15 Buiscar yard chassis and 60 various yard chassis.
Consolidation: CFS on Terminal. Total area 9,000 sq.m., covered area 2,500 sq.m. storage on Terminal. Reefer points on Terminal.
Computer Systems: Hardware Data General MV/7800 XP; software in-house; functions container stacking, planning and listing, Ro-Ro stacking area, depot control and container administration.
Rail Facilities: Rail connection.
Hours of Working: 0730 hrs. – 1600 hrs., 1600 hrs. – 0015 hrs., 0015 hrs. – 0730 hrs. on request.

Uniport Multipurpose Terminals: Terminal operating Company: Uniport Multipurpose Terminals B.V., Lloydstraat 35, NL-3024 EA Rotterdam. Tel: (10) 4789500. Fax: (10) 4760515. Telex: 21306 UPORT NL. Contact: W.A. Boer, Managing Director.
Terminal Merwehaven: Marconistraat 80, NL-3029 AK Rotterdam. Tel: (10) 4253222. Fax: (10) 4255215. Telex: 25488 UMTRD NL.
Uniport Multipurpose Terminals Container Handling Statistics:

1991	50,348
1992	48,574
1993	51,000

Berths and Cranage: Merwehaven: Quay length 335 m., depth 10.0 m., equipped with 1×Liebherr P115 (45 tons) container gantry crane and 1×Liebherr F1800 (45 tons) level luffing quay crane.
Direct Call Liner Services: Borchard, Caribtainer, EWIL, Montemar, NSC, SCI, WCL, WEC Lines.
Terminal Facilities: Total area 3.5 ha. (container marshalling 3.2 ha.). Storage 3,500 TEU. Equipment: 90 electric reefer points; 20 liquid nitrogen reefer points; 2 rail mounted Liebherr G200 SLR (35 tons) yard gantries; 2 Hyster H920B (42 tons) front handlers; 1 Hyster H350B (17 tons) front handler.
Consolidation: CFS on Terminal. Covered area 2,000 sq.m. Storage on Terminal; reefer points on Terminal; 2 Hyster H50XL (2.5 tons) forklifts.
Computer Systems: Hardware NCR 9050; software in-house; functions Terminal control, stacking system, gate control.
Rail Facilities: Available.
Hours of Working: 24 hours a day, 7 days a week.

Handico Terminal: Terminal operating Company: Handico Terminals B.V., Theemsweg 34, NL-3197 KM Rotterdam. Tel: (1819) 46200. Fax: (1819) 15147. Telex: 29805 HANDI NL. Contact: R. van Gelderen, Managing Director.
Handico Terminal Container Handling Statistics:

1991	42,000
1992	42,000
1993	42,000

Berths and Cranage: One berth, length 100 m., depth 6.0 m., served by mobile cranes.
Terminal Facilities: Total area 4.3 ha. Storage 3,000 TEU. Equipment: 10 electric reefer points; 2 Kalmar 16-1200 (16 tons) front handlers; 1 Kalmar 18-1200 (18 tons) front handler; 1 Caterpillar 12-1200 (12 tons) front handler.
Consolidation: CFS on Terminal. Covered area 2,500 sq.m. Storage on Terminal; 1 Caterpillar (12 tons) front handler; 3 Kalmar front handlers; 3 Caterpillar (2.5 tons and 2.4 tons) forklifts.
Computer Systems: Hardware IBM AS400/B35; software in-house; functions depot and repair administration, accounting, transport detail, statistics and management information.
Rail Facilities: Available at Handico depot.
Hours of Working: 0730 hrs. – 2015 hrs.

Hanno Rotterdam: Terminal operating Company: Hanno Rotterdam BV, Postbus 51255, NL-3007 GG Rotterdam. Tel: (10) 4858244. Fax: (10) 4847404. Telex: 28965 HANRO NL.
Harbour No.: 1300-1307.
Berths and Cranage: Maashaven: Total quay length 1,850 m., minimum depth 11.7 m., served by 4 portal cranes (up to 39 tons) and 12 other portal cranes (5 tons – 25 tons).
Direct Call Liner Services: Baco, Bank, Camship, Cobalt, Contemaris, Cosco, DL, DSR, ENC, Ethiopian, FA, Interglobal, Ivaran, LP, MISR, OTAL, PNSC, Portline, Samatour, Sinotrans, SJSC, Unimex.
Terminal Facilities: Total area 14 ha. Storage 7,500 TEU. Equipment: 63 electric reefer points; 1 rail mounted Nelcon yard gantry.
Consolidation: CFS on Terminal.
Computer Systems: Hardware DEC; software CIG; functions container administration.
Hours of Working: Monday to Friday 0730 hrs. – 2400 hrs.; Saturday 0730 hrs. – 1600 hrs.; other times by arrangement.
Future Plans: Terminal to be equipped with container gantry cranes.

Waalhaven Terminal: Terminal operating Company: Waalhaven Terminal B.V., Postbus 5308, NL-3008 AH Rotterdam. Tel: (10) 4298122. Fax: (10) 4298869. Telex: 28076 WAAL NL. Contact: P.A. Kuyper, Managing Director.
Waalhaven Terminal Container Handling Statistics:

1991	143,000
1992	164,500
1993	170,000

Berths and Cranage: One container berth, length 185 m., depth 6.5 m., served by 1×20.5 tons Aumund container gantry crane.
Direct Call Liner Service: Born.
Terminal Facilities: Total area 8 ha. Storage 7,000 TEU. Equipment: 66 electric reefer points; 6 Kalmar 16-1200 (16 tons) front handlers; 3 DAF yard tractors; 3 Buiscar yard chassis.
Consolidation: No CFS on Terminal.
Computer Systems: Hardware DEC Vax 3400; software in-house; functions container tracking.
Rail Facilities: 200 m. rail track.
Hours of Working: 0700 hrs. – 2200 hrs. on working days.

Hoogewerff de Rijke Terminal: Terminal operating Company: Hoogewerff de Rijke Terminals B.V., Postbus 5145, NL-3197 ZG Rotterdam. Tel: (10) 2310310. Fax: (10) 4385777. Telex: 28574 HRT NL. Contact: H. Treffers, Managing Director.
Hoogewerff de Rijke Terminal Container Handling Statistics:

1991	107,554
1992	102,420
1993	115,360

Berths and Cranage: Quay length 250 m., depth 12.5 m., served by 2×75 tons Takraf quay cranes and 2 harbour cranes.
Direct Call Liner Services: Lykes, Lys, Maras, Senator.
Terminal Facilities: Total area 8.5 ha (container parking 5 ha.). Equipment: Electric reefer points; 2 rail mounted Kocks yard gantries; 1 Belott (40 tons) mobile crane; 2 Hyster (42 tons) front handlers; 3 various yard chassis.
Consolidation: CFS on Terminal, covered area 1.5 ha.
Computer Systems: Hardware Altos; software Softpak; functions yard control.
Rail Facilities: Rail connection available.
Future Plans: Anticipated purchase of yard chassis and automation of crane stacking.

Bell Lines Terminal: Terminal operating Company: Bell Lijn B.V., Brielselaan 85, Postbus 1035, NL-3080 AA Rozenburg ZH. Tel: (1819) 46899. Fax: (1819) 15923. Telex: 29589 BELL NL. Contact: J.W. van Zundert, Terminal Manager.
Bell Line Terminal Container Handling Statistics:

1991	240,000	
1992	260,000	
1993	260,000	(estimated)

Berths and Cranage: Britanniehaven: Total quay length 310 m., maximum depth 7.5 m., providing 3 container berths served by 1×35 tons Kone, 1×32 tons Paceco-Vickers and 1×45 tons Liebherr T77 Super container gantry cranes.
Direct Call Liner Services: ASMN, Bell, Containerships, Unifeeder, Van Uden.
Terminal Facilities: Total area 4 ha. Storage 2,000 TEU. Equipment: 65 electric reefer points; 3 Svetruck (1×42 tons, 2×16 tons) front handlers.
Consolidation: No CFS on Terminal. 1×4 tons Balkancar and 2 Hyster (3 tons and 2 tons) forklifts.
Computer Systems: Hardware DEC Vax 4100; software DEC/in-house; functions gate and terminal control.
Rail Facilities: 2×300 m. rail tracks and 3 shunt tracks.
Hours of Working: 24 hours a day, 7 days a week.

BULK HANDLING FACILITIES:

Grain/Coal and Ore:

European Bulk Services (EBS) BV, Brielselaan 85 (Rotterdam Port No. 1359), P.O.Box 59180, 3008 PD Rotterdam. Tel: (10) 4961800. Fax: (10) 4961888. Telex: 62066.

1. *EBS Vulcaanhaven Terminal Vlaardingen:* Schiedamsedijk 2a (Vlaardingen Port No. 610), P.O.Box 59180, 3008 PD Rotterdam. Tel: (10) 4457500. Fax: (10) 4457572. Telex: 23394.
Berths and Cranage: Quay length 440 m., max. draft 12.0 m., at LLWS. Tidal range 6.3 ft., min. depth 10.52 m. (LW). 3×16 tons gantry cranes, 1×6 tons level luffing crane, max. air draft 16.0 m. at LW.
Terminal Facilities: All kinds of dry bulk, which can be handled by grab. Discharging by grab direct overboard. Loading direct by grab and partly reloading via conveyor belt. Loading and discharging by floating grab is also possible.
Capacity: 25,000 tons per day based on discharge of phosphate.
Open storage 44.855 sq.m. Covered storage 132,630 cu.m. Sheds 25.859 sq.m. Silos 77,250 cu.m.
Bunkers and fresh water from shore not available.

2. *EBS Botlek Terminal:* Montrealweg 151, Botlek (Rotterdam Port No. 4260), P.O.Box 59180, 3008 PD Rotterdam. Tel: (10) 4904450. Fax: (10) 4904470. Telex: 20568.
Berths and Cranage: Maximum size 90,000 Summer d.w.t. Depth at discharging berth 13.0 m. at LLWS. Depth at loading berth 10.0 m. at LLWS (tidal range 6 ft. 4 in.). Water density 1020. Equipment: 3×16 tons floating cranes; 3×36 tons floating cranes. Max. outreach: Floating cranes 20 m. – 35 m., pneumatics on jetty 25 m.
Terminal Facilities: Bunkers and potable water available during the day. Capacity depending on cargo 20,000 – 30,000 tons per 24 hours. All dry bulk grades handled, agri and mineral. Storage available in silos up to 60,000 tons in 170 bins and 32,000 tons in 5 bins (flat storage), both for agribulk only. No air draft restrictions.

3. *EBS Sint Laurenshaven Terminal:* Montrealweg 50, Botlek, Rotterdam (Port No. 4310), P.O.Box 59180, 3008 PD Rotterdam. Tel: (1819) 43500. Fax: (1819) 43582. Telex: 29745.

Berths and Cranage: Length of quay: Discharging quay 832 m., West Quay 847 m., Reloading quay 180 m. Vessel's maximum LOA no restrictions. Vessel's maximum beam no restrictions, if cargo can be discharged via conveyor belt. Direct over board, maximum beam is 36 m. If necessary, discharge by floating cranes is possible. Maximum Summer d.w.t. 80,000 to 90,000 tons. Depth 13.7 m. at HW by consent of Harbour Authority only, 13.0 m. at LLWS. Water density between 1002 and 1005. Equipment: 2×32 tons gantry cranes; 1×16 tons gantry crane; 1×16 tons level luffing crane; 1×15 tons mobile crane. Discharging and loading by grab direct overboard or via conveyor belt.

Terminal Facilities: Night (un)berthing allowed. Bunkers and potable water from shore not available. Maximum air draft 25.0 m. above NAP. Maximum outreach of cranes 44.5 m. Discharge rate 35,000 tons per day, based on discharge of coal. Dry bulk grades handled; all kinds of dry bulk that can be handled by grab. Open storage 156,225 sq.m., covered storage 361,440 cu.m.

4. *EBS Europoort Terminal (I/II):* Elbeweg 139, Europoort, Rotterdam (Port No. 5843-5862), P.O.Box 59180, 3008 PD Rotterdam. Tel: (1819) 62988. Fax: (1819) 58154. Telex: 29881.

Europoort Terminal (I):

Berths and Cranage: Maximum Summer d.w.t. and length no restrictions. Maximum displacement no restrictions. Length/depth main pier (outside) 352 m./18.0 m., length/depth main pier (inside) 315 m./14.0 m., depth at the dolphins 21.0 m. Water density 1025. Maximum outreach of cranes 28 m. (no protruding equipment), travel distance of cranes 240 m.

Terminal Facilities: Night (un)berthing allowed. Bunkers from shore not available. Potable water on main pier available. Maximum airdraft 23.0 m. Method of (un)loading, pneumatic, mechanical and grab, 4 travelling pneumatic unloaders 1,000 tons per hour, 4 floating units 1,500 tons pe hour. Normal average discharge rate per day 50,000 tons. Dry bulk grades handled Agri bulk (grains, oilseeds, feeding stuffs). Storage 110,000 tons in silos and floating storage; one complex of vertical storage.

5. *EBS Europoort Terminal (II):* (Port No. 5817-5838).

Berths and Cranage: Maximum length 300 m., maximum Summer d.w.t. 150,000 d.w.t., maximum depth (LLWS) 16.0 m. Water density 1025. 3 travelling pneumatic unloaders (1,000 t.p.h.), floating units up to 1,500 t.p.h. can be shifted from EBS Europoort Terminal I. Method of discharge: pneumatic, mechanical and grab. Travel distance of crane 180 m., no protruding equipment, maximum reach 23 m.

Terminal Facilities: No bunkers and no potable water available. Night (un)berthing allowed. Average discharge rate per day 15,000 tons (heavy grain). Dry bulk grades handled: Agribulk. Storage available, 100,000 tons in silos and floating storage.

Coal and Ore:

1. *EMO B.V. Maasvlakte:* Missouriweg Rotterdam-Maasvlakte (Port No. 8010), P.O. Box 9000, 3100 XA Maasvlakte Rt. Tel: (1818) 62611. Fax: (1818) 63435. Telex: 29632.

Europees Massagoed – Overslagbedrijf (EMO) B.V.: (European Bulk Transhipment Company).

Mississippihaven: World's largest bulk transhipment and storage installation for ore and coal is situated on the Maasvlakte. 3 fully loaded bulk carriers up to 350,000 d.w.t. can be discharged simultaneously.

A conveyor belt system (20 km.) connects the discharging pier in the Mississippihaven with the barge loading section in the Hartelhaven, the shiploading quay in the Amazonehaven and with the storage area.

Berths and Cranage: Unloading capacity 150,000 t.p.d. Sea berth: Draft at MLW 24 m. (74 ft.), berth length 1,050 m. (3,445 ft.), maximum deadweight 350,000 d.w.t. Unloading equipment: 2×50 tons and 1×85 tons unloaders, outreach 45.0 m., grab clearance 30 m. (98 ft.).

Amazonehaven:

Loading Equipment: Loading capacity 50,000 t.p.d., continuous ship loader outreach 31.5 m. (103 ft.), quay depth 21.0 m. (68 ft.).

Terminal Facilities: Stockyard storage capacity, stockyard 6,000,000 tons, stockyard equipment 5 stacker reclaimers.

Barge Pier: Depth at MLW 6.0 m. (20 ft.), length 950 m. (3,120 ft.). Loading equipment: 3 continuous barge loaders, loading capacity up to 80,000 t.p.d., unloading equipment for barges 2×50 tons unloaders.

Wagon Loading: Loading capacity up to 2,500 t.p.h. (up to 10 full trains per day).

Blending Installation: 6 bunkers of 7,000 tons each.

Screening Installation: 4 semi-mobile Liewell units 150/200 t.p.h. per unit and 2 mobile units, washing installation for coal.

Hours of Working: Around the clock, including weekends.

2. *Europoort C.V.:*

Ertsoverslagbedrijf Europoort C.V.: Markweg 131 (Port No. 6250), 3198 NB Europoort Rt. Tel: (1819) 57899. Fax: (1819) 57703. Telex: 29728. Management: B.V. Stuwadoorsmaatschappij Kruwal.

This transhipment Company, specialising in the handling of iron ore, is situated between Caland Canal and Dintelhaven.

A conveyor belt system connects the discharging berth in the Caland Canal with the barge loading section in the Dintelhaven, both direct and via the stockpiling area.

Discharging Section: Quay length 645 m./395 m., depth at MLW 59 ft. (S.W.) – 74 ft. (S.W.). Equipment: 3 unloading towers conveyor belts, 4 stacker reclaimers. Discharging: Max. 6,900 tons/hr., average 4,500 tons/hr. Maximum outreach discharging gear 34.75 m. (114 ft.), maximum height of gear above MHW 24.0 m. (78 ft. 8 in.). Storage capacity 3.5 million tons.

Loading Section: Quay length 850 m., max. depth at MLW 20 ft. (S.W.). Equipment: 2 loading machines. Loading rate: Max. 6,000 tons/hr. Maximum outreach loading gear 18.1 m. (59 ft. 4 in.). Transhipment capacity 20 million tons a year.

Rail Facilities: None.

Hours of Working: 24 hours a day, 7 days a week.

SPECIALISED CARGO-HANDLING FACILITIES:

Fruit:

There are two modern fruit terminals in the Merwehaven:

1. *Rotterdam Fruit Pier (R.F.P.):* Galileistraat 32, NL-3029 AM Rotterdam. Tel: (10) 4763055. Fax: (10) 4763432. Owned and operated by the fruit importers: Velleman en Tas, Citronas and International Fruit Company.

Berths and Cranage: Quay length 260 m., max. depth 9.65 m.

Terminal Facilities: 5,000 sq.m. temperature-controlled transit shed (Temperature 4°C – 8°C). and 5,000 sq.m. for the cold storage.

2. *Fruit Terminal Rotterdam (F.T.R.):* Galileistraat 36, NL-3029 AM Rotterdam. Tel: (10) 4251251. Fax: (10) 4761373. Contact: Mrs. I. Van den Maagdenberg. Owned by Rotterdam Fruit Pier (R.F.P.) and Fruit Stevedores Rotterdam (F.S.R.).

Fruit Stevedores Rotterdam (F.S.R.) is acting as stevedores and Terminal operators on the Fruit Terminal Rotterdam.

Berths and Cranage: Quay length 600 m., max. depth 9.65 m., 2 pallet gantry cranes and 13 cranes (5 tons to 37 tons).

Terminal Facilities: Three temperature controlled transit sheds (temp. 4°C – 8°C), total area 32,400 sq.m., plus 13,500 sq.m. cold stores for fruit storage. Each temperature controlled shed can contain 6,000 pallets of fruit. The short side of each shed runs parallel to the quay side, whilst, via a row of doors in both long sides, 48 lorries can be loaded simultaniously per shed.

Rail Facilities: One rail track on the Terminal.

Future Planning: To take part in the Rotterdam Fruitport: Concentration of fruit activities and services is the basic idea of fruitport, a strategic combination of logistics services dedicated to the flows of fruit, vegetables and fruit juice cencentrates.

Hous of Working: 24 hours a day, 7 days a week (partly on voluntary basis).

Juice:

European Juice Terminal B.V. (E.J.T.):

Port Number 260.

IJselhaven Terminal: EJT stands for a modern equipped terminal (1984) handling the discharge and storage of Brazilian Orange Juice Concentrate (Brazil being the leading force in the world juice market).

At the terminal, storage takes place under −10° C in tanks having a capacity of 1,000 tons each.

Two bulk reefer carriers ("Orange Star" and "Orange Blossom") are purpose built and carry 12,000 tons concentrate each.

Thousands of road tankers are taking the concentrate to customers spread all over Europe. As a whole, Rotterdam handles 80% of all orange juice destined for consumption in Europe. About half of this goes into storage owned and operated by EJT, and the remainder is shipped directly to processing plants.

Cold Storage: *HIWA Rotterdam Port Cold Stores:* Van Maasdijkweg 15, 3088 EC Rotterdam. Tel: (10) 4294877. Fax: (10) 4296420. Telex: 28128. Contact: Mr. D. Zeddeman, Managing Director. Port No. 2330.

Specialists in handling and storing fruit juice concentrates and fruit juices. Decanting, drumming, defrosting and blending. Sophisticated laboratory for sampling and analysing.

Waalhaven Location: Capacity 65,000 cu.m. for freezing (−18°C) and chilling (+2°C).

IJsselhaven Terminal: Capacity 115,000 cu.m. for freezing (−18°C), capacity will be increased with 40,000 cu.m. in the course of 1994.

Berths: Max. depth 9.65 m., quay length 480 m.

L.A.S.H.: Vessels discharge and load on buoys in Waalhaven.

Length and depth between buoys:

Buoy	Length	Depth	
26	286 m.	13.15 m.	(LASH buoy)
27	286 m.	13.15 m.	(LASH buoy)
28	160 m.	13.15 m.	
29	300 m.	13.15 m.	
30	240 m.	11.65 m.	
34	250 m.	11.65 m.	

Ro/Ro Facilities:

North Sea Ferries Terminal: Terminal operating Company: Noordzee Veerdiensten (North Sea Ferries) B.V., Postbus 1123, NL-3180 AC Rozenburg ZH. Tel: (1819) 55333. Fax: (1819) 55215. Telex: 29652 NSF NL. Contact: P.M. Nagelkerke, Quay Superintendent.

North Sea Ferries BV Container Handling Statistics:

1991	44,196
1992	45,829
1993	46,100

Berths: Quay length 270 m., depth 7.0 m., with 3 Ro-Ro ramps.

Direct Call Liner Services: NSF.

Terminal Facilities: Total area 20 ha. Equipment: 6 electric reefer points; 1 Nellen (25 tons) mobile crane; 1 Caterpillar (42 tons) front handler; 1 Kalmar front handler; 1 Contchamp 4560RS front handler; 1 Steinbock (6 tons) front handler; 20 Douglas N58 yard tractors; 690 various yard chassis (20 ft./30 ft./40 ft. skeletal).

Consolidation: No CFS on Terminal.

Computer Systems: None.

Rail Facilities: Rail link to Terminal.

Future Plans: Additional Ro-Ro berth.

Stena Lline B.V. Terminal: Terminal operating Company: Stena Line BV, Postbus 2, NL-3150 AA Hoek van Holland. Tel: (1747) 83944. Fax: (1747) 87047. Telex: 32557 ZLDVZ NL. Contact: B. Severed, Managing Director.

Berths and Cranage: Quay length 580 m., providing one Ro-Ro berth.

Direct Call Liner Services: Stena Sealink, Stena.

Terminal Facilities: Total area 3 ha., 3 DAF yard tractors.

Computer System: None.

Hours of Working: 7 days a week (0700 hrs. – 2315 hrs.).

P & O European Ferries Terminal: Terminal operating Company: P & O European Ferries Rotterdam B.V., Postbus 1114, NL-3180 AC Rozenburg. Tel: (1819) 62366. Fax: (1819) 63463. Telex: 29760 POEF NL. Contact: J. Zevenbergen, Port Manager.

Berths and Cranage: One Ro-Ro berth, length 324 m., depth 7.0 m. with double deck Ro-Ro ramp. 1×32 tons Paceco Vickers container gantry crane and 1×25 tons mobile crane.

Direct Call Liner Services: P&OEF.

Terminal Facilities: Total area 14.5 ha., 2 front handlers and 10 yard tractors.

Rail Facilities: 200 m. of rail track.

No facilities for discharging dirty ballast at Mobil (2nd. Petrol Haven), Texaco (5th Petrol Haven), Tank Terminal Rotterdam (Toronto Haven) and Paktank (3rd. Petrol Haven).

No bunkers (ex-installation) at Mobil Oil, Esso, Tank Terminal Rotterdam, Paktank, V.O.T.T. and Nerefco.

Moerdijk:

Dimensions of sea-going ships on the river Oude Maas: Vessels sailing for the rivers Oude Maas and Dordtse Kil with a length of more than 135 m. or a breadth of more than 17.5 m. must contact the Harbour Co-ordination Centre (H.C.C.).

The maximum length allowed is 175 m. (between perpendiculars).

The maximum breadth allowed is 25 m.

Passage with a length of more than 175 m. and/or a breadth of more than 25 m. is possible under certain conditions.

This permission must be applied for at the Harbour Co-ordination Centre in good time, in writing either by telex or fax.

"In good time" is to be understood: for incoming ships, at least 24 hours prior to entering the River Oude Maas. For outgoing ships and ships shifting berth, at least 24 hours prior to leaving berth.

The application for these ships should contain the following data:

1. Ship's name and call sign.
2. Nationality.
3. Length and breadth in metres.
4. Expected date and time of arrival at the Oude Maas, Dordtse Kil or departure from berth.
5. Gross tonnage and deepest draft on arrival. (Draft in fresh water.).

The address for permission is: Harbour Co-ordination Centre, 15 Galvanistraat, 3029 AD Rotterdam. Tel: 010 – 4251400. Telex: HCC-24045. Fax: 010 – 4771800.

Restrictions: Max. draft Oude Maas 31 ft.(FW), draft Dordtse Kil 25 ft. 6 in. (FW); max. length 175 m. (between perpendiculars), max. breadth 25 m., max. height 41 m., channel width (100 m. – 150 m.).

The use of tugs is compulsory for certain categories of vessels, the number of which depends upon length, draft and circumstances.

Also see "Moerdijk".

DENSITY:

Europoort: At high water 1025; at low water 1022.

Botlek: At high water 1014; at low water 1001.

Waalhaven and other basins in the Rotterdam port area: at high water 1004 and at low water 1000. All depending on the amount of fresh water carried down river.

STEVEDORES: Official office hours in Rotterdam are: Monday – Friday 0900-1700 hrs. Saturdays 0900-1200 hrs.

1. Bulk Cargoes other than Agribulk:
EMO B.V. and Europoort C.V.: Around the clock, weekends inclusive.
Bulk cargoes other than EMO BV and Europoort CV.
Monday 0730 hrs. – Saturday 1400 hrs. continuously. For work between Saturday 1400 hrs. and Monday 0730 hrs. permission is required from the labour authorities and unions. Labourers are only available on a voluntary basis.

2. Agribulk – European Bulk Services (EBS), Europoort Terminal I and II and Botlek Terminal:

Monday 0730 hrs. until Saturday 1530 hrs. Meal breaks: 30 minutes per shift.

In principle, no work is performed on Saturday nights, Sundays and official holidays.

Overtime: Work during weekends and holidays to be agreed with the management.

3. Containers: The large Container terminals ECT and Unit-Centre operate around the clock, weekends inclusive.

No work is permitted: 24th December 1530 hrs. – 26th December 0715 hrs., 31st December 1530 hrs. – 1st January 1515 hrs.

4. General cargo: The shift hours are as follows: Day shift 0730-1600 hrs. Evening shift 1600-0015 hrs. Night shift 0000-0730 hrs.

Normal working hours are during the day shifts and the evening shifts on Monday till Friday as well as the day shift on Saturday. Generally gangs will be allocated on basis, 2 for the day shift and 1 for the evening shift. For the night shift overtime has to be paid, as well as for work on Sundays and holidays, starting as from the end of the day shift on the preceding day until the beginning of the day shift on the next day.

5. Oil: At the oil refineries of Shell, Texaco, Esso, Kuwait Petroleum Europoort (K.P.E.) and Nerefco, tankers can discharge continuously, including weekends without extra charge. This also applies to the Maasvlakte Oil Terminal, Maatschap Europoort Terminal (Mobil) and Europak.

The oil storage companies operate around the clock at overtime rates:

Paktank	1st, 2nd and 3rd Petroleum Harbour and Chemie Harbour
V.O.T.T.	Vlaardingen and 3rd Petroleum Harbour
Tank Terminal Rotterdam	Torontohaven, Botlek.

MEDICAL: All medical facilities are available. Advance notice only in emergency or if attendance required during the weekend.

OPENING/CLOSING HATCHES: On liners by stevedores. On tramp vessels by crew; stevedores lift beams.

FRESH WATER: Fresh water can be supplied ex-quay at many berths. Where no shore connections are available and at buoys fresh water can be delivered by waterboat (Hatenboer-Neptunus. Tel: (10) 4767711. Fax: (10) 4771596).

FUEL: All types of oil bunkers can be supplied by means of barges or ex-shore installations for tankers. Coasters can take bunkers ex-installation during their inward or outward passage. Advance notice is required for vessels which are only 24 hours or less in port and for bunkering during weekends.

FIRE PRECAUTIONS: No craft are allowed alongside tankers during discharge or loading of dangerous cargoes and during ballasting.

GANGWAY/DECK WATCHMEN: Recommended.

CERTIFICATES: See "Documents".

REPAIRS: A variety of shipyards and workshops are available for engineering and all types of repairs. Various yards are specialised in the construction of dredgers, ferry boats, offshore equipment, heavy derrick vessels and/or jumboizing vessels.

If VLCC's with a length of over 270 m. do not have full engine power for manoeuvering or have not made sufficient engine trials after repairs, they must be escorted to and from the repair yards by 2 tugs of sufficient capacity. The Municipal Harbour Master (also acting Government Harbour Master), must be notified in this respect 12 hours prior to arrival or departure.

For repairs on board any vessel outside a ship repair yard, permission from the Municipal Harbour Master is required. Depending on nature and location of repairs, a certificate may be required to be issued by a recognised marine chemist after inspection.

For sea-going vessels an application for permission shall be made by telex to the Harbour Master of Rotterdam (Harbour Co-ordination Centre, Dangerous Goods Department. Telex: GEVST 25720), containing the following information:

1. Ship's name.
2. Date of commencement of repairs.
3. Duration of repairs.
4. Berth.
5. Nature of repairs.
6. Location of repairs.
7. By whom repairs will be carried out.
8. Any cargo-operations, bunkering etc., during repairs.
9. Cargo on board and stowage.
10. Effect of repairs on ship's manoeuvrability and time and duration of immobilised situation.

The Municipal Dangerous Goods Department will contact the Labour Inspectorate, which organisation is in charge of the National law: Cleaning and repairing tank vessels.

Some shipyards are situated beyond the bridges across the River Maas, East of Rotterdam. They can be reached via the Koningshaven, where a traffic bridge, the "Koninginnebrug", has to be passed. Max. draft at HW: 21 ft. (FW.) LW: 17 ft. (FW.) For opening times see "Bridges".

YVC Bolnes B.V.:
Repair yard and Engine works, Oostdijk 25, 3077 CP Rotterdam, Holland. P.O. Box 9357, 3007 AJ Rotterdam, Holland. Tel: (10) 4799799. Telex: 20459. Fax: (10) 4793760.

Facilities:	Dock 5	Dock 6	Dock 7
Length:	230 m.	275 m.	405 m.
Breadth:	33.45 m.	40.38 m.	90 m.

Largest dry dock for vessels up to 500,000 d.w.t. with tank cleaning installation. See "Repairs".

Dry docking and ship repair facilities for all types and sizes of vessels and offshore structure. Port repair services throughout Rotterdam port.

Van der Giessen-de Noord:
Van Der Giessen-de Noord, Maritime Services Division B.V., P.O.Box 13, 2950 AZ Alblasserdam, Holland. Tel: (1859) 13700. Fax: (1859) 13514.
Ship repairs – Management:
After office hours, contact: H.J. Jurgens, General Manager. J. van Hecke, Project Manager. N. Zwijnenburg, Project Manager. J.P. Baas, Project Manager.
Shipyard longitudinal slips:
No. 1: 80 m. × 9.5 m., draft 3.3 m., lifting capacity 1,200 tons.
No. 2: 115 m. × 20 m., draft 5.10 m., lifting capacity 3,000 tons.
No. 3: 105 m. × 20 m., draft 4.70 m., lifting capacity 3,000 tons.
2 Shiplifts:
Sternlift No. 1: 125 m. × 13.80 m., draft 4.00 m., lifting capacity 500 tons.
Shiplift No. 2: 51 m. × 14 m., draft 6.00 m., lifting capacity 1,250 tons.
4 Repair quays. 2×20 ton and 1×15 ton cranes. Yard area: 73,000 sq.m.

Vlaardingen Oost Shiprepair:
Vlaardingen Oost Scheepsreparatie B.V., (P.O. Box 47, 3130 AA Vlaardingen), Schiedamsedijk 2, 3134 KK Vlaardingen. Tel: (10) 4342744. Fax: (10) 4340887. Telex: 22119.
Management: J.A. Ransdorp.
Voyage repairs throughout Rotterdam harbour and in other ports and abroad.
Location: Vulcaan Harbour No. 612, 12 miles inland, no locks.
Shipyard: Floating docks:
Dock No. 1: Lifting capacity 4,200 tons, length 110 m., breadth 20.3 m. draft over blocks 6.0 m.
Dock No. 2: Lifting capacity 5,300 tons, length 127 m., breadth 23.0 m., draft over blocks 7.0 m.
Dock No. 3: Lifting capacity 3,500 tons, length 130 m., breadth 15.8 m., draft over blocks 6.0 m.
Broadside slipway lifting capacity 3,500 tons, length 125 m., breadth 25.0 m.
Stand-by Berths: Available in Vulkaan Harbour, draft up to 13.0 m.
Mooring facilities: On the buoys for ships up to 80,000 d.w.t. with max.draft of 13 m.
Cranes: 8 cranes up to 17.5 tons.
Yard area/Outfit quays: About 11,000 sq.m./550 m.

Van Brink Shipyard B.V.:
Van Brink Shipyard B.V., Waalhaven Pier 8, Ophemerstraat 60, 3089 JE Rotterdam. Tel: (10) 4291511 (day and night). Telex: 28111 brink NL. Fax: (10) 4295923.

U.K. Agents: Carlden Marine and Industrial Agencies Ltd., Plantation House, 4th Floor, 23 Rood Lane, London EC3M 8AP. Tel: 071-4811744. Fax: 071-6231200.
Specialised work: Port repairs for hulls, deck and electrical equipment. Lay-by berth facilities.
Other work: After-sales service and spare parts for: Daihatsu auxiliary diesel engines, Hansin propulsion diesel engines, Kvaerner Eureka pumps, Tanabe Air compressors, Naniwa pumps, Kvaerner Brug deck equipment, Ameron glassfibre piping, Tsuji deck machinery.

CUSTOMS ALLOWANCES: Spirits: 5 litres per vessel plus 1 bottle per man. Wine: 5 litres per man. Each crew member permitted out of bond for use on board only, 200 cigarettes or 25 cigars, or 500 gm. tobacco.

Each crew member is permitted to take 40 cigarettes if he goes ashore.

DRY DOCKS: Largest dry dock for vessels up to 500,000 d.w.t. with tank cleaning installation for the largest vessels. See "Repairs".

REPATRIATION: All arrangements for crew changes and repatriation can be made.

AIRPORT: Rotterdam Zestienhoven Airport (distance 6 km.) and Amsterdam Schiphol Airport (distance 70 km.) are served by national and international airlines.

TIME: During Winter GMT plus 1 hour. During Summer GMT plus 2 hours.

HOLIDAYS: New Year's Day, Easter Sunday, Easter Monday, Queen's Birthday (30th April), National Liberation Day (5th May), Whit Sunday (4th May), Ascension Day (25th May), Whit Monday (5th June), Christmas Day, Boxing Day.

POLICE/AMBULANCE/FIRE: Police Head Office. Tel: 4242911. Telex: 23587. Fax: 4241911. Address: Doelwater 5, 3011 AH Rotterdam.

General alarm, accidents, Ambulance, Fire. Tel: 06-11.

River Police. Tel: 4243410. Address: Sint Jacobsweg 6, 3024 EJ Rotterdam.

Emigration office. Tel: 4243480. Fax: 4241934.

TELEPHONES: A telephone is usually placed on board without extra charge at major shipyards, oil and grain terminals.

EMERGENCY CO-ORDINATION:

Emergencies/Disasters:

Contingency information: A disaster, aircraft accident, leaking tanker, explosion, poisonous gas dispersion or any other imminent danger where human life might be involved, happily seldom occur in the Netherlands. Nevertheless, there always remains a small chance, an accident can happen. And even an occurence far away can affect the port area (e.g. Chernobyl).

The risks to which one is exposed nowadays have increased, especially when noxious and dangerous goods are involved. The government has to reduce the effects of a disaster. Although prevention is considered to be of great importance, every effort was made to set up an efficient contingency plan.

IF SIRENS ARE HEARD IT MEANS: ALARM!!!

If you hear the sirens, immediately enter (somewhere) and stay inside. This effects everybody. Close windows and doors and shut down the air conditioning.

Tune to Rotterdam Port Office and/or Radio Rijnmond. Rotterdam Port Office will inform you in both Dutch and English language on VHF Channel 11.

On FM 93.4 MHz on your radio you will be (mostly in Dutch language) informed about the danger and the activities: to stay inside or to evacuate. Also information will be given about the area affected. You will also be told when the situation is regarded safe. Also the Harbour Office (VHF Channel 11) can provide the necessary information.

If only a limited area is affected you will be informed by either patrol cars (police) or patrol boats (Port of Rotterdam) by means of loudspeaker installations.

If the advice is given to "remain inside" the advice says: Render help to others! Offer shelter. Inform other people who did not hear the alarm. If you hear via Radio Rijnmond (93.4 FM) or VHF Channel 11 that a gas dispersion or radioactivity exists, immediately:

extinguish open fires and boilers, also the pilot-flames;
close all air inlets and escapes;
choose accommodation, if possible in the centre; off the wind. If possible on the highest level, but without ventilation;
Take a radio with you and remain listening;
Radio Rijnmond will be your most important information source as telephones will probably refuse to assist due to an instant lack of capacity;
Keep wet cloths ready to cover nose and mouth if necessary;
Do not smoke and avoid exertion so as to limit the use of oxygen.
Stay inside until further notice.

It might happen that all people have to leave the area for some time. E.g. due to a gas dispersion.

A likely decision will be ordered by the mayor of the city and transmitted by the radio.

In that case:
Shut down all engines;
Take only the utmost necessities; valuables, passports, money, clothes, toilet articles, domestic animals and if possible a portable radio;
lock doors.

The municipality will provide public transport if possible. You will hear about this from the patrol cars or boats or via Radio Rijnmond.

Reception centres will be established for refugees. Sick and disabled people are if necessary transported by ambulance or wheelchair taxis. Notice: On each first Monday every month the sirens are tested at 1200 hrs. If this day is an official holiday, the test will be carried out the next week.

The siren might go off due to technical trouble. Radio Rijnmond (93.4 FM) will inform if this is the case.

PORT RECEPTION FACILITIES:

Sources of waste on board ships: Any vessel has a wide variety of potential pollutants (harmful substances) on board, such as cargo, bunkers, stores, etc.

Each of these potential pollutants may generate waste materials in due course. Bulk liquid cargoes will also generate oily and chemical residues after cleaning cargo and bunker tanks, bunkers may make sludge during purification, leakages in and cleaning of engine rooms may generate bilge-water and residues from stores and packing material may form garbage.

In order to prevent the pollution of the marine environment by discharges into sea from ships of harmful substances or effluents containing such substances, MARPOL 73/78 was established. To achieve this aim, MARPOL 73/78 contains 5 annexes, in which detailed regulations are given with respect to the handling on board ships and the discharge into the sea of 5 main groups of harmful substances.

IN PORT ANY DISCHARGE INTO THE WATER OF POLLUTANT MATERIAL FROM SHIPS IS PROHIBITED.

Adequacy of reception facilities: Different sources of pollution should be checked in order to determine the need and the adequacy of reception facilities in port.

Ship related sources from which harmful substances may enter the water as a result of ship's operations are:

Any ship when disposing of fuel oil residues and oily bilges;
Any ship when disposing of garbage;
Tanker operations where harmful substances are discharged as a result of tank cleaning procedures and ballasting operations;
Ships, other than tankers during ballasting and cleaning fuel tanks and the discharge of this ballast and washing;
Chemical tankers where residues and mixtures of noxious liquid substances, which have been handled in port are required to be discharged to reception facilities;
Marine casualties such as stranding, foundering and collisions;
Terminal operations where harmful substances can be spilled during loading and unloading cargo and the bunkering of oil on all types of ships and barges;
Operations in transfering oil and noxious liquid substances from one vessel to another, such as in the case of lightering operations or bunker from barges.

It is clear that the adequacy of port reception facilities only should be related to the first 5 causes. The three other causes shall be dealt with by spill response operations. According to the Convention (MARPOL 73/78), ports are required to provide adequate reception facilities for residues and mixtures of harmful substances to such an extent that ships are not caused *undue delay* when discharging their residues and mixtures to reception facilities.

Spills into the marine environment in port: Harmful substances entering the marine environment, caused by marine casualties, leakages and spills, including overflows from bunkers and cargo tanks, will call for spill response operations.

Because of the rapid changes in spill location and conditions, a swift response to any spill, which floats on the surface, is necessary.

The Port Authority, in conjunction with other emergency services, employs facilities in case of marine accidents in port, where pollutant material enters the water.

A contingency plan for major spills includes the following actions, executed by the Harbour Co-ordination Centre (HCC) of the port:

Collect and disseminate information, follow up the evolution of the situation, estimate the scale of the spill;
Co-ordinate traffic and if appropriate, direct the clean-up operation;
Keep adequate and detailed records.

The contingency plan contains information regarding the availability of:

Means of assistance: towage, patrol boats, traffic control.
Means of action to contain and recover the spill: oil booms, recovery vessels equipped with skimming devices, vacuum trucks and transport barges.
Means of control of the source: leak containment equipment, pumping units, salvage equipment, etc.

Overflows as a result of bunker operations form a major part of accidental water pollution in the Port of Rotterdam. Because, in the Port of Rotterdam the vast majority of all bunker operations are carried out by self propelled tanker barges, protective measures to prevent such overflows are obvious and shall be applicable to all ship-to-ship operations in general and to bunker vessel/seagoing vessel operations in particular.

Protective measures are:

Effective deck watch in attendance on board both ships.
An agreed ship/ship communication system in operation.
Agreed procedures for bunker handling.
An agreed emergency shutdown procedure.
Certified bunker hoses, in good condition and properly rigged.
Effectively plugged scuppers on deck of both vessels and drip-trays in position.
Unused bunker connections shall be blanked.
Sea and overboard discharge valves, when not in use, shall be closed and lashed.

Disposal of ship's waste: The sea and inland waters are continuously in need of protection against the threat of pollution. It is obvious that the practice of disposing or dumping of waste in the marine environment must be stopped. Enforcement of the international MARPOL Convention is one way of protecting the sea against pollution. As a complement of the prohibition of disposing of residues and mixtures of harmful substances at sea, ports have to provide adequate reception facilities. Naturally these reception facilities are not only open to sea vessels but to inland barges as well.

According to Dutch Law (Act for the Prevention of Pollution from ships), port authorities are entitled to lay down regulations on the use of reception facilities in their own harbour.

On this basis the Port of Rotterdam has drafted a new chapter regarding port reception facilities in the Port By-Laws. These regulations have been used as a model for the Port By-Laws of all Dutch ports. The By-Laws stipulate the conditions under which the Port Management will designate facilities to receive both oily and chemical waste and garbage.

Five categories of facilities will be eligible for designation under certain conditions, provided these facilities are licenced under the Chemical Waste Act:

(A) Terminals with loading and unloading facilities for liquid bulk cargoes and ship repair yards. These companies may only receive those substances that are included in their chemical waste permit and have been handled during respectively cargo and repair operations by that particular company.

(B) Companies that are exclusively or primarily involved in the collection, storage , treatment, processing and disposal of harmful substances from ships. These companies must have permanent premises ashore and include the ship cleaning stations.

(C) Companies with mobile collecting facilities for liquid waste, such as barges and trucks, who possess no permanent premises ashore, with a permit for collection and delivery under the Chemical Waste Act, that obliges them to deliver their waste to companies designated under (B).

(D) Companies with permanent premises for the reception, processing and disposal of garbage and residues of dry cargo.

(E) Companies with mobile collecting facilities for garbage and residues of dry cargo, who are obliged to deliver this waste to the companies designated under (D).

Under the Prevention of Pollution from Ships Act, ships have been prohibited from discharging harmful substances to facilities of non designated companies. Reception by unauthorised units is likewise prohibited. Both contraventions are economic offences under Dutch Law.

The designation of a port reception facility shall be made with due observance of the proportion between the anticipated offer of harmful substances from ships on one hand and the reception capacity within the harbour on the other hand.

Waste disposal strategy: For the reception and treatment of oillike and chemical waste from ships, a strategy has been put up. In the first place the reception and treatment of harmful substances shall be useful to an appropriate disposal of this waste. This suitability principle has three elements:

Continuity, a responsible economic and technical functioning of a treatment plant will be of paramount importance for a continuous process chain in general and for a continuous reception of waste material in particular.

Disposal procedures, optimum environmental treatment methods and recycling has to be promoted, reduction of quantities and harmfulness of residues with responsible treatment must be realised.

Capacity and dispersion, treatment capacity has to harmonise with the delivery of harmful substances, optimum dispersion and placing of reception facilities has to be realised.

In the second place disposal activities must be executed by private companies, while any monopoly shall be prevented.

Aforementioned strategy plays an important role in the policy of the Ministry of Environment regarding the issuing of licences in accordance with the Chemical Waste Act for the collection, storage, treatment and final disposal of harmful substances.

Any licencee is obliged to accept all harmful substances, which have been offered to him. In this way it is always insured that a ship that wants to deliver harmful substances to a reception facility will be able to do so under the restrictions and requirements which have been communicated.

These conditions take into account:

The types of harmful substances that will be received;

The tariffs of the costs to be charged to ships that deliver harmful substances;

The reporting in advance of the intension of the ship to deliver harmful substances;

The reporting of the reception of the harmful substances on a so called transfer form by the reception facility.

Cleaning:

For cleaning and gas freeing, the Master has to report at least 24 hours prior to the arrival to the Harbour Co-ordination Centre (H.C.C.) the following in writing:

(a) Name and call sign of ship;
(b) Nationality and port of registry;
(c) Name of the agent, shipowner or charterer;
(d) Date and time of cleaning operations;
(e) Berth where cleaning is to be carried out;
(f) Indication of tanks to be cleaned;
(g) Chemical or technical name of the last carried products;
(h) Method of cleaning.

Tank Cleaning – Waste Water:

TCR Environmental Techniques (Tankcleaning Rotterdam) has a complete Port Reception Facility (MARPOL – Treaty) with floating and rolling equipment for all cleaning jobs and for the collection and processing of all kinds of dirty waste water, such as ballast water, slops and industrial chemical wastes. Shore installation at TCR (Rotterdam-Botlek).

SEAMAN'S CLUBS:

International Seaman's Centre – Heyplaat, Oostbroekweg 4, 3089 KL Rotterdam Heyplaat. Tel: (10) 4290702. Bar, barbeque, basketball, billiards, darts, information, library, mail service, money-exchange, shop, quiet room, snacks, soccer, swimming pool, table-tennis, telephone service, TV, Video, track, volleyball.

Seaman's Centre – "De Beer/Europoort", Europaweg 208, 3198 LD Rotterdam Europoort. Tel: 01819 – 63133/63343. Bar, barbeque, basketball, library, mail service, money exchange, shop, snacks, snooker, soccer, swimming pool, table-tennis, telephones, TV, Video, tennis, volleyball.

Seaman's Home – Rotterdam, Willemskade 13, 3016 DK Rotterdam. Tel: (10) 4119260/4148952. Restaurant, bar, shop, money-exchange, laundry, telephone service, mail service, information, social assistance, church, sports, billiards, table football, darts, radio, TV/Video, reading room.

HARBOUR DUES: Ports in the Rotterdam-Rijnmond area came to terms on harbour dues for sea-going vessels.

When ships call at two or three ports in the Rijnmond area, ship's Owners have to pay harbour dues only once. This agreement will come into force as from 1st September 1994. The following ports entered into the agreement: Schiedam, Vlaardingen, Maassluis, Dordrecht and Moerdijk.

DEVELOPMENTS: In 1992, the construction of the ECT/Sealand Terminal was completed at the Maasvlakte. This fully computerised Terminal, with a capacity of 450,000 containers a year, was put into operation in the first half of 1993.

Plans have been crystallised for further expansion of container transhipment on the Maasvlakte: The Delta Plan 2000-8.

In 1993, Rotterdam Municipal Council provided credit to allow a start to be made on the first phase of the construction of quay walls for eight new "dedicated" container terminals.

SHIPMASTER'S REPORT: September 1988.

Berth: Akzo Zout Chemie, Botlek.

Pilotage: Call "Maas Pilot" when approaching pilot boarding ground. The Pilot boards from a small boat which is sent from the large pilot cutter, or from a yellow launch in the vicinity of the Maas Centre Buoy.

Anchorage: The anchorage used by small vessels is to the South of the Maas Centre Buoy, outside the separation zone.

Tugs: Tugs not used.

Berthing: Akzo Zout Chemie, Botlek, is located in Chemiehaven. This is the South arm within the Botlek complex, on the East side. The berth is well fendered and low and is mainly used by small vessels and barges. Good leads for mooring lines are available.

The vessel is swung off the berth using the port anchor and berths starboard side to. Care should be taken when berthing as ships/barges are berthed at the Stolt (Panocean) Berths on the opposite side of the dock. Mooring usually consists of 2 head/stern lines and 1 spring at each end.

Cargo Operations: Initially the vessel had to purge with nitrogen. This was done on the berth, but with the nitrogen being supplied by Hoek Loes from trucks. The nitrogen was heated, both within the truck and by a heater at the manifold, to approximately 50°C. They can supply at 80°C if they can get trucks nearer to the ship. The nitrogen was supplied at 700 cu.m.p.h., but they can supply at up to 2,000 cu.m.p.h. if requested, but with corresponding drop in temperature.

Vessel loaded VCM through 4 in. (300 ASA) liquid line and 3 in. (300 ASA) vapour line (flexible hose attached to side of liquid arm). Shore supply and connect all reducers. Initially they required 1 ft. to be loaded into the tank, after which samples are taken. Analysis of each tank takes approximately 1.5 hours. As soon as first tank is cleared, vessel can commence loading, but only into that tank. Once all tanks are cleared, it is required that each tank is loaded individually so that the inhibitor can be added in the correct quantities. This takes approximately 2 minutes for each tank.

The maximum rate that shore can supply is 220 t.p.h. Cargo can be supplied at ambient temperature from pressure storage, or fully refrigerated.

Due to a mix-up between Charterers, cargo was initially supplied at ambient temperature and final 30 minutes at ambient temperature, due to the lack of refrigerated cargo. Refrigerated cargo was loaded at −15°C at the manifold and the final tank temperatures were −11.8°C.

Vapour is returned ashore and is passed through a scrubber before being vented. However, due to the size of the line (2 in. on the jetty) throughput is low. To increase this and reduce the tank pressures from 2 Bar down to 300 mb. prior to sailing, for the last 3 hours of loading, 2 compressors blowing ashore were used.

There is a control room at the head of the jetty which may be contacted by radio. Most communications were by word of mouth.

Caleb Brett have a surveyor permanently stationed within the plant. He handles all surveys and samples and the adding of inhibitor. In addition to taking samples at commencement of loading (first foot), samples are also taken when each tank is completed.

A telephone is placed on board the vessel.

Fresh Water: Available by barge.

General: Stores have to be manhandled along the jetty, but shore crane can be used to place large items aboard the vessel.

SHIPMASTER'S REPORT: May 1989.

Pilot ladder required 2 ft. above water.

Sea Pilot takes EEC Check List for tankers and Health Declaration.

Vessels with a draft of 9.0 m. and over are to display deep draft signals.

Vessels proceeding to Europoort display a green light.

Agent requires copies (for Customs Clearance) of Bills of Lading, Letters of Protest, ullage reports at loading port(s) and ullage report arrival Rotterdam.

Any duty free items purchased by crew must be locked up ready for Customs inspection.

FIRE PRECAUTIONS: Specific precautions for tankers during repairs at Wilton-Fijenoord B.V. (Tel: (10) 4269200. Fax: (10) 4732577) are according to the Harbour Regulations Schiedam.
REPAIRS/DRY DOCKS: Largest dry dock 1,000 ft. long and depth of 35 ft. (graving dock). One graving dock 656 ft. length and 98 ft. wide at entrance with 2 building berths; 2 graving docks each 700 ft. long, 93 ft. wide at entrance, and with a depth of 32 ft.

One of the largest floating docks in Europe – extreme length 760 ft., width at entrance 128 ft., depth on blocks 33 ft.

There are 3 other floating docks with lifting capacities of 3,700, 12,500 and 21,500 tons respectively.

Stork Werkspoor Diesel engines and fuel injection components. Berth alongside workshop. Tel: (010) 4260055. Telex: 25037. Fax: (10) 4264571.
SURVEYORS: See "Rotterdam".
GANGWAY/DECK WATCHMEN: Not necessary.
CUSTOMS ALLOWANCES: See "Rotterdam".
REPATRIATION: See "Rotterdam".
AIRPORT: Zestienhoven, 6.4 km. (Rotterdam). Schiphol, 96 km. (Amsterdam).
POLICE/AMBULANCE/FIRE: Police. Tel: 4494499. Ambulance. Tel: 4333300. Fire, Tel: 4735544.
TELEPHONES: This service is available aboard vessels at all berths at the shipyard.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
GARAGE DISPOSAL: Service available.
WASTE OIL DISPOSAL: Service available.
SEAMAN'S CLUBS: Missions to Seamen, Admiral De Ruyterstraat 14, Schiedam. Tel: (10) 4269614. Services: Bar, football, shop, money exchange, international telephone and transport.
AUTHORITY: Municipal Harbour Master, Havenstraat 6, 3115 HD Schiedam. Postal Address: P.O. Box 79, 3100 AB Schiedam. *Tel:* (010) 2621000. *FAX:* (10) 4271962. *Contact:* A.J. Hertog, Sector Manager (Tel: 010-4465360). A. Boom, Operations Manager (Tel: 010-4465390).

TERNEUZEN: 51.20 N. 03.50 E. (See Plan)

LOCATION: At mouth of the ship canal from the River Scheldt to Ghent. Lat. 51° 20′ 14″ N., Long. 3° 49′ 39″ E.
DOCUMENTS: Customs Clearance takes place in the docks, except vessels bound for Belgium. Clearing of ships comprises the production of a document signed by the Master, accompanied by the following documents: Crew List (2 copies), Stores List (2 copies) and Cargo Manifests (3 copies).

Masters are requested to have Crew List completed beforehand to avoid delay in the lock.

Also see "Rotterdam".
PILOTAGE: Compulsory for all sea-going vessels entering, leaving, and navigating inland waterways. Sea Pilot meets inward vessels at Buoy A1, Lat. 51° 22.00′ N., Long. 2° 53.24′ E. for ships entering by Wielingen Channel; or at Middensteen Bank Buoy, Lat. 51° 39.30′ N., Long. 3° 19.00′ E. for ships entering by the Oostgat Channel.

In Wielingen Channel Belgian and Dutch Pilots available. In Oostgat Channel a Dutch pilot cutter is stationed. Belgian pilot boat carries at the masthead a red flag with a white letter "P", the Dutch pilot boat has a blue flag with a white letter "L". Communicate with pilot cutter by VHF Channel 6.

Also see "Ghent – Pilotage" in Belgium.

Warning: In approaches Masters may encounter fishing boats steaming a parallel course about 300 ft. apart. The net is being towed between the two vessels. If there is danger of fouling the net, the fishing vessels will display by day International Code flag "D", or by night a searchlight from each vessel.
ANCHORAGE: Vessels anchor outside fairway where depth is at least 49 ft. Mud bottom and good holding ground.
RESTRICTIONS: No restrictions on night entry.
MAX. SIZE: Controlling depth 31 ft. 4 in. Keel clearance 3 ft. 0 in. Height of tide 12 ft. to 15 ft. A vessel of max. draft 40 ft. 6 in. can reach Terneuzen in most circumstances.

Ships not exceeding the following dimensions are allowed to pass through West lock and canal: Length 256 m., breadth 34 m., draft in fresh water (canal) 12.25 m.

Vessels loading a maximum cargo for Ghent should not exceed 12.25 m. draft (Fresh water).

Also see "Ghent" – "Shipmaster's Report".

Also see "Berthing".
HEALTH: Arriving vessels are only subject to medical examination when arriving from countries where contagious diseases reported or when such cases suspected on board. Medical Officer will board in Terneuzen Roads or Outer Harbour.
RADIO/RADAR: Communicate via Traffic Control Terneuzen on Channel 3 between Buoys PvN/Spr and No. 35 including the Braakmanhaven West, East and Ferry Harbour.

Radar Control also operates between Buoys No. 17 and 35 on Channel 3. 24 hour watch maintained.
VTS: Vessel Traffic Service – Scheldemond:

Traffic Area/ Call Sign	*VHF Channel*	*Coverage (Buoys)*	*Radar Station/ Call Sign*	*Radar Station VHF Channel*

Marinas and Locks:

VHF Channel	*Lock/Marina*
9	Nieuwpoort
14	Oostende Mercator Lock
71/13	Zeebrugge
13/9	Blankenberge
22	Vlissingen Locks
31	Breskens
3	Terneuzen
22	Hansweert
10	Upper Scheldt
68	Brussel Sea Channel (Wintham)
22	Royers Lock and Kattendijk
13	Imalso Yacht-Basin

Every hour plus 5 minutes a weather-bulletin, navigation reports and warnings are given.

Communicate on the Canal via Traffic Control Terneuzen, Channel 11.

TUGS: Towage compulsory for ships exceeding 180 m. LOA; also for car-carriers and ships exceeding 245 m. LOA there are specific rules. Tugs can be ordered from Terneuzen Tugboat Company or Towage and Salvage Union Ltd. respectively by Channel 72 and Channel 32. Both companies maintain continuous listening watch on Channels 3, 6, 11 and 14.

Slop barge can be ordered from tug companies.

BERTHING: The port has 4 outer harbours: Braakman, West, East and Ferry. The Braakman Harbour is only in use for handling chemical products. There are 2 jetties, also see "Dow Chemical". Braakman Jetty 450 m. in length, max. length of ship 140 m. (East side) and 165 m. (West side). Ocean Dock 350 m. length, least depth 14.5 m., max. length of ship 280 m. The West Harbour has 2 locks (West and Middle), which is mainly used by sea-going vessels. The East Harbour has 1 lock (East Lock) for inland craft, while the Ferry Harbour (no locks) is used mainly by fishing craft and yachts. Ships not exceeding the following dimensions are allowed to pass through the West Lock and Canal: length 256 m., breadth 34 m., fresh water draft (canal), 12.25 m. East Lock: ships of a length 200 m., breadth 23.0 m., draft 4.0 m. can pass. This lock is used by inland craft. Sea-going vessels with a max. length of 70 m. and a max. draft of 4.0 m. may also pass through the East Lock.

There are 4 harbours on the East bank of the canal situated about 1 mile South of Terneuzen Locks.

Noorderkanaalhaven (Northern Canal Harbour): Length of North Quay, 170 m., max. draft 5.50 m.; South Quay, 192 m., max. draft 5.50 m.; the middle of the harbour max. draft 7.50 m.

Zuiderkanaalhaven (Southern Canal Harbour): Length of North Quay, 225 m., max. draft 2 m.; South Quay, 230 m., max. draft 5.75 m.; in the middle of the harbour max. draft 8.25 m. and 5 m.

Massagoedhaven (Bulk Harbour): Length of North Quay 504 m., max. draft 12.25 m. and 7.50 m. Length of South Quay 275 m., max. draft 7.50 m.

Zevenaarhaven (Zevenaar Harbour): Length of North Quay 1060 m., max. draft 12.25 m.; South Quay, 790 m., max. draft 8 m., in the middle of the harbour max. draft 12.25 m.

New terminal (August de Meyer B.V.) built by extending Zevenaar Harbour. The basin has been extended by 300 m. and deepened to 13.5 m. to provide accommodation for vessels, up to 65,000 d.w.t. The terminal is equipped with 2 Kangaroo cranes (36 tons capacity), each with a capacity of 440 t.p.h. and fitted with dust-free grabs. The 2 warehouses have a capacity of 130,000 tons in total.

Sluiskil (sub-port, about 4 miles South of Terneuzen) length of quay, 900 m., max. draft 10 m. to 10.50 m.

Sas van Gent (sub-port, on the canal about 7 miles South of Terneuzen) length of quay, 210 m., max. draft 7.00 m.

There are several sheds and warehouses, total capacity 160,000 sq.ft., also open storage, total capacity, 100,000 sq.ft. Grain silo with a storage capacity of 10,000 tons. Vessels up to 80,000 d.w.t. which for some reason have to anchor outside the piers can do so on the River Scheldt near Buoy No. 27. Ships with max. draft of 40 ft. 6 in. can reach Terneuzen under practically all circumstances.

Cranage: 10 movable cranes of 5 tons capacity; 4 floating cranes, 1×8.5 tons and 3×16 tons; 1 floating derrick of 40 tons. At Sluiskil there are 2 coke-loading plants, 3 cranes of 15 tons and 4 loading bridges. Sas van Gent has 2×5 ton cranes. Water and provisions available.

Container and Ro/Ro Facilities: Ro/Ro Harbour, width 24 m., max. draft 7.25 m. In Zevenaarharbour a Ro/Ro berth for 2 vessels, depth 9 m. and 8.50 m.

Ore and Bulk Cargo Facilities: Available at the Massagoed Harbour.

Dow Chemical: *On the Scheldt River – The Scheldt Jetty:* The Scheldt Jetty provides 1 berth only and is suitable for accommodating vessels, ranging from barge-size up to ocean-going ships with a maximum of 22,500 tonnes deadweight (d.w.t.).

The jetty has no draft limitations and the maximum allowable length of the vessels (LOA) is 200 m. Also see "Product Handling Facilities".

In the Braakman Harbour – The Barge and Coaster Docks: The Barge and Coaster Docks have 3 platforms, providing 5 berths for loading and unloading purposes.

Certain draft limitations as well as size restrictions for the various berths have to be taken into account. See "The Braakman Harbour". For product handling facilities at the Barge and Coaster Docks see "Product Handling Facilities".

In the Braakman Harbour – The Ocean Dock: The Ocean Dock provides 2 berths and is suitable for accommodating vessels, ranging from barge-size up to ocean-going ships with a maximum of 100,000 tonnes deadweight (d.w.t.).

Certain draft limitations as well as size restrictions have to be taken into account, see "Braakman Harbour". For product handling facilities at the Ocean Dock see "Product Handling Facilities".

Berthing: A seagoing vessel calling at the Ocean Dock has to be:

(a) Moored with the bow in N.W. direction. Except as otherwise agreed by the Harbour Master.

(b) Turned away from the Ocean Dock.

A seagoing vessel calling at the Barge and Coaster Dock has to make its turn to starboard unless wind or other circumstances justify a different decision.

Masters must ensure that their vessels remain afloat under all circumstances.

Masters must moor their vessel in such a manner that the berth can be left without delay, unless decided otherwise by, or on behalf of the Harbour Master. At least 1 steel cable must be positioned on both the bow and the stern of the vessel. Each cable must be properly attached and adjusted for easy pick-up by a tug.

General Facilities and Limitations: Bunkering facilities are not available.

Supplies of bunker oils, fresh water or large quantities of stores can be supplied with a barge alongside the vessel. In this case the cargo operations have to be interrupted for the time the barge is alongside. Depending on conditions in the port such operations will as a rule be limited to those vessels for which bunkering on the roads is legally not allowed (LPG vessels).

Bunkering at the berth requires 24 hours' notice and will be co-ordinated by the Loading Master. Limited quantities of stores can be taken on board via the jetties.

If for bunkering or any other reason a barge or boat has to moor alongside a ship, moored on one of the Dow Jetties, the Loading Master has to be informed 24 hours before the operation.

With the permission of the Loading Master it is allowed to transport cylinders with acetylene, nitrogen, helium, hydrogen, freon and oxygen from the jetty on board the moored ships and vice versa. By hoisting the cylinders it is obliged to use the specially made blue hoisting-containers from Dow. The cylinder valves must be protected by the screw-caps.

Slops or ballast water cannot be received at the jetty.

Tank cleaning of oil or chemical tankers is not permitted alongside the jetties. LPG vessels can be purged. Nitrogen and methane for purging purposes are available.

Vessels, moored at the Dow Jetties, have to comply with the International Ship/Shore Safety Check List and the additional Dow Marine Safety Regulations.

An intercom set and a telephone will be placed on board immediately after berthing. The intercom is for direct communication with the Loading Master

Charges for the telephone will be made via the ship's Agency. The telephone number of the set placed on board depends on the berth where the vessel is moored.

The following numbers are in use:

A West:	01150 – 72653
A East:	None
B West:	01150 – 72899
B East:	01150 – 72899
C:	01150 – 72679
OD North:	01150 – 73118
OD South:	01150 – 73118
Scheldt Jetty:	01150 – 19637 – 72211

The Braakman Harbour: General lay-out: See "Plan".

It should be noted that given water depths on the plans are valid immediately after dredging. A certain siltation should be taken into account. *The average rate of the siltation is unknown.*

Given water depths are translated to the General Mean Level for the Netherlands (N.A.P.). For the calculation of actual water depths, undermentioned tidal differences should be taken into account.

Tidal differences in metres:
High Water Spring (HWS) +2.7
High Water (HW) +2.0
Mean Level (N.A.P.) ±0.0
Low Water (LW) −2.0
Low Water Spring (LWS) −2.6

Barge and Coaster Docks:
Dock A (West) – Max. size 10,000 d.w.t. Depth 11 m.
Dock A (East) – Depth 7.5 m.
Dock B (West) Max. size 15,000 d.w.t. Depth 11 m.
Dock B (East) – Max. size 8,000 d.w.t. Depth 9.5 m.
Dock C (West) – Max. size 10,000 d.w.t. Depth 11 m.

In addition to the information, given on the Plan, the following "General Directives" should be observed:

The overall length of vessels is restricted to a maximum of 140 m. at Dock A (East) and Dock B (East), and 165 m. at Docks A, B and C (West).

Mooring at Berth B (East) is limited to the port side only.

The Ocean Dock: North and South Berth: Max. d.w.t. 100,000 tonnes. Max. length 280 m. Depth 14.5 m. L.L.W.S.

In addition to the information, given on the Plans, the following "General Directives" should be observed:

Time of berthing at/or departing from the Ocean Dock depends on tidal conditions and max. d.w.t. or draft of each vessel and will be appointed by the pilotage.

The maximum allowable draft of vessels is determined by the water depth at the Scheldt River Entrance, at Scheur. At present max. draft is at least 43 ft. (approx.). New figures are published every month.

Berthing with ship's bow pointing seaward is compulsory.

Port Regulations: To maintain order and safety of Navigation and based on Article 4 of the Port Regulations, the Harbour Master of Terneuzen has announced the following with regard to the Braakman Harbour and the berths, situated therein:

Admittance into the Harbour:

1. The largest admissable lengths and/or widths are for:

Sea-going vessels:
– in the harbour : Length overall 280 m.
– along the Ocean Dock : Length overall 280 m.
– along the A, B and C Docks (West) : Length overall 165 m.
– along the A and B Docks (East) : Length overall 140 m.

Vessels exceeding 250 m. LOA should give ETA 36 hours in advance.

inland craft : Length 140 m.
push barges : Length 185 m.
Width 22.8 m.
An additional length of 8 m. is permitted, provided that the maximum length of the barge does not exceed 153 m. and the pushtug is lashed in the axis of the barge.
lashed barges : Length 110 m.
Width 22.8 m.

2. It is prohibited to enter the harbour with vessels or boats which:
   a. Do not have to load or unload in the harbour.
   b. Do not have to carry out any work.
   c. Are not equipped with an VHF radio, suitable for transmitting and receiving on Channel 3.

3. Dispensation from measurements and conditions as mentioned above can be granted by the Harbour Master or his Substitute, except for the max. admittable LOA of 280 m.

Dow Chemical Marine Department can be contacted by VHF radio on Channels 6, 8, 13 and 34. Constant radio watch is kept on Channels 13 and 34.

Traffic Control:

1. Traffic is controlled by the Terneuzen Traffic Control Station. Tel: 01150-95651. (Traffic leader Tel: 01150-12161). Telex: 55482. FAX: 20527. VHF: Channel 3. Call sign: Radar Terneuzen.

2. The procedure of "Reporting in Writing" is also compulsory for inland craft, whereby the term of 3 hours also applies for the activities as mentioned below.

Masters of seagoing vessels and inland craft must report by VHF on Channel 3 to Terneuzen Traffic Control Station, call sign "Radar Terneuzen", when:

(a) On the Western Scheldt River with destination Braakman Harbour and:

Ascending the river: Entering the radio area "Radar Terneuzen" and in the neighbourhood of Buoy 17.

Sailing down the river: Entering the radio area "Radar Terneuzen" and in the neighbourhood of Buoy 22.

(b) Entering or leaving the harbour.
(c) After berthing and before unberthing.
(d) Changing berth.

4. All traffic inside the harbour or harbour entrance is obliged to have VHF radio tuned to Channel 3.

5. If necessitated by weather, or other circumstances, the required number of tug boats will be determined by the Harbour Master.

6. *Seagoing* vessels, having to carry the signals in accordance with Article 22 of the Decree of the Ministry of Transport and Public Works, dated 31/12/1971 Nr.A-5/071054 (Regulations for Dangerous Goods) are not allowed to enter the harbour if the visibility is 500 m. or less.

Inland craft, having to carry the signals in accordance with Article 10 of the Decree of the Ministry of Transport and Public Works, dated 31/12/1971 (Regulations of Dangerous Goods) are not allowed to enter the harbour if the visibility is 500 m. or less.

During approach under the above conditions vessels may be ordered by the Harbour Master, to berth or drop the anchor at a suitable place.

Dispensation from the paragraphs as provided above may be granted by the Harbour Master.

7. Entering and leaving the harbour is prohibited if a red light is shown below the green and red harbour lights.

Mooring:

1. Masters must ensure that their vessels remain afloat under all circumstances.

2. Masters must moor their vessel in such a manner that the berth can be left without delay, unless decided otherwise by, or on behalf of the Harbour Master.

At least 1 steel wire must be positioned on both the bow and the quarter of the ship. Each wire must be properly made fast and adjusted for easy pick-up by a tug.

Pilotage: Pilotage is compulsory for sea-going vessels, entering, leaving or manoeuvring in the harbour.

Dispensation may be granted by the Harbour Master.

Marking:

1. The entrance of the harbour is marked by a fixed green, and a fixed red light on top of piles on West side and East side of the white leading lights.

2. Night and day, the axis of the harbour entrance is marked by 2 synchronous interrupted white leading lights (iso 2 sec.) located on the Southern Harbour Dyke. Bearing is 191°.

3. The green and red harbour lights are located respectively 170 m. and 215 m. from the axis, indicated by the white leading lights.

The minimum width of the harbour entrance on either side of the axis, measured at right angles, is 112 m.

4. Night and day the centre of the turning-basin, West of the Ocean Dock, is indicated by interrupted green leading lights (3 sec. on, 1 sec. off). These lights are located on the Southern Harbour Dyke. Bearing is 211.5°.

5. The centre of the almost circular turning basin lies at the intersection of the green leading lights and the Westward lengthened axis of the Ocean Dock. The radius of the turning basin is 200 m.

6. During fog, 2 sodium fog-lights are lit underneath the green light of the harbour entrance.

One of these fog lights is directed towards the Scheldt River, the other one towards the harbour.

During the night and poor visibility, the piles, marking the harbour entrance are illuminated by floodlights.

7. The shoal in the harbour, extending from the South side of the Barge and Coaster Docks to further Southward is covered by 3 light buoys, located on a water depth of N.A.P. −7.5 m.

Depths:

1. The dredged bottom-depths in the harbour are:

In the Harbour Entrance : N.A.P − 15 m.
In the Turning Basin : N.A.P − 16 m.
The Western Berths of the B & C Docks : N.A.P − 11 m.
B & C Dock Berth B-East : N.A.P − 9.5 m.
B & C Dock Berth A-East : N.A.P − 7.5 m.

The above mentioned bottom depths are typical figures and certain deviations as a result of siltation can occur.

2. Information with regard to permitted draft can be obtained from the Harbour Masters' Office or from the Traffic Control Station.

Tugs: A sea-going vessel mooring, or leaving a berth has to be assisted by at least:

(a) 1 tug if the length overall is less than 100 m.
(b) 2 tugs with sufficient power if the overall length exceeds 100 m. unless the vessel is equipped with a functioning bow-thruster when only 1 tug is required.
(c) The number of tugs may be 1 less when leaving Berths B-West or B-East and when moored with the bow to the North.

Assisting tug must be attached to the towing lines on the sea-going vessel.

Loading/Discharging:

Manifold Position:

The manifold position for ships bound for Terneuzen should be:

- about midships.
- 2 m. minimum from rail.
- 1 m. minimum above deck.
- Flange connection 6 in. minimum.

A well supported manifold is required and the space around and above the manifold should be free of obstructions.

Product Handling Facilities and Capabilities:

Marine Loading Equipment: All LPG products are loaded/unloaded at the Barge and Coaster Docks. Butane and propane can also be loaded/unloaded at the Ocean Dock. The following equipment is available:

B & C (A-West): 2 stainles steel loading arms for propane, nominal diameter 6 in., minimum temp. −104°C.

1 carbon steel loading arm for butane and propane, nominal diameter 6 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (A-East): 1 carbon steel loading arm for butane and propane, nominal diameter 6 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (B-West): 1 carbon steel loading arm for butane and propane, nominal diameter 8 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (B-East): 1 carbon steel loading arm for butane and propane, nominal diameter 8 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (Dock C): 2 stainless steel loading arms for propane, nominal diameter 6 in., minimum temp. −104°C.

O.D. (South): 2 low temperature steel loading arms for butane and propane, nominal diameter 10 in., minimum temp. −50°C.

O.D. (North): 2 low temperature steel loading arms for butane and propane, nominal diameter 12 in., minimum temp. −50°C.

Except for the carbon steel loading arm on Berth A (West and East), all other arms are equipped with an emergency shut-off/disconnecting device and a fire fighting nozzle, directed on the ship's cargo line manifold.

On the Braakman Jetty a C-4 vaporiser and booster pump are available for C-4 unloading from barges which do not have own discharge facilities.

Propane can be unloaded with this booster-pump as well.

Nitrogen or methane supply from shore is necessary to produce enough over-pressure in the ship tanks, when unloading C-3.

Purging:

Purging of LPG vessels with nitrogen or methane can be carried out at the Barge and Coaster Docks. Maximum delivery rate of nitrogen is 2,000 N cu.m./hr., methane 1,800 N cu.m./hr.

Nitrogen can be heated to a temperature of +70°C to increase the drying effect of the vessel's cargo tanks which were waterwashed prior to the purge. Prior to loading LPG, vessels must meet the requirements as laid down in the "Guidelines for Cargotank Condition".

Conditions for unloading Propane and Butane:

All refrigerated propane and butane vessels should arrive with tanks over-pressure not exceeding 60 mb. to achieve maximum discharge rates.

Unloading of propane and butane is without vapour return.

Transfer Capabilities:

Discharge rates for refrigerated propane and butane are about 1,100 cu.m./hr.

Loading rates for refrigerated propane and butane are about 800 cu.m./hr.

Loading rates for pressurised propane and butane are about 250 cu.m./hr.

Storage:

Butane and propane are stored in refrigerated and pressurised tanks and loaded/unloaded at either ambient temperature or refrigerated. Refrigerated propane delivery is at −38°C and butane delivery is at −5°C.

LPG Storage Tanks:

2×50,000 cu.m. propane/butane fully refrigerated.
1×15,000 cu.m. butane fully refrigerated.
1×5,000 cu.m. butane pressurised.
2×3,000 cu.m. propane/butane pressurised.

Ventmasts must have clearly marked purge connections for either steam or nitrogen.

The vessel must have updated cargo-piping diagrams on board. Copies of drawings must be submitted to Dow on request.

Inspection – Visual Inspection:

Cargo tanks, pumps and refrigeration plants shall be easily accessible for inspection, and crew will upon request open the blinds, valves, drums, etc., as appropriate in accordance with vessel's safety practices.

Cargo Transfer Operations:

Loading or unloading will not start until the appropriate safety and operating procedures have been communicated by the Loading Master to the responsible ship's officer. The vessel must be securely moored alongside the jetty. If requested by the Loading Master additional mooring lines should be attached.

The Loading Master must be informed about the true set pressure of the cargo tank safety valves.

Non-used line ends must be blanked off. All bolt holes must be filled at all pipe connections.

Gas detection on board must be in good order. The Master must permit testing upon request. Master must allow the installation of additional shore gas detectors on deck during loading/unloading operations.

In case of inerted tanks and/or void-spaces, the Master is fully responsible for the necessary warning tags.

If a sprinkler test is requested by the Loading Master or Government Representatives, this must be permitted. If an ESD test is requested by the Loading Master or Government Representatives, this must also be permitted. Upon request the Master must state the valve closure time of his ESD system, to assure safe transfer at short ESD valve closing times. Dow reserves the right to the product transfer rates in order to keep the pressure, as a result of an activated ESD system, below the safety valve settings at no cost to Dow.

Pneumatic ESD connections for shore connections must be clearly marked. (ESD = Emergency Shut Down.)

At the berth, the venting of gas through ventstacks is not permitted.

Upon request of the Loading Master, cargo pumps must be checked for proper functioning. Leakage of gas must not exceed a concentration of 30% LEL outside a circle of 25 cm. If the vessel's cargo compressors have to be used for loading or unloading operations, they will be tested as well. The Master must give full co-operation for these tests.

Safety:

1. Fire/emergency: In case of Fire/emergency (including personal accidents).

(a.) Inform jetty operator.

(b.) Dial 94982, report name, position, emergency situation and required help.

2. Communication: Ship to jetty and Marine office by means of portable telephone or intercom on board. Telephone: dial 18920, ext. 2563 Marine office, ext. 3165 Loading Master.

3. Use of intercom: Push button and call operator or office. Release button and wait. Always mention your ship's name. (If there are more ships alongside).

4. Emergency shutdown: Loading: To prevent overloading of ship's tanks and emergency shutdown can be carried out on deck by means of "the emergency shutdown switch" after which the shore-valve will immediately close.

5. Fire on board: Stop loading/unloading operations. Inform shore personnel.

6. Fire ashore or on other vessels: Stop loading/unloading operations. Make ship ready for departure. Wait for instructions.

7. Supervision: At all times during loading/unloading operations, adequate supervision must be carried out on deck and in the cargo-control room.

8. Tank cleaning: Tank cleaning or gas venting into the atmosphere alongside the jetty is strictly prohibited.

9. Deballasting: No deballasting of cargo tanks is allowed without permission of the Loading Master or his representative.

10. After loading: The loading arm will be blown with Nitrogen under pressure. You will receive approximately 3 cu.m. more.

Alarm signals: (Every Monday at 1200 hrs. there is an alarm test). Sounding of following signals:

Attention: 5 3 5 3 5 3 seconds: Stop cargo transfer, wait for instructions.

Evacuation: 1 1 1 1 1 1 seconds: Prepare ship for departure.

All clear: 20 seconds: Recommence operations (contact jetty operator). In case of loading: Loading will be stopped from: Ship/shore.

MEDICAL: One modern hospital available.

TANKERS: Slop tanker available. Also see "Berthing" – Dow Chemical.

FRESH WATER: Available from water barge.

FUEL: Fuel oil and lubricating oil available from lighter or tanker barge. Bunker coal available by prior arrangement.

CONSULS: Belgium, France, Finland, Norway and Spain.

REPAIRS: Terneuzen Shipbuilding Yard situated at junction of East and West Canal branches. Able carry out hull and engine repairs. Floating cranes and diving equipment available.

GANGWAY/DECK WATCHMEN: Available. Tariff increase 100% on Sundays and holidays.

OPENING/CLOSING HATCHES: Can be effected by crew or stevedores.

CUSTOMS ALLOWANCES: See "Rotterdam".

SURVEYORS: See "Flushing" or "Rotterdam".

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Rotterdam".

SERVICES: Repairs of radio, radar, etc., can be effected.

EMERGENCY CO-ORDINATION CENTRE: Harbour-Control Terneuzen continuous watch on VHF Channel 11. Tel: 12161. Telex: 55482.

BANKS: Amsterdam-Rotterdam Bank, Herengracht 15, 4531 GM Terneuzen. Tel: 94041. Telex: 55249.

Raiffeisen-Boerenleenbank, Herengracht 1, 4531 GM Terneuzen. Tel: 94651. Telex: 55260.

Algemene Bank Nederland, Herengracht 11, 4531 GM Terneuzen. Tel: 95051. Telex: 55429.

STORING: Vessels can be stored by barge and truck. At Braakman Harbour only with special permission of Dow Chemical Company, and not during loading and discharging. Trucks can proceed alongside at the berth except at Braakman Harbour. Approximate distance from truck to ship at Braakman Harbour, about 300 m.

At Braakman Harbour, no forklift trucks can be used to handle stores. For Customs Regulations, see "Rotterdam".

Local Riggers can be employed to assist with storing.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: General Information: Dutch port authorities are responsible for the provision of reception facilities in their ports. They publish who have been designated to receive waste from ships in their port. It is forbidden to deliver waste to persons who have no official designation as a port reception facility.

Fees: The costs incurred as a result of the delivery and further processing of waste are to be paid by the ship to the receiving company.

Advance Notice Requirements: In Dutch ports the ship's need for reception facilities must be reported 24 hours in advance.

Contact Port Authority for further information.

WASTE OIL DISPOSAL: See "Garbage Disposal".

SEAMAN'S CLUBS: Seaman's Friend Society, Varenscentrum, Westkolkstraat 17, 4531 AV Terneuzen. Tel: 01150-95373. Facilities include free transport, bar, souvenirs, reading and writing facilities, newspapers, TV, games, telephone, currency exchange and postal services.

CURRENCY: Dutch Guilders.

DEVELOPMENTS: Plans made to widen and deepen Outer Harbour.

SHIPMASTER'S REPORT: May 1988.

Chart: B.A. Chart No. 120.

Pilot: Vessels arriving from the West take Pilot at Wandelaar "A1" Buoy. Pilot on VHF Channel 6 and Telex No. 4682125.

If vessel arriving from the North, Pilot is taken at Steenbank. Pilot on VHF Channel 6 and Telex No. 4437811.

Gas ships with tank capacity over 1,500 cu.m., passage has to be via Schooneveld. If under 1,500 cu.m. the inside route via Oostgat can be used.

Under normal circumstances the Pilot taking the vessel to Terneuzen will also berth the vessel.

Anchorage: Vessels with dangerous cargo awaiting a berth at Terneuzen should anchor at Wielingen North Anchorage which is 3 miles West of Flushing, depth of water 7 fathoms.

Flushing Control monitors VHF Channel 21.

Everingen Anchorage, off Terneuzen, may be used for bunkers and repairs only. Loaded gas ships cannot wait at this anchorage.

If vessel awaiting orders she should stay to the North of "A1" Buoy.

Tugs: If berthing at Dow Chemical, vessels up to 100 m. LOA require 1 tug and if over 100 m. LOA, 2 tugs are required. We used 1 tug aft with the tug's line but the tug was too powerful for a small vessel.

Berths: For gas ships there are 4 berths available. These berths are both sides of Berth A and the West side only of Berths B and C. Vessels head North at all berths. Shore gangway used at all berths and the fendering was good. Depth alongside at low water 8.5 m.

Pilots advise that the maximum draft permissible at Ocean Pier is 14 m. and at any tide 10 m.

Cargo: Shore capacity for ethylene is 10,000 tonnes. Normal production 200 tonnes per day. Normally ethylene is exported from Terneuzen but at present there are problems with the production plant.

At present the shore reliquefaction plant is not working at full capacity and this is restricting discharge rate.

For handling of ethylene a 6 in. arm and a 4 in. vapour return line are used. Hot gas blown from ship on completion.

Berth C handles ethylene, propane, styrene, cumene, naphtha, resin oil and aromatic oil. Discharge rate for ethylene is 111 t.p.h. It takes about 3 hours for samples.

General: At present the maximum draft to Antwerp is 50 ft. if using 2 tides and 48 ft. if proceeding on 1 tide.

Fresh water is not available at Dow Chemical berths. Fresh water is provided by barge from Terneuzen.

Whilst at Flushing Anchorage, Ostend Radio is best for public correspondence, vessels can also use PCH. If anchored off Terneuzen it is best to use Antwerp Radio.

Barges with stores may proceed alongside before discharging, whilst sampling or after discharge. Stores can also be brought down the jetty with the aid of shore trolleys and crane. Bunkers may only be taken after completion of discharge.

Officials: Customs and Immigration board on arrival at the Berth. There was also an immigration check whilst at anchor off Flushing as the vessel had Eastern Block crew.

AUTHORITY: Havenschap Terneuzen, Maritiem District Scheldemond, Buitenhaven 1, 4531 BX Terneuzen. *Tel:* 01150-82400. *Telex:* 55104. *FAX:* 01150-20232 (office hours), 01150-30699 (24 hours - Control Centre). *Contact:* Captain J.W.P.Prins, Harbour Master.

VLAARDINGEN: 51.54 N. 04.20 E.

On the Waterway about 5 miles from Rotterdam.

DOCUMENTS: See "Rotterdam".

PILOTAGE: See "Rotterdam".

VHF: Port Authority on Channel 20.

TUGS: Available.

BERTHING:

Old Harbour (Municipal): Berths No. 701-705. For tugs and inland craft. Depth at entrance 10 ft. at LW. Total length of quay 2,000 m.

Koningin Wilhelmina Harbour (Municipal): Berths No. 634-653. Depth 12 ft. to 17 ft. at LW. Length of quay 1,300 m.

Vulcaan Harbour (Private): Berth No. 601-620. Suitable for vessels up to a draft of 10.4 m. (34 ft.) at LW. Stevedoring by: Frans Swarttouw's Havenbedrijf.

Length of quay for cargo handling 750 m. Phosphate loading jetty (on riverside) for barges 140 m. 3×16 ton electric cranes, 3×6 ton electric cranes and 2×5 ton mobile cranes. Belt conveyors on phosphate jetty. Large shed with a capacity of 30,000 tons and 6 storage tanks with a total capacity of 90,000 tons for various bulk cargoes.

Nieuwe Matex Wharves (Private): Berths No. 621-633. 3 berths for seagoing vessels on riverside up to 35 ft. draft at LW. Several berths for barges and coasters on inner side of jetty up to 22 ft. draft.

Large tank installation; bonded warehouses. 424 storage tanks (total) capacity 450,000 cu.m. for vegetable and mineral oils, molasses, latex and chemicals.

Lensveld Wharf (Private): Berth No. 654. For general cargo and timber. Max. draft 14 ft. at LW.

Lever-Sunlight Jetty (Private): Berth No. 712. Jetty 75 m. Max. draft 10 ft. at LW (no harbour dues).

N.V. Van Neerbos Ind. en Handels My. Jetty (Private): Berth No. 715. Length of jetty 70 m. Max. draft 10 ft. at LW. 1×3 ton electric crane.

Mostert Absorbents Jetty (Private): Berth No. 716. Max. draft 20 ft. at LW.

Hydro Agri Fertiliser Works Harbour (Private): Berths No.731-744. Length of harbour 300 m. Max. draft 11 ft. to 14 ft. at LW. Two jetties on riverside: Phosphate discharging jetty, max. draft 16 ft. and acid discharging jetty, max. draft 23 ft. at LW. Harbour dues by arrangement.

FRESH WATER: Available by barge.

FUEL: Available by barge.

REPAIRS: *Ship Repair Yard "Vlaardingen Oost":* All kinds of repairs undertaken. Outfitting quay of 1,100 ft. length. Anchor and chain factory. *Machinefabriek Kreber:* Builders and repairers of boilers, engines and various kinds of dredgers.

SURVEYORS: Saybolt Cargo Inspectors available at Vlaardingen, others (Caleb, Brett, Bureau Verwey, etc.) at Rotterdam. Lloyd's Register, American Bureau, Bureau Veritas and Det Norske Veritas Surveyors available at Rotterdam.

DRY DOCKS: Three dry docks (capacity 3,500, 4,200 and 5,300 tons) and one broadside slipway of 400 ft. (capacity 3,500 tons) in Vulcaan Harbour, (Western part).

AIRPORT: Rotterdam Airport (designed for international short and medium haul air traffic) lies at a distance of 10 km. from the Vlaardingen port area.

EMERGENCY CO-ORDINATION CENTRE: Alarmcentrale Politie, Tel: (010) 4344444. VHF Channel 11 (Port of Rotterdam).

AUTHORITY: Port of Vlaardingen, Oosthavenkade 85a, P.O. Box 141, 3130 AC Vlaardingen. Harbour Number 660. *Tel:* (010) – 4344700. *FAX:* (010) 4344373. *Contact:* Mr.S. van Berge, Harbour Master.

YMUIDEN (Ijmuiden): 52.28 N. 04.34 E. (See Plan)

Also refer to "Amsterdam".

DOCUMENTS:
2 Personal Effects Lists.
2 Stores Lists.
3 Crew Lists.
3 Passenger Lists.
Declaration of Health.
Also see "Rotterdam".

APPROACHES: The approach channel "IJ-geul" for navigation for ships with a draft of up to 54 ft. (16.5 m.). The channel leads to the Port of Ymuiden.

Approach Channel "IJ-geul": The navigation channel, officially known as the IJ-geul, has a width of 450 m. and is 23 km. long, when measured up to the piers at Ymuiden. The section of the channel within the piers is 4 km. long, and it is considerably narrower at some places.

Navigation: A number of measures have been taken to ensure a safe passage through the navigation channel. Ships which, due to their draft, need to use the new channel are obliged to take a Pilot on board. In other words it is prohibited to enter the channel without a Pilot. The Pilot boards the ship from a helicopter about 45 km. from the coast or is taken off at the Hook of Holland.

The deep draft ships can only sail in during a certain period of the tide (approx. 3 hours after flood-tide). Certain conditions (excessively high waves) can lead to a temporary closure of the channel. A special system has been developed to recognise and to forecast these conditions. A navigation plan that takes account of the water level prediction, weather and wave height forecasts and the draft of the ship in question is prepared and relayed to the Pilot. The conditions are continuously monitored and, if necessary, the plan is adjusted. Use is also made of a portable Decca receiver, which the Pilot takes on board with him. These portable receivers make use of more than the 2 customary transmitting stations, which means a considerable improvement in the determining of position – and as a consequence – improved navigation. Furthermore, these receivers are specially adapted to the situation at Ymuiden. Altogether this means that the Pilot can ascertain the position of the ship quite accurately, even at night or in fog, which leads to considerable improvement in safety.

A circular emergency anchorage area has been planned with a diameter of 1,600 m. about 10 km. from the pier. This emergency anchorage area is desirable because, should a disaster occur, the harbour mouth could suddenly become obstructed, preventing the ships in the channel from entering, whilst they would be unable to retrace their course back due to the approaching ebb-tide.

PILOTAGE: On entering and leaving Ymuiden Government pilotage is compulsory. Pilots will board ships at sea, being transported from shore to the pilot boarding position by means of a sea-going tender. The boarding position is in the vicinity of the outer buoy.

"Traffic Centre Ymuiden" (Telegraphic address "Pilots VTS Ijmuiden") can be informed via Scheveningen Radio or via VHF Channel 12. Pilotage and navigation are possible at night.

Pilot Ladders: Bottom of the pilot ladder should be 6 ft. above the water. Pilots strictly adhere to Regulation 17b, Chapter V of the International Convention for the Safety of Life at Sea, which reads as follows:

"Whenever the distance from sea level to the point of access to the ship is more than 30 ft. (9 m.), access from the pilot ladder to the ship shall be by means of an accommodation ladder or by another equally safe and convenient means".

Pilot from Helicopter: When the pilot service per pilot tender has been suspended owing to weather conditions it is possible to take a Pilot on board vessels by helicopter. Helicopter pilotage is carried out for vessels which have an obstacle free hoisting area on deck of minimum 15 ft. in diameter. Deck plans should be provided in advance.

Vessels over 45 ft. draft always take helicopter pilotage.

Helicopter rates:
Dfl. 5,045. – per flying hour/pro rata exclusive fuel costs.
Dfl. 305. – per hoist transfer.
Dfl. 432. – Additional charge per flying hour from 1800 until 0600 hrs. and on Saturdays, Sundays and Dutch public holidays.

A variable fee per flying hour for fuel consumption fluctuating monthly.

Restrictions
1. Minimum visibility 800 m. at 150 ft. above sea level.
2. Maximum wind Force 10 (55 knots).
3. Severe turbulence and icing conditions.

Remote Pilotage (RP): During periods that pilot service is suspended for (small) vessels, shipping approaching Ymuiden can obtain the information and advice of a pilot at the Port Operation Centre, under the following conditions and provisions:
1. RP is for shipping for which pilotage is compulsory and vessels which voluntarily wish to make use of the service of a pilot.
2. RP will only be provided when it is impossible to board a vessel because of the weather conditions or for other reasons.
3. The Master explicitly announces that he wishes to approach the harbour using RP and that there is no objection to this under the terms of the access policy conducted.
4. The Master is obliged to take the pilot on board between the breakwaters.

Pre-Entry Reports:
Note: All reports must be updated if vessel delayed one hour or more.

7 Days Before Arrival: (Vessels using lock system with draft over 13.1 m. up to 13.7 m. and/or beam over 42 m. up to 45 m. and/or length over 325 m. up to 370 m.).
To: Pilot VTS Ymuiden.
Giving: IMO SRS Items: Alpha Bravo Golf India Juliet Oscar Papa Quebec Tango Uniform X-Ray.
Via: Telex: 71169 PIVTS NL.
Fax: 02550-32535.
Tel: 02550-64500 or Agent.

24 Hours Before Arrival in Netherlands Waters: (Tankers, dangerous cargo and draft over 13.7 m. up to 16.5 m.).
To: Pilot VTS Ymuiden.
Giving: As previous report.
Via: Telex, Fax, Tel. or Agent.
Note: Tanker Check List, if appropriate to Pilot on boarding.

8 Hours Before Arrival: (52° 30′ N., 03° 50′ E.). (Draft over 13.7 m. up to 16.5 m.).
To: Pilot VTS Ymuiden.
Giving: As previous report.
Via: Telex, Fax, Tel. or Agent.

6 Hours Before Arrival at Outer Buoy: All ships.
To: Pilot VTS Ymuiden.
Giving: As previous report.
Via: Telex, Fax, Tel. or Agent.

ANCHORAGE: Vessels may anchor off Ymuiden. Recommended area is 2 miles N.W. of Outer Buoy.

RESTRICTIONS/MAX. SIZE: All drafts listed below have been calculated in salt water with a specific gravity of 1.026.

Maximum Dimensions of Vessels: The approach channel to the port mouth of Ymuiden (IJ-geul) and the fairway in the Outer Harbour of Ymuiden via the Northern fairway to the Outer Quay No. 2 of Hoogovens is accessible for vessels with a maximum draft of 54 ft. in salt water. The maximum length of a vessel with a draft of 54 ft. that must swing is 300 m. Before vessels with a length of 250 m. – 300 m. and a draft of 49 ft. 3 in. can swing, consultation should be made as to the time of the swing manoeuvre in connection with the water level. Maximum draft of vessels longer than 300 m. to a maximum length of 350 m., that must swing, is 39 ft. 9 in. Ships with a draft of more than 45 ft. must remain in the channel and therefore should, when making a sailing plan, report at least 48 hours before entering Dutch waters.

In addition to the above mentioned report vessels restricted to the channel should report at least 24 hours before passing the Western border of the approach area. This approach area is located between the co-ordinates:
Lat. 52° 31′ 47″ N., Long. 3° 48′ 29″ E. and
Lat. 52° 27′ 25″ N., Long. 3° 41′ 20″ E.

This report should be corrected if there is more than 1 hour deviation, and should in any case be repeated at least 6 hours before arrival at the approach area.

Maximum dimensions for the North Sea Canal via the Northern fairway and the Northern Lock.

1. *Without a Licence:*
Length: 325 m.
Beam: 42 m.
Draft: 131 dm. (43 ft.)

2. *With Licence:*
Beam: 45 m.
Draft: 137 dm. (45 ft.)

Note: Should the beam exceed 42 m., restrictions will apply regarding the maximum permitted draft. Applications of such a licence are judged on basis tentatively fixed criteria per case.

Licences to exceed the maximum permitted draft and/or beam, to sail with an irregular transport should be applied for at least 7 days in advance.

Address: Directorate-General Shipping and Maritime Affairs, Head Traffic Service, Seinpostweg 19, 1976 BT Ymuiden. Telex: 71169 PIVTS NL. FAX: 02550-35144.

HEALTH: Pratique granted automatically on arrival after completion of Maritime Declaration of Health. In case of suspected disease on board notify Agent by radio before arrival advising full details.

RADIO: *Obo-Carriers:* Masters of this type of vessel must, when calling to load and/or discharge dry cargo, cable at least 24 hours prior to arrival, the following information:

1. That vessel has no slops on board and is certified gas free or alternatively;
2. a. Correct name of liquid cargo carried last, with place and date of discharge.
   b. Stowage of cargo remnants (gases and/or liquids) and whether mixed with water or not.
   c. Whether non-gas free spaces are adjacent to dry cargo holds and if so, which holds.
   d. Which spaces contain inert gas.

Also see "Pilotage".

RADAR/VHF: The port is equipped with a shore based radar installation to facilitate navigation if necessary. Ymuiden has a VHF installation and Masters of vessels entering or leaving the port area must contact the Port Operations Centre (callsign – Ymuiden Port Control) by VHF to obtain information for safe navigation and rapid locking.

VHF Channels:

- In the approach area to Ymuiden seawards from the outer buoy: Channel 12 (Traffic Centre Ymuiden).
- From the outer buoy to the locks: Channel 9 (Ymuiden Port Control).
- On the North Sea Canal from the locks to kilometre 11.2: Channel 11 (Traffic Service North Sea Canal).
- On the North Sea Canal Eastwards at kilometre 11.2: Channel 14 (Traffic Service North Sea Canal).
- In the Port of Amsterdam: Channel 14.

TUGS: Available. Meet vessel in harbour entrance if required.

BERTHING: Steelworks Harbour (Private): Coal and ore cargoes discharged to Blast Furnace and Steel Works Company in Outer Harbour.

Quay 1: Length of quay: 1,360 ft. Depth alongside quay: 29 ft. 6 in. LLWS.

Opposite the quay there are 3 dolphins available where one vessel can wait for a loading/discharging berth (up to 34 ft. depth).

Equipment:

2 cranes, lifting capacity 30 tons, max. outreach 57 ft.
1 crane, lifting capacity 30 tons, max. outreach 63 ft.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs and coils are handled.

Supplies: Water obtainable from quay. Stores can be delivered by truck, bunkers by barge.

Quay 2: Length of quay: 1,800 ft. Depth alongside quay: 45 ft. (East) and 52 ft. (West) at LLWS.

Max. draft: The entrance to Outer Harbour is accessible to vessels up to 43 ft. draft and with special permission of the Harbour Authorities up to 45 ft. draft salt water.

Equipment:

3 bridge cranes, lifting capacity 40 tons each, max. outreach 115 ft.
2 conveyor belt systems (capacity 6,000 t.p.h.).

Despatch:

About 60,000 tons iron ore per 24 hours. About 50,000 tons coal per 24 hours.

Supplies: Water obtainable from quay. Stores can be delivered by truck, bunkers by barge.

Quay 3: Length of quay: 825 ft. Depth alongside quay: 31 ft. 6 in. LLWS. With special permission of the harbour authorities, max. sailing draft 34 ft. West of the quay are 4 dolphins available where a vessel can wait for a loading/discharging berth (up to 31 ft. 6 in. draft).

Equipment: 2 cranes with a capacity of 60 tons each. Outreach 70 ft.

Inner Harbours: These harbours are mainly used for loading or discharging smaller vessels having drafts between 11 ft. and 20 ft.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs, coils but also fertilisers are handled.

CRANES: Inner Harbour No. 1 – 1 portal crane.
Inner Harbour No. 2 – 1×7.5 ton portal crane.
Inner Harbour No. 3 – 3×30 ton portal cranes.

STEVEDORES: *Working Hours:* In the Outer Harbours round the clock, also on Sundays and holidays.

In the Inner Harbour round the clock except from 1400 hrs. on Saturdays until 0600 hrs. on Monday.

FRESH WATER: Available from quay.

FUEL: Available by barge.

CONSULS: And all general information; refer to "Amsterdam".

MEDICAL: Doctors, hospital and all services available.

REPAIRS: Possible.

DRY DOCKS: None.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member; 5 litres spirits for whole ship.

AUTHORITY: Directorate General of Shipping and Maritime Affairs, Head of Traffic Service, Seinpostweg 19, 1976 BT Ymuiden. *Tel:* 02550-19027. *FAX:* 02550-35144. *Telex:* 71169 HOCYM NL.

ZAANDAM (Zaanstad): 52.26 N. 04.49 E. (See Plan)

LOCATION: Zaandam lies on the Northern side of the North Sea Canal, near to Amsterdam. See "North Sea Canal" and "Amsterdam" plans. The Port of Zaanstad is divided into two parts by "Wilhelmina" sluice, the outer harbour being for large vessels and the inner harbour for coasters, etc.

PORT LIMITS: A line drawn from the Western side of W. Thomassenhaven entrance to the Eastern side of Zijkanaal "G" entrance defines the port limits.

DOCUMENTS: IMO Crew List, IMO Fal form 5, other Customs papers to be supplied by Agents.

PILOTAGE: Procedure, etc. same as for Amsterdam. Not compulsory, but recommended. Pilot will take vessels all the way to Zaanstad. Amsterdam Harbour Service should be notified on VHF Channel 14 of vessel's intentions, they will arrange for Zaanstad Harbour Service vessel to meet the vessel at the entrance to Zijkanaal "G" and direct it to its berth. When a vessel is leaving for sea, notice should be given to the Sluice Command via VHF Channel 11.

ANCHORAGE: It is prohibited to anchor in the port of Zaanstad.

RESTRICTIONS: Vessels with dangerous cargoes will not be handled at night.

All Zaandam harbours have direct unrestricted connection with the North Sea Canal.

LOCKS: Wilhelmina Sluice is 116.8 m. long, 12 m. wide and has a depth of 2.80 m.

MAX. SIZE: Max. draft 10.0 m.

HEALTH: Same as Ymuiden.

RADIO: Scheveningen Radio.

VHF: Wilhelmina Sluice – Channel 20. Alexander Bridge – Channel 18.

RADAR: No port radar service.

TUGS: Available.

BERTHING: (Docks)

Isaac Baarthaven: Length 900 m., width 70 m., depth 9 m. Quayage 370 m., with depths of 7 m. – 9 m. alongside. Ro/Ro quay at Houtcentrum with length 25 m. and depth 9.0 m.

Dirk Metselaarhaven: Length 600 m., width 112 m., depth 10 m. Quayage 180 m., for transshipping liquids only (Private).

Zijkanaal E: Length 400 m., width 45 m. depth 7 m. Quayage 40 m., for transhipping only.

W. Thomassenharbour: Length 700 m., width 130 m., depth 10.0 m. Vessels up to 10 m. draft can berth. Quay with length 200 m., 6 berths with approximate width of 35 m. and 2 mooring buoys. No bridges and no locks.

CRANES: Mobile cranes only.

BULK CARGO FACILITIES: None.

SPECIALISED CARGO HANDLING FACILITIES: Ro/Ro vessels can be discharged in Isaac Baarthaven.

STEVEDORES: *Working Hours:* Monday – Friday 0600 hrs. – 1700 hrs.

Overtime possible from 1700 hrs. – 0800 hrs. on Saturday and Sunday.

MEDICAL: Full hospital facilities available without prior notice. Tel. 075-502911.

DENSITY: 1015.

FRESH WATER: Available.

FUEL: Arranged from Amsterdam.

REPAIRS: Possible.

DRY DOCKS: At Amsterdam, and Zaandam (Max. 90 m.).

CONSULS: All at Amsterdam (10 km.).

REPATRIATION: Possible.

AIRPORT: Schiphol Airport (Amsterdam) 20 km.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Port holidays similar to major Dutch ports, plus 2 extra holidays (Whit Tuesday and 1st May).

POLICE/AMBULANCE/FIRE: Tel: 06-11.

GARBAGE DISPOSAL: General Information: Dutch port authorities are responsible for the provision of reception facilities in their ports. They publish who have been designated to receive waste from ships in their port. It is forbidden to deliver waste to persons who have no official designation as a port reception facility.

Fees: The costs incurred as a result of the delivery and further processing of waste are to be paid by the ship to the receiving company.

Advance notice requirements: In Dutch ports the ship's need for reception facilities must be reported 24 hours in advance.

Contact Port Authority for further details.

WASTE OIL DISPOSAL: See "Garbage Disposal".

SEAMAN'S CLUBS: Available at Amsterdam.

CURRENCY: Dutch Guilder (Fl).

GENERAL: *Dirty Ballast:* Facilities available at Amsterdam.

Provisions: Available locally.

Chart: No. 124.

Prevailing Wind: Westerly.

AUTHORITY: Municipality of Zaanstad, Westkade 2, 1506 BA Zaandam, Netherlands. *Tel:* 075-816888. *Telex:* 19110. *FAX:* 075-816799. *Contact:* P.C.C. Majoor, Harbour Director. (Tel. 075-816522).

Netherlands Antilles

BONAIRE TERMINAL (Brasil): 12.13 N. 68.23 W.

(See Plan)

OPERATORS: Bonaire Petroleum Corporation N.V. Terminal is capable of handling all types of crude oil and heavy oils (bunker C and residual fuels). Heated and non-heated storage tanks are available for storage, blending and transhipment.

LOCATION: No. 1 Jetty is situated on the South coast of the Northern portion of the Island of Bonaire in Lat. 12° 13′ 12.9″ N., Long. 68° 23′ 17.2″ W.

DOCUMENTS:

5 Crew Lists.
2 Stores List.
2 Lists of Personal Effects of Crew.
5 Medicine and Drugs Lists.
1 Vaccination List.

PILOTAGE: Compulsory. The Pilot-Berthing Master will board the vessel at the established arrival point in Lat. 12° 10′ N., Long. 68° 25′ W., which is 2.5 miles, 235° True from No. 1 Jetty.

The Pilot will embark from one of the tugs or launches assigned to assist the vessel in the berthing operation. The Pilot will assist the Master in every way possible to manoeuvre the vessel from the arrival point into the berth with the assistance of 2, or in case of a VLCC/ULCC 3 to 4 tugs and utilising the services of 1 mooring launch to run mooring lines from the vessel to the mooring dolphins.

ANCHORAGE: There is no anchorage area at Bonaire for tankers; therefore, if the berth is occupied, vessels will be appropriately instructed to remain within radio/telephone (VHF Channels 16 and 13) radius pending advice with respect to a clear berth or other advices.

NAVIGATION: Navigable waters surrounding Bonaire Island are clear; however, the coasts of the Island are steep-to and should be avoided. The currents in the offing and off the points of the Island set Westward. On days with little wind a weak current sets to the Westward, generally parallel with the coast from Kralendijk Roads toward Wekoewa Point and parallel to the coast line in way of the jetty. It is urged that reference be made to the British Admiralty South American Pilot Volume V or United States HO Pub. 22 Sailing Directions for the West Indies Volume II or equivalent publication of the Netherlands Government.

Lacre Point, on which a light is shown, is at the Southern extremity of Bonaire. A light is situated on Boca Spelonk, the Eastern mid-point of the Island. Seroe Bentana Light, situated near the Northern extremity of the Island, is visible for approach from the N.E. through N.W. South of 250°/070° on the West side of the Northern end of the Island this light is obscured and then jetty lights and Radio Netherland Towers may be used for bearings.

Prevailing winds are the E.N.E. trade winds.

RESTRICTIONS: For tankers arriving in ballast, the following minimum drafts are required for manoeuvring under normal weather conditions:

Minimum Draft for Tankers in Ballast Entering the Harbour of Bonaire:

Gross Register (tons)	Draft (ft.)
upto 15,000	11 – 18
15,000 – 19,000	12 – 19
19,000 – 25,000	13 – 20
25,000 – 29,000	14 – 21
29,000 – 35,000	14 – 22
35,000 – 40,000	15 – 23
40,000 – 45,000	16 – 24
45,000 – 50,000	17 – 25
50,000 – 55,000	18 – 27
55,000 – 60,000	19 – 28
60,000 – 65,000	20 – 29
65,000 – 70,000	21 – 30
70,000 – 75,000	22 – 31
75,000 – 80,000	23 – 32
over 80,000	24 – 33

Draft may be more, but trim should not exceed 10 ft.

HAZARD ZONE: *Radio Transmitting Installation:* Vessels approaching Bonaire should remain clear of an area within a radius of 3 nautical miles from the Radio Netherlands Towers situated on the Island of Bonaire in Lat. 12° 13′ N., Long. 68° 19′ 15″ W. This area is noted as a danger area due to strong radiation from the powerful radio transmitters on shore. Bonaire Terminal is situated sufficiently West of this area to be well clear of any radio radiation influence.

HEALTH: There are no health formalities.

RADIO: When a vessel leaves its loading port, the shipper should advise the date of anticipated arrival at Bonaire. For vessels departing from remote loading ports, the estimated arrival date should be revised at least once each week while the vessel is en route.

A government wireless/telegraph station operates daily from 0700 to 2130 hrs. local time (1100 to 0130 hrs. GMT). Vessels bound for Bonaire should route their messages for Bonaire through Curacao Radio (PJC).

Arrival Advice: The Master should advise his estimated time of arrival not less than 72 hours in advance, again 48 hours in advance and again 24 hours prior to arrival, and this last message should be revised if an unusual change in the ETA should occur. Wireless telegraph messages of this nature must be sent to the ship's Agent who, in turn, will immediately relay the information to the Terminal Management.

Tankers from Mediterranean, Africa and Middle East should give ETAs 10 and 5 days as well as 72, 48 and 24 hours.

The text of any one of the arrival advices should contain the following data in addition to the declared time of arrival:

1. Draft of vessel, fore and aft.
2. Available fittings, i.e. number and diameter of connections at deck manifold system for prompt connecting of 2×24 in. and/or 2×12 in. steel swivel loading arms.
3. Any conditions which may affect loading or unloading operations.
4. Any unusual condition which may require abnormal attention prior to berthing.
5. Quantity of ballast and estimated time of deballasting.

VHF: International VHF Maritime Band Communication should be commenced within a radius of 30 miles from the Terminal, or more, if possible. The Terminal may be called on International VHF Channel 16 (156.800 MHz). When radio/telephone contact with the Terminal has been established, communication should then be shifted to Channel 13 (156.650 MHz).

After initial radio/telephone contact has been established, radio/telephone communication with the Terminal will remain on Channel 13. This will include communication with the 2 tugs and the 2 mooring launches on standby, all of which will be available to assist the vessel into the berth.

Mooring, Unmooring VHF Communication: Communication on Channel 13 during the immediate approach and mooring procedure will be confined rigidly to berthing operations which includes all directives from the Berthing Master to the tugs, the mooring launches and the jetty. The only messages which may interfere with these communications will be those caused by an extreme emergency.

After the vessel has been secured in the berth and the Berthing Master has cleared all berthing operations, communication on VHF Channel 13 will be secured and all base VHF receivers will be returned to guard Channel 16 pending an emergency or when the Berthing Master resumes his function for a departing vessel. It is to be noted that hand radio/telephone sets transmit and receive only on Channel 13. The base sets in the Terminal Office (Control Room) and on each of the tugs and launches is equipped with radio/telephone equipment for transmitting and receiving on Channels 16 and/or 13.

Radio/Telephone UHF (Private Frequency): Communication between the platform and the vessel and the Terminal before, during and after transfer of product will be via portable intrinsically safe, hand carried, radio/telephones supplied by the shore on a private UHF frequency.

Radio/Telephone VHF Resume Use Departing: When the vessel is ready to depart and the Berthing Master has boarded and resumes his function, VHF radio/telephone communication will again be established on International Maritime Channel 13 between the vessel's bridge, the 2 or 3 tugs, the mooring launches and the jetty, so that the casting off operation may be properly accomplished.

Radio Telephone – Guard Call Channel 16: After the Berthing Master disembarks and the tugs are dismissed, and the vessel has departed full away, it is expected the vessel will resume a guard watch on Channel 16. The terminal station may be called on Channel 16 and/or 13.

Radio Repairs: A Radio Holland Service Engineer available and can be arranged through the Agent.

TUGS: Tug assistance is compulsory. Mooring launch is available.

Normally 2 tugs are used for ships up to 150,000 d.w.t., from 150,000 to 350,000 d.w.t. 3 tugs, and above 350,000 d.w.t. 4 tugs will be used for docking.

When 2 tugs are used both will make fast on the port side main deck fore and aft; using tugs' lines. In case of VLCC or ULCC whereby 3 or 4 tugs are required, the Pilot determines the position where the tugs are to make fast. When sailing only 2 tugs can be used under normal weather conditions.

CUSTOMS/IMMIGRATION: When the vessel is secure in the berth and the gangway is landed on deck, the Immigration Officer, the Customs Officer and the Agent will board to attend formal entry of the vessel. The Immigration Officer may act on behalf of the Quarantine Service.

Immigration: Two copies of the crew list are to be ready for presentation to the Immigration Officer. Crew List is to be delivered to the Terminal Gate for Security Control, therefore no Gate Passes are required.

Customs: The Customs Officer will require 1 Crew List, 1 Stores List, 1 List of Personal Effects for those crew men leaving the vessel at Bonaire and 1 List of all Medicines and Drugs. The Customs Officer with the assistance of the ship's Agent will prepare the Inward Clearance document. This document is to be signed by the Master. Upon completion of the above formalities, the vessel is declared free and shore leave may be granted.

BERTHING: Berth No. 1: Max. size vessels 500,000 d.w.t. on full draft and no restrictions for length and beam. Depth of water 97 ft.

Minimum size vessels approximately 25,000 d.w.t. due to distance between the Inner Breasting Dolphins Nos. BD2 and BD3.

Mooring Facilities: Berth No. 1 consists of an operating platform 132 ft. 10 in. (40.48 m.) long facing the sea and 94 ft. (28.65 m.) wide toward the shore with 2×24 in. and 16 in. swivel jointed steel loading arms for the transfer of petroleum products. Loading arms are equipped with hydraulic quick couplings and will fit on all standard ASA/DIN flanges. The 24 in. loading arms are constructed to fit on 16 in., 18 in. and 24 in. ship connections and the 16 in. loading arms are constructed to fit on 10 in., 12 in., 14 in. and 16 in. ship connections. The waterfront side of the platform is 22 ft. 3 in. (6.787 m.) inside and away from the ship's side.

Breasting Dolphins: There are 6 breasting dolphins, 4 of which are designed for the vessel to rest against and to which forward and back spring lines are to be secured to heavy quick-release mooring hooks. At each end of the system of breasting dolphins there is 1 landing dolphin offset to allow a vessel 5° off the parallel line to land against the berth system. These are noted "a" for the offset dolphin and the main dolphin is noted "b". The dolphins are numbered from No. BD1a and BD1b in the West and through BD2, BD3 and BD4 and BD4a to the East. The centre line of the berthing facility is 17 ft. 5 in. (5.3 m.) East of the centre line of the operating platform. This point is well marked on the seaward panel of the platform with a 4 in. wide white reflecting vertical stripe. BD2 and BD3 are each 135 ft. (41.148 m.) West and East of this white vertical stripe. BD1b is 80 ft. (24.4 m.) further West from BD2 and BD4 is 119 ft. (36.4 m.) further East from BD3.

Mooring Dolphins: Inshore 215 ft. (65.532 m.) perpendicular from the berthing line are 6 mooring dolphins. These dolphins are numbered from MD1 in the West to MD6 in the East, MD3 and MD4 are each 350 ft. (106.680 m.) West and East from the centre line of the mooring structure system noted by the white vertical stripe on the seaward face of the operating platform. MD2 and MD5 are each 250 ft. (76.200 m.) West and East respectively, from MD3 and MD4. MD1 and MD6 are each again 250 ft. (76.200 m.) West and East respectively, from MD2 and MD5.

Berth No. 2: Max. size vessels 150,000 d.w.t. with limited ballast or cargo quantity on board, down to 90,000 d.w.t. fully loaded. Max. depth of water on mooring line is 49 ft. 6 in. (Ship's Master reported depth as 51 ft. 6 in. in May 1987).

Minimum size vessels approximately 25,000 d.w.t. due to distance between the Inner Breasting Dolphin Nos. BD2 and BD3.

Mooring Facilities: Berth No. 2 consists of a triangular platform 49 ft. (14.94 m.) long, facing the sea and 42 ft. 6 in. (12.95 m.) wide towards the shore with 3×12 in. swivel jointed steel loading arms for the transfer of petroleum products. The waterfront side is 11 ft. 6 in. inside and away from the ship's side. All loading arms are equipped with hydraulic quick couplings and will fit on all standard ASA/DIN flanges of 10 in., 12 in., 14 in. and 16 in. on ship's manifold.

Breasting Dolphins: There are 4 breasting dolphins for the vessel to rest against and to which forward and back springs are to be secured to heavy quick-release mooring hooks. The dolphins are numbered BD1 and BD2 on the West side of the platform and BD3 and BD4 on the East side. BD2 is located 139 ft. 4 in. (42.5 m.) West of the centre line of the platform and BD3 is located 123 ft. (37.5 m.) East of the centre line. BD1 and BD4 are each 5.7 m. further West and East respectively from BD2 and BD3.

Mooring Dolphins: Inshore, 164 ft. perpendicular from the berthing line are 3 mooring dolphins of which 2 are on the East side and 1 on the West side to handle respectively the head and stern lines. These dolphins are numbered MD1, MD2 and MD3 from West to East. MD1 is 328 ft. (100 m.) West of the centre line of the operating platform. MD2 is 328 ft. (100 m.) East of the centre line of the operating platform, MD3 is 262 ft. (80 m.) East of MD2.

GENERAL INFORMATION APPLICABLE FOR BOTH JETTIES:

Capstans: On each of the breasting and mooring dolphins there is a small capstan with sufficient power to heave up on to the deck of the dolphin a ship's mooring line for securing to the heavy quick-release hooks.

Mooring Lines: Prior to coming alongside, the vessel must have all mooring lines on station and available on that side which will be to the berth (normally port side to). Bearing in mind that the product transfer is via steel swivel loading arms, it is imperative that the forward and back spring lines be adequate to maintain a minimum fore and aft motion of the vessel to remain within the limitation of the envelope of loading arms.

Spring, Breasting, Head and Sternlines: The first lines lead out are headlines to the mooring dolphin, immediately followed by the forward and back springs to the breasting dolphins. Hereafter respectively the forward and after breasting lines are lead out to the appropriate mooring dolphins and finally the sternlines to the mooring dolphin. The procedure may be altered in accord with physical equipment on the ship, weather and sea conditions, along with other circumstances, all subject to the Berthing Master's requirements and combined approval of the Master and terminal management.

Mixed Mooring Lines Prohibited: Mixed moorings are prohibited, i.e. a wire and a fibre rope in parallel service is undesirable due to unequal elasticity. All mooring lines must be so arranged that loss of effect cannot occur when slacking off or heaving in one line, as required, due to the rise or lowering of the vessel during discharge or loading of cargo.

Mooring Machinery – Deck Winches: All deck machinery used for the heaving in and control of mooring lines must be operable. A vessel having deck machinery in poor state of maintenance to that point where mooring lines cannot be hove tight or brakes that tend to slip under tension will be sufficient reason to require consideration of terminal management to refuse connecting of the steel loading arms, or if same are already connected and the mooring lines become insecure, all transfer of product will be stopped and the steel loading arms disconnected pending correction of the mooring situation.

Surge-Tension Controls Prohibited: Wire mooring lines not on winch drums are not to be used for spring lines. Mooring wires secured on surge and tension controlled winches are prohibited. All mooring lines must be secured positively, i.e. on winch drums with the brake properly drawn tight or properly secured on bitts.

Power to Deck Machinery: At no time during the period the vessel is in berth is the power to operate deck machinery to be shut off.

Motion of Vessel in Berth: The vessel, while loading arms are connected, must not be permitted any motion alongside or away from its proper position in berth.

Surveillance of Mooring Lines: Mooring lines must remain under constant surveillance during unloading and loading operations. Failure to ease tension on mooring lines during unloading or failure to maintain proper tension on mooring lines while loading will be sufficient reason to stop transfer of product.

Fire Warp – Emergency Towing Wire: After the vessel is all fast fore and aft, an emergency wire of suitable quality and strength to tow the vessel should be positioned on the offshore bow and the after offshore quarter of the ship. This towing wire should be secured so that the eye may be readily picked up by a towing vessel. It is required that the length of the wire hawser should be not less than one-half again that of the highest freeboard of the vessel at the point of its location on the ship where the ship end is well fast on bitts.

EMERGENCY SIGNAL: In the event of any form of emergency such as fire, bursting of transfer piping, Operating Platform emergency signal will be an intermittent signal on the general alarm system for not less than 15 seconds. Since a shore radio is supplied to the vessel for proper communication, this radio must be used in the event of an emergency to inform the Loading Master. The vessel will use its own emergency signals in the event of any emergency on board.

To co-ordinate any emergency procedure, the personnel on the Operating Platform must be advised of the vessel's emergency signals.

In the event of any emergency either on board the vessel or the operating platform all oil transfer must be stopped and all oil transfer valves closed.

LOADING: *Electric Bond – Earthing:* Prior to manoeuvring the loading/unloading steel mechanical loading arms toward the vessel from the Operating Platform, the electric bond wire must be connected to a clean metal contact on the vessel in the area of the manifold.

The electric bond wire shall not be disconnected until the loading/unloading mechanical arms have been disconnected and manoeuvred well clear of the vessel.

The flame proof switch on the jetty will remain open until the electric bond wire has been connected to the ship. Prior to disconnecting the electric bond wire from the ship, the flame proof switch on the jetty will have been opened.

Connection to Oil Transfer Piping System: On both jetties there are steel pipe swivel jointed loading/unloading arms. (See also "Berthing").

This equipment is controlled either from the deck of the Operating Platform or from the ship's deck by using a remote control panel. Connections of the fittings requires clean flat faced flanges on the vessel's manifold, using a O-ring gasket, to ensure a secure tight connection.

Cargo and Ballast Transfer: Before transfer of cargo or ballast may be started, the Chief Officer and the Terminal Representative will ensure that all necessary controls and safety measures have been attended. A Declaration of Inspection is to be signed by a responsible Ship's Officer and the Terminal representative certifying that all precautionary measures have been taken, that all equipment used in the transfer operation is in proper order and that all concerned are in agreement on the proper procedure of the operation.

Discharge of Cargo: Upon advice from the Terminal Loading Master to the Ship's Officer in charge that oil transfer may be started, the Officer will arrange for the initial flow to be slow with sufficient pressure to permit inspection of all transfer piping and connections for any leakage. When the terminal personnel advise they are receiving product, the flow may be increased to the rate agreed upon.

Completion of Cargo Discharge: After all cargo tanks have been drained and the pumps have lost suction and the discharge of cargo has been declared finished, the flow of product will have stopped. With the agreement between the Ship's Officer and the Terminal Marine Supervisor, the oil transfer valves on the Operating Platform will be closed. All product remaining in the unloading arms will be drained back into the vessel. If the vessel's pipeline system does not allow the complete draining of the unloading arm, then arrangements must be made to drain the arm into a container or via a drain hose led into a cargo tank. *No product will be permitted to drain out onto the open deck of the vessel !* After the arms have been completely drained, they may be disconnected and the ends blanked off to prevent any drippage of oil.

Loading of Cargo: Upon advice from the Ship's Officer in charge that oil transfer may be started, the Terminal Loading Master will arrange for the initial flow of product into the vessel. When the Ship's Officer advises that he is satisfied that product is flowing in accord with the loading programme, he will advise the terminal personnel and the flow will be increased to the rate agreed upon.

Communication, Audible, Visual: Constant contact with the personnel on the Operating Platform during the topping off procedure is mandatory ! The rate of flow of product is to be adjusted to that point where complete control is constant and that in the event of an emergency immediate shut down will not create any pressure surge on the shore transfer piping.

Topping Off of Cargo Tanks: Every precaution must be observed to avoid over-filling of any tank or causing any listing of the vessel. Observance of the trim by the stern shall be constant to avoid any undue strain upon the vessel's longitudinal structure. The cargo tanks and pipelines thereto on most tankers are segregated into groups. One tank in each group should be selected for the overflow relief tank by maintaining the level of liquid considerably lower than the other filling tanks to permit prompt relief of that tank reaching an overfilled level.

Completion of Loading: After all cargo has been loaded all product remaining in the loading arms will be drained into the vessel. If the vessel's pipeline system does not permit complete draining of the loading arms, then arrangements must be made to drain the arm into a container or via a drain hose led into a cargo tank. *No product will be permitted to drain out onto the open deck of the vessel !* After the arms have been drained they may be disconnected and the ends blanked off to prevent any drippage of oil.

CRUDE OIL WASHING: Crude Oil Washing (C.O.W.) must be requested before arrival to obtain approval of the Terminal Manager.

It is the terminal's intention to allow vessels to C.O.W. at the terminal. However, the vessel must strictly adhere to the International Safety Guide for Oil Tankers and Terminals Guidelines pertaining to C.O.W. procedures and a terminal representative will check the procedure before and during the C.O.W.

BALLAST: *Ballast Loading:* Should the vessel have permanent ballast tanks with entirely separate pipelines and ballast transfer system sea water ballast may be loaded in accord with the Master's requirements.

Sea water ballast is not to be loaded into any cargo tanks or through any oil transfer system while there is any cargo on board the vessel. In the event of an emergency, special arrangements must be agreed upon with the terminal management for the loading of ballast into any cargo tanks before all of the cargo has been completely discharged.

The vessel's Senior Officer in charge will personally supervise the arrangement of the pumproom system for the ballasting operation. The Public Cargo Inspector will accompany the Officer into the pumproom to break the seals on the sea suction valves.

No sea suction valve may be opened until all down coming pipelines have been drained and are completely free of product and the down coming valve closed. In most instances the pumps should be operating just prior to opening the sea suction valve.

Ballast loading will be under the entire control of the ship's personnel and it is expected that all normal loading precautions will be observed.

Deballasting: En route to Bonaire the vessel should have thoroughly cleaned certain appropriate tanks for the containment of clean ballast for discharge overboard. Only dirty ballast (oil contaminated sea water) and tank cleaning slops are to be discharged into the terminal's ballast receiving system.

Ballast, Oily Water, Discharge: Under no circumstances will dirty ballast water be discharged overboard within a radius of 50 miles from any Netherlands Antilles Island.

Ballast Discharge to Shore: After the steel loading arm to be used has been connected to the ship's manifold, the discharge of ballast water will be accomplished in the same manner as the discharge of cargo.

Tank Bottoms and Slops: Upon completion of the deballasting operation, all of the vessel's tanks will be inspected and approved for the reception of cargo. The sea suction valves will then be sealed in the closed position by the public inspector or by a Bonaire Petroleum Corporation N.V. representative. Any bottoms and slops remaining must have the approval of terminal management prior to "loading on top".

MEDICAL: Modern facilities are available for medical and dental treatment. A "Medical Service Request" form must be signed by the Master for crew members requiring medical or dental attention.

In the case of crew members having to be left behind at Bonaire for hospitalisation or otherwise, Master must sign authorisation guaranteeing expense of attention rendered and repatriation.

FRESH WATER: Fresh water on Bonaire is desalinised sea water and the supply is minimal, but available. 72 hours' notice is requested and maximum 100 tons can be supplied.

FUEL: Bunkers for steam propelled tankers are available.

Bunker Transfer: During the period of time the vessel is in berth, the transfer of bunkers from one tank to another is prohibited. All bunkers to be consumed while in port must be available in that tank from which bunkers are normally consumed.

Fuel: Marine gasoil is available in small quantities from a shore storage tank. Limited Luboil available and supplied in drums. Water and fuel oil chemical treatment is available in drums by Drew Chemical.

REPAIRS: There are no repair facilities on the Island of Bonaire. Upon sufficient advance notice, special service personnel and minor mechanical repair work may be arranged from Curacao. Transportation for such service personnel is via scheduled airline.

POLICE/AMBULANCE/FIRE: Tel. 8000 via Terminal's Control Room or Office.

CARGO INSPECTION: Along with the Government Boarding Officers the representative of the petroleum inspecting organization mutually engaged by the Shipper and Bonaire Petroleum Corporation N.V. will board the vessel for the purpose of gauging the cargo tanks, obtaining the temperature of the cargo and obtaining required samples. His function is to protect the interest of the vessel as well as the Shipper and the consignee. Every assistance is to be rendered to expedite his function on board the vessel. An Officer should accompany the Inspector while on board and should assist by making available all information requested such as cargo tank calibration tables, etc. Cargo transfer may not be commenced without the approval of the Inspector.

Completion of Discharge of Cargo – Inspection: Upon completion of discharge of the cargo, the Inspector will examine all of the cargo tanks and will sign the tank inspection certificate.

Loading Cargo, Inspection: In the case of a vessel arriving to load cargo, the Inspector will examine all of the cargo tanks to determine the condition of the cargo tanks for reception of the cargo. Upon completion of loading all of the cargo, the Inspector will gauge the cargo tanks, take temperatures and samples as required.

Incomplete or Part Cargo: In the event the vessel does not complete the discharge of cargo, or does not load a full cargo, the Inspector will board the vessel to gauge the cargo tanks to record the amount of cargo in the vessel after transfer operations have been completed.

Cargo Pumproom Sea Suctions: Prior to loading or unloading the Public Inspector will certify that the sea suction valves connected to the vessel's oil transfer system are closed, lashed and sealed. *Do not lock these valves under any circumstances.* These valves are to be sealed in the *Closed* position and sufficiently lashed so they may not open due to vibration or any other reason.

STORES/PROVISIONS/LAUNDRY: All stores and provisions are available. There are no deck and engine stores available. Upon sufficient advance notice, all items not available on Bonaire may be obtained from Curacao.

Laundry service may be arranged through the ship's Agent and available for unlimited quantities. Advance notice required.

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.$ 1.00 = 1.78 Nafs.

DEVELOPMENTS: The terminal now has the facility to handle up to 5 million barrels of heavy and/or residual oils.

AUTHORITY: The Harbour Master, Kralendijk, Bonaire, Netherlands Antilles. *Tel:* 599-7-8151. *FAX:* 599-7-8416.

Operator: Bonaire Petroleum Corporation N.V., Bopec Building, P.O.Box 117, Kralendijk, Bonaire, Netherlands Antilles. *Tel:* 8177 (Terminal). *Telex:* 1284 (Terminal). *FAX:* 8266. *Contact:* Jose R. Aulacio, Terminal Manager.

BULLEN BAY, Curacao: 12.11 N. 69.01 W. **(See Plan)**

LOCATION: Bullen Bay is an open bay on the South coast of Curacao, 8 miles N.W. of Willemstad.

DOCUMENTS: Documents and all General information, refer to "Willemstad".

PILOTAGE: Pilotage is compulsory and rendered day and night. There is no resident Pilot at the Bay. Ships arriving and leaving are piloted by government Pilots supplied from Willemstad.

Pilot Station: 1 mile S.W. of Cape St. Marie (that is the cape on the West side of Bullen Bay).

Communications: Ships destined for Bullen Bay are to inform Traffic Control at Willemstad (call "Fort Nassau" on VHF Channel 16) and also Isla Terminal at Bullen Bay (VHF Channel 11) of their approach. The Pilots at Bullen Bay operate on VHF Channel 9.

ANCHORAGE: There is no anchorage in the bay. Ships that have to wait for berth are to remain in the vicinity within VHF radio range.

MAX. SIZE:

Jetty No.	*Max. LOA* (ft.)	*Max. Draft* (ft.)
1	1,120	69
2	850	40-42
3	900	56
4	1,350	94
5	900	63
6	No limit	94

VHF: "Bullen Bay Operations" on Channels 9 and 11, with watch on Channel 11 throughout 24 hours.

"Smit Tugs" on Channels 9 and 11 throughout 24 hours.

TUGS: Compulsory. There are 2 tugs of 3,852 h.p. with 53 tons and 60 tons bollard pull stationed at Bullen Bay. 2 tugs will assist the tankers on their arrival and departure. 3 tugs will assist the VLCCs on their arrival and 2 tugs will assist on their departure.

BERTHING: The terminal located at Bullen Bay facilitates economical trans-shipment of Eastern hemisphere crude arriving in very large crude carriers (VLCCs) for storage and on-carriage in smaller ships to draft restricted U.S. ports.

Jetties: Ships moor port side alongside.

Tanker jetties from East to West:
No. 1: 250,000 d.w.t. 4×12 in. connections, heading 196°
No. 2: 70,000 d.w.t. 4×12 in. connections, heading 176°
No. 3: 100,000 d.w.t. 4×12 in. connections, heading 148°
No. 4: 530,000 d.w.t. 4×16 in. connections, heading 128°
No. 5: 100,000 d.w.t. 4×12 in. connections, heading 127°
No. 6: 530,000 d.w.t. 4×16 in. connections, heading 125°

The tugboat jetty is located between Jetties No. 2 and 3.

Total tank capacity: 17,750,000 barrels.
1 – 1,000,000 barrels capacity – 1,000,000
16 – 750,000 barrels capacity – 12,000,000
6 – 375,000 barrels capacity – 2,250,000
38 – small tanks capacity – 2,500,000

Pipe-lines: Main track consists of 5 strings of 36 in. pipe. The jetties carry 2 strings of 36 in. pipe in a loop. The loading rate is up to 12,000 t.p.h. Tankers' discharge rate is up to 25,000 t.p.h.

Deballasting: Capacity 4,000 t.p.h. per jetty. Ballast treatment produces affluent of less than 20 parts per million (20 ppm) oil content.

Throughput:

Transhipment	1,200,000 barrels per day
Refinery import	250,000 barrels per day

Operator: Refineria Isla (Curacao) S.A., P.O.Box 3843, Emmastad, Curacao, N.A. Tel: 662700. Telex: 1441, 1442, 3400 ISLA NA. Fax: 662588.

FRESH WATER: Fresh water available at the piers.

FUEL: Bunker facilities for all grades are available at a rate of 3,800 bbls.p.h.

NAVIGATIONAL AIDS: There is a leading range of 043° True bearing on the West side of the bay for ships entering the bay, running 851 m. (approx. 4.5 cables) clear of the shore near Cape St. Marie, with red daymarks and a green and (yellowish) red light at night.

SHIPMASTER'S REPORT: February 1979.

Restrictions: Crude oil washing permitted subject to notice below. Tank wash piping must be tested before arrival and oxygen metres calibrated.

Health: As for U.S.A.

VHF: Channel 9 to give Notice of Readiness and for berthing with Pilot and tugs. Call Agent on Channel 25.

Berthing: Shore gangway at 2 largest berths.

Notice No. 1: Issued by Isla Curacao S.A.

Crude Oil Washing

Only tankers equipped with a well constructed inert gas installation and provided with fixed tank washing machines connected to the tank wash piping system by means of fixed steel piping may crude wash cargo tanks under the following conditions:

1. Oxygen content in cargo tank may not exceed 5% (*metres calibrated*).
2. Minimum inert gas pressure of 200 mm. water gauge must be maintained in the cargo tanks.
3. Continuous supervision by a specifically appointed and experienced operator is mandatory.
4. The "in-line" O_2 analyser must be arranged to allow for calibration during inert gas operation.
5. The hydrants of the tankwash piping must be equipped with screwed-on heads.
6. Tankwash piping must be tested for tightness.
7. Exceed of discharge time will be for ship's account.

For each "crude washing" a request for cleaning must be submitted to the Head of Operations of Isla.

Please sign for receipt: Isla Curacao S.A.
Signed............................

Master
Operation Manager

Notice No. 2: Issued by N.V. Curacaosche Scheepvaart Maatschappij. Emmastad, Curacao, N.A.

CUSTOMS REGULATIONS
BONDED STORES

In connection with revised Customs Regulations for the ports of Curacao, we draw your attention to the following:

1. All stores on board of vessel on arrival, also personal effects, must be declared to Customs Officials when clearing in vessel.
2. While ship is in port, Customs Officials may seal bonded stores, e.g. beer, wine, spirits, cigarettes and tobacco.

When sealing bonded stores, permission may be granted by the Customs Officials, to take out a certain amount of these stores, from the bonded store-room, before sealing the store-room.

3. Stores on board, which are *not* sealed by the Customs Officials, may be used on board vessels, but may not be taken ashore without permission of Customs.
4. All stores ordered in bond at the port of Curacao, MUST REMAIN UNBROACHED, until departure of vessel from Curacao, and it is more likely than not, that Customs Officials will board before departure for control. If bonded stores are found opened up, or missing, Customs will charge import duties, whilst the possibility exists that the ship may be fined for such breach of law.

SHIPMASTER'S REPORT: December, 1982.

Customs require one Narcotics List and will seal beer store if it contains more than 100 cases of beer.

If vessel requires to use shore crane for stores, etc., written permission must be obtained. This permission is supplied by Loading Master.

AUTHORITY: Harbour Master of Curacao. See "Willemstad".

AGENT: See "Willemstad".

CARACAS BAY, Curacao: 12.04 N. 68.52 W.

The port is temporarily out of operation and will no longer be used as an oil terminal.

LOCATION: Caracas Bay is an open bay on the South coast of Curacao, 5 miles S.E. of Willemstad.

DOCUMENTS: Documents and all general informations, refer to "Willemstad".

PILOTAGE: Pilotage is compulsory and rendered day and night. There is no resident Pilot at the bay. Ships at Caracas Bay are piloted by government Pilots supplied from Willemstad.

Pilot station: 1 mile S.W. of Lijhoek (that is the cape on the West side of Caracas Bay).

ANCHORAGE: There is no anchorage in the bay.

MAX. SIZE: Vessels with a max. overall length of 1,050 ft. and max. draft of 45 ft. can be accommodated. Max. displacement 100,000 tons.

VHF: Ships destined for Caracas Bay are to inform Traffic Control at Willemstad (call "Fort Nassau" on VHF Channel 16) of their approach. There is no VHF radio station at Caracas Bay.

TUGS: Tugboats operate from Willemstad. Tug assistance only for ships arriving. Tugs are automatically provided:

1 tug for cargo and passenger ships exceeding 16,000 g.r.t. and 600 ft. length.

2 tugs for cargo and passenger ships exceeding 30,000 g.r.t.

Ships leave without tug assistance.

BERTHING: 2 piers are at the East side of the bay, naturally protected from prevailing wind and sea, with depths up to 47 ft. alongside. Vessels dock directly with their port side along the piers.

Pier No. 2, with a depth alongside of 46 ft., and Pier No. 3, with a depth alongside of 46 ft., are concrete piers/quays, modern and equipped for handling oil in bulk, with enough platform to serve also as passenger terminal. The largest cruise ships moor along these piers regularly.

STEVEDORES: Lighters and longshoremen are supplied from Willemstad.

REPAIRS: Small repairs can be done at the bay through working barges alongside.

GENERAL: Clearance, port administration, port charges and regulations are the same as at Willemstad.

SHIPMASTER'S REPORT: March 1986. Vessel 95,000 d.w.t.

Pilots usually request access on port side (due prevailing wind) but will accept starboard side if given a good lee. Pilot boards from tug which then makes fast through centre lead forward. As vessel gets into the bay a second tug makes fast on the main deck forward, then first tug lets go and makes fast starboard main deck aft. Tugs lines used.

Berth is not designed for vessels over 800 ft. in length. Forward moorings: 3 headlines, 2 springs, 2 breasts in that order. Aft moorings: 2 springs, 2 breasts, 3 stern lines in that order. Only 1 mooring boat was available so forward end was made fast first. Shore gangway used and shore passes required. Fresh water is available U.S.$6.00/ton. No dirty ballast facilities. Trade wind normally prevails but is liable to change during hurricane season.

AUTHORITY: See "Willemstad".

FUIKBAY, Curacao: 12.03 N. 68.50 W.

LOCATION: Fuikbay, on the South coast of Curacao, 7 miles S.E. of Willemstad, is an inland bay with a 147 ft. wide navigable entrance. The depth of this harbour is 26 ft.

DOCUMENTS: Documents and general information, refer to "Willemstad".

PILOTAGE: Pilotage is compulsory.

ANCHORAGE: There is an anchorage area in the West side of the bay.

RESTRICTIONS: As a rule vessels only enter this port during daylight. Sailing can take place day and night.

MAX. SIZE: Vessels can enter and leave with a max. draft of 24 ft. and a max. length of 360 ft.

BERTHING: This bay is mainly used as a loading terminal of the "Mining Company Curacao" for export of limestone mined out of the "Tafelberg".

There is one berth under the conveyor which transports the limestone from shore into the holds of the vessel alongside. Depth alongside is 28 ft.

There is also a 84 ft. berth available for handling explosives or other cargo, usually named Westwerf. Only small vessels with a max. draft of 12 ft. can come alongside. Vessels with a greater draft can moor with the help of floats between ship and quay.

The piers are privately owned by "Mining Company Curacao" situated on private territory of this company.

FUEL: This port has no bunker facilities, so vessels bound for this port must take bunkers in Caracas Bay or Willemstad before or after calling at this port if bunkers are desired.

GENERAL: Other services such as tugboats, repairs, power, etc. are rendered from Willemstad. 5 ton mobile crane available.

AUTHORITY: See "Willemstad".

KRALENDIJK, (including Salina) Bonaire: 12.09 N. 68.17 W. **(See Plan)**

PORT LIMITS: Within 3 miles of the Port.

DOCUMENTS:

	Customs	*Immigration*	*Agent*
Passenger List	1	2	2
Crew List	1	2	2
Personal Effects List of Crew	1		
Stores List	1		
Curio List	1		

PILOTAGE: Pilot service is compulsory. Pilot meets vessels 0.75 miles S.W. of the berths. Pilot boat flies "H" flag by day and red over white light at night. The pilot boat is either a small tugboat or a fast speed GRP boat, orange hull, white superstructure with words "Pilot" on both sides.

ANCHORAGES: Anchorage for small vessels between Playa Lechi and the North Pier only under pilotage and with the permission of the Harbour Master.

RESTRICTIONS: Notify the Agent at least 24 hours in advance. No tide.

MAX. SIZE: Length 1,050 ft., also see "Berthing".

INWARD CLEARANCE: Inward Clearance is effected on board immediately on docking. Immigration Officer arrives on board immediately after docking. Passengers disembarking at Bonaire must present themselves for documents check.

Customs Officer boards immediately after docking and together with a representative of the Agency's Shipping Department the inward clearance document of the vessel (in ballast or with cargo in transit, as the case may be) is prepared and signed. This document must be signed by the Master. Occasionally the Customs Officer may insist that the Master sign in his presence. Only upon completion of the above formalities, usually carried out in a very short time, is the vessel declared free and passengers and crew may go ashore. It is recommended that one of the public rooms be made available for the purpose of inward clearance in order to avoid congestion in the Purser's Office.

HEALTH: Free Pratique is granted by the Pilot.

RADIO: The Government Harbour Pilot Office operates on Channel 16 VHF on a daily basis from Monday through Friday, between the hours of 0730 to 1200 and 1330 to 1700 hrs. Outside these hours and at weekends and official holidays the office remains unattended.

Any vessel bound to Bonaire after the normal working hours should route their messages to BOPEC Oil Terminal which operates VHF radio Channels 16 and 13 on a 24 hour basis, who in turn will relay the vessel's message to their Agent for pilot and berthing instructions. The Government Radio and Telephone Station maintains daily telephonic communications with Curacao, U.S.A., Europe, etc.

VHF: Call sign "Bonaire Pilots". Calling Channel 16, working Channel 11. Rescue operations Channel 6. Watchkeeping 0730 – 1200 hrs. and 1330 – 1700 hrs. except Saturdays, Sundays and holidays. Plans being made for 24-hour service.

RADAR: There is no Radar Port Control.

TUGS: 2×3,400 h.p. tugs are available. Vessels which require tug assistance for berthing should advise their Agent in advance in order to make necessary arrangements with the Bonaire Petroleum Company.

BERTHING:

*North Pier:**

Berthing space	225 ft.
Depth	30 ft. alongside at LW
Height	6 ft.

Max. permitted load factor on pier is 2,000 kilos per sq.m.

Vessels of max. length of 750 ft. are allowed to berth alongside.

*North Pier not in use at present as major repairs required for reconditioning.

Southern Pier:

Length	394 ft.
Width	46 ft.
Depth alongside	40 ft.
Height	6 ft.
Length of connecting bridge from shore to pier	199 ft.
Width of connecting bridge from shore to pier	68 ft.
Max. LOA	1,050 ft.

Mooring Facilities:
1: Double Mampaey easy-release electrical capstans (100 tons each)
2: Two (2) bollards 50 tons each
3: Double Mampaey easy-release electrical capstans (100 tons each)
4: Bollards of 50, 25 and 10 tons (every 20 m.)

Fendering: Vredestein Gigant Fenders; Block fenders and D-fenders (made of rubber).

Roll-on/Roll-off Facilities: At the South Pier a small Ro-Ro Platform for "coaster-size" ships and small "landing-craft" type. Max. permitted load factor 3,000 kg./sq.m. Depth 5.5 m.

Off the Harbour Office between the North Pier and the South Pier a Ro-Ro Pier for ships up to 3,000 gross and/or a max. length of 90 m. Max. permitted load factor 3,000 kg./sq.m. Depth 6 m. Max. size: LOA 300 ft. Draft 15 ft.

The mooring and unmooring at the pier is done by labourers of Kralendijk Port Services (KPS), at the expense of the shipping line. The KPS was founded in July 1993 as the common stevedoring company for the Port of Kralendijk. Motor-boats are available for running lines.

Salina: Position: Lat. 12° 05.3′ N., Long. 68° 16.7′ W. This port is situated 4 miles South of Kralendijk and is owned by the Antilles International Salt Co., loading of salt in bulk only can be carried out at this pier. Pilot boards 0.75 miles from jetty.

Largest vessel accommodated is the M/V "Nelvana" of up to 70,000 tons d.w.t.

Depth alongside 45 ft. The Pilot will board vessels destined for this port 0.75 miles West of the jetty, from a motorboat displaying the signals as referred to for Kralendijk. Also see "Bulk Handling Facilities".

CRANES: In Kralendijk, there are 2 mobile cranes available, 1×18 tons and 1×24 tons lifting capacity.

BULK CARGO FACILITIES: Salt in bulk is handled at the Port of Salina. The pier consists of 5 breasting dolphins and 2 mooring dolphins. The loading chute is situated on the centre breasting dolphin. Loading rate approximately 1,000 t.p.h. The chute is fixed and for shifting ship there are 2 mooring buoys, one on each side of the pier. The total length of the pier is 614 ft. and the max. draft is 45 ft. Vessels of up to 70,000 tons d.w.t. can be accommodated.

SPECIALISED CARGO HANDLING FACILITIES: There are no liquid, chemicals and LPG facilities. For Roll-on/Roll-off facilities see "Berthing".

BRIDGES: There are no bridges in the port of Bonaire.

STEVEDORES: The KPS (Kralendijk Port Services) was founded in July 1993 as the common stevedoring company for the Port of Kralendijk, and has been operational since November 1993. Tel: (599-7) 7772. Fax: (599-7) 7773.

Working Hours: Monday-Friday 0700 – 1200 and 1300 – 1600. Overtime possible.

MEDICAL: Modern facilities are available for medical and dental treatment. A "Medical Service Request" form must be signed by the Master or other authorised officer for crew members requiring medical or dental treatment. In case of crew members having to be left behind at Bonaire for hospitalisation or otherwise, Master must sign an authorisation guaranteeing expense of treatment and repatriation.

TANKERS: There is no tanker facility in the port.

DENSITY: Average salinity of water is 1025.

FRESH WATER: Fresh water from the Government water distillation and power plant can be supplied at the pier.

FUEL: Gas oil can be delivered by truck.

FIRE PRECAUTIONS: No specific precautions.

CONSULS: Venezuela and Colombia.

REPAIRS: There are no facilities for carrying out major repairs. Qualified technicians are available for electronic instrument repairs.

DRY DOCKS: No dry dock facilities.

SURVEYORS: Inspeciones Petroleras Bonaire N.V. available in Bonaire for dry and liquid cargo. Tel: (599-7) 5175. Fax: (599-7) 7572.

IMB (Independent Maritime Bureau (Bonaire) Inc.) represents ICS, P&I Club nautical and technical inspectors, inspectors for Liberian Bureau and Marine Affairs. Tel/Fax: (599-7) 7383.

GANGWAY/DECK WATCHMEN: Watchmen are not necessary but recommended; Overtime as usual.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: No specific regulations, customs allow only a reasonable quantity out of bond.

CARGO GEAR: Load/discharge operations always by ship's gear.

REPATRIATION: All facilities exist for crew changes. Good connections, several times a day to Curacao and several times a week to U.S.A. and Europe.

AIR SERVICES: There is a good daily air service between Bonaire and Curacao. 8 to 10 flights a day with good connections at Curacao with the international services to and from many parts of the world.

HOLIDAYS: New Year's Day; Monday after Carnival; Good Friday; Easter Monday; Queen's Birthday (April 30th); Labour Day (May 1st); Ascension Day; Bonaire Day (September 6th); Christmas Day and Second Christmas Day.

TIME: 4 hours behind GMT. No Summer Time kept.

CUSTOMS OFFICERS ON BOARD: 1 or 2 Customs Officers will remain on board during the vessel's stay in port. Such officer(s) must be furnished meals at regular meal hours.

POLICE/AMBULANCE/FIRE: Police Tel: 8000; Ambulance Tel: 8580; Fire Tel: 8580.

TELEPHONE: Telephone connection on board is possible, to be arranged by ship's Agent in advance.

EMERGENCY CO-ORDINATION CENTRE: Nearest Emergency Co-ordination Centre is the Rescue Co-ordination Centre of the Royal Netherlands Air Force on Curacao. Tel: (599-7) 681628/637900. Fax: (599-7) 690476/637950.

SERVICES: No tank cleaning equipment or facilities for discharge of tank washings. For compass adjusting, contact Shipping Inspection, Curacao. Tel: (599-9) 612361/611421. Fax: (599-9) 612964.

For marine consultants, draft, quantity and damage survey, and for survey of tanks and machinery, contact Independant Maritime Bureau and Inspeciones Petroleras Bonaire (See "Surveyors").

BANKS: ABN-Amro Bank, Kaya Grandi No. 2. Tel: (599-7) 8417 and 8429. Fax: (599-7) 8469.

Maduro and Curiel's Bank, Kaya L.D. Gerharts No. 1, P.O.Box 366. Tel: (599-7) 5520. Fax: (599-7) 8548.

Banco di Caripe N.V., Kaya Grandi 22. Tel: (599-7) 8295.

Interbank, Kaya Grandi 49. Tel: (599-7) 7660. Fax: (599-7) 7665.

McLaughlin Bank N.V., Kaya Almirante Luis Brion No. 12. Tel: (599-7) 4500. Fax: (599-7) 4510.

STORING: As a rule the vessel is stored by truck. Trucks can proceed alongside at the berth. Forklifts can be used on jetty to handle stores.

No particular Customs Regulations regarding storing.

Local people can be employed for storing, contact ship's Agent.

SHORE LEAVE: No restrictions for shore leave.

IDENTIFICATION CARDS: Passengers: No landing cards required, but some ships carrying a large number of passengers furnish landing cards to passengers for their own control of passengers returning on board. Crew: No landing cards required.

REGULATIONS: All ballast water discharged in the waters of the Island Territory of Bonaire should have been taken aboard at least 12 miles offshore and constitute clear, oceanic water devoid of any obvious riverine or coastal influence. Discharge of dirty ballast, garbage or petroleum is strictly prohibited and heavy fines may be levied.

DELAYS: As a rule there is no delay in berthing, loading or discharge. Delay in loading or discharging may be caused by rain.

GENERAL:

Live Animals: The importation of dogs, cats, horses and certain other animals is permitted, provided these animals are accompanied by a certificate issued at place of origin by a licensed Veterinarian, stating that the animal in question is free from any contagious disease. Dogs must have, in addition, a Certificate of Rabies Inoculation. All animals imported (including birds) will moreover be examined on arrival.

Prohibited Imports: The importation of the following is strictly prohibited: Parrots and parakeets, absinth, explosives, firearms, ammunition and firework, except with prior permission from local authorities. All kinds of narcotics and drugs, the sale and use of which is regulated by International Conventions, except for legitimate use by and for sale to drugstores by duly accredited importers. Unauthorised reprints of copyrighted scientific and literary works of art. Copper, bronze and nickel coins, except for account of the Government of the Netherlands Antilles. Obscene printed matter.

Immigration Law: All passengers disembarking in Bonaire as temporary visitors, for business purposes, on vacation, or in transit to other destination, must be in possession of:

(a) Valid Passport/birth certificate.
(b) One Passport photograph.
(c) A return ticket, through ticket or passenger-order to next destination outside of the territory of the Netherlands Antilles.
(d) All documents and visas necessary for continuing to next destination or return to place of origin.
(e) Sufficient means to be able to support themselves during their stay in the territory.

No visa is required from a Netherlands Consul on any of the aforementioned documents.

DEVELOPMENTS: A port development plan has been prepared for the port of Kralendijk. The Netherlands is willing to finance expansion and improvement, but before that, a new port management organisation has to be founded.

AUTHORITY: Bonaire Port Authority, Harbour Office, Kralendijk, Bonaire, Netherlands Antilles. *Tel:* (599-7) 8151. *FAX:* (599-7) 8151. *Contact:* Captain L.O. Statie, Harbour Master/Chief Pilot. Captain R. Sint Jago, Pilot.

PHILIPSBURG, St. Maarten: 18.01 N. 63.03 W.

(See Plan)

LOCATION: Philipsburg, capital of Netherlands St. Maarten, lies in a well-protected bay in the S.E. corner of the island. The only obstruction to the harbour is "Proselyte Reef" or "Man-of-War-Shoals", located Lat. 17° 56′ N., Long. 63° 04′ W., with a minimum depth of 2.5 fathoms. Entrance to the harbour can be accomplished by passing either to the North or the East of this reef.

DOCUMENTS:

Crew List: Immigration 1 copy.
Agent 1 copy.
Passenger List: Immigration 1 copy.
Agent 1 copy.
Stores List: None required.
Ship's Register: Pilot will require to see this document for obtaining the official tonnage.

Note: No special form is prescribed for the above documents, consequently these may be made out in Company's regular form. No consular visa required on any of the above documents.

Immigration: Immigration Officer boards ship immediately after docking. Passengers and crew are usually free to disembark immediately after boarding.

Agency Personnel: Agency personnel board immediately after vessel is docked together with Immigration Officer.

PILOTAGE: Pilotage is compulsory and performed by Government Pilots. Ships bound for the pier at Philipsburg should await the Pilot at a max. distance of 1 mile from the line Point Blanche-Fort Amsterdam. Pilotage service available day and night.

Pilot Ladder: Jacob's ladder, in clean and sound condition is sufficient.

Time to Berth: From pilot station to pier, about 15 to 30 minutes.

ANCHORAGE: Ample suitable anchorage area available with sufficient depths of water for several large ships simultaneously.

A good anchorage can be found in 40 ft. depth at the cross point of line joining the pier and Fort Amsterdam (Fl. ev. 4.5 secs.) and line joining radio masts and the mountain "Naked Boy".

If and when the pier is already occupied by another cruise-ship, cruise-ships can proceed to anchorage, in which case communications between ship and shore to be by ships' own launches.

For ships proceeding to anchorage, pilotage is also compulsory.

MAX. SIZE: 1 berth (North side of pier) max. LOA 300 ft. and draft 30 ft. 1 berth (South side of pier) max. LOA – no limit, max. draft 30 ft. Vessels berth portside alongside. 1 berth (East side of pier) max. LOA 360 ft. and maximum draft forward 12 ft.

RADIO: The Government radio and telegraph service operates daily from 0700 L.T. to 2400 L.T. worldwide.

Radio Telephone: VHF Channel 16.

ETA Messages: ETA messages should be sent to Agent preferably in local time at least 24 hours in advance through Saba Radio (PJS), and any changes occurring thereafter should be advised.

Use of Ship's Radio in Port: Prohibited.

VHF: Port Authority and Pilot on Channel 12; Shell Terminal on Channel 9.

TUGS: 1×700 h.p.

BERTHING: *A. C. Wathey Pier:* The concrete pier at Philipsburg is located at Point Blanche in Great Bay and has a length of 210 m., with an additional 60 m. of berthing space, located at a 60° angle to the finger pier. Minimum depth is 34 ft. of water. 4 jumbo rubber fenders are located along the berthing space.

Height from sea-level to the deck of the pier at high tide is 4.02 m., at low tide 4.48 m. Ship will lie with port side to the pier.

Mooring and Unmooring: 3 dolphins are located in an extended line of the berthing space for mooring. Minimum required size of openings in shackles is 40×50 cm. Mooring boat is available.

Equipment: Cranes are available with a capacity of 20 tons max. Forklifts up to 40 tons for handling 20 ft. and 40 ft. containers and sufficient flat-bed trailers and low-buoys are also available.

Ro-Ro Facility: The Ro-Ro facility is a concrete quay of length 110 m. with a depth of 6.0 m.

STEVEDORES: There are 3 gangs available. Each gang has a total of 9 workers.

MEDICAL: Government physicians are available in Philipsburg and there is also a small, but up-to-date hospital operated by the Netherlands Antillean Government. A "Medical Service Request" form must be signed by the Master or other Authorised Officer for crew members requiring medical treatment.

Dental facilities available.

TANKERS: See "Shipmaster's Report".

FRESH WATER: Available.

REPAIRS: No facilities for carrying out repairs except for radio and radar (Radio Holland).

SURVEYORS: There is a representative of Lloyd's on the island.

AIRPORT: The island is served by A.L.M. (Dutch Antillean Airlines), Air France, Eastern Airlines, K.L.M. (Royal Dutch Airlines), L.I.A.T. (Leeward Island Air Transport), Prinair.

There are direct almost daily flights to and from New York and Miami connecting to other major places.

TIME: GMT minus 4 hours.

HOLIDAYS: The following Official holidays are observed in St. Maarten: New Year's Day (January 1st); Good Friday (varies); Easter Monday (varies); Queen's Birthday (April 30th); Labour Day (May 1st); Ascension Day (varies); Whit Monday (varies); St. Maarten Day (November 11th); Kingdoms Day (December 15th); Christmas Day (December 25th); Boxing Day (December 26th).

TELEPHONE: Service from ship to shore is not available.

GARBAGE DISPOSAL: A garbage collection service is available *on request*.

Garbage should be properly packed into biodegradable plastic bags.

Garbage collection can be arranged through the ship's port Agent or directly with the Ports Authority on VHF Channel 12. Charge per trip is $ 22.00.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: There is a Seaman's Club located at Upper Princes Quarters, about one mile from the port.

CURRENCY: Netherlands Antilles Guilders.

GENERAL:

Ship's Bars and Shops: No restrictions and these may remain open for business while in port.

Laundry: Available.

Wind: Prevailing winds on the island between the months of March and December are East to South, velocity 6 to 10 knots. Between December and March winds are generally North to East at a velocity of 8 knots to 15 knots.

Tide: The tidal range in Philipsburg is at most 2 ft., but regularly not more than 1 ft.

Current: The current outside Philipsburg Harbour changes from Easterly to Westerly, with a max. velocity of 2 knots. At the Pier the current generally runs from North to South, with an average velocity of 0.5 knots.

Gangways: No gangways are available from the pier and ship's gangways will have to be used.

Ship's Launches: There are no restrictions on the use of ship's launches.

Stores: Available.

Garbage: No disposal facilities available.

Port Health: No regulations or requirements.

Customs: None.

SHIPMASTER'S REPORT: November 1989.

Berth: Shell mooring at Cole Bay.

Chart: B.A. Chart No. 2038.

Pilotage: Not compulsory. Pilots are available from Philipsburg by prior arrangement with the ship's agent. Pilots are not generally available until after mid-morning as prior to this time they are occupied with berthing of cruise ships.

The pilot boards off Philipsburg and can be contact on VHF Channel 12.

It is advisable to use a pilot on the first visit to Cole Bay, but is not necessary for later visits as the water is deep.

Approaches: The Shell and Texaco moorings are located in Cole Bay which is approximately 5 miles West of Philipsburg. The location is identified by silver fuel tanks and the power/desalination plant.

The buoys are located in position Lat. 18° 01′ N., Long. 63° 05′ W.

When approaching the moorings, vessels should beware of the shoal patch 1.5 miles due South of the Great Bay.

Anchorage: Anchorages are located in Great Bay (off Philipsburg) or in Simpson Bay which is to the West of Cole Bay.

Mooring: Shell: When approaching the moorings, contact Shell on Channel 9 a few miles before arrival. On arrival the mooring boat will appear and station itself at the anchorage position. The boat is a work boat with an outward motor and is well handled. The vessel should make a broad approach towards the head buoy, leaving it fine to port and letting go the starboard anchor when the signal is given by the mooring boat. The stern will swing with the thrust and end up parallel to the hose buoys.

Texaco: Vessels proceeding to the Texaco mooring pass inside the Shell mooring and moor to 3 buoys and drop an anchor where indicated by the boat man. When berthing at Texaco the vessel should attempt to get as near as possible to the shore as ship's hoses are used.

Mooring at both berths is carried out in daylight only, but vessels may unmoor after dark.

Berth: The currents set towards the West and there is nearly always a swell with an Easterly breeze. The boat man advised us that it is only rarely calm at the berth and on occasions the weather conditions can stop vessels mooring.

The Shell mooring is the Westerly of the two moorings. The head buoy is painted orange and the stern port buoy is painted white and the stern starboard buoy is painted orange. In addition there are 5 hose marker buoys. All buoys have hooks. The minimum depth at the Shell mooring, reduced to datum, was found to be 9.5 m.

The Texaco mooring is to the East of the Bay and consists of 4 buoys, all of which are rusty.

Cargo Operations: Night time discharge is not permitted at Shell or Texaco.

Shell have under sea lines which radiate from a small pier near their tanks and terminate at 5 marker buoys. The Western marker buoy is connected to a 6 in. line for LPG, the centre marker buoy is connected to a 6 in. line for black oil and the Eastern marker buoy is connected to an 8 in. line for white oils. The other 2 buoys are pipeline markers. The LPG line is to be renewed in the near future.

The ship's port derrick is connected to the marker by cable and the hose is lifted from the sea bed. The mooring boat will assist with the operation.

The flange on the LPG hose is 4 in. and the pumping rate is approximately 55 t.p.h. The storage capacity at Shell is 200 tonnes in 4 tanks.

Formalities: One copy of the Crew List is required on arrival. At the time of departure, the agent leaves the Clearance at the Shell Office.

Ship Chandler: Chandlers are available in Philipsburg but it would be difficult to bring large quantities of stores aboard at the mooring.

Radio: Saba Radio was very good for public correspondence, use Channel 26.

Airport: There are international flights from the airport which is in the next bay to the West of Cole Bay.

AUTHORITY: Sint Maarten Ports Authority, Pointe Blanche, St.Maarten, Netherlands Antilles. *Tel:* (599-5) 22307/22348. *FAX:* (599-5) 25048.

Contact: Sonny H. Hoo, Harbour Master and Port Director.

ST. EUSTATIUS: 17.29 N. 63.00 W. (See Plan)

LOCATION: Statia Terminals N.V.'s jetty and shore facilities are located at Tumbledown Dick Bay on the Northwest shore of the island in position Lat. 17° 29′ 39″ N., Long. 63° 00′ 28″ W.

The jetty, berthing 246°, extends 920 m. seaward and can accommodate a vessel on each side.

Vessels of up to 175,000 tons can be accommodated in the Southern berth and up to 100,000 tons on the Northern berth.

A barge loading berth is located inshore of the platform on the South side of the pier.

An array of mooring buoys for barges is located North of the Pier, 0.25 miles offshore.

Sub-sea lines of about 2,700 ft. length have been constructed in a North West direction from the shore end of the Terminal Jetty. The sub-sea lines terminate in approximately 52 ft. of water depth at the Pipeline end manifold (PLEM). A set of hoses connects the PLEM to a Floating Dock.

Two vessels can be accommodated at the Floating Dock, one on the East side and one on the West side.

Vessels taking bunkers are usually bunkered by barge at the anchorage, which lies to the South of the jetty. The barges are 70 m. and 80 m. long, and are brought alongside by a tug on the port side of the vessel.

Vessels coming to take bunkers should prepare ship's mooring ropes (not wires) on the port side before arrival to secure the barge; 2 ropes forward of the bunker connection and 2 ropes aft. Also a derrick boom or crane to pick up the hose from the barge and a pilot ladder (or ladder combination on ships with high freeboard) on the port side to allow the Bunker Master to board the vessel before the barge is brought alongside.

DOCUMENTS:
2 copies Crew Lists.
2 copies Passenger Lists.

PILOTAGE: The Pilot will normally board vessels 1 mile from the end of the finger jetty.

Pilotage to the terminal berths and Government piers is compulsory.

Pilotage to the anchorage is not compulsory but is available on request.

Pilotage to and from the Floating Dock is available during daylight only. Pilotage to and from the Jetty is available round the clock.

Pilot ladder must conform to internationally accepted standards of construction. When vessels arrive at the pilot station, a good lee should be provided for the Pilot, who will normally board from one of the tugs attending the vessel.

APPROACHES: Except for the Saba Bank about 10 miles to the West of the island, the waters in the vicinity of St. Eustatius Island are generally clear of obstructions. However, vessels are advised to heed the cautionary notices on the charts of the area, regarding the existence of shoal patches, and should keep outside the 200 m. line where possible. The bottom slopes gently all around the Island, and in the Terminal Area the depth 1 mile off-shore is 150 ft.

The Island, and the neighbouring islands of St. Kitts and Saba, are steep and present excellent radar targets. The mountains on all 3 islands also provide good visual bearing during the approach. The Southern portion of the Island is dominated by an extinct volcano 600 m. high (the Quill), while a lesser hill 289 m. high (Boven) is located at the Northern end.

ANCHORAGE: The recommended anchorage is off the village of Oranjestad where a shelf with depths of up to 90 ft. extends almost 2 miles offshore.

Vessels approaching the anchorage to receive bunkers or to wait for berthing will be advised in what position they should drop the anchor.

The anchorage area provides good holding ground in water depths of 22 m. – 30 m., 0.5 miles from the shore.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Pratique will normally be granted when the Pilot boards. Masters must report on any communicable disease which may have occurred on board prior to arrival.

RADIO: ETA must be communicated 72, 48 and 24 hours prior to arrival by cable addressed to Staterm St. Eustatius via Radio Curacao (PJC). Thereafter if ETA varies by more than 2 hours, the terminal must be advised. The initial message should include the following:

Discharging Vessels:
1. Name of vessel, call sign.
2. ETA St. Eustatius.
3. Draft on arrival.
4. Gross barrels and temperature on arrival (by grade).
5. Expected discharge rate.
6. Number and size of manifold connections.
7. Ballast hours required after completion.
8. Bunker requirements: quantity and grade.

Loading Vessels:
1. Name of vessel, call sign.
2. ETA St. Eustatius.
3. Draft on arrival.
4. Ballast: Quantity and discharge time.
5. Last cargo carried.
6. Ability to load while deballasting.
7. Maximum loading rate.
8. Number and size of manifold connections.
9. Departure draft.
10. Bunker requirements: Quantity and grade.
11. Slops retained: Quantity and grade.

Bunkering Vessels:
1. Name of vessel, call sign.
2. ETA St. Eustatius.
3. Type of vessel (tanker, cargo ship, etc.).
4. Flag.
5. Gross tonnage.
6. Length overall.
7. Draft on arrival.
8. Bunker requirements: Quantity and grade.
9. Maximum bunker rate.
10. Size bunker manifold.
11. Distance bow to bunker manifold.
12. Distance waterline to rail.
13. Distance rail to bunker connection.

VHF: Statia Terminal and the Pilot Station maintain listening watch on Channel 9. Channel 9 is used as a working Channel between ship, tugs and shore.

Vessels to make contact on Channel 9, 4 hours prior to arrival for berthing/anchoring instructions.

TUGS: Two twin screw Kort nozzle tugs, of approximately 2,900 b.h.p., 34 tons bollard pull, assist vessels at the terminal. Tugs' ropes will be used.

BERTHING:
1. At Gallows Bay, a breakwater extends 152 m. into the sea in a direction of 258° and continues in a direction of 318° for 45 m. A green flashing light (Fl.G 5 sec. – 6 miles) marks the seaward end of the breakwater. The first 60 m. of this breakwater has been paved and gives access to the Government Pier, which extends from the breakwater in a direction of 318° for 100 m. The West side of this pier is made suitable to accommodate Ro-Ro vessels, and provides a quay length of 60 m. with a minimum depth of 4.3 m., and a 20 m. wide Ro-Ro landing platform.

   The East side of the pier provides a quay length of 85 m. with a minimum depth of 4.0 m.
2. A small Ro-Ro mole is situated North of the Government Pier, and is built with a recess on the North side for passengers to load and discharge from tenders or other boats. There is a depth of 5 ft. minimum for this area. This picturesque site is well gardened with coconut palms and abundant tropical flowers, and is below the restored historic Fort Oranje.
3. About 1.5 miles N.W. of the Government Pier is an oil jetty with depth 62 ft., extending about 5 cables into the sea in a direction of 245°. This Pier can accommodate tankers up to 175,000 deadweight tons. A white flashing light (Fl. 5 sec., 10 miles) marks the most seaward end of the Pier. Position Lat. 17° 29′ 39″ N., Long. 63° 00′ 28″ W. By night, the jetty and the loading platform show many yellow/orange lights. Also see "Tankers".
4. About 3.7 cables North of the oil jetty, 2 multiple mooring buoy systems have been installed to accommodate vessels up to 700 ft. LOA with a maximum draft of 47 ft. on the West berth, and vessels up to 350 ft. LOA with a maximum draft of 30 ft. on the East berth. Also see "Tankers" and "Developments".

TANKERS: (Also see "Developments".)

Berth	*Max. d.w.t.*	*Max. Draft* (ft.)	*Loading Arms*
No. 1 (South Berth)	175,000	55	5×12 in. 1×6 in.
No. 2 (North Berth)	100,000	55	5×12 in. 1×6 in.

Berthing: Vessels lie alongside flexible, woodfaced breasting dolphins fitted with Yokohama fenders on either side of the jetty. Vessel's mooring lines are secured to mooring dolphins fitted with quick release hooks. Spring lines are secured to the breasting dolphins.

The water inshore along the jetty shoals gradually. The tug and barge berths are at the landward end of the jetty.

Fire fighting monitors are installed on the loading platform.

Loading: Bunker "C", I.F.O. and M.D.O. can be handled at both berths.

Connection to the shore is by Chicksan loading arms which the vessel's crew will connect under the supervision of a responsible officer.

Discharge is by ship's pumps assisted by shore booster pumps as required.

Loading is by gravity and/or shore pumps.

Maximum discharge rate is 25,000 bbls./hr. and loading rate 30,000 bbls./hr.

The bunker "C" and I.F.O. arms on the jetties are fitted with 12 in. presentation flanges, and the diesel and gas oil arms are fitted with 6 in. presentation flanges.

Both berths are fitted with gangways for ships' use.

Floating Dock: Two berths are provided on either side of a Floating Dock, 3.7 cables North of the Terminal Jetty, by means of mooring buoys.

The Floating Dock services as a work platform to transfer products between the shore tanks and vessels via sub-sea pipelines and floating hoses.

Vessels are moored on mooring buoys, parallel to and at a distance of 100 ft. from the Floating Dock on the West Berth and 50 ft. on the East Berth. The West Berth can safely accommodate vessels of maximum 700 ft. LOA × 90 ft. beam. Maximum allowable draft is 47 ft. The East Berth can safely accommodate ocean-going product barges and tankers of maximum 350 ft. LOA × 60 ft. beam. Maximum allowable draft is 30 ft. Only polypropylene or nylon mooring lines are to be used.

Floating hoses from the Floating Dock to the vessel are used for the transfer of cargo.

1×150 lbs. and 4×20 lbs. BC-powder fire extinguishers are installed on the Floating Dock, besides remote sensing devices to detect gas leaks.

Ballast Facilities: The terminal can receive up to 63,000 barrels of dirty ballast, which is processed at 2,800 bbls./hr. The terminal will not accept ballast containing any chemical which may affect the processing systems.

MEDICAL: A qualified general practitioner practices on the island and there is a local hospital in Oranjestad.

In the case of more serious illness the patient can be evacuated for hospitalisation at St. Kitts or St. Maarten.

FRESH WATER: Not available.

FUEL: All grades of bunkers can be supplied at the terminal berths.

In addition, Statia Terminals operate 2 bunker barges which can deliver all grades of bunkers in the anchorage area. Pumping rate 500 t.p.h.

Also see "Location".

SAFETY/FIRE PRECAUTIONS: The provisions of the current edition of the "International Safety Guide for Oil Tankers and Terminals" will be observed by vessels alongside the terminal facilities, and a copy of the Company's "Terminal Information and Regulations" booklet will be given to the Master by the Pilot on boarding.

REPAIRS: There are very limited repair services on the island.

AIRPORT: Winair services the island with four flights per day to and from St. Maarten, where international connections can be made.

CUSTOMS: There are no Customs restrictions.

TIME: Local time is GMT minus 4 hours.

BANKS: Barclays Bank of the Netherlands Antilles N.V. operates a sub-office in Oranjestad, St. Eustatius. The address of the main office in St. Maarten is P.O.Box 141, Front Street, Philipsburg, St. Maarten, Netherlands Antilles. Tel: (599-5) 22567, 22491, 23511, 22877. Telex: 8022.

CURRENCY: The Netherlands Antilles Florin and the American Dollar are the local currency (NAPL 1.78 = U.S.$ 1.00).

GENERAL:

Currents: Currents in the vicinity of the island, and particularly at the jetty, have not been studied. Information indicates that the currents at the jetty are subject to change in direction and velocity. Experience has shown that the currents are generally to the North at approximately 0.5 knots.

Tides: The normal tidal range at the jetty does not exceed 2.5 ft.

Weather: The normal weather at St. Eustatius is fair, with the prevailing winds from the East.

In the months of June until November, hurricanes may develop in the Caribbean area, although St. Eustatius is considered outside the normal hurricane tracks. However, in the event a hurricane should threaten, all seamanlike precautions should be taken by vessels using the anchorage and terminal facilities.

DEVELOPMENTS: During the 2nd half of 1994, a CALM-type SPM system will be installed, which will become operational in the 1st half of 1995.

The location of the buoy will be Lat. 17° 30′ 52.300″ N., Long. 63° 00′ 57.350″ W.

The SPM will be used to accommodate crude oil tankers up to 520,000 d.w.t. at a discharge rate of 90,000 b.p.h. and a loading rate of 100,000 b.p.h.

AGENCY: Statia Chandlers N.V. is the exclusive Agent for Statia Terminals N.V.

SHIPMASTER'S REPORT: March 1986 (Updated 1990).

Tanker of 95,000 d.w.t. called for bunkers only.

Vessels normally berth with bow heading out. 2 tugs with tug's lines. Forward tug at port bow and after swinging, second tug makes fast aft.

When berthing on Eastern side of jetty use the port anchor. A strong Westerly set can be experienced and may appear during berthing.

Require ship's messengers fore and aft as there are no winches ashore.

Moorings: 6 lines (head/stern/breast lines), preferably ropes, not wires and 2 springs on either end of ship. Lines to be sent ashore with ship's messenger lines fore and aft as there are no winches ashore.

Ship's personnel not allowed on jetty. Shore leave permissible by boat.

SHIPMASTER'S REPORT: October 1990.

Vessel approached from the South (very good radar target).

VHF contact established with Statia Terminal at about 30 miles, initially Channel 16 and afterwards all communications on Channel 9.

Vessel had bunker fuel oil for discharge, and was instructed to anchor 5 cables West of Statia Terminal Jetty in Tumbledowndick Bay. The water depth was 47 m. and the holding ground good, vessel had 8 shackles on deck.

Discharge was into 3 barges, all made fast on vessel's port side, with 2 ship's wires forward and aft.

Berthing at the jetty was effected starboard side to, with vessel heading South and turning to port, prior to swinging. Two tugs made fast fore and aft, at break of forecastle head and forward of after accommodation – tugs lines with eye on deck.

Vessel swung through 360° and slid stern first into berth. Port anchor was used, and when in position, 5 shackles were in the water. Moorings forward were 3 head lines, 2 breast lines and 2 springs, and aft 2 springs, 2 breast lines and 4 stern lines. Mooring boat was out of action, so all lines were passed by heaving line. Head and stern lines to be ropes only.

Chicksan discharge arm and shore gangway used, but no ship's personnel allowed to use the jetty.

All shore communications (for shore leave and ship's business) had to be by the terminal tugs, fitting in with their schedule, as the boat usually used was out of commission.

All terminal, Pilot, tugs and agency communications and co-operation were of a high standard.

Caleb-Brett were terminal surveyors.

Vessel later returned to the terminal area for bunkers. We were instructed to anchor 5 cables South of the jetty and 6 cables from the shore, in 22 m. of water. Vessel lay to the South while bunkering operations were taking place.

Crew changes were effected while in the port. All outgoing and incoming personnel were routed via the Isle of St.Maarten.

St.Maarten Port Services were vessel's Agent on both islands.

Cash was obtained, but had difficulty with Bank transfer from St.Maarten to St.Eustatius.

All Customs and Immigration documentation handled by the Agent (2 copies Crew List, 1 copy Stores List, 1 copy Personal Effects List and Last Port Clearance).

After cargo discharged at the terminal, vessel anchored 1.6 miles South of the terminal to await port clearance, documentation, etc. Vessel anchored in 30 m. with 6 shackles in the water, on the line 078° to the Gallows Bay 'City Pier'.

Once clearance obtained, Netherlands Antilles Government charge approximately U.S.$350.0 per day "waiting fee", if vessel remains in the anchorage area off the island, so it is prudent to move away to the Saba Bank and wait.

OPERATOR: Statia Terminals, N.V., Staterm Building, P.O.Box 170, Oranjestad, St. Eustatius, Netherlands Antilles. *Tel:* (599-3) 82300, 82259, 82395. *Telex:* 384-8029 Term NA. *FAX:* 82259. *Contact:* Marine Superintendent.

Statia Terminals Inc., Two Datran Center, 9130 South Dadeland Boulevard, Suite 1508, Miami, Fl. 33156. *Tel:* (305) 670-0700. *FAX:* (305) 670-0709. *Telex:* 6504-787851 Staterm CGBL.

SINT MICHIELSBAY, Curacao: 12.09 N., 69.01 W.

LOCATION: Sint Michielsbay, on the South coast of Curacao, 5 miles West of Willemstad, is an open bay, naturally protected from prevailing winds and sea.

PILOTAGE: Compulsory.

ANCHORAGE: In the bay 650 ft. out of the coast in 130 ft. water is laid a S.P.M. buoy, which gives a good anchorage to vessels up to 350,000 d.w.t. which, because of dangerous cargo, quarantine or because of a defect cannot enter another port of Curacao.

BERTHING: Vessels are moored with their stern to the buoy and their bow anchors are heaved out to hold the foreship from the coast.

REPAIRS: Repairs or handling cargo can be carried out by way of barges. A landing jetty for barges is available.

GENERAL: Other services as tugboats, lighterage, stevedoring, etc. are rendered from Willemstad.

AUTHORITY: See "Willemstad".

WILLEMSTAD/EMMASTAD, Curacao: 12.06 N. 68.56 W. (See Plan)

DOCUMENTS:

For Immigration:

2 copies of Crew List.

2 copies of List of Passengers. Passenger Lists should indicate full names, age, sex, civil state, and occupation. Passengers must show proof of citizenship (a passport, voter's registration or birth certificate is acceptable).

For Customs:

1 copy of List of Stores (deck, engine, narcotics, firearms and stewards department).

Manifest of Cargo for Curacao, if any, in duplicate, on special form called "Vrachtlijst" itemising the cargo by lots of the same mark and showing numbers, kind of packages, general description of contents and weights in kilograms or pounds of each lot.

Manifest of Cargo for Curacao, in transit, for transhipment through Curacao to other ports, if any, in duplicate for each different port separately on special form and itemised as indicated above.

Manifest of Cargo on board, in transit, if any, in duplicate on special form as indicated above, showing only the total number of packages on board, general description of the merchandise and total weight in kilograms or pounds; if the cargo is in bulk, this is indicated accordingly.

2 copies of tally books of cargo for discharge at Curacao, if any.

1 copy of Crew List, plus 1 copy of Personal Effects List.

1 copy List of Passengers landing at Curacao.

If the ship is in ballast, only the Stores List is required.

The Customs Officer will then make out his "Akte van inklaring" (Certificate of Entry).

The above documents have to be signed by the Master. They may be made out in Dutch, English, Spanish or French.

PILOTAGE: Pilotage is compulsory. Rendered day and night. Pilots are government officials and are stationed at Willemstad. The Harbour Master is also the head of the Pilot Service.

Vessels must provide a lighted, manned, properly secured and clean pilot ladder, fitted with sufficient spreaders.

A lifebuoy fitted with a Holmes light, as well as a reliable heaving line, should be placed close to the pilot ladder and the embarkation and disembarkation should be supervised by an officer. Vessels arriving or leaving with a freeboard exceeding 30 ft. must use the accommodation ladder in conjunction with the pilot ladder (Safety of Life at Sea Convention 1960).

Vessels bound for Curacao should proceed to Willemstad Harbour except when they have specified orders for another bay.

Vessels in sight of Willemstad will be contacted by the signal station at Fort Nassau for further orders. From this same station, lights are shown to direct the traffic in port.

Vessels should stay 1 mile off shore S.W. of the harbour entrance to await Pilot. Both anchors should be ready for immediate use.

Defects of engines, steering gear, anchor gear and other defects which influence the manoeuvring ability of the vessel should be reported before entering to the Harbour Master.

The pilot motorboat is identified by a blue flag with the letter "L" in daytime, and a red light above a white light at night.

ANCHORAGE: As a rule there is no anchorage area in the harbour, but in the Eastern part of the Schottegat there is a dolphin with mooring buoy on each side available to await berth or orders for limited time, subject to permission and conditions from the Harbour Master.

4 vessels, 2 vessels alongside each other can be safely moored at these buoys. Depth: 40 ft.; distance between each buoy and dolphin 1,000 ft. Furthermore, in the Southern part of the harbour a set of 2 dolphins can accommodate 2 vessels with length up to 600 ft. and a max. draft of 20 ft.

BRIDGES: Santa Anna Bay is crossed by 2 bridges, the Queen Emma floating pontoon bridge and the new Queen Juliana fixed bridge.

The pontoon bridge opens day and night for in and outgoing vessels. There will no longer be any waiting period at the harbour entrance. Automobile traffic will be diverted to the new bridge and those on foot will have continuous ferry service available. Ships will have overall preference for openings.

The fixed arch bridge, dominating Willemstad's skyline and the entrance to Schottegat Bay, is 185 ft. high, (clearance 180 ft.) enabling the biggest vessels to pass under. The bridge is of box girder construction and is open to automobile traffic only. Glare-proof lights are installed to prevent interference with light signals that harbour Pilots rely on when bringing a ship through the channels.

Tankers passing through the Santa Anna Bay must have all tank-lids properly closed, even if they are gas free. This is a harbour regulation.

RESTRICTIONS: The harbour of Willemstad consists of a 1,400 yd. long and min. 270 ft. broad channel, the Santa Anna Bay, with depths from 50 ft. to 79 ft. and an adjacent inner bay, the Schottegat, a 150-acre body of water with a depth of more than 10 ft. and a maximum of 79 ft.

The navigable portion of the entrance of the port is 865 ft. wide, marked on either side by a light-buoy, and the minimum depth is 50 ft.

Required minimum draft for tankers arriving, shifting and sailing:

g.r.t.	fwd. ft.	aft. ft.
up to 11,000	10	16
11,000-15,000	11	18
15,000-19,000	13	19
19,000-25,000	14	20
25,000-29,000	15	21
29,000-35,000	17	23
35,000-43,000	18	24
43,000-45,000	19	25
45,000-47,000	20	25
47,000-50,000	21	26
50,000-55,000	22	28
55,000-60,000	22	29
60,000-65,000	23	30
65,000-70,000	23	31
more than 70,000	24	32

Maximum trim for tankers: 10 ft. by the stern, 2 ft. by the head.

MAX. SIZE: Length 850 ft., draft 45 ft. Vessels with a LOA of 1,000 ft. have been piloted in the harbour.

HEALTH: The Port Doctor will visit only if there is a case of quarantinable disease on board. The Netherlands Antilles Bill of Health is free of charge.

RADIO: VHF Radio-telegraph and radio-telephone. PJC Coast Station operated by the Netherlands Antilles.

Location	:	Curacao.
Call Sign	:	PJC.
Frequencies (Telegraph)	:	438/500 kHz, 4334, 8694, 13042.5 and 17170.5 kHz. Schedules as indicated in the List of Coast Stations.
Frequencies (Telephone)	:	2182, 2550, 4125, 4379.1, 8725.1, 13119.4 and 17251.5 kHz. Schedules as indicated in the List of Coast Stations.
Watchkeeping	:	24 hours.
Range	:	Mid-Atlantic and Caribbean area.

VHF: *Port Operations Station (Operated by Harbour Authorities):* Location, Fort Nassau. Call sign, Fort Nassau. Frequencies, International Channels 16 (156.80 MHz), calling and safety; 12 (156.60 MHz), working, first choice; 14 (156.70 MHz). Watchkeeping, 24 hours on Channel 16. Type of operation, Simplex, Frequency modulated. Range, 20 to 25 miles.

Main Private Station. Operated by Isla (Refineria Isla Curacao S.A.): Location, Emmastad. Call sign, Refinery Isla Curacao. Frequency, international Channel 19 (receiving, 156.950 MHz); (transmitting, 161.55 MHz). Type of operation, Duplex working, frequency modulated; operated by remote control from Isla's telephone exchange; ask operator for connection with party desired. Range, 20 miles. Watch-keeping, 24 hours on Channel 19; normal daily business, 0730 hrs. till 2400 hrs.; urgent business only, 2400 hrs. till 0730 hrs.

Tug Base Station:

Location	:	Bullenbay and Willemstad (Grote Werf).
Call Sign	:	Marine Department – For tug movements only and in an emergency to direct the tugs at Refineria Isla (Curacao) S.A. Watchkeeping during office hours on Channel 19. Sleepboat Central Scharloo on Channel 14, or Fort Nassau on Channel 16. Central Post – For tug movements only. Watchkeeping 24 hours on Channel 19. Tugboat Jaro II/Tugboat Lima – For emergency calls to tugs on Channel 14 and Channel 19. Watchkeeping 24 hours on Channel 14 and 19. Telephone 612848/612849.
Frequency	:	International Channel 14 (156.700 mHz)
Operation	:	Simplex.

Tug Mobile Stations: Location, 1 on each tug. Call sign, Piku, Lima, Jaro II and Buni. Frequency, International Channels 16, 12, 14, 9, 8 and 6. Watchkeeping, 24 hours on Channel 14. Operation, Simplex – frequency modulated.

Curacao Drydock Co.

Location	:	Koningsplein (Schottegat Harbour).
Call Sign	:	Curacao Drydock.
Frequencies:	:	International Channels 13 (156.650 MHz), and 6 (156.300 MHz).
Watchkeeping	:	0730 hrs. till 2400 hrs.
Operation	:	Simplex.

TUGS: Compulsory for all tankers exceeding 3,000 g.r.t. Tankers exceeding 700 ft. LOA and all tankers which are not gas-free, must make one tug fast forward before entering.

S.I.A. (Smit International Antilles N.V.) has 2 modern powerful tugs stationed at Bullen Bay, for rendering services to tankers calling at Bullen Bay.

The "Piku", 4,000 h.p., 59 tons bollard pull, built in 1974.

The "Buni", 4,000 h.p., 59 tons bollard pull, built in 1975.

They are also used by "ship-to-ship transfer" in the coastal waters South of Curacao.

All tugs are provided with extensive firefighting and salvage equipment, and each tug carries some 25 tons of oil dispersant together with a spray system to be utilised in case of oil spill.

K.T.K. (Kompania di Tou Korsou) has 2 seagoing motor tugs stationed at Willemstad, and 4 pilot launches, of which two launches can be used as tugs (348 h.p.).

The "Lima", 2,250 h.p. GRT 162, bollard pull 30 tons.

Jaro II, 4,450 h.p., bollard pull 63 tons, built 1990.

The tugs can be engaged for rendering towage assistance both inside and outside the harbour. As a rule, however, all vessels dock or undock at all wharves and enter or leave the port without tug assistance. In case of abnormal circumstances or in case the Harbour Master may require tug assistance. Tugs lines are usually used, charge is U.S.$ 80.00.

Tugs can be requested by the Master for speeding up docking or undocking the vessel.

There are about 20 small harbour tugs available, varying from 60 h.p. to 300 h.p. and about 80 lighters, to receive cargo or bring it alongside a vessel, varying from 60 tons to 250 tons capacity.

Also see "Services".

BERTHING: There are berths on either side of the Santa Anna Bay, North of the pontoon bridge, with depths varying from 18 ft. to 33 ft. alongside, generally used for bunker, cargo and passenger ships.

On the Eastern side four wharves: the Handelskade, depth 18 ft.; the Kleinewerf, depth 24 ft.; Grotewerf, depth 31 ft.; and Salazarwerf, depth 24 ft.

On the Western side there are 6 wharves: the Matheywerf, depth 23 ft.; Westwerf I, 25 ft.; Westwerf II, 36 ft.; Nieuwewerf, 33 ft.; Motetwerf, 33 ft.; Oranjewerf, 19 ft.

In the Schottegat there are seven more berths, generally used for bunker, cargo or passenger ships.

Prins Hendrikwerf which closes the Western corner Santa Anna Bay/Schottegat, has a depth of 34 ft.; however, ships with a draft of more than 35 ft. can be moored by way of placing rafts of 10 ft. width between vessel and the quay.

At the Eastern part of the Schottegat are the Admiral Brion Wharves, which have 3,000 ft. docking space available with 33.5 ft. depth alongside.

In the Schottegat on the peninsula of Asiento are situated the 10 jetties owned by Isla, which are mostly used by tankers; however, other vessels are able to use these jetties for bunker facilities. Jetty No. 1 may be used for general cargo.

The Schottegat also has about 6,000 ft. of quay available for repairs. The names of the wharves, lengths and depths alongside are: Beatrix I and II, 1,300 ft. (each) – 20 ft.; Beatrix III, 400 ft. fore, 10 ft. aft – 35 ft.; Beatrix IV, 350 ft. – 31 ft.; Beatrix V and VI, 1,000 ft. (each) – 35 ft.; Repair Quay, 1,650 ft. – 35 ft.

There are sufficient covered and open storage places available on the wharves to load or unload a ship, generally dry cargo. Total covered storage area: 57,650 sq.ft., open storage: 500,000 sq.ft.

These areas can be used for transit as well as local cargo.

In the N.E. part of the Schottegat LASH lighters can be moored at 2 sets of buoys, depth 20 ft.

Storage capacity for liquid petrol products is 4,600,000 tons in tanks of Isla Refinery.

All Isla piers are modernly equipped to handle oil in bulk, safely, and speedily, in order to make the turn around of the vessels as short as possible. Sufficient hose connections are installed to load or discharge oil, water-ballast or residue, and to supply steam and fresh water.

The wharves in Santa Anna Bay and the Brion Wharves are all modernly equipped to supply different kinds of bunkers and also handle cargo simultaneously. General cargo is normally handled with ship's gear. Sufficient pallets and fork-trucks are available. Mobile cranes are available if needed up to 140 tons.

Docking of cruise ships and cargo vessels in Willemstad harbour: The following piers operated by Curacao Port Services Inc., are regularly used by cruise ships and rarely by cargo ships:

Nieuwewerf, Motetwerf: West side St. Anna Bay. Type: Quay. Construction: Sheet piling, concrete top, stelcon plates floor. Length: 1,200 ft. Draft: 33 ft. Height above water: 4 ft. One transit shed each: Nieuwewerf, width 65 ft., length 216 ft., area 14,000 sq.ft. Motetwerf, width 65 ft., length 216 ft., area 14,000 sq.ft. Open space area 200,000 sq.ft. One warehouse facility 6,500 sq.ft.

Oranjewerf: On West corner St. Anna Bay/Schottegat. Type: Quay. Construction: Iron piles, concrete top, concrete floor. Length: 418 ft. Draft: 19 ft. Height above water: 6 ft. Special bunker pier.

Prins Hendrikwerf: In the Schottegat near West corner Santa Anna Bay. Type: Quay. Construction: Iron piles, concrete top, concrete floor. Length: 690 ft. Draft: 34 ft. Height above water: 5 ft. One transit shed: width 65 ft., length 385 ft., area 25,000 sq.ft. Open space area 120,000 sq.ft. No warehouse facilities. Bunker facilities, water.

Admiral Brion Wharves: Nos. 1, 2, 3, 4, 5 and 6 situated at the East side Schottegat. Type: Quay. Construction: Sheet iron cells with concrete top, asphalt floor. Total length: 3×1,000 ft. Depth: 34 ft. Height above water: 5 ft. Two transit sheds; one with width 65 ft., length 680 ft., area 44,000 sq.ft.; one with width 65 ft., length 210 ft., area 13,650 sq.ft. Open space area 500,000 sq.ft. Two platforms for Ro-Ro ships are available. Max. draft 23 ft. – 33 ft.

Kleinewerf, Grotewerf, Salazarwerf: East side of St. Anna Bay. Type: Quay. Construction: Sheet piling, concrete top, asphalt floor. Total length wharf: 1,470 ft. Maximum depth alongside 24 ft. – 31 ft. Height above water: 2 ft. One transit shed, width 65 ft., length 330 ft., area 21,500 sq.ft. Open space area 154,000 sq.ft. No bunkering facilities.

Matheywerf: West side Santa Anna Bay. Type: Quay. Construction: Sheet piling, concrete top, asphalt floor. Total length wharf: 650 ft. Draft: 23 ft. Height above water: 4.5 ft. Open space area: 36,000 sq.ft.

Westwerf I: West side Santa Anna Bay. Type: Quay. Construction: Sheet piling, concrete top, asphalt floor. Length: 480 ft. Draft: 25 ft. Height above water: 4.5 ft. One transit shed: width: 61 ft., length: 396 ft. Area: 20,000 sq.ft. Open space area: Nil.

Westwerf II: West side Santa Anna Bay. Type: Quay. Construction: Sheet piling, concrete top, asphalt floor. Length: 430 ft. Draft: 36 ft. Height above water: 4.5 ft. Open space area: 18,000 sq.ft.

Bunker facilities. Water only available through fire hose from Nieuwewerf.

Container Terminal: This terminal offers a 500 m. (1,650 ft.) quay length with 1 Lo-Lo berth, 1 Ro-Ro berth and 1 combined Ro-Ro/Lo-Lo berth. The Ro-Ro berths are 25 m. length, each with a depth alongside of 40 ft.

At the terminal, an area of 100,000 sq.m. (about 25 acres) of container storage space, including reefers and modern repair and maintenance facilities is available.

A very modern gantry crane (capacity 50 tons) now handles approximately 25 moves per hour, in order to despatch ships as fast as possible. A mobile crane, with capacity of 40 tons under spreader, is also available.

The reefer parking area is to be equipped with 195, 220, 380 and 440 volt connections for 28 reefer containers.

Designed for up to 50,000 moves per year (with possibilities for further extension), the terminal is now handling 25,000 TEU moves each year.

Cruise Terminal: Located on the Mattheywerf in the Santa Anna Bay.

The terminal has a covered area of 745 m. (8,080 ft.) and is provided with all necessary facilities to embark and disembark passengers and has Customs and Immigration offices and counters, telephone (local and international) and tourist information office.

An extensive facelift is presently under way at the Matthey Cruiseship Wharf which is conveniently located within walking distance of the downtown area. When completed, facilities will include a covered open-air area with chairs, a snack bar and kiosks offering information on Curacao and booking for sightseeing trips, car rentals, etc., as well as restrooms.

Cargo handling and bunkering can be carried out simultaneously.

Besides the wharves mentioned above, there are 10 oil piers in the Schottegat for discharging crude oil and feedstocks for the Isla Refinery and loading products. These wharves are therefore used mainly by tankers. They are all equipped to provide bunkers.

All main grades of marine lubricants are stocked at the Port of Curacao. Shell Marine lubricants and Marine technical service with laboratory facilities for the examination of used oil samples are available 24 hours a day.

STEVEDORES: Gangs must be engaged between 0600 and 0630 hrs. for the day, on weekends and Saturdays. For work on Sundays and holidays, gangs must be ordered between 0600 and 0630 hrs. on Saturday or the workday preceding the holiday. Masters of vessels carrying out cargo operations are consequently recommended to advise Agents their ETA well in advance of above deadlines.

MEDICAL: 600 bed hospital available.

TANKERS: Besides the wharves mentioned in "Berthing", there are 10 oil piers in the Schottegat. Pier No. 1 for discharge of chemicals for Isla Refinery, Pier No. 10 for discharge of slops and tank cleaning, and Piers No. 2 – 9 for discharging of crude oil, loading of products and supply of bunkers.

All main grades of marine lubricants are stocked at the port of Curacao. Marine lubricants and Marine Technical Service with laboratory facilities for the examination of used oil samples are available 24 hours a day.

Name	*L.W. Max. Draft* (ft.)	*Max. Displ.* (tons)	*Max. Length* (ft.)
Isla Jetty 1	27	25,500	580
Isla Jetty 2	31.5	25,500	575
Isla Jetty 3	33	25,500	575
Isla Jetty 4	38	54,000	775
Isla Jetty 5	45	100,000	850
Isla Jetty 6	39	54,000	750*
Isla Jetty 7	31	25,000	560
Isla Jetty 8	45	100,000	850
Isla Jetty 9	33.5	40,000	850
Isla Jetty 10	For'd 21 Aft 31	40,000	850

* Max. LOA at Jetty No. 6, when Jetty No. 7 is occupied, is 665 ft.

SLOP RECEPTION FACILITIES: Available at Jetty No. 10.

FRESH WATER: Fresh water for drinking and use in boilers is available day and night in sufficient quantities. Fresh water is distilled from sea water by one of the biggest distillation plants in the world. The quality is very good and chemically pure.

Fresh water is delivered alongside by means of water barges. 5 water barges are available. Each barge can deliver 50/100 tons of fresh water per hour. The rate of delivery depends on the quantity required and how many barges can simultaneously deliver fresh water to the vessel. It also depends on the amount of connections on board the vessel and the height above water to be lifted. Vessels must advise Agent of requirements in advance.

On the *Motetwerf, Nieuwewerf* and *Prins Hendrikwerf* water can be delivered by means of a pipeline.

FUEL: Besides the Isla Piers, there is one bunkering installation: namely the "Motet" bunkering installation comprised of 4 berths.

The bunkering facilities of the "Motet" installations in Otrabanda, which are comprised of 7 storage tanks and pumping facilities, are supplied through 2 pipelines of 12 in. and 6 in. diameter from the refinery. The rate of delivery, by gravity and pumps, is 600 t.p.h. for fuel oil and 500 t.p.h for diesel oil.

Modern fuel blending facilities are available at all installations in Willemstad.

Note: Vessels calling exclusively for bunkers have free wharfage, provided they do not discharge and/or load in total more than 2 tons of cargo, land and/or embark in total more than 5 passengers, and they vacate the berth within 2 hours of completing bunkering (Not valid at Refinery wharves).

REPAIRS/DRY DOCKS: The Curacao Drydock Company Inc. has repair yards, 2 graving docks laid out in the Schottegat and 1×10,000 ton capacity floating dock.

The largest graving dock is 919 ft. long, width of entrance between wheel fenders 152 ft. and a depth of water over sill of 27 ft. Suitable for up to 155,000 d.w.t. Movable cranes of 25 and 75 tons lifting capacity are fitted alongside the dock.

The Curacao Drydock Company Inc. has 6,000 ft. of repair wharf with varying depths up to 40 ft. Cranes alongside up to 75 tons lifting capacity. Mobile truck cranes of 140 tons are also available.

Electric shore-power A.C., D.C. 110, 220 or 440 volts can be supplied directly from shore at wharves of Isla and at other wharves from generators on barges. Isla can also supply steam directly from the shore at a pressure of 8–15 kg./cm.

SURVEYORS: A.B.S., Lloyd's, N.V., B.V., R.I., G.L. and others.

Caleb Brett, Independent Marine Bureau, Aivepet, Saybolt, Chas. Martin, Caribbean Marine Consultants, J. Mesas and R. Lapre.

AIRPORT: There are daily international flights from Dr. Albert Plesman Airport.

ALM: Frequent daily trips to Aruba and Bonaire. Daily flights to Miami and New York. Regular air services to St. Maarten, Caracas, Maracaibo, Colombia, Haiti, Sto. Domingo, Puerto Rico, Trinidad and Paramaribo.

TAP (Air Portugal): 3 flights a week to Lisbon.

Servivensa: Daily flights to Punta Fijo, Maracaibo and Caracas.

Avianca: Daily flights to Colombia.

LAV: Many daily flights to Caracas.

KLM: Daily flights to Amsterdam, Lisbon, Madrid, Frankfurt, Zurich and Central and South America.

Ferry: Ferry's Del Caribe S.A. runs a regular service with a ferry which carries 120 automobiles. This ferry has regular service between Curacao and Coro, Venezuela on Monday, Tuesday, Wednesday and Thursday. On Thursday the ferry also goes to Aruba and Punto Fijo, Venezuela.

TIME: GMT minus 4 hours.

HOLIDAYS: New Year's Day, Carnival Monday (February), Good Friday, Easter Monday, Coronation Day (April 30th), Labour Day, Ascension Day, National Flag Day (July 2nd), Christmas Day, Second Christmas Day. "No work", holidays for cargo operations: New Year's Day, Good Friday, Labour Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Police and Fire, Tel: 44444. Ambulance Tel: 625822.

EMERGENCY CO-ORDINATION CENTRE: Curacao is a major Search and Rescue Centre in the Southern Caribbean and has the following resources at its disposal:

Communications: Curacao Radio listens on the standard frequencies (VHF Channel 16) – (2182 kHz. (voice) and 500 kHz (morse). Fort Nassau (Channel 12 and 16) is the harbour traffic control centre.

Co-Ordination: RNLAF (Royal Netherlands Air Force) Rescue Co-Ordination Centre (Curacao Rescue) at the Dr. Albert Plesman International Airport. Tel: 681628 (24 hours service).

During the emergencies the following frequencies are being used: 2182 kHz and VHF Channel 16.

The Curacao RCC maintains a communication link with the United States Coast Guard RCC in San Juan (Puerto Rico) and can use the AMVER information.

Air Search: In case of a missing aircraft or vessels the following forces are available for conducting Search and Rescue missions under control of the Curacao RCC:

2 Fokker F-27 maritime aircraft of the RNLAF long range patrol type. (Both aircraft can communicate on Channel 16 and 2182 kHz).

Coast Guard Auxiliary (CITRO) short range aircraft. Consisting of single and twin-engined light aircraft flown by Civil Pilots under RCC direction. Some of them can communicate on Channel 16.

Helicopters are not available.

Rescue Units: Commercial tugboats. Coast Guard Auxiliary (Citizens Rescue Organisation of the Netherlands Antilles – CITRO), using private boats.

Royal Netherlands Navy. If available the station vessel (a frigate and a minesweeper) will be despatched for emergencies.

Merchant Navy ships, in general Merchant Navy vessels, which will be directed by the aircraft described before, to emergencies. This in accordance with the Mersar-booklet on Search and Rescue.

SERVICES: *Salvage, etc.:* A supply vessel is permanently stationed at Willemstad by "Smit Tak International Antilles N.V." on a 24 hours service base. She is provided with extensive salvage equipment such as pumps, hoses, burning and welding equipment and an hydraulic crane with a capacity of 10 tons.

Facilities for divers such as compressors, decompression tank, etc., are on board. The ship is furthermore very suitable for bringing stores, spare parts, packed oil products, crew on board, passing, or on the roads, waiting ships.

Underwater Cleaning/Underwater Services:
Cleaning of submerged hull sections of ships while afloat. This cleaning can take place while the ship is moored in the main harbour at Willemstad and also at other locations, such as Caracas Bay, Bullen Bay and St. Michiels Bay.

Cleaning of cruise ships takes place while bunkering and the passengers are ashore.

A local company has developed its own underwater cleaning apparatus which cleans ships up to 250,000 d.w.t. within 24 hours. Also the rudder and propeller are properly cleaned. The cleaning does not affect the paint but only removes the very thin upper layer of spent anti-fouling paint, leaving the active anti-fouling exposed.

The company carries out various kinds of underwater works, e.g. sealing off sea-intakes and ropeguard, all other kinds of cutting and welding works, underwater inspections, made by certified divers, which can be combined with photographing of bottom condition in colour and black and white. Closed circuit underwater television with video-tape recorder is available.

It is the largest professional salvage and underwater cleaning company in the Netherlands Antilles and has experienced divers able to make certified damage reports. (Contact via Curacao Drydock Co. Inc.).

Peteres Divers Company Ltd.: The following underwater services are carried out by Peters Divers Company Ltd. Underwater hull cleaning by means of the "Scamp" makes it possible to clean the largest VLCC's during loading or discharging.

The average cleaning time for a VLCC is 12 hours. Underwater T.V. system for underwater surveys and inspections are available.

Further underwater services are: welding, cutting, photographing of the bottom condition, etc. in colour and black and white, sealing of intakes, etc. All inspections are carried out by licensed marine engineers.

REGULATIONS: Both anchors should be ready for immediate use. Defects of engines, steering gear, anchor gear and other defects which influence manoeuvring abilities of the vessel should be reported before entering, to the Harbour Master.

Dangerous Cargo: Explosives, ammunition, fireworks, radio active material and other dangerous cargo.

All vessels carrying explosives or other dangerous cargo, for discharge at Curacao, for transhipment or in transit without transhipment, *require special permission in writing, obtained prior to arrival,* for entering any port in the island of Curacao. Full details must be furnished in advance.

Only limited quantities of explosives, etc., are permitted in the port of Willemstad. For calls with larger quantities outports are used. Details of the regulations in force on the subject will be furnished on request by shipping Agents.

Entry permit required for ships carrying dangerous and/or hazardous cargo. Cost of form including stamp is fls. 4.00. Additionally administration fee is charged on the following basis:

Cargo in transit not being off-loaded from the ship – Nil. Local cargo to be discharged from the ship:

Up to 500 kilos	NAfls. 5.00
500 kilos to 5 tons	NAfls. 15.00
5 tons up to 25 tons	NAfls. 30.00
25 tons to 50 tons	NAfls. 45.00
over 50 tons	NAfls. 60.00

Transhipment cargo landed from one ship and reloaded on another ship: Double the local charge, indicated above.

At the discretion of the Harbour Master a special guard may be assigned onboard vessels handling or having dangerous and/or hazardous cargo on board. The charge, if and when incurred, is NAfls. 15.00 per hour in straight time and NAfls. 30.00 in overtime. Please note that this happens very seldom.

GENERAL: Customs Officers remain on board on duty during the vessel's stay in port. They must be fed by the ship and are entitled to the equivalent of officers' mess or first-class dining saloon.

GARBAGE DISPOSAL: Possible. Contact Selikor, Parera. Tel: 5999-614500.

WASTE OIL DISPOSAL: The Refineria Isla (Curacao) S.A., refinery in the Schottegat area is able to receive pumpable hydrocarbon waste oil NOT containing chemicals. Ship's Agent will arrange for a slops disposal barge of a capacity of 60 cu.m., and a tow boat. Price of barge Nafl. 1,200; price of tow boat Nafl. 175 per hour with a minimum of 3 hours; Sundays and public holidays Nafl. 225 per hour with a minimum of 3 hours.

SEAMEN'S CLUBS: Emancipatie Boulevard c/2. Tel: 5999-375317.

CURRENCY: Netherlands Antilles Guilders, pegged to the U.S.$ since December 1971 at U.S.$ 1.00 = Naf. 1.790.

SHIPMASTER'S REPORT: November 1986.

For "off-limits" call at Curacao stores and spares come out on pilot boat. Customs official will be on boat, and Agent or ship chandler will board. No official papers required, just sign and stamp Customs' stores receipt.

SHIPMASTER'S REPORT: January 1990.

Charts: B.A. Charts No. 702 and 1412.

Approaches: No particular difficulties from any direction. Willemstad easily identifiable with its oil refinery, bridge over Sint Anna Baai and hotel on the S.E. entrance to Sint Anna Baai.

Anchorages: None. Aruba, which is approximately 60 miles to the N.W., has a shelf of about 24 m. at the N.W. end, some parts of which are under 'Port Control'. The S.E. shelf is very exposed to prevailing winds and swell.

There is an area 50 miles to S.W., off Venezuela, giving reasonable anchorage, but this is in Venezuelan waters.

Most vessels waiting drift off the South coast of Curacao. We drifted 7 miles off the coast, starting South of Caracas Bay, and in 11 hours drifted to about 6 miles South of Kaap St.Marie.

Pilot: Pilot boards from workboat with white and blue upperworks, 0.5 miles off Sint Anna Bay entrance.

Fort Nassau Signal Station on VHF Channel 12.

Procedure: Isla Refinery (VHF Channel 19) requires cargo grades and amounts, draft, agent, if gas-free, loading rate in cubic metres, tank preparation, facilities required (slops, bunkers, fresh water).

Note: Trim not to be more than 10 ft.

A tug is necessary if trim exceeds 10 ft. and/or vessel not gas-free, and if vessel over certain dimensions. Even if vessel advises necessary information, a tug often appears and should be rejected, otherwise vessel will be liable for a fee.

Tugs: Four tugs available. All are modern Smit harbour tugs, based in Sint Anna Baai, near the Pilot Station at Salazar Wharf.

Max. Size: Pilots reported that present maximum size of vessel to pass through Sint Anna Baai into the Schottegat, is length 936 ft., breadth 160 ft. and draft 45 ft.

Berth: Berth No. 9: For lube oils, maximum size 40,000 displacement tons (near to dockyard). Port side too. After rounding Berth No. 8 dolphin, approach head on with starboard anchor ready. Depending on pilot, a good or poor approach can be made with or without anchor. Care should be exercised aft, as vessel landed heavily on a fender support bracket, which thereafter penetrated the ship's side. Best to hold off and land very gently on large rubber fender.

Two headlines and 2 springs are compulsory forward and aft.

Berth No. 2: Gas oil and Av. Jet, starboard side too. West end of Schottegat.

Berth No. 3: Gas oil and Av. Jet, port side too. West end of Schottegat.

Berth No. 7: Gas oil and Av. Jet, port side too.

All berths have gangways. Mooring boat used at all berths.

Cargo: Berth No. 9: Lube oil. Vessel has loaded up to 6 grades through Chicksans, maximum 4 grades at any one time.

For No. 1 tanks, Chicksans landed on deck and connected to manifold by hoses, otherwise manifold liable to damage due to unsupported Chicksan weight.

Vessel should always request "First foots" and give letter to this effect on arrival. Tank Survey for lube oil is strict.

A lot of paperwork procedure on berthing. Delays can be expected in sampling. At completion sampling/documentation can take up to 5 hours.

As a guide, lube oil rate for large quantities around 2250 bbls./hr., for small quantities 1,000 bbls./hr. At Berths No. 2, 3 and 7 loading rate reported high.

Officials: Agent deals with most paperwork.

Water Police (Immigration) board on arrival.

Documents:
2 Crew Manifests.
2 Bond Lists.
2 Stores Lists.
1 Health Declaration (sited by Immigration).
2 Cargo Manifests.
4 Crew Lists.

If bond or beer being taken, Customs board to seal.

Shore passes required to pass through refinery (free service to be used, no walking inside refinery). Special forms made out by Master.

Two Customs Clearance Forms given by agent on departure, original to be handed to pilot.

General: Radio Holland will not board for repairs on Sundays and public holidays.

Refinery now owned by Curacao Government/Venezuelan partners with refining agreement until 1995.

New floating dry dock at Curacao dry docks (Berth No. B5).

Pontoon bridge across Sint Anna Baai out of commission, due East landing area being damaged by ship.

AUTHORITY: Curacao Port Authority N.V., Werf de Wilde Z/N, P.O.Box 689. Willemstad, Curacao, Netherlands Antilles. *Cables:* Harbour Office Curacao. *Tel:* (9) 611133, 614422. *Telex:* 3339 CURPA NA. *FAX:* (9) 613907. *Contact:* Mr. Ing. E. Voges, Managing Director.

AGENT: SEL Maduro & Sons (Curacao) Inc., Maduro Plaza, P.O. Box 3304, Willemstad, Curacao, Netherlands Antilles. Tel: 599-9-376564/376352. Telex: 1092, 3325 or 3393 Selms NA. Fax: (5999) 371266. Cables: "Maduroship".

New Caledonia

NOUMEA: 22.16 S. 166.27 E. (See Plan)

PORT LIMITS: *Port Area:* Main Harbour as far as entrance between Port Lestelle and Point Kongou.

Secondary Harbour and Orphelinat Bay as far as the entrance between Brun Islet and Point Denouel.

DOCUMENTS:

8 copies Cargo Manifest.
2 copies Manifest of parcels to be unloaded for New Caledonian Residents.
2 copies List of Personal Objects.
(detailing photographic and audio-visual equipment, watches, etc.).
2 copies List of Foreign Currency.
2 copies List of Provisions.
2 copies Inventory of Consumable Matter.
2 copies List of Drugs and Narcotics.
(which *must* remain on board).
2 copies List of Weapons and Ammunition.
(under Master's responsibility).
4 copies List of Crew Members.
4 copies List of Disembarking Passengers.
(or notification of no Disembarking Passengers).
4 copies Transit Passenger List.
1 copy Maritime Health Certificate.
4 copies Declaration of Vessel's Specifications.
1 copy Submission Form.

PILOTAGE: Compulsory for foreign vessels (exemption for vessel with French Registery under 60 m. LOA), pilotage rendered day or night. Ladder to be 1.5 m. above water.

Pilot boats are wooden launches about 15 m. long, with black hull, equipped with VHF (permanent reception on Channel 16. Channels 12, 14 and 17 working). Pilot boats also transmit on 2182, 4072.3 and 8207.4 and receive on 2197.5, 4366.7 and 8731.3

Two access channels to Noumea through reef.

Boulari Channel: (Lat. 22° 30′ S., Long. 166° 26′ E.)

Pilot boards 1 mile off, on the Leads of Amedee Lighthouse.

Havannah Channel: (Lat. 22° 21′ S., Long. 167° 03′ E.)

Pilot boards off Goro Lighthouse on the Leads of Cap N'Dua by day, and off Port Boise at night.

In bad weather, pilot launches remain on leads as close as possible to entrance.

Pilot should be ordered at least 6 office hours before departure or moving.

ANCHORAGES: In Great or Small Road. Prohibited zone shown on chart in vicinity of underwater sealine.

RESTRICTIONS: Vessels may enter and anchor at any time, mooring may be effected at night, except for tankers at buoys.

MAX. SIZE: *Cargo Vessels:* Max. draft 10.30 m.

Tankers: Max. LOA – 260 m. Max. draft 9.70 m.

HEALTH: If vessel is "healthy", Pratique is accorded by the Pilot at the entrance, or by the Harbour Master (VHF).

In the case of contagious disease or death on board the Harbour Master must be notified by radio (VHF) before entering inner reef and the vessel must anchor at the Quarantine Station at N'Die (East of Freycinet Islet in Dumbea Bay).

Port Regulations: All vessels must comply with current Quarantine Regulations and if necessary undergo fumigation and disinfestation before tying up.

Before docking, any vessel arriving from a country infected by Rhino Beetle (*Oryctes Rhinoceros*) must:

(a) Anchor 400 m. from the coast between sunrise and sunset, keeping holds closed.

(b) Be visited by a Quarantine Inspector and if necessary disinfested.

(c) Holds must remain closed 2 hours after fumigation.

Infected Countries: Fiji, Tonga, Samoa, Wallis/Futuna, Bismarck Archipelago (New Britain, New Ireland, New Hanover), Sarmi, Manokwari Sorenarwa (Western Irian Jaya), Palau Islands (Carolines), Indonesia, Philippines, Taiwan, Japan, Dominican Republic/Haiti, Cuba.

(d) Any ship coming from Japan is inspected to prevent contamination by *Papillia Japonica*.

(e) Any vegetable goods to be unloaded must be accompanied by a Quarantine Clearance Certificate.

(f) Special permit is necessary from the New Caledonian Agricultural Department prior to importation of plants and seeds, etc.

Hygiene: All ships alongside must be equipped with rat guards.

RADIO: All messages by Coast Station Noumea, call sign FJP. Harbour Master's Office equipped with VHF Channels 16, 12 and 14, operated during normal working hours.

Arrival Advice: To Agent 48 hours before arrival: Indicate: Arrival time at Pilot pick-up point; name of pass; overall length; forward and aft drafts of vessel; damage or mechanical problems, if any to vessel's apparatus and cargo; tonnage to be unloaded; dangerous cargo, explosives, etc.

Note: This information must be lodged with the Harbour Master's Office 24 hours before arrival.

VERY IMPORTANT: Tankers carrying hydrocarbons must notify their Agent as to whether they have or have not the International Certificate for Prevention of Pollution by Hydrocarbons.

To Agent and Pilot Station 24 hours prior to arrival: Confirmation of arrival time at Havannah Passage or passes outside the Southern Zone.

12 hours prior to arrival: Confirmation of arrival time at Boulari Pass.

Note: Application for a Pilot must be made to the Pilot Station during official office hours (Monday to Friday 0700 hrs. to 1100 hrs. and 1330 hrs. to 1730 hrs.; Saturday 0700 hrs. to 1100 hrs.), either by telephone or telegram by the ship's Master addressed to the Pilot Headquarters and transmitted to the Coastal Communications Centre (Tel: 27.32.74).

TUGS: Tug's service is compulsory for vessels over 60 m. LOA. 1×25 tonnes B.P. and 1×28 tonnes B.P. tugs available to assist. Tugs equipped with VHF Channels 16, 12 and 14. Tel: 27.45.57.

BERTHING:

Petite Rade (Small Road):

Berth	*Length* (m.)	*Depth* (m.)
Cruise Ship Berth	110*	8.60
Coaster Wharf	190	3.50 – 5.50
Coastal Trader Wharf	140	3.50 – 4.50
Tourist Vessel Wharf	75	9.50
	(with 2 dolphins 155 m. apart)	(For vessels up to 170.0 m. LOA)

The new berth for passenger ships will accept vessels up to 200 m. LOA.

Grande Rade (Great Road):

Fishing Vessel Wharf	121	8.00
Coaster Wharf	140	3.80 – 5.00
Main Wharf (Berths Nos. 4–7)	694	10.00 – 10.50

Note: Access to Berth No. 4 limited to 8.80 m. by shoal 70 m. off wharf.

There is one mooring buoy 160 m. from the N.W. corner and in line with the main wharf.

BULK HANDLING FACILITIES:

Grain: 4 grain silos of 815 tonnes each, and mill with 5 silos and total capacity of 4,000 tons.

Cement Berth: Private berth located in Baie de Numbo (position: Lat. 22° 15′ S., Long. 166° 25′ E.). Initially designed for vessels of LOA 135 m. but can handle vessels with a max. LOA not exceeding 168 m. and draft not exceeding 9 m. Vessels berth alongside 3 dolphins 110 m. apart with mooring buoys fore and aft. Middle dolphin equipped with crane, hopper and conveyor. Fresh water available.

Usine le Nickel: Private wharves with 3 berths for ore carriers, tankers and freighters.

Quai Sud: 1 berth, length 170 m., depth 9 m. Equipped with 3 shore cranes for unloading ore carriers.

Quai Nord Ouest: 2 berths. Total length 397 m. Berth No. 3/4 depth 9 m. Berth No. 5/6 depth 10 m. Loading of processed metal and unloading of tankers on behalf of Shell.

Also see "Tankers".

EQUIPMENT: Stevedore Company equipment:

Societe du Chalandage:

Fork Lift Trucks: 6×1.5 tons, 10×2.5 tons, 12×4.0 tons, 3×5.0 tons, 4×6.0 tons, 10×10.0 tons.

Forklift/Frames (for Ro-Ro/Spreaders): 1×30 tons, 1×25 tons, 2×22 tons, 1×12 tons.

Karry Crane: 5×3 tons (6 tons doubled).

Tractors for Vehicles: 2.

Cranes: Poclain P.P.M. automotive, 14 tons (4 – 5 tons useful load). Richier on carrier (jib 24 m.) 40 tons (at 3 m.).

Self-Loading Trailers for Container Vessels: 20 tons (1 container 20 ft.). 30 tons (containers 20 ft. – 40 ft.)

Spreaders for Containers: 3 automatic for 20 ft., 1 automatic for 40 ft.

Trucks with Crane: 2 with jib 6 m., 7.5 tons/m., 1 with jib 7 m., 9 tons/m.

Semi-Trailer: 10×12 m. long. 7 Espadon type.

SOFRAC:

Crane Belotti: 1×22 tons with directional spreader.

Forklifts: 2×22 tons with frontal frame.

Forklifts: 3×8.5 tons, 2×6.5 tons, 1×6 tons, 1×5 tons, 3×4 tons, 2×3 tons, 1×3 tons (lowered for unloading containers), 1×2.5 tons (lowered for unloading containers), 2×2 tons (lowered for unloading containers).

Karry Crane: 1×3 tons (6 tons doubled).

Semi-Trailers for Containers: 6 for 20 ft., 24 tons. 4 for 20 ft. – 40 ft., 24 tons.

Heavy Duty Tractors: 6 for loads from 38 tons to 60 tons.

Tank Trucks: 1×35 cu.m. (1 tank), 22 tons. 1×24 cu.m. (2 tanks), 22 tons.

Automatic Spreaders: 2 for containers 20 ft., 25 tons. 1 for containers 40 ft., 30 tons.

Suction Pumps for Grain: 1×140 t.p.h., nominal 40 – 45 t.p.h. 1×35 t.p.h., nominal 25 t.p.h. 1×200 t.p.h.

Semi-Trailer with Worm: 1 for unloading grain containers.

S.A.T.O.:

Forklift Trucks: 2×2.5 tons (on board), 4×4 tons, 3×6 tons, 1×8 tons, 1×12 tons, 1×25 tons.

Karry Crane: 1×3 tons (6 tons).

Automatic Spreader for Containers: 1×20 ft., 25 tons.

TANKERS:

Baie des Dames: (Mobil Oil Australia). (Position: Lat. 22° 14′ S., Long. 166° 24′ E.).

1. 5 mooring buoys (max. distance between East and West Buoys 361 m.) 2×8 in. lines for clean and black oils (each marked by a Spar Buoy and a Marker Buoy). Max. LOA 200 m., max. draft 10 m. The buoy mooring is used to discharge Mobil/Total tankers and bunker cargo vessels, liners and ore carriers.

2. "T" shaped jetty, length 9 m. 4 mooring dolphins and 2 mooring buoys (110 m. apart). Max. LOA of tankers 100 m., max. draft 5 m. Berth used for discharge of tankers and liquid gas carriers, bunkering of vessels and loading of tankers.

Also see table.

SLN: Quay Nord-Ouest at Doniambo. Max. LOA 260 m., max. draft 9.7 m. Products handled: Black oils and black fuel oil No. 2.

Oil Terminals:

	Bay des Dames Mooring	Bay des Dames Anchorage	Doniambo (SLN) Shell Tankers

Black oil	7	7	—
	These two terminals are operated by Mobil Oil and are used for discharging and loading tankers as well as for bunkering all types of vessels.		For tankers containing products for Shell.

LPG Terminal:

Gas carriers berth port side to wharf, against the jetty and the 4 dolphins which make up the Mobil Oil installations in Bay des Dames.

Limits: Overall length : 100 m. Draft: 5 m.

Capacity of reservoirs: 3,115 tons. Sphere No. 1: 330 tons; Sphere No. 2: 560 tons; Sphere No. 3: 2,225 tons.

All the spheres can be used for stocking butane.

Sphere No. 1 can also stock propane.

Average density of butane gas: 0.580.

Maximum pressure of liquid: 15 kg/sq.cm.

Normal delivery pressure: 7 kg/sq.cm.

Maximum vapour pressure: 5 kg/sq.cm.

Pumping speed: Maximum 70 t.p.h. Minimum speed: 10 t.p.h.

Hoses used by vessel: 1 hose for liquids 4 in. diameter; 1 hose for vapours 3 in. diameter.

Obligatory requirements for tankers carrying Hydrocarbons: Masters of all vessels carrying hydrocarbons and on the point of entering New Caledonian waters are under obligation to send to the Marine Commander in Noumea (F.U.J.), a message, indicating:

(1) Intended course.

(2) Navigation and manoeuvring possibilities.

6 hours before entering territorial waters.

6 hours before sailing.

Note: During sojourn or transit in New Caledonian waters, permanent radio contact is observed; international radotelephonic call frequency on the maritime metric band.

Tankers must use the following passes:

Havannah or Boulari: Tankers carrying less than 8,000 tons of petroleum products and less than 8 m. draft.

Pilot pick-up point 5 nautical miles off Boulari:

1. Entry via Boulari Pass if less than 20,000 tons of petroleum products and draft under 10 m. (night or day);
2. Entry via Dumbea Pass if more than 20,000 tons of petroleum products or more than 20 m. draft (daytime only).

Thio and Poro:

Tankers: Less than 20,000 tons of products and draft under 10 m.

Very Important:

Docking of tankers is in accordance with the possession of:

International Certificate for the Prevention of Pollution by Hydrocarbons; consequently:

This must be indicated to ship's Agent 48 hours prior to arrival.

Certificate must be shown to Pilot at the entrance, and to the Harbour Master or his representative upon docking.

STEVEDORES: Service provided by three private companies. 2 or 3 days' notice required to arrange work.

Working Hours: Normal Hours: Monday to Friday 0700 hrs. – 1100 hrs. and 1300 hrs. – 1700 hrs. Overtime: Monday to Friday 1800 hrs. – 2300 hrs., Saturday 0700 hrs. – 1100 hrs. and 1300 hrs. – 1700 hrs.

MEDICAL: Clinique de Magenta, Rue du 18-Juin, Magenta, Box H5. Tel: 28.49.29.

Clinique Magnin: Route Territoriale No. 13, Vallee des Colons, Box 64. Tel: 27.26.01.

Hospital Gaston-Bourret, Avenue Paul-Doumer, Noumea, Box C5. Tel: 27.21.21.

Polyclinique de l'Anse-Vata, Route de l'Anse-Vata. Tel: 26.14.22.

Note: Numerous dispensaries located in villages and mining centres of the interior. If necessary, urgent medical evacuation possible by plane or helicopter.

DENSITY: 1026.

FRESH WATER: Supplied by pipeline at the quays in the Commercial Port, S.L.N. and Numbo Private Cement Factory; rate, 40 t.p.h.

FUEL: Refuelling with marine diesel oil (M.D.O.) or bunkering fuel oil (B.F.O.) is possible.

Authorisation previously obtained by the shipowner from the Australian or French Head Offices of the 3 companies present in Noumea can aid local formalities:

Mobil Tel: 27.31.52

Shell Tel: 28.57.20

Total Tel: 27.52.91

"Light" fuels can be delivered by tanker, but "heavy" fuels must be loaded at the Mobil refuelling post, Bay des Dames.

Docking: LOA 100 m. draft 5 m.

Mooring to buoys: LOA 183 m., draft 10 m.

Note: When tying up to buoys: One must count 3/4 hours' lost time for the various operations. A derrick capable of lifting the hose (3 tons) is necessary.

CONSULS: Australia, 19-21 Avenue du Marechal-Foch, Noumea. B.P. 22. Tel: 27.24.14. Cables: Austcom. Telex: 087 NM.

Belgium, 13 Rue Jules-Ferry, Noumea. Box 2683. Tel: 28.46.46.

Indonesia, 4 Rue de Strasbourg, Noumea. Box 26. Tel: 28.25.74.

New Zealand: 4 Boulevard Vauban, Noumea. Box 2219. Tel: 27.25.43. Cables: Kereru. Telex: 036 NM.

REPAIRS: Many engine, hull and electronic repairs can be effected. Slipway for small vessels. One slipway, to lift vessels of 1,000 tonnes.

SURVEYORS: *Marine Surveyors:*

Bureau Naval Serve, 32 Rue du General-Gallieni, Noumea. Tel: 28.25.02.

Bureau Veritas, 21-23 Rue de l'Alma, Noumea. Tel: 27.20.31.

Lloyd's Register of Shipping, 7 Rue Anatole-France, Noumea. Tel: 27.20.83.

For all problems relating to cargo and/or vessel damages.

Draft surveys for estimation of nickel ore loads per ship.

Classification Societies:

Lloyd's Register of Shipping, Societe W. A. Johnston, 7 Rue Anatole-France, Noumea, Box 445. Tel: 27.20.83. Cables: Johnston. Telex: 070 NM.

Bureau Veritas, Societe des Etablissements Ballande, 21-23 Rue de l'Alma, Noumea, Box C4. Tel: 27.20.31. Cables: Ballande. Telex: 025 NM.

Germanischer Lloyd and Nippon Kaiji Kyokai. Bureau Naval Serve, 32 Rue Gallieni, Noumea, Box 2387. Tel: 28.25.02. Cables: Surveyor. Telex: Gemar 065 NM.

GANGWAY/DECK WATCHMEN: Recommended, but not compulsory.

OPENING/CLOSING HATCHES: Can be performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes per man(400 cigarettes at Outports). Additional allowance can be made after 10 days. Maximum 2 bottles of spirits per man. Wines and beer not limited. Landing of cigarettes, wines and spirits prohibited.

CARGO GEAR: Ship's gear normally used. Possibility of hiring cranes 10 tons – 104 tons.

REPATRIATION: All facilities available for crew change and repatriation.

AIRPORT: Tontouta Airport situated 50 km. from Noumea. Several connections a week to all parts of the world.

TIME: GMT plus 11 hours. N.B. Daylight saving is sometimes introduced between December and February.

HOLIDAYS: 1st January, Easter Monday, 1st May, Pentecost Monday, Ascension Day, Whit Monday, 14th July, 15th August, 24th September, 1st November, 11th November, 25th December. Work may be arranged on Sundays and holidays.

POLICE/AMBULANCE/FIRE: Police, Tel: 17; Fire, Tel: 18; Ambulance, Tel: 27.21.21.

EMERGENCY CO-ORDINATION CENTRE: Call "Noumea Marine" on VHF Channel 11.

BANKS: Banque de l'Indochine et de Suez, Corner of Rue de l'Alma and Avenue du Marechal-Foch, Noumea. Box G5 Tel: 27.22.12. Cables: Indosuez. Telex: 023 NM.

Banque Nationale de Paris/Nouvelle-Caledonie. 60 Avenue de la Victorie, Noumea. Box K3. Tel: 27.55.55. Cables: Natio Par. Telex: 022 NM.

Banque de Nouvelle-Caledonie Credit Lyonnais. 75 Rue de Sebastopol, Noumea. Box L3. Tel: 28.50.69. Cables: Calbank. Telex: 091 NM.

Banque de Paris et des Pays-Bas-Nouvelle-Caledonie. Corner Rue del'Alma et Rue Georges-Clemenceau, Noumea. Box J3. Tel: 27.51.81. Cables: Paribas. Telex: 086 NM.

Societe Generale Caledonienne de Banque. 56 Avenue de la Victorie, Noumea. Box G2. Tel: 27.22.64. Cables: Pacsoge. Telex: 067 NM.

STORING: See "Prelims".

1. By Truck.
2. None.
3. Yes.
4. Yes.
5. Duty Free.
6. Yes.

WEATHER: *Wind:* The prevailing wind is the South-Easterly Tradewind blowing regularly from June to October.

N.B.: The Tradewind freshens with the sun.

Close to shore: Maximum around 1400 hrs.

Open Sea: Maximum around 1800 hrs.

Cyclone Season: From November to April (variable winds, rain, gusty conditions).

Rainfall: Dry season: Minimum 50 mm./month.

From January to March: Heaviest rainfall owing to the Cyclone season.

Rainfall varies between coasts depending on their exposure to winds.

Temperature: Average temperature: 24°C.

The maximum temperatures are during the month of February: 34°C.

Tides: Semi-diurnal type affected by daily inequalities. The high and low April tides are on an average 0.40 m. higher/lower than the October tides.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Recommended that crew carry Seamen's Books.

SHIPMASTER'S REPORT:

Communications: Radio W/T. Short wave service and MF service very good. First message to state which passage used – Draft – Tonnage – and nature of dangerous cargo, this should be sent at least 24 hours before arrival, Agent and Harbour Master required this message.

Shore Telephone: Service available as receivers can be connected.

VHF: Available to Harbour Office and pilot station during office hours 0700 hrs. to 1100 hrs. and 1300 hrs. to 1700 hrs. Monday to Friday. Pilot vessel when at Havannah Passage keeps VHF watch 1 hour before the last given ETA. In our case we made contact with the pilot vessel when 12 miles from Havannah Passage. If at anchor VHF contact to Agents can be made via Harbour Office.

Pilotage: Boarding ground: Canal de Havannah. The Pilot boards the vessel when on the leads, but inside the reef, when the vessel is off Port Goro. The 3 leading lights stand out well at night time, each light is individually powered in case of failure, in our case they were seen 25 miles away. During strong S.W'ly winds the Pilot will board in the lee of Ioro Reef. As the leads do not stand out so well in day time, night time seems to be the best arrival time. This channel has been swept to a depth of 34 ft. Strong cross currents can be expected at the entrance to Havannah Passage.

Anchorages. See CHINPACS for area dangerous due to mines. Otherwise vessel anchors Grande Rade.

Quarantine. Pratique granted by Pilot, Health Signal not required unless notifiable sickness on board.

Controlling Factors: Berthing times: Vessels are now berthed at any time, the usual side to being Starboard side, a 1,200 h.p. tug being used to assist.

Length: No limit at berth.

Berthage: 700 m. at the New Wharves.

Stevedoring. Working time. 0700 hrs. to 1100 hrs. then 1300 hrs. to 1700 hrs. and overtime from 1800 hrs. to 2200 hrs. The labour will also clean out the hatches provided one gang is actually working cargo, otherwise they stop when cargo work is all finished. Saturday is not an overtime day. Only Sunday is an overtime day. Good Friday and Easter Saturday are considered normal working days. The Stevedoring is good, with a fast working rate, but I regret to state that some pillage took place. As regards unprotected cars, the most minor marks were claimed against the vessel, these were repudiated.

Documents:

1 Cargo Manifest.
1 List of Dangerous Cargo.
2 Crew Lists.
1 Crew Personal Effects List, this list to include currency held, (French Forms accepted).
1 Bonded Stores List.
1 Health Form.

OUTPORTS: (See Plans).

For Ore loading vessels:

Nepoui: Lat. 21° 20.1′ S., Long. 164° 25.5′ E.

LOA vessel 163 m. Draft 8.7 m. Telescopic shuttle clearance 12.5 m. Loading rate 1,250 t.p.h.

1 Launch available.

Tankers: 6 in. flexible hose, weight 2 tons, 8 in. pipeline. Pumping rate 200 t.p.h. Pressure 7 kg./sq.cm.

Thio: Lat. 21° 37.5′ S., Long. 166° 15.5′E.

LOA vessel 170 m. Draft 10.8 m. Telescopic shuttle clearance 11 m. Loading rate 686 t.p.h.

1 Launch available.

Tankers: 6 in. flexible hose weight 2 tons. 6 in. pipeline. Pumping rate 130 t.p.h. Pressure 7 kg./sq.cm.

Kouaoua: Lat. 21° 24′ S., Long. 165° 49.8′ E.

LOA vessel 150 m. Draft 8.5 m. Telescopic shuttle clearance 10.5 m. Loading rate 628 t.p.h.

2 Launches (1 shared with Poro) available.

Poro: Lat. 21° 19′ S., Long. 165° 44′ E.

LOA vessel 169 m. Draft 9 m. Telescopic shuttle clearance 11.05 m. Loading rate 900 t.p.h.

2 Launches (1 shared with Kouaoua) available.

Tankers: 8 in. flexible hose, weight 2 tons. Pipe-line 6 in. Pumping rate 130 – 150 t.p.h. Pressure 7 kg./sq.cm.

Baie Ugue: Lat. 21° 09′ S., Long. 165° 33′ E.

LOA vessel 170 m. Draft 11 m. Telescopic shuttle clearance 12 m. Loading rate 600 t.p.h.

1 Launch and 1 tug 400 h.p. available.

Loading of Ore by Lighters:

Vessels anchored in bays, sheltered from the ocean swell by the barrier reef, but not sheltered from heavy seas caused by wind.

West Coast: Poum/Paagoumene, Karembe, Teoudie, Poya, Bourail (anchorage and mooring buoy), Bay N'Go (anchorage and mooring buoy).

East Coast: Moneo, Kouaoua, Nakety, N'Goye, Ouinne (anchorage and mooring buoy).

Loading Operations: Loading is carried out under supervision of the miner and his stevedore who embarks and lodges part of his personnel on board the vessel.

1. Lighter train towed by a tug, runs a shuttle between the loading wharf and the anchored vessel. Very few powered lighters.
2. Trucks empty their load into lighters.
3. Lighters are emptied by unloading apparatus on board vessel.
4. Ore estimations (richness and humidity) are carried out on shore by the miner and a Japanese representative of O.M.I.C., and a sample is placed on board for the smelter, another sample being reserved for the Department of Mines.
5. Non-stop loading, except in some bays where tide flow inhibits loading lighters at low tide.

Loading rate: From 1,500 to 9,000 tons per day.

Depending on:

1. Whether port is sheltered or not;
2. Distance between loading point and anchorage.
3. Tide flow at lighter loading point;
4. Number of lighters and tugs used by the stevedore.

OFF-LYING ISLANDS: (See Plans).

Art Island – Wala Wharf: Lat. 19° 43′ S., Long. 161° 19′ E. Wharf orientated N.N.E./S.S.W., parallel to shore. Length 30 m. framed by 2 dolphins each 15 m. Width 7 m. Wharf top 3.50 m. above low tide. Depth 4 m. Roadway: 85 m. long, 2.7 m. wide with 2 footpaths 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Ouvea Island – Wadrilla Wharf: Lat. 20° 35′ S., Long. 166° 33′ E. Wharf orientated W.N.W./E.S.E., perpendicular to shore. Length 40 m. with mooring buoy 35 m. from the end. Width 7 m. Wharf top 3.5 m. above low tide. Depth 4 m. Roadway: 220 m. long, 2.7 m. wide with 1 footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

New Wharf: Max. LOA 75 m., max. draft 4.2 m.

Lifou Island – We Wharf: Lat. 20° 55′ S., Long. 167° 17′ E. Wharf orientated N.E./S.W., parallel to shore. Length 40 m. prolongated to the N.E. by a dolphin 15 m. away. Width 7 m. Wharf top 3.5 m. above low tide. Depth 5.5 m. Roadway: 90 m. long, 4 m. wide, supporting vehicles of up to 19 tons (axle 13 tons).

New Wharf: Max. LOA 75 m., max. draft 4.2 m.

Mare Island – Tadine Wharf: Lat. 21° 33′ S., Long. 167° 53.5′ E. Wharf orientated N.N.E./S.S.W. Length 48 m. with an adjacent wharf 13 m. long (150 in. lower). Width 2 m. Wharf top 2.8 m. above low tide. Depth 3 m.

New Wharf: Max. LOA 75 m., max. draft 4.2 m.

Isle of Pines – Kuto Wharf: Lat. 22° 39.7′ S., Long. 167° 26′ E. Wharf orientated W.N.W./E.S.E., parallel to shore. Length 30 m. framed by 2 dolphins 15 m. away. Width 11 m. Wharf top 3.35 m. above low tide. Depth 4 m. Roadway: 118 m. long, 2.70 m. wide with one footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Touho Bay: Wharf orientated E.N.E./W.S.W., parallel to shore – 4 bollards. Length 12.6 m. Width 6.7 m. Wharf top 4 m. above low tide. Deep water at 20 m. from end of wharf.

Paagoumene Wharf: Lat. 20° 29.2′ S., Long. 164° 10.5′ E. Wharf orientated N.E./S.W. Length 15.6 m. N.E. section: Length 30.5 m. S.W. section: Length 43 m. Overlapping landing stage, 2.14 m. Wharf top 3.83 m. above low tide.

AUTHORITY: Port Autonome de Noumea, Avenue Cook, P.O.Box 14, Noumea, New Caledonia. *Tel:* (687) 27.59.66. *Telex:* 3838 NM. *FAX:* (687) 283772. *Contact:* Philippe Laffleur, Port Director. Jean Louis Boglio, Port Captain.

NOTES

Please also advise Shipping Guides Ltd.

New Zealand

GENERAL: All ports.

AGRICULTURE:

Masters of all vessels are required to notify the Ministry of Agriculture and Fisheries, located at the place of their expected arrival, a minimum of 12 hours before the estimated arrival time.

The New Zealand Ministry of Agriculture and Fisheries requires a Shipmaster's Bond and Guarantee (Form Ag.L35) to be completed in triplicate if vessel is carrying animals, i.e. cats, dogs, fish, birds, etc.

In addition, the Masters of all overseas vessels are required to complete in duplicate a Ship's Meat Locker Certificate (Form Ag.L36). Ship's Meat Lockers (chambers) containing prohibited meat from overseas countries are sealed on arrival at the first port in New Zealand, and must remain sealed during the vessel's stay on the New Zealand coast.

There are also restrictions relating to ship's garage. The Quarantine Service Office will advise on these matters.

All goods of an agricultural nature must be held until they have been inspected and a Permit to Land (Form Ag.G.78) issued by the Ministry of Agriculture and Fisheries.

Crews signing-off are required to check with the Quarantine Service and obtain Release/Treatment of any agriculture items which they wish to take ashore.

Authority: Ministry of Agriculture and Fisheries Quarantine Service.
Auckland: P.O.Box 1254. Tel: (09) 377-3008. Fax: (09) 307-0124.
Wellington: P.O.Box 12-108. Tel: (04) 473-8996. Fax: (04) 473-2975.
Christchurch: Private Bag. Tel: (03) 379-4100. Fax: (03) 364-7926.
Contact: Regional Manager, Quarantine Service.

SHIPMASTER'S REPORT:

Health: Coming from an Australian port the clean Bill of Health was accepted.

Documents: 2 Poison Lists (if there is poison in the cargo). 2 Reports of Pillaged Cargo (marks and numbers).

Cargo Gear: When working general cargo with derricks "in union purchase" without preventer guys, ship (via Agent) must seek an exemption from Regulation 2 (a) of the General Harbour (Safe Working Load) Regulations 1935 Amendment No. 5 by applying for dispensation from the Chief Surveyor of Ships, Marine Department, Ministry of Transport, Private Bag, Wellington.

AUCKLAND: 36.51 S. 174.45 E. (See Plan)

PORT LIMITS: South of a line drawn from Toroa Point to the S.W. Point of Rakino Island.

DOCUMENTS:
3 copies Passenger List.
3 copies Crew List.
1 copy Search List (Form 2).
1 copy Stores List (Form 3).
1 copy Prohibited and Restricted Immigrants.
1 copy Poisons List.
1 copy Animals and Birds List.
1 copy List of Firearms (not cargo).
1 copy Arrival Manifest (Form 1), plus 2 for other ports visited (Reg. Form 16 refers).
1 copy of List showing the gross tonnage of cargo for discharge in New Zealand.
3 copies Shipmaster's Bond and Guarantee (Form Ag.L35).
2 copies Meat Locker Declaration (Form Ag.L36).

Ship's Register to be presented to the Harbour Master on first visit to the port.

Also see "Health".

Radio Officer's Report: March 1991.
1 copy Personal Effects List, stating make, model and serial numbers of radios, cameras, etc.
3 copies Master Certificates, stating the type and weight of the meat on board, country of origin and the port where loaded. (Agriculture will most likely seal the meat locker).
3 copies General Declaration, stating the particulars of the ship.
1 copy Maritime Declaration of Health.
1 copy Ships Stores List.
5 copies Crew List.
1 copy Particulars of Ship's Certificates List.
1 copy Shipmaster's Bond, and guarantee stating the particulars of animals, if any on board.

PILOTAGE: Vessel approaching port to give 24 hours' notice by radiotelegraphy and addressed "Shipping Services Manager Auckland". A second notice by radiotelephone confirming or amending first to be sent 4 hours before expected time of arrival. Signal Station on Mt. Victoria, call sign "Auckland Harbour Radio", calling frequency 2182 kHz., working frequency 2012 kHz. VHF, call sign "Auckland Harbour Radio", Channel 12 and 16. Continuous listening watch on Channel 16.

Pilot boat is 13.0 m. long "Stolkcraft", painted orange and white, speed 30 knots. Reserve pilot launch is 20.0 m. long, single mast, painted white. Name is *Akarana.* Standard flag and lights are shown. Word "Pilot" painted in black on white above cabin.

Pilots board 1 mile North of Rangitoto Beacon, but will proceed farther when necessity arises. Good pilot ladder with manrope required to within 1.5 m. of water-line with proper lighting at night. Heaving lines will be needed for mail.

ANCHORAGES: For vessels waiting Pilot: (Bearings and distances from Rangitoto Beacon). Gulf Anchorage No. 1 bearing 000° distance 2 miles; No. 2 bearing 006° distance 2.5 miles; No. 3 bearing 012° distance 3 miles.

All inner anchorages in pilotage area can be indicated by Pilot. All anchorages are in 11 m. – 18 m. with good holding ground.

RESTRICTIONS: Ships may enter harbour at any time of day or night. Main channel has least depth of 11 m. chart datum. Vessels with greater draft must wait for tide to make and enter at Harbour Master's orders. It is preferable for all vessels to have not less than 10% vessel's draft as under keel clearance. Tankers not berthing immediately on arrival anchor as directed at one of Gulf Anchorages.

See "Bridges".

MAX. SIZE: No limits, within reason, on the length or breadth. Controlling depth at chart datum: entrance 11 m.; Rangitoto Channel 11 m.; anchorages 9.8 m. – 15.0 m.; berths 6.09 m. – 12.20 m.

HEALTH: 12 – 24 hours before arrival time, despatch message to Port Health, Auckland. Message to state ETA, last port, and date of departure therefrom, number of crew, number of passengers and state of health and indicate if there is a doctor amongst the crew. 12 hours before arrival confirm ETA.

Customs and Health formalities are usually carried out when vessel is alongside. Ship's gangway required for access by port officials.

Papers Required:
Completed Maritime Declaration of Health.
Derat Certificate.
Complete Crew List with dates of last vaccinations.
N.B. Crew and Passenger Lists to be certified as being correct by the Master.
List of Addresses of Disembarking Passengers.
List of Dangerous Cargo on board.

Pratique is granted initially, and covers all subsequent coastal movements in New Zealand for that voyage. Radio Pratique can be granted only after prior approval from New Zealand Health Department.

Vessels requesting Pratique should exhibit appropriate International Code Signals by day and night until Pratique is granted.

Shipmaster's Report: August 1994.
Request "Radio Free Pratique" via Taiaroa Heads.
Call Sign: "ZMH 32".
Tel: 3478-0868.
Fax: 3478-0744.

RADIO: Station for routing traffic to the Auckland area is Auckland Radio. Call sign ZLD. Working both W/T and R/T on continuous watches.

VHF: See "Pilotage".

RADAR: Radar station with range of 72 km. located on Mt. Victoria Lat. 36° 49′ 42″ S., Long. 174° 47′ 57″ E. Masters may call on radio telephone and request particulars of their bearing and range as shown on radar screen. Responsibility for the use of this information rests entirely with Master of vessel.

TUGS: 2 working tugs available, 1 on stand-by. Tugs join vessel East of Eastern Tide Wall. Tugs supply lines at no extra charge.

BERTHING: Tankers berth at Wynyard Wharf depot. Large tankers must arrive at pilot station not later than one hour before sunset, otherwise berthing will be postponed until following morning. Tankers not exceeding 125 m. in length may be berthed during the hours of darkness.

Depth of Water:

Wharf	*Dredged Depth* (m.)
Wynyard East	7.0 – 13.0
Princes West	7.5 – 11.5
Princes East	7.0 – 13.0
Queens East	8.5 – 12.0
Captain Cook East	6.5 – 10.0
Bledisloe West	10.5 – 12.5
Bledisloe No. 1	7.5 – 10.0
Jellicoe West	8.5 – 13.0
Jellicoe East	8.5 – 12.0
Freyberg East	8.3 – 12.0
Fergusson West	10.6 – 13.5

CRANES: At Fergusson Container Terminal there is 1 twin lift container crane of 45.72 tonnes capacity, 2 single lift container cranes of 40.64 tonnes capacity and 1 Noell Post Panamax crane of 70 tonnes capacity. In the conventional cargo port quay-side cranes of 5 tonne capacity are provided at Freyberg and Jellicoe only. At the bulk sugar berth there is a 10 tonne capacity gantry grabbing crane. At Bledisloe West berth there is a Samba crane with 35 tonnes capacity.

BULK CARGO FACILITIES: *Cement:* A special berth is provided where bulk cement is discharged pneumatically via pipeline to privately owned silos. Depth at chart datum 6.0 m., quay length 94 m.

Sugar: Bulk sugar is discharged at Chelsea Wharf. This wharf is equipped with a 10 tonne capacity gantry grabbing crane and a conveyor system connected to the refinery store. Depth at chart datum 9.9 m. Quay length 91 m.

4 other berths can also be made available for discharge of dry bulk cargo as required.

See "Bridges".

SPECIALISED CARGO HANDLING FACILITIES:

Tanker Terminals: 2 berths are at a continuous quay 486 m. long, depth at chart datum 9 m. – 11 m. The berths are connected by pipeline to adjacent tank farms.

Container and Ro/Ro Facilities: Fergusson Wharf Container Terminal: Quay length 610 m. Depth at chart datum 12.2 m. The terminal is equipped with 3 Vickers Hoskins/Paceco gantry container cranes, 1 single lift Noell Post-Panamax crane of 70 tonnes capacity, 2 single lifts of 40.64 tonnes capacity and a twin lift of 45.72 tonnes capacity. Total back-up area of the terminal is 26 hectares of which 17.41 hectares is used for container handling and storage and 4.30 hectares is used for container repairs and LCL containers. Included in the latter area is the Monash Street Container Base which provides 7,432 sq.m. of covered transit storage for LCL cargo. Rail exchange sidings are located immediately adjacent to the terminal. There are power outlets for 1,424 refrigerated containers. Container terminal equipment includes 17 straddle carriers as well as various tractors and fork lift trucks. The terminal is operated by the Ports of Auckland Ltd.

Freyberg Wharf: A common user Ro/Ro berth for quarter ramp vessels up to 228 m. in length is provided at Freyberg Wharf.

Bledisloe Ro/Ro Terminal: Quay length No. 1 Berth 137 m., No. 2 Berth 224 m. Depth at chart datum 9.5 m. Each berth is equipped with a link span with a fork lift axle load capacity of 56.9 tonnes and a low loader capacity of 182.9 tonnes. No. 2 Berth can accept ships equipped with a port quarter ramp. A total back-up area of 4.8 hectares is provided including a cargo shelter of 4,000 sq.m. and rail exchange sidings.

Bledisloe West Wharf: Length 285 m. Depth alongside 12.3 m. Handles ships with unitised cargo, including container ships. A total back-up area of 5.2 hectares is served by 1 × 35 ton Samba gantry crane and 4 heavy duty forklift trucks and Hyco reach stackers. A 1,000 sq.m. timber store and a 3,000 sq.m. empty container stacking area is also available.

BRIDGES: Navigation in daylight hours only under Auckland Harbour Bridge. Navigation span is 45.2 m. – 42.4 m. above MHWS for 76 m. each side of centre. Only ships berthing at Chelsea Wharf sugar berth need pass under the bridge.

STEVEDORES: Labour is available 24 hours, 7 days a week, by prior arrangement.

MEDICAL: In case of urgent medical attention being required, Agents can arrange for doctor to board in stream at any notice. Hospital and ambulance services available 24 hours.

TANKERS: See "Special Cargo Handling Facilities".

Any size pipelines can be used, oil companies have all reducing pieces needed.

No facilities for slop discharge.

DENSITY: Always 1025.

FRESH WATER: Fresh water always available. Delivery rate 40 t.p.h., through canvas hoses. Ports of Auckland supplies all equipment.

FUEL: Light fuel oil, diesel, gas oil and heavy fuel are available. To be ordered in ETA notice.

FIRE PRECAUTIONS: In addition to usual precautions, Class 1 tankers are under extra security with a nightwatchman from Harbour Master's staff in addition to the normal tanker guard.

CONSULS: (Consuls, Trade Commissioners, etc.): Australia, Belgium, Brazil, Costa Rica, Denmark, El Salvador, Fiji, Finland, France, Germany, Greece, Ireland, Italy, Japan, Korea (South), Nauru, Netherlands, Norway, Peru, Philippines, Portugal, Sweden, Switzerland, Tonga, Turkey, U.K., U.S.A., Venezuela, Western Samoa.

REPAIRS: Ship repairs can be carried out. Private slipways are available.

DRY DOCKS: Max. size of vessel that can be accommodated in Calliope Dry Dock, operated by the Ministry of Defence, is 181.35 m. LOA and 19.8 m. beam. Water on sill at MHWS 10 m.

SURVEYORS: American Bureau of Shipping, Bureau Veritas (Paris), China Corporation Register of Shipping, Det Norske Veritas, Germanischer Lloyd, Lloyd's Register of Shipping, Nippon Kaiji Kyokai, Registro Italiano Navale, Russian Register of Shipping.

GANGWAY/DECK WATCHMEN: Watchmen are necessary. Best to use crew. Also see "Fire Precautions".

OPENING/CLOSING HATCHES: Crew open completely mechanical hatches only. All other hatches opened by waterside workers.

CERTIFICATES: Register, Derat, Load Line, Safety Equipment, Safety Radio, Articles of Agreement, are main Certificates required.

CUSTOMS ALLOWANCES: 1 bottle of spirits (in use) *or* 1 bottle of wine (in use) *and* 12 quart bottles (or the equivalent) of beer, 200 cigarettes *or* half a pound of tobacco *or* 50 cigars. For ship use only. To be declared on Search List. Also gifts up to a total value of $100.0 may be landed.

CARGO GEAR: Preventer guys must be entirely wire. All blocks and shackles must be moused. Safety strops on all heel blocks. All wires, ropes, chains and blocks to have Certificate of Test.

REPATRIATION: All facilities exist for repatriation.

AIRPORT: 23 km. from harbour to airport. Served by all major international airlines.

TIME: Local time is GMT plus 12 hours, add 1 hour for Summertime, October to March.

HOLIDAYS: The port works during all holidays except Christmas Day.

POLICE/AMBULANCE/FIRE: All emergency services are called through one telephone number. Dial 111 and state service required.

TELEPHONES: Telephones at all berths. Charges available on application.

SERVICES: Services include tank cleaning, compass adjusting, all cargo surveying, average adjusting, etc. Tank washings may be pumped to road tankers.

SHORE LEAVE: Crew members may go ashore.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Service provided daily by private contractor, NZ Medical Waste Ltd, Tel: 309-1381. Bins are provided by contractor and exchanged "empty" for "full" daily.

WASTE OIL DISPOSAL: Several private contractors operate in the port, using tanker trucks for collection of waste oil.

SEAMAN'S CLUBS: Several seaman's clubs in port. Regular football matches arranged, church services available. Contact Flying Angel Club, 14 Quay St., Tel: 7034-352.

CURRENCY: New Zealand Dollar (NZ$).

REGULATIONS: All guests aboard vessel in the evening must have passes signed by the Master. All visitors' passes expire at 2300 hrs. All ships in port are subject to the Rules and Regulations contained in the Harbours Act 1950, and the By-laws of Ports of Auckland Ltd. On first visit to the Port copies of these and other relevant Regulations are supplied to ships.

DELAYS: There are seldom any delays awaiting berths.

GENERAL: *Refuse Disposal:* It is important that no refuse be allowed to pass into tidal waters either directly or indirectly. This is covered by strict Government Regulation.

Refuse, which is to be kept in provided covered containers, is collected each morning by a road vehicle.

AUTHORITY: Ports of Auckland Ltd., P.O.Box 2353, Auckland, New Zealand. *Tel:* (09) 366-0055. *Telex:* NZ 2705. *FAX:* (064) (09) 366-0219. *Contact:* Robert Cooper, Chief Executive. Captain Ron MacKenzie, Marine Services Manager. G.J. Bissell, Secretary.

BLUFF: 46.37 S. 168.22 E. (See Plan)

DOCUMENTS: See "Auckland".

PILOTAGE: Pilotage is compulsory. Pilots board vessels from launch in position Lat. 46° 39′ S., Long. 168° 21′ E. Arrangements regarding boarding will be made by VHF Channel 16 with Bluff Harbour Radio.

Vessels, other than those which are exempt from pilotage, must not proceed within the pilotage area without a Pilot.

A 24 hour pilotage service for tidal conditions. Vessels generally enter and leave the port at slack HW and slack LW.

Caution: Vessels stopping to pick up a Pilot are particularly warned not to approach entrance shoal too closely, especially during flood stream as stream sets strongly on to entrance shoal, North-Eastward.

Coastal Pilots: Coastal Pilots are available on 24 hours' notice for piloting service in the Fiordland Sounds.

Stewart Island Pilotage: The area within the Stewart Island Pilotage District is a Compulsory Pilotage District. The definition of this area can be obtained from the South Port NZ Ltd. who are the Stewart Island Port Authority and provide Pilots.

ANCHORAGE:

Southward of Stirling Point: In fine weather, vessels awaiting tide may anchor in 10 to 12 fathoms with Stirling Point lighthouse bearing about 356° and Dog Island lighthouse bearing about 108°.

Eastward of Dog Island: Anchorage for vessels delayed longer than 6 hours awaiting to enter Bluff is situated 5 miles East of Dog Island.

Safe anchorage in heavy Westerly weather may be found off the N.W. coast of Stewart Island between Otaku Point and Gull Rocks, position: Lat. 46° 47′ S., Long. 168° 02′ E.

RESTRICTIONS: The safest time to enter the harbour is at slack water. Strict attention should be paid to radio messages passed from the Harbour Authority Operations Office. No vessel should attempt to enter without a Pilot, unless possessing local knowledge.

Least depth in fairway is 8.53 m. on Northern edge of Channel Rocks; also 7.62 m. (about 1 cable West North-Westward of the tidal beacon).

MAX. SIZE: Length 198 m., beam 29 m. Vessels of over 198 m. length and/or 29 m. beam are restricted to HW arrival and departure. Vessels up to Panamax size 225 m.×33 m. will be handled at a reduced draft at the Manager – Operation's discretion.

Max. draft is 9.7 m. ordinary HW and up to 10.0 m. at HW Springs. LW max. draft is 7.0 m. up to 7.8 m. at Neap tides.

HEALTH: Radio Pratique available at Berth.

RADIO/VHF: A continuous watch is maintained by the Harbour Authority Operations Department and vessels can communicate by VHF. Call sign is "Bluff Harbour Radio". VHF radio calling Channel 16. A continuous watch is maintained on VHF Channel 16.

TUGS: Two tugs are available. Both twin-propulsion Voith Schneider vessels of 1,200 i.h.p. and 15.3 tons static pull and 2,600 h.p. and 30 tons. Both vessels are equipped for fire fighting and salvage. Tugs supply towing lines.

BERTHING:

Wharves	*Length Wharf* (m.)	*Max. Length Vessel* (m.)	*Berth Depth MLWS* (m.)	*Max. Draft* (m.)	*Deck Above MLWS* (m.)
Island Harbour No. 1	160	150	8.0	7.7	4.37
Island Harbour No. 2	190	170	8.0	7.7	4.37
Island Harbour No. 3A	152	150	9.4	9.15	4.37
Island Harbour No. 3 Island Harbour No. 4	426	198	10.0	9.7	4.37
Island Harbour No. 6	135	90	8.0	7.6	4.37
Island Harbour No. 5	213	198	10.0	9.7	4.37
Island Harbour No. 7	100	90	9.1	8.5	4.37
Island Harbour No. 8	230	198	11.0	10.0	3.77
Town Wharf No. 11	210	192	10.0	9.7	3.46
Town Wharf No. 12	183	180	9.0	8.7	3.46
Town Wharf No. 14	157	140	8.3	8.0	3.46
Ferry Wharf	200	150	7.0	6.5	4.19
Tiwai Wharf – (273 m. including mooring dolphin)	200	250	11.5	11.0	5.68

Vessels of a greater length may berth at these berths at the Manager – Operation's discretion.

All Island Harbour Berths except Nos. 1, 6, 7 and 8 have rail access. No rail at Tiwai Wharf or Town Wharf.

Bulk phosphate or sulphur cargoes are discharged into hoppers thence road trucks.

A Ro/Ro linkspan is situated at Berth No. 1 (not in use).

A bulk grain facility serves Berth No. 2. Silo capacity 6,600 tonnes, maximum loading rate 500 tonnes/p.h. Bulk tallow is loaded at Berth Nos. 3 and 3A. Ten storage tanks with total capacity of 4,775 tonnes are connected to ship's side by a 300 mm. diameter heated pipeline giving a loading rate of 400 tonnes/p.h.

Four all weather meat-loaders are situated at Berth No. 5.

Berth No. 8 is a bulk woodchip loading facility (via conveyor) and also serves the log and sawn timber trade. Grain and coal are also loaded at No. 4 or No. 8 Berth via truck ramp to conveyor.

Bulk cargoes for Tiwai Aluminium Smelter are discharged at the Tiwai Wharf by a mobile twin unit pneumatic unloader with a capacity of 300 tonnes/p.h. A dedicated vessel "TNT Altrans" discharges alumina via air slide to smelter at over 800 t.p.h.

STEVEDORES: Agents require ETA in advance to arrange labour for cargo handling. Two stevedoring companies are available.
MEDICAL: Port doctor available through Agents. Nearest hospital is at Invercargill City, 16 miles from Bluff. Medical service whilst at sea through Awarua radio.
TANKERS: Tankers are berthed at Berth No. 11 Town Wharf. Side connections are to be used. Only 1 pipeline connection on wharf. Black products are handled through 250 mm. lines, white products through 200 mm. lines. Bitumen tankers discharge at No. 12 Berth.

Oil cargoes for Tiwai Point discharged at Tiwai Wharf via manifold and 300 mm. pipeline.
DENSITY: 1025.
FRESH WATER: Available alongside all berths, rate 20 tonnes/p.h.
FUEL: Bunkering facilities are available. Boiler fuel is supplied by 8 in. diameter pipeline located at Berth No. 11, Town wharf. Delivery rate 240 t.p.h. Limited quantities of coal, light diesel oil and lubricating oil can be arranged for delivery by road or rail to the wharves.

Gas oil available by pipeline at Berth Nos. 11, 12 and 14 and by road tanker at all other berths.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Carried out by crew if automatic hatches. Otherwise by stevedores.
CUSTOMS ALLOWANCES: See "Auckland".
REPAIRS: Major repair work can be undertaken by various machine shops situated at Bluff and Invercargill. A diver is available for underwater inspections through Agents.
DRY DOCKS: The Port Company operates a "Syncrolift" docking facility capable of accommodating vessels with a displacement up to 1,000 tonnes on a platform 40.3 m. × 13.4 m.
REPATRIATION: Facilities exist.
AIRPORT: Internal air services from City Airport, Invercargill, 16 miles by road connecting with international airports of Christchurch, Wellington and Auckland.
TIME: GMT plus 12 hours. Summer Time GMT plus 13 hours from November to March (actual day may vary).
HOLIDAYS: The following days are not usually worked at Bluff: Christmas Day, New Year's Day, Good Friday and Anzac Day.
POLICE/AMBULANCE/FIRE:

	Tel. (Emergency)	*(Other)*
Ambulance	111	Inv'gill 2183099
Police	111	2128844*
Fire Brigade	111	2128050

* If no reply ring Invercargill 2144039.
TELEPHONES: All vessels can be connected with telephone system, through their agent.
SERVICES: Compass adjusting, refuse collection daily.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Drums for garbage available from South Port NZ Ltd. Garbage collected daily by port operating company and removed prior to sailing.
WASTE OIL DISPOSAL: Various waste and waste oil disposal companies by tanker truck. No special berth but port company permission required with usual precautions.
SEAMAN'S CLUBS: Small seaman's club with shop, telephone, TV lounge, gym equipment. Check with agent about opening times.
CURRENCY: New Zealand Dollar (NZ$).
AUTHORITY: South Port NZ Ltd., P.O.Box 1, Bluff, New Zealand. *Tel:* 03-212-8159. *Telex:* 5206 Onebluf NZ. *FAX:* 03-212-8685. *Contact:* D. Cowie, General Manager. Captain J.A. Henderson, Manager Operations and Chief Pilot/Harbour Master.

GISBORNE: 38.42 S. 178.02 E. (See Plan)

PORT LIMITS: All of Poverty Bay within a line from the Northern point of Young Nick's Head to Tuaheni Point.
DOCUMENTS: See "Auckland".
PILOTAGE: Telegraphic address – General Manager, Gisborne. Advance notice – 24 hours before ETA. VHF Channel 16 and 12.

Pilot boat is painted white with word "Pilots" on both sides, 13.71 m. in length; exhibits pilot flag or lights. Pilot boards on line of leads (332°) 2 miles from breakwater light.
ANCHORAGE: Vessels awaiting Pilot and berth anchor with Tuaheni Light bearing 084° 3.2 miles in 18.29 m. of water.
MAX. SIZE: Maximum length 180 m. Beam, no restriction. Draft, 8.6 m. at HW, 7.0 m. at LW. Contact General Manager for current situation as there can be slight variations according to heights of tide and weather conditions.
HEALTH: Same procedure as "Auckland".
RADIO: Auckland Radio ZLD, Wellington ZLW.
VHF: Signal station not permanently manned. Listening watch Monday–Friday 0800 – 0815 hrs.; 1130 – 1145 hrs.; 1330 – 1345 hrs.; 1600 – 1615 hrs. Signalman in attendance 1 hour before vessel's arrival. Call sign: "Gisborne Harbour Radio", Channel 16 and 12.
TUGS: Tugs join vessels in channel outside breakwater. Normally use tug's lines, no extra charge.

A twin screw Schottel Rudder/Propeller 22 m. steel tug with bollard pull 14 tonnes (1,000 h.p.) and a 15 m. steel hulled twin-screw tug of 8 tonnes bollard pull (600 h.p.) are available.
BERTHING: 213.35 m. at 9.75 m. depth at LW; 426.7 m. at 5.49 m. – 6.1 m. depth at LW.
Moorings: Shore hawsers placed on vessels on arrival.
SPECIALISED CARGO FACILITIES: Two 1,000 tons silos for bulk grain, etc. behind Berth No. 7 and a conveyor for loading grain, etc. in ships. Loading rate 400 t.p.h. There is also a fish unloader, rate 40 t.p.h.

STEVEDORES: Advice of ETA and particulars of stowage required in order that required number of gangs can be ordered. Stevedores can work 24 hours a day, 7 days a week.
MEDICAL: No advance advice required for medical attention. Full hospital facilities available.
TANKERS: Tankers discharge petrol and diesel oil.
DENSITY: 1025 at all stages of tide.
FRESH WATER: Available by 63 mm. (2.5 in.) hoses at approx. 20 t.p.h. per hose.
FUEL: Fuel is at present only available by rail tanker and should be ordered through ship's Agent in advance.
CONSULS: None.
REPAIRS: Normal maintenance repairs.
DRY DOCKS: One 400 ton slipway.
SURVEYORS: 1. Ministry of Transport Surveyors in Napier for grain cargo. Private surveyors available in Gisborne.
2. Lloyd's Register available on request, also A.B.S.
GANGWAY/DECK WATCHMEN: Ships provide own watchmen.
OPENING/CLOSING HATCHES: Stevedores normally carry this out.
CUSTOMS ALLOWANCES: See "Auckland".
REPATRIATION: Full facilities available for effecting crew changes and repatriation.
AIRPORT: 3.5 miles. Regular internal service.
TIME: Standard Time is 12 hours ahead of GMT. Daylight time GMT plus 13 hours from last Sunday in October to first Sunday in March normally.
EMERGENCY CO-ORDINATION CENTRE: Local Police Station for minor emergency operations otherwise all Search and Rescue Co-ordinated from Wellington.

Local Police	Tel: 06-8679059.
Wellington S.A.R.	Tel: 04-738890.

STORING: See "Prelims".
1. By truck or launch – only.
2. Not applicable.
3. Trucks can come alongside at berths, only restricted for Tankers.
4. Fork Lifts available and used.
5. Customs clearance required for bonded goods.
6. Yes.

IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Garbage cans placed on board. Contents burnt in company's incinerator.
WASTE OIL DISPOSAL: Collection available by tanker trucks. Contact Waste Management Services NZ Ltd., Tel: 06-868 9548.
SEAMAN'S CLUBS: None.
CURRENCY: New Zealand Dollar (NZ$).
AUTHORITY: Port Gisborne Ltd., P.O.Box 549, Gisborne, New Zealand. *Tel:* (06) 86-85129. *FAX:* (06) 86-78084. *Cables:* Harbour Board. *Contact:* Mr. B.M. Tahata, General Manager.

LYTTELTON: 43.35 S. 172.42 E. (See Plan)

PORT LIMITS: All those tidal waters of the Port of Lyttelton comprised within the area enclosed by the arc of a circle having a radius of 3 nautical miles from the Northernmost point of Adderley Head.
DOCUMENTS: Customs procedure: Overseas vessels, on arrival in New Zealand, should have following papers ready to produce to Customs Officers:
Particulars of Ship's Certificates.
List of Persistent Oils (Tankers only).
Register.
Names of Owners and Agents.
Crew List.
Passenger List.
List of Prohibited or Restricted Immigrants.
Search List.
Stores List.
List of any stock or birds on board.
List of Poisons.
List of Firearms.
Declarations by Passengers arriving in New Zealand.
Baggage Declarations by Passengers for duty purposes.
On departure for overseas, Master or his Agent is required to produce:
Manifest of Cargo.
Stores List.
Crew List.
Passenger List (if any).

A home trade vessel under *transire* is required to produce her cargo book to Collector of Customs and such particulars as to passengers, crew, and cargo as the Collector may at any time demand. Cargo book shall contain name and port of registry of ship, Name of Master, and date of arrival at, and departure from each port. Particulars as to dates of arrival and departure must be entered not later than 24 hours after time of such arrivals and departures.
PILOTAGE: Required for all vessels over 100 g.r.t. Inward-bound vessels should give 24 hours notice of maximum draft and ETA. Pilot Fax: (03) 3287828.

Pilots will board vessels 2 miles from Godley Head Light (080° from lighthouse). Pilots embark and disembark on pilot ladders in accordance with New Zealand Pilot Ladder Regulations. Ladders should be rigged 1.0 m. above water. Speed 5 knots to 8 knots. Boatrope is not used, and the use of tripping line is strictly prohibited. In adverse weather, or for large bulk vessels, a helicopter may be used.

The pilot vessel "Canterbury" has the word " Pilot" on the cabin sides, and is painted orange.

ANCHORAGES: *Outside Godley Head:* A vessel awaiting the arrival of a pilot should anchor about 1.5 miles to seaward of Godley Head in depths from 16 m. to 18 m.

Camp Bay Anchorage: Permission must be obtained from the Marine Services Manager before using this anchorage, and draft of vessel is restricted to 8.5 m. All vessels drawing more than 8.5 m., whether awaiting Pilot or not, must use the outside anchorage. Vessels using Camp Bay Anchorage should anchor with the anchorage lighted leading beacon, situated on the Southern shore of Camp Bay, in transit, bearing 195.5°. Each beacon is painted white, and each exhibits a fixed red light. Vessels may anchor to the Westward of this bearing, but must not proceed Westward of a line bearing 345° from rear anchorage beacon. In fog, or poor visibility, Camp Bay shall not be used by vessels wishing to anchor.

Note: Anchoring in or near the dredged channel, which extends from 1 mile inside the heads, is not permitted.

RESTRICTIONS: Vessels can berth and depart at any time, unless restricted by draft.

The following are the controlling depths at mean low water springs, mud bottom in each case;

Entrance to port	14.6 m.	soft mud
Dredged channel	12.0 m.	
Camp Bay Anchorage	11.0 m.	
Inner Harbour Berths	9.8 m. – 12.6 m.	
Cashin Quay Berths	13.5 m.	

MAX. SIZE: Max. permissible draft for entering or leaving:

Cashin Quay Nos. 1, 2, & 3	12.00 m. at H.W. 10.80 m. at L.W.	(May be increased at Marine Operations Manager's discretion).
Inner Harbour	11.28 m. at H.W. 9.75 m. at L.W.	

Maximum size permissible for entry is at discretion of Marine Operations Manager to the Inner Harbour and 294 m. at Cashin Quay, beam no limit.

HEALTH: Master of every ship about to enter a New Zealand port shall, not later than 12 hours and not earlier than 24 hours before expected time of arrival at that port, inform Port Health Officer by radio of last port of call, date of departure therefrom, and state of health of vessel.

Arrival of vessels: On arrival, vessel showing International Code quarantine signal, should proceed to inspection area to await arrival of Port Health Officer. Inspections are normally carried out at berth.

Radio Pratique: Certain ships may be granted Pratique by radio and hence need not be visited by a Port Health Officer, provided that medical officer carried as part of ship's complement.

Maritime Declaration of Health: Masters of all vessels arriving in New Zealand from any port beyond New Zealand shall complete and deliver to Port Health's Officer a Maritime Declaration of Health countersigned by the ship's medical officer, if required.

Crew List and Passenger List: Master of every ship liable to quarantine should be prepared to furnish Port Health Officer a list of all passengers, showing in respect of each passenger, name, sex, race, age, and port of embarkation; and a list of crew giving the name, nationality, and rating of each member.

RADIO/VHF: *Signal Station:* A signal station is situated on the tower of the Container Terminal Administration Building. It is connected by telephone to Lyttelton and Christchurch. On request, the Marine Operations Manager will arrange for the signalling of messages to vessels, circumstances permitting. Call sign is ZMH61, 2182 kHz and working frequencies.

Radio – Telephone: The station is equipped with a radiotelephone and VHF. The call sign is Lyttelton Harbour Radio, the calling frequency is 2182 kHz., and the working frequencies are 2012, 2045, 2129, 2162, 4125, 4146 and 4417 kHz. VHF Channels 16, 12 and 63.

VHF Channel 12 is used for the exchange of messages in or near the port relating to the operational handling, the movement and the safety of ships and in emergenices.

TUGS: The port company has 2 modern tugs fully equipped for harbour duties:

"Purau"	A twin Z–Peller right angle drive diesel tug powered by two 1,120 kW. engines, built in 1986. Fully equipped for harbour duties and fire fighting. Max. speed 11.6 knots, max. bollard pull 37 tonnes.
"Godley"	A twin Schottel right angle drive diesel tug powered by two 745 kW. engines, built in 1977. Fully equipped for harbour duties and fire fighting. Max. speed 11.5 knots, max. bollard pull 28 tonnes.

Communication with the tugs is by VHF Channel 12.

BERTHING: No vessel is to enter and take up a berth unless signalled to do so from the signal station. These signals may be sent either by radiotelephone or VHF.

All vessels to contact Signal Tower 5 minutes prior to sailing for clearance.

BERTHING FACILITIES: The Port of Lyttelton is able to offer a large number of berths suitable for all types of vessels and cargo handling requirements. Specialist facilities are available at a number of the berths as detailed below:

Cashin Quay: Cashin Quay is a linear berth of 855 m. in length, which may be subdivided into 4 berths.

Cashin Quay No. 1: Cashin Quay No. 1 is a 230 m. berth decked in heavy duty concrete with a water depth of 13.0 m. below MLWS. Cashin Quay No. 1 is a multi-purpose berth with transit shed and flat land for storage. The wharf provides a smooth heavy lift area for handling containers and has adjacent facilities for 102 refrigerated units. The berth is equipped with a shiploader and conveyor system with an operational capacity of 400 – 800 tonne per hour. Bulk commodities may be loaded directly from road or rail transport into a dump hopper and transported via conveyor to the ship. The Lyttelton grain silos, bulk materials stockpile area and weighbridge are all situated nearby. Although the loading system is used for the export of bulk coal, it is also suitable for the handling of other bulk products including woodchips and grain.

Cashin Quay No. 2: With a water depth of 13.0 m. below MLWS, this berth is suitable for handling the largest of multi-purpose vessels. The berth is 215 m. long with flat land behind for handling breakbulk, palletised or containerised cargoes.

Cashin Quay No. 3: Although this heavy duty concrete wharf is used in the main for working the container crane, it is also suitable for multi-purpose, quarter ramp and conventional vessels. Cashin Quay No. 3 has a berth depth of 13.0 m. below MLWS. Rails for a 46 tonne Paceco container crane run along the length of the wharf. Full cargo handling services, including 458 electrical points for refrigeration and pre-tripping of containers, are available through the Lyttelton Container Terminal, which is located immediately behind the berth.

Cashin Quay No. 4: A new heavy duty concrete berth suitable for handling container shipping, multi-purpose and Ro-Ro vessels. Container crane rails extend from Cashin Quay No. 3 onto Cashin Quay No. 4 to provide a dual crane operation extending over 410 m. of berth. A new 70 tonne Leibherr container crane commenced operation in February 1993.

Inner Harbour:

Z Berth: Located at the Eastern mole of the Inner Harbour, this berth is suitable for both general cargo and fishing operations. Two large privately owned coolstores are located behind the berth. With a total capacity of 3,000 tonnes, the coolstores are suitable for the storage of fish, meat or horticultural products. A stern linkspan suitable for container handling by forklifts is available. The berth is 160 m. long and has a water depth of 10.1 m. below MLWS.

Gladstone Pier: Gladstone Pier is 275 m. long with a water depth of 11.9 m. below MLWS. This berth has 2 heavy duty pads suitable for handling containerised cargo from quarter ramp and small lift-on/lift-off vessels.

No. 1 Breastwork: A general cargo berth regularly used for the discharge of bulk cement. Construction of a heavy duty pad for lift-on/lift-off vessels was completed in November 1992. Berth length is 159 m. and the depth is 9.5 m. below MLWS.

Wharf No. 2: This finger wharf is concrete decked to road transport standards (Class 1 Highway). In the main, it is used for the discharge of dry bulk import and general cargoes. Bulk cargoes, such as gypsum and fertilisers, are discharged by 5 tonne wharf cranes, or ship's cranes, into mobile hoppers. 4 mobile hoppers with capacities between 60 – 100 tonnes are available. The total berth area of 6,585 sq.m. provides a smooth cargo handling area and excellent working space for road transport vehicles. No. 2 East is 270 m. in length, and has a water depth of 12.0 m. below MLWS. No. 2 West is 169 m. in length, and has a water depth of 10.5 m. below MLWS.

Wharf No. 3: A finger pier of wooden construction, this berth is suitable for use as a lay-up/repair berth, or for light operations because of an axle loading restriction of 3 tonne. No. 3 East is 195 m. in length with a water depth of 10.0 m. below MLWS. No. 3 West is 223 m. in length with a water depth of 12.7 m. below MLWS.

Wharf No. 4: This finger wharf, constructed in timber, has an axle loading limit of 3 tonnes. There is a pad at No. 4 West which may be used for the stern loading of some Ro-Ro vessels. No. 4 East is 148 m. long with a water depth of 11.0 m. below MLWS. No. 4 West is 170 m. long with a water depth of 9.2 m. below MLWS.

Wharf No. 7: This wharf is maintained to road transport standards (Class 1 Highway). It is constructed in timber and equipped with a heavy duty pad at No. 7 East for quarter ramp vessels and stern Ro-Ro vessels. No. 7 West is equipped with a ramp for stern Ro-Ro vessels. The wharf is regularly used by coastal shipping services. In addition, the wharf has facilities for 18 refrigerated container points. No. 7 East is 187 m. long with a water depth of 9.9 m. below MLWS, and No. 7 West is 200 m. long with a water depth of 9.7 m. below MLWS.

Oil Wharf: See "Tankers".

Cattle Jetty: This wharf of timber construction is used in the main for bunkering of fishing vessels. The jetty is 60 m. long and has a depth of 7.0 m. below MLWS.

Weighbridge: The port has a public weighbridge for road transport (50 tonne maximum).

Ice Plant: The Lyttelton Port Company has combined with the local fishing industry to provide a waterfront site for an ice-making plant with 35 tonne storage capacity at No. 6 Jetty, and 2 ice plants at No. 5 Jetty (with associated fuel supplies).

STEVEDORES: Three companies with their own permanent labour provide stevedoring services in the port. Contact details are:

Lyttelton Port Company Limited	Tel: (03) 3328 8198.
Canterbury Stevedoring Services Ltd.	Tel: (03) 3328 7149.
Pacifica Shipping (1985) Limited	Tel: (03) 3328 8059.

CARGO HANDLING FACILITIES: The Cargo Handling Division of the Lyttelton Port Company offers specialised cargo handling services for containers, bulk cargo, general stevedoring and plant hire.

Containers: The Port of Lyttelton has modern facilities, equipment and services for the safe and efficient handling of containers. Currently handling over 90,000 TEU's annually, the port is dedicated to providing the rapid turnaround of vessels and the speedy despatch of containers to their destinations.

Lyttelton is a deep water port and is able to service large container ships through modern heavy duty container berths, up-to-date equipment and a reliable and experienced workforce.

Containers are transported by road or rail to and from the port which is only minutes from Christchurch, the largest commercial centre in the South Island. Documentation can be processed very quickly with the appropriate Government agencies, the Ministry of Agriculture and Fisheries, Customs and the Ministry of Forestry, all conveniently located nearby.

The Lyttelton Port Company is committed to further improving the level of service and container handling facilities available for customers. This is demonstrated by the recent investment in a new container berth, a second container crane and a fully computerised container tracking system.

A technologically advanced container tracking system is due to be operational in 1994. It will eventually provide customers with a direct link for up-to-the-minute information on the status of their containers.
Facilities: The major facility for handling containers is the Lyttelton Container Terminal situated alongside Cashin Quay No. 3 and Cashin Quay No. 4.

The Terminal's container handling is highly efficient with a low berth usage, and vessels being turned around in one day. Key services include the direct ship exchange of containers, packing and unpacking, container washing, refrigerated container monitoring and storage. Container repair is also available at the port.

The terminal area currently occupies over 8 hectares and is completely fenced with entry restricted to those on official business. Within the Terminal, there is capacity for the storage of over 3,500 containers with specialised areas for imports, exports, refrigerated containers, repairs, container washing and empty containers. Containers are stacked 3 high and all areas are serviced by straddle carrier.

Specialised container handling facilities and services are also available at Cashin Quay No. 1 and No. 2, Gladstone Pier and Wharf No. 7.
Equipment: The ability to reduce the dwell time of shipping and cargo has been further improved with a second crane. The second crane and the new berth are providing customers with the flexibility of working 2 cranes on one ship, or 2 ships may be worked simultaneously utilising one crane each.

Cashin Quay No. 3 is equipped with a 46 tonne SWL Vickers Hoskins Paceco single lift portainer crane.

Outreach from fender:	32.38 m.
Total lift height:	39.32 m.

Cashin Quay No. 4 accommodates a new Post Panamax Liebherr crane which has a 70 tonne lifting capacity.

Outreach from fender:	40.63 m.
Total lift height:	46.50 m.

7 Clark straddle carriers, each with UHF radio, ISO IC spreader and maximum lift capacity of 30 tonnes, manoeuvre containers around the port. These diesel powered straddle carriers can stack ISO IC containers 3 high and ISO IA containers 2 high.

2 new Valmet straddle carriers joined the fleet in September 1992. These straddles have a maximum lift capacity of 40 tonnes. Each is fitted with a telescopic spreader to enable ISO IA, IB and IC containers to be stacked 3 high.

With the introduction of the new container tracking system in 1994, all straddle carriers will be equipped with computer screens.

Other specialised equipment available for the handling of containers include 5 diesel powered forklifts with UHF radios. Telescopic side lifting, top lifting and fork or prong functions are available with a maximum capacity of 25 tonne.

All Port Company equipment is maintained and serviced regularly on site to a high standard.

Bulk Cargo: Lyttelton is a principal port for the export of coal which is railed from fields on the South Island's West Coast.

Lyttelton Port Company staff are able to arrange all bulk cargo handling requirements and facilities for fertilisers, gypsum and grains.

Complete facilities for the receipt, storage and shiploading of grain are available. The Port Company has 4 silos with a total capacity of approximately 12,000 tonnes, depending on the type of grain stored.

The silos are also used for the storage and delivery of imported grains. Specialist equipment includes mobile hoppers, shiploader, conveyor systems and cranes.

MEDICAL: Hospital facilities are available at Christchurch, 12 km. from port, and international regulations apply in regard to inoculations, vaccinations, etc. Agents can be notified at any time of medical allocation required, preferably with 24 hours' notice.

TANKERS: *Oil Wharf:* The oil wharf is used for the loading and unloading of liquid bulk cargoes as well as bunkering.

All tankers berth at the Oil Wharf. Maximum draft 11.3 m.

Three 200 mm. nominal bore marine unloading units are provided: 2 units for "white" products and 1 unit for "black" products. These can be connected during hours of darkness; they are not allowed to be disconnected until daylight, unless permission has been given by the Marine Operations Manager. Slop or oily residue facilities are not available.

Boiler Fuel Oil: Suppied by 100 mm. and 150 mm. diameter hose.

Diesel Oil: Bunker hose connected to a 200 mm. diameter pipeline located on the Oil Wharf.

Delivery rate: Boiler oil 200 tonnes per hour. Diesel oil 60 tonnes per hour.

An LPG Marine unloading arm is situated on the oil wharf. LPG is pumped direct to Christchurch.

DENSITY: 1025, salt water.

FRESH WATER: Available at all berths at the Port of Lyttelton. Supply rate is approximately 60 tonnes per hour.

FUEL: See "Tankers"

FIRE PRECAUTIONS: Tankers are not permitted to immobilise engines at the oil wharf. Repairs may be carried out at other wharves with Marine Operations Manager's permission. Boiler and galley fires are not required to be extinguished when loading or discharging. All scuppers are to be plugged and cemented in case of spillages.

CONSULS: At Christchurch.

REPAIRS: A complete service for industrial or marine construction, steel fabrication, machinery design and repairs, and electrical contracting is available. Lyttelton has a long history as a port renowned for high quality repair work undertaken by private contractors.

DRY DOCKS: Lyttelton has the only graving dock in the South Island. It is used by various classes of coastal and overseas vessels. Its dimensions are: Floor length 137.15 m., width 14.0 m., top length 146.75 m., entrance width 18.90 m., maximum draft 5.00 m. Electric pumps take 4.5 hours to pump the dock dry.

SURVEYORS: Representatives of the major classification societies are available for survey examinations. Divers are available for underwater inspections.

GANGWAY/DECK WATCHMEN: All ships must be provided with a watchman whilst at oil wharf; a shore watchman is also required. Watchmen may be ordered at any time by contacting Union Maritime Services, Tel: (03) 28 7149.

OPENING/CLOSING HATCHES: By waterside labour.

CUSTOMS ALLOWANCES: 250 grams and/or 200 cigarettes per person, 1 bottle of wine and/or 1 bottle of spirits, 24 cans of beer per person on arrival. Every 10 days: 200 cigarettes per person, 12 bottles of spirits per ship (regardless of crew size) and 2 cans of beer per person per day.

REPATRIATION: Facilities available.

AIRPORT: Distance from Christchurch – 12 km., served by regular airlines.

TIME: Local time is 12 hours ahead of GMT. N.Z. daylight time from 0200 hrs. (NZST) on last Sunday in October until 0200 hrs. (NZST) on the 2nd Sunday in March – 13 hours ahead of GMT.

HOLIDAYS: 1st January (New Year's Day); 2nd January (Statutory); 6th February (Waitangi Day); Good Friday; Easter Monday; 1st Monday in June (Queen's Birthday); Second to last Monday in October (Labour Day); 2nd Friday in November (Canterbury Anniversary); 25th December (Christmas Day); 26th December (Boxing Day).

Many operations work on public holidays.

POLICE/AMBULANCE/FIRE: For emergency calls from ship's telephones, dial 111 and ask the operator for service required.

TELEPHONES: All vessels may be connected to the Telecom New Zealand system.

SERVICES: *Electricity:* Shore electricity is available. Type A.C., 50 Hz, 415 Volts, 3 phase or 230 volts single phase.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Passes are necessary at oil wharf but not required otherwise.

GENERAL: *Hours of Work:* The Port of Lyttelton is open 24 hours a day, 7 days a week. The hours of operation vary according to the cargo being worked.

Security: A continuous listening watch is maintained on 2182 kHz and VHF Channel 16.

GARBAGE DISPOSAL: A garbage collection service is available. Drums are provided on board and collected each morning. The charge for this service is included in the berthing charge.

WASTE OIL DISPOSAL: Fleet of 100 tonne tanks available to collect waste oil from any berth. Current charge NZ$ 165.00/tonne. Contact Stark Brothers Ltd. Tel: 643-3288550. Fax: 643-3288791.

SEAMAN'S CLUBS: There are two banks, a post office, sports field, squash courts, tennis courts, swimming pool, library, shops, churches (Catholic/Anglican/Presbyterian), 7 public houses (taverns), a Seafarer's Centre and 13 eating places, all within 2 km. of port wharves.

CURRENCY: New Zealand Dollar (NZ$).

AUTHORITY: Lyttelton Port Company Limited, Norwich Quay, Lyttelton. Postal Address: Private Bag 501, Lyttelton, New Zealand. *Tel:* (3) 328-8198. *FAX:* (3) 328-7828. *Contact:* Captain W.T. Oliver, Marine Operations Manager/Harbour Master.

NAPIER: 39.29 S. 176.54 E. (See Plan)

DOCUMENTS: See "Auckland".

PILOTAGE: Pilotage is compulsory.

Pilot boards in position: Lat. 39° 28′ S., Long. 176° 57.6′ E. Refer to New Zealand Port Information Manual Part I, Admiralty Pilot No. 51 (New Zealand Pilot), Chart NZ 5713.

ANCHORAGES: No. 1 Anchorage – 2 miles East of breakwater with Southern Leading Beacons in line. 19.0 m. sand, mud.

No. 2 Anchorage – 1 mile N.E. of North Pania Buoy with Northern Leading Beacons in line. 21.0 m. sand.

RESTRICTIONS: Vessels are berthed between 0500 hrs. and midnight. Other times by arrangement. Vessels up to 9.0 m. draft may berth at any state of tide.

MAX. SIZE: Max. LOA 230 m.; beam, no limit; draft, 10.4 m.

HEALTH: Cable Port Health Napier 24 hours before arrival. Port Health will board on arrival.

RADIO/VHF: 24 hour listening watch on VHF Channel 16, call sign "Napier Harbour Radio".

TUGS: Two tugs available (1×32 ton and 1×28 ton bollard pull).

BERTHING: Vessels at max. draft limited to HW for arrival and/or departure. Vessel's ETA must be given to Harbour Master, Napier, 24 hours before arrival or on departure from previous port if less than 24 hours, and amended 4 hours prior to arrival. Max. draft arrival to be included.

Vessels arriving during a weekend, ETA to be given by 1500 hrs. Friday and at 1500 hrs. on a day preceding a public holiday.

SPECIALISED CARGO FACILITIES: *Woodpulp Storage:* Adjacent Higgins Wharf, Shed Nos. 7 and 9. Total capacity, 49,000 tons.
Bulk Fertiliser Storage: Adjacent Higgins Wharf, Shed No. 8 – rock phosphate, capacity 60,000 tons; Shed No. 10 – fertiliser bases, capacity 32,000 cu.m.
Logs: Storage area 50,000 tons.
General Cargo Sheds: Adjacent Geddis, Herrick & Kirkpatrick Wharves, Shed Nos. 1, 2 and 3, total size 5,300 sq.m.
Container Packing/Devanning: Adjacent Kirkpatrick Wharf, Shed No. 5, size 3,000 sq.m.

Electric power and storage for 240×20 ft. reefers. 4 acre paved dry box yard. Serviced cleaning yard for 70×20 ft. and 40 ft. reefers.

Tanks for tallow and edible oils.

Cement Silos.

Mobile Plant: 1 mobile container crane, capacity 30 tons at 40 m. radius.
Installed Plant: 2 spiralveyor units. Integrated automated all weather materials handling system for import and export of cartonned, bagged and carcass products.

STEVEDORES: ETA required for discharging ships 24 hours before arrival. Loading ships 48 hours before arrival with proposed stowages and vacant spaces. Advise number of gangs able to work. All work done by ship's gear.

MEDICAL: No prior notice required for medical attention. Hospital facilities available. Advice would be needed of any contagious disease on board in advance, in accordance with Port Health Regulations.

TANKERS: Standard size discharge lines. All connections supplied by oil companies. 2 berths available: 1 berth, max. length 200 m., draft 10.4 m.; 1 berth, max. length 230 m., draft 10.0 m.

DENSITY: Variable, generally 1020 – 1025.

FRESH WATER: Available all berths 20 t.p.h. per hose.

FUEL: 220 and 1,000 sec. Oil available ex-pipeline at 110 t.p.h. Marine diesel and gas oil ex-road tanker. All at immediate notice. Lubricating oil available. 1 week's notice. Residue service available when tank vessels discharging/loading or having hazardous goods in transit.

FIRE PRECAUTIONS: Watchman supplied on wharf at ship's expense.

REPAIRS: First class service available.

GANGWAY/DECK WATCHMEN: All ships must have gangway watchmen. Cargo and deck watchmen available on request.

OPENING/CLOSING HATCHES: Hatches normally opened and closed by stevedores unless automatic type.

CERTIFICATES:

Ship's Register.
Health Certificate.
Cargo Safety Certificate.
Radio Safety Certificate.
Load Line Certificate.

CUSTOMS ALLOWANCES: See "Auckland".

REPATRIATION: On arrangement with Customs and vessel's Agents.

AIRPORT: Hawke's Bay Airport, served by internal airline 3 miles from port.

TIME: Winter GMT plus 12 hours. Summer GMT plus 13 hours.

HOLIDAYS: The port operates 24 hours a day and on all public holidays.

POLICE/AMBULANCE/FIRE: Emergency telephone 111.

TELEPHONES: Connections at all berths.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Drums are provided on board. Should ship exceed two drums, a charge will be made. Contact Tel: 06-834-4400.

WASTE OIL DISPOSAL: A1 Septic Tank Cleaners, 43 Thackeray St., Napier, N.Z. Tel: 06-8359767. Allens Tank Cleaners, P.O.Box 4021, Marewa, Napier, N.Z. Tel: 06-8436633.

SEAMAN'S CLUBS: Seafarers Centre, Breakwater Road, Napier. Tel: 06-8351906. Facilities include shop, international telephone service, chaplain on request, football matches arranged, postage facilities, games, TV.

CURRENCY: New Zealand Dollar (NZ$).

AUTHORITY: Port of Napier Limited, P.O.Box 947, Napier, New Zealand. *Tel:* (06) 834-4400. *FAX:* (06) 834-4408. *Contact:* G.J. Marshall, Commercial Manager. F.J. Roil, Port Operations Manager.

NELSON: 41.16 S. 173.17 E. (See Plan)

PORT LIMITS: Within 3 miles radius of Old Lighthouse on Boulder Bank.

DOCUMENTS: See "Auckland".

PILOTAGE: Compulsory for vessels of 100 g.r.t. and over. 24 hours' notice of ETA to Harbour Master. Confirm ETA before 1500 hrs. Friday if arriving during weekend or public holiday.

Harbour Office maintains 24 hour watch on VHF Channel 16. Call sign is "Nelson Harbour Radio".

VHF on Channel 16 listening and Channel 12 working. Pilots board inward-bound vessels 2 miles to seaward of main entrance.

Anchorage awaiting Pilot in depth about 30 ft., and with Old Boulder Bank Lighthouse (conspic.) bearing 180° distance 1.8 miles. By night landfall light (K 4224) bearing 160° distance 2 miles. Pilot vessel 40 ft. planing hull, speed 19 knots, painted orange.

ANCHORAGES: Anchorage as indicated in pilotage or further seaward according to weather conditions, draft and length of stay at anchor.

RESTRICTIONS: Vessels may enter, berth, unberth, or leave during hours of darkness. Overseas vessels (over approx. 120 m.) enter port on flood tide and usually swing and berth port side to.

MAX. SIZE: Max. permissible length 200 m. Beam 32.5 m. Draft limits 9.2 m. Max. draft at Main Wharf is 8.7 m.
Note: Max. draft of 9.2 m. may be exceeded at Harbour Master's discretion.

HEALTH: Radio Pratique usually granted. Pratique automatic after clearance at first port. If suspected disease or fever on board advise Medical Officer of Health, Nelson, by radio and await instructions.

RADIO: ZLW Wellington Radio; ZLB Awarua Radio; ZLD Auckland Radio.

TUGS: Two tugs available, join vessel inside harbour. Tug's own line used on berthing. Tugs are equipped for fire-fighting.

Also see "Ship Supply Service".

SPECIALISED CARGO-HANDLING FACILITIES: Facilities are available at one general cargo berth for discharging motor spirits and oil. Another berth is used for loading wood chips pneumatically (the loading equipment is owned by Nelson Pine Forest Limited, Nelson). Common user Roll-on/Roll-off Linkspan.

STEVEDORES: Labour ordered 0700 hrs. for weekday work; 0900 hrs. Friday for Saturday work. ETA should be received by Agents before these times.

MEDICAL: Advise Agents of any medical attention required, giving up to 24 hours' notice. Hospital facilities are obtainable.

TANKERS: Diameter of discharge pipe, 10 in. white products; 8 in. black oil. No slop discharge facilities. Oil tanker berth, one only. Max. draft at berth 7.9 m.

DENSITY: Average sea water, 1025.

FRESH WATER: Obtainable at any time. Approximately 20 t.p.h. delivery rate.

FUEL: Marine fuel oil, gas oil. Notice required, 24 hours.

REPAIRS: Deck and engine repairs are possible. Limited underwater repairs available and hull cleaning service.

DRY DOCKS: Slipway available for up to 1,500 ton vessels.

GANGWAY/DECK WATCHMAN: Watchman necessary but usually provided by ship's crew. Shore watchman can be engaged if requested by vessel. Cost in accordance with national award.

OPENING/CLOSING HATCHES: By stevedores only.

CUSTOMS ALLOWANCES: See "Auckland".

REPATRIATION: Facilities exist.

AIRPORT: Distance 3 miles. Served by internal airline only.

TIME: GMT plus 12 hours. Daylight saving in Summer months, advance clocks 1 hour to GMT plus 13 hours.

HOLIDAYS: New Year's Day (1st January); 2nd January; Picnic Day (usually near end January); Anniversary Day (1st Monday in February); New Zealand Day (6th February); Good Friday; Easter Monday; Queen Elizabeth II Day (1st Monday in June); Labour Day (4th Monday in October); Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Police 88309; Ambulance 88299; Fire 81589; Emergency calls, dial 111.

EMERGENCY CO-ORDINATION CENTRE: S.A.R. Emergency Centre situated in Wellington covers the whole country.

TELEPHONES: Can be connected on board.

STORING: Vessels can be stored by truck (no barges available) which may proceed alongside (except tankers). Fork lift trucks available, however no riggers available.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

SHORE POWER: 400 v., 3 h.p. 50 Hz, 60 amps maximum.

SHIP SUPPLY SERVICE: The Nelson Harbour Board operates 2 tugs and one pilot vessel. The larger tug, "Huria Matenga", is 3,000 h.p. Niigata Z pellar, the smaller tug, "W. H. Parr" is 1,500 h.p. Schottel, and the pilot vessel, "Waimea" is a 40 ft. planing hull vessel with a top speed of 19 knots.

Nelson also has a locally based helicopter firm of Helicopters (N.Z.) Ltd. based at Nelson Airport, who undertake contract work, as well as emergency work. Their helicopters also have marine VHF Channel 16.

GARBAGE DISPOSAL: Collection is available. Drums are provided. Tel: 0354-82099. Charges and collection time by arrangement.

WASTE OIL DISPOSAL: By arrangement through ship's agent.

SEAMAN'S CLUBS: Mission to Seamen, Kingsford Quay. Tel: 0354-87623. Facilities include comfortable lounge, pool tables, tea making. Other services by arrangement.

CURRENCY: New Zealand Dollar (NZ$).

AUTHORITY: Nelson Harbour Ltd., P.O.Box 844, Nelson, New Zealand. *Tel:* 03-5482099. *Telex:* Nelharb NZ 31066. *Cables:* Nelharbour. *FAX:* 03-5469015. *Contact:* D.H. Green, Managing Director. Captain B.J. Westbrooke, Harbour Master (After hours Tel: 5446877).

NEW PLYMOUTH, Port Taranaki: 39.03 S. 174.02 E. (See Plan)

PORT LIMITS: All waters contained within the area of a circle with radius 2.5 nautical miles whose centre is the trig station on Mount Moturoa in position Lat. 39° 03′ 56.8″ S., Long. 174° 01′ 44.9″ E.

DOCUMENTS: *Customs:* See "Auckland".

Agriculture: Shipmaster's Bond List. Meal Locker Declaration Form AGL 36 (2 copies).

Health: Maritime Declaration of Health (issued by Port Health Officer).

PILOTAGE: Compulsory. Advise ETA to "Operations Manager Westgate" (Telex: NZ 3500. Fax: 06-7599844) 24 hours prior to arrival, and confirm 6 hours and 2 hours prior to arrival. VHF Channels 16 and 12 (30 miles) and Channel 61 (60 miles). Radiotelephony 2182 kHz and 4125 kHz.

Pilot boat has orange hull with yellow cabin. Pilot boards 2.5 miles North of Main Breakwater. Ladder to be rigged 2.0 m. above water.

Pilot boat white with buff deckhouse and "Pilot" in black on side. Pilot taken on board about 1.5 miles due North of Main Breakwater Head.

ANCHORAGE: Vessels can anchor to the West of a line due North from the Main Breakwater head seaward of the 10 fathom line. Good holding on sandy bottom. Not recommended in Northerly weather conditions.
RESTRICTIONS: Max. draft 10.0 m. Ships under 7.5 m. not affected by state of tide. In range 7.5 m. to 10.0 m. time of berthing relevant to high tide.
MAX. SIZE: Length 225 m. (can be extended with prior permission). Beam according to berth and draft.
HEALTH: Pratique granted by radio (Port Health, New Plymouth – Fax: 64-6-753-2023). Pratique automatic if vessel has already called at another New Zealand port.
RADIO: Radio telephone system operates watches for 15 minutes every 4 hours from midnight. Call sign New Plymouth Harbour Radio, call frequency 2182 kHz. Working frequency 2012 and 2162 kHz. 24 hour watch maintained on VHF Channel 16. VHF Channels 12 and 61 also available.

Oil and chemical tankers must send cargo details 48 hours prior to arrival.
TUGS: 2 tugs available. 1×7 ton and 1×30 ton bollard pull.
BERTHING: In general all ships are swung in basin coming alongside berth stern first. Shore moorings are used.
Breakwater: Length 122 m., width 10 m., depth alongside LWOST 6.5 m. For use by oil field barges, supply vessels and fishing vessels. Road transport only.
Moturoa Wharf: Length 335 m., width 27.4 m.

East side of wharf: 1 berth 260 m. long, depth alongside LWOST 10 m. Urea loader with capacity 500 tonnes/p.h. Storage 18,000 tonnes. One berth 76 m. long, depth alongside LWOST 6.5 m.

West side of wharf: 1 berth 137 m. long, depth alongside LWOST 7.5 m. Bunkering point on No. 2 berth. Road and rail transport may be used to load and discharge dry cargo.
Newton King Wharf: Tanker use only. Max. LOA 212 m. Motor Spirit, Bitumen, Oils, Caustic, Chemicals. Exports: Condensate, Methanol and LPG, Synthetic Petrol. Depth alongside LWOST 11.5 m.
Blyde Wharf: West side of the wharf: See "Container Handling Facilities".

East side of the wharf: Length 80 m., width 5.5 m. and 13.4 m., depth alongside LWOST 6.5 m. Road transport only. For use by oil field supply vessels.

Two mobile heavy lift cranes, capacity 70 tonnes each, available for use on Blyde Wharf and Breakwater Berth.

Cold storage with 5,000 tons capacity adjacent to Blyde No. 1 Berth, and dry storage with capacity 4,000 tons adjacent to Blyde No. 2.
CONTAINER HANDLING FACILITIES:
Berth: Blyde Wharf.
Length: 420 m.
Depth: 11.0 m.
Max. Draft: 10.0 m.
Equipment available for gearless ships:
2 crawler cranes with the following capabilities:
2 tons at 30 m. from berth face.
10 tons at 25 m. from berth face.
18 tons at 14 m. from berth face.
24 tons at 11 m. from berth face.
30 tons at 7.5 m. from berth face.

3×D.55 forklifts with 20 ft. and 40 ft. spreaders, max. lift 24 tons stack 3 high.

2×D.25 forklifts with side frames, max. lift 6 tons 3 high.

Gearless vessels of 900 T.E.U. regularly use the berth with exchanges of 500-700 T.E.U. and with careful attention to stowage weights do not have to turn around. On a mixed load and discharge of full boxes, average rate is 12 boxes per hour per crane, empties 20 boxes per gross hour per crane.

Storage for 76 reefer slots and 66 integrals are available plus storage for in excess of 2,000 T.E.U. A cleaning and repair facility is also available.

Operations possible 24 hours a day, 7 days a week.

F.C.L. boxes are delivered throughout the North Island within 24 hours of discharge.

Rail access to ship's side and yard.
STEVEDORES: Available 24 hours a day, 7 days a week. Agents should be advised ETA at least 24 hours, preferably 72 hours, in order arrange cargo if vessel loading.
MEDICAL: Hospital services available.
DENSITY: Sea water.

FRESH WATER: Available all berths from main supply at about 100 t.p.h.

FUEL: Gas oil line at Blyde No. 3, Moturoa Berths and Newton King Wharf.

FIRE PRECAUTIONS: Tanker berths closed to public. Harbour Board watchman in attendance.
TANKERS: *Newton King Tanker Terminal:*
Number of Berths: Two.
Operator and Owner: Westgate Transport Ltd.
Maximum Size:

	Max. LOA		*Max. Stern to Loading Arm*		*Max. Bow to Loading Arm*	
Berth	No. 1	No. 2	No. 1	No. 2	No. 1	No. 2
Condensate/ Crude (SBPT Loading Arm)	212 m.	212 m.	102 m.	92 m.	113 m.	113 m.
Synfuel	212 m.	212 m.	111 m.	101 m.	104 m.	104 m.
Methanol	212 m.	212 m.	125 m.	115 m.	90 m.	90 m.
LPG	–	–	–	62 m.	–	–

Maximum Displacement: 50,000 tonnes.
Max. Draft Arrival: 10.0 m.
Max. Draft Departure: 10.0 m.
Max. beam at 10.0 m. draft: No. 1 – 35 m. No. 2 – 35 m.
Hours of Operation: Dependent on draft/tide combinations. Loading/discharging on 24 hour basis.
Tugs: 1 Liaan Compass thruster tug, 30 tonne bollard pull.
1 Voith Schneider tractor tug, 7 tonne bollard pull.
Ballast Facility: Max. ballast receiving capacity 22,000 tonnes. Ballast must be lead free.
Special Conditions: Arrival drafts to be not less than normal sea-going ballast condition. No excessive trim at any time. All vessels use shore wire coirs. One ship's line each end only used for berthing/unberthing. Marine diesel is available. Fuel oil is not available. Fresh water is available.
Products Handled:

	Avg. S.G.	*Avg. Temp.* (°C.)	*Loading Rate* (t.p.h.)	*Connection*
Kapuni	0.7658	19	1,300	Loading Arm
Maui (12 in.)	0.7468	19	1,300	Loading Arm
McKee	0.829	28	1,600	Loading Arm
Synfuel (12 in.)	0.7316	19	1,400	Loading Arm (dedicated)
Methanol (10 in.)	0.7924		1,000	Loading Arm (dedicated)
LPG (6 in. and 6 in.)	0.532	20	150	Loading Arm (dedicated)

In addition to the above, a variety of other products are also shipped, namely small parcels of caustic soda and other chemicals through flexible hoses. Tallow is also occasionally transhipped across the wharf.
CONSULS: None available locally. Nearest at Wellington or Auckland.
REPAIRS: All repairs except underwater work of a major nature.
SURVEYORS: Surveyors can be arranged.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
CERTIFICATES:
Normal Safety Certificates.
Ship's Register.
CUSTOMS ALLOWANCES: See "Auckland".
REPATRIATION: Facilities exist.
AIRPORT: 7 miles from city, 10 miles from port. Served by domestic service only, 5 flights Northbound and Southbound each daily.
TIME: 12 hours ahead of GMT. N.Z. Daylight time observed.
HOLIDAYS: New Year's Day; 2nd January; Stevedores Picnic (4th Monday in January); Waitangi Day (6th February); Provincial Anniversary Day (2nd Monday in March); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (1st Monday in June); Labour Day (4th Monday in October); Christmas Day; Boxing Day.
POLICE/FIRE/AMBULANCE: Telephone numbers respectively, 7575449, 7575505, 7575439.
EMERGENCY CO-ORDINATION CENTRE: *Emergencies:* Contact New Plymouth Harbour Radio on VHF Channels 16 or 12 or Tel: 06-7510516.
Port Alarm: Wailing siren with red flasing light on top of cement silo at inshore end of Newton King Tanker Terminal. Action – cease work, muster crew, open contact with Harbour Radio on VHF Channel 12 for instructions.
TELEPHONES: Can be connected on board.
STORING: By road or rail truck to shipside. Tankers by road to wharf gate and hand truck to shipside approx. 400 ft. Customs available. Ship's crew to be used for stores.
SHORE LEAVE: No restriction.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Garbage service provided (drums). Charges included in marine services charge. Collection time 1100 hrs. Monday to Saturday.
WASTE OIL DISPOSAL: Tanker trucks of various sizes available, arrange through Agent.
SEAMAN'S CLUBS: Seafarers Centre (Port Taranaki), Wharf Street, Port Taranaki. Tel: 7510012. Snacks, shop, money exchange and international telephone.
CURRENCY: N.Z.$.
GENERAL: Ship's garbage must be in covered containers supplied by Harbour Board and removed daily. Any meats on board vessel on arrival which have been supplied from other than Australia or New Zealand will be sealed off and fresh supplies obtained.
AUTHORITY: Westgate Transport Ltd., P.O.Box 348, New Plymouth, New Zealand. *Tel:* 64-6-7510200. *Telex:* NZ 3500. *FAX:* 64-6-7519844. *Cables:* Taragate. *Contact:* Captain R. Barlow, Operations Manager.

ONEHUNGA: 36.56 S. 174.47 E. (See Plan)

PORT LIMITS: All that area of water contained within an area bounded to seaward by an arc of a circle 4 miles radius from the Southern extremity of Paratutai Island.
DOCUMENTS: See "Auckland".
PILOTAGE: Not compulsory, but arrangements can be made with the Harbour Master at Auckland to supply the services of a Pilot if required. A Pilot will then board a vessel off Te Pirau, situated about 2 miles N.E. of South Head main light.

Pilotage District: All those waters of the Manukau Harbour contained within a line drawn 180° to the South shore from Jackie Hill on Kaiteke Point 015.5° – 2.85 miles approximately from the Southern extremity of Paratutai Island.

The signal station is equipped with both medium frequency and VHF radiotelephone. Call sign is "Manukau Harbour Radio" and VHF Channels 10, 11, 12, 13, 14 and 16.

Listening watches are maintained as follows:
0800 to 0830 – Call 2182 kHz, work 2012 kHz.
0830 to 0900 – Calling and working 2012 kHz.
1800 to 1830 – Calling 2182 kHz, working 2012 kHz.
1830 to 1900 – Calling and working 2012 kHz.
0800 to 0900 – VHF Channel 16.
1800 to 1900 – VHF Channel 16.
Other times by arrangement.

Note: Should a vessel be crossing the bar during the scheduled watch periods, the signalman will be working on 2012 kHz with that vessel and not listening on 2182 kHz.

Vessels equipped with radiotelephone must maintain contact with the signal station while crossing the bar.

Weather conditions permitting, information concerning bar conditions will be supplied on request from the signal station. Such information can only be regarded as a guide, as observations are made from the signal station which is situated about 5 miles from the bar and elevated 243.84 m. (800 ft.).

Radiotelephone – Onehunga: A radiotelephone is installed at the office of the Officer-in-Charge at Onehunga. The call sign is "Onehunga Harbour Radio" and the working frequency 2012 kHz.

Vessels equipped with radiotelephone, when within Puponga Point, must maintain a listening watch on 2012 kHz for information relative to berthing, harbour traffic or other harbour conditions.

No regular watches are maintained.

ANCHORAGES: After crossing the bar it is not advisable to anchor until after rounding Puponga Point, if proceeding to Onehunga; or after rounding Kauri Point (situated about 15 miles S.E. of Puponga Point), if proceeding to the Southward.

Prohibited Anchoring and Fishing Area: Within an area extending 2 miles from Destruction Gully front beacon in a 182° direction and having a width of 152 m. (500 ft.) on each side of the transit of Destruction Gully beacons.

Prohibited Anchorage: Within 91 m. (300 ft.) of a sewage submarine pipeline laid in a 152° direction across Wairopa Channel about 1 mile Westward of Onehunga Wharf. On the Northern shore, 2 white triangular beacons, each bearing the word "Sewer" in black letters, mark the middle of the Prohibited Anchorage. The pipeline lies approximately 3 m. (10 ft.) to the Eastward of the beacons when in transit.

Prohibited Anchoring and Fishing Area: Anchoring and fishing are prohibited within an area bounded by a line commencing at the South end of Renton Road (Lat. 37° 00.08′ S., Long. 174° 45.2′ E.); thence running 180° for 2,590 m.; thence 090° for 5,291 m.; thence 050° to the shore. The Northern boundary commences at Nganui Point (Lat. 37° 00′ S., Long. 174° 48.4′ E.); thence 090° to the opposite shore.

The above area, adjacent to Auckland International Airport, is marked by following lights and beacons, bearings and distances from Aero light (37° 00′ 48″ S., 174° 47′ 31″ E., approx.).
Light F. 058° 45′ – 1,936 m.
Beacon 259° 30′ – 3,185 m.
Beacon 220° 45′ – 2,848 m.
Beacon 183° 15′ – 1,890 m.
Beacon 143° – 2,317 m.
Light Beacon Qk.Fl. 239° – 3,642 m.
Light Beacon Fl.R.2 secs. 122° 45′ – 3,466 m.
Light Beacon Fl.R.2 secs. 112° 45′ – 3,261 m.
Light Beacon Fl.R.2 secs. 108° 30′ – 2,453 m.

RESTRICTIONS: Berthing and unberthing during the hours of darkness is not recommended.

Controlling Depths Below Chart Datum		*Nature of Bottom*
Entrance to port (Southwest Channel)	5.48 m.	Sand.
Anchorages	5.486 m. – 7.62 m.	
Channel	3.048 m.	Mud, Shell, and Sand.
Approaches to berth	3.048 m.	
Berth (Onehunga)	3.3 m. – 4.7 m.	

MAX. SIZE: LOA, 95 m. Beam, No limit. Draft 4.7 m.
HEALTH: See "Auckland".
RADIO: See "Auckland".
VHF: See "Pilotage".
RADAR: A radar station having a maximum range of 72 miles is operated by Ports of Auckland Ltd. at South Head Signal Station Lat. 37° 03.2′ S., Long. 174° 32.6′ E. Masters may call on radio telephone and request particulars of their bearing and range as shown on the radar screen. Responsiblity for the use of this information rests entirely with the Master of the vessel.
TUGS: 1 twin screw tug is available. 52.5 tonnes gross, 400 b.h.p., static pull 3.5 tonnes. Tug is equipped with both medium and VHF Radiotelephone.
BERTHING: The principal wharf is situated at Onehunga and is a ferro-concrete structure 293 m. in length which includes a launch jetty of 17 m. at the Eastern end, and with a width of 49 m. A grid for the use of small craft has been constructed immediately North of the wharf. There is a small jetty at Cornwallis.

The deck level of the wharf is 6.401 m. above chart datum.

The wharf is connected to the railway system and the distance from the outside face of the wharf to the centre of the railway track is 3.73 m.
CRANES: No quay-side cranes. One 12.5 tonne capacity mobile crane available. For heavier loads cranes available for hire from outside port.
BULK CARGO FACILITIES: Eastern end of quay is equipped with a pipeline for the discharge of bulk cement to adjacent privately owned silos.
SPECIALISED CARGO HANDLING FACILITIES: Ro-Ro ramp with width 18.0 m. at the mid-length of the main quay.
BRIDGES: None.
STEVEDORES: Arranged by Agents. See "Auckland".
MEDICAL: See "Auckland".
TANKERS: No facilities.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Boiler fuel oil, diesel oil, and lubricating oil are available from tank wagons; delivery at the rate of 13,500 litres per hour through a 50 mm. hose. Coal is not kept in stock but can be obtained.
CONSULS: See "Auckland".
REPAIRS: Outside firms are available to do machine shop and foundry work.
DRY DOCKS: No facilities.
SURVEYORS: See "Auckland".
GANGWAY/DECK WATCHMEN: See "Auckland".
HATCHES: See "Auckland".
CUSTOMS ALLOWANCES: See "Auckland".
CARGO GEAR: See "Auckland".
REPATRIATION: Full facilities exist.
AIRPORT: 8 km. from port. Served by major international airlines.
TIME: See "Auckland".
HOLIDAYS: See "Auckland".
POLICE/AMBULANCE/FIRE: All emergency services are called through one telephone number. Dial 111 and state service required.
SERVICES: No special services.
SHORE LEAVE: Crew members may go ashore.
IDENTIFICATION CARDS: Not required.
REGULATIONS: See "Auckland".
DELAYS: Seldom any delays.
AUTHORITY: See "Auckland".

OPUA: 35.19 S. 174.07 E. (See Plan)

PORT LIMITS: Commencing at Northern extremity of Cape Wiwiki, thence by a straight line to the Eastern extremity of the Nine Pins, thence by a straight line to the North Western extremity of Cape Brett.
DOCUMENTS: See "Whangarei".
PILOTAGE: Compulsory Southward of a line from the Eastern extremity of Tapeka following a 350° True bearing to the Eastern extremity of the Black Rocks, thence in 271° True direction to the mainland. Pilots are available all hours day and night subject to prior minimum notice of 24 hours being received during normal weekday working day. Second notice confirming or amending first to be sent 4 hours before expected arrival. The Pilot supplies Harbour By-laws. Pratique, Agriculture and Customs clearance is normally undertaken on arrival at berth. Pilot from Whangarei, VHF contact possible.
ANCHORAGE: Renown Anchorage as per Bay of Islands Chart N.Z. 5122.
RESTRICTIONS: Veronica Channel: Restricted depth 6.0 m. at C.D.
MAX. SIZE: Max. draft 7.0 m. at H.W. and 6.00 m. at L.W.
RADIO: See "Whangarei".
TUGS: Available by arrangement with Northland Port Corporation, Whangarei. At least 72 hours' notice required.
BERTHING: Total length 214 m., width 12.5 m., overseas berthage on Eastern side of wharf. Depth at berth is 9.45 m. at MLWS. Wharf is serviced by rail.
CARGO HANDLING: Ship's own gear. 2 permanent gangs available subject to Stevedore requirements as per Whangarei.
MEDICAL: Hospital and Ambulance at Kawakawa, 12.8 km. (8 miles) from Opua. Port Doctor at Paihia, 8 km. (5 miles) away.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: By arrangement with oil companies via road transport.
CONSULS: See "Whangarei".
SURVEYORS: See "Whangarei".
CUSTOMS ALLOWANCES: See "Whangarei".
REPATRIATION: See "Whangarei".
AIRPORT: See "Whangarei".
TIME: See "Whangarei".
HOLIDAYS: See "Whangarei".
POLICE/AMBULANCE/FIRE: See "Whangarei".
TELEPHONES: Telephones available.
SHORE LEAVE: See "Whangarei".
GARBAGE DISPOSAL: Service available. Limited to approximately 2 tonnes per day. 100 litre drums provided on board. Incinerator on wharf. Daily collection. NZ$ 10/hr. burning time.
WASTE OIL DISPOSAL: Not available locally. Can be arranged from Whangarei (70 km.) to be collected by road tanker (capacity 7,000 litre).
SEAMAN'S CLUBS: None.
CURRENCY: New Zealand Dollar (NZ$).
REGULATIONS: See "Whangarei".
DELAYS: See "Whangarei".
AUTHORITY: Northland Regional Council, Private Bag 9021, Whangarei, New Zealand. *Tel:* (09) 438-4639. *Telex:* NZ 2955. *FAX:* (09) 438-0012. *Cables:* "Harbour". *Contact:* Captain P.J.R. Wavish, Maritime Manager.
Port Company: The Owners/Managers of Opua Wharf are Far North Maritime Ltd., c/o P.O. Opua. *Tel:* (09) 402-7505. *FAX:* (09) 402-7763. *Contact:* Mr.J. Knappett, General Manager.

OTAGO, (includes Dunedin, Port Chalmers and Ravensbourne): (See Plan)

PORT CHALMERS: 45.49 S. 170.38 E.
DUNEDIN: 45.53 S. 170.31 E.

PORT LIMITS: The harbour limits are defined by a line extending from Heyward Point Trig Station in an 020°T direction for 3 miles thence 126°T for 1.75 miles thence 200°T to the shore off Howlett Point.

The entrance to Otago Harbour is situated in the bay between Heyward Point and Taiaroa Head.

Within the entrance the harbour extends about 13 miles South-Westward and at its head stands the city and Port of Dunedin. The town and port of Port Chalmers is situated about 6 miles within the harbour entrance.

About 1 mile Southward of Port Chalmers, the Portobello Peninsula, with Quarantine Point at its head, together with the adjacent Quarantine and Goat Islands, form a natural barrier across the Otago Harbour inlet. That part of the harbour which lies North-Eastward of this barrier is the "Lower Harbour" and that which lies South-Westward is the "Upper Harbour".

DOCUMENTS: See "Auckland".

APPROACHES: *Harbour Entrance Channel:* A sand bank extends about 1.25 miles Northward of Taiaroa Head, and the dredged entrance channel effectively divides this into Eastern and Western banks. There is a least depth of 21 ft. (6.4 m.) on the Eastern bank, and the sea can break dangerously over it in heavy weather. The Western bank has a least depth of 28 ft. (8.5 m.).

The entrance channel extends from the seaward (Northern) edge of the bank to a gap between North Mole and Taiaroa Head. The channel is dredged to 45 ft. (13.7 m.), and is 600 ft. (183 m.) wide – it is unprotected and sea and swell can cause vessels to pitch, roll, and lift bodily in the approaches.

North Mole, an artificial rock breakwater, extends about 4,000 ft. (1,219 m.) N.E. from the low sand spit on the Western side of the entrance. The underwater toe extends about 400 ft. (122 m.) N.E. of the visible head.

The tidal range in the entrance channel is 6.5 ft. (2.0 m.) at Springs, and 4.3 ft. (1.3 m.) at Neaps. Tidal streams run generally along the axis of the channel at rates up to 2 knots on flood and ebb but, near the harbour entrance, vessels may be set to the Westward on the flood stream, and to the Eastward on the ebb stream.

PILOTAGE: Address "Chief Pilot, Dunedin." Through coastal radio station ZMH 32 (Taiaroa Head) giving ship's name, draft, and ETA. First message 72 hours out, revise 24 hours out: if from another New Zealand port (coastwise) similar message as soon as possible after leaving that port. ZMH 32 (Taiaroa Head) maintains continuous listening watch on 2182, 4125, 6215 and 8255 kHz and VHF Channel 16. Pilot boat is 13.0 m., orange launch, also fitted with VHF frequencies, which meets vessels as required but does not remain on station otherwise. Boarding position is with Taiaroa Head Lighthouse bearing 180° distant 2.5 miles; good anchorage with Taiaroa Head Lighthouse bearing 160° – 2 miles, depth 14 fathoms. Pilots can board in this vicinity provided Master has ship under way at slow speed and obeys Pilot's instructions. Vessels arriving to work general cargo should endeavour to embark Pilot by 0500 hrs. in order to be alongside berth ready to take labour on board at normal commencing hour of 0700 hrs.

ANCHORAGES: *Anchorage Outside the Harbour Entrance:* A recommended anchorage which is considered safe in all winds except rare Easterly gales is, in a least depth of 13 fathoms (23.8 m.), sand, with Taiaroa Head Lighthouse bearing 160°T and Heyward Point Light Tower bearing 220°T.

Note: There is no anchorage inside the Harbour entrance, but in a case of emergency, vessels up to 500 ft. (152.4 m.) long may be able to anchor in the swinging basin at Port Chalmers.

Prohibited Anchorage: Anchorage is prohibited in the vicinity of a submarine power cable laid between Battery Point, Port Chalmers, and Quarantine Point at the North-Western end of Portobello Peninsula.

The cable is marked on its North-Western end by 2 beacons situated approximately 1.5 cables South by West and approximately 2.25 cables South by East from Observation Point. Both beacons are rectangular in shape and painted in green and white horizontal stripes. The latter beacon also serves as No. 31 channel beacon, and exhibits a flashing green light – these beacons when in line bearing 139.5° T indicate the route of the power cable across the channel.

RESTRICTIONS: Tankers proceeding to or from the oil jetty at Dunedin make passage of the upper harbour in daylight hours only. Also see "Max. Size".

Entering and Leaving: Any vessel wishing to enter, leave, or move within the Port of Otago must first obtain permission to do so from the signal station at Taiaroa Head, and this directive shall include any boat or yacht exceeding 11 m. in length wishing to enter the Upper Harbour.

Upper Harbour – Overhead Power Line: An overhead power line from Port Chalmers to Portobello crosses the channel via Goat and Quarantine Islands, supported by steel lattice-work towers painted in bands of orange and silver. The vertical clearance beneath the power line where it crosses the channel is 168 ft. (51.2 m.) at MHWS.

Upper Harbour – Submarine Power Cables: A power cable buried 10 ft. (3.1 m.) below the sea bed runs across Victoria Channel between beacons No. 40 and 41. From Beacon No. 41 the cable is laid on the sea bed in a 280°T direction to the shore. From Beacon No. 40, 3 cables are laid on the sea bed in 115°T, 118°T, and 131°T directions to the shore. Anchoring is prohibited in this vicinity.

MAX. SIZE: *Lower Harbour to Port Chalmers:* Vessels up to 850 ft. (259 m.) length overall, and 39.3 ft. (12.0 m.) draft can transit the Lower Harbour to and from Port Chalmers by day and night. Longer vessels may be handled by prior arrangement with the Harbour Master.

The maximum draft permissible at LW is 36 ft. (11 m.) which may be further reduced to a minimum of 32.5 ft. (9.9 m.), if there is a heavy swell in the entrance channel.

Upper Harbour to Dunedin: Vessels up to a maximum of 607 ft. (185 m.) length overall, 95 ft. (29.0 m.) beam and 28 ft. (8.6 m.) draft can transit the Upper Harbour channel to Ravensbourne and Dunedin. Non gas-free tankers, and vessels over 550 ft. (167.6 m.) in length transit the Upper Harbour in daylight hours only, but all other vessels can be handled both day and night. The maximum draft permissible at LW is 21 ft. (6.4 m.).

HEALTH: Master to radio to Port Health Officer (entry port in N.Z. only) 24 hours before ETA requesting Free Pratique or declaring adverse state of health. Agents will advise Port Health Officer and Health Department inspectors who will board vessel on arrival, alongside actual wharf if Free Pratique requested. N.Z. regulations will require sealing of domestic meat chambers and purchase of local meats for use coastwise.

RADIO: Through Taiaroa Head – ZMH 32.

RADAR/VHF: A signal station is situated on Taiaroa Head about 1 cable Southward of the lighthouse. Vessels can communicate with the signal station by flashing lamp or radiotelephone.

VHF and MF radiotelephones are fitted in the signal station and continuous watch is maintained on VHF Channel 16 (156.8 MHz) and 2182, 4125, 6215 and 8255 kHz. The call sign is "ZMH 32".

If using VHF, initial contact should be made on Channel 16 (156.8 MHz), and Channels 14 (156.7 MHz) or 12 (156.6 MHz) should be used for subsequent working.

If using MF, initial contact should be on 2182, 4125, 6215 and 8255 kHz. 2162, 4146, 6227 or 8297 kHz should be used for subsequent working.

Notice of Arrival: Estimated times of arrival together with maximum draft must be passed to the Chief Pilot by radio 12 hours, and confirmed 4 hours, before reaching the pilot station. This is in addition to any previously submitted notification. Radar operated at station on request has range in excess of 20 miles to North and East.

Port Chalmers

Beach Street Wharf: 2 berths with a total length of 412.5 m., serve the forestry, woodchip and general cargo trade. A new shed of 2,300 sq.m. on the wharf assists with cargo storage facilities. Reclaimed land of 3.5 ha. is available for forest products storage and further reclamation is underway to double the area by 1995. Depth alongside 11.6 m. LWOST.

George Street No. 1: A 301.2 m. concrete wharf, and is the main container terminal berth. Depth 12.5 m. at LWOST.

George Street No. 2: A 296.1 m. concrete multi-purpose berth. Depth 13.0 m. at LWOST.

Both wharves are served by 2×46 ton container cranes with sufficient straddle carriers, toplift and forklift machines to service the 13.6 ha. back-up area.

Dunedin:

Wharves with a total length of 950 m. See table above for depths alongside. All berths have transit sheds with a total floor space of 3,600 sq.m. All berths have roads at sheds, Victoria Wharf has a rail connection. There are 6 × 5 ton electric cranes, 16 fork lift trucks and 10 tractors available for use at wharves.

Leith Wharf: The ex-Ro/Ro wharf has been upgraded to provide for shipments from the adjacent Apple and Pear Marketing Board cool store, plus general cargo. Depth alongisde 8.3 m.

Ravensbourne Wharf: Situated 1 mile from Dunedin is available for the discharge of bulk phosphate and sulphur via hoppers and conveyor belt direct into works. Maximum size of ship for this jetty 184.1 m. overall. Depth alongside 8.0 m.

LPG Berth: A dedicated berth for coastal gas tankers has been constructed 300 ft. (91.5 m.)×106°T from end of Leith Wharf.

All berths in the port have fresh water connections, ample floodlighting and telephone facilities.

TUGS: 2 tugs, each 2,000 h.p. (30 ton bollard pull). Tug's used in vicinity of wharves turning, berthing and unberthing, etc. Tug's lines used without charge.

CRANES: The Container terminal is equipped with 2 Vickers Hoskins Paceco 46 tonne Mach Container Gantry Cranes with an outreach of 32.4 m. and a backreach of 10.67 m.

Also see "Berthing".

STEVEDORES: Services are provided by operators to handle any type of general, bulk or unitised cargo. Port Chalmers Container Terminal specialises in handling containers. Two shifts, each of 8 hours, are worked daily as required, and a 3rd shift may be available by prior arrangement.

MEDICAL: Emergency medical services and full hospital services always available at short notice. Emergency advice by radio available. Top priority given arrangements for landing urgent cases for medical treatment.

TANKERS: Diameter of lines 200 mm.; minor slop facilities only; one tanker discharge berth 220 m. long, 7.5 m. depth alongside at low water. Max. size 184 m. long.

DENSITY: Harbour density 1024 at all states of tide.

FRESH WATER: Fresh water is available at all berths. Delivery rates are approximately 15 tonnes/p.h. at Dunedin wharves and 25 tonnes/p.h. at Port Chalmers.

FUEL: Marine diesel, heavy and light fuel oils, and lubricating oils are usually available. Small quantities can be delivered to any berth by tank trucks, and larger quantities can be loaded by pipeline at the Oil Jetty at a rate of about 100 tonnes/p.h.

CONSULS: Consular Agencies: Denmark, France, Germany, Italy, Netherlands, Norway, Portugal, Sweden.

REPAIRS: Private companies capable of undertaking all forms of repair work are established in Dunedin and Port Chalmers. There is no dry dock, but a 500 tonne slipway capable of accommodating vessels up to 191 ft. (58.2 m.) long is available.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Shore watchman not normally required except at entry to oil jetty, such watchman arranged for by ship's Agents. Ships required to maintain own gangway surveillance.

OPENING/CLOSING HATCHES: Automatic hatch gear may be operated by ship's personnel. Manual hatches by shore labour only.

CERTIFICATES: Normal cargo gear and equipment certificates as required for British ports; also Fumigation (Derat) or Exemption Certificate.

CUSTOMS ALLOWANCES: See "Auckland".

REPATRIATION: Repatriation arrangements can be made.

AIRPORT: Dunedin is served by all internal main airlines with connections to overseas via Christchurch, Wellington and Auckland. Airport 35 minutes (25 km.) from Dunedin City by car.

TIME: N.Z. Standard Time throughout year is GMT plus 12 hours, except that Summer time now operates from first Sunday in October to third Sunday in March. (Add 1 hour).

HOLIDAYS: As for all N.Z. ports, i.e. January 1st and 2nd; Good Friday and Easter Monday; Anzac Day (April 25th); 1st Monday in June; Labour Day (Monday, nearest October 24th); Christmas Day and Boxing Day; Waterside Picnic Day (Monday at end January). Where New Year and Christmas holidays coincide with Saturdays and/or Sundays, holidays are taken following Monday and/or Tuesday.

POLICE/AMBULANCE/FIRE: Police 4776011; Ambulance 4777111; Fire Brigade 4779119; Hospital 4740999; Emergency (serious) dial 111 and ask for any service needed.

TELEPHONES: Slot telephones can be put on board with all local calls free, others by cash in slot.

SERVICES: Radar and gyro compass technicians available. Good shop and providore facilities. Compass adjuster usually available. Divers employed by a private company are available for underwater inspections.

SHORE LEAVE: Crew members not restricted ashore.

IDENTIFICATION CARDS: Not required for British subjects. Alien identification cards to be retained on board in case of need.

GARBAGE DISPOSAL: A collection service is available, 24 hours a day, seven days a week. Drums are provided and are placed on board on ship's arrival. Servicing continues during daylight hours until ship's departure. Contact is through the Cargo Services Supervisor, Tel: Dunedin 474 0881, Ext.852. Charges are under review.

WASTE OIL DISPOSAL: B.J.Dakin Ltd. provide a service handling up to 40,000 litres at any one time. Tel: Dunedin 488 2437. Please note this service applies to waste oil disposal and not to bilge oil disposal.

SEAMAN'S CLUBS: Otago Seafarers' Society is affiliated to the International Sailors Society (New Zealand) and the British Sailors Society, London. Two club rooms operate, one at Port Chalmers and one at Dunedin. A ship visiting officer provides each ship with a notice and details of facilities.

CURRENCY: New Zealand Dollar (NZ$).

REGULATIONS: No special local regulations, but all N.Z. ports have very strict rules for garbage collection and disposal, etc. and against oil spillage.

GENERAL: No special moorings are required. Harbour, though tidal, is landlocked and there is no surge at any berth. Tide rise averages 6 ft. above datum (extremes 1.52 m. and 2.44 m.).

Harbour Chart: N.Z. 6612 Otago Harbour.

Adjacent Coastal Charts: N.Z. 64 Banks Peninsula to Otago Peninsula. N.Z. 66 Taiaroa Head to Nugget Point. N.Z. 661 Approaches to Otago Harbour.

Sailing Directions: New Zealand Pilot.

Communications: Dunedin and Port Chalmers are connected with the post, telegraph, telephone, and telex systems.

State Highway No. 1 and the main trunk railway line both pass through Dunedin. Regular road and rail services operate to other South Island towns.

DELAYS: Ample berths normally available. Occasional delays for labour shortage or wet weather (rainfall average 762 mm. per year). Small quantities bunkers available ex-tank wagons at any berth. Larger quantities obtainable by shifting to oil jetty outside cargo work hours or as otherwise convenient.

DEVELOPMENTS: Most development is at present centered on Port Chalmers which is the region's deep water port.

Beach Street Wharf extensions were completed in July 1991 and planning is under way to extend the area for storage and facilities for forestry products.

George Street No. 2 (Multi-purpose wharf) was officially opened on 27th August 1992. Planning is now under way to extend storage facilities for container and general products.

AUTHORITY: Port Otago Ltd, P.O.Box 8, Port Chalmers, New Zealand. *Tel:* 03-4727890. *FAX:* 03-4727891. *Contact:* Captain K. Plate, Chief Executive. Captain D. Hart, Terminal Manager. M.A. Bakx, Marine Services Manager. G.L. Grenfell, Cargo Operations Manager. T.T. Riches, Marketing Manager. Captain J.M. Harger, Chief Pilot.

PICTON: 41.17 S. 174.00 E. **(See Plan)**

PORT LIMITS: Inside straight lines from Cape Jackson to Cape Koamaru and from East Head to West Head at Tory Channel Entrance.

DOCUMENTS: See "Auckland".

PILOTAGE DISTRICT: *Queen Charlotte Sound:* Inside a straight line drawn in a 303° direction from Paparoa Point on Arapawa Island to the opposite shore, and the arc of a circle radius 1 mile centred on West Head Light.

Pelorus Sound: Inside a straight line drawn in a 121° direction from Paparoa Point (East of Harding Point) to Alligator Head.

PILOTAGE: Pilotage is compulsory inside a straight line drawn in a 180° direction from Snake Point to the opposite shore, including all the waters of Tory Channel. Pilotage in the Outer Reaches of Queen Charlotte Sound and in Pelorus Sound is optional. Unless otherwise requested, Pilot will board vessels in a position 090°T, 0.6 miles from Motuara Island Light Tower. Pilots are available through Port of Wellington Pilot Services and Tasman Bay Pilots Ltd.

ANCHORAGES: Except during strong N.W. winds, there is a good anchorage Northward of Mabel Island in 16 fathoms for vessels of all sizes.

Quarantine Anchorage: Within the navigable area to Westward of Mabel Island enclosed between the foreshore and a line from Kaipupu Point 047° to the Western extremity of Mabel Island, thence 349° to Wedge Point. Vessels not in quarantine can use this anchorage.

RESTRICTIONS: Controlling depth in approaches to anchorage is 13 m. MLWOS.

MAX. SIZE: Max. length 201 m. Draft 11 m. aft, 8 m. – 10 m. forward depending on length. Vessels of this size can berth at any state of the tide. Longer vessels may be accommodated by arrangement with the Harbour Master.

HEALTH: First entry at a New Zealand port Pratique is granted after vessel berths provided she has a clean bill of health from her last port, otherwise vessel would anchor in the Quarantine Anchorage, where port Health Officer would board. Once clear at the first port in New Zealand no further Pratique is required.

RADIO: Port is equipped with medium frequency and VHF, call sign "Picton Harbour Radio", calling frequency 2182 kHz. Watch is maintained Monday to Friday, 0900 to 0933, 1140 to 1203, 1540 to 1603 hrs. daily and at other times by arrangement. In addition the following schedule is maintained for communication with the road/rail ferries: 0103, 1140, 1640, 2020, 2050 hrs. Sundays only: 1603 hrs.

TUGS: None.

BERTHING: One overseas wharf 240 m. length with accommodation for 2 vessels. Depth at wharf up to 11.58 m.

Two road/rail ferry berths 152 m. long with modern terminal facilities for Roll-on/Roll-off traffic.

STEVEDORES: Services can be provided by Port Marlborough New Zealand Ltd.

MEDICAL: It is necessary for Master to give his Agent as much advance notice as possible. Two doctors reside in the port. Hospital at Blenheim, 35 km. by road. Ambulance service available.

DENSITY: 1025.

FRESH WATER: Supplies available at 30 t.p.h. Cost 60 cents/tonne.

FUEL: By tank wagon only.

CONSULS: At Wellington.

REPAIRS: Small repairs undertaken by three companies.

SURVEYORS:

1. Cargo Surveyors available.
2. Lloyd's Register available. Other societies available from Wellington.

GANGWAY/DECK WATCHMEN: Required by general harbour regulations and is generally carried out by ship's deck hands.

OPENING/CLOSING HATCHES: Performed by crew.

CUSTOMS ALLOWANCES: See "Auckland".

CARGO GEAR: Marine Department control this and regulations are issued accordingly. These regulations are very similar to those in the United Kingdom.

REPATRIATION: Crew changes can be made.

AIRPORT: Woodbourne – 36 km. by road from Picton, served by feeder services to Wellington – Christchurch. Local seaplane service from Picton Harbour. Local airline to Wellington.

TIME: GMT plus 12 hours. Daylight saving time, plus 1 hour, in force from October to March.

HOLIDAYS: New Year's Day, Anniversary Day, Good Friday, Easter Monday, Labour Day, Sovereign's Birthday, Christmas Day, Boxing Day, Anzac Day, New Zealand Day.

POLICE/AMBULANCE/FIRE: Police Tel: 111. Ambulance, through doctor or in case of emergency Tel: 111.

EMERGENCY CO-ORDINATION CENTRE: S.A.R. Co-ordination Centre, Wellington. Tel: 881035. If in port contact Harbour Master.

TELEPHONE: Facilities exist to place telephones on board.

BANKS: Bank of New Zealand, High Street, Picton.

STORING: See "Prelims".

1. Storage from trucks only available.
2. No restrictions on storing.
3. Trucks can proceed alongside berth.
4. Forklift trucks can be used to handle stores.
5. Purchase of stores requires Customs Dept. approval.
6. Stevedores available for loading stores.

SHIP SUPPLY SERVICE: No ship supply services operate in this area.

Notwithstanding the above, there are a number of commercial operators in the district who have the capability to provide a variety of supply services.

There are sheltered areas in the outer reaches of the Marlborough Sounds which would be ideal for vessels transiting Cook Strait to take advantage of a ship supply service, incurring a minimum of delays in the process.

The Customs Department have advised that by prior arrangement it would be possible for a vessel in transit to take aboard mail and/or goods from a launch without completing full Customs formalities.

1. *Emergencies:*
   Contact: Port Marlborough New Zealand Ltd.
   Radio Call Sign: "Picton Harbour Radio".
   Radio frequencies: MF 2182 kHz or VHF Channel 16.
   Notice Required: 4 hours if possible.
   (NB: Helicopter available ex-Wellington).
2. *General Supply Services:*
   Various Commercial launch and barge services are available from Picton (Queen Charlotte Sound and Approaches) and Havelock, (Pelorus Sound and D'Urville Island). For further information contact Port Marlborough New Zealand Ltd.

Rendezvous points would depend on the needs of the vessel requiring the service, survey limits of the vessel providing the service and weather conditions prevailing at the time.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Limited service available. Drums are provided for on board use. All food waste must be kept in separate drums as this waste and any food contaminated garbage must be incinerated. Contact Port Company for details.

WASTE OIL DISPOSAL: Limited service available. Contact Port Company for details.

SEAMAN'S CLUBS: None.

CURRENCY: New Zealand Dollar (NZ$). U.S.$ 1.00 = NZ$ 1.78 (4.4.94).

DEVELOPMENTS: 6 deep water berths may be built at Shakespeare Bay with depth alongside 20.0 m.

AUTHORITY: *Operator:* Port Marlborough New Zealand Ltd, P.O. Box 111, Picton, New Zealand. *Tel:* 03-573-8000. *FAX:* 03-573-7659. *Contact:* Mr.B. Fitzpatrick, Managing Director. Mr.M. Santaana, Manager Operations.

Statutory Authority: Marlborough District Council. *Tel:* 03-578-5249. *Contact:* Captain J. Clark, Harbour Master.

TAHAROA: 38.11 S. 174.42 E.

LOCATION: The Port of Taharoa is situated on the West Coast of the North Island of New Zealand, in Lat. 38° 10.7′ S., Long. 174° 42.4′ E. It is one of the few ports in the world where a solid cargo, ironsand, is pumped in a slurry form and loaded into ships moored at a single point mooring buoy.

Kawhia Extended River Limits: Taharoa Harbour lies within the Kawhia Extended River Limits, which is delineated by a straight line commencing near Taranaki Point in a 270° direction to the East Point of Gannet Island, then 180°×15.5 miles, thence 090° to the shore.

PORT LIMITS: The port limits is the arc of a circle radius 2 miles centred on the pumping station, Lat. 38° 10.7′ S., Long. 174° 42.4′ E. and the pilotage district is the arc of a circle of radius 3 miles also centred on the pumping station.

There are no known dangers in the pilotage district, and the sea bed depth increases at a reasonably uniform gradient from the beach seaward.

The Motunau Beacons, which are unlit, are established some 4 miles South of the SBM in line bearing 158° (T). This line passes 835 m. inshore of the SBM, and from the North to the point where it crosses the Southern prohibited anchorage line gives a least depth of 22 m.

A 1.5 m. diameter wave rider buoy, which is difficult to see, is positioned some 0.5 miles N.E. of the SBM.

PILOTAGE: Pilotage is compulsory in the Pilotage District. Application for a Pilot should be made to B.H.P. – New Zealand Steel Mining Limited, telegraphic address "Ironsands Taharoa", via Awarua Radio.

Pilots embark and disembark by helicopter. Ships awaiting the Pilot, should lie, head to wind, about 3 miles W.N.W. of the buoy.

Depending on weather conditions ships can be berthed by day or night though much better conditions are required for night berthing. As a general but not absolute rule, ships can be berthed with a significant wave height of up to 3.5 m. and a maximum wind gust of 40 knots. While at night the maximum wave height must be less than 2.0 m., and the wind gusts less than 15 knots.

Also see "General".

ANCHORAGE: Ships awaiting the berth are normally anchored about 2 miles W.N.W. of the buoy in good holding ground. The anchorage is exposed to the Westward, and in weather conditions in which it is not possible to moor, ships should head out to sea.

Prohibited Anchorage: All that area bounded by straight lines, commencing at the low water mark in position Lat. 38° 10.8′ S., Long. 174° 42.4′ E. Thence to Lat. 38° 11.1′ S., Long. 174° 40.1′ E. Thence to Lat. 38° 10.3′ S., Long. 174° 42.15′ E., thence to the point of commencement.

The Northern and Southern limits are marked by rectangular beacons painted in red and white vertical bands. The Northern Beacons are in line bearing 088° (T), and the Southern Beacons in line bearing 081° (T).

NAVIGATION: *Lights:* Taharoa Main Light, exhibited from a 47.5 m. high frame work tower painted in red and white bands, in position Lat. 38° 10.0′ S., Long. 174° 42.3′ E. has the characteristics group flash 2 white every 20 secs. A fixed red obstruction light is also exhibited on the tower.

The SBM has white light flashing every 5 secs.

The wave rider buoy light has the characteristics group flash 3 white every 15 secs.

The prohibited anchorage beacons each exhibit a fixed red vertical light.

RESTRICTIONS: Arrival draft should be: Forward – 3 per cent of the vessel's overall length and Aft – propeller submerged.

HEALTH: *Quarantine:* 24 hours before the expected time of arrival, ships must send to B.H.P. – New Zealand Steel Mining Limited for onward transmission to the Department of Health in Hamilton, a message detailing the last port of call, the date of departure, and the state of health on the vessel.

Vessels calling regularly at Taharoa are usually given Pratique by radio, though Quarantine Officers reserve the right to inspect the vessel at any time.

RADIO/VHF: *Communications:* Ship loading at Taharoa must advise New Zealand Steel Mining Limited of their departure from the last port before arriving in Taharoa, and give their ETA.

The ETA must be updated 7 days, 3 days and 24 hours before arrival.

The ETA 3 days before arrival is particularly important, as special shift patterns have to be set for loading, which by agreement with the unions, are based on this arrival time.

The Port Operations Centre, which is manned only when a ship is in port or expected, is equipped with radio. (Medium frequency 2182 kHz, single side band, and VHF Channels 9, 10 and 16).

Ships calling at Taharoa should maintain a listening watch on 2182 kHz, at 0833 hrs. and 1503 hrs. New Zealand standard time, the day before arrival, and call up the Port Operations Centre, call sign "Port Taharoa", on Channel 9 when 2 hours out.

Radio messages to B.H.P. – New Zealand Steel Mining Limited should be addressed to "Ironsands Taharoa", via Awarua Radio, or alternatively Auckland Radio.

BERTHING: The berth is a single point mooring buoy, 11 m. in diameter designed by SBM Inc., using a catenary anchor leg mooring (CALM), to secure it to the sea bed. It is capable of mooring ships up to 150,000 tonnes deadweight.

There are 6 anchor legs, arranged radially 60° apart, each consisting of some 347 m. of 102 mm. chain, attached to a 9,000 kg. Bruce Mk II anchor. Each leg is pre-tensioned to 220 tonnes, and has a holding power of 400 tonnes.

The buoy is 1.64 miles offshore in position: Lat. 38° 10.6′ S., Long. 174° 40.25′ E. The depth of water at the buoy is 30 m. at MWL.

Loading: Loading rate 1,200 dry tonnes/p.h. on each line. Sand density 4.64 average.

MOORING: *Mooring Rope:* The mooring rope is a 65 m. endless grommet of 168 mm. diameter two-in-one braided nylon rope, which has a breaking strain of 1,000 tonnes. One end of the grommet is attached to the buoy, and the other end, when the ship is moored, is placed over the ship's single centreline mooring post.

The ship's end of the rope has a 5.5 m. soft eye protected with a chafing sleeve. An heaving eye, which is attached to a 60 m. heaving tail of 80 mm. two-in-one braided polypropylene rope, breaking strain 76 tonnes, is attached 1.5 m from the crown on one part of the ship end eye.

Ship's Equipment: To moor at Taharoa, a ship should be fitted with a mooring post (700 mm. diameter) on the centreline, between 2.0 m. and 3.5 m. from the fairlead. The post should be about 750 mm. in height and the top should slope forward.

The centreline fairlead should have minimum dimensions of 1,400 mm.×1,700 mm., and the bearing surface lined with stainless steel; if this lining is not fitted, all paint should be removed from the fairlead, and the bearing surface coated with tallow, before the ship arrives. Tallow will be supplied by B.H.P. – New Zealand Steel Mining Limited, but the ship must provide a suitable bucket, so that it can be transported from the Operation Centre on the helicopter.

A roller on a stand, 1 m. in height, should be positioned about 2.0 m. abaft the mooring post, and set slightly off the centreline.

The ship should have a 300 m.×80 mm. strand polypropylene messenger line, either on a warping drum, or suitably flaked out. To one end of the messenger line a 16 mm. polypropylene heaving line should be attached. The heaving line is then passed through the centreline fairlead, and led down the ship's side, (usually the port side, though the Pilot will confirm this when he boards) to about the after end of No. 1 hatch, from where it will be passed to the service vessel.

MOORING PROCEDURE: The service vessel will have checked the buoy, mooring rope and hoses before the ship arrives, and when the Pilot boards will stand off and wait for the ship to close the buoy. The Pilot will manoeuvre the ship to approach the buoy usually along the line of the hoses, and when about 300 m. from the buoy will instruct the service vessel to pick up the heaving line. The service vessel will then manoeuvre close alongside abreast of where the heaving line is prepared. The heaving line should be thrown to the service vessel foredeck, from where the crew will pass it aft to their winch. When this is done, the service vessel will steam ahead, to a position about 100 m. ahead of the ship, winching in the mooring messenger until there is about 6 m. inboard.

As both the ship and the service vessel steam slowly towards the buoy, the line should be paid out so as to keep the rope slack at all times, but at no stage should the rope be allowed to run aft of the ship's stern.

When the service vessel is close enough, the messenger line will be connected to the heaving tail. As the ship will be moving ahead while this is being done, any slack should be picked up, but under no circumstances should the rope be lifted out of the water between the ship and the service vessel.

As soon as the connection between the messenger and the heaving tail is made, the service vessel will steam clear, and the rope should be heaved in at a steady rate. Normally, the mooring line is stored on a platform on the buoy, so that sufficient weight must be put on the messenger to heave the mooring line into the sea. Once the mooring rope is clear, it is important that as the ship closes the buoy, only the slack in the ropes is picked up.

When the ship is about 15 m. from the end of the main mooring rope, the ship's end eye and 2 flotation covers may be lifted out of the water. Gradually, as the ship moves closer to the buoy, a little more of the rope may be lifted out of the water, until with the ship end eye of the main rope at the bull nose, there is about 15 m. from the stem to the point where the rope touches the water. Should the bows pay off, or the ship move astern, the heaving tail should be slacked down immediately, so as to maintain a minimum distance of 15 m. from the stem to the point where the rope touches the water.

When the rope is actually being made fast, it should hang almost vertically from the centreline fairlead.

HOSES: *Equipment:* The ship's manifold should be on the starboard side, abreast No. 1 hatch, loading through either 1 or 2 lines. The flanges must be standard 150 lb. ASA 12 in. flange, with 12×1 in. holes, 1 hole at the exact top. The hose handling derrick should be capable of plumbing over the manifold with sufficient height to lift a 10.7 m. hose just clear of the deck, and have a SWL of 8 tonnes.

4×15 mm. wire pennants 3.0 m. long, and 4 chain blocks, or tackles, will be required to make fast the hose hang off chains.

Picking up the Hose: As soon as the ship is fast, the service vessel will put a dinghy in the water, to bring the No. 1 hose pick-up line to the ship's side. An heaving line should be passed to the dinghy, so that the pick-up line can be brought on board. The pick-up line, which is a 55 m. length of 56 mm. square line polypropylene rope is then used to winch the first hose of the string to deck level where the derrick hook can be attached, and the hose lifted to its full extent.

In marginal weather conditions, a second heaving line should be passed to the dinghy, while the first is still being heaved in. This, when attached to the No. 2 hose pick-up line, is secured to the rail, and can be heaved in later. The dinghy can then be released, reducing the time it has to spend in the water.

When lifting the hose, the derrick should be plumbed about 1.5 m. inboard from the ship's side. This keeps the hose against the ship's side thus reducing the oscillating effect in marginal weather conditions.

With the first hose in the string lifted to its full extent, the hang-off chains can be grappled, brought on board and secured to a 15 mm. diameter wire pennant, attached to a chain block or tackle, so that the length of the unit can be adjusted if necessary.

Letting go the Hose: A small wire strop is passed through one of the eyes on the hose nipple, and anchored by an 80 mm. long by 24 mm. diameter stainless steel bar, to which is attached a heaving line. The lifting wire is hooked into the strop, and when all the connecting bolts are removed, the hose is lifted to its full extent and wire pennants disconnected from the hang off chains. The hose is then lowered into the water and when the weight comes off the lifting wire, the bar can be pulled clear.

MEDICAL: There is no resident doctor or nurse. The nearest hospital is in Te Kuiti about 1 hour's drive away over a bad winding road.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not possible.

GENERAL: *Provisions:* Supply of provisions, which come from Hamilton, can be arranged if adequate notice is given.

Weather: The prevailing wind is Southwesterly. The winds are usually stronger in Winter and Spring than at other times of the year, though gales can occur at any time, from any direction.

The significant height of the combined sea and swell is above 1.5 m. for 50% of the time, and the maximum recorded sea height has been 12 m.

Customs and Agriculture: Officials from the Departments of Customs and Agriculture will clear the vessel on arrival, and before departure.

Regulations: The general harbour regulations for New Zealand are applicable.

Tidal Streams and Currents: The tidal stream sets Northward with a rising tide and Southward with a falling tide, but these are weak and generally do not affect mooring.

During Southwesterly weather an intermittent current sets Northward parallel to the coast, and can reach a velocity of 1.0 – 1.5 knots.

Agency: New Zealand Steel Mining acts as its own Agent, and will act for others when prior arrangements have been made.

Administration: The Port is under the jurisdiction of the Marine Division of The Ministry of Transport, but is leased to B.H.P. – New Zealand Steel Mining Limited, who own the buoy and the loading equipment.

The Pilots are contracted to B.H.P. – New Zealand Steel Mining Limited, and remain on board during the time the ship is moored, acting as Loading Masters. A change of Pilots usually takes place at 0630 hrs. and 1830 hrs.

OPERATOR: B.H.P. – New Zealand Steel Mining Ltd., Taharoa, Te Anga, Private Bag, Te Kuiti, New Zealand. *Tel:* Te Anga (0813 67) 859, Auckland (09) 309-3794. *Telex:* NZ 21172. *FAX:* (081) 367350, Auckland (09) 393794 (Group 3). *Cables:* Ironsands Taharoa. *Contact:* G. Hook, Operations Manager.

TAURANGA (Mount Maunganui): 37.39 S. 176.11 E. (See Plan)

PORT LIMITS: The arc of a circle radius 2 miles centred on the summit of Mount Maunganui (Lat. 37° 37.9′ S., Long. 176° 10.3′ E.), from the N.E. Coast of Matakana Island to a position 093° from North Rock Light (4.25 cables N.N.E. of Mount Maunganui summit), thence 273° to the light and thence South to the coast of Mount Maunganui.

The port of Tauranga, situated in the Bay of Plenty on the North Island's East coast, is the principal export port of New Zealand, and also the only natural deep water port between Auckland and Wellington providing safe berthage in all weathers.

DOCUMENTS:

6 Crew Lists.
1 General Declaration Form.
1 Search List (on regulation form).
1 Bonded Store.
1 Gift List (Parcel List).
1 M.O.T. Declaration of Safety Certificate.
1 Maritime Declaration of Health.
1 Cargo Manifest (for each Port of discharge).
1 Derat Certificate.
1 Clearance, Last Port.
1 Poisons on Board.
1 Firearms on Board.
1 Ship's Papers.
2 Master's Certificates (Form AGL36).
2 Master's Bond and Guarantee (only if animals are being carried).

PILOTAGE: Pilotage is compulsory for merchant vessels of over 100 tons gross tonnage; Pilot boards vessel about 2.5 miles N.E. of Mount Maunganui light structure. All vessels inward bound must give 24 hours' notice by radio of their ETA off the port limits. If bound from Auckland or near ports, vessels send their ETA immediately on departure from that port.

A second message confirming or amending the first is to be sent 4 hours before the ETA. Should, however, the vessel expect to arrive later than her 24-hour message, her 4-hour message shall be sent 4 hours before the ETA given in her original message. ETA is also required on Friday before 1600 hrs. for vessels arriving over the weekend.

All communications, which should be addressed to "Operations Manager, Port of Tauranga Ltd.", will be attended to at all hours of the day or night.

Two pilot launches. One with length 14.6 m. speed 10 knots, painted international rescue orange. And the other, length 13.7 m., speed 18.5 knots, aluminium hull, with cabin painted international rescue orange. Both fitted with radar, VHF standby on Channels 16 and 12. Working Channels 14 and 11 and R/T 2182 kHz, 2162 kHz and 2045 kHz.

ANCHORAGES: Good holding ground in most conditions can be found in a position about 3.0 miles N.E. of Mount Maunganui. The Quarantine Anchorage is in a position bearing 075° (T) distance 3.25 miles from Mount Maunganui Light. Prohibited anchorage on or near No. 1 Reach Leads.

APPROACHES: Entry and exit is generally at slack tide, day and night. Berthing normally takes place 30 minutes after negotiating the harbour entrance. Tankers will be berthed where practicable, starboard side alongside (bow out), to facilitate emergency departure. The entrance approaches are dredged, giving a minimum depth of 14.1 m. During Northerly and Easterly gales, breaking seas may be experienced in this vicinity, particularly on an ebb tide. Inner Harbour navigable channels have been dredged to 12.9 m. The Western Channel is now closed to shipping.

RESTRICTIONS: Vessels can berth and unberth by day and by night, but those over 110 m. in length are generally handled at slack water.

MAX. SIZE: Max. length permissible is 290 m., no restrictions on beam. Max. arrival and departure draft at high water is 13.0 m. and at low water 11.7 m.

HEALTH: Radio notification to be sent to "Port Health Tauranga", regarding state of health of crew and ETA 24 hours before arrival requesting Radio Pratique.

Pratique is granted by Port Health Officer on arrival if Radio Pratique not requested or granted. Notification should be made by radio to Port Health in case of suspected disease or fever on board.

Pratique is automatic if vessel has been previously cleared at another New Zealand port.

RADIO/VHF: The port of Tauranga Signal Station, call sign "Tauranga Port Radio", call sign ZMH 70, is fitted with radar, VHF and R/T and is manned 24 hours a day. Listening watch on 2182 kHz, 4125 kHz and VHF Channels 16 and 12.

TUGS: 3 tugs are available with bollard pulls of approximately 40, 28 and 15 tons. They usually join inward vessels in the vicinity of the Harbour entrance. Tug's lines are normally used, for which there is no extra charge.

BERTHING: The quay type concrete wharf at Mount Maunganui is 2,055 m. in length, (nominally 11 berths), and is fitted with wooden faced piling and rubber buffers. A linkspan is situated in the centre of the wharf area.

The quay type concrete wharf at Tauranga – Sulphur Point is 600 m. in length (nominally 3 berths), it is fitted with wooden faced piling and rubber buffers.

Berthing Facilities:

Commencing from the North, berths are numbered accordingly.

Mt. Maunganui:

No.	*Length* (m.)	*Distance from North End* (m.)	*Depth* (m.)	*Max. Draft at HW* (m.)
1	170	0 – 170	10.4	9.8
2	170	170 – 340	10.4	9.8
3	170	340 – 510	10.6	11.7
4	170	510 – 680	9.5 – 10.4	11.7 – 9.0
5 Ro/Ro	228	680 – 908	9.5	9.0
6	150	962 – 1112	10.4	9.8
7	160	1112 – 1272	10.4	9.8
8	180	1272 – 1452	12.5	11.7
9	180	1452 – 1632	11.6	10.7
10	200	1632 – 1832	11.6	10.7
11	223	1832 – 2055	12.5	10.7 – 11.7
Cement/Tanker			13.0	12.0
Tauranga – Sulphur Point:				
23	200	001 – 200	14.5	13.2
24	200	200 – 400	14.5	13.2
25	200	400 – 600	14.5	13.2

Ro/Ro: Ro/Ro facility available at Common-User Berth. Linkspan ramp 8.6 m. trafficable width, forklift capacity 52 tons payload, front axle load 55 tons. A number of forklifts up to 40 tons capacity are available.

Cruise Terminal: Cruise vessels berth at Berth No. 1, no terminal available.

Private Wharves: Yacht marina with berthing facilities for 560 craft.

Cargo Storage: On Mount Maunganui Wharf, 6 cargo sheds 22,956 sq.m., dry timber store 1,016 sq.m., transit coolstore 3,700 sq.m., covered verandahs 2,783 sq.m., coldstore 22,500 sq.m. (20,300 tons capacity), woodchip storage 80,000 tons, log storage over 122,000 tons, a 3,000 ton grain silo, an 8,000 ton cement silo and container storage on 30.34 ha. open areas. 100 refrigerated container power points and a container wash are also available.

Off wharf, petroleum products tank storage 115,000 tons, cement storage 2,250 tons, fertiliser storage 7 ha. Covered storage bulk storage for methanol and caustic soda. Salt refinery up to 60,000 tons annually.

At Tauranga – Sulphur Point Wharf, 2 cargo sheds totalling 20,000 sq.m., dairy industry storage shed of 6,900 sq.m., 27.5 ha. paved storage for containers and general cargo and 494 reefer points.

Principal Imports and Exports:

Imports: Cement, chemicals, fertiliser bases, grain, petrol products, salt, steel and general cargo.

Exports: Butter, cement, cheese, kiwifruit, livestock, logs, milk powder, steel, timber, woodchip, woodpulp and general cargo.

Consolidation: Full cargo forwarding service available by arrangement.

Computer Systems: Provided by stevedores/marshallers.

Rail Facilities: Transportation links are provided by roadways throughout the port region, and by major rail marshalling yards connected to the East Coast and Main Trunk railway systems, which are immediately adjacent to the wharf rail network.

CRANES: A 40 tonne lift SWL multi-purpose gantry crane for unit loads, bulk granular products, logs and containers, operates at the Southern end of the Mount Maunganui Wharf (from the 1,600 m. to the 2,055 m. point), electro-hydraulic grab available for gantry crane. Other equipment, owned by private stevedoring companies, includes forklifts with up to 40 ton capacity, tower cranes, 2 Gottwald HMK 8029.S cranes and log handling equipment with up to 45 ton capacity. A weighbridge with 60.0 tonne capacity, and 10 hoppers including 2×300 ton capacity hoppers are available for bulk cargo discharge.

2×40 ton (55 ton post-Panamax) container cranes are operating at Tauranga – Sulphur Point Wharf.

STEVEDORES: ETA to stevedoring companies is usually worked in conjunction with ETA to Agent.

Working Hours: 7 days a week, 0700 hrs. – 1530 hrs., 1530 hrs. – 2330 hrs., 2330 hrs. – 0700 hrs.

MEDICAL: Unless specifically required for arrival, Agents do not require advice. Local medical practitioners are consulted and services of one public and two private hospitals are utilised.

Mount Medical Centre	Tel: 0064-7-5753073
Dee Street Medical Centre	0064-7-5754057
Omanu Medical Centre	0064-7-5757188
Arataki Medical Centre	0064-7-5755077
BayCare Medical Centre	0064-7-5788111
Tauranga Medical Centre	0064-7-5789059

Tauranga Hospital is 12 km. from the port. Tel: 0064-7-5778000.

TANKERS: Discharge of black and white products is carried out at a specially built tanker berth, permissible draft presently 12.5 m. Both products are discharged through 250 mm. pipelines. The flexible connection to ship is 200 mm.

Chemical tankers discharge and load at the same facility. Limited waste oil facilities available, removed by tank truck.

Cement/Woodchips: Bulk cement discharged via pipeline on tanker berth to adjacent silos. Woodchip carriers loaded by conveyor across tanker berth from adjacent stockpile.

DENSITY: Salt water, 1025.

FRESH WATER: Fresh water is supplied by pipeline at 20 tonnes/p.h., prior arrangements must be made with the Operations Manager for quantities in excess of 1,000 tonnes.

FUEL: Bunkering connections are placed at Berths No. 1 – 11 and Cement Tanker Berth. LMFO 40 and LMFO 180 are supplied through a 10 in. line to all bunker points at rates of up to 150 tonnes per hour. Marine gas oil is also available ex-road tanker.

FIRE PRECAUTIONS: The tanker berth is securely fenced and the gate is manned by the Company's Security Staff to prevent entry by unauthorised persons. A pass system operates. Normal precautions are taken. The berth is equipped with a remotely controlled foam monitor.

REPAIRS: All types of engine and deck repairs are possible. A slipway can take vessels of 610 tonnes displacement and up to 56 m. length.

SURVEYORS: *Registered Cargo Surveyors:* Cargo & Marine Services, P.O.Box 5001, Mount Maunganui South. Tel: 0064-7-5756988. Fax: 0064-7-5758777.

Classification Societies – Surveyors: American Bureau of Shipping: Surveyor N. K. Farell, P.O.Box 1974, Auckland. Tel: 0064-9-3031284. Fax: 0064-9-3095655.

Bureau Veritas (NZ) Ltd., 27 Bath Street, Parnell, Auckland. Tel: 0064-9-3098279. Fax: 0064-9-777633, exclusive Surveyor: G.Anderson.

Lloyd's Register of Shipping, P.O.Box 2682, Auckland. Tel: 0064-9-733311. Fax: 0064-9-3095786. Cables: "Lloydsreg". Principal Surveyor: L.Johansson.

United States Salvage Association Inc., Non-exclusive Representatives: G. W. Dunsford Marine Ltd., P.O.Box 46-216, Auckland. Tel: 0064-9-3781254/5/6/7. Fax: 0064-9-3781258.

OPENING/CLOSING HATCHES: Usually performed by stevedores and/or ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams tobacco or 50 cigars. 1 part bottle of spirits and 4.5 litres of wine or beer. Vessels are entitled to an issue of duty free stores every 10 days while remaining on the coast.

REPATRIATION: All facilities exist.

AIRPORT: The airport is situated 1.6 km. from the wharf and is served with regular internal flights to other main centres (Wellington – 544 km., Auckland – 221 km.), where overseas flights may be connected with.

TIME: GMT plus 12 hours. GMT plus 13 hours in Summer.

HOLIDAYS: New Year's Day; 2nd January; Picnic Day and Anniversary Day, both in latter part of January; Waitangi Day, 6th February; Good Friday; Easter Monday; Anzac Day, 25th April; Queen's Birthday, early June; Labour Day, late October; Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: All connected through automatic exchange, Emergency No. 111.

EMERGENCY CO-ORDINATION CENTRE: When vessels are in port, any queries should be directed to the Port Company's Signal Station which is manned 24 hours per day. For specific emergencies (Fire, Police, Ambulance) dial 111.

TELEPHONES: Telephones are placed on board all ships when they arrive.

SERVICES: Local compass adjusters are available. Ship's stores can be provided by local Providore firms. Fumigation can be arranged. Ships' garbage is collected daily. Limited facilities for discharge of tank washings exist.

STORING: Vessels can be stored by truck – barges not used. Trucks can proceed alongside at the berth and remain close alongside if not interrupting cargo operations.

Forklift trucks may be used to handle stores but normally not necessary. Customs regulations in force when Bonded Stores are being loaded. Storing carried out by ship's crew and providores.

SHIP SUPPLY SERVICE: A small scale launch service is available when required for the ship-to-shore transport of personnel and/or essential stores and/or sick crew members. This can be arranged through local shipping agents.

SHORE LEAVE: No restrictions.

GARBAGE DISPOSAL: Drums provided for daily collection, 0500 – 0600, 1200 – 1300, 1600 – 1700 hrs. Port service charges cover the first 4 drums, excess NZ$ 32/drum. Service provided by Port of Tauranga Ltd.

WASTE OIL DISPOSAL: Service by road tanker. Charges NZ$ 65/hr. plus GST plus disposal charges.

Contact: Pete's Takeaways, P.O.Box 775, Tauranga. Tel: 0064-7-5441016.
